Last year he again ran afoul of the issue, proposing at one point that deep cuts be made in benefits, on grounds they were needed to keep the system solvent. Critics quickly accused him of trying to balance the budget on the backs of the elderly, saying his cuts were more than were needed simply to stabilize Social Security. He withdrew the proposals in his one such setback of the year, and named an advisory commission to report this winter.

There now is an expectation in Congress that Social Security will be at the top of the agenda after the November elections, if only to prevent the system from going insolvent in July next year as projected.

Administration officials, speaking on condition they not be identified, also see a harbinger for Social Security in the appointment last week of Harvard economist Martin S. Feldstein as chairman of the president's Council of Economic Advisers. Feldstein has argued that future increases in Social Security costs must be held down and that benefits can safely be trimmed for recipients who are not poor. His work on the subject was an important factor in his selection by White House officials looking at the Reagan economic agenda for next year.

What kind of cuts are proposed also may depend in part on the recommendation of the Social Security advisory panel, which is divided between one group that wants to cut hard and another that thinks the system will revive when the economy does and that gentler remedies will do.

Reagan last year proposed, among other things, stricter eligibility standards for disability benefits and sharp cuts in the benefits of workers who retire before age 65 in the future. At the other extreme are organized labor and some Democrats who have proposed no benefit cuts and instead would finance Social Security—or at least the Medicare segment of it—partly out of income tax revenues.

A middle-ground alternative, which many members of Congress seemed to find attractive last year, would be to curtail future cost-of-living increases in benefits. Reagan so far has shied away from this.

After Reagan indicated two weeks ago that he remains determined to build up the defense budget, one official said: "We are stuck here and the battleground is going to have to be entitlements, and it's going to cause quite a stir in the administration."

"If this is really what the president wants, we are going to have to fish or cut bait after the November elections," the official said.

But he cautioned that Reagan's intentions could change in the next five months, just as they did last year on taxes. "The true battleground is going to be late in the fall," he said. "I am sure Reagan is going to be tested over this."

In fact, many conservative economists outside the administration, as well as a number of senior presidential aides believe Reagan has yet to really face the consequences of his defense buildup.

"The dilemma Reagan and Congress will face if they want to go whole hog on defense is much more serious," said Penner. He noted that Reagan already has cut into the "muscle" of many domestic programs. "The options are not happy ones, and that's why I wouldn't rule out further tax increases" he added, even though Reagan is struggling to quite a conservative revolt over the tax increase bill now pending.

"I really think, if they want to go ahead on defense they are going to have to have tax increases or huge deficits."

Added one presidential aide: "I think we are going to be fighting this battle for the rest of this administration." ●

MANAGEMENT OF PUBLICLY FINANCED HEALTH PROGRAMS

● Mr. DURENBERGER. Mr. President, we are all familiar with the problem of high health care costs. Nowhere is this more evident than in the Medicare program, where actual costs in 1980 exceeded initial projections by \$30 billion.

Part of the problem is reimbursement policy. Part of it is inflation. And part of it is program management. The management of public programs differs from that of the private sector. The inefficiencies we pin on the bureaucracy are often a result of structural constraints imposed by the policies of public programs.

John C. Anderson, Ph. D., an associate professor of management sciences at the University of Minnesota, has recently published a study with Kathleen Sullivan entitled, "Publicly Financed Health Programs: Managerial Problems and Opportunities." It is part of a series on health issues supported by Hoffman-LaRoche, and it is a much needed examination of the management of public programs.

I encourage my colleagues to read the study's summary and conclusion, which I have included as part of the RECORD. The complete study is also well worth reading.

The material follows:

SUMMARY AND CONCLUSIONS

The several decades of public debate on a variety of proposals for expanding the role of government in the financing and administration of health care for the American public is evidence of a lack of broad public consensus on such health-related social goals as assurance of access, quality and equity in the distribution of health services, and containment of rising health care costs. We have not yet resolved a basic issue concerning whether health care is a right or a privilege. In addition, there is not yet a U.S. health policy with clearly specified priorities, nor is there consensus on an optimal

approach to organizing an administrative and financing structure to attain those goals. Partially as a result of these factors, the job of the public program manager is exceedingly difficult. A fragmented health care system with dissimilar organization, philosophy, structure and mission currently exists with managers trying to contain costs, improve quality and extend access all at the same time. As health care expenditures absorb an increasing proportion of the Gross National Product and as public resources become scarcer, a formula for the optimum expenditure of health care dollars becomes more essential. In the development of such a formula or policy it is undoubtedly useful to draw upon the lessons learned in the past 15 years experience of the largest public health care programs, Medicare and Medicaid.

It is the objective of this report to examine the areas wherein sound management theory has positively impacted publicly financed health programs. Using a well-defined framework for analysis, this report identifies the types of internal, external, and environmental management opportunities and constraints that have characterized the two largest publicly financed health care programs, Medicare and Medicaid and makes some observations concerning the development of additional programs and/or national policy.

Key to any analysis of the performance of the Medicare and Medicaid programs is the fact that "good" government management is not synonymous with "good" business management. Administrators in the public sector, particularly in Medicaid and Medicare, must frequently accept goals that are set by legislation. They are required to run organizations that are designed by individuals and agencies beyond their domain, work with people whose careers are outside their control, and attempt to accomplish massive objectives with the application of severely limited resources in insufficient time. Business managers limit their objectives to a set of tasks consistent with their resources. These public sector conditions, radically different from the conditions in which private managers operate, must be carefully considered in evaluating management performance in the public sector, not to protect the sensibilities of government managers but to more clearly identify the real sources of constraints in public program management.

The political environment in which Medicare and Medicaid function constrain the process of long-term resource utilization planning. The Congress, or a particular State legislature, is totally isolated from the day-to-day operations of the programs. Moreover, unlike management committees in the private sector, legislative bodies are charged with oversight responsibilities for a myriad of programs, projects and activities which limits their ability to spend too much time on any individual area. Also, some State legislatures are only in session for several months during a year. This lack of continuity constrains any ongoing development of long-range goals and priorities. Because things are so dynamic and conflicting, management frequently operates in a responsive mode rather than with a predictive, anticipatory problem-solving approach.

In the face of multiple political power centers impinging on the authorities and resources of program management, strategic planning is often given a lower and optional priority. Instead, crisis management frequently substitutes for strategic planning,

and services or eligibility are cut in an effort to immediately impact the bottom line. The results of these actions in terms of program effectiveness and capacity can be disastrous and compromising in terms of the intent of both programs.

Evaluations of Medicare and Medicaid Management performance are necessarily imprecise and problematic due to the lack of data and clear-cut criteria against which to measure the attainment of objectives. Performance standards for many aspects of program operation are hard to come by. Specific characteristics of public program experience that hamper not only management performance but the development of performance standards for purposes of evaluation and planning include the following:

Program objectives and relative priorities are subject to constant reshaping by political forces with the result that substantial program changes occur so frequently there is never sufficient stability to observe and evaluate the impact of management decisions over time, and those decisions are frequently made in a crisis environment as a result of political pressures.

The distribution of decision-making authorities within and among public agencies, legislative bodies, and program constituent organizations seriously compromises the adequacy of management's authority and resources to implement its decisions.

The budget constraints imposed upon funding bodies or their unwillingness to invest adequate resources in the staffing and technology of administering organizations hampers the collection and analysis of data critical to the decision-making process.

In addition, Medicare and Medicaid performance is often hampered by legislation and regulation at the state or federal level which is sometimes contradictory and compromising to optimally efficient and effective program management. It has been recognized that the stability of the program administering agency impacts its relationship with other organizations in the system. Another significant obstacle with respect to managing publicly financed health programs is the apparent organizational flux that so often characterizes these programs. It is not uncommon for there to be frequent change in the designated administering agency/or fiscal intermediary. These changes make it difficult to maintain beneficial relationships with the legislature and provider communities. Lack of program managers autonomy and authority over external entities such as county agencies or state treasury department staff whose contributions impact the bottom line of both programs is another noteworthy constraint.

Finally, the complexity of the Medicaid eligibility process requires enormous staff time and funds that could otherwise be applied to beneficiary services. The elimination of this kind of burden should be a high priority in future U.S. health policy.

The above mentioned constraints limit management capabilities within Medicare and Medicaid. The obstacles are, however, virtually inherent in the current publicly financed program environment. As a result, future U.S. health policy development must be cognizant of the limitations of public administration in a health system characterized by instability, distance from oversight committees, and lack of managerial autonomy and performance standards.

Viewing existing performance of Medicare and Medicaid in terms of criteria such as efficiency, effectiveness, capacity and flexibility, raise some provoking questions. Enough

data exist to strongly speculate that current programs do not provide for the most efficient use of resources. Some effectiveness in the operation of specific programs has been achieved, yet we may be failing to achieve maximum effectiveness toward the broader goals of assurance of access, quality and equity in the distribution of health care services. Serious capacity issues are apparent in terms of organizational and economic resources. Finally, existing programs have exhibited flexibility to meet evolving needs yet have done so without evidence of a blueprint for the future.

There are, however, some managerial initiatives that can be and in selective instances have been pursued within the current context of publicly financed health programs. These initiatives, described more fully in the body of the report, represent opportunities for management. They include:

The application of advanced claims processing technology to provide managers with key program data and information in a timely manner to facilitate informed decisionmaking;

The careful use of edits in the claims processing system to protect the fiscal integrity of the program and insure the appropriateness of vendor payments;

Timely claims processing, communication with, and payment of providers to ensure maximum provider participation and consequent beneficiary access to care;

The implementation and operation of program controls and the tracing and analysis of program performance to design and implement corrective action strategies in a timely, cost-effective manner;

The closing of policy loopholes and deletion of unneeded and contradictory program policy; an ongoing effort to evaluate and assess the program from this perspective will enhance overall program operation;

Quality performance in audit functions and settlement of cost reports will lead to tighter control within the program;

Working to amend legislation that is unfavorable to the efficiency and effectiveness of public programs is a continuing and necessary activity as the dynamic health care environment continues to evolve;

The proper allocation of administrative resources including spending one dollar to save two or more where such action is cost justified; in certain cases increases in administrative costs will yield substantial returns leading to greater operational efficiency;

The design of the internal Medicaid agency hierarchy to ensure that units key to better program performance are at a level high enough to carry out their corrective action strategies. Proper authority must be vested in those individuals responsible for performance if successful implementation is to be achieved.

To date these initiatives have often occurred sporadically, with too little consistency across individual state and federal agencies. Recent experience has evidenced management improvement of program operations in both Medicare and Medicaid, yet little effort has been concentrated on longer range planning and analysis.

To alleviate some of the obstacles that are seemingly part and parcel of the public sector, it is important that program managers and committees try to inject as much stability in the process as possible. Furthermore, it is imperative that sufficient information for planning and control is generated so that budgets can be justified and policy changes can be affected. In addition,

development of and adherence to performance standards would go a long way in convincing decision makers of the validity of certain management initiatives. Allocating staff to perform third party liability recovery functions and quality control functions contributes to programwide cost effectiveness. Finally, a problem anticipation mechanism must be developed and truly operational so that harmonious program objectives are pursued and the crisis problem solving mode gives way to a well-reasoned managerial approach.

In turn we need to press hard for the utilization of performance standards in current programs. We need comparable dimensions across programs to map out the future direction of U.S. policy. Information on program operations must flow up to the decision makers, and policy must flow down. The lines of communication are broken in the current system. The solution is not to develop a new arm of government, but rather to recognize the limitations of publicly financed health programs and aggressively seek consistent indicators of performance and program accountability. What seems essential to significantly improve the performance of publicly financed health program management is to reduce the impact of political conflict and instability on program operations, either by reducing the levels of conflict and instability in the environment or by shielding the administrative organizations from them. Until a system can be designed that addresses these deficiencies in the variety of organizational structures that characterize publicly financed programs, the public sector should not be further burdened with additional administrative responsibilities by the extension of coverage to new segments of the population or new areas of service.■

THE AVIATION HALL OF FAME

● Mr. GOLDWATER. Mr. President, serving as the statutory agent for the Aviation Hall of Fame in Dayton, Ohio, I offer for insertion in the RECORD an audit report for the calendar year 1981 as prepared by Coopers & Lybrand, and I also offer for insertion in the RECORD the program for 1981.

The material follows:

NATIONAL AVIATION HALL OF FAME, INC.

REPORT ON EXAMINATIONS OF FINANCIAL STATEMENTS FOR THE YEARS ENDED DECEMBER 31, 1981 AND 1980

COOPERS & LYBRAND,

Dayton, Ohio, June 25, 1982.

BOARD OF TRUSTEES,
National Aviation Hall of Fame, Inc.,
Dayton, Ohio.

We have examined the balance sheets of the National Aviation Hall of Fame, Inc. as of December 31, 1981 and 1980, and the related statements of revenue and expenses, changes in fund balances and changes in financial position for the years then ended. Our examinations were made in accordance with generally accepted auditing standards and, accordingly, included such tests of the accounting records and such other auditing procedures as we considered necessary in the circumstances.

In our opinion, the financial statements referred to above present fairly the financial position of the National Aviation Hall of Fame, Inc. as of December 31, 1981 and 1980, and the results of its operations and

the changes in its financial position for the years then ended in conformity with generally accepted accounting principles applied on a consistent basis.

COOPERS & LYBRAND,
Certified Public Accountants.

NOTES TO FINANCIAL STATEMENTS

1. Summary of significant accounting policies

The Corporation was created by an Act of Congress, Public Law 88-372, July 14, 1964, to honor outstanding persons in the field of aviation. The Internal Revenue Service has confirmed the status of the Corporation as a tax-exempt public foundation. On December 18, 1981, the Corporation changed its name from Aviation Hall of Fame to National Aviation Hall of Fame, Inc.

Furniture, fixtures and equipment are recorded at cost when purchased or at estimated values when received as a donation. Depreciation is computed on the straight-line basis over the estimated useful lives of the assets.

Donated materials other than collections are recorded at their estimated value at the date of receipt. No amounts have been reflected in the statements for donated office space and services as no objectives basis is available to measure the value of such services. Donated office space consists of an office and storage provided by the City of Dayton. Donated services consists of time donated by the Board of Trustees for the Corporation.

The Corporation offers both one-year and two-year memberships to the public. Membership dues received for the current year are recorded as income at the time the membership period commences. Deferred membership income, representing dues the second year of two-year memberships, is recognized as income during the second membership year.

Biographical research program resources are restricted by the donor, grantor, or other outside party for operating the biographical research program, and are deemed to be earned and reported as revenues of the operating fund when the Corporation has incurred expenditures in compliance with the specific restrictions. Such amounts received but not yet earned are reported as restricted deferred amounts.

2. Collections

The Corporation has acquired by purchase or through donations, various models, books and other memorabilia relating to the field of aviation since its founding. Because the value of these items are not readily determinable and they can be considered inexhaustible items, the Corporation has not capitalized them. The value of objects acquired by gift for which the Corporation can make a reasonable estimate is reported as gifts in the statement of revenue, expenses and changes in fund balance.

3. Fund balances

The capital expenditure fund is intended to provide funds for the purchase of a facility for the Corporation. The Board has directed that all donations received from enshrinees or their families and income earned from investments applicable to capital expenditure fund be added to this fund.

In 1981, the Board of Trustees established the Founders Fund for special projects undertaken by the executive director of the Corporation. No expenditures can be made from the fund without the approval of the Board.

The promotion fund was established by the Board in 1978 for promotion of the Corporation. The Board authorized the expenditure of these funds during 1981.

4. Management contract

The Corporation contracts with James W. Jacobs & Associates, Inc. on an annual basis to provide consultation and professional services to maintain operations, expand membership, sponsor events and any other services required by the Corporation. Management fees paid amounted to \$25,535 and \$26,400 in 1981 and 1980, respectively.

5. Deferred restricted biographical research program

The biographical research program began during 1981. Contributions received during 1981 totaled \$18,000. No funds were expended.

THE AVIATION HALL OF FAME

Dedicated to honoring the outstanding pioneers of aviation, the Aviation Hall of Fame was conceived by James W. Jacobs in 1958 to more fully recognize the achievements of the men and women of our nation contributing to the various aspects of successful flight. Through his efforts, and with the support of the Dayton Area Chamber of Commerce, he, Gregory C. Karas, John A. Lombard, Larry E. O'Neill and Gerald E. Weller formed the National Aviation Hall of Fame, a not-for-profit Ohio corporation, in October 1962. The first Enshrinement Ceremonies were held in December 1962.

In response to the wide public acceptance and support of the National Aviation Hall of Fame, a bill was introduced in Congress to form a national organization to be known as the Aviation Hall of Fame. This bill was passed by Congress as Public Law 88-372 and signed by President Johnson on July 14, 1964.

Today, the Aviation Hall of Fame is a public foundation and is required to file an annual report to Congress. However, it re-

ceives no federal, state or local tax revenues. It is supported solely through tax-deductible individual and organizational membership dues and contributions.

Tonight, as the result of the generous efforts of many members throughout the world, the Aviation Hall of Fame enshrines four more outstanding aviation pioneers. The ninety-three so honored represent the history of flight—and include some who dreamed of its possibilities, some who gave their lives in its cause, some who made it a practical reality, and some who have shown the way to the limitless universe.—A. G. LIEFKE, President.

1981 NOMINEES FOR ELECTION TO THE AVIATION HALL OF FAME

The following aviation pioneers were the Nominees for election to the Aviation Hall of Fame in 1981. The four honored tonight were selected in accordance with the procedures and guidelines prescribed for the Board of Nominations and the Board of Trustees.

Edmund T. Allen, Orvil A. Anderson, Frank M. Andrews, John L. Atwood, Olive Ann Beech, Giuseppe M. Bellanca, Patrick N. L. Bellinger, Donovan R. Berlin, Richard I. Bong, Albert Boyd, Mark A. Bradley, Jr., Thomas E. Braniff, Lewis H. Breton, Walter R. Brookins, Harry A. Bruno, W. Starling Burgess, Marion E. Carl, Washington, I. Chambers, Charles deF. Chandler, Godfrey deC. Chevalier, Frederick C. Crawford, A. Scott Crossfield.

Charles S. Draper, Oliver P. Echols, Carl B. Eielson, Henry Ford, Joseph J. Foss, Robert G. Fowler, Jack Frye, Artemus L. Gates, Harvey Gaylord, Harold L. George, Daniel J. Houghton, Frank M. Hawks, Edward H. Heinemann, Jerome C. Hunsaker, David S. Ingalls, Charles S. Irvine, Daniel James, Jr., Alexander Karvell, Oakley G. Kelly, Hugh J. Knerr, Ezra Kotcher, Jerome Lederer.

Thaddeus S. C. Lowe, Theodore C. Lyster, Henry T. Merrill, John C. Meyer, Thomas deW. Milling, Marc A. Mitscher, William A. Moffet, Thomas H. Moorer, Edwin C. Musick, Erik H. Nelson, Ruth D. Nichols, Emmet O'Donnell, Robert Olds, Clyde E. Pangborn, Billy Parker, Harold F. Pitcairn, Robert W. Prescott, Alfred M. Pride, Arthur W. Radford, Jennings Randolph, Edwin W. Rawlings, Frederick B. Rentschler.

John Rodgers, Charles E. Rosendahl, Ralph Royce, Walter M. Schirra, Jr., Lowell H. Smith, Lawrence B. Sperry, Sr., Apollo Soucek, Lloyd C. Stearman, James B. Stockdale, William B. Stout, Hoyt S. Vandenburg, Jesse G. Vincent, Wernher von Braun, Chance M. Vought, James E. Webb, Edward C. Wells, Thomas D. White, Ennis C. Whitehead, Alford J. Williams, Thornton A. Wilson, Kenneth B. Wolfe, Katharine Wright.

AVIATION HALL OF FAME—1981 ENSHRINEES

Lawrence Burst Sperry, Sr. (1892-1923) honored for his outstanding contributions to aviation by his pioneering inventions in the field of automatic flight stabilization and aircraft instruments utilizing the principles of the gyroscope that made flying safer and ultimately led to the automatic pilot and the achievement of controlled "blind" flight; his pioneering work in developing one of the world's first guided missiles incorporating an automatic flight control system; his role in building significantly advanced design aircraft; and his creating one of the world's first true sport planes that helped popularize private flying.

Edward Henry Heinemann, (1908-) honored for his outstanding contributions to aviation by his contributions as an aircraft designer and aeronautical engineer in the development of carrier-based attack aircraft and dive bombers crucial to the needs of the United States Navy during World War II; his role in the development of highly-advanced jet and rocket-powered research aircraft for exploring transonic and supersonic flight regimes; and for his development of a vitally important series of carrier-based attack and fighter aircraft that served the nation with distinction in Korea and Southeast Asia, and still serve today in the ongoing struggle to preserve world peace.

Charles Stark Draper, (1900-) honored for his outstanding contributions to aviation and space technology by his development of gyroscopic fire control systems and inertial guidance and navigation systems for aircraft; his development of precision computer-controlled and programmable inertial guidance and navigation systems that enable the United States to produce reliable ballistic missiles for defense and preservation of peace, and for its astronauts to travel safely in space and land on and return from the moon; and for developing innovative educational processes that effectively interfaced academic education with aeronautical and astronautical engineering and science.

Olive Ann Beech, (1903-) honored for her outstanding contributions to aviation by her devoted service to the development and progress of General Aviation which earned her worldwide recognition as "The First Lady of Aviation"; for her role in the creation of the Beech Aircraft Company which she and her late husband, Walter Herschel Beech, founded in 1932; and for her excellent leadership assuring the growth and success of the Beech Aircraft Corporation since 1950, during which time it grew into a giant diversified aerospace organization serving both vital military and space exploration needs, as well as those of private and commercial aviation throughout the world.

AVIATION HALL OF FAME—1981 ENSHRINEMENT CEREMONIES, JULY 25, 1981 DAYTON CONVENTION CENTER, DAYTON, OHIO

Master of Ceremonies: Cliff Robertson

Ceremonies Narrator: Don Wayne

Reception, Enshrinement Hall.

Musical Prelude, Air Force Band of Flight (Commander, Lt. Col. Harold C. Johnson, USAF).

Presentation of Colors, United States Air Force Presidential Honor Guard.

National Anthem, Senior Airman Edward J. Pember, USAF.

Toast to The Wright Brothers, Chairman Louis C. Breckenridge.

Television Introduction, Ted Ryan, WHIO-TV.

DINNER

Dinner Music, the Ron Meyer Orchestra.

Musical Entertainment, Air Force Band of Flight.

ENSHRINEMENT CEREMONIES

Welcome, President A.G. Liefke.

Introduction of Special Guests, Cliff Robertson.

Award to U.S. Air Force "Thunderbirds," General Bryce Poe, II, USAF, Commander, Air Force Logistics Command.

President Ronald W. Reagan's Greetings, Congressman Clarence J. Brown, Seventh District, Ohio.

Prologue to Flight, Cliff Robertson.

Presentation of Lawrence Burst Sperry, Sr., Vice Admiral Wesley L. McDonald,

USN, Deputy Chief of Naval Operations (Air Warfare).

Acceptance of Sperry Award, Lawrence B. Sperry, Jr.

Presentation of Edward Henry Heinemann, Admiral Thomas H. Moorer, USN (Ret.), Former Chairman, Joint Chiefs of Staff.

Acknowledgement of Award, Edward H. Heinemann, Rancho Santa Fe, California.

Presentation of Charles Stark Draper, James E. Webb, Former Administrator, National Aeronautics and Space Administration.

Acknowledgement of Award, Dr. Charles S. Draper, Senior Scientist, The Charles Stark Draper Laboratory.

Presentation of Olive Ann Beech, George E. Haddaway, President, Aerospace Heritage Foundation.

Acknowledgement of Award, Olive Ann Beech, Chairman, Beech Aircraft Corporation.

Epilogue: "High Flight," Cliff Robertson.

SPECIAL ACKNOWLEDGEMENTS

The Air Force Museum: Special thanks are extended to the Director, Colonel Richard L. Uppstrom, and his staff for use of the facilities of the Air Force Museum to hold the Aviation Hall of Fame President's Reception and Dinner on July 24, 1981; and for use of historical documents and photographs used in preparing this evening's presentations.

Milton Caniff: The Aviation Hall of Fame is especially grateful to Milton Caniff for the ninety-three portraits of the enshrined aviation pioneers. His artistry, contributed to the Aviation Hall of Fame over the past twenty years, represents the most complete collection of portraits of aviation pioneers ever created.

Air Force Orientation Group: Special thanks are extended to Colonel Arthur F. Creighton, Jr., and the Air Force Orientation Group, Wright-Patterson Air Force Base for the excellent mobile display on the Aviation Hall of Fame and the enshrined aviation pioneers, which serves as the backdrop for tonight's presentation, as well as the "Milestones of Flight", and the Northrop T-38 "Talon" aircraft used by "The Thunderbirds".

The Aviation Hall of Fame thanks each of the following people and organizations for their contribution to the success of this evening's program:

Program Director, Mike White, WHIO-TV.

Production of Visuals, John J. Hirschman and Gregory I. Wright, WHIO-TV.

Historical Research and Program Scripts, James W. Jacobs and Associates.

Program Layout and Production, Richard D. Cost and O'Neil and Associates.

Special Ladies' Activities and Decorations, Zoe Deli Nutter.

Ceremonies Hostess, Sharon Cost.

Ceremonies Host, John E. Purdy.

Photographs, Jerry Hackman, Valerie Hackman, Robert Maltby, and Rowe Maxwell.

WATERWAY USER FEES

● Mr. BAUCUS. Mr. President, the Senate is currently considering legislation to impose waterway user fees. This legislation is controversial and

could have a significant impact on this Nation's transportation industries.

I believe we need to carefully and accurately evaluate the impact that increased user charges will have on the transportation sector in both the short and long run. We have to start planning now for our Nation's future transportation needs. We need to examine how the various transportation modes will be able to meet these needs and what the Government's role in a transportation system should be.

To that end, Mr. President, I would like to commend to my colleagues some recent remarks by Mr. Anthony L. Kucera, president of the American Waterways Operators, Inc.

Mr. Kucera points out that the time has come for the different transportation modes to stop feuding. He believes that the time and effort spent on charges and countercharges would be better spent doing the job expected of the transportation industry—moving freight.

Mr. Kucera admits that each mode of bulk freight transportation plays an important role in our Nation's transportation system. By recognizing that fact, and working together, the capacity, reliability, and productivity of our transportation system can be increased.

The transportation system of this Nation, Mr. Kucera goes on to point out, is too important to be viewed as nothing more than another line item in the Federal budget. He calls for a set of national transportation objectives which will promote productivity by allowing each mode to do what it does best.

Mr. President, I believe that this type of constructive attitude and concern for getting the job done will be much more useful in our consideration of user fee legislation than additional controversy about "who did what to whom." I, therefore, ask that Mr. Kucera's remarks be printed in the RECORD at this point. I commend his remarks to my colleagues.

The remarks follow:

NEW RELATIONSHIP NEEDED BETWEEN FEDERAL GOVERNMENT AND TRANSPORTATION INDUSTRIES

(By Anthony L. Kucera)

There are numerous issues facing the Nation's commercial shallow-draft navigation industry—the threat of unfair user taxes, regulatory proposals, the condition of the country's waterways system, a decline in petroleum movements, the future of export markets, and so on.

There is, however, a single element that relates to all of these topics: Government transportation policy and the tremendous impact it has on the barge and towing industry, other transportation modes, and the Nation's economy, in general. We may not always like it, but it's clear that our fortunes are inextricably linked to actions taken by the Federal Government.

It is my opinion that the United States Government must develop a new relation-

ship with transportation industries. Rather than stifle industry through inequitable and selective cost recovery proposals, the Government must learn to foster transportation opportunities that will improve the Nation's economic health.

There has been considerable talk lately about the need for a national transportation policy. Even President Reagan has noted that we are paying a high price for the absence of any coherent national policy.

It may, therefore, come as a surprise to some that the United States does, in fact, have a national transportation policy. Or, at least, Congress has mandated that it should.

The preamble to the Interstate Commerce Act, as amended in 1940, reads as follows: "It is hereby declared to be the national transportation policy of the Congress to provide for fair and impartial regulation of all modes of transportation." The act goes on to say the policy should recognize and preserve the inherent advantages of each mode. It should promote safe, economical and efficient service, and foster sound economic conditions in transportation.

The act also states that our national transportation policy should encourage the establishment and maintenance of reasonable charges for transportation services, without unjust discrimination, preferences or advantages.

Even casual observers of our industry can conclude that a number of recent Government actions have been contrary to the intent of this congressionally mandated national transportation policy. Proposals to increase waterway user taxes—while continuing to subsidize the rail industry—are an obvious example.

Perhaps what we need now is a set of national transportation objectives. These would be designed to promote productivity by allowing each mode to do what it does best. We must establish concrete goals and a set of strategies to ensure we meet those goals.

I think it is interesting to note that Congress recognized more than 40 years ago that each transportation mode has inherent advantages. To this day, however, some in the transportation industry continue their verbal sparring over which mode is superior to the others.

The rail industry has undertaken an expensive advertising campaign in newspapers and magazines. The ADS attempt to rebut various "myths" about the industry with so-called "facts." A number of conflicting claims and explanations are being made about fuel efficiency, safety records, GoVernment subsidies and the like.

A lot of time is being spent trying to convince the public that the railroads are superior and somehow more deserving than other modes of transportation.

One fact that is clear is that the different transportation modes have to stop feuding. The time and effort spent on charges and countercharges would be better spent doing the job expected of the transportation industry—moving freight.

It's time, for example, to stop bickering over which mode is more fuel efficient. Everyone is aware of the need for fuel efficiency. Each mode has advantages that make it best suited for meeting particular shipping needs. For example, while barge transportation is cost effective and fuel efficient, its service area is limited by the waterways network. It also cannot promise the speed desired for some finished products.

The point I want to make is that all modes of bulk freight transportation are

productive and fuel efficient, and each plays an important role in the Nation's transportation system. If all of the modes would recognize this fact, we could all work together to increase the capacity, reliability and productivity of that transportation system.

This can only be accomplished by dropping the selfish attitude that profits and success are gained best by constraining another mode of transportation. There is no need to recount the railroads' continuing fight against the critically needed replacement project at locks and dam 26 on the Mississippi River. Nor is there any need to discuss the railroads' fervent support of very high user taxes for the barge industry.

This attitude ignores the importance of developing the type of efficient freight distribution system that is so urgently needed in this country. By now, it should be obvious to everyone that that system will, by necessity, be intermodal.

I don't want to imply by this that there has not been any cooperation at all between the rail and water modes in the recent past. As a matter of fact, we see improved rail-barge coordination as a major trend for the next decade. Some railroads have begun to promote rail-water service in recognition of the advantages that can accrue in certain areas.

It should be clear to all that the enhancement of our Nation's transportation capability is a most pressing need that must be addressed now.

Our industry has repeatedly demonstrated its flexibility to expand to meet increasing demand. This has been especially true during recent years when fuel costs have skyrocketed and congestion on the river has increased.

To a large extent, the mid-American river navigation system is a mature system. The major investment is already in place. Some of it needs modernizing, but that expense is relatively minor compared to the benefits of economical and reliable distribution of goods.

Having addressed the necessity for cooperation among the modes, I would like to discuss the role that government must play in setting our national transportation objectives.

Last year, President Reagan promised our nation a new beginning. He has also recognized the need to revitalize our nation's domestic water transportation system. During his candidacy, Mr. Reagan noted: "The inland water transportation system provides an economic and energy efficient method of moving the goods and commodities of the nation. It also provides a vital link in our international trading effort."

I have to admit that some of the measures proposed by the administration affecting the waterways industry are not quite what we had anticipated when Mr. Reagan promised to revitalize our domestic water transportation system.

We are very much concerned that the burden we are being asked to share is disproportionate to sacrifices being asked of other modes of transportation.

AWO endorses non-discriminatory national policies intended to recognize and preserve the inherent advantages of each mode of transportation. User tax increases of the magnitude proposed by the administration, however, would have a debilitating effect on the competitiveness of barge transportation.

Our Nation's transportation system is too important to be viewed as nothing more than another line item in the Federal budget. In some ways, that system is the lifeblood of the country.

That is why we must revamp the relationship between the transportation industry and the Federal Government. The Government should place more emphasis on promoting the growth and modernization of the industry and work to stimulate economically and environmentally sound expansion. At home, competition should be protected by treating all modes of transportation equitably. Abroad, our Government should take a more active role in working with U.S. industry to develop new markets and expand American exports.

The success of such a relationship is documented in the greatly improved economies of other industrial nations that have followed such a course. It simply requires flexibility, creativity and imagination by our Government—qualities that have been in short supply for some time. But when Government demonstrates these qualities, I am certain that industry can be counted on to respond aggressively.

What I'm really calling for is a new attitude on the part of Government—an attitude that recognizes that business, particularly the transportation industries, cannot be expected to reach full potential in a cautious, unpredictable and often restrictive environment. We need a good deal more far-sightedness.

In short, it's time our Nation started thinking about the type of transportation industry it needs in today's competitive world. A strong transportation system is essential if we are to improve our economy and international trade status. We can achieve that goal only by setting some concrete objectives based on intermodal development and equitable treatment of all transportation modes.

The results of such an effort would benefit the entire Nation—industry, agriculture, shippers and consumers. That is certainly a goal worth striving for.●

EMINENT DOMAIN FOR COAL PIPELINES IS EMINENTLY FAIR

● Mr. JOHNSTON. Mr. President, last week the Energy Committee favorably reported S. 1844, the Coal Distribution and Utilization Act, by a vote of 14 to 6. This legislation, which has been in and out of Congress for over 10 years, would grant the right of Federal eminent domain to those coal slurry pipelines that the Secretary of Energy determines to be in the national interest.

I believe that this bill is overwhelmingly in the national interest. In fashioning this legislation during committee markups, every effort was made to address the concerns of all parties. In so doing, we adopted provisions which would mandate that State law apply in all instances with regard to water rights, and where available, State law would apply to eminent domain procedures unless to do so would have the effect of prohibiting the building of the pipeline.

Mr. President, I believe that the result we reached is fair. I believe that the idea of allowing coal pipelines to enter the coal transportation market is fair, and I believe this bill does that in a manner which is acceptable to all. An editorial to that effect appeared in

today's Wall Street Journal. I commend the editorial staff of the Journal, and I commend their work to the attention of my colleagues.

I submit for the RECORD the following editorial.

COAL TRANSPORT CORRECTIVE

The Senate Energy Committee last week approved legislation that could introduce much needed competition in the coal transportation market and might create further incentives to develop the nation's vast coal reserves. The Coal Pipeline Act would facilitate the construction of pipelines to carry ground coal slurry and would end the railways' virtual monopoly over long-haul coal transport. The legislation is long overdue.

The biggest cost that coal users face isn't for the coal itself but for transportation. Railway charges now often run four times the cost of the coal at the mine. The most viable alternative means of transport is coal slurry pipelines, in which the coal is ground up, mixed with a liquid such as water, oil or even liquefied carbon dioxide from the coal itself and then pumped through the pipeline. Coal pipelines could provide a competitively priced alternative to the railways, which is especially important now that the railroads are asking for more price deregulation under the Staggers Act.

While the idea of coal pipelines has been around for over 90 years, the main problems stopping pipeline planners are their inability to get rights-of-way across the web of railroad lines that crisscross the country and the availability of water to mix with the coal. The irony of the current dispute over whether the federal government should grant the pipelines eminent domain is that Congress granted the railroads land privileges in the 1800s that they are now using to block pipeline passage.

The water issue seems pretty much settled. An amendment, which was introduced by Sen. Malcolm Wallop of Wyoming and approved by the energy committee, would ensure the primacy of state water laws and would effectively mean that states would have to okay pipeline plans before the federal government granted rights-of-way. (This assurance may be more attractive to Western governors now, following a Supreme Court decision last month that limited states' control over the interstate use of water.)

The railway lobby on Capitol Hill has pulled out all the stops to try to block the pipelines legislation. This included some questionable parliamentary tactics, when members of the House Public Works Committee tried recently to sneak out of important quorum calls. Nonetheless, the committee approved the bill and a House floor vote is expected later this month, if the bill isn't held up in the House Rules Committee.

The coal transportation market needs increased competition to help hold down prices, especially if the railways want further deregulation. Pipelines would provide the most efficient means of competition and might eventually increase the utilization of our coal reserves instead of foreign oil. Granting coal slurry pipelines eminent domain across railway land is eminently fair. ●

EUROPEANS AGREE TO EXPORT CONTROLS

● Mr. GARN. Mr. President, the debate over the export controls on participation by U.S. companies, or

their affiliates or licensees, in the Siberian natural gas pipeline misses with alarming frequency one of the most important points. In their fervor to denounce what they call extraterritoriality, commentators neglect to point out that the European firms affected by the export controls specifically agreed in their contracts with the U.S. companies to comply with relevant export controls, should they be levied.

No one forced these European companies to sign the contracts with these terms in them. When they signed them, they seemed to consider the risk worth the anticipated economic payoff. This is nothing new, Mr. President. It is called political risk and is a common ingredient of international trade. The United States was clearly within its legal rights to insist on compliance. To have done otherwise would have been to allow our export control system to have been seriously circumvented. Not only would our national security have suffered, but this would have left our U.S. companies unfairly restricted while their foreign licensees reaped the profits from products of American design and proprietorship.

In a recent article by William F. Buckley, published in the Washington Post, this point is clearly made. Mr. Buckley is right on the mark when he concludes:

No one required John Brown or Alsthom to sign to contracts it signed with GE. It is therefore, interference by the European governments, not by the United States, when those companies are directed to do that which they promised they would not do. If Mitterrand succeeds in forcing Alsthom to make those compressors, he is in effect challenging the right of Congress to pass an export control law and of the President to administer it. Who is being unfriendly to whom?

Mr. President, I ask that the article by William F. Buckley be inserted in the RECORD at this point.

The article follows:

THE CULPRITS: BRITAIN, FRANCE

(By William F. Buckley, Jr.)

Margaret Thatcher has backed off—just a little bit—from her earlier position respecting John Brown Ltd. At first she said, even as Francois Mitterrand in France has said to Alsthom-Atlantique, but notwithstanding President Reagan's order to the contrary, John Brown should proceed to make those fancy compressors needed by the Soviet Union for the huge gas pipeline from Siberia to Europe. Thatcher's new position is that the British government will "assist" John Brown in living up to its "contract."

Meanwhile, the collaborationist press has cranked up an international campaign designed to discredit Reagan, to insist that our relations with Western Europe are going to the dogs, and doesn't the United States know that France and England, like other European countries, are independent, and make their own foreign and economic policies?

Yawp. We realize all of this. Now listen a moment.

In 1949, responding to the imperialist tyranny of Joseph Stalin, Congress passed the

Export Administration Act. Under that act, American enterprise is required to get permission of the Department of Commerce before exporting, for the use of the Soviet Union, articles of strategic significance. When the French and British firms acquired the technology from the General Electric Co. to manufacture those compressors, the deal specified that the companies acquiring the licenses from GE would conform to the 1949 act. They agreed to do so.

Now, what is permitted to be exported by the Commerce Department and what isn't permitted has always been a matter for Executive judgment. Reagan, surveying the situation in Europe, concluded that it was not in the best interest of the United States to help the Soviet Union build the pipeline. For one thing, as our ambassador to France, Evan Galbraith, pointed out, only 15 percent of the gas flowing through the pipeline is slated to be sold in Europe. The balance will travel from Siberia into industrial Russia—"a contribution to the Soviet economy comparable to the development of the Russian railroad system at the end of the last century."

If we permit the Soviet Union the use of our technology with which to build this pipeline, we are accelerating the day when the Soviet Union uses gas now stored underground in Siberia to light up the factories in the Soviet Union so busily engaged in the manufacture of weapons whose only use is to threaten, or to kill, non-Russians.

Allies always have differences of opinion, and in the end must respect each others' sovereignty. But no one required John Brown or Alsthom to sign the contracts it signed with GE. It is, therefore, interference by the European governments, not by the United States, when those companies are directed to do that which they promised they would not do. If Mitterrand succeeds in forcing Alsthom to make those compressors, he is in effect challenging the right of Congress to pass an export control law and of the president to administer it. Who is being unfriendly to whom? ●

AN ACT OF MURDEROUS TERRORISM

● Mr. TSONGAS. Mr. President, I was saddened and enraged to read in the newspaper this morning about a murderous, coldblooded attack on a famous Jewish restaurant in Paris. Six persons were killed, and 22 wounded, by assailants armed with a grenade and machineguns. The motive appears to have been anti-Semitism, pure and simple.

This sort of vicious, terrorist attack against innocent persons has become all too familiar in the world. Though the attack yesterday in Paris was the gravest incident in France since World War II, it hardly stands alone. As recently as October 1980, another terrorist assault left four persons dead at the country's largest reform synagogue in Paris. In Munich last week a bomb exploded at the passenger terminal of the Israeli airline El Al and injured seven persons.

Of course, not all terrorism is related to anti-Semitism. The continuing cycle of terrorist violence wherever it occurs is despicable and sickening. It

ought to draw condemnation from every corner of the world.

Mr. President, I request that two articles from the New York Times and the Washington Post dealing with this subject be printed in the RECORD.

[From the New York Times, Aug. 10, 1982]

**6 KILLED IN ATTACK ON JEWS IN PARIS
22 WOUNDED AS GUNMEN SHOOT INTO A KOSHER
RESTAURANT**

(By John Vinocur)

PARIS, Aug. 9.—Unidentified gunmen, firing submachine guns and hurling a grenade, attacked a kosher restaurant and passers-by in a Jewish neighborhood at lunchtime here today, killing six persons and wounding 22.

The police said that the attack had been carefully planned and involved as many as five or six assailants. One of them threw a grenade into the restaurant while the rest opened fire on patrons and then fled on foot in the narrow streets between the City Hall and the Place de la Bastille, shooting bursts into doorways and at automobiles.

"Considering the circumstances and the site of this indescribable action, everything suggests that anti-Semitism was the ugly motive," said Interior Minister Gaston Defferre, who visited the area along the Rue des Rosiers after the attack.

MAYOR CALLS RAID "HORRIBLE"

Mayor Jacques Chirac described the raid as "horrible" and said, "Alas, its racist character appears beyond doubt."

The assailants escaped, and there was no indication from the police what group might have been behind the attack.

The newspaper France-Soir said it had received a telephone call from an organization called Action Directe claiming responsibility. But another caller, saying he represented the left-wing group, which has been linked by the police to three other attacks on businesses and people with Jewish connections in recent days, told Agence France-Presse that it was not involved.

The police described the raid as highly organized, involving a group whose goal was said to be killing as many people as possible.

The deaths come at a time of some tension for France's Jews. France's Jewish population, totaling 700,000, is the world's fourth largest. Many Jews here have felt that the Government has taken a patently pro-Palestinian position on the Israeli siege of Beirut, and that the state television network has favored the Arab side, making little effort to cover the Israeli point of view.

A spokesman for the Israeli Embassy here said, "These murderous attacks are encouraged by a certain climate of hostile propaganda that is very often clearly anti-Semitic."

Tonight, when President François Mitterrand went to a memorial service at a synagogue on a street near where the attack took place there were angry shouts and shoving between policemen and spectators. Cries of "Mitterrand treason!" and "Mitterrand the killer!" went up as the President left his automobile.

After leaving the service, when the crowd had become less aggressive, the President said: "I've always been and I am a friend of the Jewish community of France. Today a new attack by cowards bloodied this community. I bow to its victims and I say that this fanaticism, like all fanaticism, will find itself having to deal with me."

CROWD IN STREET IS TENSE

The crowd in the street had been tense and at times seething since the attack. Members harassed journalists and painted Stars of David on trucks belonging to the state television network. A man said he felt that French Jews were particularly upset because the authorities had been unable to make any arrests in connection with a bombing in October 1980 that killed four persons at the country's largest Reform synagogue in Paris.

The attack today was centered on a restaurant and delicatessen known by the name of its owner as Chez Jo Goldenberg. The restaurant, which specializes in the Jewish cooking of Eastern Europe, is situated on a corner of the Rue des Rosiers, which has been a center of Jewish life in Paris for centuries. The dark, narrow street is now one of small shops, kosher butchers, a synagogue and a ritual bath.

Witnesses offered contradictory accounts of what took place, but there was agreement on a rough outline of events. Shortly after 1 P.M., it was generally agreed, two groups of men arrived at the restaurant, one hurling a grenade through a window and the other opening fire with automatic weapons.

Natali Tvaouri, a restaurant employee, told a reporter: "I was bringing dishes down to the ground floor when I heard a big explosion. When I got to the bottom, I saw one of the terrorists. He had wavy black hair and a light blue jacket. He was about 30, and he was spraying the customers with bullets."

"I ran to the back and the man saw me and went after me, firing away. I jumped out of a window, and just as I got out a burst shattered it after me."

NUMBER OF ATTACKERS UNCLEAR

The scenes in the street were more difficult to reconstruct. Some witnesses said there were only two men, others that there were four, five or six.

Two women talked of having seen two men with guns. One of them said: "They ran with their machine guns over their shoulders, as if it were all very normal and they had time to stop and pick something up. They had brown hair and what you'd call Mediterranean types."

A butcher also said he had seen only two attackers. "They were in a white car that stopped in front of Jo Goldenberg's," he said. "They looked like Arabs to me. They got out with machine pistols in their hands and started shooting bursts into the restaurant. They came to get themselves some Jews. They shot up everything and then went after the shopkeepers in their shops. They were wild."

The police offered few specific details but disclosed that a part of the grenade that had been recovered indicated it had been made in Czechoslovakia.

9 OF WOUNDED IN SERIOUS CONDITION

Nine of the wounded persons were reported in serious condition. Initial identification of the six dead suggested that they were all Paris residents.

A representative of the Palestine Liberation Organization in Paris, Ibrahim Souss, was quoted as "firmly condemning this attack, deploring its victims, and transmitting condolences to their families." Mr. Souss said that "at a time when the Lebanese and Palestinian peoples are being massacred in Beirut by the Israeli army, the Palestine Liberation Organization rejects all blind violence."

In the Rue des Rosiers the tone of the shouting until nightfall was different.

"P.L.O. killers!" groups chanted, and some young men declared that they planned to take revenge.

The attacks had the character of a major political problem for Mr. Mitterrand because they fit into a series of terrorists acts in France going far beyond the Arab-Israeli conflict and related issues. United States, Israeli and Palestinian officials have been assassinated this year, and train and car bombings have killed six people. In a time of economic difficulty, a growing sense of insecurity has become an additional liability for Mr. Mitterrand's Socialist Government.

U.S. DEPLORES "DESPICABLE ACT"

WASHINGTON, Aug. 9.—The State Department called today's incident in Paris a "tragic and despicable act."

ATTACK DENOUNCED BY ISRAEL

JERUSALEM, Aug. 9.—A Foreign Ministry statement said Israel "denounces the criminal act of terrorism in Paris perpetrated against Jews and Jewish targets."

"The anti-Israel atmosphere in France since the start of Operation Peace for Galilee, particularly in the French media, encourages extremist elements to harm Israelis and Jews," the statement said.

[From the Washington Post, Aug. 1, 1982]

BOMB INJURES SEVEN AT MUNICH AIRPORT

MUNICH.—A bomb concealed in a suitcase exploded in a crowded passenger terminal of the Israeli airline El Al yesterday, injuring at least seven people and causing "considerable damage," police said.

Among the injured were two police guards, one of them seriously hurt, an El Al security officer and four civilians. The blast hurled chunks of the roof and walls through the air, shattering glass and scattering debris for at least 100 yards.

A police spokesman said the bomb went off at around 3 p.m. at Munich's Riem airport in the check-in hall reserved for El Al flights, where nearly 400 people were waiting. "Only the fact that there were no passengers and security officials directly beside the suitcase kept more people from being hurt," said a police official.

ENDING WORLD HUNGER

● Mrs. HAWKINS. Mr. President, we are indeed fortunate to live in an age which has produced an agricultural technology so advanced that we have the know-how to feed the world.

Sadly, however, we have yet to eradicate hunger and malnutrition. These twin tragedies exist even in America; in other corners of the world they flourish. Hunger and malnutrition walk hand-in-hand with poverty and ignorance. Their victims are generally the most helpless members of society—the very young, the sick, and the elderly.

This week, teams of cyclists from across the country arranged to meet on Capitol Hill to dramatize their commitment to end world hunger. One group of these cyclists came from my home State of Florida, bicycling here from Fort Lauderdale. Others came from Denver and Atlanta. Their ultimate destination is the United Nations in New York.

The goal of these cyclists is to raise the awareness of the American public that hunger is a menace that still exists, even in a nation as bountiful as the United States; that we have the technology to end hunger; and that with knowledge and commitment can come the self-sufficiency necessary to combat hunger.

The Cyclists to End World Hunger have traveled across 15 States, carrying their message to the public and to State and local officials along the way. They have collected the signatures of more than 10,000 Americans who have expressed a commitment to end hunger. They have compiled into "The Presidential Book" the signatures of 2.2 million people who support their efforts to end world hunger.

I would like to join my colleagues in welcoming the cyclists to Washington, and to commend them for their dedication to ending world hunger.●

DAVID W. EVANS

● Mr. GARN. Mr. President, Utah, the West and the Nation lost an advertising and public relations giant Saturday, August 7, with the death of David W. Evans at age 88.

He was the founder of one of the largest advertising agencies headquartered in the West, David W. Evans, Inc., Advertising and Public Relations. The firm has more than \$60 million in billings annually which ranks it among the top 1 percent in the country. The company has offices in Los Angeles, San Francisco, Denver, Seattle, Portland, Atlanta, and Pittsburgh.

A native of Salt Lake City, the advertising pioneer founded the firm with a borrowed desk in a small one room office in 1943. He was 50 years of age at the time which demonstrated the unique personal character of this tireless individual.

A dynamic force in the political arena, his agency supervised the successful campaigns of noted national and local political leaders. In addition, his firm was instrumental in the successful efforts aimed at gaining congressional authorization of the upper Colorado River water storage and power projects.

A devoted member of his church, Mr. Evans organized the worldwide public relations campaign (1956-68) for the Mormon Church which played a role in making it among the fastest growing Christian faiths in the world.

Highly regarded and respected by his peers, David W. Evans gave freely of his time to worthwhile community functions and to the advertising industry. He was a member of the executive board of the Great Salt Lake Boy Scouts Council, an executive board member of Ballet West, and a member of the Utah State University Board of Trustees.

I also feel a personal sense of loss at the passing of Dave Evans. As long as I have been in public office, he has been a man who I could—and often did—rely on for sound advice and counsel. In addition, he was my father's friend. They both graduated from L.D.S. High School in the class of 1912.

My heartfelt sympathy is extended to his widow and lifelong companion, Beatrice Cannon Evans, and their five sons.●

TAX ATTITUDE

● Mr. GRASSLEY. Mr. President, in studying the flat tax issue, I have come to realize that any transition from our present tax system to a flat-rate system would be complex indeed. The fact that there would be clear winners and clear losers makes the process difficult.

In any case, these difficulties should not deter us from our basic tax reform goals: efficiency, fairness, simplicity, low rates, and neutrality.

Mr. President, I ask that an article from yesterday's Wall Street Journal, describing a flat-rate system in operation in Hong Kong, be reprinted in the RECORD at the conclusion of my remarks for the benefit of my colleagues. This article brings home the importance of flexibility in a low-tax, broad-based system.

A flat-tax system need not be absolutely pure to be efficient, simple, neutral, and so on. Infinitely more important is the presence of a sound tax attitude on the part of the general public, and especially of those who write and interpret tax legislation. Before we undertake tax reform legislation, we must reassert basic economic principles and then work to preserve them through a restructured tax code. There must be an awareness of how to treat income, savings, investment, consumption, capital, and so forth. We must reinforce the attitude that work and savings are desirable. This is the best possible way to accomplish our goals of tax reform and to preserve what we have accomplished.

The objectives of tax reform must be to channel available wealth into more productive areas, and to facilitate the creation of new wealth to again be channeled into productive sectors. This can be accomplished through low-tax rates and a neutralized tax base. Lower tax rates encourage production and raise after-tax income. Neutrality channels that income into productive, market-efficient segments of the economy. Presently, high tax rates discourage productivity and savings while the bias toward debt and consumption cause market disequilibria, distortions, and inflated prices.

That is not to say that we cannot show flexibility in our restructured tax system. Allowing tax exemptions

for charity and for elderly care is a noble practice. Furthermore, there is nothing economically unsound about this kind of exemption or deduction. Most arguments against retaining the charity deduction center on the inevitability of other exemptions and deductions finding their ways into the tax code once the precedent has been established. In the pursuit of basic social objectives, we must overcome that fear. So long as these goals are not burdensome and costly, we should remain flexible. The key is not to turn our backs on social goals. The key is to create an awareness of why tax reform is necessary, why reform should lead to a work-and-save tax code. This awareness will help cultivate a desirable tax attitude that will temper our flexibility with prudence.

Mr. President, I hope that as we continue to study the feasibility of broad-based, low-rate tax reform in the Senate, we will keep in mind the goals of reform rather than simply the design of reform. We must develop here, first, a favorable tax attitude toward income, savings, and production. This is a necessary precondition for meaningful tax reform. Without a favorable tax attitude we are doomed, no matter how extensive the tax reform, to the inefficiencies and inequities of the present system.

The article referred to follows:

[From the Wall Street Journal, Aug. 9, 1982]

HONG KONG'S FLAT TAX: A MODEL FOR OTHER COUNTRIES?

(By Robert Keatley)

HONG KONG.—No one likes to pay income tax, and those who must pay the most seem to like it least.

This helps explain why the flat-tax folks are enjoying a boomlet in the U.S. Advocates of lower income tax rates—ones which would eliminate most or all personal deductions—have made their cause fashionable in and out of the U.S. Congress. They argue nobly that lower tax rates, uniformly applied, would reduce tax abuse and unleash productive forces that in the long run would make everyone richer.

Less often conceded, except in denials, is the greed factor. Many upper income earners believe their tax bills would drop if rates were lowered, even if deductions were cut and loopholes closed. In addition, of course, there is widespread belief that the U.S. income tax system, like those of many other industrial nations, is unfair, complex and economically stifling.

"Our present taxing system has become a labyrinth for the wary and unwary alike, filling endless volumes with its exceptions to exceptions, and indecipherable differentiations in the way we tax various sources of income," complains Sen. Dennis DeConcini (D., Ariz.) on behalf of a cause which is uniting political liberals and conservatives these days.

And like some other flatter-tax advocates, Sen. DeConcini cites the Hong Kong experience as a model the U.S. might well copy. If so, it would seem equally applicable to other industrial nations, where taxes are also high and systems complicated, and to many de-

veloping states, whose confiscatory tax systems produce insufficient revenue but excessive abuse.

There's no doubt that Hong Kong taxes are low and simple. Few personal deductions exist, and family allowances help only low-income earners. The maximum individual rate is 15 percent of taxable income, and there is no tax at all on overseas earnings, capital gains or dividends. Businesses can deduct all legitimate operating expenses, plus 55 percent of their capital investments in the first year, from gross income; they pay only 16.5 percent tax on the rest.

An official synopsis of all Hong Kong taxes fills only 12 small pages, plus a paragraph, of an information pamphlet. A simple three-page tax form covers liability on salary, business, property and interest income. A single additional page explains how to use the form.

Thus a closer look does seem warranted. But a caution is in order. Salary and profit taxes here don't produce nearly enough income to finance the Hong Kong government's operations, even though social services range from minimal to inadequate by modern standards. Salary taxes account for only 11 percent of total government revenue, while business profit taxes add a further 20 percent. This means the vast bulk of revenue must be found elsewhere, including from land sales—a source not open to many states.

Even so, the Hong Kong tax structure is one of the world's few examples of a (relatively) flat tax in action, and some of its terms meet objections that American critics often raise.

For example, Hong Kong permits charitable deductions. An earner here can donate up to 10 percent of his salary to approved charities—the government publishes a list—and deduct that amount from taxable income. This cuts his tax bill somewhat, but still means up to 85 percent of the gift must come from his own pocket. Most American flat-tax proposals don't permit such deductions, which worries private foundations and charities.

The only other deductions permitted are personal and family allowances, extremely generous by international standards. At current exchange rates, a single person pays nothing on his first \$4,670 of salary; a family of four can exclude \$11,600. Amounts above that are taxed at increasingly high rates until all benefits of family allowances are wiped out. From that point, the taxpayer pays the maximum effective tax of 15 percent on gross earnings (minus only charitable contributions). At present, the full 15 percent rate takes hold at the \$20,000 mark for single people and at \$39,000 for a family of four.

To discourage large families, crowded Hong Kong scales down allowances from \$1,330 for the first child to only \$165 for the seventh and beyond. To encourage private care of the elderly, an allowance of \$1,330 can be taken for each parent supported by family members.

That's it. There are no tax shelters, no deductions for interest payments nor other ways for most to dodge the assessors. The low rates and high personal deductions mean only 218,000 of a 5.2 million population will pay regular salary taxes this year, though 66,000 more will pay under a "personal assessment" provision which can reduce tax bills somewhat.

However, the system does permit some tax avoidance. A wealthy shipowner, for example, could incorporate his vessels in offshore

tax havens, register them in flag-of-convenience locations and collect earnings as dividends. This would let him avoid paying anything significant toward upkeep of any part of the international economic system which brings him great wealth and social prestige.

But the Hong Kong experience indicates there's no reason to be doctrinaire about a flat-tax system. Business profits are taxed at higher rates than personal salaries. This colony taxes large estates—anathema to some flat-tax ideologues—at rates from 10 percent to 18 percent, beginning at the \$333,000 mark. (But the "principal matrimonial home" is excluded.) Though committed to the free market system, Financial Secretary John Bremridge stresses Hong Kong is "ordinarily non-interventionist but certainly not laissez-faire. The approach is more flexible than ideological.

This attitude could bring higher taxes in the years ahead. Local demand for social services is growing, and more money could well be channeled into education, medical programs or pensions. Government spending already equals 24 percent of the gross domestic product, up from 17 percent five years ago, and the trend continues.

Yet the underlying philosophy here is to have low taxes on high prosperity, an approach that isn't endangered. Moreover, spending plans remain closely tied to revenue prospects; Mr. Bremridge, like other government officials, believes long-term deficit spending is dangerous and cites the poor status of Western economics as proof.

A Hong Kong-type tax structure might give such economies their needed boost, as advocates claim. But rates would probably have to be higher if existing programs are to be financed. "If you need money, you don't get it from the rich," warns the blunt Mr. Bremridge. "There aren't enough of them." He believes a Hong Kong-type tax system would be more right for industrial states than the fiscal messes they now administer, but warns a switch wouldn't be easy and might be no panacea.

But experience here warrants close study by those who seek basic revisions. If nothing else, it proves a simple system with low rates can be applied with flexibility. Terms can be adjusted for social as well as fiscal reasons without compromising basic goals or wallowing in pointless doctrinal disputes.●

NOTICE OF DETERMINATION BY THE SELECT COMMITTEE ON ETHICS UNDER RULE 35, PARAGRAPH 4

● Mr. WALLOP. Mr. President, it is required by paragraph 4 of rule 35 that I place in the CONGRESSIONAL RECORD this notice of Senate employees who propose to participate in a program, the principal objective of which is educational, sponsored by a foreign government or a foreign educational or charitable organization involving travel to a foreign country paid for by that foreign government or organization.

The Select Committee on Ethics has received a request for a determination under rule 35 which would permit Diana Hamilton of the staff of Senator RIEGLE, George Dahlgren of the staff of Senator DIXON, Mary Moses of the staff of Senator QUAYLE, Terry Spillsbury of the staff of the Com-

merce Committee, Dan McNamara of the staff of Senator DURENBERGER, Bob Ziener of the staff of Senator KASTEN, and Tim Bergan of the staff of Senator BOSCHWITZ, to participate in a program sponsored by a foreign government agency, the Canadian National Harbors Board, in Montreal, Canada from July 8 to 11, 1982.

The committee has determined that participation by the above-named staff members, at the expense of the Canadian National Harbors Board, to discuss the St. Lawrence Seaway and transportation problems, is in the interest of the Senate and the United States.●

RECESS UNTIL 9:30 A.M. TOMORROW

Mr. TOWER. Mr. President, I ask unanimous consent that, pursuant to the previous order, the Senate stand in recess until 9:30 a.m. tomorrow.

There being no objection, at 10:01 p.m., the Senate recessed until tomorrow, Wednesday, August 11, 1982, at 9:30 a.m.

NOMINATIONS

Executive nominations received by the Senate August 10 (legislative day, July 12), 1982:

THE JUDICIARY

Thomas F. Hogan, of Maryland, to be U.S. district judge for the District of Columbia vice William B. Bryant, retired.

Alex Kozinski, of the District of Columbia, to be a Judge of the U.S. Claims Court for a term of 15 years vice a new position created by Public Law 97-164.

IN THE AIR FORCE

The following-named officer under the provisions of title 10, United States Code, section 601, to be assigned to a position of importance and responsibility designated by the President under title 10, United States Code, section 601:

To be lieutenant general

Maj. Gen. John L. Piotrowski, xxx-xx-xx... FR, U.S. Air Force.

IN THE ARMY

The following-named officer, under the provisions of title 10, United States Code, section 3015 to be Chief, National Guard Bureau:

To be chief, National Guard Bureau

Maj. Gen. Emmett H. Walker, xxx-xx-xx... Army National Guard of the United States.

The following-named Army National Guard of the United States officer for appointment to the grade of major general as a Reserve commissioned officer of the Army under the provisions of title 10, United States Code, sections 593(a) and 3385:

To be major general

Brig. Gen. Herbert R. Temple, Jr., xxx-xx-xx...

IN THE AIR FORCE

The following Air National Guard of the United States officers for promotion in the Reserve of the Air Force under the provi-

sions of section 593(a) title 10 of the United States Code, as amended.

LINE OF THE AIR FORCE

To be lieutenant colonel

Maj. Clayton B. Anderson, xxx-xx-xxxx
 Maj. George C. Arvanetaki, xxx-xx-xxxx
 Maj. George D. Brooks, xxx-xx-xxxx
 Maj. Raymond A. Cline, Jr., xxx-xx-xxxx
 Maj. John J. Collins, xxx-xx-xxxx
 Maj. David J. Coons, xxx-xx-xxxx
 Maj. John R. Daigneau, xxx-xx-xxxx
 Maj. Michael R. Denton, xxx-xx-xxxx
 Maj. Gary W. Felstead, xxx-xx-xxxx
 Maj. Duane A. Fitch, xxx-xx-xxxx
 Maj. Robert F. Francoeur, xxx-xx-xxxx
 Maj. Timothy J. Griffith, xxx-xx-xxxx
 Maj. Paul R. Haith, xxx-xx-xxxx
 Maj. William L. Howland, xxx-xx-xxxx
 Maj. James W. Lundy, xxx-xx-xxxx
 Maj. Kenneth M. Mathias, xxx-xx-xxxx
 Maj. Edward G. Moran, xxx-xx-xxxx
 Maj. Richard Norwood, xxx-xx-xxxx
 Maj. Charles E. Porter, xxx-xx-xxxx
 Maj. Douglas J. Scott, xxx-xx-xxxx
 Maj. Mary C. Small, xxx-xx-xxxx
 Maj. Larry D. Snody, xxx-xx-xxxx
 Maj. Thomas E. Stephens, xxx-xx-xxxx
 Maj. James E. Wiseman II, xxx-xx-xxxx

MEDICAL CORPS

Maj. Pomp T. Carney, xxx-xx-xxxx
 Maj. Gerald D. Loos, xxx-xx-xxxx
 Maj. Hugh E. McGee, Jr., xxx-xx-xxxx

LEGAL

Maj. Michael L. Cruse, xxx-xx-xxxx
 Maj. Terrence P. Woods, xxx-xx-xxxx

IN THE ARMY

The following-named officers for appointment in the Regular Army of the United States, in their active duty grades, under the provisions of title 10, United States Code, sections 531, 532, and 533:

Colonel

Porter, Robert O., xxx-xx-xxxx

Lieutenant colonel

Smith, Edward F., xxx-xx-xxxx

Major

Davis, Rudy P., xxx-xx-xxxx
 Herod, Herbert L., xxx-xx-xxxx
 Jones, Lafayette, Jr., xxx-xx-xxxx

Captain

Duque, George M., xxx-xx-xxxx
 Kayfetz, Richard, xxx-xx-xxxx
 Sharp, Robert A., xxx-xx-xxxx

IN THE NAVY

The following-named commanders of the Reserve of the U.S. Navy for permanent promotion to the grade of captain in the Staff Corps, as indicated, pursuant to the provisions of title 10, United States Code, section 5912:

MEDICAL CORPS

Captain

Arzola, Javier Arquimedes
 Bauer, Earl A., Jr.
 Bernstein, Sidney Steman
 Bigley, Harry Alan, Jr.
 Broadley, Paul Hickman
 Burkle, Frederick Martin, Jr.
 Burvant, Michael Urban
 Fowler, James Raymond
 Gansa, Alexander Nicholas
 Haney, J. F. B.
 Huff, Carl Wayne
 Jones, Alan Clifford
 Levine, Michael Jay
 Moran, Thomas Edward
 Newman, Cyril
 Proctor, Jack D.
 Schroder, Paul Erwin

Smith, Arthur Mattus
 Stuckey, Charles Edward
 Villadiego, Rafael E.
 Wallin, Gene Ambrose
 Watterson, Samuel George
 Zaroulis, Charles G.

SUPPLY CORPS

Captain

Alwine, Paul R., Jr.
 Barr, Charles V.
 Bartuska, Anthony John
 Benton, Gordon J.
 Bolin, James H.
 Booth, Henry Adolph, Jr.
 Brill, Henry Fred
 Budill, Edward Joseph, Jr.
 Chapman, William D.
 Connell, James Joseph
 Floyd, Edward T.
 Gilman, Joseph
 Hecker, Robert Wyatt
 Herndon, David Lewis
 Hillman, Tatnall Lea
 Hoover, Marcus Gray
 Hutchinson, Thurlow Q.
 Kane, John J.
 Levinson, Henry Gerald
 Loreen, Jon Michael
 Mitchell, Arthur Jonathan
 Modell, Robert Leonard
 Morgan, Ronald G.
 Morse, Gary Allan
 Mulhern, John J.
 Noel, Wilbert E.
 Pfund, Gale Arlo
 Price, Jacob Morris
 Priest, William G., Jr.
 Riggs, Richard William
 Riordan, John Joseph
 Soletti, Lawrence A.
 Titus, Robert George
 Vanness, Robert L.
 Waite, Richard, IV
 Warrick, James Craig
 Webb, Evans W.
 Wright, William Ross

SUPPLY CORPS (TAR)

Captain

Elliott, Richard E.

CHAPLAIN CORPS

Captain

Awes, Vernon Edward
 Conn, George Malrice, Jr.
 Cronin, Hugh John
 Lundeen, Lyman T.
 Peters, Frederick John
 Shaner, Donald Wayne
 Strickland, William J.

CIVIL ENGINEER CORPS

Captain

Aaron, Lawrence Edward
 Bader, Robert Housel
 Bridges, Donald Norris
 Hinkle, Daniel Eaxter
 Maddox, Robert Gilmer
 Miller, Charles Donald
 Pickrell, John Henry
 Smith, Gerald
 Walter, Richard Joseph
 Wolfram, Carl Bruno

JUDGE ADVOCATE GENERAL'S CORPS

Captain

Adams, Joseph A., Jr.
 Bales, John Albert
 Brant, Kirby Ensign
 Elide, David Benjamin
 Evans, John Arlen
 Feldman, Joel Martin
 Flanagan, Hugh Michael
 Galliani, William Rudolf
 Gehrke, Harold Dennis

Hamner, Elmer Duncan, Jr.
 Hetherington, John W.
 Jakaboski, Sheodore P.
 Jones, Taylor Webb
 Koenig, Rodney C.
 Lanza, Carl Francis, Jr.
 McAuliffe, William C., Jr.
 Nobles, Eric Arthur
 Psihas, Andrew Peter
 Rabideau, Clarence J.
 Roberts, Charles Pinckney
 Schumacher, James Joseph
 Smallmon, John William
 Wimberly, Bennie Charles

DENTAL CORPS

Captain

Balmforth, John Bernard
 Bennett, Steven Laurel
 Brown, William Dean
 Cimino, Samuel Peter
 Crowell, Nelson Thomas
 Emery, Lee Edward, Jr.
 Ennis, Richard Jerome
 Eure, Darden Johnson, Jr.
 Kumamoto, Steven Yoshikazu
 Mallander, Gary Dean
 Moutos, Minelads George
 Murphy, Richard Thomas
 Pebbles, Harold Alba, Jr.
 Smith, Charles Luther, Jr.
 Sweeney, James Michael
 Vick, John Bennett
 Williams, Alvin Richard
 Yavel, Robert Paul

MEDICAL SERVICE CORPS

To be captain

Carrera, Richard Nestor
 Davis, Linda Jane
 Earle, Alvin Mathews
 Sagan, William
 Sager, Kenneth Bernell

NURSE CORPS

To be captain

Haubenreich, Catherine Ruth
 Ryan, Dorothy Angela
 Ward, Judith Ann

The following-named lieutenant commanders of the Reserve of the U.S. Navy for permanent promotion to the grade of commander in the staff corps, as indicated, pursuant to the provisions of title 10, United States Code, section 5912:

MEDICAL CORPS

To be commander

Abdon, Soledad V.
 Aldana, Zena Ida H.
 Allen, James W., Jr.
 Aziz, Abdul
 Bauerle, Leonard C.
 Borlongan, Ofelia Maralit
 Bosworth, William Posey
 Brown, Malcolm Dewitt
 Chan, Yung Cheung
 Dalakis, Helen
 Druckemiller, William H., Jr.
 Esperanza, Bonifacio Coloma
 Foster, John Watkins
 Galang, Remedios Navarro
 Goodrum, James K.
 Gupta, Alicja Urszula
 Jensen, Christian Edward
 Johnson, Charles M., III
 Jurjescu, Octavian
 Kambic, Anne R.
 Khalil, Mostafa Ibrahim
 Krauss, Jonathan Seth
 Lasquety, Ludovico Z.

IN THE MARINE CORPS

Capt. Truman W. Crawford, USMC, for appointment to the grade of major (temporary) while serving as the Director of the Marine Corps Drum and Bugle Corps in accordance with article II, section 2, clause 2 of the Constitution.

HOUSE OF REPRESENTATIVES—Tuesday, August 10, 1982

The House met at 10 a.m.

Rabbi Israel Miller, senior vice president, Yeshiva University, New York, N.Y., offered the following prayer:

Almighty Father in Heaven, we acknowledge Thy presence and bow our heads in prayer before Thee, our Maker. Even as we bow our heads, we lift our hearts in thanksgiving for the opportunities granted this body to lead and legislate for the benefit of all the people. May we use our resources resourcefully. Grant us, O Lord, the faith, strength, and courage to face the challenges which confront us and the knowledge and skill to conquer them.

We pray for our country and the ideals of liberty and freedom here enshrined. We pray that man's inhumanity to man may forever end. May we realize that we are closest to Thee when we are nearer to our fellow human beings, helping all who are in distress and sorrow.

May peace and justice be our calling, and the Earth be full of knowledge of Thee as waters cover the sea.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

Mr. HUNTER. Mr. Speaker, pursuant to clause 1, rule I, I demand a vote on agreeing to the Chair's approval of the Journal.

The SPEAKER. The question is on the Chair's approval of the Journal.

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. HUNTER. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 287, nays 25, answered "present" 2, not voting 120, as follows:

Mr. ALBOSTA changed his vote from "nay" to "yea."

So the Journal was approved.

The result of the vote was announced as above recorded.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 1193) entitled "An act to authorize appropriations for fiscal years 1982 and 1983 for the Department of

□ This symbol represents the time of day during the House proceedings, e.g., □ 1407 is 2:07 p.m.

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

State, the International Communication Agency, and the Board for International Broadcasting and for other purposes."

The message also announced that the Senate had passed a bill of the following title, in which the concurrence of the House is requested:

S. 2774. An act to provide for reconciliation pursuant to section 2 of the first concurrent resolution on the budget for fiscal year 1983 (S. Con. Res. 92, 97th Congress).

RABBI ISRAEL MILLER

(Mr. BINGHAM asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BINGHAM. Mr. Speaker, we are privileged today to have as our guest chaplain one of the most distinguished members, one of the leaders, of the Jewish community in this country. He is senior vice president of Yeshiva University, Rabbi Israel Miller.

I have had the privilege of knowing Rabbi Miller as a friend since I first ran for Congress in 1964. He was for 27 years Rabbi of the Kingsbridge Heights Jewish Center in the Bronx, which is in my district. He was a chaplain during World War II in Europe. He has held numerous high positions, including president of the Rabbinical Council of America, chairman of the American Jewish Conference on Soviet Jewry, and chairman of the Conference of Presidents of the major American Jewish organizations, and many, many others. He has been honored with innumerable awards.

But the most important thing about Rabbi Miller is that he is one of the truly great human beings it has ever been my privilege to know.

PERMISSION FOR COMMITTEE ON APPROPRIATIONS TO FILE PRIVILEGED REPORT ON DEPARTMENTS OF COMMERCE, JUSTICE, AND STATE, THE JUDICIARY, AND RELATED AGENCIES APPROPRIATIONS, 1983

Mr. SMITH of Iowa. Mr. Speaker, I ask unanimous consent that the Committee on Appropriations may have until midnight tonight to file a privileged report on a bill making appropriations for the Departments of Commerce, Justice, and State, the judiciary, and related agencies for the fiscal year ending September 30, 1983, and for other purposes.

Mr. CAMPBELL reserved all points of order on the bill.

The SPEAKER pro tempore (Mr. DE LA GARZA). Is there objection to the request of the gentleman from Iowa?

There was no objection.

PERMISSION FOR COMMITTEE ON APPROPRIATIONS TO FILE PRIVILEGED REPORT ON DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT, AND SUNDRY INDEPENDENT AGENCIES, BOARDS, COMMISSIONS, CORPORATIONS, AND OFFICES APPROPRIATIONS, 1983

Mr. BOLAND. Mr. Speaker, I ask unanimous consent that the Committee on Appropriations may have until midnight tonight to file a privileged report on the bill making appropriations for the Department of Housing and Urban Development, and for sundry independent agencies, boards, commissions, corporations, and offices for the fiscal year ending September 30, 1983, and for other purposes.

Mr. COUGHLIN reserved all points of order on the bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

PERMISSION FOR COMMITTEE ON ENERGY AND COMMERCE TO SIT TODAY, TUESDAY, AUGUST 10, 1982, DURING CONSIDERATION OF LEGISLATION UNDER 5-MINUTE RULE

Mr. DINGELL. Mr. Speaker, I ask unanimous consent that the Committee on Energy and Commerce be permitted to sit today during consideration of legislation under the 5-minute rule for purposes of considering the Clean Air Act, H.R. 5252.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan?

Mr. EDGAR. Mr. Speaker, I object.

The SPEAKER pro tempore. The Chair will note those Members standing. There must be 10 objectors.

The Clerk will note the Members standing.

An insufficient number. The gentleman's request is granted.

Mr. EDGAR. Mr. Speaker, a parliamentary inquiry.

Mr. DINGELL. Regular order.

The SPEAKER pro tempore. The regular order was that the Chair has stated there was an insufficient number, and the gentleman's request is granted.

PARLIAMENTARY INQUIRY

Mr. EDGAR. Mr. Speaker, a parliamentary inquiry.

The SPEAKER pro tempore. The gentleman will state it.

Mr. EDGAR. Mr. Speaker, a unanimous-consent request was made that they not sit. There was an objection heard. The Speaker was not very clear in letting us know the action of 10 Members standing.

Mr. DINGELL. I ask for the regular order.

Mr. EDGAR. Those Members standing would have been sufficient had the

membership of the House known what the action was at that point.

The SPEAKER pro tempore. The Chair clearly stated it requires 10 Members. If the Chair is not mistaken, he mentioned it twice. There was not a sufficient number. The gentleman's request was granted.

UNNEGOTIATED SOCIAL SECURITY CHECKS

(Mr. SKELTON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SKELTON. Mr. Speaker, today I am introducing legislation which could provide millions of dollars to the social security trust funds without requiring payroll tax increases for American workers or benefit cuts for our retirees.

Every year millions of social security dollars are lost because people, for one reason or another, do not cash their checks. Because the checks are unnegotiated this money sits in the Federal Treasury doing nothing. The money is not transferred back to the social security trust funds nor does the money earn interest. This happens for two reasons: One, there is no limit on the life of a social security check. Also, the Treasury Department has no system for identifying social security checks from other Government checks. The worst part is that neither the Treasury Department nor the Social Security Administration knows for sure how much money is being lost from the trust funds. Estimates run between \$20 and \$30 million each year, and between \$200 million and \$600 million cumulative since the first social security checks were sent out in 1940.

The legislation I am introducing today would force the Treasury Department to establish and implement procedures to identify uncashed social security checks, would credit future uncashed checks back to the social security trust funds, and would authorize an appropriation to reimburse the social security trust funds for checks currently outstanding dating back to 1940. I am also calling on the GAO to make a precise determination of the amount of money that has accumulated over the years from these uncashed checks. With this knowledge we can reimburse the trust funds for the proper amount.

During this time when social security benefits are being threatened, my bill would provide a way to put social security money already collected to the use it was originally intended, and make sure that future uncashed checks will be reinstated to the appropriate accounts.

CLINCH RIVER BREEDER REACTOR PROJECT—AN UNJUSTIFIED BOONDOGGLE

(Mr. WOLPE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WOLPE. Mr. Speaker, despite the stated objections of over 100 Members of this House, last Thursday, the Nuclear Regulatory Commission granted a licensing exemption for the Department of Energy for the Clinch River breeder reactor project. DOE can now begin digging at the Clinch River site without the benefit of a construction permit.

Many of us in this body are very disappointed that this crucial licensing process has been set aside so that when the Clinch River project is once again debated on the floor of this body, its supporters can exclaim, "We can't terminate this project, we already have a hole in the ground."

However, despite this disappointment, I am convinced that when the Congress examines the latest evidence concerning the economics of this project, this body will reach the conclusion that it makes a lot more sense to fill in the hole at the Clinch River site than to spend billions of taxpayer dollars to continue this unjustified boondoggle.

MR. NOFZIGER SHOULD ADMIT HE IS WRONG

(Mr. GRAY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GRAY. Mr. Speaker, it is with a great sense of sadness and outrage that I come before the Members this morning as a result of an article in the Washington Post which said that Lynn Nofziger, long-time Presidential adviser and one of the architects of supply-side economics, is quoted as saying that he is returning to the Presidential fold to support the administration's tax bill. And when asked why he was doing so he said, "I am like a woman—I changed my mind."

Well, I simply would like to say to Mr. Nofziger, why does he not become just a person. If he is going to continue in this sexist vein, then he might as well "stand up like a man," and admit that he was wrong and changed his mind. Then he would show he is a real person.

T. OVERTON BROOKS VETERANS' ADMINISTRATION MEDICAL CENTER

(Mr. ROEMER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ROEMER. Mr. Speaker, today I have introduced legislation which will

designate the Veterans' Administration medical center in Shreveport as the T. Overton Brooks Veterans' Administration Medical Center. This will serve as a tribute to one of the most distinguished men to have served in the U.S. Congress. Mr. Brooks' career in the Congress began in 1936, and he served for more than 20 years before his untimely death in 1961. He has left a record of achievement in the Congress which few have equaled. During those years in Congress, his efforts yielded benefits both for the people of his district and the Nation. Mr. Brooks was influential in winning approval to construct the Veterans' Administration hospital in his district. As well, he played a crucial role in efforts to build Barksdale Air Force Base and to make Fort Polk Army installation a permanent one.

A native of Shreveport, Mr. Brooks graduated with honors from the LSU Law School in 1923. He also served as commander of Shreveport's Lowe-McFarland American Legion Post.

I deeply believe that the tribute I have proposed here today is but slight recompense for the debt this country owes this fine statesman. It is a fitting and proper memorial to his legacy of service that we name and dedicate this medical center as the T. Overton Brooks Veterans' Administration Medical Center.

□ 1030

SOVIET ATTITUDE AWAITED AS HUNGER STRIKE ENDS

(Mr. FASCELL asked and was given permission to address the House for 1 minute, and to revise and extend his remarks.)

Mr. FASCELL. Mr. Speaker, I want to call the attention of our colleagues to the case of Yuri Balovlenkov, the Soviet citizen who was on a hunger strike because he could not get permission to emigrate from the Soviet Union to join his wife, a Baltimore nurse, in the United States. Yesterday, at her behest and because she deliberately took action to save his life, he finally terminated his 36-day fast. His wife told him that she had received assurances that he would soon be allowed to emigrate and rejoin her and their 2-year-old daughter in this country. Unfortunately, Mrs. Balovlenkov had received no such promises from Soviet authorities but, desperate to save her husband's life, she felt compelled to lie to him and say that she had.

Yuri Balovlenkov is one of the original members of the "divided families group"—Soviet citizens married or engaged to Westerners who together began a hunger strike on May 10. Since then, two of the group have emigrated and two others have been promised visas. Mr. Balovlenkov had ended his first fast on the 43d day

after he, too, was told that he would be allowed to leave. Soviet authorities, however, reneged on that pledge and, therefore, Mr. Balovlenkov renewed his fast. As of yesterday, he had not eaten anything for 80 of the last 94 days and has consumed no solid food since May 10. He is in critical condition and has, undoubtedly, suffered irreversible damage to his health. Medical authorities claim that the next week will be crucial.

Mr. Speaker, under the provisions of the 1975 Helsinki Final Act, the Soviet Union is obligated to "facilitate" the reunification of families and to deal in a "positive and humanitarian spirit" with requests for emigration from persons who wish to live with their relatives abroad. The point is, however, the Soviets have not changed their attitude nor their stripes. The Balovlenkov case is a vivid and tragic example of the callous disregard with which the Soviets view their international commitments. They would not do anything that any of us would consider humanitarian while Balovlenkov was on the hunger strike. Now that he is off the hunger strike, let us see if they are capable of honoring their commitments. They have an opportunity to make a humanitarian decision and I certainly hope they do. They should.

REMOVAL OF NAME OF MEMBER AS COSPONSOR OF H.R. 6070

Mr. WEAVER. Mr. Speaker, I ask unanimous consent that my name be deleted as a cosponsor of H.R. 6070.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Oregon?

There was no objection.

UNFAVORABLE RESPONSE FROM CONSTITUENTS ON TAX EQUITY AND FISCAL RESPONSIBILITY ACT

(Mr. BLILEY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BLILEY. Mr. Speaker, within the next week House Members will be faced with an important decision: Whether or not to approve the conference report on H.R. 4961, the Tax Equity and Fiscal Responsibility Act. We will be asked, in the name of deficit reduction, to approve over \$20 billion in new taxes next year, and nearly \$100 billion over the next 3 years. Many of us on both sides of the aisle will either remain consistent with the tax policies we espoused in coming into the 97th Congress, or we will confuse our conservative constituents who sent us here to cut spending and taxes.

I come before the House today to share with my colleagues what some Americans are saying about this legis-

lation. There are few better reasons for supporting or opposing a bill than reflecting the views of those you represent.

Since early May, when Congress began considering new taxes in the budget, I have received more than 850 letters and phone calls from my constituents on the tax proposals under consideration. Over 90 percent of those Virginians oppose one or more provisions of H.R. 4961, while less than one-half of 1 percent favor any of the bill's provisions. That means that only seven people in the city of Richmond and Chesterfield and Henrico Counties have felt supportive enough of this legislation to ask me to support it.

While you may have received far more letters and calls, I believe these numbers are significant. I wanted to take a minute to share with you what some Americans think about what Congress is doing, and urge you all to pay close attention to your constituents' concerns when the matter comes before the House for our one vote. The people you represent will appreciate it.

DISAPPROVING CERTAIN REGULATIONS WITH RESPECT TO EDUCATION CONSOLIDATION AND IMPROVEMENT ACT OF 1981

Mr. PERKINS. Mr. Speaker, I move to suspend the rules and agree to the concurrent resolution (H. Con. Res. 388) disapproving certain regulations submitted to the Congress on July 29, 1982, with respect to the Education Consolidation and Improvement Act of 1981.

The Clerk read as follows:

H. CON. RES. 388

Whereas the Secretary of Education on July 29, 1982, submitted to the President of the Senate and the Speaker of the House of Representatives certain regulations with respect to the Education Consolidation and Improvement Act of 1981 pursuant to the Secretary's duty under section 431 of the General Education Provisions Act, and

Whereas the Congress, in the exercise of its authority under article I of the Constitution and in accordance with the procedure established by that section of the General Education Provisions Act for the safeguarding of that authority, has reviewed such regulations and finds certain of them inconsistent with the Act from which they must derive their authority: Now, therefore, be it

Resolved by the House of Representatives (the Senate concurring), That those regulations, submitted to the Congress on July 29, 1982, proposing to amend parts 74, 76, 78, 200, 201, and 298 of title 34 of the Code of Federal Regulations with respect to the Education Consolidation and Improvement Act of 1981 are disapproved by the Congress on the grounds of their inconsistency with the Act from which they derive their authority, and are returned to the Secretary of Education to be modified or otherwise disposed of as provided in section 431(e) of the General Education Provisions Act.

The SPEAKER pro tempore. Pursuant to the rule, a second is not required on this motion.

The gentleman from Kentucky (Mr. PERKINS) will be recognized for 20 minutes, and the gentleman from Pennsylvania (Mr. GOODLING) will be recognized for 20 minutes.

The Chair recognizes the gentleman from Kentucky (Mr. PERKINS).

Mr. PERKINS. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, House Concurrent Resolution 388, before the House today, disapproves the regulations for the chapter 1 and chapter 2 programs of the Education Consolidation and Improvement Act of 1981. These regulations were transmitted to Congress by the Secretary of Education and published in the Federal Register on July 29, 1982.

Mr. Speaker, disapproval of regulations is not an action to be taken lightly, but we in Congress cannot condone a situation where a Federal Department ignores the law when it writes regulations.

The Education Consolidation and Improvement Act was adopted last year. Chapter 1 amended the title I program for disadvantaged children under the Elementary and Secondary Education Act. Chapter 2 consolidated 28 categorical elementary and secondary education programs into a new State block grant.

The committee is recommending disapproval of the chapters 1 and 2 regulations because they are inconsistent with and contradictory to the authorizing legislation. This resolution enjoys bipartisan support and was reported unanimously.

The committee's disapproval of these regulations centers on the Department's contention in these regulations that the General Education Provisions Act does not apply to chapters 1 and 2. We believe that this interpretation flies in the face of the statutory language and congressional intent, which clearly show that the General Education Provisions Act is meant to apply to the Education Consolidation and Improvement Act.

The General Education Provisions Act contains several provisions important to the proper administration and smooth functioning of education programs at the Federal, State, and local levels. The first section of this act unequivocally states that it automatically applies to any Department of Education program except where specifically exempted.

The Education Consolidation and Improvement Act does not exempt chapters 1 and 2 from the provisions of the General Education Provisions Act. It merely limits the applicability of three specific sections of the General Education Provisions Act. Nowhere does it state that the other sections of

the General Education Provisions Act do not apply.

Our disagreement with the Department's position, while based on non-compliance with the statute, goes beyond the philosophical and legal issue of legislative authority. We are concerned about the impact on local education programs if the mandates of the General Education Provisions Act are shelved for the two largest Federal elementary and secondary education programs.

The General Education Provisions Act substantially affects the operation of Federal programs at the local and State levels. For example, it provides for advance funding of education programs, a provision vital to the stable planning of education programs before the school year begins. If the General Education Provisions Act does not apply, the advance funding provision, which many of us worked hard to get into law, could be abolished.

The General Education Provisions Act also includes key measures to control Federal paperwork, protect the privacy of student records, prohibit Federal control of education, and provide clear rules for Federal audits and enforcement.

The committee does not recommend this action without having attempted to inform the Secretary of our concerns, in a responsible fashion consistent with our committee's standard procedures for reviewing regulations. Following publication of the proposed regulations in February, I wrote Secretary Bell on April 13 and voiced the committee's view that the General Education Provisions Act is meant to apply to chapters 1 and 2. Congressman John Ashbrook, the primary sponsor of the Education Consolidation and Improvement Act, had expressed the same view last October during a public hearing on chapters 1 and 2.

Finally, I want to assure the Members that this is not a partisan attack on the administration's policy. My colleagues Congressman ERLBORN and Congressman GOODLING joined me in sponsoring this resolution, and I commend their leadership in this area. I should also note that our committee disapproved four sets of education regulations under the Carter administration.

Mr. Speaker, this body would not be doing its job if we did not exercise our disapproval authority when confronted with this sort of disregard for the statute and congressional intent.

I urge my colleagues to join me in protesting this action.

Mr. SIMON. Mr. Speaker, will the gentleman yield?

Mr. PERKINS. I yield to the gentleman from Illinois.

Mr. SIMON. Mr. Speaker, I simply want to join my colleague and point

out—I believe I am correct in saying—that the gentleman's counterpart, the chairman of the committee in the Senate, the Senator from Utah, is taking the same precise stand that the gentleman from Kentucky is taking. Is that correct?

Mr. PERKINS. That is correct.

Mr. SIMON. Mr. Speaker, it is important that we underscore the two points that the gentleman from Kentucky has made, and that is the advance funding which is so important to the schools of the Nation, and, second, the loss of any control we would have over regulations written by the Department of Education.

Mr. PERKINS. Mr. Speaker, the gentleman is absolutely correct. If they had their way and destroyed the forward funding, the schools throughout the Nation, those serving the poorest children, would not know from one year to the next what amount of money they would receive. It would really destroy the effectiveness of title I for the disadvantaged of the country.

The gentleman is correct on all the points he has made. I just cannot visualize the Supreme Court or the Congress or anyone else standing idly by and letting such a situation occur within the Department of Education and letting the Department of Education commit an overt act of this type which intrudes upon the rights of the Congress without the Congress taking action to set the house in order.

Mr. SIMON. Mr. Speaker, I commend my colleague, and I strongly support his stand. I hope this House will unanimously support that stand.

Mr. Speaker, I want to join my colleague from Kentucky, the distinguished chairman of the House Education and Labor Committee, in support of House Concurrent Resolution 388—disapproving the Department of Education's regulations implementing chapter 1 and chapter 2 of the Education Consolidation and Improvement Act of 1981. The issue before us today is simple—whether the Secretary of Education has the authority to decide whether or not the General Education Provisions Act (GEPA) may be ignored.

The General Education Provisions Act or GEPA as it is commonly known is an essential tool in Congress oversight of Department of Education administrative regulations. GEPA provides a fail-safe mechanism so that the legislative branch of the Government can assure that regulations issued by the Department conform to the law.

The Secretary of Education has decided that this act does not apply to the regulations he has promulgated to implement the new Education Consolidation and Improvement Act. The law however is clear. The General Education Provisions Act applies automatically to any program related to education. Whether the new law mentions

the general provisions or not makes no difference. It still applies.

Mr. Speaker, the regulations before us, designed to help implement the new title I law and the new block grant in education, must have the general provisions incorporated into them if local implementation of these laws is to remain orderly and smooth.

This is not a partisan issue. Our late colleague, John Ashbrook, stated last October in a public hearing that it was his belief that the general provisions do apply to the Education Improvement and Consolidation Act. And as recently as July 15, Senator ORRIN HATCH, chairman of the Senate Labor and Human Resources Committee, told the Education Department the same thing. This disapproval resolution has been introduced by our committee chairman and the ranking Republicans of the House Education and Labor Committee. It deserves your support.

Mr. GOODLING. Mr. Speaker, I yield 2 minutes to the ranking minority member of the committee, the gentleman from Illinois (Mr. ERLBORN).

Mr. ERLBORN. Mr. Speaker, I commend the chairman of the committee for acting so quickly to bring this resolution to the floor. As a cosponsor of the resolution with him and the able ranking member of the Subcommittee on Elementary, Secondary and Vocational Education, the gentleman from Pennsylvania (Mr. GOODLING), I urge my colleagues to suspend the rules and agree to the resolution before us.

As in the past, we are faced with the need to take action to insure that decisions made by the Congress are not altered or flouted by unelected officials of the Education Department.

The General Education Provisions Act (GEPA) allows a two-House veto of any final regulations for education programs within 45 days after publication and transmittal to Congress. Ironically, were these regulations not to be challenged, that authority to disapprove ECIA regulations under the provisions of GEPA would be abrogated. This would result from the Department's interpretation—in the face of convincing evidence to the contrary—that GEPA is largely inapplicable to the Education Consolidation and Improvement Act.

We simply cannot let this practice of regulations writers rewriting the law continue. Especially egregious is the attempt in these regulations to eliminate the very section of the law we enacted (GEPA) that gives the Congress authority to exercise oversight over all education regulations. We would be abdicating our responsibility in this matter if we do not exercise this authority today. We have the ultimate responsibility for the regulations which flow from the laws we pass.

The chairman of the committee has explained that the applicability of three sections of the General Education Provisions Act is limited by the language of ECIA, and a fourth section is mentioned to clarify that all of that section would apply to ECIA without limitation.

The statute is silent with respect to the applicability of the balance of the provisions of GEPA. Yet, the Department takes the unsupportable position that we have repealed the more than 50 other sections of that law. I need not remind you that a strong legal presumption exists against legislative repeals by implication. But I would remind you that the Department knew virtually from the outset what the legislative intent was. And, in any event, there is no need to make presumptions when the principal author of a bill makes it clear he did not intend a wholesale repeal of the General Education Provisions Act, as was the case here.

In discussing the applicability of the General Education Provisions Act at a subcommittee hearing on October 6 of last year, the late Member from Ohio, Mr. Ashbrook, stated, and I am quoting him now:

The General Education Provisions Act (GEPA) is applicable, in whole, to the Education Consolidation and Improvement Act, unless (1) a provision of GEPA is made inapplicable by specific reference to ECIA, or (2) there is a provision or requirement in ECIA which supersedes a similar requirement in GEPA.

Frankly, Mr. Speaker, I believe this fact is understood by the people in the Department. They appear to be choosing, however, to use their rulemaking power to bring about a result not intended by the Congress. This is a use of that power that should not be condoned.

If the Department's interpretation is not challenged, the Congress will be denied the right to disapprove regulations governing Federal programs to assist educationally deprived children, as well as some 30 other programs in the education block grant we enacted last year even if we find those regulations inconsistent with the law from which they derive their authority, as we have here.

But denial of legislative oversight is not my only concern. The General Education Provisions Act contains many other important provisions. We enacted them for a purpose. If we ever want to repeal those provisions, we will do it by action of this Congress. We cannot permit it to be done by administrative fiat. Those other sections which would be deemed to no longer apply include the authority for advance funding, a prohibition against the use of appropriated funds for busing, and a prohibition against Federal control of education.

I urge my colleagues to approve House Concurrent Resolution 388 to insure that legislation we enact is correctly interpreted and administered accordingly.

Mr. GOODLING. Mr. Speaker, I yield myself such time as I may consume.

Mr. GOODLING. Mr. Speaker, I would like to reinforce the statements of my colleagues, the chairman of the Committee on Education and Labor, the gentleman from Kentucky (Mr. PERKINS), and the ranking Republican member of the committee, the gentleman from Illinois (Mr. ERLBORN). I fully endorse their remarks and support the passage of House Concurrent Resolution 388.

The Secretary of Education has held that the General Education Provisions Act (GEPA) does not apply to the Education Consolidation and Improvement Act (ECIA). This interpretation not only complicates the administration of chapter I, which is the education for disadvantaged children, and chapter II, the education block grant, but it completely ignores the expressed intention of Congress.

Let me give the Members a quick overview of the facts which will prove my case. First of all, section 400 of GEPA makes GEPA applicable to all education programs unless there is a specific—and I repeat “specific”—exception in another statute.

□ 1045

ECIA has no such exception.

Second, the Secretary has the administrative responsibility at the Federal level, as contemplated in section 400(b) of GEPA.

Third, our late colleague, Mr. Ashbrook, specifically included in ECIA three sections of GEPA in order to limit the applicability. This carries with it the presumption that they would totally apply unless limited.

Fourth, Congress specifically used language in ECIA precluding certain ESEA title I sections. It would have done the same for GEPA if that were the intent.

Fifth, the rule of statutory construction is that all provisions which are, on their face, applicable, shall be followed, unless internally and explicitly contradictory. No contradiction exists here.

So, there is no question in my mind that the Department is totally wrong. Their argument is weak.

Of course OMB and the Department would like to remove the power of Congress to review and disapprove Department regulations. I suppose that is true of all Departments.

But we are the elected people; they are not. Certainly we are held responsible for what they do.

We have no way to assume this responsibility unless we have this opportunity to review and disapprove or approve.

So I would hope that we would unanimously pass this concurrent resolution because, as I said, in this case the Department is wrong.

I yield back the balance of my time.

Mr. FORD of Michigan. Mr. Speaker, I strongly urge the House to accept the recommendation of the House Education and Labor Committee and approve House Concurrent Resolution 388, which disapproves regulations for chapters 1 and 2 of the Education Consolidation and Improvement Act of 1981 (ECIA). The regulations were submitted to Congress by the Secretary of Education and published in the Federal Register on July 29, 1982. The very law which gives Congress the responsibility of formal review and comment on the regulations, the General Education Provisions Act (GEPA), is under attack by the Department of Education in these regulations. It is their contention that it does not apply to either chapters 1 or 2 of ECIA.

After a thorough review by the Subcommittee on Elementary, Secondary and Vocational Education on which I am privileged to serve, I have determined that the Department of Education's finding is not only inconsistent but totally contradictory with the authorizing statute, and to congressional intent. Section 400 of GEPA unquestionably has an all-encompassing applicability to all education statutes. It reads:

(b) Except where otherwise specified, the provisions of this title shall apply to any program for which an administrative head of an education agency has administrative responsibility as provided by law or by delegation of authority pursuant to law. (Sec. 400(b) of GEPA, 20 U.S.C. 1221 (b)).

The law clearly indicates that GEPA automatically applies to any program that is related to education, except where there are specific exemptions.

In fact, it is for the very situation we face today—one in which the executive branch has overstepped its authority and violated the intent of the law—that GEPA was put into the law in 1974. The administration, and more specifically the Department of Education, have made it well known that they do not want to be bound by GEPA. Given that they realize they have no chance of being successful in a legislative repeal of the provision, they are attempting this backdoor approach to deny its applicability over the two major elementary-secondary education programs. I am afraid that this is just the tip of the iceberg. There is no question that this administration has a strong philosophical belief about certain programs and overall patterns in the Department of Education, and now it is apparent that they will ignore the law to institute that philosophy. We need the benefit of the GEPA more than ever during the tenure of this administration, so that State and local school districts

can be protected from their indiscriminate disregard for the law and legislative history.

GEPA also provides for advance funding of education programs, a policy local school districts specifically requested so that they could better plan for their school year budgets. In addition, GEPA contains the important provisions controlling Federal paperwork, protecting the privacy of student records and pupil rights, prohibiting Federal control of education, and setting up procedures for the return of funds recovered from audits to grantees. Thus, my strong support of the committee's resolution to disapprove of the Department of Education regulations stems not only from my firm position on legislative prerogative, but a practical concern about the impact on local education programs if the GEPA statute is not followed.

It is imperative that the House disapprove these regulations—not only for the sake of legislative integrity, but to retain and strengthen the faith and good will the Congress has built up over the years with the education community throughout the Nation.

Mr. MOFFETT. Mr. Speaker, House Concurrent Resolution 388 is a resolution of disapproval of the final regulations for chapters 1 and 2 of the Education Consolidation and Improvement Act. After careful and close review of the regulations, the Committee on Education and Labor has reported that they are “inconsistent with and contradictory to their authorizing statute, the Education Consolidation and Improvement Act, and to the General Education Provisions Act.” I concur with the committee's findings and fully support its actions.

I must say that I have reservations about the legislative veto mechanism. The recent congressional veto of the Federal Trade Commission's used car rule was a shameful exercise, one which prompted me to file an amicus brief challenging legislative veto. However, one issue which became clear during the debate was that not a single Member of Congress alleged FTC violation of congressional intent in drafting the used car rule. In the case of the resolution of disapproval before us today, however, the Education and Labor Committee has clearly determined that the final chapters 1 and 2 regulations are inconsistent with the authorizing legislation. Under this circumstance, and given the sober and scholarly approach with which the committee approached the final regulations, I strongly support the resolution disapproval.

Congress has the responsibility of insuring that the laws it passes are properly carried out. Regrettably, the final education regulations at hand fall short of upholding the mandate of chapters 1 and 2 of the ECIA, forcing

Congress to take action. The basis of the disapproval resolution is the Secretary of Education's contention that the General Education Provisions Act (GEPA) does not apply to either chapter 1 or 2. In brief, it has been found that—

GEPA automatically applies to "any program" that is under the administrative jurisdiction of the Department of Education, "except where" there are specific exemptions or latter statutory provisions which are specifically contradictory are enacted. There is no need to mention GEPA; absence of mention denotes an intent to have it apply. Since ECIA contains no provisions exempting chapters 1 and 2 from the GEPA statute, the Secretary is bound to follow GEPA mandates.

We must not lose track of the extraordinary circumstance under which the Education Consolidation and Improvement Act was created. As Chairman Carl Perkins has put it:

Implementation of chapter 2 involved an unprecedented transition from 28 separate programs to one block grant, the repeal of some 44 education programs, and the creation of new administrative responsibilities at all levels of government.

With such large-scale changes envisioned, Congress anticipated the confusion that could ensue in administering the new program. The Secretary of Education's decision that GEPA does not apply to the Education Consolidation and Improvement Act serves to only further confuse the issue and confound the intention of Congress as to the implementation of chapters 1 and 2.

In the final analysis, I believe that Congress and our people will be served better by means other than legislative veto, when confronting regulations such as these. These tools include oversight by the appropriate subcommittees of jurisdiction, sunset laws, and biennial budgeting. Each of these techniques would permit Congress write better laws and see that the laws are being faithfully executed by the executive branch.

This, it seems to me, would be better than the current situation under which we are operating; that is, with Congress acting legislatively and then judicially. If we make our intentions better known when writing the laws, we will not need to rely on legislative veto to determine if the agencies understood what we meant.

I urge, therefore, the disapproval of the final regulations. The Department of Education has not done its job. Let us send these regulations back to the drawing board so that they can be realigned with the intent of the authorizing statute.●

● Mr. WEISS. Mr. Speaker, the resolution before us this morning, House Concurrent Resolution 388, will send a loud, clear message to the executive branch that Congress will not tolerate Federal departments disregarding statutes when they write regulations. I

urge my colleagues to speak with one voice and support this concurrent resolution.

As a member of the Education and Labor Committee, I completely concur with the committee's belief that the regulations for chapters 1 and 2 of the Education Consolidation and Improvement Act are inconsistent with the authorizing legislation because they state that the General Education Provisions Act does not apply to the chapters 1 and 2 programs. In my view, the Department's position is an affront to the Congress and our responsibility to write the laws.

While I am troubled by the Department's failure to comply with the statute, I am also greatly concerned about the practical effects of the Department's position that the General Education Provisions Act should not apply to two of the largest Federal programs aiding elementary and secondary schools.

The General Education Provisions Act houses many provisions that are crucial to the operation of education programs at the Federal, State, and local levels. To dismiss these provisions would surely cause harm to local school personnel and schoolchildren.

For example, section 411 of the General Education Provisions Act authorizes advance funding for education programs. As a result of this provision, funds for most education programs are included in the appropriation act for the fiscal year preceding the fiscal year in which they are obligated. Practically speaking, this means that chapter 1 (or title I) funds are appropriated in fiscal year 1982 for use at the local level in school year 1982-83.

The purpose of advance funding is to afford States and local school districts adequate notice of how much Federal funding will be available to them in the upcoming school year. Many local school districts must approve their budgets and notify staff whether they will be kept on well in advance of the school year. Advance funding is therefore vital to the stable planning needed in education.

Many Members of Congress worked many years to see this provision passed into law. Now that it has been working for several years, we cannot give it up by administrative fiat.

The administration's regulations would destroy advance funding for chapters 1 and 2. Without this important provision, school budgets would be thrown into disarray, teacher contracts would be left hanging, and the poorest school districts would have difficulty keeping solvent.

The General Education Provisions Act includes a host of other key provisions: Sections to reduce the Federal paperwork burden, protect the privacy of student records, pay back funds recovered from audits to grantees, prohibit Federal control of education, and

reserve to Congress the authority to disapprove regulations. All of the protections afforded State and local educational agencies by this law would disappear if the administration had its way.

I ask my colleagues to suspend the rules and vote in favor of this resolution.●

● Mr. KILDEE. Mr. Speaker, when this body moves to disapprove a set of departmental regulations, it is a weighty matter. However, there is no question that in this case, serious action is necessary to put a stop to an equally serious offense: Disregard for the law in Department regulations.

We on the Education and Labor Committee are recommending disapproval because the regulations for the Education Consolidation and Improvement Act contradict the statute. In these regulations, the Department of Education takes the position that the General Education Provisions Act does not apply to chapters 1 and 2 of the Education Consolidation and Improvement Act.

The law and legislative history clearly show that the General Education Provisions Act is meant to apply. The General Education Provisions Act applies to any Department of Education program except where specifically exempted, and the Education Consolidation and Improvement Act does not exempt chapters 1 and 2 from the provisions of the General Education Provisions Act.

Mr. Speaker, this has been the position of our committee, on both sides of the aisle, since the Education Consolidation and Improvement Act was enacted. We have initiated disapproval in order to protect Congress responsibility to see that the laws are administered as they are written, not as a partisan attack on the administration.

Since the Education Consolidation and Improvement Act was passed, the administration was made fully aware of congressional intent that the General Education Provisions Act apply to chapters 1 and 2.

Last October 6, a few months after the Education Consolidation and Improvement Act passed, the Subcommittee on Elementary, Secondary, and Vocational Education held a public oversight hearing on the law. At that hearing, Congressman JOHN ASHBROOK, the primary author of the Education Consolidation and Improvement Act, stated that the General Education Provisions Act is applicable to the Education Consolidation and Improvement Act.

Following publication of proposed regulations on February 12, 1982, the committee closely reviewed these regulations according to the procedures for regulation review instituted during the past 3 years within our committee. In keeping with committee policy, the

chairman wrote the Secretary of Education on April 13, expressing concerns and comments on the proposed regulations. In that letter, the chairman stated:

I am also concerned about the interpretation expressed in the introduction to these regulations that GEPA, for the most part, does not apply to Chapters 1 and 2. Section 400 of GEPA gives that law general applicability to Department of Education programs. I find no exception to the provision in ECIA.

Thus, the committee did not take action to disapprove without thorough consideration of the regulations and without formally notifying the Department of our concerns.

I hope my colleagues join with me in supporting this resolution.●

Mr. PERKINS. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Kentucky (Mr. PERKINS) that the House suspend the rules and agree to the concurrent resolution (H. Con. Res. 388).

The question was taken.

Mr. PERKINS. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The vote was taken by electronic device, and there were—yeas 363, nays 0, not voting 71, as follows:

[Roll No. 253]

□ 1045

So (two-thirds having voted in favor thereof) the rules were suspended and the concurrent resolution was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. PERKINS. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the concurrent resolution just agreed to.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Kentucky?

There was no objection.

PERMISSION FOR COMMITTEE ON THE JUDICIARY TO SIT TODAY DURING 5-MINUTE RULE

Mr. MAZZOLI. Mr. Speaker, I ask unanimous consent that the Committee on the Judiciary be permitted to sit on today, August 10, 1982, during the 5-minute rule.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Kentucky?

There was no objection.

RABBI ISRAEL MILLER

(Mr. WEISS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WEISS. Mr. Speaker, I want to join in the sentiments expressed by my distinguished colleague, the gentleman from New York (Mr. BINGHAM), regarding our distinguished friend from New York, Rabbi Israel Miller, who gave the opening prayer.

Rabbi Miller is an officer of Yeshiva University, which is located in my district, a revered leader of the Jewish community, an outstanding resident of New York, and a magnificent American. It is a pleasure and a delight to welcome him to the House today.

REQUEST TO RESCIND PERMISSION FOR COMMITTEE ON ENERGY AND COMMERCE TO SIT DURING 5-MINUTE RULE

Mr. WAXMAN. Mr. Speaker, I ask unanimous consent that the previous unanimous-consent request that was granted by the House to allow the Committee on Energy and Commerce to sit during the 5-minute rule be rescinded.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

Mr. HILER. Mr. Speaker, I object.

The SPEAKER pro tempore. Objection is heard.

THE FOOD AND AGRICULTURE RECONCILIATION ACT—FISCAL YEAR 1983

Mr. FROST. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 551 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 551

Resolved, That upon the adoption of this resolution it shall be in order, sections 401(b)(1), 402(a), and 303(a)(4) of the Congressional Budget Act of 1974 (Public Law 93-344) to the contrary notwithstanding, to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 6892) to provide changes in legislation to meet reconciliation requirements of the first congressional budget resolution—fiscal year 1983—for the House Committee on Agriculture, the first reading of the bill shall be dispensed with, and all points of order against the bill for failure to comply with the provisions of clause 5, rule XXI are hereby waived. After general debate, which shall be confined to the bill and shall continue not to exceed one hour, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Agriculture, the bill shall be considered as read for amendment under the five-minute rule. No amendment to the bill shall be in order except the following amendments: (1) the amendments recommended by the Committee on Agriculture now printed in the bill, said amendments shall be considered as having been read, shall be considered en bloc and shall not be subject to a demand for a division of the question in the House or in the Committee of the Whole, and shall not be subject to amendment; (2) an amendment printed in the Congressional Record of August 5, 1982, by Representative Zablocki, and said amendment shall not be subject to amendment; and (3) an amendment in the nature of a substitute printed in the Congressional Record of August 5, 1982, by, and if offered by, Representative Wampler, said substitute if offered shall be considered as having been read and shall not be subject to amendment but shall be debatable for not to exceed one hour, equally divided and controlled by Representative Wampler and a Member opposed to said substitute, and all points of order against said substitute for failure to comply with the provisions of sections 303(a)(4) and 401(b)(1) of the Congressional Budget Act of 1974 (Public Law 93-344) and clause 5, rule XXI are hereby waived. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit with or without instructions.

The SPEAKER. The gentleman from Texas (Mr. Frost) is recognized for 1 hour.

Mr. FROST. Mr. Speaker, I yield the usual 30 minutes, for the purposes of debate only, to the gentleman from Ohio (Mr. Latta), pending which I yield myself such time as I may consume.

Mr. FROST. Mr. Speaker, House Resolution 551 is a modified closed rule providing for the consideration of H.R. 6892, the Food and Agriculture Reconciliation Act. The rule provides 1 hour of general debate to be equally divided and controlled between the chairman and the ranking minority member of the Committee on Agriculture.

The SPEAKER. This is the last of the reconciliation proposals to be reported to the House. In order to expedite consideration of the Agriculture Committee's reconciliation proposal and prevent extraneous issues from impeding the budget process, this rule limits the amendments to those requested by the chairman and the ranking minority member of the Agriculture Committee.

Only the amendments specifically identified by this resolution shall be in order to the bill. First, the rule provides for the consideration of the Agriculture Committee amendments now printed in the bill which shall be considered as read, shall be considered en bloc, shall not be subject to a demand for a division of the question in the House or in the Committee of the Whole and shall not be subject to amendment. Second, the rule makes in order an amendment to be offered by Representative ZABLOCKI regarding coordinating disposition of donations of agricultural products outside the United States. This issue is obviously within the jurisdiction of the Committee on Foreign Affairs, but Chairman ZABLOCKI agreed to forgo sequential referral of the bill so as not to impede the reconciliation process.

The final amendment made in order by this rule is the substitute to be offered by Representative WAMPLER, the ranking Republican member of the Agriculture Committee. That substitute shall be considered as read, shall not be subject to amendment but shall be debatable for 1 hour to be equally divided between Representative WAMPLER and a Member opposed to the amendment. No other amendments to the bill shall be in order.

Mr. Speaker, to permit consideration of the bill and the Wampler substitute, several waivers of points of order are included in the rule. The rule waives points of order against the bill and the Wampler substitute for failure to comply with the provisions of section 303(a)(4) of the Congressional Budget Act. Section 303(a)(4) prohibits consideration of any bill which provides new entitlement authority effective

in a fiscal year before the first budget resolution for such fiscal year has been adopted. The waivers are necessary because the bill and the Wampler substitute provide new entitlement authority under the dairy price support program and the corn loan program which are first effective in 1984 and since no first budget resolution for fiscal year 1984 has been adopted.

The rule waives section 401(b)(1) of the Budget Act against the bill and the Wampler substitute. Section 401(b)(1) bars consideration of any bill which provides new entitlement authority effective before the beginning of the fiscal year which begins in the calendar year in which the bill is reported. This waiver is necessary because the bill and the Wampler substitute would provide new entitlement authority in the form of payments to producers for 1983 crop retirement and conservation for wheat, feed grains, upland cotton and rice. Since the entitlement authority would be effective upon enactment, presumably in fiscal year 1982, and since the bill was not reported in 1981, the bill technically violates section 401(b)(1) of the Budget Act.

Mr. Speaker, the rule waives section 402(a) of the Budget Act against the bill. Section 402(a) prohibits consideration of new budget authority for a fiscal year unless that bill has been reported by May 15 preceding the beginning of that fiscal year. This waiver is necessary because the bill contains authorizations for fiscal years 1982 and 1983 and it was not reported by May 15, 1981. However, the Budget Committee supports these emergency waivers.

Mr. Speaker, House Resolution 551 waives clause 5 of rule XXI which prohibits appropriations in a legislative bill. This waiver is necessary because the bill and the Wampler substitute contain several provisions relating to the dairy price support program which would authorize the use of funds previously appropriated to the Commodity Credit Corporation, authorize the CCC to make payments in connection with the donation of dairy products outside the United States or otherwise contain provisions which may be construed as an appropriation.

Finally, the rule provides one motion to recommit with or without instructions.

Mr. Speaker, this is necessarily a tightly structured rule which would allow the House to proceed in an orderly expeditious manner to the completion of the reconciliation process. The bill made in order by this rule exceeds the goals set forth in the first concurrent resolution on the budget. H.R. 6892 would achieve savings of \$1.276 billion in 1983, \$1.724 billion in 1984, and \$1.596 billion in 1985 by

amending the commodity programs for dairy, feed grains, wheat, rice, and upland cotton and by amending the Food Stamp Act.

Mr. Speaker, I urge adoption of this resolution so that the House may proceed to consideration of this important legislation.

Mr. LATTA. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, once again, this rule violates the Budget Act and the first budget resolution for fiscal year 1983. Both of those documents make it clear that the standing committees covered by reconciliation instructions are supposed to report to the House Budget Committee. In this case, the committees did not report to the Budget Committee. The Budget Committee is supposed to combine all of the various recommendations into one package and then send them to the House floor. Once again, Mr. Speaker, this House, under your leadership, is following a procedure which is in violation of the law, and also in violation of the specific instructions written in the first budget resolution.

□ 1115

Mr. Speaker, a word about this very restrictive rule. It allows only three amendments: First, the Agriculture Committee amendments, which will not be amendable; second, an amendment to be offered by the chairman of the Foreign Affairs Committee, the gentleman from Wisconsin (Mr. ZABLOCKI), dealing with the distribution of dairy products abroad, which will not be amendable; and third, an amendment in the nature of a substitute to be offered by the ranking minority member of the Committee on Agriculture, the gentleman from Virginia (Mr. WAMPLER), which also will not be amendable.

Mr. Speaker, this is highly unusual. This bill makes basic changes in agricultural programs and this highly restrictive approach prohibits the House from considering significant alternatives and amendments which were presented to the Rules Committee and also in committee.

For example, the gentleman from Iowa (Mr. SMITH) appeared in the Rules Committee when this rule was being considered last week and made the point that cornrowers who participate in the diversion program are not treated as well as wheatgrowers who participate in the diversion program; yet under this procedure, nothing can be done to try to make this situation more equitable.

The gentleman from Wisconsin (Mr. GUNDERSON) appeared with a similar problem. He had an amendment to the dairy part of the bill which he had worked out with several other Members. He stated in the Rules Committee that his amendment would save more money than any other proposal

before us; that it would eliminate the surplus more quickly than any other proposal before us; and that it would do so in a way that preserves the traditional family dairy farm. Yet, under this rule the House will never have an opportunity to consider that approach.

Finally, Mr. Speaker, there is no doubt in my mind that the Agriculture Committee proposal fails to save the amount required under the reconciliation instructions.

Instead of reducing expenditures by \$5 billion over 3 years, this bill would save only \$882 million.

The first budget resolution directed the Agriculture Committee to report reconciled savings of \$0.779 billion in 1983.

It called for \$1.083 billion in 1984; and \$1.428 billion in 1985, for a total of \$3.29 billion.

Savings assumed but not reconciled were \$1.070 billion in 1983; \$0.6 billion in 1984; \$0.2 billion in 1985, for a total of \$1.870 billion. Together, both categories add up to a total savings of \$5.160 billion.

However, under this bill, we find that dairy savings in 1983 would be \$1.068 billion; whereas the grains and cotton program would increase by \$1.09 billion.

The food stamp savings are only \$0.334 billion, for a total net savings of \$0.312 billion.

The total dairy savings over 3 years would be \$1.401 billion.

We would have an addition in the grains and cotton section of \$1.845 billion over 3 years.

The food stamp program would only save over a period of 3 years \$1.326 billion; for a total net savings of \$882 million, far short of the amount mandated by this Congress.

Mr. Speaker, I have two requests for time.

Mr. ROUSSELOT. Mr. Speaker, will the gentleman yield?

Mr. LATTA. I would be happy to yield to the gentleman from California.

Mr. ROUSSELOT. Aside from changing the law, as the gentleman has pointed out, how far short does this bill go, or how far short is it in living up to what we should do in reconciliation?

Mr. LATTA. It is about 88 percent short, or \$4.5 billion.

Mr. ROUSSELOT. It is \$4.5 billion short?

Mr. LATTA. That is correct.

Mr. ROUSSELOT. It is 88 percent of what we are supposed to do?

Mr. LATTA. That is correct.

Mr. ROUSSELOT. Well, I guess you could look at the bright side, we are 12 percent right.

Mr. LATTA. If there is a bright side.

Mr. WALKER. Mr. Speaker, will the gentleman yield to me?

Mr. LATTA. I would be happy to yield to the gentleman from Pennsylvania.

Mr. WALKER. Mr. Speaker, do I understand the gentleman to say that this rule is so restrictive that there is going to be no opportunity on the floor, short of a recommittal motion, to have any chance whatsoever of getting some additional savings to bring us closer to the budget targets?

Mr. LATTA. That is correct, and I hasten to point out to my farmer friends that they are going to have no opportunity to offer any other amendments, other than the three made in order in the rule, and they are changing basic agricultural law.

I served on the Agriculture Committee when I first came to this Congress, and back in those days the House would have defeated the rule if the rule on an Agriculture Committee bill had been so restrictive.

Mr. WALKER. This is one of the most restrictive rules we have had in this session and yet it deals with one of the most important issues that this House addresses; is that not so?

Mr. LATTA. A very important issue, because across this country the farmers are hurting.

Mr. WALKER. Mr. Speaker, I thank the gentleman.

Mr. LATTA. Mr. Speaker, I yield 10 minutes to the gentleman from Virginia (Mr. WAMPLER).

Mr. WAMPLER. Mr. Speaker, I rise in support of this reconciliation legislation. However, I, and I am sure many others, reserve the right to try to amend this piece of legislation through a substitute I intend to offer during the course of consideration of H.R. 6892. There may be a motion to recommit with instructions that members will want to examine carefully.

I wish to be candid with you about this matter and in doing so I wish to give you some background on how the Committee on Agriculture, and its members including myself, responded to the reconciliation instructions contained in the conference report on Senate Concurrent Resolution 92 on the first concurrent budget resolution for fiscal year 1983.

Chairman DE LA GARZA has worked hard and diligently to comply with the spending cuts requirements of the first concurrent resolution. The spending cuts have come with some difficulty this year. This is true in part this year, I believe, because we in the House are going at this with multiple reconciliation bills rather than an omnibus reconciliation bill as we did last year. Moreover, each committee is going directly to the floor with their reconciliation bills. For these among other reasons, I believe spending cuts are harder to achieve.

Next, let me observe initially that this is not merely a spending cut bill

we deal with today; it is also an authorization bill for the food stamp program in that it authorizes nearly \$40 billion over a 3-year period for fiscal year 1983-85. We authorized a \$11.3 billion cap in the 1981 Farm Act for fiscal year 1982 and I understand that cap will be adequate for the funds that will be appropriated this year. We were fortunate, in my opinion, in retaining the cap on this program in the bill before you today. It is evident, I believe, for those who have voted for this concept of cap for many years that it is possible to get what was an entitlement program under control by placing a cap on it.

Let me also point out that there are many frustrations in the budget process in the numbers game we seem to encounter in what our Congressional Budget Office arrives at in estimating reductions in budget authority and/or outlays. As one of our Members observed with respect to the adjustments in the farm commodity programs; "it nearly, if not in fact, confounds logic that we spend more money in fiscal year 1983 to achieve savings in fiscal year 1984" in certain of these programs. Meanwhile, CBO estimates no costs for the feed grains program in fiscal year 1983 because the 1982 crop is estimated by CBO at 7.2 billion bushels. Yet I think we all will admit that the 1982 corn crop is estimated right now by most responsible authorities at over 7.6 billion bushels. In saying this I do not mean to criticize CBO or its employees, they are merely trying to do their job—the CBO corn crop estimate of 7.2 billion bushels is based on January baselines that they use in dealing with the budget process. Nor, do I wish to single out these adjustments in farm commodity programs for criticism. They merely lend themselves as examples of the frustrations encountered in dealing with the budget process and more particularly reconciliation.

Mr. LATTA, the ranking member of the Budget Committee, has expressed his concern about the scoring of budget savings or spending cuts in H.R. 6892. Some of these budget issues such as scoring become so complicated that it is difficult for those, such as I, who do not deal with them every day to confidently arrive at commonsense judgments on these matters. I am told, however, that while the scoring by CBO will be made as Mr. LATTA requested, the committee's reconciliation bill does not technically meet a strict definition of the budget authority and budget outlay requirements of the instructions of the conference report on Senate Resolution 92 on the first concurrent resolution. Mr. LATTA himself may wish to articulate this further during the debate on this bill.

We on this side of the aisle were hopeful last Wednesday that we had reached a compromise that would gen-

erate substantially greater spending cuts than those contained in this bill—H.R. 6892. However, I must admit that our efforts for such a compromise—that we were hopeful might have bipartisan support came apart on Thursday as we were scheduled to appear before the Rules Committee.

A substitute that I will offer during the consideration of this bill—and that Mr. COLEMAN of Missouri will manage—will provide certain selective additional spending cuts which I believe offer many of you an opportunity to reduce Federal deficits and avoid having to pass additional revenue enhancers later to reduce the fiscal years 1983-85 deficits.

The one thing that the substitute I will offer will do—I am confident—is to put the House in a better posture to come out of a House-Senate conference on agriculture reconciliation with a better bill than perhaps either House will take to such a conference.

We must all realize that what we fail to do in areas of spending cuts may have to be made up in the tax bill that we consider later if we are to meet first concurrent budget resolution goals.

I realize that it is currently in vogue to criticize what the Congress did last year in the way of tax cuts and spending cuts—the fiscal year 1982, Reconciliation Act—however, I would point out that several so-called liberal governments such as those in Canada and France are currently encountering greater economic difficulties than we are here in the United States. Unemployment in Canada is about 11 percent and inflation is about 12 percent and a limit on wage increases for government employees has been adopted. France is encountering several problems not the least of which is the flight of investment funds to other countries.

Our plight is part of a greater worldwide economic problem that we in the United States must continue to grapple with in a number of different ways. We are in this problem together and we must get out together. We did not get into our current economic plight overnight and we have not been able to get out magically in the last 18 months. Enforcing spending cuts is always a difficult problem for legislators. Especially is this true in a period when our national economy is in a recession. However, we must stay our course of persisting in our efforts to bring our Government fiscal affairs in order and getting our national economy back on its feet. Those are consistent and concurrent efforts on spending and Federal deficits.

I urge you to keep an open mind on this entire matter, support the Wampler substitute and give strong and serious consideration to the motion to

recommit that will be offered from this side of the aisle.

Mr. FROST. Mr. Speaker, I yield 6 minutes to the gentleman from Texas (Mr. DE LA GARZA), the chairman of the Committee on Agriculture.

Mr. DE LA GARZA. Mr. Speaker, I thank the gentleman.

Mr. Speaker, I take this time, I had not intended to speak on the rule, but I take this time only to address the issue which was discussed by my dear colleague, the gentleman from Ohio (Mr. LATTA).

□ 1130

It grieves me very much to see that my distinguished friend from Ohio would take issue with this committee at this date.

Due to the first Gramm-Latta resolution that this House adopted, and this committee worked with, the diligence and the hard work of this committee provided us some \$3 billion above and beyond what we had been ordered by that Latta resolution.

We were very diligent, and it is very painful and difficult, as the gentleman from Virginia just mentioned, to cut, especially in the programs, those that we have to deal with, where we are dealing into the future with projections.

So needless to say, in the first encounter with the Latta resolutions we went above and beyond, and for that we would expect perhaps not commendation, but at least some semblance of recognition.

Now, on this new Latta resolution, the gentleman is using figures provided by the Department of Agriculture ostensibly from OMB. We have to deal with figures by CBO, the Congressional Budget Office. We cannot deal with the assumptions or assumed savings or whatever of the OMB or the Department.

We have had that problem throughout. The Members should know that, for example, when we had the 4-year bill, our staff, our economists, CBO, we could not reconcile the figures with those of the Department of Agriculture.

Finally, one morning I took all our economists, I took members of the committee, and we went over to the Department of Agriculture. We sat down and we said, "Look, we are using 2 and 2 makes 4, and yours is not coming out that way. There is something wrong."

Well, lo and behold, we found out that they were doing 5-year expenditures on a 4-year bill; therefore, they were coming out with a cost above and beyond that which we were doing. And they admitted to us, "Well, OMB forces us to do our assumptions on a 5-year basis." My south Texas logic said, "Of course, my friend, it is only a 4-

year bill. How can you attach to it a cost for 5?"

"Well, that is what we are ordered to do by OMB."

So the same happens now. But OMB notwithstanding, we have to deal with figures by CBO.

The Senate has to deal with figures by CBO. We have to meet with the Senate in conference and we have to be speaking the same language. We have to be using the same computer, and we have to be discussing the same assumptions.

So I say it is even unfair of the gentleman, my distinguished colleague from Ohio, to confuse the issue using these figures from the Department of Agriculture because this is not the realm of the Department of Agriculture; this is the House of Representatives. We have to use CBO figures. The Senate uses CBO figures.

But above and beyond, even though we were to use the Department of Agriculture figures, we still come up with savings. We still come up to the numbers mandated by the Latta resolution. And for that, I think, with respect to all the other committees, I think that this committee, whichever figures we use, Department of Agriculture, Mr. Stockman's, Mr. Latta's, CBO, whichever figures we use I would challenge the Members that this committee has provided more savings than any of the other committees, with all due respect to the other committees.

Again I say, we have a very difficult constituency, both here in the House and out there in the country. That is one of the reasons for the rule which is modified closed, because it is difficult enough to cut, but if you were to air all of needs of all of the Members of all of the constituency, of all of the jealousies, justly or unjustly, of one commodity against another commodity, of the consumer, we have to deal with the art of the possible.

We cannot go to the expectation of every Member or every constituency out there in the country.

This is why, in a very difficult and painful way, we have been able to arrive at, and I would hope that the Members would take my word as sincerely as I can offer it that this is the best we can come up with, under the assumptions and with the figures used by the CBO.

The effort has been genuine, has been dedicated. There has been a lot of hard work by the different subcommittees and the subcommittee chairmen and ranking minority members to arrive at the point where we now find ourselves, and I would hope that you would support the rule and then support the legislation, because whichever way you test it, it still comes out savings above and beyond what we are instructed to be the Latta resolution.

Mr. LATTI. Mr. Speaker, I yield myself such time as I may consume.

Certainly I hate to differ with my dear friend from Texas on this issue. We must differ. I do not care where he gets his figures, whether it is CBO or wherever; we have to deal with the Department of Agriculture. They keep updating these figures. The figures that he is using are CBO figures from back in April.

But let us just look at some of the major—the major—discrepancies and ask ourselves how he comes out where he says he does.

The committee claims dairy savings of \$3.3 billion over 3 years for the proposed two-tier price support and production quota system, and it cannot be realized. The committee bill provides for a 21-percent increase in dairy price supports to \$16 per hundredweight by 1985, thereby encouraging continued overproduction and higher CCC purchase costs.

Where is he going to store all that cheese? We cannot get rid of it today. The USDA estimates maximum savings at \$1.4 billion over 3 years. The committee claims 3-year net savings of \$31 million for the feed grain, wheat, and other commodity price support and diversion payment increases. However, the bill mandates unrecoverable—unrecoverable—outlay increases of \$1.5 billion for diversion, deficiency, and grain storage payments. These are in his bill.

These spending increases now are supposed to cause budget savings later? By contrast, USDA estimates a net outlay increase of \$1.8 billion over commodity program cost levels assumed in the budget resolution.

The committee food stamp savings of \$1.326 billion are overestimated by \$252 million, resulting in actual savings of \$1.074 billion, or only 31 percent of the savings envisioned in the budget resolution.

In addition to drastic shortfalls and budget savings required by the budget resolution, the committee bill is inconsistent with major administration and congressionally supported objectives. It reduces the cost of the food stamp program by less than 3 percent over the next 3 years, which is not compatible with restraint needed on entitlement cost growth.

It creates—and get this, my friends from the farm—it creates a producer-controlled dairy board with monopoly powers to rig milk markets and inflate consumer costs by as much as \$1 billion annually. And we cannot amend it.

It raises wheat and feedgrain price supports, thereby increasing budget costs and undermining increased export sales at a time when we want to export more. That is all we hear back home: We have to export more. How are we going to do it if this bill becomes law?

Mr. DE LA GARZA. Mr. Speaker, will the gentleman yield?

Mr. LATTI. I will be happy to yield to my friend, the gentleman from Texas.

Mr. DE LA GARZA. Mr. Speaker, very respectfully, I just take the time to tell the gentleman of course he has the right to his assumptions. I say categorically they are wrong. But my problem is that the gentleman's problem is not with this committee; the gentleman's problem is with CBO. He should address that issue some other place and see if he and CBO and/or the Department cannot come up with the right figures.

We do the changes in the law, CBO puts the figures to them, and we do not manufacture them out of the sky. So I would hope and plead with my dear friend that he address the issue to CBO and let us get on with our business here.

Mr. LATTI. Mr. Speaker, let me, in answer to my friend, say there is more to it than just CBO. It is the content of the legislation. In this proposed legislation they are going to encourage a farmer to reduce his dairy herds.

I can remember F. D. R. killed off a bunch of little pigs to get rid of the pig overproduction. I do not know whether we are going to start slaughtering the dairy herds or not.

Mr. STENHOLM. Mr. Speaker, will the gentleman yield?

Mr. LATTI. I yield to the gentleman from Texas.

Mr. STENHOLM. I thank the gentleman for yielding.

Mr. Speaker, I have a great deal of respect for the gentleman from Ohio and his knowledge of the budget process, but I am a little concerned with the tenor of the debate and the argument that he has put forth, particularly as he now addresses the dairy program, because I believe that if the gentleman will examine the legislation that has been put together in the Agriculture Committee he will find that the concerns that he has, as far as the cost to the taxpayer of the dairy program, are indeed being met by the legislation; whereas, as I understand his concern, or the direction that he is suggesting that we should go, will in fact do what the gentleman is saying he does not want to happen which is to increase the cost of the dairy program to the taxpayer.

What we have attempted to do in the committee, and I believe we have accomplished, is to put a cap on what the taxpayer can effectively pay in the dairy program and, in fact, the gentleman will find, once he closely examines what this committee has done, is that we have addressed the cost to the taxpayer, and if we indeed do continue to produce more milk than we can consume, it will be the dairy farmer who

will assume this cost and not the taxpayer.

I believe that is what the gentleman and I both would like to see accomplished, not only in the dairy program but also in every other farm program that we have before us.

Mr. LATTA. I appreciate the gentleman's comments, even though I question whether we are going to have the savings that he hopes we will have, and I agree with him on the goal.

Mr. Speaker, we would like to save a lot of money, but I do not think this program, as seen by the experts, is going to come forth with the type of savings claimed.

Mr. STENHOLM. Mr. Speaker, will the gentleman yield further?

Mr. LATTA. I am happy to yield to the gentleman.

Mr. STENHOLM. The other experts—and I have listened to this debate for hours in the Agriculture Committee on the Dairy Subcommittee on which I serve—the other experts contend that if we lower the price of milk or we lower the price of wheat or we lower the price of cotton that we will somehow reduce the cost to the Treasury.

History has shown time and time again the farmer's response to a lowered price is to produce more in the short run in order to cover his fixed costs of operation. Therefore, the cost to the budget in fiscal year 1983 would be astronomical compared to the legislation we have before us.

Mr. LATTA. Mr. Speaker, I wish I could agree with my friend on that statement, but I cannot because we are going to be increasing, as I pointed out, by 21 percent the dairy price support, to \$16 a hundredweight, by 1985, and if that does not encourage overproduction, I am not standing here today.

Mr. GUNDERSON. Mr. Speaker, will the gentleman yield?

Mr. LATTA. Mr. Speaker, I am happy to yield 5 minutes to the gentleman from Wisconsin (Mr. GUNDERSON).

Mr. GUNDERSON. Mr. Speaker and Members, I think it is important that we continue the debate which we have just begun in terms of reconciliation and what it really means to the dairy price support program.

Mr. Speaker, I rise in opposition to the rule. The reason I do so is because of the underlying philosophy of the whole process of reconciliation—the process whereby we reconcile our authorized programs to live within the budget resolution that we passed.

When we come to the floor, we are supposed to be debating the various specifics that would accomplish this goal. The bill that we are going to consider today really makes major legislative changes to three areas under the jurisdiction of the Agriculture Com-

mittee in order to fulfill reconciliation instructions.

It clearly does it in food stamps. There is going to be a major debate on what we are going to do to the food stamp program.

It clearly does it in wheat and feedgrains—a major change from present law.

And clearly it does it in the dairy program as well.

It is interesting to note what has been happening on the floor of the House during the reconciliation process. We said we cannot have an omnibus reconciliation bill because, if we bring one to the floor, we will not have an opportunity to vote on the individual programs and policies we are trying to change. As such, we must bring separate reconciliation bills by committee. Now, we are not allowed to vote on the particulars of one of those bills under the rule that we have before us today.

My concern and my objection to the rule is that we are really allowing ourselves to get into only one debate today—a debate over food stamps.

□ 1145

If you look at the substitute and compare it with the committee bill, there is really only one area of difference, and we do not consider changes in the dairy and feedgrain areas. I think that is wrong. It is wrong to those people concerned about loan rates.

We do not get into the whole debate on dairy, and as the gentleman from Ohio, the ranking member of the Budget Committee, has so eloquently said, we are facing major, major problems in that dairy program at present and, unfortunately, we are going to face those problems in the future because there is no disincentive to overproduction in H.R. 6892.

To quote from the Department of Agriculture letter dated July 14 to the chairman of the full Committee:

USDA analysis indicates that the levels required in the bill on dairy would provide sufficient economic incentive to encourage excessive production and more than compensate for the resulting assessments.

For the last 18 months on the floor of this House I have maintained an "I told you so" attitude that what we are doing in dairy is only going to encourage further production. And that is exactly what has happened. The problem with the dairy provisions in the reconciliation bill is that any farmer who expands production over 25 percent in 1 year makes money by that expansion. So, clearly, the way to beat the system is to simply expand your production by 25 percent.

What does that do to us in 1985? It gives us a huge, huge surplus of dairy production and, in the process, we will be so undercut by prices that we will have effectively changed the structure

of dairy agriculture in this country. The gentleman from Minnesota, Mr. OBERSTAR, and I wanted the Rules Committee to provide us an opportunity to come in here and debate the dairy section of H.R. 6892 through an amendment that would have given us a genuine alternative. First of all, it would have saved more money—\$222 million in fiscal year 1983—in outlays on the dairy price support program; second, it would have more quickly and effectively solved the surplus situation; and third, it would have accomplished these goals in a way that would have solved the current surplus problem in the best interests of the family dairy structure that we have in this country.

Unfortunately, the rule before us does not allow any of that. It does allow one amendment to the dairy section, thus acknowledging some of the problems with the National Milk Producer proposal. It allows the chairman of the Foreign Affairs Committee to come in and provide an amendment to deal with some of the administrative foreign policy problems created by H.R. 6892.

In fact, there is a great deal of concern all over the spectrum. My colleague from Massachusetts, Mr. FRANK, also appeared before the Rules Committee. He wanted to offer an amendment on dairy as well. While I am very opposed to his amendment, he probably should have had the opportunity to offer it as, I believe, the rest of us should have had so that the various solutions to the dairy problem could have been fully debated.

Unfortunately, what we are doing today is embarking upon a road that leaves the conference committee with the Senate on two choices: Either a cut or a freeze in dairy price supports. As my colleague from Texas, Mr. STENHOLM, so astutely said, the inevitable result of either choice will be an increase in production and, either after the election of later next year, we will be back here again debating the dairy program in this Congress for the third year in a row.

Those Members who are interested in preserving some form of that program and preserving some form of the family farm structure of dairy agriculture in this country ought to be very concerned about what that does. For those reasons, then, I ask the Members to oppose this rule, because it plays games with the legislative process of reconciliation and, more importantly, because it plays games with the structure of dairy agriculture and the family dairy farms in this country.

The SPEAKER pro tempore (Mr. KAZEN). The time of the gentleman has expired.

Mr. FROST. Mr. Speaker, I yield 3 minutes, for debate only, to the gentleman from California (Mr. PANETTA).

Mr. PANETTA. Mr. Speaker, this is the final package on reconciliation savings that will come before the House. To summarize, we have done five packages. The first was the Veterans package, which was passed unanimously under suspension of the rules by the House. The Ways and Means Committee and Energy and Commerce are already in conference with the Finance Committee on issues related to both taxes and cuts in that area. The Post Office and Civil Service Committee came before this House under exactly the same rule as the Agriculture Committee is coming before this House. That too is now headed to conference. The Banking and Currency Committee came up last week with exactly the same rule as we have for the Agriculture Committee. That has passed the House and is ready for conference.

Now, we have the last package, which is Agriculture, which is being presented to the Members with exactly the same rule as the other packages were, allowing one substitute by the minority. Following that approach, CBO has told us that this committee has exceeded its savings' target. We do follow CBO as our primary guide, although obviously there are differences whether we use OMB or whether we use a department downtown, but the reality is that CBO is our primary guide. All of the committees were instructed to come up with \$27.1 billion in 3 years in savings.

All of the committees have come up with \$29.3 billion in savings, or an excess in savings of \$2.1 billion. So, the committees have met their targets, and indeed exceeded their targets.

With regard to the Agriculture Committee, they come before us with what I think is a balanced approach involving savings in food stamps, savings in the dairy program and savings in crop diversion. We have argued for years about the need to finally cap the dairy program. Somehow the issue has been missed that we are not really achieving savings in dairy. This is a major reform. It assures \$3.2 billion in savings over the next three years.

The same thing is true for the crop diversion program, which picks up almost \$50 million.

One substitute is permitted the minority. They have not touched the dairy program. Regardless of the arguments of the gentleman from Ohio, they are not even going at the dairy program. They are not even going at the crop diversion program. They are going at one program, which is food stamps, and the House will have the opportunity to decide whether additional cuts will be made there. But, let me make clear that the minority has not sought out any changes with regard to the dairy program or crop diversion. So if we are interested in trying to proceed to get the spending

cuts in place, the best thing to do is to support this rule, and let us proceed to conference.

Mr. FROST. Mr. Speaker, I yield 5 minutes, for debate only, to the distinguished gentleman from Iowa (Mr. SMITH).

Mr. SMITH of Iowa. Mr. Speaker, what I have to say does not just apply to this bill. It applies to the whole reconciliation process when combined with the closed rules. But, this bill is a good example of the problem.

Under this reconciliation process Members will remember that a year ago the House passed a reconciliation bill written in the executive branch about as thick as the Bible, and we are still finding out what was in it. This year the House is passing five separate bills, and this is one of them, but each one combines amendments to several programs into one bill. It is an omnibus reconciliation bill for everything that comes under the jurisdiction of the Agriculture Committee.

The Agriculture Committee has vast jurisdiction, applying clear across the board, all the way from food stamps, dairy, consumer programs, nutrition programs, a vast number of programs, and tucked away in these bills are things that do not involve savings. And, the proposed rule prohibits amendments, including those that do not have anything to do with savings or additional expenditures.

It is a bad process. It is sure to result in laws which will embarrass this House. We are going to discover provisions in these bills as the months go by that no one knew was in these bills when they passed. It is the wording that is important. If some of these provisions came on the floor by themselves, they would not pass and would be subject to amendment at that point which would correct them.

One thing they have tucked away in this bill, for example, involves the feed grains program. We hear all this talk about food stamps and dairy, but they also have a diversion program in here for feed grains that is very discriminatory against feed grains compared to wheat. The feed grains diversion is based on a dollar and a half a bushel on one-half of the acres idled of corn, and relatively on other feed grains; but is based on \$3 for wheat. It figures out this way: Fragile lands diverting wheat acreage will get \$55 an acre for diverting those fragile land productivity acres and \$75 to pay for the cost of carrying productive farm land with four times the value. The diversion program pays for the cost of carrying the idle land. There is no production involved. It does not involve costs of production because there is not going to be grain or wheat produced on this land. It is to cover the cost of carrying the land. It is very discriminatory, \$55 an acre for fragile land and \$75 for the good lands which cost 4 or 5 times as

much and pays 10 times as much in taxes. Those rates will divert wheat acres which are not very productive and contribute little to adjusting production but will not secure diversion of productive corn land and better grain land which would contribute to an adjustment.

The fact of the matter is, it is not even good for those who think it is good. What happened about 4 years ago, and one reason wheat got into this problem, was that they secured a very, very favorable loan rate compared to feed grains, so what happened was that there was a big bulge in acreage in the double crop high yielding area to wheat, wheat followed with beans or wheat followed with sunflowers or something else. They got into trouble because they penalized corn and not giving it a program comparable to what they had for wheat, so it hurt wheat in the end. The people supposedly helping wheat were their own worst enemies because they opposed a corn and milo program at a comparable level. They seem to be preoccupied with the discriminating against feed grains compared to wheat when actually it is necessary to look at both on an equal basis. That kind of substantive change in treatment of grains and discrimination against corn is tucked away in this bill.

My real objection, then, is to the fact that this rule prohibits even amendments that do not have anything to do with alleged savings under the guise of making alleged savings, and they are very doubtful. The committee proposed an omnibus bill amending many kinds of programs, and we will find out several months from now there were some provisions in the bill which were obscured. I just think it is a bad process and we should change the whole process.

Mr. THOMAS. Mr. Speaker, will the gentleman yield?

Mr. SMITH of Iowa. I yield.

Mr. THOMAS. Mr. Speaker, I think the gentleman is absolutely correct. He did not mention the rice program, but to give the Members an idea of what was also tucked away in the omnibus reconciliation for agriculture is the paid diversion program for rice, which even by CBO figures costs the taxpayer money. It does not save—it costs.

Mr. SMITH of Iowa. Well, I am not an expert on the rice program, but I think the rule should provide an opportunity at least to make amendments that do not result in additional expenditures.

Mr. LATTI. Mr. Speaker, I yield 2 minutes to the gentleman from Wisconsin (Mr. ROTH).

Mr. ROTH. Mr. Speaker, I rise in opposition to the rule on this agriculture reconciliation bill. I believe that the House must have an opportunity to

consider specifics, and not be forced to swallow this legislation whole.

Nevertheless, I do believe this legislation has merit, and I particularly applaud the committee's changes in the dairy price support program. I believe a two-tier approach rightly puts the burden of controlling production on the industry.

However, I am concerned that the committee missed a great opportunity to deal effectively once and for all, with the negative effects that imports of artificial milk protein products has on the dairy industry and on the dairy program.

Quite simply, it makes no sense to penalize farmers for overproduction at the same time that we allow unlimited amounts of foreign dairy products, real and artificial, into this country. It is not enough to freeze the effects of increased dairy imports on farmer's incomes; we must cut imports of artificial dairy products in order to release Government-held stocks of nonfat dry milk accumulated at taxpayer expense because of shortsighted trade policy. Plainly, it is time to put America first.

Further, I believe that the committee did not achieve meaningful savings in the food stamp program. The cost of the food stamp program has skyrocketed and it has been estimated that over \$1 billion annually is lost in the food stamp program to fraud, waste, and abuse. Increasing unemployment has put even greater financial strains on the program. I believe that the committee missed an opportunity to achieve significant savings in the program while protecting benefits for the needy by not removing the voluntarily unemployed from eligibility for food stamps, thus placing it in the same eligibility area as unemployment benefits—reserved for those who lose their jobs involuntarily.

Fairness to farmers should extend to fairness for taxpayers in every agricultural program.

Fairness means cutting back on dairy imports into this country. Fairness means reducing the costs of the food stamp program to the beleaguered taxpayer.

Mr. FROST. Mr. Speaker, I have no further requests for time, and I move the previous question on the resolution.

The previous question was ordered.

The SPEAKER pro tempore. The question is on the resolution.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. WALKER. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 230, nays 156, not voting 48, as follows:

Messrs. BENEDICT, GRAMM, WORTLEY, FISH, and SMITH of New Jersey changed their votes from "yea" to "nay."

Mr. EMERSON and Mrs. COLLINS of Illinois changed their votes from "nay" to "yea."

So the resolution was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

Mr. DE LA GARZA. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 8892) to Provide changes in legislation to meet reconciliation requirements of the first congressional budget resolution—fiscal year 1983—for the House Committee on Agriculture.

The SPEAKER pro tempore. The question is on the motion offered by

the gentleman from Texas (Mr. DE LA GARZA).

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. WAXMAN. Mr. Speaker, on that, I demand the yeas and nays.

The yeas and nays were ordered.

The vote was taken by electronic device, and there were—yeas 362, nays 9, not voting 63, as follows:

So the motion was agreed to.

The result of the vote was announced as above recorded.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill, H.R. 6892, with Mr. GRAY in the chair.

The Clerk read the title of the bill.

The CHAIRMAN. Pursuant to the rule, the first reading of the bill is dispensed with.

Under the rule, the gentleman from Texas (Mr. DE LA GARZA) will be recognized for 30 minutes, and the gentle-

man from Virginia (Mr. WAMPLER) will be recognized for 30 minutes.

The Chair recognizes the gentleman from Texas (Mr. DE LA GARZA).

Mr. DE LA GARZA. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I rise in support of the bill, H.R. 6892.

The bill provides changes in legislation to meet reconciliation requirements imposed on the Committee on Agriculture by the first concurrent budget resolution for fiscal year 1983.

GENERAL

The actions taken by the committee exceed by \$1.3 billion the goals prescribed by the reconciliation instructions of the budget resolution. Under section 2(c)(1) the Committee on Agriculture was asked to report changes in laws under the jurisdiction of the committee that would reduce spending by \$779 million in fiscal year 1983, \$1.083 billion in fiscal year 1984 and \$1.428 billion in fiscal year 1985. H.R. 6892, instead, would yield savings of \$1.276 billion in fiscal year 1983, \$1.724 billion in fiscal year 1984, and \$1.596 billion in fiscal year 1985.

These net savings were achieved by amendments to the commodity programs and by amendments to the Food Stamp Act. The amendments to the commodity programs would result in savings of a total of \$3.270 billion over the 3 years, and the amendments to the food stamp program will yield savings totaling \$1.326 billion over the 3 years.

The amendments to the commodity programs are designed to achieve supply adjustment by alleviating surpluses which, in the case of the dairy program, have resulted in excessive Government costs and, in the case of other farm commodities, have depressed farm prices and contributed to a decline in real farm income which is at its lowest level since the Great Depression.

Mr. Chairman, I think the committee has done an exceedingly good job, not only in complying with the requirements imposed on us by the Budget Committee and by the House, but by affording the House and eventually the taxpayers of this country far more savings than we were requested to do. This was done because of our interest in helping the largest number of people with the smallest number of dollars; and when we make reductions, we seek to cut the largest amount of dollars in a way that would affect the least number of people. That is within the art of the possible, and that is what we have to deal with in the legislative process.

I know there are many Members who are not satisfied with this legislation. That is only proper and expected in a body such as this. You could see by the vote on the rule that many

Members, a large number, were unhappy that we would have a modified closed rule; and that, of course, is their prerogative. And some of them may be correct in their concern. But in order to have the necessary flexibility to make cuts, very difficult and painful cuts, in programs that are so dear and near to the hearts of so many of our Members, we had to have that type of rule. Otherwise, we could not come here and open up the entire bill to amendment, because many of those—and I say this and I hope that my colleagues would listen—who are dissatisfied with our product are dissatisfied because we cut too much, because their program is not given more assistance since that would have added to the cost. I say to those Members that they have the right to disagree, but it would be very difficult if we were to come here, under the guise of working on a budget resolution in reconciliation, to try and reduce savings if we were to have a run, if you would call it that, on the budget, by adding more expensive programs.

I know that in one of the areas, in dairy, one of our dear colleagues, of course, is very dissatisfied. But his resolution would cost exceedingly more than what we have come with.

So, again, I would hope that the Members of the House would support our effort, the very sincere and dedicated effort of this committee, of all its Members, and the subcommittee chairmen, that what we have done is: First, within the art of the possible; and second, that it was not easy but it was very, very difficult to cut anything. To reduce anything in this Government is very difficult. We have gone above that.

Now, Mr. Chairman, later on I might have some further comments as to where we are in the economy, the farm economy, and why the need for this legislation. But, for the time being, I will just say that I would hope that all of the Members of the House would support our effort in this legislation, which was done with the very, very difficult task of reducing expenditures, but it was done, I think, in an exceedingly good manner by the members of the Agriculture Committee.

The committee would also point out that it recently reported out a bill, which has since been enacted into law, to insure that the tobacco price support program will be carried out at no expense to the taxpayers. The Congressional Budget Office estimated that this legislation will result in savings totaling \$44 million over the next 5 fiscal years.

The amendments to the Food Stamp Act achieve significant cost savings through measures believed by the committee to represent the least harmful alternatives with respect to needy households dependent upon the program. In this regard, the commit-

tee would emphasize that as a result of legislation adopted in 1981 savings were made in the food stamp program which totaled in excess of \$6 billion for the 3 fiscal years affected. While the committee was compelled to make further food stamp cuts so as to contribute to achieving the directive that it make cost savings in programs within its jurisdiction, any deeper cuts in the program would impact heavily on the ability of low-income Americans to secure an adequate diet.

DAIRY

Title I of H.R. 6892 amends section 201 of the Agricultural Act of 1949, as amended by the Agricultural and Food Act of 1981, to establish a two-tier dairy price support program to be implemented by a National Dairy Board.

The Agricultural Act of 1949, as originally enacted, required the support of milk prices at such level between 75 and 90 percent of parity as is necessary to assure an adequate supply. Until recently the dairy price support program has functioned effectively to assure an adequate supply of dairy products at a reasonable cost, bringing stability to an industry which is subject to annual swings in both production and consumer demand.

The Food and Agriculture Act of 1977 raised the minimum support level from 75 to 80 percent of parity through March 31, 1979, and required that the support price be adjusted semiannually. Congress, in 1979, extended the 80 percent of parity minimum support level through September 30, 1981.

Unfortunately, due to a variety of factors, the purchase of surplus stocks by the Commodity Credit Corporation has grown to record proportions since that time.

The committee is deeply concerned about this unprecedented surplus milk production and has acted on three occasions in the last 18 months to rescind scheduled increases in the support level. In the most recent action, the Agriculture and Food Act of 1981 continued through fiscal year 1982 the \$13.10 per hundredweight support level, which had been in effect in 1981. This level of support was equivalent to 72.5 percent of parity on October 1, 1981—the first time in the history of the program that the support level has been set below 75 percent of parity at the beginning of the marketing year.

These actions have not been successful in reducing milk production. For a variety of reasons, milk production continues to expand, although at a decreasing rate.

Foremost amongst these reasons for continued expansion is the decline in grain prices experienced last year. Record feed grain production in 1981 depressed grain prices severely. Because grain is the principal cost item in milk production, dairy farmers

found it economical to increase feeding rates, increasing milk production per cow. Also some farmers entered dairy farming because of the limited or nonexistent income opportunities in the other sectors of agriculture.

Other reasons for the increase in surplus milk production have been the stagnant demand for dairy products caused by the recession, stagnant beef prices which have discouraged the marketing of older, inefficient milk cows, and the expansion of herds caused by setting the support level at 80 percent of parity during the period 1977-80.

Faced with at least another year of record milk production and expenditures for the dairy program, the committee has developed this legislation which will completely restructure the program and create a strong and immediate incentive to reduce production.

The principal feature of title I of H.R. 6892 is to create a two-tier dairy price support program for the 3 fiscal years beginning October 1, 1982.

For that portion of the national milk supply required to meet domestic needs, the support level of \$13.10 per hundredweight, which had been in effect for 2 years, would continue through fiscal year 1983. For the next 2 fiscal years, the level of support would be adjusted to reflect the percentage of parity that the Secretary determines \$13.10 represented on October 1, 1982. This is now estimated to be approximately 68 percent of parity.

For that portion of the national milk supply determined to be in excess of domestic needs, a uniform deduction to the basic support level would be applied. The rate of reduction would be calculated in a manner so as to cover the net cost of acquiring, managing, and disposing of all surplus milk in excess of 5 billion pounds annually, as well as making incentive refunds to producers.

The funds represented by this deduction will be collected and remitted to the CCC by the first handler of the milk. Through this system, producers will finance their portion of the cost of the price support program.

One of the major criticisms of the current dairy price support program is the absence of any upward limit on dairy purchases by the CCC. Limiting CCC responsibility to 5 billion pounds milk equivalent will achieve an immediate and substantial reduction in the dairy program. By comparison, the CCC will acquire an estimated 13.3 billion pounds milk equivalent of dairy products in fiscal year 1982. Enactment of this legislation will achieve savings in excess of \$1.3 billion in fiscal year 1983 according to CBO estimates.

To provide further incentive to reduce production, incentive refunds

would be made to producers who can demonstrate a reduction in production from that of the previous year. The committee believes this mechanism will provide a strong incentive for producers to immediately reduce production.

The bill also creates a National Dairy Board appointed by the President from nominations recommended by producer organizations. It is assigned major responsibilities for administering the program.

The committee also addressed the subject of dairy product promotion. H.R. 6892 provides for a coordinated national promotional effort financed by milk producers.

If the program is approved in a national referendum by a majority of milk producers who vote, there would be a 5 cents per hundredweight nonrefundable assessment on all milk marketed to be used for the purpose of general advertising and promotion of dairy products. The promotional activities would be limited to processed dairy products for the first 2 years of the program. The program would expire at the end of 5 years unless approved by another referendum.

The program would be operated at no cost to the Government and by promoting consumption of dairy products, it should contribute to a reduction of the surplus and the cost of the price support program.

Another dairy issue addressed by the committee deals with the donation of surplus dairy commodities domestically and abroad. Subtitle C of title I (section 130) expands the authority of the CCC to donate surplus dairy commodities to needy households in the United States, including households participating in the food stamp program which are ineligible to receive such products under current law. It also provides expanded authority for donation of surplus dairy products to needy persons outside the United States. On this issue Chairman ZABLOCKI plans to offer an amendment which would require coordination of this program with existing donation programs under title II, Public Law 480. There is much merit to his proposed amendment.

WHEAT, FEED GRAINS, UPLAND COTTON, AND RICE

Title II provides emergency legislation to help strengthen the sagging farm economy by offering producers of wheat, feed grains, upland cotton, and rice an effective surplus reduction program for the 1983 crop of these commodities.

The bill proposes a practical and effective solution to an urgent problem currently facing producers of these commodities. Real farm income in the United States now is at its lowest level since the Great Depression in the 1930's. This is the result of recent worldwide bumper harvests, coupled with high interest rates, a worldwide

recession, and the strength of the dollar abroad—making it more expensive for foreign buyers to buy our farm commodities. The situation is particularly grave for the U.S. grain and rice industry.

A substantial reduction in stocks of these commodities is necessary if we are to see any improvement in prices. Grain and rice prices are particularly depressed at the present time. The July farm price for wheat was \$3.29 per bushel compared with the July 1981 price of \$3.62 per bushel and the seasonal average price in 1980 of \$3.65. Similarly, the July corn price was \$2.54 per bushel contrasted with the July 1981 price of \$3.14 per bushel. The July farm rough rice price was \$8.16 per hundredweight compared with the July 1981 price of \$12.80 per hundredweight and a seasonal average price in 1980 of \$12.80 per hundredweight.

It is the view of the committee that the program announced by the administration for 1983 crop wheat or any other similar program patterned after the 1982 program would once again be ineffective in actually reducing supplies. The committee believes that in addition to program benefits, a paid diversion is needed to provide the incentive necessary to gain farmer participation. Without the paid diversion included in this bill, participation would likely be too low and stocks would continue to build. On the other hand, the reduction program approved by the committee, with a portion in the form of a paid diversion, would increase compliance, effectively reduce production, restore better balance between supply and demand, and afford farmers a better chance for adequate returns.

Further, the committee is of the opinion that a paid diversion program is in the best interest of soil conservation. Nobody including producers wants to waste this Nation's resources producing crops that presently are not needed. Unless an effective supply management program such as the committee recommends is initiated, we can only look forward to larger Government outlays in addition to having to witness the depletion of one of this Nation's most valuable resources—our croplands.

To this end, H.R. 6892 provides the following for wheat, feed grains, and rice.

For wheat, there would be an acreage reduction program consisting of a reduction of 25 percent of the wheat acreage base, 10 percent to be made under a paid diversion program which would qualify the producer for a diversion payment of \$3 per bushel on the yield for the diversion program acreage.

For feed grains, the program would be required if the 1982 corn crop exceeds 7.3 billion bushels in which

event a reduction of 20 percent of the 1983 crop feed grain acreage base would be required, 10 percent to be made under a paid diversion program, the payment to be \$1.50 per bushel.

For rice, a program would be required if the 1982 rice crop exceeds 145 million hundredweight, the reduction to consist of a total of 20 percent of the 1983 crop rice acreage base, 10 percent to be made under a paid diversion program which would qualify the producer for a \$3 per hundredweight payment.

In addition, H.R. 6892 establishes a minimum loan rate for the 1983 crop of wheat of \$3.80 per bushel and for the 1983 crop of corn of \$2.61 per bushel. This would increase the loan rate by the same amount as the increase in the target price for these commodities mandated by the Agriculture and Food Act of 1981. This assures that the exposure for deficiency payments for the 1982 crop would not be increased in 1983.

Another provision contained in this bill would require an effective supply-management program for cotton producers for the 1983 crop in the event the Secretary of Agriculture determines that a supply-reduction program is necessary.

During the past year, cotton producers were severely affected by the same disastrous economic conditions that adversely impacted producers of other major commodities.

By June of this year, cotton prices had fallen nearly 25 percent from the year before. It was becoming clear that the acreage reduction program announced by the Department would reduce stocks by no more than 300,000 bales by August 1983.

During the month of June, a series of weather patterns developed in west Texas which produced a host of extraordinarily devastating storms causing a loss of the equivalent of 26 percent of the acres planted throughout the United States. As a result, only about 10 million bales are expected to be harvested in the United States from this year's crop, and stock projections for August 1983 have now been revised downward from 6.1 to 4.4 million bales. Were it not for this calamity, there would be little doubt that cotton producers would be facing an indefinite yet prolonged period of large surpluses coupled with prices far below cost of production.

Still, there is a great deal of uncertainty surrounding the exact extent of the Texas disaster, which cannot be accurately determined for some months. In addition, the export outlook continues to sag, with 1982-83 projections now revised downward from 7.3 to 6.7 million bales. Domestic use for next year is also expected to be lower than earlier projections. Thus, in the absence of marked improvement

in economic conditions, cotton markets in the United States and abroad could become increasingly sluggish. Because of these factors, many farmers and farm organizations have expressed concern that surplus conditions could soon return, with the same adverse conditions of the past year.

The committee recognizes these uncertainties facing the cotton industry, and therefore is leaving the initial determination of the need for a reduction up to the Secretary of Agriculture. The Secretary is in a position to monitor the situation carefully both here and abroad during the coming months and assess the need for a reduction program.

In the event that he determines a need for such a reduction, this legislation will provide the tools for a more effective program. H.R. 6892 provides that if the Secretary should establish an acreage reduction program under current law, 25 percent of the reduction would be required under a paid diversion program which would qualify producers for a payment of 25 cents per pound on the yield for the diversion program acreage.

In the view of the committee that incentive of a paid diversion is necessary to encourage participation in any supply adjustment program that may be announced by the Secretary.

FOOD STAMPS

The bill would continue the food stamp program for 3 more years—through September 30, 1985—with authorization for funding for fiscal year 1983 at \$12.648 billion, for fiscal year 1984 at \$12.908 billion and for fiscal year 1985 at \$13.651 billion. The spending caps are those proposed by Mr. COLEMAN, ranking minority member of the Subcommittee on Domestic Marketing, Consumer Relations, and Nutrition. They are based upon the following Congressional Budget Office estimates for unemployment and food price inflation:

[By fiscal years, in percent]

	1983	1984	1985
Unemployment	8.6	7.7	7.3
Food price inflation	6.1	6.8	6.9

In conformity with the reconciliation process, the committee has utilized the current CBO estimates for program expenditures; on the basis of those estimates, the appropriation levels authorized appear sufficient to maintain benefits for those Americans without resources to purchase an adequate diet. If, however, the rate of inflation or the rate of unemployment should exceed the rates assumed in the CBO cost estimates, it is apparent that the authorized funding levels established in the bill may not be adequate to meet program needs.

The bill reduces the cost of the food stamp program over 3 years by an estimated \$1.3 billion, based on economic assumptions used in the first concurrent budget resolution.

The committee achieved cost savings by various changes in the program. The committee agreed to:

Require rounding down to the lowest dollar increment any computations of, respectively, the thrifty food plan, standard and excess shelter deductions and value of allotments. As is current practice, the unrounded number will continue to be used as the basis for updating the deductions the following year. (Savings of \$68 million for fiscal year 1983, \$93 million for fiscal year 1984, and \$93 million for fiscal year 1985).

Delay the next scheduled adjustment of the standard shelter and dependent care deductions from July 1 to October 1, 1983 and update the deductions every October 1 thereafter. This would coordinate the update of these deductions with the timing of the update in the thrifty food plan. Current law provides that the standard and the shelter/dependent care deductions will be adjusted on July 1, 1983; therefore, under the amendment, the adjustments to both deductions and to the thrifty food plan will take place on the same dates, reducing the work required by State food stamp administrators. (Savings of \$42 million for fiscal year 1983, and no savings for the following fiscal years.)

Eliminate any allotment for the initial month or period of participation for a household if the value of the allotment it otherwise would receive is less than \$10 because of proration of the initial month's benefits. In subsequent months, the household would receive the full allotment which it was due. (Savings of \$15 million for each of fiscal years 1983, 1984, and 1985.)

The committee amendment requires that expedited food stamp service be made available to destitute migrant households in accordance with regulations in effect on July 1, 1982, and to other households having no net income. The committee continues to feel that the special circumstances of migrant and seasonal farmworkers warrant continued protection for expedited service eligibility. Because of the seasonal nature of their work which involves movement from area to area, migrants in most instances arrive at a new worksite without sufficient funds to feed themselves until payment is received from a new employer. Households in such situations currently qualify for expedited service under USDA regulations as destitute households.

To insure continued protection for migrant and seasonal farmworker households under the destitute provisions, the committee wrote into law the safeguards now contained only in

USDA regulations, which include a requirement that stamps be made available in 2 or 3 days after application. The committee wishes to make clear that the current regulations regarding expedited service eligibility and benefit levels for destitute households must remain intact for migrant and seasonal farmworker households.

The committee rejected an amendment to impose what it considered undue restrictions upon expedited service for households which face real hunger emergencies. Witnesses from the General Accounting Office testified before the committee in hearings in March that quality control data for 20 States showed that errors for expedited cases were generally lower than those for the overall caseload. During this time of exceptionally high unemployment, to deny households who experience temporary destitution speedy access to food assistance would be cruel and unreasonable. The administration reported that in New Jersey 60 percent of the households that were given expedited services treatment during a temporary emergency did not require food stamps on a long-term basis.

In connection with expedited service, the report of the committee on H.R. 6892 addresses other concerns—that there be no gap in benefits for those providing prompt verification of need, and that a State's issuance cycle not result in a migrant household being deprived of benefits in the second month of eligibility. I would emphasize a view shared by both the majority and minority sides of our committee—that the comments in the committee report on these issues are applicable whether the committee bill or the substitute is adopted by the House.

The committee also refused to delay adjustments in the thrifty food plan which would further erode the purchasing power of recipients. Because of legislation enacted last year, the July benefit allotments are based on food prices that are 22 months out of date, which corresponds to a 10- to 15-percent loss in food purchasing power. Many of the witnesses at this year's food stamp hearings testified that the current delay in thrifty food plan adjustments may be a contributing factor to the increased use of food banks and soup kitchens by low-income persons around the country. At the hearings, witnesses estimated that an average food stamp family lost \$4 a week in food buying power—an amount which represents three meals a day for each family member for 2 days each month—with the 1981 freeze on adjustments, and, if the family lived in a State with a sales tax on food, they lost almost \$3 more. If food stamp adjustments were delayed again this year, food stamp families

would lose another \$5 a week in food-buying ability.

USDA's last National Household Food Consumption Survey, conducted in the late 1970's, found that five-sixths of all households whose food expenditures equaled the cost of the thrifty food plan failed to obtain the recommended daily allowances for the basic nutrients. Today, the average food stamp benefit equals but 43 cents per person per meal, and the maximum benefit (to families with no other income for food purchases) totals 64 cents per person per meal.

The committee recognizes that to effectively serve the needs of the poor, a substantial effort must be made to deny program benefits to those who are not entitled to them. Accordingly, the committee adopted several measures which reflect the suggestions made by State program administrators, officials from the General Accounting Office, and the Department's Inspector General to achieve this objective.

The committee bill includes the following antifraud and abuse provisions, some of which also result in program savings:

First, job search: Establishes an option for States to apply job search requirements at the time households apply for participation in the program. (Savings of \$5 million for fiscal year 1983, \$6 million for fiscal year 1984, and \$7 million for fiscal year 1985.) The committee rejected a job search amendment which would have authorized the Secretary to require job search by applicants. This action was taken primarily in recognition of the fact that imposing this requirement would be an exercise in futility in States where the unemployment rate is extraordinarily high.

Second, voluntarily quitting a job: Lengthens the voluntary quit disqualification period from 60 to 90 days, making this penalty compatible with the AFDC disqualification period.

Third, reimbursement for workfare administrative expenses: Directs the Secretary to use one-half of the savings resulting from the employment of food stamp recipients who had been participating in workfare programs to defray additional Federal contributions to agency costs of operating such programs.

Fourth, household definition: Requires siblings who live together to be treated as one household unless one sibling is elderly, blind, or disabled and permits certain elderly, disabled persons who live with others but who do not purchase food and prepare meals to be considered a separate household. (Net savings of \$38 million in fiscal year 1983, \$40 million in fiscal year 1984, and \$42 million in fiscal year 1985.)

Fifth, standard utility allowance: Prohibits the use of standard utility

allowances for households, such as those in public housing, that are not billed for heating or cooling costs. (Savings of \$90 million in fiscal year 1983, \$93 million in fiscal year 1984, and \$97 million for fiscal year 1985.)

Sixth, alternative issuance systems: Authorizes the Secretary to require that State agencies develop alternative issuance systems or to issue a reusable document in lieu of coupons if the Secretary, in consultation with the Inspector General, determines that use of such systems or documents is necessary to protect the integrity of the food stamp program and reduce losses to the program.

The overissuance of allotments caused by recipients or administrative staff error results in unnecessary costs to the food stamp program. The committee, in an effort to reduce the amount of overissued benefits, has approved several measures to improve the administration of the program, while at the same time, applying strong sanctions on the States. To ease the State's administrative burden and reduce costs, these measures, among others, were adopted:

First, prompt reduction: Authorizes State agencies to immediately reduce or terminate a household's benefits if the agency receives clear, written information that such a benefit reduction or termination is required. (Savings of \$10 million for each of fiscal years 1983, 1984, and 1985.)

Second, error rate reduction system: Sets specific targets for error reduction by State agencies for fiscal years 1983-85 and thereafter and imposes sanctions for States failing to meet the targets. (Savings of \$90 million for fiscal year 1983, \$200 million for fiscal year 1984, and \$325 million for fiscal year 1985.)

H.R. 6892, as reported by the Agriculture Committee, contains the same error rate sanction provisions as those introduced earlier this year by Senators DOLE, COCHRAN, ANDREWS, JEPSEN, and BOSCHWITZ, and passed by the Senate. The committee rejected an error rate reduction provision which would have draconian effects on the States.

Both the committee bill and the rejected amendment would require States to lower error rates to 5 percent by fiscal year 1985 or face financial penalties. Both save considerable amounts of money, and result in identical savings in fiscal year 1983. There are, however, important differences between the two approaches. Because of these differences, the National Governors Association and the Council of State Public Welfare Administrators both opposed the approach contained in the amendment when it was offered in the Agriculture Committee, and stated a strong preference for the committee provisions.

H.R. 6892 sanctions States that fail to meet their error rate targets by reducing the Federal share of their administrative costs by 5 percent for each of the first 3 percentage points that the error rate exceeds the target, and by 10 percent for each additional point that their error rate exceeds the target. In other words, if a State's target is 5 percent but its actual error rate is 8 percent, it would lose 15 percent of the Federal share of its administrative costs. If its error rate were 10 percent it would lose 35 percent of the Federal share of its administrative costs. But a State making significant reductions in its error rate (by reaching one-third of the 5-percent target during 1983, for example) would not suffer financial sanctions.

The amendment, by contrast, would have penalized a State a full dollar for every dollar in benefits overissued over the State's error rate target. This could result in huge and unrealistic sanctions that in some cases could exceed 100 percent of the Federal share of a State's administrative costs. The sanctions in the amendment were so large that they would likely have been counterproductive. They would have reduced State funds to the extent that a State could well have insufficient resources to invest in new technology and other systems needed to reduce errors in future years.

In conclusion, Mr. Chairman, I believe that the committee has acted responsibly in not only meeting but exceeding the goals prescribed in the budget resolution. I would urge the Members to join me in support of this bill.

Mr. WAMPLER. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, the budget process is, I believe, coming apart at the seams. It is not working as it should and certainly not as I and many of the Members, I am sure, intended when it became law in 1974. The confusing maze of figures that come out of the Congressional Budget Office, the Office of Management and Budget, and others, tend to confuse Members themselves, and it must totally confuse the taxpayers and the public in general who are only observers in this budget process.

Mr. Chairman, I mentioned in my appearance before the Rules Committee that the credibility of cost estimates for bills such as this is taxed when the Congressional Budget Office estimates that there will be no cost attached to the feed grains provisions of the agriculture reconciliation bill because, and I repeat because, CBO states that the 1982 corn crop will be 7.2 billion bushels. No other authority claims such a low figure, yet diversion payments under title II of the bill are

not triggered unless there is a crop estimate of over 7.3 billion bushels.

□ 1245

Currently, most authorities estimate the corn crop at about 7.6 billion bushels. Now, this is frustrating indeed to adopt provisions based on statistics that we are relatively sure are wrong.

What has been said is true about the fact that this bill does substantively change farm commodity programs, the dairy program, and the food stamp program. Yet it is difficult to amend the provisions selectively.

Yes, it is true that there is only one "substitute" authorized by the rule. I would have preferred, as I stated in the Rules Committee, if we could have been given a more "open" rule for H.R. 6892. I asked for such a rule, but recognizing the practicalities of the situation, I asked for a minimum of a minority substitute.

Meanwhile, the chairman of the Budget Committee, the gentleman from Oklahoma (Mr. JONES) appeared before the Rules Committee and stated that the "savings" directed by the first concurrent budget resolution instructions had been met by the provisions of H.R. 6892. The Congressional Budget Office stated that, through a combination of dairy, commodity, and food stamp provisions, the reconciliation goals had apparently been met.

Now, given those facts, Mr. Chairman, the minority could not get a bipartisan or even Republican substitute that could overhaul this entire agricultural reconciliation bill.

So what must we do? I think perhaps we may be relegated to go into conference with the other body and getting the best possible conference report we can. If we have an unsuccessful conference, then certainly the House can work its will and if that conference report is not acceptable to the administration, then I suspect the bill may be vetoed.

Now, in this regard, Mr. Chairman, let me read in part from a letter from Secretary Block setting forth the position of the administration on this bill:

The administration opposes this bill with the exception of section 130, which amends section 416 of the Agricultural Act of 1949 and authorizes the donation of dairy products.

We oppose the provisions creating special paid diversion programs for the 1983 crops of wheat, feed grains, rice and upland cotton. Not only would these provisions require outlays for diversion payments, but we estimate that the resulting production adjustment would be insufficient to provide offsetting savings in net lending and deficiency payments. We estimate that the program as envisioned in the bill would result in additional outlays for Commodity Credit Corporation of over \$1.3 billion in fiscal year 1983 on these crops. Even using the Congressional Budget Office (CBO) estimates for grain, rice, and cotton, these provisions would increase fiscal year 1983 out-

lays by \$363 million. So, the paid diversion programs would not be money-savings changes.

And to quote further, Mr. Chairman:

We oppose the higher loan rates which H.R. 6892 mandates for wheat and feed grains. We estimate that these loan rates would increase the net outlays for wheat and feed grain commodity loans by \$450 million in fiscal year 1983 and by \$64 million in fiscal year 1984.

The Secretary of Agriculture also says, Mr. Chairman:

We oppose the provisions of H.R. 6892 which establish the National Dairy Board and unduly complicate the dairy price support program. This bill would require a new bureaucracy in USDA to operate the new program. Because of the complexities of the provisions it would take up to 6 months to implement the program. Since the cost savings estimated for this bill stem partly from the assumption that it will be implemented immediately, they are overstated by perhaps 50 percent. Moreover, the National Dairy Board would not be accountable to the Secretary or the public. The bill would continue to encourage a supply imbalance of milk through high price support levels. It would lock the Government into a long-term obligation to purchase 5 billion pounds of dairy products annually. Even under the 1981 Act, purchases would likely have fallen below this level by fiscal year 1985.

Now, Mr. Chairman, I do not necessarily agree with each and every position of the administration as stated in the letter from Secretary Block. However, I want to emphasize, it is the President of the United States who must eventually sign this legislation if it is to become law. Therefore, the administration's views are very important on each of these issues.

I have said repeatedly, Mr. Chairman, that an omnibus reconciliation bill, in my judgment, would have been the proper course for the House to take if we really want to effect savings. Now, most of us did not participate in this decision on that issue. It was decided to proceed with a multiple reconciliation bills approach. Obviously, this approach is not working, or at least it is not in my opinion, and it is not effecting the kind of savings that could be achieved.

Mr. Chairman, I think our best hope here today is to pass the minority substitute adding additional food stamp savings, and then, depending on what may happen on a motion to recommit, proceed to obtain the best solution possible in the conference. It is not an easy course that has been set out for us, but we must do the best we can under the circumstances.

So I would urge members of the committee to vote for the minority substitute; then give strong consideration to a motion to recommit with instructions, which I understand the gentleman from Ohio (Mr. LATTI) will offer. Now, if you can support the gentleman from Ohio (Mr. LATTI) after hearing the debate and voting on the minority substitute, I urge you to do so.

If the motion to recommit fails, I urge you to support a stronger conference report that I am hopeful we can bring back to you soon.

Mr. Chairman, I agree with the minority leader, the gentleman from Illinois (Mr. MICHEL) who has said repeatedly that we must resolve the "spending cut" portions of the budget process before proceeding to the tax bill now in conference. I would assume this means holding the tax bill until we determine what the President's action will be on the various spending cut bills.

The vote of 230 to 156 on the rule should tell us all something about what may happen to this bill if we do not proceed with caution.

So, Mr. Chairman, I support the committee in what it has achieved so far in the agriculture reconciliation bill. I again commend the chairman of the committee, the gentleman from Texas (Mr. DE LA GARZA) and others on the committee for their hard work and commitment to date; however, I think we all have to work harder to achieve more savings and certainly I pledge my support to this end.

Mr. Chairman, I yield 3 minutes to the distinguished gentleman from Missouri (Mr. COLEMAN).

Mr. COLEMAN. Mr. Chairman, it was less than 1 year ago that we passed a 4-year farm bill here in this Chamber. At that time, there was quite a debate as to whether or not we could forecast 4 years in advance exactly what the farm situation might be. After considerable debate and the fine leadership of our chairman, that bill passed by one or two votes, as I recall.

Well, here we are about 1 year later and although interest rates may have declined a little bit, they are still too high for the American farmer and farm commodity prices, though perhaps up for livestock, are disastrously low in the grains.

Yesterday, on the Chicago Board of Trade, the corn and bean prices that they quoted simply are insufficient to sustain a farm operation in this country. December corn closed at \$2.45; January soybeans, \$5.98.

Let me explain and interpret these figures for those who are not familiar with their meaning. These prices are not even equal to the cost of production of these crops.

Net income continues to fall for the American farmer and the farmers continue to fail to make payment at the bank.

Now, the reason that I support the committee bill, as far as the farm-related programs go, is that there needs to be some incentive for the American farmer to stop producing himself into a disastrous situation piecewise. In my home State of Missouri, three out of four farmers are not participating or

being certified in the voluntary set-aside program that this administration has put in place to reduce production. It is obvious that they need some sort of incentive to do that, and this bill provided, I believe, an incentive in the form of a paid diversion program. Farmers will undertake to curtail production so that they might be able to help themselves in a resulting higher price in the marketplace. Without that incentive, I am assured that we will have more bumper crops, lower prices for the farmer and more and more deficiency payments paid out of the Treasury in the long run.

Farmers, when they are confronted with low prices and no incentives to reduce production output, are going to try to produce themselves out of a hole. They are going to increase volume. They are going to try to increase efficiency and increase production of grain.

The farmer-held reserve stores more than 2 billion bushels of grain right now.

The farm production figures of last year, 1981, total nearly \$139 billion as an aggregate.

The cost of money that the farmers borrow was \$13 billion; rent on land and machinery was over \$11 billion.

Mr. Chairman, that is why I rise in support of that portion of the bill for farmers, because I believe that something needs to be done.

Now, there has been much debate as to whether or not this bill meets reconciliation. I believe we can all figure that out for ourselves. We are going to offer a substitute which I will speak to later on where we could save \$197 million over 3 years in reducing the error rates and other matters in the food stamp program, which would help save money that we know we have not saved under the other parts of this bill.

Mr. DE LA GARZA. Mr. Chairman, I yield 3 minutes to the gentleman from California (Mr. PANETTA), a member of the Committee on the Budget and also a distinguished member of the Committee on Agriculture.

Mr. PANETTA. Mr. Chairman, I rise as both a member of the Budget Committee but more importantly, a member of the Agriculture Committee with regards to the bill that is now before the House.

First of all, I want to commend the chairman of the committee and the subcommittee chairmen, who worked on this bill, as well as the minority members, all of whom I think worked very diligently to bring this product to the floor today.

Obviously, there is no question that we have a problem with regards to credibility of numbers. The Office of Management and Budget reflects the particular numbers that they want to target at. We have to rely on CBO, the Congressional Budget Office, to

present the numbers that scorekeep the savings that we provide to the House.

I realize that it is difficult for the Members, for the members of the public, to try to analyze who is right and who is wrong. The only thing I can point out, I think, to the Members is that CBO has been persistently closer to reality than what OMB has presented and that is true for the prior administration as well as this administration.

The best example of that I can give is that for 1983 the Office of Management and Budget has projected a \$115 billion deficit; CBO is projecting a \$140 billion to \$160 billion deficit, and everyone that I know of that looks at this issue agrees that CBO is much closer to what the projected deficit will be.

So I think in terms of credibility of those that do provide the numbers, CBO is much closer to the mark and, therefore, we do rely on CBO to scorekeep these figures.

In conjunction with that, the Agriculture Committee has exceeded the targets that were given to them in the reconciliation instruction. They were to reconcile \$3.2 billion in 3 years and in this bill they have provided savings of \$4.6 billion. That is \$1.3 billion in excess of the instructions that were given them. It is \$1.2 billion ahead of what the Senate has reported in their reconciliation measure.

I think the program that is presented here is also balanced. It does not just go after one program. It tries to spread the sacrifice that is involved any time we try to achieve savings in a reconciliation bill.

Food stamps are cut over the next 3 years to the tune of \$1.3 billion, involving error rate adjustments, job search adjustment, and changes in definitions.

The dairy program cuts \$3.2 billion. I might mention that that is a program the administration has consistently said ought to be reformed. We ought to cut back on that, and for the first time before this House a major reform bill that, in fact, provides those savings is now open to consideration by the House. It is the first major reform in the dairy program since its existence and I think it is important to recognize that those are real savings. They are to be counted.

The CHAIRMAN. The time of the gentleman from California has expired.

Mr. DE LA GARZA. Mr. Chairman, I yield 1 additional minute to the gentleman.

Mr. PANETTA. Because of that, the fact that these are real savings, they do attribute to the overall scorekeeping that has the Agriculture Committee exceeding its targets.

□ 1300

I would urge the Members to support the committee approach, not only because it exceeds the goals and because it is balanced, but also because of the way it does approach the food stamp issue.

Let me say that last year when we had reconciliation, food stamp cuts made up 52 percent of the overall cuts presented in the agriculture package. Almost \$7 billion was cut last year for 3 years in the food stamp program. This year, in this package, \$1.3 billion, in addition, is cut over the next 3 years.

This is a time of unemployment; it is a time of recession. I think we have to have some sense of the need out there in terms of this program before we go charging ahead and adding additional cuts.

So I would urge the Members to stick with the committee because they did the job, they presented a balanced and effective package, and they are saving money not just when it comes to the poor, but for everyone involved in agricultural programs.

Mr. WAMPLER. Mr. Chairman, I yield 5 minutes to the distinguished gentleman from California (Mr. THOMAS).

Mr. THOMAS. Mr. Chairman, in these troubled times I seek inspirational reading. Unfortunately, more and more I am being inspired by Lewis Carroll's work. For example, in "Through the Looking Glass," when the Red Queen and the White Queen were quizzing Alice, the White Queen said, "What is the cause of lightning?" "The cause of lightning," Alice said very decidedly because she was quite certain about it, "Is the thunder. No, no," she hastily corrected herself, "I mean the other way around."

"It is too late to correct it," said the Red Queen, "When you have once said a thing that fixes it and you must take the consequences."

That was "Alice in Wonderland." But look at what the Agriculture Committee has done.

This reconciliation bill before us from the Agriculture Committee, pays people not to grow crops. This bill proposes to pay people not to grow wheat, pay people not to grow feed grains, pay people not to grow rice, and pay people not to grow cotton.

Why you ask? Because otherwise the Government would have to pay deficiency payments.

What is a deficiency payment? A deficiency payment is the difference between the market price and the target price.

What is the target price? The target price is an absolutely arbitrary, agreed upon price. Last year in negotiations on the farm bill in the conference committee, and I sat through 6 weeks of those negotiations, and that confer-

ence resembled a Turkish bazaar at times when there were negotiations on what the target prices were going to be on wheat, for feed grains, and for rice. The number arrived at as the target price was simply a political agreement.

But now, somehow, once stated, as the Red Queen says, you cannot go back and correct it. We are locked into a target price. But the Government is going to have to pay too much money in deficiency payments.

So how do we get out from under it? We create a new program, in a reconciliation bill, to pay people not to grow. And when you examine one of those commodities, rice for example, even by all CBO estimates, we are actually going to end up costing ourselves money not saving money.

We are not going to save money by paying people not to grow in the rice area. It is going to cost us money, even by the CBO figures.

I talked about "Alice in Wonderland." Take a look at the cotton program. That is the one exception in terms of target price. That is not an arbitrarily agreed-upon political figure.

In the cotton program, the most market-oriented program of the commodities, the target price is computed by taking the last 5 years' actual market price of cotton, dropping the high figure, dropping the low figure, and averaging the remaining 3 years. That figure becomes the loan rate. The target price is 120 percent of the loan rate.

It at least has some relationship to reality. And because the cotton program is so market oriented, the growers, understanding the need to reflect the market price, have a very high commitment to voluntarily modify their growing habits. As a matter of fact, figures currently in the Department of Agriculture indicate will probably have in the vicinity of an 80-percent compliance, that is 80 percent of the farmers are voluntarily setting aside acres, voluntarily not growing cotton.

Yet in this reconciliation bill, the CBO figured that if we paid people not to grow cotton, we would have about a 75-percent set-aside figure.

As a matter of fact, voluntarily, cotton farmers across the United States voluntarily will set aside a higher percentage. If you want to argue CBO numbers, you have to look at CBO's concepts, the arguments behind the numbers. They are as fallacious as other numbers are in terms of other people's arguments.

I would ask Members to, in fact, recommit this bill and examine the concept of target prices as well as the concept of paid diversion. It does not make any sense at all to me to pay people not to grow when: First, it costs money to do it under the rice program.

In a reconciliation bill we are supposed to be saving money; and second, to pay people not to grow when voluntarily they are doing it anyway.

Mr. DE LA GARZA. Mr. Chairman, I yield 2 minutes to the distinguished gentleman from Louisiana (Mr. HUCKABY).

Mr. HUCKABY. Mr. Chairman, I rise to the floor in strong support of this bill and would like to comment on some of the statements just made by my good friend and colleague from California, who is a member of the minority party.

It is my understanding the minority will be offering a substitute, and the substitute has the exact same provisions as the bill before the House regarding cotton, rice, wheat, and feed grains. Hence, I must arrive at the conclusion that both parties have recognized that it is necessary that we take action from where we are today, not only to protect the American farmer in the short run but also the consumer in the long run.

American agriculture is hurting like it has never hurt in my lifetime before. If CBO says that from where we are today, with the system we have, where we pay target prices to make up the difference from what the marketplace determines, and what Congress has by previously passed legislation, says is a fair minimum price that farmers should receive, if we can pay money to get farmers to participate in this program and save taxpayers' dollars, it certainly makes sense to do so.

The gentleman from California mentioned the cotton program. But he does not talk reality; he talks of numbers of people who signed up with intentions of what they were going to do. Most farmers will sign up to keep open their options so that they can later on determine whether or not they wish to participate in a program.

For instance, the only numbers that the Department of Agriculture had for the Nation were for the State of Mississippi. Mississippi had over a 90-percent sign-up of farmers who said, "I will set aside some of my land." But once it came time to plant, only 70 percent of those farmers agreed to set aside their land.

Mr. Chairman, I urge my colleagues to support the committee bill.

Mr. WAMPLER. Mr. Chairman, I yield 4 minutes to the distinguished gentleman from South Dakota (Mr. CLINT ROBERTS).

Mr. ROBERTS of South Dakota. I thank the gentleman for yielding this time to me.

Mr. Chairman, I rise in support of the agriculture programs section of the reconciliation measure currently before the committee. I commend Chairman DE LA GARZA for his efforts on behalf of Agriculture, and my colleague, Mr. FOLEY, for authoring, introducing, and working for the com-

modity provisions we have before us today, of which I am a cosponsor and thank the ranking minority member of the committee for his leadership. If my colleagues will recall, I conducted a "show and tell" for you last session to help educate those of you who may not be familiar with agriculture on just what kind of a return the farmer receives from each \$1 you spend on grocery products. If you remember, I indicated that the farmer receives only 4 cents for the wheat in a \$1 loaf of bread.

The plight of the American farmer has deepened since that time, and we can no longer stand back and watch the agriculture industry deteriorate.

Farmers today are still battling the results of the ill-conceived grain embargo, and record crops over the past several years have added to the surplus. We currently have a surplus of over 1.1 billion bushels of wheat, and it does not take a genius to figure out that the price of our product is not going to go up when we have an abundance of that product on hand.

There have been legislative attempts made to force farmers to reduce production by penalizing them for not participating in reduced acreage programs. I do not believe that is the proper approach, and, fortunately, my colleagues agree with me. We do have a surplus. We do need to reduce production, but we cannot achieve that by mandating what a farmer can and cannot do with his own land. Rather, we must go with an incentive program which provides to that producer the financial motivation to take some of his land out of production. Mr. FOLEY's set-aside and paid diversion plan offers that incentive.

We have a lot of young farmers out there who cannot afford to reduce their production—they have too much tied up in buying their land, and equipment, and producing their crop. They need that cash flow to keep their heads above water. The paid diversion provisions of this measure will insure that the farmer will at least receive enough to make his rent payments. Hopefully, we will see a lot less fence-row to fence-row farming under this plan because we are offering those young producers a reasonable alternative.

The American farmer has done more than his fair share in helping to turn this economy around. He has survived embargoes, high interest rates, tight money, and low prices; but he cannot hold on forever. If we want to continue to enjoy one of the lowest food bills in the world for the best quality food products in the world, we have to step in now and help the farmer receive a greater return for his hard work and investment.

We have asked a lot of America's farmers. We now have a chance to

achieve a sizable budget savings while at the same time do something positive for agriculture. It is not the total answer to our problems, but it is a step in the right direction. I hope you will join me in supporting this measure. It is special interest legislation, special interest to those all across our land who enjoy the tidal effect of a healthy agriculture from the soil of the land to the workers in our factories. Agriculture is the catalyst that fires the furnaces of our factories across America.

Mr. DE LA GARZA. Mr. Chairman, I yield 2 minutes to the gentleman from North Dakota (Mr. DORGAN).

Mr. DORGAN of North Dakota. Mr. Chairman, I rise in support of the committee bill.

I am going to support this reconciliation package because at least with respect to wheat and feed grains programs it may provide an opportunity for increased farm prices.

I do not like the priorities we are establishing in this House.

We sort of act like four bookkeepers around a coffee table.

The fact is, we ought to be outraged. We have the worst conditions on the farm that we have had for decades.

I went to a barn dance last Saturday night. Do my colleagues know what it was for? It was farmers organizing to raise money to fight the Farmers Home Administration foreclosures. That is what it was for.

Do you know who was playing the music? The Farm Foreclosure Band.

People are upset out there because they are losing their farms; they are literally being kicked off their farms. It is not always a formal foreclosure action; it is forced liquidation.

The Secretary of Agriculture also came to North Dakota recently, not to talk to those folks, of course, but he came to North Dakota. Do you know what he said? He said, "You know, things are not as bad out there on the farm as some people have been led to believe."

Nonsense. He is talking to the wrong folks. I talked to an auctioneer the other evening at the barn dance and he said he is booked up solid to the end of the year, and he said if he had more help he could do twice as many auction sales.

I will say this to the Secretary of Agriculture: If things do not change, he is not going to be known as Secretary Block; he is going to be known as Auction Block, because we are going to have more auction sales in this country out in rural America in the next couple of years than under any other Secretary of Agriculture that we have had. It is not all his fault; I am not saying that. But I am saying that these folks like Secretary Block who are saying farmers should operate in the free market and then take the free market away, that is hypocrisy.

Our agricultural exports are expected to decrease this year for the first time in 8 years; farmland prices are down, the first time since 1954; interest charged exceeds net farm income for the first time in history.

Our family farmers have serious troubles, and it is time for this Congress to pass some legislation that will give them a chance to survive.

□ 1315

Mr. DE LA GARZA. Mr. Chairman, I yield 1 minute to the gentleman from Arkansas (Mr. ALEXANDER).

Mr. ALEXANDER. Mr. Chairman, I thank the Chairman for yielding me this time, and I congratulate his effort.

Mr. Chairman, I rise to speak on behalf of the bill H.R. 6892, which the House Agriculture Committee has reported to meet reconciliation requirements of the first congressional budget resolution.

This bill is a valuable contribution to our overall effort to reduce Government spending and provide much needed relief to the farmers of America. It comes at a time when our farmers are literally fighting for their own economic survival and at a time when no other source of relief appears to be in sight from the effects of low prices, high interest rates, high production costs, and failing farm policy.

The proposal to increase support prices and to set-aside land from production in exchange for diversion payments is an example of how Government farm programs designed to improve farm prices help the farm economy while causing a saving in Federal expenditures. The cost of the present farm policy will result in a higher takeover by increased farmer participation in the Commodity Credit Corporation loan program. The proposed set-aside program with diversion payments will reduce supply, increase market prices, thereby reducing Government loans, deficiency payments, storage costs and bankruptcy losses. The result is an estimated net saving to the Treasury of at least \$3.3 billion.

But, far more vitally important to the national interest will be the American farmers who survive this economic depression because Congress responded to the national need of agriculture.

This Congress must recognize the urgency of the situation in the farm sector even if the President will not. The Nation's agricultural economy is in the worst economic depression in 50 years. Domestic farm prices reflect the effects of an economic program that has ripped to shreds any pretense of an economic safety net for farmers. Domestic net farm income in 1982 will be the lowest since 1932 and the level of farm foreclosures in 1983 will probably be the highest since that same period a half century ago.

Let us review some of the facts that have persuaded the Agriculture Committee to present a plan for reduced crop production and reduced expenditures for agricultural programs for the next 3 years.

Crop prices dropped every month in 1981 for an average decrease among major commodities of 14 percent.

Livestock prices declined by an average of 10 percent in 1981 and have yet to regain the price levels of 1979-80, despite Secretary Block's claim of economic recovery for livestock producers.

After modest upward price movement in the spring, crop prices have now collapsed below the depressed levels of 1981 to a point unforeseen by even the most pessimistic farm forecasters. There literally is not a single farm crop among the grains and soy complex which will return a profit to farmers at this time no matter how efficient the farmer.

The July 30 issue of *Agricultural Prices* by USDA, which includes the parity price index, showed the July parity levels of major farm commodities to be lower than during the Great Depression of the 1930's.

Commodity:	Percent of parity
Rice.....	39
Wheat.....	45
Corn.....	50
Cotton.....	47
Soybeans.....	47

Farm prices in the Great Depression generally did not decline below 50 percent of parity.

Burdensome supplies and depressed prices are a reflection of this administration's failed agricultural program. There are almost 2 billion bushels of wheat and corn in the farmer-owned grain reserve with no place to go and inadequate storage available for the 1982 crops. The administration will spend almost \$12 billion on the 1982 farm program and \$1 billion of that will be the cost of storing grain with no known market.

The administration professes not to share the concern of those of us from the farming regions about the present danger of mass bankruptcies and irretrievable loss of thousands of our most efficient agricultural producers in the coming months. In the special order discussion of the farm problem on the House floor on May 4, I noted that our 2.4 million farmers had total debts of almost \$200 billion, much of that at short-term high-interest rates which cannot be repaid, given the farm income realities of 1980, 1981, and 1982.

As has been widely reported, net farm income has been shrinking rapidly for 3 years, just as farm debt has ballooned. In current dollars, net farm income for each of the last 3 years, including 1982, has been about half of

the 1979 level while total debt is double that of 1975.

The Farmers Home Administration was justly embarrassed by the unprecedented levels of delinquency among its farm borrowers, revealed earlier this year. Their policy of refinancing and subordination of debts to other lenders has allowed most of those borrowers to continue to operate in 1982. But a day of reckoning is coming, given current farm prices and farm income projections. The January 1982 FmHA data on farm loan borrowers showed that operating loan accounts were 38 percent delinquent and emergency loan accounts were 41 percent delinquent nationally. In my State of Arkansas, the figures were 63 and 64 percent respectively. I shudder to think what those figures will look like for January 1983.

I have come to the same conclusion reached by the Agriculture Committee that farm production must be temporarily reduced if the current farm depression is ever to end. It makes no commonsense to continue to pile up commodity surpluses when we have an economic program in effect which is constricting and strangulating our efforts to expand agricultural exports. Farm exports will decline in value this year from about \$44 billion in 1981 to \$42 billion, the first decline in a decade of export growth. Our storage facilities are full, we have accumulated a full year's production without any immediate market prospects for it, and our taxpayers are being required to assist farmers in managing this huge inventory at a very high cost to all concerned.

We must restore economic policies that achieve moderation in interest rates and reduce the dollar's overvaluation in relation to the currencies of our major foreign customers in order for our farm programs based on larger value and volume of agricultural exports to succeed. Because those policies which could successfully move our current surpluses into foreign markets are not working, we have no choice but to cut production.

The bill H.R. 6892 can provide the needed incentives to reduce excess crop production and it will do so while reducing Government outlays over the life of the bill. It can succeed by giving the producer the economic incentive to take 20 percent of his land out of production in the case of rice and feedgrains and 25 percent in the cost of wheat. It will make modest adjustments in the support program for dairy products which will achieve \$3.3 billion savings in this program over 3 years. It will save \$70 million in the cotton and rice program over 3 years but will increase the costs of the wheat and feedgrain programs by \$56 million over the same period, according to the Congressional Budget Office. Total savings in the bill over 3

years is \$3.3 billion, which meets the mandate of the first budget resolution.

To sum it up, it will help farmers bring supply back in line with known demand and it will save money in doing so. I urge my colleagues to support H.R. 6892.

Mr. WAMPLER. Mr. Chairman, I yield 3 minutes to the distinguished gentlewoman from Nebraska (Mrs. SMITH).

Mrs. SMITH of Nebraska. Mr. Chairman, I rise in support of H.R. 6892.

I am especially pleased that the committee included provisions for a paid acreage diversion in the wheat and feed grain titles of the bill. From all indications it appears that this additional incentive is needed for producers to reduce acreage.

It is clear that carryover stocks for wheat and feed grain must be reduced if we are to restore the supply and demand balance. Cash wheat prices in my district are running as low as \$3.20 a bushel and \$2.20 a bushel for corn. This is far below cost of production and \$1 below last year at this time.

The present program benefits for acreage reduction of loans and deficiency payments have not been and will not be enough for a majority of producers to participate. Fixed costs on farms continue regardless of whether or not a crop is produced. Financial incentives to reduce production must be enough to cover those fixed costs plus any expected profit from the lost production.

If we are not successful in reducing carryover stocks the economic condition of agriculture will become even more disastrous than it already is. For many producers this year is critical for survival. If they cannot make expenses in 1982 after 2 years of bad prices and at least 1 year of drought, the future farm foreclosure rate will make this year's failure rate look good.

Normally, I would not support these acreage set aside policies, since the normal grain situation in the 1970's was characterized by increased demand and expanding markets. This situation has changed due to the worldwide economic recession, high interest rates that make U.S. products more expensive on the world market, and a devastating grain export embargo. Therefore, I think that the acreage reduction program with a paid acreage diversion is now needed to adjust to a changing market. As a short-term action designed to bring supply and demand back into balance the paid diversion, in my opinion, is not contrary to a market oriented agriculture and is in fact a logical adjustment to the changing market. When the demand situation picks up again with world economic improvements, we can return to full production.

I commend the committee's action on the wheat and feed grain portion of

the bill. It offers the only immediate hope of increasing producer income, not through high Government handouts, but through offering more adequate incentives to reduce production and therefore raise market prices.

Mr. WAMPLER. Mr. Chairman, I yield such time as he may consume to the gentleman from Nebraska (Mr. BEREUTER).

Mr. BEREUTER. Mr. Chairman, I rise in strong support of the legislation which is before the House, particularly the wheat and feed grain provisions of the bill. This measure represents a good faith effort to actually reduce Federal spending while at the same time providing the American farmer with some meaningful assistance in these times of chronically depressed commodity prices. I applaud the Committee on Agriculture for its efforts and urge the adoption of this measure.

Mr. Chairman, the wheat and feed grain provisions of this reconciliation measure were taken directly from legislation which was introduced earlier this summer by the distinguished chairman of the Wheat, Soybeans, and Feed Grains Subcommittee. I and numerous other farm State representatives cosponsored that effort, with the recognition that our farm families are currently caught in the throes of the worst economic condition since the Great Depression. Preliminary reports indicate that we could be facing a record wheat harvest this year, and the prospects are good for a record or near-record corn harvest as well. The response to the voluntary acreage reduction on these crops is, not surprisingly, inadequate to reduce production sufficiently, even though emphasis must be on developing additional markets. Resultantly, as this Member recognized, there is a pressing need for a paid diversion such as that contained in this bill. It is obvious that stronger incentives will be required if we are to substantially reduce production, raise commodity prices, and avoid huge outlays in deficiency payments next year; that is the premise of the bill which is before the Committee of the Whole today.

I want to call to the attention of my colleagues the simple fact that there is currently almost 2 billion bushels of wheat and corn in the farmer-owned grain reserve. While this program has worked well in providing our producers with additional marketing flexibility, the mere existence of this surplus grain has worked to the disadvantage of the farmer in that it has a price-depressing effect upon the market. It is vitally important that these surplus stocks be dissipated through export sales and new domestic markets at the same time we are cutting back production to more closely match demand.

Mr. Chairman, I stress the fact that the Agriculture Committee has not only met, but has come in with \$1.3 billion under the savings required by the budget resolution which passed this body earlier this year. This exemplary effort is in sharp contrast to that of some other committees which have reported mere token efforts to hone the budget process and the passage of legislation in June of this year. Again, I commend the Agriculture Committee, for this initiative and I urge adoption of this bill in its present form.

Mr. DE LA GARZA. Mr. Chairman, I yield 2 minutes to the gentleman from South Dakota (Mr. DASCHLE).

Mr. DASCHLE. Mr. Chairman, I rise in support of H.R. 6892, the Food and Agriculture Reconciliation Act. The bill, which has the strong bipartisan support of the Agriculture Committee, makes changes in the wheat, feed grains, cotton, rice, and dairy programs and in the food stamp program. The legislation exceeds the goals contained in the first budget resolution for cost savings—it is estimated that H.R. 6892 would save \$1.276 billion in fiscal 1983, \$1.724 billion in fiscal 1984 and \$1.596 billion in fiscal 1985.

I would like to address myself to the wheat and feed grains section of this bill, as that is the portion in which I have been most actively involved. My big disappointment in this legislation is that we have to have it at all—this legislation, which provides incentives for farmers to cut production and conserve soil, while at the same time saving money and raising grain prices, is all within the Secretary of Agriculture's jurisdiction. It is all action that he could have, and should have taken to shore up our depression level farm economy. We have a depression in agriculture today. There can be no misunderstanding about that.

The administration has refused to enter into a multiyear grain agreement with the Soviet Union—the administration has only lately and very reluctantly agreed to talk with the Soviets about a 1-year extension of the agreement. This Nation has huge grain surpluses that are driving prices down and farmers out of business, and for our Government to ignore one of the world's largest commercial markets is inexcusable.

The administration has refused to use its authority to offer meaningful programs to farmers to cut production as a way to deal with supply/management imbalances. This refusal is particularly perplexing in light of the fact that this legislation saves money over current administration policy. And for an administration which gives lip service to soil conservation, they are strangely unenthusiastic about even voluntary programs with incentives for setting aside land for conservation purposes.

The administration's announced wheat plan is an insult—its source of incentive for participation is to offer farmers a 50-percent advance on their deficiency payments. The assumption by the administration is that prices will remain so low that farmers will be receiving wheat deficiency payments in crop year 1983. If, however, deficiency payments are made and then prices go up and it turns out the payments were unnecessary, the administration has not yet decided whether the farmer would—a year later—have to repay the money and whether he would be charged interest. I cannot imagine many wheat farmers finding the administration program a very good gamble.

I and a number of other Members introduced in May of this year the Farm Crisis Act which contained many of the elements in the bill before us today. The original Farm Crisis Act had a paid diversion for crop year 1982 and an acreage reduction program with conservation features and increased loan rates for crop years 1983 through 1985. Following the tie vote defeat of this bill in the Agriculture Committee, the members of the Farm Crisis Group, along with Mr. FOLEY and others, devised a new strategy. We agreed on an approach which would split off the commodity section of the bill, revise it, and incorporate it into reconciliation. Title I of the revised Farm Crisis Act is nearly identical to the wheat and feed grains portion of the agriculture reconciliation bill. I would particularly like to thank Mr. FOLEY, and I am sure farmers everywhere thank him also, for his leadership on this legislation.

The remaining portion of the Farm Crisis Act deals with the agriculture export credit revolving fund, the economic emergency loan program, loan guarantees for on-farm storage facilities, bartering, a White House Conference on Agriculture, and multiyear grain agreements. I am pleased to be able to say that this bill, too, has been approved by the House Agriculture Committee and now awaits House action.

The bill we are considering today provides for a 25-percent voluntary acreage adjustment program for wheat—15 percent of this would be in the form of acreage reduction and 10 percent paid diversion. The wheat price support loan for those participating would be raised from \$3.55 to \$3.80 and the diversion payments would be based on \$3 per bushel. All land set aside is required to be put to approved conservation uses. Farmers would receive half their diversion payment at time of signup.

With regard to feed grains, the bill provides for a 20-percent voluntary acreage adjustment program—10 percent of this would be in the form of acreage reduction and 10 percent paid

diversion. The corn price support loan for those participating would be raised from \$2.55 to \$2.71 and the diversion payment would be based on \$1.50 per bushel. Farmers would receive half their diversion payment at time of signup. All land set aside is required to be put to approved conservation uses.

Savings from this program would be achieved by reducing surpluses and cutting potential direct target price payments.

I urge the support of my colleagues for this legislation which not only exceeds the goal set by the first budget resolution but which will also help beleaguered farmers.

Mr. DE LA GARZA. Mr. Chairman, I yield 2 minutes to the gentleman from Iowa (Mr. BEDELL), a distinguished member of the committee.

Mr. BEDELL. Mr. Chairman, first of all I would like to commend all of those who have worked to make this legislation possible, including the chairman of the committee. This is not a perfect bill. We see few perfect bills, but unless we take some steps quickly to try to bring supply and demand into balance, I fear that we are going to see more and more of a depression in our farm economy.

I know Members have heard time after time after time about the problems of our farmers. Let me tell them, this time our farmers really have problems. We had the Farmers Home Administration and some other lending institutions before our committee recently, and their testimony to us was specifically, "If you think you have problems today, wait until you hold this same hearing a year from now unless something happens in agriculture, and see how desperate the situation is."

As long as we have an administration which acts similar to previous administrations in using food as a weapon for foreign policy, and making it more and more and more difficult for us to expand our foreign markets and to sell on those foreign markets, then we have no choice. We are either going to build surplus upon surplus upon surplus, or somehow we are going to bring our production under control so that we do not build those huge surpluses which depress prices and cause the taxpayers to have to pay more and more money in order to handle the surpluses.

I think this is a good bill. I am proud to be able to stand here and support it, and I commend the committee for the work that was done on it.

Mr. DE LA GARZA. Mr. Chairman, I yield 2 minutes to the gentleman from Tennessee (Mr. JONES).

Mr. JONES of Tennessee. Mr. Chairman, I rise in support of H.R. 6892, and urge my colleagues to support the budget reconciliation package which

has been brought forward by the Committee on Agriculture.

This budget reconciliation legislation in my opinion represents an effective and responsible effort on the part of the Agriculture Committee to provide for the necessary reductions in Federal spending over the next 3 years, while at the same time offering the American farmer a sincere and realistic opportunity to pull himself out of the worst economic depression agriculture has seen since the days of the Dust Bowl.

On several occasions over the past year, attempts have been made in the Agriculture Committee to face up to the crisis which exists in our Nation's farm sector. But until now, this Congress, for one reason or another, has refused to act. But for those who had begun to give up hope that a meaningful program could emerge to reverse the downward trend in agriculture, I point to this bill, and say here is a good start.

Today, we have the opportunity to prove to the American farmer that we do have the courage to act—that we have the courage to give the grain farmer, the dairy farmer, the rice and cotton farmer the tools and incentives to reduce surplus production and, in the end, improve the price he receives for his commodity.

Not only that, but we can also demonstrate to the American taxpayer that we have the courage to trim over four and one-half billion dollars from Federal spending in USDA programs over the next 3 years.

Again, I urge the House to approve this legislation because it represents a thoughtful and realistic approach to our responsibilities in the budget process as well as the current economic crisis in American agriculture.

Mr. WAMPLER. Mr. Chairman, I have no further requests for time, and I yield back the balance of my time.

Mr. DE LA GARZA. Mr. Chairman, I yield 1 minute to the distinguished Resident Commissioner of Puerto Rico (Mr. CORRADA).

Mr. CORRADA. Mr. Chairman, I rise to make some remarks on H.R. 6892 and I do so to set forth a situation as it relates to Puerto Rico.

The bill has a provision in the food stamp portion mandating Puerto Rico to go back to a noncash food assistance program by October 1, 1983.

If it becomes public law, this amendment will force Puerto Rico to change a new program which just began July 1 which has as its main element a cashout of former food stamp benefits.

The amendment would mandate a noncash food assistance program by October 1, 1983, and also directs the Federal Government through the U.S. Department of Agriculture to undertake a thorough study of our new cashout nutritional assistance plan.

I want the Members to know that I still feel that the mandated change to another program is precipitous and premature.

I do not intend to offer an amendment to repeal this provision but do remind my colleagues here today that what we did in Puerto Rico was done following congressional adoption of the Omnibus Budget Reconciliation Act of 1981. This law took Puerto Rico out of the Federal food stamp program while reducing our annual level of benefits to a fixed figure of \$825 million.

Consistent with congressional intent, and in response to official guidelines and regulations promulgated following the new nutritional assistance block grant provisions for Puerto Rico, our island government developed a plan to cash out the reduced benefits. The plan received USDA approval and is now in operation.

It is my strong feeling that this amendment contained in the bill prejudices our program before all of the facts are in as to how well and how efficiently it is operating and how adequately it is providing nutrition for the many Puerto Ricans dependent on the new cash benefits.

I feel that Congress is taking action to change our unique situation prior to a thorough assessment and evaluation of that situation in Puerto Rico.

The additional language calling for a study of the nutritional status of Puerto Ricans as well as a study of the effect of this new program on the economy of the island is beneficial and I fully support it.

The study is one which I hope will be sound, thorough, and objective and will help guide the House Agriculture Committee in any future deliberations on the reauthorization of food stamps, particularly as it will affect Puerto Rico.

I would hope that the distinct problem of Puerto Rico and any evaluation of our new nutritional assistance plan will be kept separate and distinct from any possible link to the ramifications of the New Federalism, or a national cashout which some Members of the other body are proposing for the entire national food stamp program.

I feel our new program should be considered on its own merits. I also trust that in conference with the other body, if this bill should pass the House, we may be able to take another look at this problem.

● Mr. HYDE. Mr. Chairman, I rise in opposition to this bill, not because it fails to meet the mandate of the House in the first concurrent resolution of the budget and it does fail that test. I am against this bill not because it takes us backward into the mistakes of the past on farm programs by weaving a complex net of new regulations on farm people and the farm economy and it clearly does fail that test, too.

No, I rise in opposition to this bill because of its severe constitutional abuse.

This bill would set up a 16-member "Dairy Board" composed of 15 people, handpicked by the big dairy co-ops, plus the Secretary of Agriculture. This unlikely group would be charged with the administration of a new two-tier—and I might add a de facto tax and payment system affecting all dairy producers, processors, and consumers.

Under the terms of this bill, the Secretary of Agriculture could not even serve as Chairman, Vice Chairman or Secretary-treasurer of the Board.

This new Board would be outside the scope of civil service laws; it would be immune from Presidential discharge; it would supervise U.S. Government employees; and it could even dabble in foreign policy.

Perhaps this is why the Secretary of Agriculture, in the administration's report on this bill, states in part:

This bill would establish a producer-controlled National Dairy Board within the Department. However, the Board would be completely independent of Department review or supervision since there is no provision for Executive Branch oversight. In effect, powers traditionally reserved to governmental authorities would be delegated under this bill to industry representatives—dairy farmers—who would not be charged to serve the public interest. Operation of the Board would create an intolerable and unacceptable interference with the Secretary's authority and responsibilities to manage the Department of Agriculture and operate its programs. Under the bill, the Board would have extensive authority to use Department personnel and facilities. Establishment of a dairy advisory board to work with and advise the Secretary of Agriculture on dairy matters would be a more acceptable alternative.

Well, you may ask what is wrong with letting a group of public-spirited dairy farmers run the dairy price support system? Are they not a group of well-intentioned, hardworking citizens?

Of course they are. But are they any better equipped under our constitutional law system to administer dairy laws than would have wheat farmers running the wheat program, big business running the antitrust program or foxes running a chicken coop?

The Supreme Court has addressed this issue in the past, and in *Schechter Poultry Corp. against U.S.* and in *Carter against Carter Coal Co.*, established a doctrine on the delegation of authority to private citizens that has remained unchallenged for 37 years.

In the *Carter* case, the Court reminds us that—

While the lawmaker is entirely free to ignore the ordinary meaning of words and make definitions of his own, that device may not be employed so as to change the nature of the acts or things to which the words are applied.

Thus, I ask you to read this bill carefully and to recognize what it does. It establishes a dairy cartel.

Mr. Chairman, we Americans have been given a republic by our forebearers; we were not given a cartel. We have a legal and constitutional system that vests the power of governing in our elected and appointed officials, all of whom are answerable for their activities, and all of whom are charged with protecting the public interest.

This bill calls for the vesting of that power in the hands of 15 people who would be neither answerable to anyone nor expected to serve the public interest.

It is bad constitutional law, and this House should not be a party to it.

Since we cannot cure this bill by the amendment process permitted today, we must do the best we can and that is to either send it back to the Agriculture Committee or defeat it. ●

● Mr. FRENZEL. Mr. Chairman, I can appreciate the difficulty the Agriculture Committee has had with reconciliation. Estimates and reestimates have given it a moving target.

Nevertheless, while the committee can claim that it has exceeded the reconciliation instruction, it knows, and every Member here knows, that it has failed to meet the targets of the budget resolution.

In so doing, the committee follows the bad example of the Post Office Committee which thumbed its nose at the budget process, and met only 8½ percent of its reconciliation target. It follows the bad example of the Armed Services and Foreign Affairs Committees which copped out of their obligations just like the Post Office Committee.

It follows the bad example of the Ways and Means Committee which tried to meet its spending reduction obligations by a raising taxes, and that of the Appropriations Committee which has abused the budget process by misallocating 302(b) quotas by subcommittees.

No committee, of course, can do anything without the consent of the majority of both Houses. So all of us must acknowledge that we as a group are responsible for the failure of the budget process.

But we have been set up for this failure by the House Leadership. Our Speaker refused to follow the successful pattern of last year's reconciliation. Instead, reconciliation was subdivided in a conscious effort to undermine the process. Under the Leadership's procedure, the reconciliation, overall, is bound to fail, and the budget resolution will surely not be achieved.

Thus has the Congress been able to repudiate its own budget. Today's exercise in repudiation is not as bad as some, but repudiation it is.

Here are the figures. The budget calls for reconciliation savings—in food stamps—of \$3.3 billion in 3 years. It calls for unreconciled savings—in agriculture programs—of about \$1.9 billion in 3 years. That is a total of \$5.2 billion.

Here is what the committee did. It took savings which were to be made outside of reconciliation, and claimed them as reconciliation savings. Its savings fall far short of \$5.2 billion. In food stamps alone, the committee made only about one-third of its reduction target, according to its own figures. According to the Office of Management and Budget, that figure is only 30 percent.

The food stamp program seems a worthwhile social purpose. However, it has increased by 580 percent in only 10 years. No economy can stand that growth rate in a major entitlement program. And the food stamp program is laid on top of regular welfare, housing benefits, energy payments, employment compensation and other programs designed to sustain people who cannot support themselves.

I voted against the rule which denied as regular debate and an opportunity to amend this bill. I shall vote for the Wampler substitute, simply because it saves a little money. It does not satisfy the budget resolution.

Finally, I shall vote for recommitment so the bill can be put in shape to meet budget obligations, and should that motion fail, I shall be obliged to vote against the bill.

I do not object to the dairy program. It is not perfect, but it is better than the administration program, and has some possibility of reducing the terrible surpluses which hang over the dairy market. That program in this resolution does meet the expectations of the budget resolution. ●

● Mr. MARKEY. Mr. Chairman, I oppose the Republican substitute to the House Agriculture Committee's food stamp reauthorization bill. This bill would achieve savings of \$1.3 billion over 3 years on top of \$2 billion achieved last year alone.

After the Agriculture Committee satisfied and even exceeded the budget reconciliation savings requirements, the Republican substitute proposed further cuts in the food stamp program. The committee bill, H.R. 6892, already cuts \$1.3 billion in the program over 3 years. We should not forget that this program incurred \$6 billion in cuts for 1982-84 just last year.

The impact of further food stamp cuts cannot be considered alone. They come on top of drastic cuts in AFDC, medicaid, and public housing. The cumulative effect of these cuts is devastating. This is no time for further unraveling of the meager Federal safety net still in place.

Let me turn to look at the effect of each part of the substitute:

The committee's bill includes error rate sanctions which mirror those introduced earlier this year on the Senate side by Senators DOLE, COCHRAN, ANDREWS, JEPSEN, and BOSCHWITZ, and which were recently adopted by the entire Senate.

However, the Republican substitute rejects this bipartisan approach for a plan which by its very terms imposes financial penalties on the States so severe that they could exceed the Federal share of a State's administrative costs if imposed. A loss of such revenue would have tragic results—deeper cuts in other social service programs and cutbacks in administrative services. I think it is important to note that both the National Governors Association and the Council of State Public Administrators oppose the provision.

The job search requirement in the Republican substitute also goes further than many States would support. By making job search at time of application mandatory, we would eliminate State flexibility and require its imposition even in high unemployment areas where it would not be cost-effective. The committee bill already gives the States the option to require job search at application.

The emergency service provision of the substitute would require families in immediate need to wait up to an additional 3 days to get emergency food stamps. Further restrictions would be imposed upon eligibility for these services. Those in dire straits should be given help as quickly as possible and without hardship and additional delay.

Enough is enough. We have cut this program too often and too severely. Further cuts are uncalled for. I urge my colleagues to support H.R. 6892 and reject the substitute. ●

Mr. DE LA GARZA. Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN. All time has expired.

Pursuant to the rule, the bill is considered as having been read for amendment under the 5-minute rule. No amendments are in order except the following amendments: First, the amendments recommended by the Committee on Agriculture printed in the bill which shall be considered as having been read, shall be considered en bloc, and shall not be subject to amendment; second, an amendment printed in the CONGRESSIONAL RECORD of August 5, 1982, by Representative ZABLOCKI which shall not be subject to amendment; and third, an amendment in the nature of a substitute printed in the CONGRESSIONAL RECORD of August 5, 1982, by, and if offered by, Representative WAMPLER, which shall be considered as having been read and shall not be subject to amendment but

shall be debatable for 1 hour, equally divided and controlled by Representative WAMPLER and a Member opposed to said substitute.

The text of the bill, H.R. 6892, is as follows:

H.R. 6892

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Food and Agriculture Reconciliation Act—Fiscal Year 1983".

TITLE I—DAIRY

Subtitle A—Dairy Price-Support Program

Sec. 101. Section 201 of the Agricultural Act of 1949, as amended by the Agriculture and Food Act of 1981, is amended by—

(1) striking out everything in subsection (c) after the first sentence and preceding the sentence which begins "Such price support shall be provided";

(2) adding a new subsection (d) as follows:

"(d) Notwithstanding any other provision of law—

"(1)(A) For that portion of the national milk supply required to meet domestic commercial market needs (i) effective for the period beginning October 1, 1982, and ending September 30, 1983, the price of such milk shall be supported at \$13.10 per hundredweight of milk containing 3.67 per centum milkfat; and (ii) effective for each of the fiscal years beginning October 1, 1983, and October 1, 1984, the price of such milk shall be supported at such level that represents the percentage of parity that the Secretary determines \$13.10 represented as of October 1, 1982. That portion of the national supply required to meet domestic commercial market needs shall be the estimate of marketings of milk by producers minus the estimate of removals of milk from the market by the Commodity Credit Corporation under the price support program; and that portion of the national milk supply determined excess to domestic commercial market needs shall be the estimated removals of milk from the market by the Commodity Credit Corporation under the price support program.

"(B) The level of price support provided producers on that portion of the national milk supply determined excess to domestic commercial market needs shall be the level of price support provided for in subparagraph (A) reduced by such uniform rate as determined by the National Dairy Board as necessary to meet that portion of the cost of the price support program which is the responsibility of producers of milk as defined in paragraph (2). Such level of price support shall be (i) determined by the National Dairy Board provided for in paragraph (6); (ii) announced prior to October 1 of the fiscal year to which the rate applies and may be adjusted during the fiscal year as determined necessary by the National Dairy Board; and (iii) shall be achieved through a uniform reduction of the price paid producers on that portion of the national milk supply determined excess to domestic commercial market needs. The funds represented by such reduction shall be remitted to the Commodity Credit Corporation at such time and such manner as prescribed by the Secretary by each person making payment to a producer for milk purchased from the producer, except that in the case of any producer who markets milk of the producer's own production directly to consumers, such funds shall be remitted to the Corporation by the producer. The Corporation shall

credit the funds received by it under this provision to the account of the National Dairy Board. Such account shall bear interest at the same rate as payable by Commodity Credit Corporation on its borrowings from the United States Treasury. The funds represented by such reduction shall not be taken into consideration in determining payments to a producer of milk for purposes of the minimum price provisions of the Agricultural Adjustment Act of 1933, as reenacted and amended by the Agricultural Marketing Agreement Act of 1937.

"(2) Producers of milk shall have responsibility in each fiscal year during which this program is in effect for (A) that portion of the estimated total cost of Commodity Credit Corporation purchases under the price support program for milk represented by purchases in excess of five billion pounds (milk equivalent), related costs associated with such purchases and costs associated with inventory management and disposition of products related to said purchases in excess of five billion pounds (milk equivalent), (B) the amount of marketing reduction incentive payments due producers under paragraph (4) for reductions in their milk production, (C) anticipated administrative expenses of the Board, and the expenses arising from the operations of the Board under this subsection, and (D) any balance remaining from the immediately preceding fiscal year on advances made to the Board by the Commodity Credit Corporation as provided for in paragraph (3). There shall be deducted from such total amount the estimated receipts from the sale or transfer of dairy products and other operations conducted under this subsection. For the purposes of this paragraph the estimated cost of purchases of five billion pounds (milk equivalent) shall be the dollar amount represented by the cost of purchasing and handling butter and nonfat dry milk produced from five billion pounds of milk of 3.67 per centum milkfat content. Price support operations under this Act shall not, however, be limited to the purchase of these products or to their purchase in the proportions they appear in milk. In the event of an increase in dairy product imports through action taken under section 22 of the Agricultural Adjustment Act of 1933 (7 U.S.C. 624), the portion of the cost of the price support program which is the responsibility of producers shall be reduced by the milk equivalent represented by such increased imports. The milk equivalent of any such increased imports shall be determined on either a solids-not-fat or milkfat-milk equivalent basis, whichever is higher.

"(3) The price of milk shall be supported through the purchase of milk and the products of milk. All such purchases shall be made at the level provided under paragraph (1)(A). If funds available to the Commodity Credit Corporation to meet that portion of the cost of the price support program which is the responsibility of producers are not adequate to meet current needs, purchases of dairy products shall be made using funds otherwise available to the Commodity Credit Corporation. Such expenditure shall be deemed an advance by the Commodity Credit Corporation to the National Dairy Board which shall be liable for its repayment with interest at the same rate as payable by the Commodity Credit Corporation on its borrowings from the United States Treasury. The National Dairy Board shall make provision for repayment of any balance outstanding at the end of any fiscal year by the end of the succeeding fiscal

year. Funds for such repayment shall be provided in the manner prescribed in paragraph (1)(B) or through sales of products under the provisions of paragraph (8).

"(4)(A) If the level of price support provided for under paragraph (1)(B) is less than the level of price support provided for under paragraph (1)(A), a payment shall be made to any producer who can establish that the producer's marketings of milk during the period described in subparagraph (D) have been reduced from the level of marketings during the corresponding period of the prior fiscal year.

"(B) Prior to approving such payment, the Board shall require evidence that such reduction in marketings has taken place including a certification by the producer in a form specified by the Board, that such reduction is a net decrease in marketings of milk and has not been offset by expansion of production in other production facilities in which the person has an interest or by transfer of partial interest in the production facility or by the taking of any other action which is a scheme or device to qualify for payment.

"(C) The payment due any producer under this paragraph shall be determined by multiplying the number of hundredweights of milk by which marketings were reduced from those for the same period a year earlier by a rate in dollars per hundredweight established by the Board: *Provided*, That no refund shall be made on a quantity of milk in excess of the quantity for which the person was paid at the rate provided under paragraph (1)(B) nor shall the rate of payment exceed the difference between the level of price support provided under the paragraph (1)(A) and the level of price support under paragraph (1)(B).

"(D) The Board shall provide for application for such payment at least on a quarterly basis but not more frequently than monthly: *Provided*, That if application for payment is made for any period during the year, a year-end statement of marketings must be filed by the applicant. *Provided further*, That payments made under this section during the year shall be considered preliminary settlements for reductions in marketings. In making final settlement for the year, the Board shall base such settlements on the volume of marketings for the entire fiscal year. If, based on total marketings for the year, the Board should determine that preliminary settlements have resulted in overpayment to the producer, the producer shall repay the amount of the overpayment plus interest.

"(E) If a reduced level of support is provided under paragraph (1)(B) for consecutive fiscal years, the Board shall recognize the actions taken by persons in reducing milk marketings in any of such years preceding the current fiscal year when determining eligibility for payment in the current fiscal year: *Provided*, That if a person increases milk marketings in the current fiscal year from the year of reduced marketings, any payment made to that person shall be adjusted to reflect such increase. If a person increases marketings to a level in excess of the marketings of said person during the fiscal year immediately preceding the first fiscal year the program was effective, no payment will be made.

"(F) Eligibility for payment under this paragraph is limited to those producers who made reductions in their marketings of milk and is not transferable to any other person.

"(5) In carrying out this subsection, the Board may, on a reimbursable or nonreim-

burstable basis, as it deems appropriate, utilize—

"(A) marketing administrators appointed by the Secretary for the administration of Federal milk marketing orders promulgated under provisions of the Agricultural Adjustment Act of 1933, as reenacted and amended by the Agricultural Marketing Agreement Act of 1937;

"(B) State and county committees established under section 8 of the Soil Conservation and Domestic Allotment Act (16 U.S.C. 590h); or

"(C) administrators of State milk marketing programs.

"(6)(A) There shall be established a National Dairy Board (hereinafter referred to as the "Board") that shall consist of fifteen members plus the Secretary;

"(B) The fifteen members of the Board shall be appointed by the President with the advice and consent of the Senate. Such appointments shall be made from recommendations submitted by organizations certified by the Secretary as eligible to make such recommendations. Nominations to the initial Board shall be submitted by the President to the Senate for its advice and consent not later than January 1, 1983;

"(C) In making such appointments, the President shall take into account the geographical distribution of milk production volume throughout the United States;

"(D) The term of Board members shall be three years and no member shall be eligible to serve more than two consecutive terms: *Provided*, That in making initial appointments to the Board, the President shall designate one-third of the appointments as one-year terms, one-third of the appointments as two-year terms, and one-third of the appointments as three-year terms;

"(E) Vacancies on the Board shall be filled by the President in the same manner as initial appointments are made;

"(F) The members of the Board shall serve without compensation, if not otherwise officers of employees of the United States, except that they shall, while away from their homes or regular places of business in their performance of services for the Board, be allowed travel expenses, including per diem in lieu of subsistence, in the same manner as persons employed intermittently in the Government service are allowed expenses under sections 5701 through 5707 of title 5, United States Code.

(G) The Secretary shall certify as eligible to make recommendations for Board membership, any organization that is determined to meet the eligibility criteria established by the Secretary upon the submission of a factual report which shall contain information deemed relevant and specified by the Secretary including, but not limited to the following:

- (1) geographical territory covered by the organization's active membership;
- (2) nature and size of the organization's active membership, including the proportion of the total number of active milk producers represented by the organization;
- (3) evidence of stability and permanency of the organization;
- (4) sources from which the organization's operating funds are derived; and
- (5) functions of the organization.

(H) If the Secretary determines that a substantial number of milk producers are not members of, or their interests are not represented by any such eligible organization, nominations for the Board may be made from recommendations made by such milk producers in the manner authorized by the Secretary.

"(7)(A) At its initial meeting, the Board shall elect from its members a chairman, vice chairman, and secretary-treasurer. These officers shall have a term of one year. The Secretary shall not be eligible for service in these positions.

"(B) The chairman shall preside at all meetings of the Board and shall be responsible for supervision and direction of any personnel employed by the Board to carry out the directives of the Act.

"(C) The Vice Chairman shall, in the absence of the Chairman, preside at meetings of the Board. In the event the office of Chairman is vacated by the death, resignation, or by disqualification of the incumbent, the Vice Chairman shall assume those duties until a successor has been duly named and qualified by the Board.

"(D) The secretary-treasurer shall be responsible for maintenance of such records as may be required by the Board. In addition, the secretary-treasurer shall prepare such reports as are necessary including an annual report to the chairman of the Committee on Agriculture, Nutrition, and Forestry of the United States and the chairman of the Committee on Agriculture of the United States House of Representatives.

"(E) Regular meetings of the Board shall be held on a schedule determined by the Board. Special meetings may be called by the Chairman, by the Secretary or by a majority of the Board requesting the Chairman convene such special meeting.

"(F) The Board may issue such regulations as are necessary for the conduct of activities required by this subsection.

"(G) The Board may employ such personnel as may be required to assist in carrying out the purposes of this subsection. Such employees shall be considered employees of the Department of Agriculture, however, costs of such employment shall be met from funds available to the Board under this subsection for the conduct of its activities.

"(8) Notwithstanding any other provision of law, the Board shall have the following duties and responsibilities—

"(A) based on estimates of milk production, consumption, and Commodity Credit Corporation purchases, determine the relative proportions of milk to which the price support levels provided for in paragraph (1) shall apply;

"(B) determine the amount of the producer responsibility for dairy product purchases as determined under paragraph (2);

"(C) determine and announce prior to October 1 of each year, the level of price support under paragraph (1)(B) and the uniform rate by which the price paid farmers for milk determined to be in excess of domestic commercial market needs shall be reduced to achieve the level of price support provided for in paragraph (1)(B);

"(D) dispose of dairy products acquired by the Commodity Credit Corporation through price support operations provided for herein. Such dispositions may include, but are not limited to—

"(i) sales to the domestic commercial trade for unrestricted use: *Provided*, That in no event shall such sales be made at a price less than the higher of the current market price or 110 per centum of the currently effective price for purchase of the product by the Commodity Credit Corporation;

"(ii) transfer to Federal, State, and local government agencies for use in food assistance programs. Such programs shall include the child nutrition programs of the Department of Agriculture, elderly feeding programs, and others whether of an ongoing or

of a temporary nature designed to meet short-term conditions. Unless otherwise provided for by law, the rate of reimbursement for commodities used in such programs shall be determined by the Board: *Provided*, That dairy products, not in excess of five billion pounds (milk equivalent) made available for child nutrition programs operated by the Food and Nutrition Service of the Department of Agriculture and similar programs including those conducted under the Older Americans Act, shall be made available at the request of the Secretary without cost annually;

"(iii) sales to persons engaged in international commerce for the purpose of commercial export sales of said dairy products;

"(iv) sales and transfers of dairy products to foreign governments, agencies of foreign governments, or international agencies;

"(v) other sales or donation efforts to meet specific needs, as determined by the Board. This may include, but is not limited to, disposition of dairy products for other than unrestricted commercial use to prevent waste, deterioration, or loss of the product;

"(vi) the Board shall have authority to direct the reprocessing and, if necessary, repackaging of dairy products to facilitate operations undertaken pursuant to this paragraph;

"(E) proceeds realized from any operations undertaken pursuant to this paragraph shall be remitted to the Commodity Credit Corporation and credited to the account of the Board;

"(F) if, in the judgment of the Board, any of the operations provided for in subparagraph (D) can be more effectively carried out through products other than those purchased by the Commodity Credit Corporation or on a basis other than through purchase by the Commodity Credit Corporation and subsequent resale or transfer, the Board shall develop and announce details of such programs;

"(G) make recommendations to the Secretary regarding details of the operation of the price support program for milk; and

"(H) establish and announce the rate of the marketing reduction incentive payment provided for in paragraph (4).

"(9) The Secretary of Agriculture shall—

"(A) exercise the authority vested in the Board by this subsection until such time as the initial Board has begun functioning, but in no event later than April 1, 1983;

"(B) serve as a member of the Board;

"(C) cooperate with the Board in the performance of its duties, including providing the Board access to all pertinent economic and financial data and information necessary to the achievement of its responsibilities, and provide the Board with such facilities and support as may be determined necessary;

"(D) collect from all persons who make payment to farmers for milk and from farmers who market milk of their own production directly to consumers, the funds derived from the reduction in prices paid farmers for that portion of the national milk supply determined excess to the needs of the domestic commercial market so as to achieve the level of price support provided for in paragraph (1)(B);

"(E) provide for audit and verification to determine that all funds due have been collected and properly credited;

"(F) provide for the delivery from the inventories of the Commodity Credit Corporation dairy products acquired in the conduct of the price support program for milk. Such

deliveries shall be in the form and at the time and place directed by the Board; and

"(G) provide for the payment of obligations incurred by the Board in carrying out its responsibilities. Such obligations shall be paid from funds available to the Board under this subsection. Such payments shall be made at the direction of the Board.

"(10)(A) The district courts of the United States are vested with jurisdiction specifically to enforce, and to prevent and restrain any person from violation, any regulation issued under this subsection. Any such civil action authorized to be brought under this subsection shall be referred to the Attorney General for appropriate action: *Provided*, That nothing in this subsection may be construed as requiring the Secretary to refer to the Attorney General minor violations of this subsection whenever the Secretary believes that the administration and enforcement of this subsection would be adequately served by suitable written notice or warning to any person committing such violation.

"(B) Any person who willfully violates any provision of any regulation issued by the Secretary or the Board under this subsection, or who willfully fails or refuses to remit any amounts due thereunder shall be liable, in addition to payment of the full amount due plus interest, for a civil penalty (to be assessed by the Secretary) of not more than \$1,000 for each such violation which shall accrue to the United States and may be recovered in a civil suit brought by the United States.

"(C) The remedies provided in subsections (A) and (B) of this section shall be in addition to, and not exclusive of, the remedies otherwise provided at law or in equity.

"(11) Each producer who markets milk and each person required to make payment to the Corporation under this subsection shall keep such records and make such reports, in such manner, as the Secretary determines necessary to carry out this subsection. The Secretary may make such investigations as the Secretary deems necessary for the effective administration of this subsection or to determine whether any person subject to the provision of this subsection has engaged or is engaged or is about to engage in any act or practice that constitutes or will constitute a violation of any provision of this subsection or rule or regulation issued under this subsection. For the purpose of such investigation, the Secretary is empowered to administer oaths and affirmations, subpoena witnesses, compel their attendance, take evidence and require the production of any books, papers, and documents that are relevant to the inquiry. Such attendance of witnesses and the production of any such records may be required from any place in the United States. In case of contumacy by, or refusal to obey a subpoena to, any person, the Secretary may invoke the aid of any court of the United States within the jurisdiction of which such investigation or proceeding is carried on, or where such person resides or carries on business, in requiring the attendance and testimony of witnesses and the production of books, papers, and documents; and such court may issue an order requiring such person to appear before the Secretary, there to produce records, if so ordered, or to give testimony touching the matter under investigation. Any failure to obey such order of the court may be punished by such court as a contempt thereof. All process in any such case may be served in the judicial district whereof such person is an inhabitant or wherever such person may be found.

"(12) All operations conducted under this subsection shall be considered a program or operation of the Department of Agriculture for the purposes of section 22 of the Agricultural Adjustment Act of 1933."

Subtitle B—Dairy Promotion Act

SHORT TITLE

SEC. 110. This subtitle may be cited as the "Dairy Promotion Act".

FINDINGS AND DECLARATION OF POLICY

SEC. 111. (a) The Congress finds that—

(1) dairy products are basic foods that are a valuable part of the human diet;

(2) the production of dairy products plays a significant role in the Nation's economy; the milk from which dairy products are manufactured is produced by thousands of milk producers; and dairy products are consumed by millions of people throughout the United States;

(3) dairy products must be readily available and marketed efficiently to assure that the people of the United States receive adequate nourishment;

(4) the maintenance and expansion of existing markets for dairy products is vital to the welfare of milk producers and those concerned with marketing, using, and producing dairy products, as well as to the general economy of the Nation; and

(5) dairy products move in interstate and foreign commerce, and dairy products that do not move in such channels of commerce directly burden or affect interstate commerce in dairy products.

(b) It, therefore, is declared to be the policy of the Congress that it is essential and in the public interest to authorize the establishment, through the exercise of the powers provided herein, of an orderly procedure for the financing (through adequate assessments on all milk produced in the United States for commercial use) and the carrying out of an effective and continuous coordinated program or promotion designed to strengthen the dairy industry's position in the marketplace, and maintain and expand domestic and foreign markets and uses for dairy products produced in the United States. Nothing in this subtitle may be construed to mean, or provide for, control of production or otherwise limit the right of individual milk producers to produce milk.

DEFINITIONS

SEC. 112. As used in this subtitle—

(1) the term "Board" means the National Dairy Promotion Board established under section 114 of this subtitle;

(2) the term "Department" means the Department of Agriculture;

(3) the term "dairy products" means manufactured products for human consumption which are derived from the processing of milk, and includes fluid milk products;

(4) the term "fluid milk products" means manufactured liquid products derived from the processing of milk and customarily consumed as beverages;

(5) the term "milk" means all classes of cow's milk produced in the United States;

(6) the term "person" means any individual, group of individuals, partnership, corporation, association, cooperative, or any other entity;

(7) the term "producer" means any person engaged in the production of milk within the United States for commercial use;

(8) the term "promotion" means actions such as paid advertising, sales promotion, and publicity to advance the image and sales of, and demand for, dairy products;

(9) the term "Secretary" means the Secretary of Agriculture; and

(10) the term "United States" means the several States and the District of Columbia, the Commonwealth of Puerto Rico, the Commonwealth of the Northern Mariana Islands, and the territories and possessions of the United States.

ISSUANCE OF ORDERS

SEC. 113. (a) Whenever the Secretary has reason to believe that the issuance of a proposed dairy products promotion order will tend to effectuate the declared policy of this subtitle, the Secretary shall give due notice and opportunity for hearing upon the proposed order. Such proposal for an order may be submitted and a hearing may be requested and proposed for an order submitted by an organization certified under section 116 of this subtitle, or by any interested person affected by the provisions of the subtitle, including the Secretary.

(b) After notice and opportunity for hearing are given, as provided for in subsection (a) of this section, the Secretary shall issue a dairy products promotion order if the Secretary finds (and sets forth in such order), upon the evidence introduced at such hearing, that the issuance of such order and all the terms and conditions thereof will tend to effectuate the declared policy of this subtitle.

(c) The Secretary may, from time to time, amend dairy products promotion orders.

REQUIRED TERMS IN ORDERS

SEC. 114. Any order issued under this subtitle shall contain the following terms and conditions:

(1) Providing for the establishment and appointment by the Secretary of a National Dairy Promotion Board that shall consist of not fewer than thirty-six members; and providing for the definition of powers and duties of the Board that shall include only the powers enumerated in this section, including the powers to (A) administer such order in accordance with its terms and provisions, (B) make rules and regulations to effectuate the terms and provisions of such order, (C) receive, investigate, and report to the Secretary complaints of violations of such order, and (D) recommend to the Secretary amendments to such order. The term of an appointment to the Board shall be for three years with no member serving more than two consecutive terms, except that initial appointments shall be proportionately for two-year and three-year terms. The Board may appoint from its members an executive committee whose membership shall, to the maximum extent practicable, reflect the membership composition of the Board. Such executive committee shall have such duties and powers as are conferred upon it by the Board.

(2) Providing that members of the Board shall be milk producers appointed by the Secretary from nominations submitted by eligible organizations or associations certified under section 116 of this subtitle, or, if the Secretary determines that a substantial number of milk producers are not members of, or their interests are not represented by, any such eligible organization or association, then from nominations made by such milk producers in the manner authorized by the Secretary: *Provided*, That in making such appointments, the Secretary shall take into account, to the extent practicable, the geographical distribution of milk production volume throughout the United States. In determining geographic representation, whole States shall be used as a unit. A

region may be represented by more than one director and a region may be made up of more than one State.

(3) Providing that the Board shall develop and submit to the Secretary for approval any promotion plan or project, and that any such plan or project shall take effect only if approved by the Secretary.

(4) Providing that the Board shall submit to the Secretary for approval budgets, on a fiscal period basis, of its anticipated expenses and disbursements in the administration of the order, including probable costs of dairy product promotion projects.

(5) Providing that each milk producer shall pay, at the plant of first receipt, an assessment based upon the number of hundredweights of milk for commercial use, handled for the account of the producer, in the manner as prescribed by the order, for the expenses and expenditures (including provision for a reasonable reserve and those administrative costs incurred by the Department after an order has been promulgated under this subtitle), as the Secretary finds are reasonable and likely to be incurred by the Board under the order during any period specified by the Secretary. The operator of such plant shall collect such assessment from the producer and shall pay the sum to the Board in the manner as prescribed by the order. The rate of assessment prescribed by the order shall be five cents per hundredweight of milk for commercial use, or the equivalent thereof. To facilitate the collection of such assessments, the order or the Board may designate different operators of plants or classes of such operators to recognize differences in marketing practices or procedures used in the industry. The Secretary may maintain a suit against any person subject to the order for the collection of such assessment, and the several district courts of the United States are hereby vested with jurisdiction to entertain such suits regardless of the amount in controversy.

(6) Providing that the Board shall maintain such books and records (which shall be available to the Secretary for inspection and audit) and prepare and submit such reports from time to time to the Secretary, as the Secretary may prescribe, including reports requiring an appropriate accounting by the Board with respect to the receipt and disbursement of all funds entrusted to it.

(7) Providing that the Board, with the approval of the Secretary, may enter into contracts or agreements for the development and conduct of the activities authorized under the order under terms and conditions specified in subsection (a) of section 115 of this subtitle for the payment of the cost thereof with funds collected through the assessments under the order. Any such contract or agreement shall provide that (A) the contractors shall develop and submit to the Board a plan or project together with a budget or budgets that shall show estimated costs to be incurred for such plan or project, and (B) the plan or project shall become effective upon the approval of the Secretary, and (C) the contracting party shall keep accurate records of all of its transactions and make periodic reports to the Board of activities conducted and an accounting for funds received and expended, and such other reports as the Secretary may require.

(8) Providing that the Board, with the approval of the Secretary, may invest, pending disbursement under a plan or project, funds collected through assessments authorized under this subtitle only in obligations of the United States or any agency thereof, in gen-

eral obligations of any State or any political subdivision thereof, in any interest-bearing account or certificate of deposit of a bank that is a member of the Federal Reserve System, or in obligations fully guaranteed as to principal and interest by the United States.

(9) Providing that no funds collected by the Board under the order shall in any manner be used for the purpose of influencing any governmental policy or action, except as provided by paragraph (1)(D) of this section.

(10) Providing that the Board members shall serve without compensation, but shall be reimbursed for their reasonable expenses incurred in performing their duties as members of the Board, including a per diem allowance as recommended by the Board and approved by the Secretary.

PERMISSIVE TERMS IN ORDERS

Sec. 115. Orders issued under this subtitle may contain one or more of the following terms and conditions:

(1) Providing for the establishment, issuance, effectuation, and administration of appropriate plans or projects for advertising and promotion of the sale and consumption of dairy products, and for the disbursement of necessary funds for such purposes: *Provided*, That any such plan or project shall be directed toward the sale and marketing or use of dairy products to the end that the marketing and use of dairy products may be encouraged, expanded, improved, or made more acceptable and shall make no reference to private brand or trade name: *Provided further*, That no such advertising or sales promotion program shall make use of unfair or deceptive acts or practices with respect to the quality, value, or use of any competing product: *And provided further*, That during the two-year period beginning on the effective date of an order first issued under this section, fluid milk products may not be promoted under this subtitle.

(2) Providing that operators of plants receiving from producers milk for commercial use maintain and make available for inspection such books and records as may be required by an order issued under section 113(a) of this subtitle; and providing for the filing of reports by such persons at the time, in the manner, and having content prescribed by the order, to the end that information and data appropriate or necessary to the effectuation, administration, or enforcement of this subtitle, or any order or regulation issued under section 113(a) of this subtitle shall be made available to the Secretary: *Provided*, That all information so obtained shall be kept confidential by all officers and employees of the Department, and contracting agencies having access to such information, and only such information so furnished or acquired as the Secretary deems relevant shall be disclosed by them and then only in a suit or administrative hearing brought at the direction, or upon the request, of the Secretary, or to which the Secretary or any officer of the United States is a party, and involving the order with reference to which the information to be disclosed was furnished or acquired. Nothing in this paragraph shall be deemed to prohibit (A) the issuance of general statements, based upon the reports, or the number of persons subject to an order or statistical data collected therefrom, which statements do not identify the information furnished by any person, or (B) the publication, by direction of the Secretary, of the name of any person violating any order, to-

gether with a statement of the particular provisions of the order violated by such persons. No information obtained under the authority of this subtitle may be made available to any agency or officer of the Government for any purpose other than the implementation of this subtitle and any investigatory or enforcement actions necessary for the implementation of this subtitle. Any person violating the provisions of this subsection, upon conviction, shall be subject to a fine of not more than \$1,000, or to imprisonment for not more than one year, or to both, and, if an officer or employee of the Board or the Department, shall be removed from office.

(3) Providing terms and conditions incidental to and not inconsistent with the terms and conditions specified in this subtitle and necessary to effectuate the other provisions of such order.

CERTIFICATION OF ORGANIZATIONS

Sec. 116. (a) The eligibility of any organization to represent milk producers, to request the issuance of an order under section 113(a) of this subtitle and to participate in the making of nominations under section 114(2) of this subtitle shall be certified by the Secretary. The Secretary shall certify any organization that the Secretary determines meets the eligibility criteria established by the Secretary under this section, and the Secretary's determination as to eligibility shall be final.

(b) Certification shall be based, in addition to other available information, upon a factual report submitted by the organization, which shall contain information deemed relevant and specified by the Secretary for the making of such determination, including the following:

(1) The geographic territory covered by the organization's active membership.

(2) The nature and size of the organization's active membership, including the proportion of the total number of active milk producers represented by the organization.

(3) Evidence of stability and permanency of the organization;

(4) Identification of the sources from which the organization's operating funds are derived.

(5) The functions of the organization.

(6) A statement describing the organization's ability and willingness to further the aims and objectives of this subtitle.

The primary considerations in determining the eligibility of an organization shall be whether its membership consists primarily of milk producers who produce a substantial volume of milk and whether the primary or overriding interest of the organization is in the production of milk and dairy products.

REQUIREMENT OF REFERENDUM

Sec. 117. (a) The Secretary shall conduct a referendum as soon as practicable among producers who during a representative period (as determined by the Secretary), have been engaged in the production of milk for commercial use for the purpose of ascertaining whether the issuance of an order is approved or favored by the producers. No order issued under this subtitle may be effective unless the Secretary determines that the issuance of such order is approved or favored by not less than one-half of the producers voting in the referendum.

(b) The Secretary shall be reimbursed from assessments collected by the Board for any expenses (other than salary payments to Government employees) incurred for the conduct of the referendum.

SUSPENSION AND TERMINATION OF ORDERS

SEC. 118. (a) The Secretary shall, whenever the Secretary finds that any order issued under this subtitle or any provision thereof obstructs or does not tend to effectuate the declared policy of this subtitle, terminate or suspend the operation of such order or such provisions thereof.

(b) The Secretary may conduct a referendum at any time, and shall hold a referendum on request of a representative group comprising 10 per centum or more of the number of producers subject to the order, to determine whether the producers favor the termination or suspension of the order. The Secretary shall suspend or terminate the order within six months after the Secretary determines that suspension or termination of the order is approved or favored by a majority of the producers voting in the referendum who, during a representative period (as determined by the Secretary), have been engaged in the production of milk for commercial use.

(c) Prior to the fifth anniversary of any order issued under this subtitle, the Secretary shall conduct a referendum to determine if producers support continuation of such order. The Secretary shall terminate such order unless its continuation is approved or favored by a majority of producers voting in the referendum who, during a representative period (as determined by the Secretary), have been engaged in the production of milk for commercial use.

(d) The termination or suspension of any order, or any provision thereof, shall not be considered an order within the meaning of this subtitle.

COOPERATIVE ASSOCIATION REPRESENTATION

SEC. 119. Whenever, pursuant to the provisions of this subtitle, the Secretary is required to determine the approval or disapproval of producers, the Secretary shall consider the approval or disapproval by any bona fide cooperative association of producers, engaged in marketing milk or dairy products as the approval or disapproval of the producers who are members of or under contract with such cooperative association of producers: *Provided*, That if a cooperative association of producers elects to exercise this prerogative on behalf of its members, such cooperative association shall provide each producer on whose behalf the cooperative association is expressing approval or disapproval a description of the question presented in the referendum together with a statement of the manner in which the cooperative association vote was cast on behalf of the membership. Such information shall inform the producer of procedures to follow to cast an individual ballot should such producer choose to vote. Such individual ballots shall be tabulated by the Secretary and the vote of the cooperative association shall be adjusted to reflect such individual voters.

PETITION AND REVIEW

SEC. 120. (a) Any person subject to any order may file, with the Secretary a petition stating that any such order, any provision of such order, or any obligation imposed in connection with such order is not in accordance with law and praying for a modification thereof or for an exemption therefrom. The petitioner shall thereupon be given an opportunity for a hearing upon such petition, in accordance with regulations issued by the Secretary. After such hearing, the Secretary shall make a ruling upon the prayer of such petition, which shall be final, if in accordance with law.

(b) The district courts of the United States in any district in which such person is an inhabitant, or carries on business, are hereby vested with jurisdiction to review such ruling, if a complaint for the purpose is filed within twenty days from the date of the entry of such ruling. Service of process in such proceedings may be had upon the Secretary by delivering a copy of the complaint to the Secretary. If the court determines that such ruling is not in accordance with law, it shall remand such proceedings to the Secretary with directions either (1) to make such ruling as the court shall determine to be in accordance with law, or (2) to take such further proceedings as, in its opinion, the law requires.

ENFORCEMENT

SEC. 121. (a) The district courts of the United States are vested with jurisdiction specifically to enforce, and to prevent and restrain any person from violating, any order or regulation made or issued under this subtitle. Any such civil action authorized to be brought under this subsection shall be referred to the Attorney General for appropriate action: *Provided*, That nothing in this subtitle may be construed as requiring the Secretary to refer to the Attorney General minor violations of this subtitle whenever the Secretary believes that the administration and enforcement of this subtitle would be adequately served by suitable written notice or warning to any person committing such violation.

(b) Any person who willfully violates any provision of any order issued by the Secretary under this subtitle or who willfully fails or refuses to remit any assessment or fee duly required thereunder, shall be liable to a penalty (to be assessed by the Secretary) of not more than \$1,000 for each such violation which shall accrue to the United States and may be recovered in a civil suit brought by the United States.

(c) The remedies provided in subsections (a) and (b) of this section shall be in addition to, and not in lieu of, the remedies otherwise provided at law or in equity.

INVESTIGATIONS; POWER TO SUBPENA AND TAKE OATHS AND AFFIRMATION; AID OF COURTS

SEC. 122. The Secretary may make such investigations as the Secretary deems necessary for the effective administration of this subtitle or to determine whether any person subject to the provisions of this subtitle has engaged or is about to engage in any act or practice that constitutes or will constitute a violation of any provision of this subtitle or of any order, rule, or regulation issued under this subtitle. For the purpose of such investigation, the Secretary is empowered to administer oaths and affirmations, subpoena witnesses, compel their attendance, take evidence and require the production of any books, papers, and documents that are relevant to the inquiry. Such attendance of witnesses and the production of any such records may be required from any place in the United States. In case of contumacy by, or refusal to obey a subpoena to, any person, the Secretary may invoke the aid of any court of the United States within the jurisdiction of which such investigation or proceeding is carried on, or where such person resides or carries on business, in requiring the attendance and testimony of witnesses and the production of books, papers, and documents. Such court may issue an order requiring such person to appear before the Secretary, there to produce records, as so ordered, or to give testimony touching the matter under investigation. Any failure to

obey such order of the court may be punished by such court as a contempt thereof. All process in any such case may be served in the judicial district whereof such person is an inhabitant or wherever such person may be found.

ADMINISTRATIVE PROVISIONS

SEC. 123. (a) Nothing in this subtitle may be construed to preempt or supersede any other program relating to dairy product promotion organized and operating under the laws of the United States or any State.

(b) The provisions of this subtitle applicable to orders shall be applicable to amendments to orders.

AUTHORIZATIONS

SEC. 124. There are hereby authorized to be appropriated such sums as may be necessary to carry out the provisions of this subtitle. Sums authorized to be appropriated by this subtitle shall not be available for payment of the expenses or obligation incurred by the Board in administering any order issued under this subtitle.

Subtitle C—Donation of Dairy Products

SEC. 130. Section 416 of the Agricultural Act of 1949 is amended by adding at the end thereof the following: "Notwithstanding any other provision of law, such dairy products may be donated for distribution to needy households in the United States. Such dairy products may also be donated through foreign governments and public and nonprofit private humanitarian organizations for the assistance of needy persons outside the United States, and the Commodity Credit Corporation may pay, with respect to commodities so donated, reprocessing, packaging, transporting, handling, and other charges, including the cost of overseas delivery."

TITLE II—ADJUSTMENT PROGRAM FOR THE 1983 CROPS OF WHEAT, FEED GRAINS, UPLAND COTTON AND RICE

1983 CROP WHEAT LOANS

SEC. 201. Section 107B(a) of the Agricultural Act of 1949 is amended by adding at the end thereof the following: "Notwithstanding the foregoing provision of this subsection, the Secretary shall make available to producers loans and purchases for the 1983 crop of wheat at not less than \$3.80 per bushel."

1983 CROP WHEAT ACREAGE REDUCTION AND DIVERSION PROGRAM

SEC. 202. Section 107B(e)(1) of the Agricultural Act of 1949 is amended by—

(1) striking out in the first sentence "Notwithstanding any other provision of this section, the" and inserting in lieu thereof "Notwithstanding any other provision of law—

"(A) Except as provided in subparagraph (B) of this paragraph, the"; and

(2) adding at the end thereof the following:

"(B) For the 1983 crop of wheat the Secretary shall provide for a combination of (i) an acreage limitation program as described under paragraph (2) or a set-aside program as described under paragraph (3) and (ii) a diversion program as described under paragraph (5) under which the acreage planted to wheat on the farm would be limited to the acreage base for the farm reduced by a total of 25 per centum, consisting of a reduction of 15 per centum under the acreage limitation or set-aside program and a reduction of 10 per centum under the diversion program. As a condition of eligibility for

loans, purchases and payments on the 1983 crop of wheat, the producers on a farm must comply with the terms and conditions of the combined acreage limitation or set-aside program and diversion program."

WHEAT ACREAGE BASE

SEC. 203. Section 107B(e)(2) of the Agricultural Act of 1949 is amended by inserting immediately after the fifth sentence the following: "Notwithstanding any other provision of this paragraph, the acreage base to be used for the farm under the programs for the 1983, 1984, and 1985 crops of wheat shall be the same as the acreage base applicable to the farm under the acreage limitation program for the 1982 crop, adjusted to reflect established crop-rotation practices and to reflect such other factors as the Secretary determines should be considered in determining a fair and equitable base: *Provided*, That the acreage base for each wheat producing farm that follows a normal summer-fallow crop rotational practice and has a 3-year history of such practice shall be calculated by multiplying one-half the announced acreage limitation or set-aside percentage by the acreage annually idled and devoted to conservation practices and adding the result to the acreage planted on the farm to wheat for harvest in the crop year immediately preceding the year for which the determination is made or, at the discretion of the Secretary, the average acreage planted to wheat for harvest in the two crop years immediately preceding the year for which the determination is made."

1983 CROP RETIREMENT AND CONSERVATION PAYMENTS FOR WHEAT

SEC. 204. Section 107B(e)(5) of the Agricultural Act of 1949 is amended by adding at the end thereof the following: "Notwithstanding the foregoing provision of this paragraph, the Secretary shall make crop retirement and conservation payments available to any producer of the 1983 crop of wheat who participates in the acreage limitation or set-aside program for such crop of wheat under paragraph (2) or (3) of this subsection, as applicable, if the permitted acreage for the farm as determined under such paragraph is reduced by an amount equivalent to 10 per centum of the acreage base for the farm in addition to the reduction under such paragraph, and the producer devotes to approved conservation uses an equivalent acreage of cropland in addition to the acreage devoted to conservation uses under such paragraph. Such payments shall be made in an amount computed by multiplying (i) the rate of \$3.00 per bushel by (ii) the farm program payment yield for the crop, by (iii) the additional acreage diverted under this subsection. The Secretary shall make not less than 50 per centum of any payments under this paragraph to producers of the 1983 crop as soon as practicable after a producer enters into a land diversion contract with the Secretary and in advance of any determination of performance. If a producer fails to comply with a land diversion contract after obtaining an advance payment under this paragraph, subject to the provisions of subsection (f), the producer shall repay the advance immediately and, in accordance with regulations issued by the Secretary, pay interest on the advance."

1983 FEED GRAIN LOANS

SEC. 205. Section 105B(a)(1) of the Agricultural Act of 1949 is amended by inserting at the end thereof the following: "Notwithstanding the foregoing provision of this subsection, the Secretary shall make available

to producers loans and purchases for the 1983 crop of corn at not less than \$2.71 per bushel."

1983 CROP FEED GRAIN ACREAGE REDUCTION AND DIVERSION PROGRAM

SEC. 206. Section 105B(e)(1) of the Agricultural Act of 1949 is amended by—

(1) striking out in the first sentence "Notwithstanding any other provision of this section, the" and inserting in lieu thereof "Notwithstanding any other provision of law—

"(A) Except as provided in subparagraph (B) of this paragraph, the"; and

(2) adding at the end thereof the following:

"(B) If on October 15, 1982, the Secretary estimates that the 1982 crop of corn will be in excess of 7.3 billion bushels, the Secretary shall announce on such date that there will be in effect for the 1983 crop of feed grains a combination of (i) an acreage limitation program as described under paragraph (2) or a set-aside program as described under paragraph (3) and (ii) a diversion program as described under paragraph (5) under which the acreage planted to feed grains on the farm would be limited to the acreage base for the farm reduced by a total of 20 per centum, consisting of a reduction of 10 per centum under the acreage limitation or set-aside program and a reduction of 10 per centum under the diversion program. As a condition of eligibility for loans, purchases and payments on the 1983 crop of feed grains, the producers on a farm must comply with the terms and conditions of the combined acreage limitation or set-aside program and diversion program."

FEED GRAINS ACREAGE BASE

SEC. 207. Section 105B(e)(2) of the Agricultural Act of 1949 is amended by inserting immediately after the sixth sentence the following: "Notwithstanding any other provision of this paragraph, the acreage base to be used for the farm under programs for the 1983, 1984, and 1985 crops of feed grains shall be the same as the acreage base applicable to the farm under the acreage limitation program for the 1982 crop, adjusted to reflect established crop-rotation practices and to reflect such other factors as the Secretary determines should be considered in determining a fair and equitable base: *Provided*, That the acreage base for each feed grain producing farm that follows a normal summer-fallow crop rotational practice and has a 3-year history of such practice shall be calculated by multiplying one-half the announced acreage limitation or set-aside percentage by the acreage annually idled and devoted to conservation practices and adding the result to the acreage planted on the farm to feed grains for harvest in the crop year immediately preceding the year for which the determination is made or, at the discretion of the Secretary, the average acreage planted to feed grains for harvest in the two crop years immediately preceding the year for which the determination is made."

1983 CROP RETIREMENT AND CONSERVATION PAYMENTS FOR FEED GRAINS

SEC. 208. Section 105B(e)(5) of the Agricultural Act of 1949 is amended by adding at the end thereof the following: "Notwithstanding the foregoing provision of this paragraph, if the Secretary announces under paragraph (1)(B) of this subsection that there will be in effect a diversion program on the 1983 crop of feed grains, the Secretary shall make crop retirement and conservation payments available to any pro-

ducer of the 1983 crop of feed grains who participates in the acreage limitation or set-aside program for such crops of feed grains under paragraph (2) or (3) of this subsection, as applicable, if the permitted acreage for the farm as determined under such paragraph is reduced by an amount equivalent to 10 per centum of the acreage base for the farm in addition to the reduction under such paragraph, and the producer devotes to approved conservation uses an equivalent acreage of cropland in addition to the acreage devoted to conservation uses under such paragraph. Such payment shall be made in an amount computed by multiplying (i) the payment rate, by (ii) the farm program payment yield for the crop, by (iii) the additional acreage diverted under this subsection. The payment rate for corn shall be in the amount of \$1.50 per bushel and in the case of grain sorghums, oats, and, if designated by the Secretary, barley shall be such rate as the Secretary determines fair and reasonable in relation to the rate at which payments are made available for corn. The Secretary shall make not less than 50 per centum of any payments under this paragraph to producers of the 1983 crop as soon as practicable after a producer enters into a land diversion contract with the Secretary and in advance of any determination of performance. If a producer fails to comply with a land diversion contract after obtaining an advance payment under this paragraph, subject to the provisions of subsection (f), the producer shall repay the advance immediately and, in accordance with regulations issued by the Secretary, pay interest on the advance."

1983 CROP UPLAND COTTON ACREAGE REDUCTION PROGRAM

SEC. 209. Section 103(g)(9)(A) of the Agricultural Act of 1949 is amended by—

(1) inserting immediately after the third sentence the following: "If the Secretary shall make the determination referred to in the first sentence of this subparagraph for the 1983 crop of upland cotton and establish an acreage reduction program for such crop, the Secretary shall provide that 25 per centum of any reduction required in the acreage base for the farm shall be made under the diversion program provided in subparagraph (B) and the balance of the reduction shall be made under an acreage limitation program as provided in this subparagraph. In such event, as a condition of eligibility for loans, purchases and payments on the 1983 crop of upland cotton the producers on a farm must comply with the combined acreage limitation and diversion program."

(2) inserting immediately after the eighth sentence (after the addition of paragraph (1) of this amendment) the following: "Notwithstanding any other provision of this subparagraph, the acreage base to be used for the farm under the programs for the 1983, 1984, and 1985 crops of upland cotton shall be the same as the acreage base applicable to the farm under the acreage limitation program for the 1982 crop, adjusted to reflect established crop-rotation practices and to reflect such other factors as the Secretary determines should be considered in determining a fair and equitable base."

1983 CROP RETIREMENT AND CONSERVATION PAYMENTS FOR UPLAND COTTON

SEC. 210. Section 103(g)(9)(B) of the Agricultural Act of 1949 is amended by adding at the end thereof the following: "Notwithstanding the foregoing provision of this paragraph, the Secretary shall make crop

retirement and conservation payments available to any producer of the 1983 crop of upland cotton who participates in the acreage limitation program for such crop of upland cotton under subparagraph (A), if the permitted acreage for the farm as determined under such subparagraph is reduced by an amount equivalent to the reduction required by the Secretary to be made under this subparagraph in addition to the reduction made under the acreage limitation program, and the producer devotes to approved conservation uses an equivalent acreage of cropland in addition to the acreage devoted to conservation uses under such acreage limitation program. Such payments shall be made in an amount computed by multiplying (i) the rate of \$.25 per pound by (ii) the farm program payment yield for the crop, by (iii) the additional acreage diverted under this subparagraph. The Secretary shall make not less than 50 per centum of any payments under this subparagraph to producers of the 1983 crop as soon as practicable after a producer enters into a land diversion contract with the Secretary and in advance of any determination of performance. If a producer fails to comply with a land diversion contract after obtaining an advance payment under this subparagraph, subject to the provisions of paragraph (13), the producer shall repay the advance immediately and, in accordance with regulations issued by the Secretary, pay interest on the advance."

1983 CROP RICE ACREAGE REDUCTION AND DIVERSION PROGRAM

SEC. 211. Section 101(i)(5)(A) of the Agricultural Act of 1949 is amended by—

(1) striking out in the first sentence "Notwithstanding any other provision of this section, the" and inserting in lieu thereof "Notwithstanding any other provision of law, except as provided in the third and fourth sentences of this paragraph, the";

(2) inserting immediately after the second sentence of this paragraph the following: "If on November 15, 1982, the Secretary estimates that the 1982 crop of rice will be in excess of 145 million hundredweight, rough rice basis, the Secretary shall announce on such date that there will be in effect for the 1983 crop of rice a combination of (i) an acreage limitation program as described in this paragraph and (ii) a diversion program as described under paragraph (B) under which the acreage planted to rice on the farm would be limited to the acreage base for the farm reduced by a total of 25 per centum, consisting of a reduction of 15 per centum under the acreage limitation program and a reduction of 10 per centum under the diversion program. As a condition of eligibility for loans, purchases and payments on the 1983 crop of rice, the producers on a farm must comply with the terms and conditions of the combined acreage limitation and diversion program."; and

(3) inserting immediately after the ninth sentence (after the addition of paragraph (2) of this amendment) the following: "Notwithstanding any other provision of this subparagraph, the acreage base to be used for the farm under programs for the 1983, 1984, and 1985 crops of rice shall be the same as the acreage base applicable to the farm under the acreage limitation program for the 1982 crop, adjusted to reflect established crop-rotation practices and to reflect such other factors as the Secretary determines should be considered in determining a fair and equitable base."

1983 CROP RETIREMENT AND CONSERVATION PAYMENTS FOR RICE

SEC. 212. Section 101(i)(5)(B) of the Agricultural Act of 1949 is amended by adding at the end thereof the following: "Notwithstanding the foregoing provision of this paragraph, if the Secretary announces that there will be in effect a diversion program on the 1983 crop of rice, the Secretary shall make crop retirement and conservation payments available to any producer of the 1983 crop of rice who participates in the acreage limitation program for such crop of rice under subparagraph (A), if the permitted acreage for the farm is reduced by an amount equivalent to 10 per centum of the acreage base for the farm in addition to the reduction under subparagraph (A), and the producer devotes to approved conservation uses an equivalent acreage of cropland in addition to the acreage devoted to conservation uses under such subparagraph. Such payment shall be made in an amount computed by multiplying (i) a payment rate of \$3.00 per hundredweight by (ii) the farm program payment yield for the crop, by (iii) the additional acreage diverted under this subparagraph. The Secretary shall make not less than 50 per centum of any payments under this subparagraph to producers of the 1983 crop as soon as practicable after a producer enters into a land diversion contract with the Secretary and in advance of any determination of performance. If a producer fails to comply with a land diversion contract after obtaining an advance payment under this subparagraph, subject to the provisions of paragraph (8), the producer shall repay the advance immediately and, in accordance with regulations issued by the Secretary, pay interest on the advance."

TITLE III—FOOD STAMP ACT AMENDMENTS OF 1982

SHORT TITLE

SEC. 301. This title may be cited as the "Food Stamp Act Amendments of 1982."

HOUSEHOLD DEFINITION

SEC. 302. Section 3(i) of the Food Stamp Act of 1977 (7 U.S.C. 2012(i)) is amended by—

(1) in the first sentence, striking out "parents and children" and inserting in lieu thereof "parents and children, or siblings,"; and inserting "or siblings" after "the parents"; and

(2) inserting after the first sentence a new sentence as follows: "Notwithstanding paragraph (1) of the preceding sentence, an individual who lives with others, who is 60 years of age or older, and who is unable to purchase food and prepare meals because such individual suffers, as certified by a licensed physician, from a disability which would be considered a permanent disability under section 221(i) of the Social Security Act (42 U.S.C. 421(i)) or from severe, permanent, and disabling physical or mental infirmity which is not symptomatic of a disease shall be considered, together with any of the others who is the spouse of such individual, an individual household without regard to the purchase of food and preparation of meals if the income of the others (as computed under section 5(d) for purposes of determining, without regard to such individual and spouse, eligibility to receive food stamp benefits) does not exceed 165 per centum of the applicable nonfarm income poverty guideline prescribed by the Office of Management and Budget, adjusted as described in section 5(c), for a household excluding such individual and spouse."

ROUNDING DOWN

SEC. 303. (a) The second sentence of section 3(o) of the Food Stamp Act of 1977 (7 U.S.C. 2012(o)) is amended by—

(1) in clause (1), inserting "(based on the unrounded cost of such diet)" after "adjustments"; and

(2) in each of clauses (6) and (7), striking out "nearest dollar increment" each place it appears and inserting in lieu thereof "nearest lower dollar increment for each household size".

(b) Section 5(e) of the Food Stamp Act of 1977 (7 U.S.C. 2014(e)) is amended by—

(1) in the second sentence, striking out "nearest \$5 increment" each place it appears and inserting in lieu thereof "nearest lower dollar increment"; and

(2) in the proviso to clause (2) of the fourth sentence, striking out "nearest \$5 increment" each place it appears and inserting in lieu thereof "nearest lower dollar increment".

(c) The first sentence of section 8(a) of the Food Stamp Act of 1977 (7 U.S.C. 2017(a)) is amended by inserting "lower" after "nearest".

DISABLED VETERANS AND SURVIVORS

SEC. 304. (a) Section 3 of the Food Stamp Act of 1977 (7 U.S.C. 2012) is amended by adding at the end thereof a new subsection as follows:

"(r) 'Elderly or disabled member' means a member of a household who—

"(1) is sixty years of age or older;
 "(2) receives supplemental security income benefits under title XVI of the Social Security Act (42 U.S.C. 1381 et seq.);
 "(3) receives disability or blindness payments under title I, II, X, XIV, or XVI of the Social Security Act (42 U.S.C. 301 et seq.);

"(4) is a veteran who—

"(A)(i) has a wartime disability, peacetime disability, or disability by treatment or vocational rehabilitation, which is rated as total under section 314, 334, or 351, respectively, of title 38, United States Code; or

"(ii) is considered in need of regular aid and attendance or permanently housebound under any such section; or

"(iii) is considered permanently and totally disabled, in need of regular aid and attendance, or permanently housebound under subsection (a), (b), or (c), respectively, of section 502 of title 38, United States Code;

"(5) is a surviving spouse of a veteran and—

"(A) is considered in need of regular aid and attendance or permanently housebound under subsection (d) or (e), respectively, of section 541 of title 38, United States Code; or

"(B) receives veterans' compensation for a service-connected death or pension benefits for a non-service-connected death under section 321 or subchapter III of chapter 15, respectively, of title 38, United States Code, and has a disability considered permanent under section 221(i) of the Social Security Act (42 U.S.C. 421(i)); or

"(6) is a child of a veteran and—

"(A) is considered permanently incapable of self-support under section 414 of title 38, United States Code; or

"(B) receives veterans' compensation for a service-connected death or pension benefits for a non-service-connected death under section 321 or subchapter III of chapter 15, respectively, of title 38, United States Code, and has a disability considered permanent

under section 221(l) of the Social Security Act (42 U.S.C. 421(l)).

(b) The first sentence of section 3(i) of the Food Stamp Act of 1977 (7 U.S.C. 2012(i)) is amended by striking out "sixty" and all that follows through "Act" the second place it appears and inserting in lieu thereof "an elderly or disabled member".

(c) Section 5(c)(1) of the Food Stamp Act of 1977 (7 U.S.C. 2014(c)(1)) is amended by striking out "a member who is" and all that follows through "Act" the second place it appears and inserting in lieu thereof "an elderly or disabled member".

(d) Section 5(e) of the Food Stamp Act of 1977 (7 U.S.C. 2014(e)) is amended by—

(1) in the fourth sentence, striking out "a member" and all that follows through "Act" the second place it appears and inserting in lieu thereof "an elderly or disabled member";

(2) in the fifth sentence—

(A) striking out "a member" and all that follows through "Act" the second place it appears and inserting in lieu thereof "an elderly or disabled member"; and

(B) in clause (A), striking out "household" and all that follows through "Act" the second place it appears and inserting in lieu thereof "elderly or disabled members".

(e) The first sentence of section 6(c)(1) of the Food Stamp Act of 1977 (7 U.S.C. 2015(c)(1)) is amended by striking out "sixty years" and all that follows through "Act" the second place it appears and inserting in lieu thereof "elderly or disabled".

COORDINATION OF COST-OF-LIVING ADJUSTMENTS

Sec. 305. Section 5(d) of the Food Stamp Act of 1977 (7 U.S.C. 2014(d)) is amended by—

(1) at the end of clause (10), striking out "and"; and

(2) adding before the period at the end thereof the following: ", and (12) through September 30 of any fiscal year, any increase in income attributable to a cost-of-living adjustment made on or after July 1 of such fiscal year under titles II or XVI of the Social Security Act (42 U.S.C. 401 et seq.), section 3(a)(1) of the Railroad Retirement Act of 1974 (45 U.S.C. 231b(a)(1)), or section 3112 of title 38, United States Code, if the household was certified as eligible to participate in the food stamp program or received an allotment in the month immediately preceding the adjustment".

ADJUSTMENT OF DEDUCTIONS

Sec. 306. Section 5(e) of the Food Stamp Act of 1977 (7 U.S.C. 2014(e)) is amended by—

(1) in clause (1) in the second sentence, striking out "July 1, 1983" and inserting in lieu thereof "October 1, 1983"; and

(2) in subdivision (i) of the proviso to clause (2) in the fourth sentence, striking out "July 1, 1983" and inserting in lieu thereof "October 1, 1983".

STANDARD UTILITY ALLOWANCES

Sec. 307. Section 5(e) of the Food Stamp Act of 1977 (7 U.S.C. 2014(e)) is amended by—

(1) inserting after the fourth sentence the following: "In computing the excess shelter expense deduction under clause (2) of the preceding sentence, a State agency may use a standard utility allowance in accordance with regulations promulgated by the Secretary, except that a State agency may use an allowance which does not fluctuate within a year to reflect seasonal variations. An allowance for a heating or cooling expense may not be used for a household that does not

incur a heating or cooling expense, as the case may be, or does incur a heating or cooling expense but is located in a public housing unit which has central utility meters and charges households with regard to such expense only for excess utility costs. No such allowance may be used for a household that shares such expense with, and lives with, another individual not participating in the food stamp program, another household participating in the food stamp program, or both, unless the allowance is prorated between the other individual, household, or both."; and

(2) in subclause (B) of the last sentence, striking out "preceding sentence" and inserting in lieu thereof "fourth sentence of this subsection".

AVERAGING INCOME

Sec. 308. Section 5(f)(1) of the Food Stamp Act of 1977 (7 U.S.C. 2014(f)(1)) is amended by inserting after subparagraph (B) a new subparagraph as follows:

"(C) In computing household income under this section, household income that is received on a regular weekly or biweekly basis from the same source(s) shall be converted to a monthly amount."

MIGRANT FARMWORKERS

Sec. 309. The last sentence of section 5(f)(4) of the Food Stamp Act of 1977 (7 U.S.C. 2014(f)(4)) is amended by inserting after "subsection" the following: "(except the provisions of paragraph (2)(A) of this subsection relating to migrant farmworker households)".

ELIMINATION OF STUDIES AND REPORTS

Sec. 310. (a) The second sentence of section 5(g) of the Food Stamp Act of 1977 (7 U.S.C. 2014(g)) is amended by striking out "(1)" and ", and (2)" and all that follows through "1978".

(b) Section 8(a) of the Food Stamp Act of 1977 (7 U.S.C. 2017(a)) is amended by striking out the last sentence.

(c) Section 17 of the Food Stamp Act of 1977 (7 U.S.C. 2026) is amended by—

(1) striking out subsections (d) and (e); and

(2) redesignating subsection (f) as subsection (d).

CATEGORICAL ELIGIBILITY

Sec. 311. Section 5 of the Food Stamp Act of 1977 (7 U.S.C. 2014) is amended by adding at the end thereof a new subsection as follows:

"(j) Notwithstanding subsections (a) through (i), a State agency may consider a household in which all members of the household receive benefits under a State plan approved under part A of title IV of the Social Security Act (42 U.S.C. 601 et seq.) and whose income does not exceed the applicable income standard of eligibility described in subsection (c) to have satisfied the resource requirements prescribed under subsection (g)."

IMPROVEMENT IN COST-EFFECTIVENESS OF MONTHLY REPORTING SYSTEMS

Sec. 312. The first sentence of section 6(c)(1) of the Food Stamp Act of 1977 (7 U.S.C. 2015(c)(1)) is amended by—

(1) inserting "adult" between "all" and "members"; and

(2) adding, after "Secretary", the following: ", except that with the prior approval of the Secretary, a State agency may select categories of households which may report at specified less frequent intervals upon the State agency's showing to the satisfaction of the Secretary that to require households in such categories to report monthly would

result in unwarranted expenditures for administration of this subsection".

REQUIREMENTS APPLICABLE TO JOB SEARCH

Sec. 313. Section 6(d)(1)(ii) of the Food Stamp Act of 1977 (7 U.S.C. 2015(d)(1)(ii)) is amended by inserting, after "Secretary", the following: ", which may include a requirement that, at the option of the State agency, such reporting and inquiry commence at the time of application".

VOLUNTARILY QUITTING A JOB

Sec. 314. Section 6(d)(1)(iii) of the Food Stamp Act of 1977 (7 U.S.C. 2015(d)(1)(iii)) is amended by striking out "sixty days" in the proviso and inserting in lieu thereof "ninety days".

ALTERNATIVE ISSUANCE SYSTEM

Sec. 315. Section 7 of the Food Stamp Act of 1977 (7 U.S.C. 2016) is amended by inserting at the end thereof a new subsection as follows:

"(g) The Secretary may require State agencies—

"(1) to issue or deliver coupons using alternative methods, including an automatic data processing and information retrieval system; or

"(2) to issue, in lieu of coupons, a reusable document to be used as part of an automatic data processing and information retrieval system and to be presented by, and returned to, recipients at retail food stores for the purpose of purchasing food;

if the Secretary determines, in consultation with the Inspector General of the Department of Agriculture, that the use of such document or such system is necessary to improve the integrity of the food stamp program: *Provided*, That the cost of such document or system shall not be imposed upon retail food stores participating in the food stamp program."

ELIMINATION OF INITIAL MONTH ALLOTMENTS OF UNDER TEN DOLLARS

Sec. 316. The first sentence of section 8(c) of the Food Stamp Act of 1977 (7 U.S.C. 2017(c)) is amended by inserting before the period at the end thereof the following: ", except that no allotment may be issued to a household for the initial month or period if the value of the allotment which such household would otherwise be eligible to receive under this subsection is less than \$10".

DISCLOSURE OF INFORMATION

Sec. 317. Section 11(e)(8) of the Food Stamp Act of 1977 (7 U.S.C. 2020(e)(8)) is amended by inserting before ", except that (A)" the following: "or of direct Federal assistance programs and Federally-assisted State programs".

EXPEDITED SERVICE

Sec. 318. Section 11(e)(9) of the Food Stamp Act of 1977 (7 U.S.C. 2020(e)(9)) is amended to read as follows:

"(9) that a destitute migrant or a seasonal farm worker household in accordance with the regulations governing such households in effect July 1, 1982, and any other household in immediate need because of no income as defined in sections 5(d) and (e) of this Act receive coupons on an expedited basis;"

PROMPT REDUCTION OR TERMINATION OF BENEFITS

Sec. 319. Section 11(e)(10) of the Food Stamp Act of 1977 (7 U.S.C. 2020(e)(10)) is amended by inserting after "earlier" the following: ", except that in any case in which the State agency receives from the household a written statement containing infor-

mation that clearly requires a reduction or termination of the household's benefits, the State agency may act immediately to reduce or terminate the household's benefits and may provide notice of its action to the household as late as the date on which the action becomes effective".

DUPLICATION OF BENEFITS

SEC. 320. Section 11(e) of the Food Stamp Act of 1977 (7 U.S.C. 2020(e)) is amended by—

(1) in paragraph (16), striking out the period at the end thereof and inserting in lieu thereof a semicolon;

(2) in paragraph (20), striking out "and" at the end thereof;

(3) in paragraph (21), striking out the period at the end thereof and inserting in lieu thereof "; and"; and

(4) adding at the end thereof a new paragraph as follows:

"(22) that the State agency shall determine, not less frequently than annually—

"(A) whether households participating in the food stamp program include as members individuals who, under section 6(g), may not be considered members of such households; and

"(B) whether households participating in projects conducted under section 17(b)(1) receive both coupons and any assistance provided under such projects in lieu of coupons."

ERROR RATE REDUCTION SYSTEM

SEC. 321. (a) Section 16 of the Food Stamp Act of 1977 (7 U.S.C. 2025) is amended by—

(1) amending subsection (c) to read as follows:

"(c) The Secretary is authorized to adjust a State agency's federally funded share of administrative costs pursuant to subsection (a), other than the costs already shared in excess of 50 per centum under the proviso in the first sentence of subsection (a) or under subsection (g), by increasing such share to 60 per centum of all such administrative costs in the case of a State agency which has—

"(1) a payment error rate as defined in subsection (d)(1) which, when added to the total percentage of all allotments underserved to eligible households by the State agency, is less than 5 per centum; and

"(2) a rate of invalid decisions in denying eligibility which is less than a nationwide percentage which the Secretary determines to be reasonable."

(2) striking out subsections (d), (e), and (g), and redesignating subsections (f), (h), and (i) as subsections (e), (f), and (g), respectively; and

(3) inserting after subsection (c) a new subsection as follows:

"(d)(1) As used in this subsection, the term 'payment error rate' means the total percentage of all allotments issued in a fiscal year by a State agency which are either—

"(A) issued to households which fail to meet basic program eligibility requirements; or

"(B) overissued to eligible households.

"(2)(A) The Secretary shall institute an error rate reduction program under which, if a State agency's payment error rate exceeds—

"(i) 9 per centum for fiscal year 1983,

"(ii) 7 per centum for fiscal year 1984, or

"(iii) 5 per centum for fiscal year 1985 or any fiscal year thereafter,

then the Secretary shall, other than for

good cause shown or as provided in subparagraph (B), reduce the State agency's feder-

ally funded share of administrative costs provided pursuant to subsection (a), other than the costs already shared in excess of 50 per centum under the proviso in the first sentence of subsection (a) or under subsection (g), by the amounts required under paragraph (3).

"(B) The Secretary may not reduce a State agency's federally funded share of administrative costs pursuant to subparagraph (A)—

"(i) on the basis of the State agency's payment error rate for fiscal year 1983, if such payment error rate represents a reduction from the State agency's payment error rate for the period beginning on October 1, 1980, and ending on March 31, 1981, or at least 33.3 per centum of the difference between the State agency's payment error rate for such period and 5 per centum; or

"(ii) on the basis of the State agency's payment error rate for fiscal year 1984, if such payment error rate represents a reduction from the State agency's payment error rate for the period beginning on October 1, 1980, and ending on March 31, 1981, of at least 66.7 per centum of the difference between the State agency's payment error rate for such period and 5 per centum.

"(3)(A) The Secretary shall reduce a State agency's federally funded share of administrative costs, except as provided in subparagraph (B), by—

"(i) 5 per centum for each per centum or fraction thereof that the State agency's payment error rate exceeds the maximum payment error rate allowed for the fiscal year under paragraph (2); and

"(ii) if the State agency's payment error rate exceeds the maximum payment error rate allowed for the fiscal year under paragraph (2) by more than 3 per centum, an additional 5 per centum (for a total of 10 per centum) for each per centum or fraction thereof that the State agency's payment error rate exceeds the maximum payment error rate allowed for the fiscal year under paragraph (2) by more than 3 per centum.

"(B) The Secretary may not reduce a State agency's federally funded share of administrative costs for a fiscal year by an amount that exceeds the product of multiplying—

"(i) the per centum by which the State agency's payment error rate exceeds the maximum payment error rate allowed for the fiscal year under paragraph (2); by

"(ii) the total dollar value of all coupons issued by the State agency during the fiscal year.

"(4) The Secretary may require a State agency to report any factors which the Secretary considers necessary to determine the appropriate level of a State agency's federally funded share of administrative costs under this subsection. If a State agency fails to meet the reporting requirements established by the Secretary, the Secretary shall base the determination on all pertinent information available to the Secretary.

"(5) If the Secretary reduces a State agency's federally funded share of administrative costs under this subsection, the State may seek administrative and judicial review of the action pursuant to section 14."

(b) Section 11(e)(3) of the Food Stamp Act of 1977 (7 U.S.C. 2020(e)(3)) is amended by—

(1) striking out "subsections (h) and (i) of section 16" and inserting in lieu thereof "section 16(e)"; and

(2) striking out "quality control program" and inserting in lieu thereof "error rate reduction program".

(c) The first sentence of section 18(e) of the Food Stamp Act of 1977 (7 U.S.C.

2027(e)) is amended by striking out "sections 7(f), 11 (g) and (h), 13(b), and 16(g)" and inserting in lieu thereof "sections 7(f), 11 (g) and (h), and 13(b)".

(d) The amendments made by this section shall become effective on October 1, 1982.

BENEFIT IMPACT STUDY

SEC. 322. Section 17 of the Food Stamp Act of 1977 (7 U.S.C. 2026) is amended by adding at the end thereof a new subsection as follows:

"(g) The Secretary shall conduct a study of the effects of reductions made in benefits provided under this Act pursuant to part 1 of subtitle A of title I of the Omnibus Budget Reconciliation Act of 1981, title XIII of the Agriculture and Food Act of 1981, and any other laws enacted by the Ninety-seventh Congress which affect the food stamp program. The study shall include a study of the effect of retrospective accounting and periodic reporting procedures established under such Acts, including the impact on benefit and administrative costs and on error rates and the degree to which eligible households are denied food stamp benefits for failure to file complete periodic reports. The Secretary shall submit to the Committee on Agriculture of the House of Representatives and Committee on Agriculture, Nutrition, and Forestry of the Senate an interim report on the results of such study no later than February 1, 1984 and a final report on the results of such study no later than March 1, 1985."

AUTHORIZATION FOR APPROPRIATIONS

SEC. 323. The first sentence of section 18(a)(1) of the Food Stamp Act of 1977 (7 U.S.C. 2027(a)(1)) is amended by—

(1) striking out "and" after "September 30, 1981"; and

(2) inserting before the period at the end thereof the following: "; not in excess of \$12,648,000,000 for the fiscal year ending September 30, 1983; not in excess of \$12,908,000,000 for the fiscal year ending September 30, 1984; and not in excess of \$13,651,000,000 for the fiscal year ending September 30, 1985".

PUERTO RICO

SEC. 324. (a) Section 19(a)(1)(A) of the Food Stamp Act of 1977 (7 U.S.C. 2028(a)(1)(A)) is amended by inserting "non-cash" before "food assistance".

(b) The amendment made by subsection (a) shall not apply with respect to any plan submitted under section 19(b) of the Food Stamp Act of 1977 (7 U.S.C. 2028(b)) by the Commonwealth of Puerto Rico in order to receive payments for fiscal year 1982 or fiscal year 1983.

(c) The Secretary of Agriculture shall conduct a study of the impact of making food assistance available to needy persons in the Commonwealth of Puerto Rico in the form of cash under section 19 of the Food Stamp Act of 1977 (7 U.S.C. 2028). The study shall include such impact on both the nutritional status of residents of Puerto Rico and the economy of Puerto Rico. The Secretary shall submit a report of the findings of such study to the Committee on Agriculture of the House of Representatives and the Committee on Agriculture, Nutrition, and Forestry of the Senate not later than six months after the effective date of this Act.

REIMBURSEMENT OF POLITICAL SUBDIVISIONS AND STATE AGENCIES FOR WORKFARE ADMINISTRATIVE EXPENSES

SEC. 325. (a) Section 20(g) of the Food Stamp Act of 1977 (7 U.S.C. 2029(g)) is amended by—

(1) redesignating paragraph (2) as paragraph (3), and

(2) by inserting after paragraph (1) a new paragraph as follows:

"(2)(A) From 50 per centum of the funds saved from employment related to a workfare program operated under this section, the Secretary shall pay to each operating agency an amount not to exceed the administrative expenses described in paragraph (1) for which no reimbursement is provided under such paragraph.

"(B) For purposes of subparagraph (A), the term 'funds saved from employment related to a workfare program operated under this section' means an amount equal to the three times the dollar value of the sum of the decrease in allotments issued to households, to the extent that such decrease results from wages received by members of such households for the first month of employment beginning after the date such members commence such employment if such employment commences—

"(i) while such members are participating for the first time in a workfare program operated under this section; or

"(ii) in the thirty-day period beginning on the date such first participation is terminated."

(b) The amendments made by this section shall take effect October 1, 1982.

AMENDMENTS MADE BY THE OMNIBUS BUDGET RECONCILIATION ACT OF 1981 AND THE AGRICULTURE AND FOOD ACT OF 1981

SEC. 326. (a) Notwithstanding section 117 of the Omnibus Budget Reconciliation Act of 1981 (7 U.S.C. 2012 note), the amendments made by sections 101, 102, 103, 104, 105, 106, 107 (other than subsection (b)), 108 (other than subsection (c)), 109, 110, 111, 112, 113, and 114 of such Act shall take effect on the date of the enactment of this Act, unless such amendments have taken effect before such date.

(b) Notwithstanding section 1338 of the Agriculture and Food Act of 1981 (7 U.S.C. 2012 note), the amendments made by sections 1302 through 1333 of such Act shall take effect on the date of the enactment of this Act, unless such amendments have taken effect before such date.

EFFECTIVE DATES

SEC. 327. (a) Except as provided in subsection (b), this Act and the amendments made by this Act shall take effect on the date of the enactment of this Act.

(b) Sections 321 and 325 shall take effect on October 1, 1982.

COMMITTEE AMENDMENTS

The CHAIRMAN. The Clerk will designate the committee amendments. The committee amendments read as follows:

Committee amendments: Page 2, line 8, insert "effective October 1, 1982," immediately after "(1)";

Page 3, lines 15 and 16, insert "to recover the funds required" immediately after "as necessary";

Page 4, lines 16 and 17, strike out "shall not be taken into consideration in determining" and insert in lieu thereof "shall be considered as included in the";

Page 10, line 14, insert "(other other than the Secretary)" after "Board", and lines 16 and 17, strike out the period and "Such appointments shall be made";

Page 11, line 13, strike out "of" and insert in lieu thereof "or";

Page 13, line 18, insert "Senate" after "States";

Page 16, line 16, insert "and" after the semicolon;

Page 16, line 23, strike out "(vi)" and insert in lieu thereof "(E)";

Page 17, line 3, and page 17, lines 7, 16, and 19, strike out the designations "(E)", "(F)", "(G)", and "(H)" and insert in lieu thereof "(F)", "(G)", "(H)" and "(I)";

Page 23, line 4, strike out "is" the first time it appears and insert in lieu thereof "it";

Page 23, line 9, strike out "or" and insert in lieu thereof "of";

Page 31, line 20, strike out "an" and insert in lieu thereof "any";

Page 32, lines 5 and 6, strike out "and contracting agencies having access to such information";

Page 34, line 10, strike out the semicolon and insert a period in lieu thereof;

Page 37, line 9, strike out "voters" and insert in lieu thereof "votes";

Page 39, line 4, insert "in" before "lieu of";

Page 39, line 7, strike out "AFFIRMATION" and insert in lieu thereof "AFFIRMATIONS";

Page 43, line 12, strike out "corp-rotation" and insert in lieu thereof "crop-rotation";

Page 43, line 16, strike out "producing" and insert in lieu thereof "producing";

Page 43, line 23, strike out "heavest" and insert in lieu thereof "harvest";

Page 49, line 12, strike out "shall" and insert in lieu thereof "should";

Page 51, line 22, strike out "section" and insert in lieu thereof "subsection";

Page 52, line 12, strike out "25" and "15" and insert in lieu thereof "20" and "10";

Page 59, line 23, insert "members" after "disabled";

Page 70, line 3, strike out "or" and insert in lieu thereof "of";

Page 72, line 15, insert ", as amended by section 310(c) of this title," after "U.S.C. 2026";

Page 72, line 18, strike out "(g)" and insert in lieu thereof "(e)";

Page 74, line 20, page 76, lines 11, 16, 20, and 21, strike out "Act" each place it appears and insert in lieu thereof "title".

□ 1330

The CHAIRMAN. The question is on the committee amendments.

The committee amendments were agreed to.

AMENDMENT OFFERED BY MR. ZABLOCKI

Mr. ZABLOCKI. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. ZABLOCKI: Page 41, line 12, immediately before the quotation marks, insert the following:

In order to assure that any such donations for use outside the United States are coordinated with and complement other United States foreign assistance, such donations shall be coordinated through the mechanism designated by the President to coordinate assistance under the Agricultural Trade Development and Assistance Act of 1954 and shall be in addition to the level of assistance programed under that Act.

Mr. ZABLOCKI. Mr. Chairman, this amendment is being offered in behalf of the Foreign Affairs Committee to section 130 of this bill, the section which gives the Commodity Credit Corporation (CCC) authority to donate surplus CCC dairy products to

needy persons abroad through foreign governments and public and private nonprofit humanitarian organizations.

The amendment provides that programs for these donations of CCC stocks abroad will be coordinated with the existing food aid programs through the established Public Law 480 mechanism and will be in addition to the overseas food assistance that is provided under Public Law 480.

Mr. Chairman, I strongly support the use of U.S. agricultural surpluses for distribution to needy people overseas. This amendment is intended to help assure the most effective use of these surpluses. I believe the amendment has general support.

I would like to express appreciation to the Committee on Agriculture and particularly to its distinguished chairman, the gentleman from Texas, for his cooperation and support in our offering of the amendment.

Our appreciation is extended also to the ranking member of the committee, Mr. WAMPLER; to the gentleman from Iowa (Mr. HARKIN), chairman of the Subcommittee on Livestock, Dairy and Poultry; and the gentleman from Minnesota (Mr. HAGEDORN), the ranking minority member of the subcommittee, who sponsored the section 130 provision.

The amendment reflects the experience of the Foreign Affairs Committee in trying to get maximum accomplishment for foreign assistance programs over the years and getting the most out of the taxpayer's dollar. We have found that it is very important to have good coordination among the bureaucracies here in Washington so that overseas, we do not have the left hand and the right hand duplicating or operating at cross purposes.

In the case of the new overseas dairy surplus donation authority being provided under section 130 of this bill, the original language submitted by the administration for this authority did include a provision for its coordination under presidentially established procedures. However, the language was not contained in the version offered during markup of the bill in the Agriculture Committee.

The Foreign Affairs Committee amendment is being offered in lieu of sequential referral of H.R. 6892 to our committee, for review of its foreign affairs provisions, in order to expedite the reconciliation process.

At present, the principal statutory instrument for U.S. food aid abroad is the Agricultural Trade Development and Assistance Act of 1954, commonly known as Public Law 480 or the food for peace program. Under Public Law 480 the United States sells on concessional terms or donates some \$1½ billion worth of food assistance a year. Title II of Public Law 480 provides for donations through foreign govern-

ments and public or private humanitarian organizations. A similar authority for dairy disposals is now being provided to the CCC under section 130 of this bill.

It would make no sense, obviously, to have Public Law 480 title II food donation program laid out for a developing country, then to have another donation of dairy surpluses come from the CCC without reference to the Public Law 480 program. The amendment would include the CCC dairy donation authority in the established food aid coordinating mechanism for Public Law 480 aid which is the Food Aid Subcommittee of the Development Coordination Committee.

The Food Aid Subcommittee is chaired by the U.S. Department of Agriculture. Other members include representatives of the State Department, the Treasury, the Agency for International Development, and OMB.

The coordinating mechanism helps to insure that the range of U.S. interests abroad are taken into account in the allocations of food assistance. For example, the State Department representative is able in the subcommittee to express U.S. foreign policy concerns regarding the aid-receiving country. AID is familiar with the nutritional and developmental needs of the populations of poor countries. The Treasury is expert on foreign debts.

Such considerations need to be kept in mind on overseas programs. With the USDA chairing the Food Aid Subcommittee, its review should not cause any undue delays for appropriate dairy surplus disposals under the CCC authority. The amendment does not require that the provisions of the Public Law 480 law, itself, apply to use of the new authority.

The provision in the amendment that the donations under the new authority shall be in addition to the levels programed under Public Law 480 is designed to assure that the use of the new authority will not result in a loss of Public Law 480 title II. This provision is in line with the intent of the administration's declared intent for the new authority. Hopefully, it will take care of concerns expressed by some that the CCC disposals not undermine or be in lieu of the title II programs for which there is a 1.7 million ton annual minimum. I know of no opposition to this provision.

Mr. Chairman, I urge adoption of the amendment.

Mr. DE LA GARZA. Mr. Chairman, I move to strike the last word, and I rise in support of the amendment.

The CHAIRMAN. Without objection, the gentleman from Texas (Mr. DE LA GARZA) is recognized.

There was no objection.

Mr. DASCHLE. Mr. Chairman, will the gentleman yield?

Mr. DE LA GARZA. I yield to the gentleman from South Dakota.

Mr. DASCHLE. Mr. Chairman, I rise in support of the Zablocki amendment. As this bill came out of the Agriculture Committee, the surplus dairy products donated by CCC to foreign governments do not have to go through any established food aid program. There is a tremendous amount of evidence from voluntary organizations, from U.S. Government reports, and from fieldworkers that food aid often does not reach those it is intended to reach—and this is under established food aid programs.

So to have a provision whereby there is not any kind of direction given to this food aid is certainly foolish. We should not, in our enthusiasm to get rid of surplus dairy products, dump the food where it is not needed or wanted or where it might depress local markets of the recipient country. I urge my colleagues to support the Zablocki amendment which requires that any Commodity Credit Corporation foreign donations under the dairy title of this bill be coordinated with other U.S. foreign assistance under the Agricultural Trade and Development Act of 1954.

Mr. DE LA GARZA. Mr. Chairman, I want to thank the gentleman from Wisconsin (Mr. ZABLOCKI), the chairman of the Committee on Foreign Affairs, for his assistance in this endeavor. I wish to commend him and the members of his committee for their cooperation with us and their favorable and positive contribution to this legislation.

Also I want to very sincerely thank the gentleman, not only in our behalf, but I am sure, in behalf of the House, for the assistance he gave us in expediting the process to arrive at this stage here today by not insisting on sequential referral of the legislation to his committee. The staffs of both committees were able to work with the Members and the individuals concerned in this area.

With that, Mr. Chairman, we gladly recommend the amendment offered by the gentleman from Wisconsin (Mr. ZABLOCKI) and will accept it.

Mr. WAMPLER. Mr. Chairman, will the gentleman yield?

Mr. DE LA GARZA. I yield to the gentleman from Virginia.

Mr. WAMPLER. Mr. Chairman, I thank the gentleman for yielding.

Mr. Chairman, I wish to associate myself with the remarks and observations of the distinguished gentleman from Texas (Mr. DE LA GARZA). On behalf of the minority, it is our pleasure to accept the amendment offered by the distinguished gentleman from Wisconsin (Mr. ZABLOCKI).

The CHAIRMAN. The question is on the amendment offered by the gentleman from Wisconsin (Mr. ZABLOCKI).

The amendment was agreed to.

Mr. SOLOMON. Mr. Chairman, I rise to ask unanimous consent to offer

an amendment which I have at the desk.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

Mr. DE LA GARZA. Mr. Chairman, I object.

The CHAIRMAN. Objection is heard.

Mr. SOLOMON. Mr. Chairman, may I ask who objected?

The CHAIRMAN. The Chair will state to the gentleman that the gentleman from Texas objected.

AMENDMENT IN THE NATURE OF A SUBSTITUTE OFFERED BY MR. WAMPLER

Mr. WAMPLER. Mr. Chairman, I offer an amendment in the nature of a substitute.

The CHAIRMAN. The Clerk will designate the amendment in the nature of a substitute.

The text of the amendment in the nature of a substitute offered by Mr. WAMPLER is as follows:

Strike out all after the enacting clause and insert in lieu thereof the following:

That this Act may be cited as the "Food and Agriculture Reconciliation Act—Fiscal Year 1983".

TITLE I—DAIRY

Subtitle A—Dairy Price-Support Program

SEC. 101. Section 201 of the Agricultural Act of 1949, as amended by the Agricultural and Food Act of 1981, is amended by—

(1) effective October 1, 1982, striking out everything in subsection (c) after the first sentence and preceding the sentence which begins "Such price support shall be provided";

(2) adding a new subsection (d) as follows: "(d) Notwithstanding any other provision of law—

"(1)(A) For that portion of the national milk supply required to meet domestic commercial market needs (i) effective for the period beginning October 1, 1982, and ending September 30, 1983, the price of such milk shall be supported at \$13.10 per hundredweight of milk containing 3.67 percent milkfat; and (ii) effective for each of the fiscal years beginning October 1, 1983, and October 1, 1984, the price of such milk shall be supported at such level that represents the percentage of parity that the Secretary determines \$13.10 represented as of October 1, 1982. That portion of the national supply required to meet domestic commercial market needs shall be the estimate of marketings of milk by producers minus the estimate of removals of milk from the market by the Commodity Credit Corporation under the price support program; and that portion of the national milk supply determined excess to domestic commercial market needs shall be the estimated removals of milk from the market by the Commodity Credit Corporation under the price support program.

"(B) The level of price support provided producers on that portion of the national milk supply determined excess to domestic commercial market needs shall be the level of price support provided for in subparagraph (A) reduced by such uniform rate as

determined by the National Dairy Board as necessary to recover the funds required to meet that portion of the cost of the price support program which is the responsibility of producers of milk as defined in paragraph (2). Such level of price support shall be (i) determined by the National Dairy Board provided for in paragraph (6); (ii) announced prior to October 1 of the fiscal year to which the rate applies and may be adjusted during the fiscal year as determined necessary by the National Dairy Board; and (iii) shall be achieved through a uniform reduction of the price paid producers on that portion of the national milk supply determined excess to domestic commercial market needs. The funds represented by such reduction shall be remitted to the Commodity Credit Corporation at such time and such manner as prescribed by the Secretary by each person making payment to a producer for milk purchased from the producer, except that in the case of any producer who markets milk of the producer's own production directly to consumers, such funds shall be remitted to the Corporation by the producer. The Corporation shall credit the funds received by it under this provision to the account of the National Dairy Board. Such account shall bear interest at the same rate as payable by Commodity Credit Corporation on its borrowings from the United States Treasury. The funds represented by such reduction shall be considered as included in the payments to a producer of milk for purposes of the minimum price provisions of the Agricultural Adjustment Act of 1933, as reenacted and amended by the Agricultural Marketing Agreement Act of 1937.

"(2) Producers of milk shall have responsibility in each fiscal year during which this program is in effect for (A) that portion of the estimated total cost of Commodity Credit Corporation purchases under the price support program for milk represented by purchases in excess of five billion pounds (milk equivalent), related costs associated with such purchases and costs associated with inventory management and disposition of products related to said purchases in excess of five billion pounds (milk equivalent), (B) the amount of marketing reduction incentive payments due producers under paragraph (4) for reductions in their milk production, (C) anticipated administrative expenses of the Board, and the expenses arising from the operations of the Board under this subsection, and (D) any balance remaining from the immediately preceding fiscal year on advances made to the Board by the Commodity Credit Corporation as provided for in paragraph (3). There shall be deducted from such total amount the estimated receipts from the sale or transfer of dairy products and other operations conducted under this subsection. For the purposes of this paragraph the estimated cost of purchases of five billion pounds (milk equivalent) shall be the dollar amount represented by the cost of purchasing and handling butter and nonfat dry milk produced from five billion pounds of milk of 3.67 per centum milkfat content. Price support operations under this Act shall not, however, be limited to the purchase of these products or to their purchase in the proportions they appear in milk. In the event of an increase in dairy product imports through action taken under section 22 of the Agricultural Adjustment Act of 1933 (7 U.S.C. 624), the portion of the cost of the price support program which is the responsibility of producers shall be reduced by the milk equivalent represented by such increased imports.

The milk equivalent of any such increased imports shall be determined on either a solids-not-fat or milkfat-milk equivalent basis, whichever is higher.

"(3) The price of milk shall be supported through the purchase of milk and the products of milk. All such purchases shall be made at the level provided under paragraph (1)(A). If funds available to the Commodity Credit Corporation to meet that portion of the cost of the price support program which is the responsibility of producers are not adequate to meet current needs, purchases of dairy products shall be made using funds otherwise available to the Commodity Credit Corporation. Such expenditure shall be deemed an advance by the Commodity Credit Corporation to the National Dairy Board which shall be liable for its repayment with interest at the same rate as payable by the Commodity Credit Corporation on its borrowings from the United States Treasury. The National Dairy Board shall make provision for repayment of any balance outstanding at the end of any fiscal year by the end of the succeeding fiscal year. Funds for such repayment shall be provided in the manner prescribed in paragraph (1)(B) or through sales of products under the provisions of paragraph (8).

"(4)(A) If the level of price support provided for under paragraph (1)(B) is less than the level of price support provided for under paragraph (1)(A), a payment shall be made to any producer who can establish that the producer's marketings of milk during the period described in subparagraph (D) have been reduced from the level of marketings during the corresponding period of the prior fiscal year.

"(B) Prior to approving such payment, the Board shall require evidence that such reduction in marketings has taken place including a certification by the producer in a form specified by the Board, that such reduction is a net decrease in marketings of milk and has not been offset by expansion of production in other production facilities in which the person has an interest or by transfer of partial interest in the production facility or by the taking of any other action which is a scheme or device to qualify for payment.

"(C) The payment due any producer under this paragraph shall be determined by multiplying the number of hundredweights of milk by which marketings were reduced from those for the same period a year earlier by a rate in dollars per hundredweight established by the Board: *Provided*, That no refund shall be made on a quantity of milk in excess of the quantity for which the person was paid at the rate provided under paragraph (1)(B) nor shall the rate of payment exceed the difference between the level of price support provided under the paragraph (1)(A) and the level of price support under paragraph (1)(B).

"(D) The Board shall provide for application for such payment at least on a quarterly basis but not more frequently than monthly: *Provided*, That if application for payment is made for any period during the year, a year-end statement of marketings must be filed by the applicant. *Provided further*, That payments made under this section during the year shall be considered preliminary settlements for reductions in marketings. In making final settlement for the year, the Board shall base such settlements on the volume of marketings for the entire fiscal year. If, based on total marketings for the year, the Board should determine that preliminary settlements have resulted in

overpayment to the producer, the producer shall repay the amount of the overpayment plus interest.

"(E) If a reduced level of support is provided under paragraph (1)(B) for consecutive fiscal years, the Board shall recognize the actions taken by persons in reducing milk marketings in any of such years preceding the current fiscal year when determining eligibility for payment in the current fiscal year: *Provided*, That if a person increases milk marketings in the current fiscal year from the year of reduced marketings, any payment made to that person shall be adjusted to reflect such increase. If a person increases marketings to a level in excess of the marketings of said person during the fiscal year immediately preceding the first fiscal year the program was effective, no payment will be made.

"(F) Eligibility for payment under this paragraph is limited to those producers who made reductions in their marketings of milk and is not transferable to any other person.

"(5) In carrying out this subsection, the Board may, on a reimbursable or nonreimbursable basis, as it deems appropriate, utilize—

"(A) marketing administrators appointed by the Secretary for the administration of Federal milk marketing orders promulgated under provisions of the Agricultural Adjustment Act of 1933, as reenacted and amended by the Agricultural Marketing Agreement Act of 1937;

"(B) State and county committees established under section 8 of the Soil Conservation and Domestic Allotment Act (16 U.S.C. 590h); or

"(C) administrators of State milk marketing programs.

"(6)(A) There shall be established a National Dairy Board (hereinafter referred to as the "Board") that shall consist of fifteen members plus the Secretary;

"(B) The fifteen members of the Board (other than the Secretary) shall be appointed by the President with the advice and consent of the Senate from recommendations submitted by organizations certified by the Secretary as eligible to make such recommendations. Nominations to the initial Board shall be submitted by the President to the Senate for its advice and consent not later than January 1, 1983;

"(C) In making such appointments, the President shall take into account the geographical distribution of milk production volume throughout the United States;

"(D) The term of Board members shall be three years and no member shall be eligible to serve more than two consecutive terms: *Provided*, That in making initial appointments to the Board, the President shall designate one-third of the appointments as one-year terms, one-third of the appointments as two-year terms, and one-third of the appointments as three-year terms;

"(E) Vacancies on the Board shall be filled by the President in the same manner as initial appointments are made;

"(F) The members of the Board shall serve without compensation, if not otherwise officers or employees of the United States, except that they shall, while away from their homes or regular places of business in their performance of services for the Board, be allowed travel expenses, including per diem in lieu of subsistence, in the same manner as persons employed intermittently in the Government service are allowed expenses under sections 5701 through 5707 of title 5, United States Code.

(G) The Secretary shall certify as eligible to make recommendations for Board membership, any organization that is determined by the Secretary upon the submission of a factual report which shall contain information deemed relevant and specified by the Secretary including, but not limited to the following:

(1) geographical territory covered by the organization's active membership;

(2) nature and size of the organization's active membership, including the proportion of the total number of active milk producers represented by the organization;

(3) evidence of stability and permanency of the organization;

(4) sources from which the organization's operating funds are derived; and

(5) functions of the organization.

(H) If the Secretary determines that a substantial number of milk producers are not members of, or their interests are not represented by any such eligible organization, nominations for the Board may be made from recommendations made by such milk producers in the manner authorized by the Secretary.

"(7)(A) At its initial meeting, the Board shall elect from its members a chairman, vice chairman, and secretary-treasurer. These officers shall have a term of one year. The Secretary shall not be eligible for service in these positions.

"(B) The chairman shall preside at all meetings of the Board and shall be responsible for supervision and direction of any personnel employed by the Board to carry out the directives of the Act.

"(C) The Vice Chairman shall, in the absence of the Chairman, preside at meetings of the Board. In the event the office of Chairman is vacated by the death, resignation, or by disqualification of the incumbent, the Vice Chairman shall assume those duties until a successor has been duly named and qualified by the Board.

"(D) The secretary-treasurer shall be responsible for maintenance of such records as may be required by the Board. In addition, the secretary-treasurer shall prepare such reports as are necessary including an annual report to the chairman of the Committee on Agriculture, Nutrition, and Forestry of the United States Senate and the chairman of the Committee on Agriculture of the United States House of Representatives.

"(E) Regular meetings of the Board shall be held on a schedule determined by the Board. Special meetings may be called by the Chairman, by the Secretary or by a majority of the Board requesting the Chairman convene such special meeting.

"(F) The Board may issue such regulations as are necessary for the conduct of activities required by this subsection.

"(G) The Board may employ such personnel as may be required to assist in carrying out the purposes of this subsection. Such employees shall be considered employees of the Department of Agriculture, however, costs of such employment shall be met from funds available to the Board under this subsection for the conduct of its activities.

"(8) Notwithstanding any other provision of law, the Board shall have the following duties and responsibilities—

"(A) based on estimates of milk production, consumption, and Commodity Credit Corporation purchases, determine the relative proportions of milk to which the price support levels provided for in paragraph (1) shall apply;

"(B) determine the amount of the producer responsibility for dairy product purchases as determined under paragraph (2);

"(C) determine and announce prior to October 1 of each year, the level of price support under paragraph (1)(B) and the uniform rate by which the price paid farmers for milk determined to be in excess of domestic commercial market needs shall be reduced to achieve the level of price support provided for in paragraph (1)(B);

"(D) dispose of dairy products acquired by the Commodity Credit Corporation through price support operations provided for herein. Such dispositions may include, but are not limited to—

"(i) sales to the domestic commercial trade for unrestricted use: *Provided*, That in no event shall such sales be made at a price less than the higher of the current market price or 110 per centum of the currently effective price for purchase of the product by the Commodity Credit Corporation;

"(ii) transfer to Federal, State, and local government agencies for use in food assistance programs. Such programs shall include the child nutrition programs of the Department of Agriculture, elderly feeding programs, and others whether of an ongoing or of a temporary nature designed to meet short-term conditions. Unless otherwise provided for by law, the rate of reimbursement for commodities used in such programs shall be determined by the Board: *Provided*, That dairy products, not in excess of five billion pounds (milk equivalent) made available for child nutrition programs operated by the Food and Nutrition Service of the Department of Agriculture and similar programs including those conducted under the Older Americans Act, shall be made available at the request of the Secretary without cost annually;

"(iii) sales to persons engaged in international commerce for the purpose of commercial export sales of said dairy products;

"(iv) sales and transfers of dairy products to foreign governments, agencies of foreign governments, or international agencies; and

"(v) other sales or donation efforts to meet specific needs, as determined by the Board. This may include, but is not limited to, disposition of dairy products for other than unrestricted commercial use to prevent waste, deterioration, or loss of the product;

"(E) the Board shall have authority to direct the reprocessing and, if necessary, repackaging of dairy products to facilitate operations undertaken pursuant to this paragraph;

"(F) proceeds realized from any operations undertaken pursuant to this paragraph shall be remitted to the Commodity Credit Corporation and credited to the account of the Board;

"(G) if, in the judgment of the Board, any of the operations provided for in subparagraph (D) can be more effectively carried out through products other than those purchased by the Commodity Credit Corporation or on a basis other than through purchase by the Commodity Credit Corporation and subsequent resale or transfer, the Board shall develop and announce details of such programs;

"(H) make recommendations to the Secretary regarding details of the operation of the price support program for milk; and

"(I) establish and announce the rate of the marketing reduction incentive payment provided for in paragraph (4).

"(9) The Secretary of Agriculture shall—

"(A) exercise the authority vested in the Board by this subsection until such time as

the initial Board has begun functioning, but in no event later than April 1, 1983;

"(B) serve as a member of the Board;

"(C) cooperate with the Board in the performance of its duties, including providing the Board access to all pertinent economic and financial data and information necessary to the achievement of its responsibilities, and provide the Board with such facilities and support as may be determined necessary;

"(D) collect from all persons who make payment to farmers for milk and from farmers who market milk of their own production directly to consumers, the funds derived from the reduction in prices paid farmers for that portion of the national milk supply determined excess to the needs of the domestic commercial market so as to achieve the level of price support provided for in paragraph (1)(B);

"(E) provide for audit and verification to determine that all funds due have been collected and properly credited;

"(F) provide for the delivery from the inventories of the Commodity Credit Corporation dairy products acquired in the conduct of the price support program for milk. Such deliveries shall be in the form and at the time and place directed by the Board; and

"(G) provide for the payment of obligations incurred by the Board in carrying out its responsibilities. Such obligations shall be paid from funds available to the Board under this subsection. Such payments shall be made at the direction of the Board.

"(10)(A) The district courts of the United States are vested with jurisdiction specifically to enforce, and to prevent and restrain any person from violation, any regulation issued under this subsection. Any such civil action authorized to be brought under this subsection shall be referred to the Attorney General for appropriate action: *Provided*, That nothing in this subsection may be construed as requiring the Secretary to refer to the Attorney General minor violations of this subsection whenever the Secretary believes that the administration and enforcement of this subsection would be adequately served by suitable written notice or warning to any person committing such violation.

"(B) Any person who willfully violates any provision of any regulation issued by the Secretary or the Board under this subsection, or who willfully fails or refuses to remit any amounts due thereunder shall be liable, in addition to payment of the full amount due plus interest, for a civil penalty (to be assessed by the Secretary) of not more than \$1,000 for each such violation which shall accrue to the United States and may be recovered in a civil suit brought by the United States.

"(C) The remedies provided in subsections (A) and (B) of this section shall be in addition to, and not exclusive of, the remedies otherwise provided at law or in equity.

"(11) Each producer who markets milk and each person required to make payment to the Corporation under this subsection shall keep such records and make such reports, in such manner, as the Secretary determines necessary to carry out this subsection. The Secretary may make such investigations as the Secretary deems necessary for the effective administration of this subsection or to determine whether any person subject to the provision of this subsection has engaged or is engaged or is about to engage in any act or practice that constitutes or will constitute a violation of any provision of this subsection or rule or regulation issued under this subsection. For the

purpose of such investigation, the Secretary is empowered to administer oaths and affirmations, subpoena witnesses, compel their attendance, take evidence and require the production of any books, papers, and documents that are relevant to the inquiry. Such attendance of witnesses and the production of any such records may be required from any place in the United States. In case of contumacy by, or refusal to obey a subpoena to, any person, the Secretary may invoke the aid of any court of the United States within the jurisdiction of which such investigation or proceeding is carried on, or where such person resides or carries on business, in requiring the attendance and testimony of witnesses and the production of books, papers, and documents; and such court may issue an order requiring such person to appear before the Secretary, there to produce records, if so ordered, or to give testimony touching the matter under investigation. Any failure to obey such order of the court may be punished by such court as a contempt thereof. All process in any such case may be served in the judicial district whereof such person is an inhabitant or wherever such person may be found.

"(12) All operations conducted under this subsection shall be considered a program or operation of the Department of Agriculture for the purposes of section 22 of the Agricultural Adjustment Act of 1933."

Subtitle B—Dairy Promotion Act

SHORT TITLE

Sec. 110. This subtitle may be cited as the "Dairy Promotion Act".

FINDINGS AND DECLARATION OF POLICY

Sec. 111. (a) The Congress finds that—

(1) dairy products are basic foods that are a valuable part of the human diet;

(2) the production of dairy products plays a significant role in the Nation's economy; the milk from which dairy products are manufactured is produced by thousands of milk producers; and dairy products are consumed by millions of people throughout the United States;

(3) dairy products must be readily available and marketed efficiently to assure that the people of the United States receive adequate nourishment;

(4) the maintenance and expansion of existing markets for dairy products is vital to the welfare of milk producers and those concerned with marketing, using, and producing dairy products, as well as to the general economy of the Nation; and

(5) dairy products move in interstate and foreign commerce, and dairy products that do not move in such channels of commerce directly burden or affect interstate commerce in dairy products.

(b) It, therefore, is declared to be the policy of the Congress that it is essential and in the public interest to authorize the establishment, through the exercise of the powers provided herein, of an orderly procedure for the financing (through adequate assessments on all milk produced in the United States for commercial use) and the carrying out of an effective and continuous coordinated program of promotion designed to strengthen the dairy industry's position in the marketplace, and maintain and expand domestic and foreign markets and uses for dairy products produced in the United States. Nothing in this subtitle may be construed to mean, or provide for, control of production or otherwise limit the right of individual milk producers to produce milk.

DEFINITIONS

Sec. 112. As used in this subtitle—

(1) the term "Board" means the National Dairy Promotion Board established under section 114 of this subtitle;

(2) the term "Department" means the Department of Agriculture;

(3) the term "dairy products" means manufactured products for human consumption which are derived from the processing of milk, and includes fluid milk products;

(4) the term "fluid milk products" means manufactured liquid products derived from the processing of milk and customarily consumed as beverages;

(5) the term "milk" means all classes of cow's milk produced in the United States;

(6) the term "person" means any individual, group of individuals, partnership, corporation, association, cooperative, or any other entity;

(7) the term "producer" means any person engaged in the production of milk within the United States for commercial use;

(8) the term "promotion" means actions such as paid advertising, sales promotion, and publicity to advance the image and sales of, and demand for, dairy products;

(9) the term "Secretary" means the Secretary of Agriculture; and

(10) the term "United States" means the several States and the District of Columbia, the Commonwealth of Puerto Rico, the Commonwealth of the Northern Mariana Islands, and the territories and possessions of the United States.

ISSUANCE OF ORDERS

Sec. 113. (a) Whenever the Secretary has reason to believe that the issuance of a proposed dairy products promotion order will tend to effectuate the declared policy of this subtitle, the Secretary shall give due notice and opportunity for hearing upon the proposed order. Such proposal for an order may be submitted and a hearing may be requested and proposed for an order submitted by an organization certified under section 116 of this subtitle, or by any interested person affected by the provisions of the subtitle, including the Secretary.

(b) After notice and opportunity for hearing are given, as provided for in subsection (a) of this section, the Secretary shall issue a dairy products promotion order if the Secretary finds (and sets forth in such order), upon the evidence introduced at such hearing, that the issuance of such order and all the terms and conditions thereof will tend to effectuate the declared policy of this subtitle.

(c) The Secretary may, from time to time, amend dairy products promotion orders.

REQUIRED TERMS IN ORDERS

Sec. 114. Any order issued under this subtitle shall contain the following terms and conditions:

(1) Providing for the establishment and appointment by the Secretary of a National Dairy Promotion Board that shall consist of not fewer than thirty-six members; and providing for the definition of powers and duties of the Board that shall include only the powers enumerated in this section, including the powers to (A) administer such order in accordance with its terms and provisions, (B) make rules and regulations to effectuate the terms and provisions of such order, (C) receive, investigate, and report to the Secretary complaints of violations of such order, and (D) recommend to the Secretary amendments to such order. The term of an appointment to the Board shall be for three years with no member serving more

than two consecutive terms, except that initial appointments shall be proportionately for two-year and three-year terms. The Board may appoint from its members an executive committee whose membership shall, to the maximum extent practicable, reflect the membership composition of the Board. Such executive committee shall have such duties and powers as are conferred upon it by the Board.

(2) Providing that members of the Board shall be milk producers appointed by the Secretary from nominations submitted by eligible organizations or associations certified under section 116 of this subtitle, or, if the Secretary determines that a substantial number of milk producers are not members of, or their interests are not represented by, any such eligible organization or association, then from nominations made by such milk producers in the manner authorized by the Secretary: *Provided*, That in making such appointments, the Secretary shall take into account, to the extent practicable, the geographical distribution of milk production volume throughout the United States. In determining geographic representation, whole States shall be used as a unit. A region may be represented by more than one director and a region may be made up of more than one State.

(3) Providing that the Board shall develop and submit to the Secretary for approval any promotion plan or project, and that any such plan or project shall take effect only if approved by the Secretary.

(4) Providing that the Board shall submit to the Secretary for approval budgets, on a fiscal period basis, of its anticipated expenses and disbursements in the administration of the order, including probable costs of dairy product promotion projects.

(5) Providing that each milk producer shall pay, at the plant of first receipt, an assessment based upon the number of hundredweights of milk for commercial use, handled for the account of the producer, in the manner as prescribed by the order, for the expenses and expenditures (including provision for a reasonable reserve and those administrative costs incurred by the Department after an order has been promulgated under this subtitle), as the Secretary finds are reasonable and likely to be incurred by the Board under the order during any period specified by the Secretary. The operator of such plant shall collect such assessment from the producer and shall pay the sum to the Board in the manner as prescribed by the order. The rate of assessment prescribed by the order shall be five cents per hundredweight of milk for commercial use, or the equivalent thereof. To facilitate the collection of such assessments, the order or the Board may designate different operators of plants or classes of such operators to recognize differences in marketing practices or procedures used in the industry. The Secretary may maintain a suit against any person subject to the order for the collection of such assessment, and the several district courts of the United States are hereby vested with jurisdiction to entertain such suits regardless of the amount in controversy.

(6) Providing that the Board shall maintain such books and records (which shall be available to the Secretary for inspection and audit) and prepare and submit such reports from time to time to the Secretary, as the Secretary may prescribe, including reports requiring an appropriate accounting by the Board with respect to the receipt and disbursement of all funds entrusted to it.

(7) Providing that the Board, with the approval of the Secretary, may enter into contracts or agreements for the development and conduct of the activities authorized under the order under terms and conditions specified in subsection (a) of section 115 of this subtitle for the payment of the cost thereof with funds collected through the assessments under the order. Any such contract or agreement shall provide that (A) the contractors shall develop and submit to the Board a plan or project together with a budget or budgets that shall show estimated costs to be incurred for such plan or project, and (B) the plan or project shall become effective upon the approval of the Secretary, and (C) the contracting party shall keep accurate records of all of its transactions and make periodic reports to the Board of activities conducted and an accounting for funds received and expended, and such other reports as the Secretary may require.

(8) Providing that the Board, with the approval of the Secretary, may invest, pending disbursement under a plan or project, funds collected through assessments authorized under this subtitle only in obligations of the United States or any agency thereof, in general obligations of any State or any political subdivision thereof, in any interest-bearing account or certificate of deposit of a bank that is a member of the Federal Reserve System, or in obligations fully guaranteed as to principal and interest by the United States.

(9) Providing that no funds collected by the Board under the order shall in any manner be used for the purpose of influencing any governmental policy or action, except as provided by paragraph (1)(D) of this section.

(10) Providing that the Board members shall serve without compensation, but shall be reimbursed for their reasonable expenses incurred in performing their duties as members of the Board, including a per diem allowance as recommended by the Board and approved by the Secretary.

PERMISSIVE TERMS IN ORDERS

SEC. 115. Orders issued under this subtitle may contain one or more of the following terms and conditions:

(1) Providing for the establishment, issuance, effectuation, and administration of appropriate plans or projects for advertising and promotion of the sale and consumption of dairy products, and for the disbursement of necessary funds for such purposes: *Provided*, That any such plan or project shall be directed toward the sale and marketing or use of dairy products to the end that the marketing and use of dairy products may be encouraged, expanded, improved, or made more acceptable and shall make no reference to private brand or trade name: *Provided further*, That no such advertising or sales promotion program shall make use of unfair or deceptive acts or practices with respect to the quality, value, or use of any competing product: *And provided further*, That during the two-year period beginning on the effective date of an order first issued under this section, fluid milk products may not be promoted under this subtitle.

(2) Providing that operators of plants receiving from producers milk for commercial use maintain and make available for inspection such books and records as may be required by any order issued under section 113(a) of this subtitle; and providing for the filing of reports by such persons at the time, in the manner, and having content prescribed by the order, to the end that information and data appropriate or necessary to

the effectuation, administration, or enforcement of this subtitle, or any order or regulation issued under section 113(a) of this subtitle shall be made available to the Secretary: *Provided*, That all information so obtained shall be kept confidential by all officers and employees of the Department, and only such information so furnished or acquired as the Secretary deems relevant shall be disclosed by them and then only in a suit or administrative hearing brought at the direction, or upon the request, of the Secretary, or to which the Secretary or any officer of the United States is a party, and involving the order with reference to which the information to be disclosed was furnished or acquired. Nothing in this paragraph shall be deemed to prohibit (A) the issuance of general statements, based upon the reports, or the number of persons subject to an order or statistical data collected therefrom, which statements do not identify the information furnished by any person, or (B) the publication, by direction of the Secretary, of the name of any person violating any order, together with a statement of the particular provisions of the order violated by such persons. No information obtained under the authority of this subtitle may be made available to any agency or officer of the Government for any purpose other than the implementation of this subtitle and any investigatory or enforcement actions necessary for the implementation of this subtitle. Any person violating the provisions of this subsection, upon conviction, shall be subject to a fine of not more than \$1,000, or to imprisonment for not more than one year, or to both, and, if an officer or employee of the Board or the Department, shall be removed from office.

(3) Providing terms and conditions incidental to and not inconsistent with the terms and conditions specified in this subtitle and necessary to effectuate the other provisions of such order.

CERTIFICATION OF ORGANIZATIONS

SEC. 116. (a) The eligibility of any organization to represent milk producers, to request the issuance of an order under section 113(a) of this subtitle and to participate in the making of nominations under section 114(2) of this subtitle shall be certified by the Secretary. The Secretary shall certify any organization that the Secretary determines meets the eligibility criteria established by the Secretary under this section, and the Secretary's determination as to eligibility shall be final.

(b) Certification shall be based, in addition to other available information, upon a factual report submitted by the organization, which shall contain information deemed relevant and specified by the Secretary for the making of such determination, including the following:

(1) The geographic territory covered by the organization's active membership.

(2) The nature and size of the organization's active membership, including the proportion of the total number of active milk producers represented by the organization.

(3) Evidence of stability and permanency of the organization.

(4) Identification of the sources from which the organization's operating funds are derived.

(5) The functions of the organization.

(6) A statement describing the organization's ability and willingness to further the aims and objectives of this subtitle. The primary considerations in determining the eligibility of an organization shall be whether its membership consists primarily

of milk producers who produce a substantial volume of milk and whether the primary or overriding interest of the organization is in the production of milk and dairy products.

REQUIREMENT OF REFERENDUM

SEC. 117. (a) The Secretary shall conduct a referendum as soon as practicable among producers who during a representative period (as determined by the Secretary), have been engaged in the production of milk for commercial use for the purpose of ascertaining whether the issuance of an order is approved or favored by the producers. No order issued under this subtitle may be effective unless the Secretary determines that the issuance of such order is approved or favored by not less than one-half of the producers voting in the referendum.

(b) The Secretary shall be reimbursed from assessments collected by the Board for any expenses (other than salary payments to Government employees) incurred for the conduct of the referendum.

SUSPENSION AND TERMINATION OF ORDERS

SEC. 118. (a) The Secretary shall, whenever the Secretary finds that any order issued under this subtitle or any provision thereof obstructs or does not tend to effectuate the declared policy of this subtitle, terminate or suspend the operation of such order or such provisions thereof.

(b) The Secretary may conduct a referendum at any time, and shall hold a referendum on request of a representative group comprising 10 per centum or more of the number of producers subject to the order, to determine whether the producers favor the termination or suspension of the order. The Secretary shall suspend or terminate the order within six months after the Secretary determines that suspension or termination of the order is approved or favored by a majority of the producers voting in the referendum who, during a representative period (as determined by the Secretary), have been engaged in the production of milk for commercial use.

(c) Prior to the fifth anniversary of any order issued under this subtitle, the Secretary shall conduct a referendum to determine if producers support continuation of such order. The Secretary shall terminate such order unless its continuation is approved or favored by a majority of producers voting in the referendum who, during a representative period (as determined by the Secretary), have been engaged in the production of milk for commercial use.

(d) The termination or suspension of any order, or any provision thereof, shall not be considered an order within the meaning of this subtitle.

COOPERATIVE ASSOCIATION REPRESENTATION

SEC. 119. Whenever, pursuant to the provisions of this subtitle, the Secretary is required to determine the approval or disapproval of producers, the Secretary shall consider the approval or disapproval by any bona fide cooperative association of producers, engaged in marketing milk or dairy products as the approval or disapproval of the producers who are members of or under contract with such cooperative association of producers: *Provided*, That if a cooperative association of producers elects to exercise this prerogative on behalf of its members, such cooperative association shall provide each producer on whose behalf the cooperative association is expressing approval or disapproval a description of the question presented in the referendum together with a statement of the manner in which the co-

operative association vote was cast on behalf of the membership. Such information shall inform the producer of procedures to follow to cast an individual ballot should such producer choose to vote. Such individual ballots shall be tabulated by the Secretary and the vote of the cooperative association shall be adjusted to reflect such individual votes.

PETITION AND REVIEW

SEC. 120. (a) Any person subject to any order may file, with the Secretary a petition stating that any such order, any provision of such order, or any obligation imposed in connection with such order is not in accordance with law and praying for a modification thereof or for an exemption therefrom. The petitioner shall thereupon be given an opportunity for a hearing upon such petition, in accordance with regulations issued by the Secretary. After such hearing, the Secretary shall make a ruling upon the prayer of such petition, which shall be final, if in accordance with law.

(b) The district courts of the United States in any district in which such person is an inhabitant, or carries on business, are hereby vested with jurisdiction to review such ruling, if a complaint for the purpose is filed within twenty days from the date of the entry of such ruling. Service of process in such proceedings may be had upon the Secretary by delivering a copy of the complaint to the Secretary. If the court determines that such ruling is not in accordance with law, it shall remand such proceedings to the Secretary with directions either (1) to make such ruling as the court shall determine to be in accordance with law, or (2) to take such further proceedings as, in its opinion, the law requires.

ENFORCEMENT

SEC. 121. (a) The district courts of the United States are vested with jurisdiction specifically to enforce, and to prevent and restrain any person from violating, any order or regulation made or issued under this subtitle. Any such civil action authorized to be brought under this subsection shall be referred to the Attorney General for appropriate action: *Provided*, That nothing in this subtitle may be construed as requiring the Secretary to refer to the Attorney General minor violations of this subtitle whenever the Secretary believes that the administration and enforcement of this subtitle would be adequately served by suitable written notice or warning to any person committing such violation.

(b) Any person who willfully violates any provision of any order issued by the Secretary under this subtitle or who willfully fails or refuses to remit any assessment or fee duly required thereunder, shall be liable to a penalty (to be assessed by the Secretary) of not more than \$1,000 for each such violation which shall accrue to the United States and may be recovered in a civil suit brought by the United States.

(c) The remedies provided in subsections (a) and (b) of this section shall be in addition to, and not in lieu of, the remedies otherwise provided at law or in equity.

INVESTIGATIONS; POWER TO SUBPENA AND TAKE OATHS AND AFFIRMATIONS; AID OF COURTS

SEC. 122. The Secretary may make such investigations as the Secretary deems necessary for the effective administration of this subtitle or to determine whether any person subject to the provisions of this subtitle has engaged or is about to engage in any act or practice that constitutes or will constitute a violation of any provision of this subtitle or

of any order, rule, or regulation issued under this subtitle. For the purpose of such investigation, the Secretary is empowered to administer oaths and affirmations, subpoena witnesses, compel their attendance, take evidence and require the production of any books, papers, and documents that are relevant to the inquiry. Such attendance of witnesses and the production of any such records may be required from any place in the United States. In case of contumacy by, or refusal to obey a subpoena to, any person, the Secretary may invoke the aid of any court of the United States within the jurisdiction of which such investigation or proceeding is carried on, or where such person resides or carries on business, in requiring the attendance and testimony of witnesses and the production of books, papers, and documents. Such court may issue an order requiring such person to appear before the Secretary, there to produce records, as so ordered, or to give testimony touching the matter under investigation. Any failure to obey such order of the court may be punished by such court as a contempt thereof. All process in any such case may be served in the judicial district whereof such person is an inhabitant or wherever such person may be found.

ADMINISTRATIVE PROVISIONS

SEC. 123. (a) Nothing in this subtitle may be construed to preempt or supersede any other program relating to dairy product promotion organized and operating under the laws of the United States or any State.

(b) The provisions of this subtitle applicable to orders shall be applicable to amendments to orders.

AUTHORIZATIONS

SEC. 124. There are hereby authorized to be appropriated such sums as may be necessary to carry out the provisions of this subtitle. Sums authorized to be appropriated by this subtitle shall not be available for payment of the expenses or obligation incurred by the Board in administering any order issued under this subtitle.

Subtitle C—Donation of Dairy Products

SEC. 130. Section 416 of the Agricultural Act of 1949 is amended by adding at the end thereof the following: "Notwithstanding any other provision of law, such dairy products may be donated for distribution to needy households in the United States. Such dairy products may also be donated through foreign governments and public and nonprofit private humanitarian organizations for the assistance of needy persons outside the United States, and the Commodity Credit Corporation may pay, with respect to commodities so donated, repackaging, packaging, transporting, handling, and other charges, including the cost of overseas delivery. In order to assure that any such donations for use outside the United States are coordinated with and complement other United States foreign assistance, such donations shall be coordinated through the mechanism designated by the President to coordinate assistance under the Agricultural Trade Development and Assistance Act of 1954 and shall be in addition to the level of assistance programmed under that Act."

TITLE II—ADJUSTMENT PROGRAM FOR THE 1983 CROPS OF WHEAT, FEED GRAINS, UPLAND COTTON, AND RICE

1983 CROP WHEAT LOANS

SEC. 201. Section 107B(a) of the Agricultural Act of 1949 is amended by adding at the end thereof the following: "Notwith-

standing the foregoing provision of this subsection, the Secretary shall make available to producers loans and purchases for the 1983 crop of wheat at not less than \$3.80 per bushel."

1983 CROP WHEAT ACREAGE REDUCTION AND DIVERSION PROGRAM

SEC. 202. Section 107B(e)(1) of the Agricultural Act of 1949 is amended by—

(1) striking out in the first sentence "Notwithstanding any other provision of this section, the" and inserting in lieu thereof "Notwithstanding any other provision of law—

"(A) Except as provided in subparagraph (B) of this paragraph, the"; and

(2) adding at the end thereof the following:

"(B) For the 1983 crop of wheat the Secretary shall provide for a combination of (i) an acreage limitation program as described under paragraph

(2) or a set-aside program as described under paragraph (3) and (ii) a diversion program as described under paragraph (5) under which the acreage planted to wheat on the farm would be limited to the acreage base for the farm reduced by a total of 25 per centum, consisting of a reduction of 15 per centum under the acreage limitation or set-aside program and a reduction of 10 per centum under the diversion program. As a condition of eligibility for loans, purchases and payments on the 1983 crop of wheat, the producers on a farm must comply with the terms and conditions of the combined acreage limitation or set-aside program and diversion program."

WHEAT ACREAGE BASE

SEC. 203. Section 107B(e)(2) of the Agricultural Act of 1949 is amended by inserting immediately after the fifth sentence the following: "Notwithstanding any other provision of this paragraph, the acreage base to be used for the farm under the programs for the 1983, 1984, and 1985 crops of wheat shall be the same as the acreage base applicable to the farm under the acreage limitation program for the 1982 crop, adjusted to reflect established crop-rotation practices and to reflect such other factors as the Secretary determines should be considered in determining a fair and equitable base: *Provided*, That the acreage base for each wheat producing farm that follows a normal summer-fallow crop rotational practice and has a 3-year history of such practice shall be calculated by multiplying one-half the announced acreage limitation or set-aside percentage by the acreage annually idled and devoted to conservation practices and adding the result to the acreage planted on the farm to wheat for harvest in the crop year immediately preceding the year for which the determination is made or, at the discretion of the Secretary, the average acreage planted to wheat for harvest in the two crop years immediately preceding the year for which the determination is made."

1983 CROP RETIREMENT AND CONSERVATION PAYMENTS FOR WHEAT

SEC. 204. Section 107B(e)(5) of the Agricultural Act of 1949 is amended by adding at the end thereof the following: "Notwithstanding the foregoing provision of this paragraph, the Secretary shall make crop retirement and conservation payments available to any producer of the 1983 crop of wheat who participates in the acreage limitation or set-aside program for such crop of wheat under paragraph (2) or (3) of this subsection, as applicable, if the permit-

ted acreage for the farm as determined under such paragraph is reduced by an amount equivalent to 10 per centum of the acreage base for the farm in addition to the reduction under such paragraph, and the producer devotes to approved conservation uses an equivalent acreage of cropland in addition to the acreage devoted to conservation uses under such paragraph. Such payments shall be made in an amount computed by multiplying (i) the rate of \$3.00 per bushel by (ii) the farm program payment yield for the crop, by (iii) the additional acreage diverted under this subsection. The Secretary shall make not less than 50 per centum of any payments under this paragraph to producers of the 1983 crop as soon as practicable after a producer enters into a land diversion contract with the Secretary and in advance of any determination of performance. If a producer fails to comply with a land diversion contract after obtaining an advance payment under this paragraph, subject to the provisions of subsection (f), the producer shall repay the advance immediately and, in accordance with regulations issued by the Secretary, pay interest on the advance."

1983 FEED GRAIN LOANS

SEC. 205. Section 105B(a)(1) of the Agricultural Act of 1949 is amended by inserting at the end thereof the following: "Notwithstanding the foregoing provision of this subsection, the Secretary shall make available to producers loans and purchases for the 1983 crop of corn at not less than \$2.71 per bushel."

1983 CROP FEED GRAIN ACREAGE REDUCTION AND DIVERSION PROGRAM

SEC. 206. Section 105B(e)(1) of the Agricultural Act of 1949 is amended by—

(1) striking out in the first sentence "Notwithstanding any other provision of this section, the" and inserting in lieu thereof "Notwithstanding any other provision of law—

"(A) Except as provided in subparagraph (B) of this paragraph, the"; and

(2) adding at the end thereof the following:

"(B) If on October 15, 1982, the Secretary estimates that the 1982 crop of corn will be in excess of 7.3 billion bushels, the Secretary shall announce on such date that there will be in effect for the 1983 crop of feed grains a combination of (i) an acreage limitation program as described under paragraph (2) or a set-aside program as described under paragraph (3) and (ii) a diversion program as described under paragraph (5) under which the acreage planted to feed grains on the farm would be limited to the acreage base for the farm reduced by a total of 20 per centum, consisting of a reduction of 10 per centum under the acreage limitation or set-aside program and a reduction of 10 per centum under the diversion program. As a condition of eligibility for loans, purchases and payments on the 1983 crop of feed grains, the producers on a farm must comply with the terms and conditions of the combined acreage limitation or set-aside program and diversion program."

FEED GRAINS ACREAGE BASE

SEC. 207. Section 105B(e)(2) of the Agricultural Act of 1949 is amended by inserting immediately after the sixth sentence the following: "Notwithstanding any other provision of this paragraph, the acreage base to be used for the farm under programs for the 1983, 1984, and 1985 crops of feed grains shall be the same as the acreage base applicable to the farm under the acreage limitation program for the 1982 crop, adjusted to

reflect established crop-rotation practices and to reflect such other factors as the Secretary determines should be considered in determining a fair and equitable base: *Provided*, That the acreage base for each feed grain producing farm that follows a normal summer-fallow crop rotational practice and has a 3-year history of such practice shall be calculated by multiplying one-half the announced acreage limitation or set-aside percentage by the acreage annually idled and devoted to conservation practices and adding the result to the acreage planted on the farm to feed grains for harvest in the crop year immediately preceding the year for which the determination is made or, at the discretion of the Secretary, the average acreage planted to feed grains for harvest in the two crop years immediately preceding the year for which the determination is made."

1983 CROP RETIREMENT AND CONSERVATION PAYMENTS FOR FEED GRAINS

SEC. 208. Section 105B(e)(5) of the Agricultural Act of 1949 is amended by adding at the end thereof the following: "Notwithstanding the foregoing provision of this paragraph, if the Secretary announces under paragraph (1)(B) of this subsection that there will be in effect a diversion program on the 1983 crop of feed grains, the Secretary shall make crop retirement and conservation payments available to any producer of the 1983 crop of feed grains who participates in the acreage limitation or set-aside program for such crops of feed grains under paragraph (2) or (3) of this subsection, as applicable, if the permitted acreage for the farm as determined under such paragraph is reduced by an amount equivalent to 10 per centum of the acreage base for the farm in addition to the reduction under such paragraph, and the producer devotes to approved conservation uses an equivalent acreage of cropland in addition to the acreage devoted to conservation uses under such paragraph. Such payment shall be made in an amount computed by multiplying (i) the payment rate, by (ii) the farm program payment yield for the crop, by (iii) the additional acreage diverted under this subsection. The payment rate for corn shall be in the amount of \$1.50 per bushel and in the case of grain sorghums, oats, and, if designated by the Secretary, barley shall be such rate as the Secretary determines fair and reasonable in relation to the rate at which payments are made available for corn. The Secretary shall make not less than 50 per centum of any payments under this paragraph to producers of the 1983 crop as soon as practicable after a producer enters into a land diversion contract with the Secretary and in advance of any determination of performance. If a producer fails to comply with a land diversion contract after obtaining an advance payment under this paragraph, subject to the provisions of subsection (f), the producer shall repay the advance immediately and, in accordance with regulations issued by the Secretary, pay interest on the advance."

1983 CROP UPLAND COTTON ACREAGE REDUCTION PROGRAM

SEC. 209. Section 103(g)(9)(A) of the Agricultural Act of 1949 is amended by—

(1) inserting immediately after the third sentence the following: "If the Secretary should make the determination referred to in the first sentence of this subparagraph for the 1983 crop of upland cotton and establish an acreage reduction program for such crop, the Secretary shall provide that

25 per centum of any reduction required in the acreage base for the farm shall be made under the diversion program provided in subparagraph (B) and the balance of the reduction shall be made under an acreage limitation program as provided in this subparagraph. In such event, as a condition of eligibility for loans, purchases and payments on the 1983 crop of upland cotton the producers on a farm must comply with the combined acreage limitation and diversion program."

(2) inserting immediately after the eighth sentence (after the addition of paragraph (1) of this amendment) the following: "Notwithstanding any other provision of this subparagraph, the acreage base to be used for the farm under the programs for the 1983, 1984, and 1985 crops of upland cotton shall be the same as the acreage base applicable to the farm under the acreage limitation program for the 1982 crop, adjusted to reflect established crop-rotation practices and to reflect such other factors as the Secretary determines should be considered in determining a fair and equitable base."

1983 CROP RETIREMENT AND CONSERVATION PAYMENTS FOR UPLAND COTTON

SEC. 210. Section 103(g)(9)(B) of the Agricultural Act of 1949 is amended by adding at the end thereof the following: "Notwithstanding the foregoing provision of this paragraph, the Secretary shall make crop retirement and conservation payments available to any producer of the 1983 crop of upland cotton who participates in the acreage limitation program for such crop of upland cotton under subparagraph (A), if the permitted acreage for the farm as determined under such subparagraph is reduced by an amount equivalent to the reduction required by the Secretary to be made under this subparagraph in addition to the reduction made under the acreage limitation program, and the producer devotes to approved conservation uses an equivalent acreage of cropland in addition to the acreage devoted to conservation uses under such acreage limitation program. Such payments shall be made in an amount computed by multiplying (i) the rate of \$.25 per pound by (ii) the farm program payment yield for the crop, by (iii) the additional acreage diverted under this subparagraph. The Secretary shall make not less than 50 per centum of any payments under this subparagraph to producers of the 1983 crop as soon as practicable after a producer enters into a land diversion contract with the Secretary and in advance of any determination of performance. If a producer fails to comply with a land diversion contract after obtaining an advance payment under this subparagraph, subject to the provisions of paragraph (13), the producer shall repay the advance immediately and, in accordance with regulations issued by the Secretary, pay interest on the advance."

1983 CROP RICE ACREAGE REDUCTION AND DIVERSION PROGRAM

SEC. 211. Section 101(i)(5)(A) of the Agricultural Act of 1949 is amended by—

(1) striking out in the first sentence "Notwithstanding any other provision of this subsection, the" and inserting in lieu thereof "Notwithstanding any other provision of law, except as provided in the third and fourth sentences of this paragraph, the";

(2) inserting immediately after the second sentence of this paragraph the following: "If on November 15, 1982, the Secretary estimates that the 1982 crop of rice will be in excess of 145 million hundredweight, rough

rice basis, the Secretary shall announce on such date that there will be in effect for the 1983 crop of rice a combination of (i) an acreage limitation program as described in this paragraph and (ii) a diversion program as described under paragraph (B) under which the acreage planted to rice on the farm would be limited to the acreage base for the farm reduced by a total of 20 per centum, consisting of a reduction of 10 per centum under the acreage limitation program and a reduction of 10 per centum under the diversion program. As a condition of eligibility for loans, purchases and payments on the 1983 crop of rice, the producers on a farm must comply with the terms and conditions of the combined acreage limitation and diversion program.";

(3) inserting immediately after the ninth sentence (after the addition of paragraph (2) of this amendment) the following: "Notwithstanding any other provision of this subparagraph, the acreage base to be used for the farm under programs for the 1983, 1984, and 1985 crops of rice shall be the same as the acreage base applicable to the farm under the acreage limitation program for the 1982 crop, adjusted to reflect established crop-rotation practices and to reflect such other factors as the Secretary determines should be considered in determining a fair and equitable base."

1983 CROP RETIREMENT AND CONSERVATION PAYMENTS FOR RICE

SEC. 212. Section 101(i)(5)(B) of the Agricultural Act of 1949 is amended by adding at the end thereof the following: "Notwithstanding the foregoing provision of this paragraph, if the Secretary announces that there will be in effect a diversion program on the 1983 crop of rice, the Secretary shall make crop retirement and conservation payments available to any producer of the 1983 crop of rice who participates in the acreage limitation program for such crop of rice under subparagraph (A), if the permitted acreage for the farm is reduced by an amount equivalent to 10 per centum of the acreage base for the farm in addition to the reduction under subparagraph (A), and the producer devotes to approved conservation uses an equivalent acreage of cropland in addition to the acreage devoted to conservation uses under such subparagraph. Such payment shall be made in an amount computed by multiplying (i) a payment rate of \$3.00 per hundredweight by (ii) the farm program payment yield for the crop, by (iii) the additional acreage diverted under this subparagraph. The Secretary shall make not less than 50 per centum of any payments under this subparagraph to producers of the 1983 crop as soon as practicable after a producer enters into a land diversion contract with the Secretary and in advance of any determination of performance. If a producer fails to comply with a land diversion contract after obtaining an advance payment under this subparagraph, subject to the provisions of paragraph (8), the producer shall repay the advance immediately and, in accordance with regulations issued by the Secretary, pay interest on the advance."

TITLE III—FOOD STAMP ACT AMENDMENTS OF 1982

SHORT TITLE

SEC. 301. This title may be cited as the "Food Stamp Act Amendments of 1982."

HOUSEHOLD DEFINITION

SEC. 302. Section 3(i) of the Food Stamp Act of 1977 (7 U.S.C. 2012(i)) is amended by—

(1) in the first sentence, striking out "parents and children" and inserting in lieu thereof "parents and children, or siblings,"; and inserting "or siblings" after "the parents"; and

(2) inserting after the first sentence a new sentence as follows: "Notwithstanding paragraph (1) of the preceding sentence, an individual who lives with others, who is 60 years of age or older, and who is unable to purchase food and prepare meals because such individual suffers, as certified by a licensed physician, from a disability which would be considered a permanent disability under section 221(i) of the Social Security Act (42 U.S.C. 421(i)) or from severe, permanent, and disabling physical or mental infirmity which is not symptomatic of a disease shall be considered, together with any of the others who is the spouse of such individual, an individual household without regard to the purchase of food and preparation of meals if the income of the others (as computed under section 5(d) for purposes of determining, without regard to such individual and spouse, eligibility to receive food stamp benefits) does not exceed 165 per centum of the applicable nonfarm income poverty guideline prescribed by the Office of Management and Budget, adjusted as described in section 5(c), for a household excluding such individual and spouse."

ROUNDING DOWN

SEC. 303. (a) The second sentence of section 3(o) of the Food Stamp Act of 1977 (7 U.S.C. 2012(o)) is amended by—

(1) in clause (1), inserting "(based on the unrounded cost of such diet)" after "adjustments"; and

(2) in each of clauses (6) and (7), striking out "nearest dollar increment" each place it appears and inserting in lieu thereof "nearest lower dollar increment for each household size".

(b) Section 5(e) of the Food Stamp Act of 1977 (7 U.S.C. 2014(e)) is amended by—

(1) in the second sentence, striking out "nearest \$5 increment" each place it appears and inserting in lieu thereof "nearest lower dollar increment"; and

(2) in the proviso to clause (2) of the fourth sentence, striking out "nearest \$5 increment" each place it appears and inserting in lieu thereof "nearest lower dollar increment".

(c) The first sentence of section 8(a) of the Food Stamp Act of 1977 (7 U.S.C. 2017(a)) is amended by inserting "lower" after "nearest".

DISABLED VETERANS AND SURVIVORS

SEC. 304. (a) Section 3 of the Food Stamp Act of 1977 (7 U.S.C. 2012) is amended by adding at the end thereof a new subsection as follows:

"(r) 'Elderly or disabled member' means a member of a household who—

"(1) is sixty years of age or older;

"(2) receives supplemental security income benefits under title XVI of the Social Security Act (42 U.S.C. 1381 et seq.);

"(3) receives disability or blindness payments under title I, II, X, XIV, or XVI of the Social Security Act (42 U.S.C. 301 et seq.);

"(4) is a veteran who—

"(A)(i) has a wartime disability, peacetime disability, or disability by treatment or vocational rehabilitation, which is rated as total under section 314, 334, or 351, respectively, of title 38, United States Code; or

"(ii) is considered in need of regular aid and attendance or permanently housebound under any such section; or

"(iii) is considered permanently and totally disabled, in need of regular aid and attendance, or permanently housebound under subsection (a), (b), or (c), respectively, of section 502 of title 38, United States Code;

"(5) is a surviving spouse of a veteran and—

"(A) is considered in need of regular aid and attendance or permanently housebound under subsection (d) or (e), respectively, of section 541 of title 38, United States Code; or

"(B) receives veterans' compensation for a service-connected death or pension benefits for a non-service-connected death under section 321 or subchapter III of chapter 15, respectively, of title 38, United States Code, and has a disability considered permanent under section 221(i) of the Social Security Act (42 U.S.C. 421(i)); or

"(6) is a child of a veteran and—

"(A) is considered permanently incapable of self-support under section 414 of title 38, United States Code; or

"(B) receives veterans' compensation for a service-connected death or pension benefits for a non-service-connected death under section 321 or subchapter III of chapter 15, respectively, of title 38, United States Code, and has a disability considered permanent under section 221(i) of the Social Security Act (42 U.S.C. 421(i))."

(b) The first sentence of section 3(i) of the Food Stamp Act of 1977 (7 U.S.C. 2012(i)) is amended by striking out "sixty" and all that follows through "Act" the second place it appears and inserting in lieu thereof "an elderly or disabled member".

(c) Section 5(c)(1) of the Food Stamp Act of 1977 (7 U.S.C. 2014(c)(1)) is amended by striking out "a member who is" and all that follows through "Act" the second place it appears and inserting in lieu thereof "an elderly or disabled member".

(d) Section 5(e) of the Food Stamp Act of 1977 (7 U.S.C. 2014(e)) is amended by—

(1) in the fourth sentence, striking out "a member" and all that follows through "Act" the second place it appears and inserting in lieu thereof "an elderly or disabled member";

(2) in the fifth sentence—

(A) striking out "a member" and all that follows through "Act" the second place it appears and inserting in lieu thereof "an elderly or disabled member"; and

(B) in clause (A), striking out "household" and all that follows through "Act" the second place it appears and inserting in lieu thereof "elderly or disabled members".

(e) The first sentence of section 6(c)(1) of the Food Stamp Act of 1977 (7 U.S.C. 2015(c)(1)) is amended by striking out "sixty years" and all that follows through "Act" the second place it appears and inserting in lieu thereof "elderly or disabled members".

COORDINATION OF COST-OF-LIVING ADJUSTMENTS

SEC. 305. Section 5(d) of the Food Stamp Act of 1977 (7 U.S.C. 2014(d)) is amended by—

(1) at the end of clause (10), striking out "and"; and

(2) adding before the period at the end thereof the following: ", and (12) through September 30 of any fiscal year, any increase in income attributable to a cost-of-living adjustment made on or after July 1 of such fiscal year under titles II or XVI of the Social Security Act (42 U.S.C. 401 et seq.), section 3(a)(1) of the Railroad Retirement Act of 1974 (45 U.S.C. 231b(a)(1)), or section

3112 of title 38, United States Code, if the household was certified as eligible to participate in the food stamp program or received an allotment in the month immediately preceding the adjustment."

ADJUSTMENT OF DEDUCTIONS

Sec. 306. Section 5(e) of the Food Stamp Act of 1977 (7 U.S.C. 2014(e)) is amended by—

(1) in clause (1) in the second sentence, striking out "July 1, 1983" and inserting in lieu thereof "October 1, 1983"; and

(2) in subdivision (i) of the proviso to clause (2) in the fourth sentence, striking out "July 1, 1983" and inserting in lieu thereof "October 1, 1983".

STANDARD UTILITY ALLOWANCES

Sec. 307. Section 5(e) of the Food Stamp Act of 1977 (7 U.S.C. 2014(e)) is amended by—

(1) inserting after the fourth sentence the following: "In computing the excess shelter expense deduction under clause (2) of the preceding sentence, a State agency may use a standard utility allowance in accordance with regulations promulgated by the Secretary, except that a State agency may use an allowance which does not fluctuate within a year to reflect seasonal variations. An allowance for a heating or cooling expense may not be used for a household that does not incur a heating or cooling expense, as the case may be, or does incur a heating or cooling expense but is located in a public housing unit which has central utility meters and charges households with regard to such expense only for excess utility costs. No such allowance may be used for a household that shares such expense with, and lives with, another individual not participating in the food stamp program, another household participating in the food stamp program, or both, unless the allowance is prorated between the other individual, household, or both."; and

(2) in subclause (B) of the last sentence, striking out "preceding sentence" and inserting in lieu thereof "fourth sentence of this subsection".

AVERAGING INCOME

Sec. 308. Section 5(f)(1) of the Food Stamp Act of 1977 (7 U.S.C. 2014(f)(1)) is amended by inserting after subparagraph (B) a new subparagraph as follows:

"(C) In computing household income under this section, household income that is received on a regular weekly or biweekly basis from the same source(s) shall be converted to a monthly amount."

MIGRANT FARMWORKERS

Sec. 309. The last sentence of section 5(f)(4) of the Food Stamp Act of 1977 (7 U.S.C. 2014(f)(4)) is amended by inserting after "subsection" the following: "(except the provisions of paragraph (2)(A) of this subsection relating to migrant farmworker households)".

ELIMINATION OF STUDIES AND REPORTS

Sec. 310. (a) The second sentence of section 5(g) of the Food Stamp Act of 1977 (7 U.S.C. 2014(g)) is amended by striking out "(1)" and ", and (2)" and all that follows through "1978".

(b) Section 8(a) of the Food Stamp Act of 1977 (7 U.S.C. 2017(a)) is amended by striking out the last sentence.

(c) Section 17 of the Food Stamp Act of 1977 (7 U.S.C. 2026) is amended by—

(1) striking out subsections (d) and (e); and

(2) redesignating subsection (f) as subsection (d).

CATEGORICAL ELIGIBILITY

Sec. 311. Section 5 of the Food Stamp Act of 1977 (7 U.S.C. 2014) is amended by adding at the end thereof a new subsection as follows:

"(j) Notwithstanding subsections (a) through (i), a State agency may consider a household in which all members of the household receive benefits under a State plan approved under part A of title IV of the Social Security Act (42 U.S.C. 601 et seq.) and whose income does not exceed the applicable income standard of eligibility described in subsection (c) to have satisfied the resource requirements prescribed under subsection (g)."

IMPROVEMENT IN COST-EFFECTIVENESS OF MONTHLY REPORTING SYSTEMS

Sec. 312. The first sentence of section 6(c)(1) of the Food Stamp Act of 1977 (7 U.S.C. 2015(c)(1)) is amended by—

(1) inserting "adult" between "all" and "members"; and

(2) adding, after "Secretary", the following: ", except that with the prior approval of the Secretary, a State agency may select categories of households which may report at specified less frequent intervals upon the State agency's showing to the satisfaction of the Secretary that to require households in such categories to report monthly would result in unwarranted expenditures for administration of this subsection".

REQUIREMENTS APPLICABLE TO JOB SEARCH

Sec. 313. Section 6(d)(1)(ii) of the Food Stamp Act of 1977 (7 U.S.C. 2015(d)(1)(ii)) is amended by inserting, after "Secretary", the following: "(including any reporting and inquiry as may be required by the Secretary to be fulfilled at the time of application)".

VOLUNTARILY QUITTING A JOB

Sec. 314. Section 6(d)(1)(iii) of the Food Stamp Act of 1977 (7 U.S.C. 2015(d)(1)(iii)) is amended by striking out "sixty days" in the proviso and inserting in lieu thereof "ninety days".

ALTERNATIVE ISSUANCE SYSTEM

Sec. 315. Section 7 of the Food Stamp Act of 1977 (7 U.S.C. 2016) is amended by inserting at the end thereof a new subsection as follows:

"(g) The Secretary may require State agencies—

"(1) to issue or deliver coupons using alternative methods, including an automatic data processing and information retrieval system; or

"(2) to issue, in lieu of coupons, a reusable document to be used as part of an automatic data processing and information retrieval system and to be presented by, and returned to, recipients at retail food stores for the purpose of purchasing food;

if the Secretary determines, in consultation with the Inspector General of the Department of Agriculture, that the use of such document or such system is necessary to improve the integrity of the food stamp program: *Provided*, That the cost of such document or system shall not be imposed upon retail food stores participating in the food stamp program."

ELIMINATION OF INITIAL MONTH ALLOTMENTS OF UNDER TEN DOLLARS

Sec. 316. The first sentence of section 8(c) of the Food Stamp Act of 1977 (7 U.S.C. 2017(c)) is amended by inserting before the period at the end thereof the following: ", except that no allotment may be issued to a household for the initial month or period if the value of the allotment which such

household would otherwise be eligible to receive under this subsection is less than \$10".

DISCLOSURE OF INFORMATION

Sec. 317. Section 11(e)(8) of the Food Stamp Act of 1977 (7 U.S.C. 2020(e)(8)) is amended by inserting before "except that (A)" the following: "or of direct Federal assistance programs and Federally-assisted State programs".

EXPEDITED SERVICE

Sec. 318. Section 11(e)(9) of the Food Stamp Act of 1977 (7 U.S.C. 2020(e)(9)) is amended to read as follows:

"(9) that the State agency shall—
"(A) provide coupons no later than five days after the date of application to any household which—

"(i)(I) has gross income that is less than \$150 per month; or

"(II) is a destitute migrant or a seasonal farm worker household in accordance with the regulations governing such households in effect July 1, 1982; and

"(ii) has liquid resources that do not exceed \$100; and

"(B) to the extent practicable, verify the income and liquid resources of the household prior to issuance of coupons to the household."

PROMPT REDUCTION OR TERMINATION OF BENEFITS

Sec. 319. Section 11(e)(10) of the Food Stamp Act of 1977 (7 U.S.C. 2020(e)(10)) is amended by inserting after "earlier" the following: ", except that in any case in which the State agency receives from the household a written statement containing information that clearly requires a reduction or termination of the household's benefits, the State agency may act immediately to reduce or terminate the household's benefits and may provide notice of its action to the household as late as the date on which the action becomes effective".

DUPLICATION OF BENEFITS

Sec. 320. Section 11(e) of the Food Stamp Act of 1977 (7 U.S.C. 2020(e)) is amended by—

(1) in paragraph (16), striking out the period at the end thereof and inserting in lieu thereof a semicolon;

(2) in paragraph (20), striking out "and" at the end thereof;

(3) in paragraph (21), striking out the period at the end thereof and inserting in lieu thereof "; and"; and

(4) adding at the end thereof a new paragraph as follows:

"(22) that the State agency shall determine, not less frequently than annually—

"(A) whether households participating in the food stamp program include as members individuals who, under section 6(g), may not be considered members of such households; and

"(B) whether households participating in projects conducted under section 17(b)(1) receive both coupons and any assistance provided under such projects in lieu of coupons."

ERROR RATE REDUCTION SYSTEM

Sec. 321. (a) Section 11(e) of the Food Stamp Act of 1977 (7 U.S.C. 2020(c)), as amended by title XIII of the Agriculture and Food Act of 1981 (Public Law 97-98; 95 Stat. 1282), is amended by adding at the end thereof the following new paragraph:

"(23) that the State agency shall reimburse the Secretary, in an amount determined under section 16(g) of this Act, for

the value of excessive allotments issued to households."

(b) Section 16(c) of the Food Stamp Act of 1977 (7 U.S.C. 2025(c)), as amended by title XIII of the Agriculture and Food Act of 1981 (Public Law 97-98; 95 Stat. 1282), is amended to read as follows:

"(c) The Secretary is authorized to adjust a State agency's federally funded share of administrative costs pursuant to subsection (a) of this section, other than the costs already shared in excess of 50 per centum as described in the proviso to subsection (a) of this section, by increasing such share to 60 per centum of all such administrative costs in the case of a State agency whose (1) payment error rates with respect to eligibility, overissuance, and underissuance as calculated in the quality control program undertaken pursuant to subsection (d)(1) of this section are less than 5 per centum and (2) whose percentage rate of invalid decisions in denying eligibility as calculated in the quality control program conducted under subsection (d)(1) of this section is less than a nationwide percentage rate that the Secretary determines to be reasonable."

(c) Section 16 of the Food Stamp Act of 1977 (7 U.S.C. 2025), as amended by title XIII of the Agriculture and Food Act of 1981 (Public Law 97-98; 95 Stat. 1282), is amended—

(1) in subsection (d)—

(A) by striking out "Effective October 1, 1978, and annually thereafter, each" and inserting in lieu thereof "Each";

(B) by striking out "subsection (c)(2)" and inserting in lieu thereof "subsection (c)", and

(C) in paragraph (1) by striking out "error rates" and inserting in lieu thereof "payment error rates", and

(2) in subsection (g)—

(A) by striking out paragraphs (1), (2), and (3), and inserting in lieu thereof the following new paragraph:

"(1)(A) Each State agency shall pay, other than for good cause as determined by the Secretary, to the Secretary or have withheld by the Secretary, as described in paragraph (2) of this subsection, the amount determined under subparagraph (B).

"(B) For purposes of subparagraph (A), the amount payable by a State agency for a fiscal year is an amount equal to the difference between—

"(i) the product of—

"(I) the payment error rate for such fiscal year; and

"(II) the aggregate value of all allotments issued to households by such State agency in such fiscal year; and

"(ii) the product of—

"(I) the allowable error rate for such fiscal year; and

"(II) the aggregate value of allotments issued to households by such State agency in such fiscal year.

"(C) For purposes of subparagraph (B)(i)(I), the term 'payment error rate' means the percentage of all food stamp allotments which are issued in a fiscal year to households that fail to meet the eligibility requirements of sections 5 and 6 of this Act and are overissued to eligible households.

"(ii) For purposes of subparagraph (B)(ii)(I), the allowable error rate is—

"(I) 9 per centum for fiscal year 1983;

"(II) 7 per centum for fiscal year 1984; and

"(III) 5 per centum for fiscal year 1985 and each fiscal year thereafter.", and

(B) by redesignating paragraph (4) as paragraph (2).

BENEFIT IMPACT STUDY

SEC. 322. Section 17 of the Food Stamp Act of 1977 (7 U.S.C. 2026), as amended by section 310(c) of this title, is amended by adding at the end thereof a new subsection as follows:

"(e) The Secretary shall conduct a study of the effects of reductions made in benefits provided under this Act pursuant to part 1 of subtitle A of title I of the Omnibus Budget Reconciliation Act of 1981, title XIII of the Agriculture and Food Act of 1981, and any other laws enacted by the Ninety-seventh Congress which affect the food stamp program. The study shall include a study of the effect of retrospective accounting and periodic reporting procedures established under such Acts, including the impact on benefit and administrative costs and on error rates and the degree to which eligible households are denied food stamp benefits for failure to file complete periodic reports. The Secretary shall submit to the Committee on Agriculture of the House of Representatives and Committee on Agriculture, Nutrition, and Forestry of the Senate an interim report on the results of such study no later than February 1, 1984 and a final report on the results of such study no later than March 1, 1985."

AUTHORIZATION FOR APPROPRIATIONS

SEC. 323. The first sentence of section 18(a)(1) of the Food Stamp Act of 1977 (7 U.S.C. 2027(a)(1)) is amended by—

(1) striking out "and" after "September 30, 1981"; and

(2) inserting before the period at the end thereof the following: "not in excess of \$12,623,000,000 for the fiscal year ending September 30, 1983; not in excess of \$12,817,000,000 for the fiscal year ending September 30, 1984; and not in excess of \$13,570,000,000 for the fiscal year ending September 30, 1985".

PUERTO RICO

SEC. 324. (a) Section 19(a)(1)(A) of the Food Stamp Act of 1977 (7 U.S.C. 2028(a)(1)(A)) is amended by inserting "non-cash" before "food assistance".

(b) The amendment made by subsection (a) shall not apply with respect to any plan submitted under section 19(b) of the Food Stamp Act of 1977 (7 U.S.C. 2028(b)) by the Commonwealth of Puerto Rico in order to receive payments for fiscal year 1982 or fiscal year 1983.

(c) The Secretary of Agriculture shall conduct a study of the impact of making food assistance available to needy persons in the Commonwealth of Puerto Rico in the form of cash under section 19 of the Food Stamp Act of 1977 (7 U.S.C. 2028). The study shall include such impact on both the nutritional status of residents of Puerto Rico and the economy of Puerto Rico. The Secretary shall submit a report of the findings of such study to the Committee on Agriculture of the House of Representatives and the Committee on Agriculture, Nutrition, and Forestry of the Senate not later than six months after the effective date of this title.

REIMBURSEMENT OF POLITICAL SUBDIVISIONS AND STATE AGENCIES FOR WORKFARE ADMINISTRATIVE EXPENSES

SEC. 325. (a) Section 20(g) of the Food Stamp Act of 1977 (7 U.S.C. 2029(g)) is amended by—

(1) redesignating paragraph (2) as paragraph (3); and

(2) by inserting after paragraph (1) a new paragraph as follows:

"(2)(A) From 50 per centum of the funds saved from employment related to a work-

fare program operated under this section, the Secretary shall pay to each operating agency an amount not to exceed the administrative expenses described in paragraph (1) for which no reimbursement is provided under such paragraph.

"(B) For purposes of subparagraph (A), the term 'funds saved from employment related to a workfare program operated under this section' means an amount equal to the three times the dollar value of the sum of the decrease in allotments issued to households, to the extent that such decrease results from wages received by members of such households for the first month of employment beginning after the date such members commence such employment if such employment commences—

"(i) while such members are participating for the first time in a workfare program operated under this section; or

"(ii) in the thirty-day period beginning on the date such first participation is terminated."

(b) The amendments made by this section shall take effect October 1, 1982.

AMENDMENTS MADE BY THE OMNIBUS BUDGET RECONCILIATION ACT OF 1981 AND THE AGRICULTURE AND FOOD ACT OF 1981

SEC. 326. (a) Notwithstanding section 117 of the Omnibus Budget Reconciliation Act of 1981 (7 U.S.C. 2012 note), the amendments made by sections 101, 102, 103, 104, 105, 106, 107 (other than subsection (b)), 108 (other than subsection (c)), 109, 110, 111, 112, 113, and 114 of such Act shall take effect on the date of the enactment of this title, unless such amendments have taken effect before such date.

(b) Notwithstanding section 1338 of the Agriculture and Food Act of 1981 (7 U.S.C. 2012 note), the amendments made by sections 1302 through 1333 of such Act shall take effect on the date of the enactment of this title, unless such amendments have taken effect before such date.

EFFECTIVE DATES

SEC. 327. (a) Except as provided in subsection (b), this title and the amendments made by this title shall take effect on the date of the enactment of this title.

(b) Sections 321 and 325 shall take effect on October 1, 1982.

The CHAIRMAN. Pursuant to the rule, the gentleman from Virginia (Mr. WAMPLER) is recognized for 30 minutes.

Mr. WAMPLER. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I am offering a substitute to H.R. 6892, the agriculture reconciliation bill. The substitute incorporates all of the provisions of H.R. 6892 with the following changes to title III, the Food Stamp Amendments of 1982.

First, the Secretary is given the authority to require food stamp applicants to look for a job at the time they apply for food stamps.

Second, definitive guidelines are established for expedited service so that only those in immediate need receive benefits on an expedited basis.

Third, States will be required to reduce their error rates to 9 percent by 1983; to 7 percent by 1984; and, to 5 percent by 1985. States will be respon-

sible for repaying the amount of Federal money misspent over these target levels.

I might mention that in my State, the agencies responsible for administering public assistance programs have a good record in their efforts to reduce the number of errors and the amount of money spent in error. According to USDA the latest error rate for the food stamp program for payments to ineligible persons and overpayments to eligible persons is 8.38 percent in Virginia.

These agencies are continuing in their efforts to reduce error rates. While I would like to see a zero error rate—and I know in Virginia they agree—it is not reasonable to assume that a program which costs over \$11 billion this year and helps over 22 million people can operate with no errors.

I support the food stamp program as one that provides assistance to the poor, the elderly, the disabled, and the working poor. However, when \$1 billion is spent in error, positive action must be taken by all States administering the program.

The additional savings in the substitute totals \$197 million over the 3-year reauthorization of the food stamp program. This additional savings comes from strengthening work requirements and tightening program administration.

The substitute also contains the amendment offered by the chairman of the Foreign Affairs Committee concerning donation of dairy products and all technical committee amendments.

I urge you to support the amendment in the nature of a substitute to H.R. 6892.

Mr. Chairman, to further explain the amendment in the nature of a substitute, I yield 12 minutes to the gentleman from Missouri, (Mr. COLEMAN) who is the ranking minority member of the Subcommittee on Domestic Marketing, Consumer Relations, and Nutrition.

Mr. COLEMAN. Mr. Chairman, I appreciate the gentleman's yielding me this time.

The amendment in the nature of a substitute to H.R. 6892, as the gentleman from Virginia (Mr. WAMPLER) has explained, does in fact provide for three changes, and, additionally, there is a fourth savings in this substitute. Other than these changes, I want to point out to the membership that our substitute is identical to the committee bill, including the committee amendments and the amendment offered by the gentleman from Wisconsin (Mr. ZABLOCKI) which were just accepted by the committee. No other changes and no other issues are involved but these three changes that occur in this amendment.

The first change gives the Secretary the authority to require that food

stamp applicants who are physically and mentally able to do so and who are between the ages of 18 and 60 look for jobs when they apply for food stamps. The committee bill gives States the option to require States to provide for this job search rule.

I support strong work incentives in the food stamp programs, and that is why I disagreed with what the administration originally proposed in this area when they wanted to limit the 18-percent earned income deduction. That is not before us today.

I want to see food stamp participants who are able to become self-sufficient. I also want to make sure that those who are able to work actively seek a job, and that those who quit a job in order to receive food stamps voluntarily are not supported at taxpayers' expense. It is my hope that some of the people who apply for food stamps, when they make application for food stamps, will find a job, thereby either reducing the amount of food stamps they need, or eliminating their need altogether for the food stamp program. Others may not be able to find a job and I recognize that. However, under this substitute they will at least begin the process of looking for a job rather than waiting until they receive food stamps and then looking for a job, as present law requires.

The Congressional Budget Office estimates overall savings of \$15 million in 1983, \$17 million in 1984, and \$18 million in 1985 under this part of the substitute.

The General Accounting Office supports this provision, Mr. Chairman. They believe that it is appropriate, based upon their reviews to require food stamp applicants to begin job search activities as soon as they apply for food stamp benefits.

The second part of the substitute covers expedited service. Current law allows individuals to come in to a food stamp office and say they have no money or no income and receive food stamps within 2 to 3 days. The only verification, the only proof, if you will, that is required is that they are the person they state they are by identity, and that they reside where they say they reside.

The substitute provides that specific criteria be established to determine eligibility for expedited service. We want to provide standards, if you will, for the local food stamp office and criteria for them to gauge who should and who should not receive expedited service. First of all, we set a maximum gross income level not to exceed \$150 a month for expedited service. An exception is provided for migrant and seasonal farmworkers. These households will continue to follow the income rules that were in place in July of this year.

Second, all households must have liquid assets to qualify for expedited service of less than \$100. By "liquid assets" I mean assets immediately available in a checking or savings account or similar source.

Third, we think that people who ask for expedited service and special treatment ought to have some sort of verification made on their claims, that is, to verify the income and liquid assets provisions that we have provided for. Applicants can prove this by showing pay stubs, bankbooks, or similar items.

Fourth, the expedited service cases must be processed as soon as possible but no later than 5 days. I offered this provision in committee along with the gentleman from California (Mr. PARNETT). We failed on a tie vote in committee, and that is why I bring it to the floor this afternoon.

Obviously there are sentiments for change needed for expedited service. In fact, last year the chairman of our subcommittee himself offered a very similar amendment which was adopted. The conferees, though, on the Agriculture and Food Act of 1981 dropped this provision. But the changes for expedited service are still needed.

The General Accounting Office also studied this area and indicated that they found that within the States there were different numbers of cases that come through the food stamp program and ask to be expedited. They ranged from 6 percent to 70 percent of all new cases that walked through the food stamp office and asked for expedited service. Obviously, the States are now floundering around without any guidance from the Congress and without any standards or criteria upon which to judge the eligibility of an expedited case.

I want to point out that the American Public Welfare Association, which represents State welfare agencies, supports changes in expedited service. The CBO estimates that we can save \$45 million over the next 3 years by this provision in the substitute. I feel that this provision places reasonable limits on expedited service. It requires verification of income and resources and curtails overuse and abuse and insures that those people who really should receive expedited service have it available to them.

□ 1345

Mr. Chairman, the third change in the substitute from what the committee bill represents is a change in the error rate reduction and sanctions system.

The committee bill contains a section requiring States to reduce their error rates to specific targets. However, the committee did not go far enough, Mr. Chairman, because they did not require positive responses on

behalf of the States administering the food stamp program.

The substitute we feel accomplishes this. States must reduce their error rates to 9 percent by 1983, 7 percent by 1984, and down to 5 percent by 1985.

If the States fail to meet these error rate reductions they are expected, under this substitute, to repay the amount of benefits sent out in error, their error, if you will, over these target levels.

According to the USDA, over \$1 billion a year, Mr. Chairman, each year goes out to food stamp participants who are either ineligible for benefits or receive too many benefits.

We are talking here, remember, about documented cases of ineligibility, of errors being made to people who received food stamps. We are not talking about taking away food stamps from people who deserve them or who are eligible. We are talking about States tightening up the administration of the food stamp program because they are the ones that are making the errors, but they are doing it with our Federal tax dollars. That is the problem.

CBO feels that we can save an additional \$120 million over 3 years by adopting this language for reducing error rates.

Finally, Mr. Chairman, the authorizations for appropriations in this bill are adjusted to reflect these savings in the substitute. The cap that we adopted in committee, by my motion, will stay in place but, of course, because of these changes that the substitute makes we will adjust the cap accordingly to reflect the accurate and true cost as determined by CBO of the cost of the food stamp program for the next 3 years.

That will also, of course, include the additional costs that are resulting from decreases in AFDC as well as SSI.

To spell out specifically what those caps are for the next 3 years, our substitute contains the following:

In 1983, a cap of \$12.623 billion; in 1984, \$12.817 billion; and in 1985, \$13.570 billion.

This represents, Mr. Chairman, more money than ever has been spent on the food stamp program. In 1983 this represents an increase of almost 12 percent over the 1982 authorization levels.

I urge all of us to support this Republican substitute. It represents an additional savings over 3 years of \$197 million. These savings are made through strengthening the work requirements and improving the administration of the program, Mr. Chairman, without reducing benefits to those people who are entitled to food stamps.

Mr. ROEMER. Mr. Chairman, will gentleman yield?

Mr. COLEMAN. I yield to my colleague from Louisiana.

Mr. ROEMER. I just have a question on the numbers. As I understand it, the committee recommendations save about \$1.3 billion in the food stamp expenditures over a 3-year period; is that correct?

Mr. COLEMAN. I believe that is correct.

Mr. ROEMER. The gentleman's amendment or the amendment offered on his side of the aisle would save an additional how much money per year? Could the gentleman repeat that for us so that we understand it?

Mr. COLEMAN. I will try and break it down by year if I can. It is \$197 million over 3 years. The first year's savings would be \$25 million; the second year's savings would be around, I believe, \$91 million, and the rest would be \$81 million in 1985, but the total is \$197 million.

Mr. ROEMER. The question I have in my mind is in reading the language from the other body I understand they saved about \$2.6 billion in the program over 3 years. Our own Agriculture Committee recommended a bill that saves about half that. The gentleman adds savings of some small additional dollars.

Do you know what the difference is of about \$1.1 billion? How did the other body save money that we seem unable to save?

Mr. COLEMAN. The gentleman is absolutely right; the other body saves sufficiently more than we did, a billion plus more.

The reason they did that was that they addressed some of these issues that we failed to address in committee or had insufficient votes to pass in committee and probably do not have sufficient votes to pass here on the floor.

That is, they went through a number of things, but the biggest one is the change in the thrifty food plan, that is the amount of dollars it takes to fund each family or each individual on the food stamp program.

The other body simply reduced the period of time in which we adjusted the thrifty food stamp program and that is where they saved an awful lot of their money in the process.

They saved \$430 million in 1983 and \$246 million in 1984 and \$160 million in 1985, just in that part of the bill alone.

Mr. ROEMER. So if the gentleman will yield for one final question, as I understand it your amendments would save an additional \$100 million or so?

Mr. COLEMAN. Almost \$200 million.

Mr. ROEMER. Almost \$200 million, but would be substantially less than the savings suggested by the other

body. No. 1; and, No. 2, would allow the appropriated funds expected to be spent for food stamps to go up each of the next 3 years to all time-highs in each of those years?

Mr. COLEMAN. The gentleman has it absolutely right.

I do not think anyone could characterize this amendment as being a hard line substitute. There could certainly have been a lot bigger figures, but we felt these figures could pass, whereas higher figures may not have.

Mr. ROEMER. I thank the gentleman.

The CHAIRMAN. Is the gentleman from Texas (Mr. DE LA GARZA) opposed to the amendment?

Mr. DE LA GARZA. I am, Mr. Chairman.

The CHAIRMAN. The gentleman from Texas is recognized for 30 minutes.

Mr. DE LA GARZA. Mr. Chairman, I yield 11 minutes to the gentleman from New York (Mr. RICHMOND), chairman of the subcommittee that handles food stamps.

Mr. RICHMOND. I certainly support H.R. 6892 in its entirety.

We are met, for the 7th year in my 8 years of service in Congress, to alter the food stamp program one more time in the name of budget cuts. We have conducted 40 days of hearings and 95 days of markup on this program since January 1975. We continue to give it more scrutiny than any other social program. We constantly tinker with and change its details until neither recipients nor State and local administrators can remember what the rules of the game are. Why should that be? Why must this program consistently provide, year after year, the primary target for budget slashers and those who would scheme to redistribute income from the poor to the rich?

There is no good answer. Academic experts and social policymakers agree that food stamps are the best countercyclical program ever devised to offset, however partially, the ravages of unemployment and depression. Doctors testify that food stamps are "the most valuable health dollar spent by the Federal Government." Nutritionists know that food stamps are responsible for the progress we have made this past generation in eliminating hunger and malnutrition in this country.

Today, however, we meet to consider budget savings and not the nutritional needs of the poor.

H.R. 6892 amends the Food Stamp Act of 1977 and extends the food stamp program for 3 additional years through September 30, 1985. In the course of extending the food stamp program, the committee added amendments that would sanction the States for overissuance of food stamp allotments and tighten eligibility requirements.

Title III extends an emergency feeding program which enables 21 to 22 million truly needy Americans to purchase food; second, it expands program benefits to include disabled veterans, elderly, social security recipients, and certain AFDC recipients; third, it tightens the household definition and modifies procedures for determining benefits; fourth, it prevents fraud and abuse by establishing State option for job search at application and providing for alternative issuance systems; fifth, it imposes strict sanctions on States for excessive error rates, improving cost-effectiveness of monthly reporting, allowing prompt reduction or termination of benefits and eliminating possible duplication of benefits; and sixth, demonstrates a concern for nutrition by studying the impact of program budget cuts on the nutritional status and social conditions of needy Americans.

The amendments to the Food Stamp Act achieve significant cost savings through measures believed by the committee to represent the least harmful alternatives to needy households dependent upon the program. The committee emphasizes that as a result of legislation adopted in 1981, savings were made in the food stamp program which totaled \$6.7 billion for the 3 fiscal years affected. While the committee was again compelled to make further food stamp cuts to achieve the directive that it make cost savings in programs within its jurisdiction, any deeper cuts in the program would impact heavily on the ability of low-income Americans to have an adequate diet.

The committee adopted many reforms in the food stamp program to control error rates and to curb abuse. These provisions resulted in additional savings of \$334 million in fiscal year 1983, \$431 million in fiscal year 1984, and \$561 million in fiscal year 1985 for a total net savings of \$1.3 billion over a 3-year period.

This bill will continue the food stamp program for 3 more years through September 30, 1985, as well as provide authorization for funding for fiscal year 1983 at \$12,648,000,000 for fiscal year 1984 at \$12,908,000,000 and for fiscal year 1985 at \$13,651,000,000.

Our committee, recognizing the fallibility of the economic forecasts on which the spending limits for the food stamp program are based, imposed a ceiling on expenditures to maintain oversight and control of program funding. The economic assumptions on which the spending ceilings are founded include the following estimates for unemployment and food price inflation:

	(In percent)		
	Fiscal year—		
	1983	1984	1985
Unemployment.....	8.6	7.7	7.3
Food price inflation.....	6.1	6.8	6.9

In addition, CBO savings estimates assume October 1, 1982, implementation date.

The total spending established for each fiscal year includes an appropriation level of \$825 million for Puerto Rico as mandated in the Omnibus Budget Reconciliation Act of 1981.

It also includes offsets of \$190 million for fiscal year 1983, \$208 million for 1984, and \$213 million for 1985 to reflect the impact on food stamp costs of reductions in other benefit programs.

A recent report from the Food and Nutrition Service of USDA issued June 1982 indicates that participation in the food stamp program averaged 22.7 million for March 1982, the highest level in 11 months. Although participation has increased for 4 consecutive months it remains about 1.3 percent below a year earlier. Legislative and administrative changes slowed the usual seasonal increase in participation. However, the sluggish economy and high rates of unemployment have pushed participation up, particularly in areas hard hit by unemployment. In the Midwest region, where unemployment is exceptionally high, participation during March of this year was 5 percent above a year earlier and about 120,000 more than March 1980. Commensurate with the overall decrease in total participation, the costs of the food stamp program in March 1982 were 5 percent below the preceding March. Each 1-percent increase in unemployment adds \$500 million to program costs and each 1-percent price increase adds \$150 million.

The committee assumed that the current CBO estimates for program expenditures are accurate and will be sufficient to maintain benefits for those Americans without resources to purchase an adequate diet. It is not the intent of the committee to abruptly cut off food stamps or abruptly decrease the amount of food stamps that recipients would receive in the last quarter in the event that unemployment or inflation should go higher than the figures projected by CBO. At the same time, the committee recognizes the responsibility of both USDA and the State agencies to operate an efficient and effective program with minimal error and waste.

EXPANDING PROGRAM BENEFITS

The bill expands program benefits to households previously excluded from eligibility. Recognizing the inequities created by previous legislative actions, the committee amends the current statute to correct these problems.

First, the committee expands the definition of "elderly or disabled" member to include disabled veterans and veterans' disabled spouses and children who receive veterans' compensation for purposes of household definition, income standards of eligibility, income deductions, and other places in the law where this definition applies.

This provision will cost \$5 million in each fiscal year.

Second, the committee, recognizing the hardship placed on recipients of social security and other retirement benefits which are indexed on July 1 of each fiscal year, exempts this additional income from consideration for purposes of determining food stamp benefits through September 30 of the fiscal year. Many senior citizens have written to committee members describing the hardships they face when food stamp benefits are reduced in July as a result of cost-of-living increases in their social security or retirement benefits.

Since the cost-of-living increases are based on the CPI which include food price inflation, the committee concurs it is infinitely unfair to reduce food stamp benefits and, consequently, jeopardize the ability of these individuals to obtain an adequate diet. Under this bill, any July 1 cost-of-living increase received by elderly or disabled households from another Federal program—such as social security, SSI, railroad retirement and veterans' pensions—would be ignored until October 1 of that year for purposes of the food stamp program. As of October 1, an adjustment in food stamp benefits would be made to reflect COLA's in all programs, including food stamps.

There are two major reasons for this proposal. The first is to avoid the effect of having elderly and disabled persons lose a substantial portion—30 to 45 percent—of their social security COLA in decreased food stamp benefits for a 3-month period. This has a disheartening and confusing effect on participants, especially when the October 1 food stamp COLA would totally or partially restore the lost benefits just 3 months later.

The second justification for this proposal is to save States and local governments the administrative cost and effort involved in adjusting the food stamp benefits of about 2 million households with elderly or disabled members twice in a 3-month period.

This provision will cost \$19 million in fiscal year 1983, \$21 million in fiscal year 1984, and \$23 million in fiscal year 1985.

Third, the committee provides States the opportunity to consider households in which all members receive aid for family with dependent children benefits and who meet the food stamp income eligibility guide-

lines as having met the food stamp resource requirements. This revision is intended to ease the administrative burden on States by eliminating the need to apply two different, though similar assets tests. At the same time this provision maintains the integrity of the food stamp eligibility rules by preserving the food stamp gross income test.

Fourth, we require States to base benefit allotments and eligibility on income received for 30 days of labor or obligation, whether that income is determined prospectively or retrospectively. This provision prevents States from calculating a month's benefits and eligibility for an individual who receives income for a 5- or 6-week period.

The committee recognized that households receiving weekly or biweekly earned or unearned income will experience months each year when there are five weekly checks or three biweekly checks in a single month. In such months, unless the household's weekly or biweekly income is converted into a monthly amount, the monthly income is misleading and leads to numerous technical terminations or suspensions. Income averaging prevents households from being terminated for 1 month as a result of a fluke of the calendar.

ACHIEVING PROGRAM SAVINGS

The bill reduces the costs of the food stamp program over 3 years by an estimated \$1.3 billion. Based on economic assumptions used in the first concurrent budget resolution, the following table represents CBO's approximate figures for the savings if implemented on October 1, 1982.

While achieving these savings, we recognized the severe cuts made in these programs in fiscal year 1982 through enactment of the Omnibus Reconciliation Act of 1981 (Public Law 97-35) and the Agriculture and Food Act of 1981 (Public Law 97-98). Together, these laws reduced food stamp costs by 10 percent or about \$2.3 billion in fiscal year 1982. Public Law 97-98 reauthorized the program for 1 year only and included the following major changes:

First, lowered income eligibility limits to 130 percent of poverty for all nonelderly and nondisabled households. This was the level suggested by the President to limit the program to the truly needy.

Second, delayed thrifty food plan adjustments for 9 months. The adjustment scheduled for October 1, 1982, will be the first in 21 months.

Third, froze the standard and excess shelter/dependent care deductions for a 2½-year period through July 1, 1983. Also, deleted the home ownership components from the CPI when updating these deductions in the future.

Fourth, reduced the deduction allowed for work-related expenses from 20 percent to 18 percent of earnings.

Fifth, mandated retrospective accounting and periodic reporting.

Sixth, eliminated strikers.

Seventh, converted the food stamp program in Puerto Rico to block grant at reduced and fixed funding levels.

Eighth, required that benefits paid in the first month of eligibility be prorated to the day the application was received.

Ninth, tightened work requirements and provided guidelines for optional nationwide workfare.

Tenth, increased penalties for fraud and misrepresentation and minimum mandatory court sentences for criminal offenses.

Eleventh, enacted a variety of other measures to improve program administration and enhance accountability.

This year the committee achieved the cost savings by administrative changes in the program. The committee agreed to:

Require rounding down to the lowest dollar increment any computations of, respectively, the thrifty food plan, standard and excess shelter deductions, and value of allotments. As is current practice, the unrounded number will continue to be used as the basis for updating the deductions the following year and the household size adjustments to the thrifty food plan should be based on the unrounded cost of such plan.

Delay the next scheduled adjustment of the shelter-and-dependent-care deductions from July 1 to October 1, 1983 and updates the deductions every October 1 thereafter. This would coordinate the update of these deductions with the timing of the update in the thrifty food plan. Current law provides that the standard and the shelter/dependent care deductions will be adjusted on July 1, 1983; therefore, under the amendment, the adjustments to both deductions and to the thrifty food plan will take place on the same dates, reducing the work required by State food stamp administrators. On October 1, 1983, a new series of adjustments will begin, using \$85 for standard deduction and \$115 for the shelter cap as the base. Each adjustment the following years should use as the base the unrounded numbers from the previous years.

Eliminate the requirement that USDA conduct studies on the financial resources requirements of the food stamp program, the effect of the elimination of the purchase requirement; the feasibility of recoupment, and the Consumer Price Index. These studies or reports have been completed by the Department.

Eliminate any allotment for the initial month or period of participation for a household if the value of the allotment it otherwise would receive is

less than \$10 because of proration of the initial month's benefits. In subsequent months, the household would receive the full allotment to which it was entitled.

The committee rejected an amendment to impose unreasonable restrictions for expedited service on individuals who face real hunger emergencies. GAO testified before the committee in the March hearings that quality control data for 20 States showed that errors for expedited cases were generally lower than those for the overall caseload. During this time of exceptionally high unemployment, to deny households who experience temporary poverty access to food stamps would be unreasonable punishment. The administration reported that in New Jersey 60 percent of the households that were given expedited services treatment during a temporary emergency did not require food stamps on a long-term basis.

It was our intent in defeating this amendment to insure that destitute individuals, especially migrant farmworkers, can continue to feed their families in emergencies. To afford migrant farmworkers continued protection, the committee exempts these households from the requirements of retrospective accounting and retains current expedited service eligibility and benefit levels for migrant and seasonal farmworkers.

We refused to delay adjustments in the thrifty food plan which would further erode the purchasing power of recipients. Because of legislation enacted last year, the July benefit allotments are based on food prices that are 22 months out of date, which corresponds to a 10- to 15-percent loss in food purchasing power. Many of the witnesses at this year's food stamp hearings testified that the current delay in thrifty food plan adjustments may be a contributing factor to the increased use of food banks and soup kitchens by low-income persons around the country. At food stamp hearings this year, witnesses estimated that an average food stamp family lost \$4 a week in food-buying power—an amount which represents three meals a day for each family member for 2 days each month—with the 1981 freeze on adjustments, and, if the family lived in a State with a sales tax on food, they lost almost \$3 more. If food stamps were delayed again this year, food stamp families would lose another \$5 in food-buying ability.

Under current law, food stamp benefits are adjusted every October to reflect the cost of USDA's thrifty food plan during the previous June. USDA's last national household food consumption survey, conducted in the late 1970's, found that five-sixths of all households whose food expenditures equaled the cost of the thrifty

food plan failed to obtain the recommended daily allowances for the basic nutrients. Today, the average food stamp benefit equals but 43 cents per person per meal, and the maximum benefit—to families with no other income for food purchases—totals 64 cents per person per meal.

Food stamp benefits have not been overindexed. Food stamp allotments are not adjusted according to the whole CPI, but only to food prices. A recent USDA study examining food stamp trends from 1975 to 1980 found that when food stamp benefits are measured in real dollars, the average per person benefit did not rise at all during this period.

The food stamp program is the only Federal entitlement program that has not been indexed in a timely manner and intends that food stamp allotments be updated to reflect increases in food prices.

PREVENTING FRAUD AND ABUSE

The committee recognizing that to effectively serve the needs of the poor it must make a substantial effort to direct program benefits away from those who are not entitled to them. Accordingly, the committee adopted several measures which reflect the suggestions made by State administrators, officials from the General Accounting Office, and the Department's Inspector General.

The committee bill includes the following antifraud and abuse provisions:

First, job search.—Establishes an option, rather than a uniform Federal mandate, for States to apply job search requirements at the time households apply for participation in the program. The provision allows States to take local employment conditions into account.

Second, voluntarily quitting a job.—Lengthens the voluntary quit disqualification period from 60 to 90 days, making this penalty compatible with the AFDC disqualification period.

Third, reimbursement for workfare administrative expenses.—Directs the Secretary to use one-half of the savings resulting from the employment of food stamp recipients who had been participating in workfare programs to defray additional portions of State agency costs of operating such programs. These requirements provide added incentive to State agencies to focus on obtaining jobs for food stamp recipients participating in workfare programs. CBO concurred with the administration's position that Federal costs would be less than \$1 million annually under the current policy for optional workfare.

Fourth, household definition.—Requires siblings who live together to be treated as one household unless one sibling is elderly, blind or disabled and permits certain elderly, disabled persons who live with others but who do not purchase food and prepare meals—

and their spouses—to be considered a separate household.

Fifth, standard utility allowance.—Prohibits the use of standard utility allowances for households, such as those in public housing, that are not billed for heating or cooling costs. This prohibition does not preclude the use of utility allowances based on electricity costs of the household, even though heating and cooling expenses are not included. Households whose actual utility expenses exceed the State standard utility allowance must be allowed to claim the full expenses incurred.

Sixth, alternative issuance system.—Authorizes the Secretary to require that State agencies develop alternative issuance systems or to issue a reusable document in lieu of coupons if the Secretary, in consultation with the Inspector General, determines that use of such systems or documents is necessary to protect the integrity of the food stamp program and reduce losses to the program. The Secretary is also authorized to test methods of issuing benefits in which the food coupon itself is eliminated. The Secretary cannot require retail food stores participating in the program to bear the development and implementation costs of such systems or documents.

CONTROLLING ERROR

The overissuance of benefit allotments caused by recipients or administrative staff results in unnecessary costs to the food stamp program. The committee, in an effort to reduce the amount of overissued benefits, has approved several measures to improve the administration of the program, while at the same time, applying strong sanctions on the States. To ease the State's administrative burden and reduce costs, the committee has adopted the following provisions: Monthly reporting requirements both to exempt households having no income and all of whose adult members are aged, blind or disabled and to authorize exemptions where monthly reporting resulted in unwarranted administrative expenditures. To ease the State's administrative burden and reduce costs, the committee granted State agencies the authority to immediately reduce or terminate a household's benefits if the agency receives clear, written information from the household that indicates such a benefit reduction or termination is required. This provision does not preempt the right of such household to appeal or to have benefits reinstated to prior levels if proper procedures were followed for the appeal.

In addition, the committee bill authorizes the Secretary to cross match the cashout files of SSI recipients with food stamp recipient files to identify and eliminate any duplication of benefits.

First, monthly reporting.—Exempts households in which all adult members are aged, blind, or disabled and authorizes exemption of certain households where a State agency established the requirement is not cost effective.

Second, prompt reduction.—Authorizes State agencies to immediately reduce or terminate a household's benefits if the agency receives clear, written information that such a benefit reduction or termination is required.

Third, duplication of benefits.—Requires State agencies that have cashed out the SSI portion of their caseload or that operate pilot cashout programs to annually match the cashout files of SSI recipients with food stamp recipient files to eliminate duplication of benefits.

Fourth, error rate reduction system.—Sets specific targets for error reduction by State agencies for fiscal years 1983-85 and thereafter and imposed sanctions for States failing to meet the targets.

Fifth, disclosure of information.—Authorizes release of information obtained from households to other federally assisted programs.

DEMONSTRATING A CONCERN FOR NUTRITION

In creating the food stamp program, President Nixon recognized the Federal Government's role in providing emergency nutrition to people who are suddenly in trouble. Even today, the average food stamp recipient uses the program allotments for an average of 3 or 4 months a year to maintain an adequate diet.

While protecting needy Americans from hunger and malnutrition, the food stamp program has increased the purchasing power of recipients in obtaining farm commodities produced in this country. Today's farmers receive almost 60 percent of the food stamp dollar spent on commodities such as fruits, vegetables, dairy products, eggs, poultry, and meat. The committee recognizes that it is in the best interests of farmers, of consumers, and of working people to preserve this program for those truly needy Americans who depend on this assistance for nourishment.

Last year, the committee established a block grant for nutrition assistance to Puerto Rico. It was the committee's intent that the money would be spent to improve the nutritional status of the needy. The plan for operating this block grant, recently submitted by Puerto Rico and approved by the administration, specifies that funds distributed for nutrition will be issued in the form of cash. After 1 month of operation, conflicting reports suggest the program is not meeting the goals or purposes the committee intended. Acting on this information, the committee adopted an amendment to require that as of October 1, 1983, food

assistance made available under the block grant to the Commonwealth of Puerto Rico shall be made available to recipients in a form other than cash.

To determine the impact on both the nutritional status of Puerto Ricans and the economy of the island, the committee has directed the Secretary of Agriculture and the General Accounting Office to conduct a thorough study of the cashout program and report to Congress 6 months after enactment of this bill.

The committee is concerned over the large number of reductions enacted last year and likely to be enacted this year in income-tested programs. The committee believes that before it considers further food stamp proposals, it will be important to have solid information on the effects of these cuts on program recipients.

I would like to just answer the gentleman from Louisiana for a minute, if I may.

The gentleman from Louisiana has to understand, as does my colleague from Missouri (Mr. COLEMAN), with whom I have worked so closely on this food stamp legislation, that the food stamp program in the United States is the only basic nutritional emergency program we have.

As inflation rises and unemployment rises there is only one place that the people of the United States can go for emergency nutrition and that is to food stamps.

Each 1-percent increase in unemployment increases the food stamp program by \$557 million and adds 1 million people to the program. Each 1-percent increase in inflation adds \$150 million to the cost of the program.

We recognize that people in the United States are entitled to an adequate diet. We also recognize that if people are seriously in need and are hungry they cannot look for a job or go to school. That is the whole theory of the food stamp program.

The Senate adopted a most onerous provision in its food stamp bill. They again refused to index the thrifty food program plan. The entire program is based on a meager diet called the thrifty food plan. You and I could not live on it, believe me, because I have tried it.

They refused to index the thrifty food plan, so basically people on food stamps right now are getting a food plan based on figures that are from 22 months old.

There are other ways to balance the Federal budget.

Mr. ROEMER. Mr. Chairman, will the gentleman yield?

Mr. RICHMOND. I am happy to yield to the gentleman from Louisiana.

Mr. ROEMER. I am glad that the gentleman has cured some of the obvious confusion on the differences in the other body's action and what you are proposing here.

One final point that I would make is that these monetary ceilings on food stamps mean absolutely nothing.

The cost of the program depends on the circumstances in our Nation. If one is eligible, even under the tightened eligibility here, they will receive the food stamps; is that not true?

Mr. RICHMOND. The gentleman is right, except that if inflation keeps going up and unemployment keeps rising, the States will not have enough money to allocate food stamps for those who are truly needy.

Mr. ROEMER. I understand that. If the gentleman will yield, my only point is that it is not the dollars that we are debating but it is the eligibility.

Mr. RICHMOND. The food stamp program while it provides benefits to those individuals who meet the eligibility criteria is subject to a spending ceiling. This cap is based on the economic assumptions and the best estimates of program costs put forth by the Congressional Budget Office. While the committee intends that this program provide all eligible persons with the means to purchase food, it imposed a cap in order to maintain oversight and control of program funding.

Mr. ROEMER. If the gentleman will continue to yield, and I will conclude, that is my point. It is not the dollar limit that is important. It is the fairness of the eligibility requirements.

I thank the gentleman.

Mr. RICHMOND. Over the years, and this is my 7th year that I have been debating food stamps out of 8 years that I have been in Congress, we have constantly tightened up the program.

Last year we cut the food stamp program by \$6.7 billion for fiscal years 1982-84. We have tightened this program almost as much as any program can be tightened. We have made it difficult for the States to run the food stamp program because Congress has changed the rules and regulations so often.

I would like to see a period of 2 or 3 years during which time the State administrators could straighten out their programs and decrease their error rates. The States need an adequate amount of funds to install new technology to help them reduce errors.

New rules and regulations take a certain educational period. In the last 7 years these State administrators have not had one year that the rules and regulations have not been changed drastically.

Mr. ROEMER. I appreciate the gentleman's statement. You yourself said 22 million people are in the program, almost an all-time high, and we are looking at the next 3 years spending in each succeeding year an all-time high figure. The figure given here on the floor today is that it seems some

States enjoy an error rate where they have erroneously paid over 9 percent.

Mr. RICHMOND. The gentleman is right on the error rate. However, it seems contradictory to so harshly penalize the States in light of the fact that the Federal Government has been unable to get its own error rate in the supplemental security income program below 5.3 percent, not even counting disability determination errors. Supplemental security income is far easier to run and should have a lower error rate than food stamps, because it is limited to elderly and disabled persons who generally do not work and are far less likely to have unreported earnings.

The gentleman is not correct in saying the program is at an all-time high. On the contrary, the program participation is 1.2 percent less than at the same time last year. People who are on the food stamp program only stay on the food stamp program for an average period of 4 months.

So the gentleman can understand how much different it is to administer the food stamp program than it is to administer the supplemental security income program.

Meanwhile, let us not condemn the States by taking a major portion of their administrative costs. That would be defeating the purpose of the error rate sanctions.

Mr. ROEMER. And I know that the gentleman is not happy with the 9-percent error rate.

Mr. RICHMOND. No.

Mr. ROEMER. But does the gentleman think it is fair to lower that rate?

Mr. RICHMOND. Of course. We have adopted the same language in committee that the other body adopted.

The Wampler amendment wishes to go even further. The Wampler amendment goes so far it becomes impractical.

Mr. KAZEN. Mr. Chairman, will the gentleman yield?

Mr. RICHMOND. I yield to the gentleman from Texas.

Mr. KAZEN. I thank the gentleman for yielding.

The error rate is reflected directly by the number of people that are working to reduce that rate; is that not so?

Mr. RICHMOND. The gentleman is correct.

Mr. KAZEN. If we do not give the States the money with which to oversee this program we can pass all of the laws in the world in this Congress saying that we want a zero error rate, but if we do not have the enforcers, the people that are going to do the checking, we are not going to succeed.

In my opinion that is what is happening now. The States are cutting back on their personnel because they have budget problems, too.

What we are doing is cutting our nose to spite our face.

We are cutting the personnel that oversees the program and I do not know that we are making up the difference.

I will tell the gentleman that I am expecting recipients of food stamps in my district to increase. I represent, as the gentleman well knows, an area along the border of Mexico, along with my colleague from Texas, Mr. DE LA GARZA, and some others, Mr. WHITE and Mr. LOEFFLER.

The Mexican peso has just been devaluated again for the second time in 6 months. Six months ago it was about 12 to 1. Today it is 9 to 1.

Our unemployment is going up. In my own home county it is 18 percent.

The gentleman can appreciate what we are going to be up against, additional unemployment because retail establishments are not going to be able to sell anything like the volume they have been used to. There are going to be wholesale layoffs and no jobs at which these people can be employed. You can have as many provisions as you want about people having to register for work, but if there are no jobs available they do not mean a thing.

□ 1400

Mr. RICHMOND. The gentleman from Texas makes my case, of course. The gentleman from Texas very correctly says that if we make our rules so onerous that the States cannot follow them, then we are defeating ourselves.

So we know, therefore, that we have to depend upon the States to do the administration. Now, if we do not make it worth the States' while to reduce their error rate, put in computers, put in modern technology, we are going to defeat ourselves.

The Senate bill and the House bill do precisely that. We put out the carrot and the stick and we give the States every opportunity to properly reduce their error rates. The Wampler amendment, unfortunately, is impractical; and if it is put into law, it will have a reverse effect. It will make the States throw up their hands and do nothing to modernize their operation.

Mr. KAZEN. If the gentleman will yield for just one more statement. All of us want to reduce the price of this program.

Mr. RICHMOND. Yes.

Mr. KAZEN. Every person who is on the rolls who does not deserve to be there is taking food out of the mouths of people who do need it and are deserving. So all of us are interested in lowering this error rate. But until we get the personnel to monitor this program, we are not going to do it. As I understand the substitute, an application for expedited service has to be completed and processed in 5 days. I

will ask the gentleman, where are they going to get the personnel to complete an application and the certification in 5 days?

Mr. COLEMAN. Will the gentleman yield to me to answer that question?

Mr. RICHMOND. I can answer the gentleman. The gentleman was using expedited service, with error rate. Expedited service is another matter which we will discuss later, but on error rate, which we have been discussing, the gentleman is 100 percent right on. If we do not make it worth the States' while to modernize and to computerize, to reduce their error rates, they are going to throw up their hands and do nothing. The gentleman makes a great case.

Mr. KAZEN. I am sorry that I got the gentleman confused on this. I am talking about both of them. The error rate on the regular program needs personnel, and the expedited service needs personnel.

Now, where are we going to get them? If we can employ them, fine. But if we do not, how can they comply with the law?

Mr. RICHMOND. The gentleman from Texas is right. We certainly have to do everything possible to encourage the States to run efficient, modern programs. As the gentleman knows, most States are not totally computerized. We have to do everything possible to help update their systems with modern technology. We cannot do that with the Wampler substitute. We can with the committee bill.

The sanctions in the Wampler substitute are so large that they would likely be counterproductive. They would remove so many resources from a State that the State would have insufficient resources to invest in new technology and other systems needed to reduce errors in future years.

Both approaches require a 5-percent error rate in fiscal year 1985. They differ in fiscal year 1983 and 1984.

Under the committee bill, a State must—in fiscal year 1983—either reduce its error rate one-third of the way to 5 percent, or achieve a 9-percent error rate. In fiscal year 1984, a State must cut its error rate by two-thirds of the way to 5 percent, or achieve a 7-percent error rate. This means that a State with a 14-percent error rate would have to get to 11 percent for fiscal year 1983, to 8 percent in fiscal year 1984, and to 5 percent in fiscal year 1985.

The Wampler substitute simply sets standards of 9 percent for fiscal year 1983, and 7 percent for fiscal year 1984, and has no provision for reducing errors by one-third each year. A State that currently has a high error rate, makes a heroic effort, and cuts its error rate in fiscal year 1983 by one-third of the way to 5 percent could still face very large sanctions under this approach.

H.R. 6892 sanctions States that fail to meet their error rate targets by reducing the Federal share of their administrative costs 5 percent for each of the first 3 percentage points that the error rate exceeds the target, and by 10 percent for each additional point that their error rate exceeds the target. In other words, if a State's target is 5 percent but its actual error rate is 8 percent, it would lose 15 percent of the Federal share of its administrative costs. If its error rate was 10 percent it would lose 35 percent of the Federal share of its administrative costs.

The Wampler substitute, by contrast, penalizes a State a full dollar for every dollar in benefits overissued over the State's error rate target. This results in huge and unrealistic sanctions that in some cases would exceed 100 percent of the Federal share of a State's administrative costs.

In fact, if the error rates in fiscal year 1985 remained the same as they are today, States would be sanctioned over \$500 million under the approach in the substitute. This is an especially severe sanction, particularly in light of the fact that the Federal Government has been unable to get its own error rate in the SSI program below 5.3 percent not even counting disability determination errors. SSI is far easier to run and should have a lower error rate than food stamps, because it is limited to elderly and disabled persons who generally do not work and are far less likely to have unreported earnings.

Mr. WAMPLER. Mr. Chairman, I yield myself such time as I may consume.

Let me emphasize that there is nothing in this substitute that in any way reduces personnel to administer the food stamp program. I will include in the Record as part of my remarks the error rate for each State of the Union, Puerto Rico, District of Columbia, and Guam. And I might say that the error rate as issued by the Department of Agriculture for the period of October 1980, through March 1981, shows that 36 States of the Union have error rates over 9 percent; 12 States have error rates over 12 percent; 5 States have error rates over 15 percent; and 1 State has an error rate of over 20 percent.

So there is nothing in this substitute that takes from the States any personnel that they presently have to achieve what we believe are reasonable targets as it pertains to reducing error rates.

On the contrary, we believe the penalty that the States will have to pay unless they reach these targets will have a desirable effect.

I will insert the error rate tables at this point:

States with error rates below 9 percent¹

	Percent
Alabama.....	8.47
Arkansas.....	8.80
California.....	8.66
Delaware.....	7.84
Guam.....	4.58
Hawaii.....	7.01

¹ USDA payment error rates (ineligible and overissuance) for the period of October 1980 through March 1981.

NOTE: There are 36 States who have error rates over 9 percent.

There are 12 States who have error rates over 12 percent.

There are 5 States who have error rates over 15 percent.

There is 1 State who has an error rate over 20 percent.

Mr. COLEMAN. Mr. Chairman, will the gentleman yield?

Mr. WAMPLER. I yield to the gentleman from Missouri.

Mr. COLEMAN. I appreciate the gentleman yielding.

Mr. Chairman, I think the gentleman has stated the facts very clearly. I do not think we could go forward with much more discussion erroneously thinking that this substitute does anything to benefits or to the personnel in place in States that administer this program, other than requiring those people who administer the program for the States to be more efficient and more effective in spending our Federal tax dollars. Yes, we do affect them in that way. I think that is a positive effect.

The committee bill simply gives a little slap on the wrist to the States. "Oh, if you do not come up to these error rate levels that we mandate, it is really all right, we are just really going to slap you on the wrists."

Our substitute says, "You are playing with our money, fast and loose in many cases and we want you to be more efficient." The gentleman has cited that 36 States in this country have error rates over 9 percent, 12 States have error rates over 12 percent, 5 States have error rates over 15 percent. That is not State money. That is our money. And that is money that could either be going to this program going to pay off some of that deficit that we all see looming in this budget process.

So let us not say that personnel are going to be cut, or any administrative costs reduced. The States are going to have to pay for their errors dollar for dollar. We are going to give them the incentive to reduce that error rate, and they can figure that out. But benefits will not be cut and personnel will not be cut in the process mandated by this substitute. No way.

Mr. ROEMER. Mr. Chairman, will the gentleman yield?

Mr. WAMPLER. I yield to the gentleman from Louisiana.

Mr. ROEMER. Where does the administrative money to supervise and administer this program come from? Does it come from the Federal Government or each of our individual States?

Mr. WAMPLER. I yield to the gentleman from Missouri to answer that question.

Mr. COLEMAN. Half of it comes from the Federal Government and half from the States.

Mr. ROEMER. I thank the gentleman.

As I understand it, from the earlier statistics given by the gentleman from Virginia, the error rate, payment of food stamps made in error to the wrong person, equals on a nationwide basis approximately 9 percent. Am I wrong in that statistic, or did I miss something?

Mr. WAMPLER. I said that 36 States of the Union have error rates over 9 percent. It has been estimated that the actual cost of error rates, that is, mainly those ineligible and

those receiving overissuance, constitutes the sum of almost \$1 billion. The cap for fiscal year 1982 was \$11.3 billion, which we believe is actually greater than the actual funds that will be expended.

Mr. ROEMER. If the gentleman will yield one final time, I thank him for his answer, and I would make the statement that I cannot think the gentleman's thoughts, and I do not know exactly where the gentleman is headed, but would like to believe that he supports this program to help people who need help, and that the gentleman's amendment is designed to take a very inefficient program and improve its efficiency for the benefit, of those who needs these food stamps most of all.

Mr. WAMPLER. The gentleman from Virginia has during the years that he has been a Member of this body supported the food stamp program. I think, by and large, it has served the purpose for which it was intended. When the food stamp program was initiated some years ago, it was intended primarily to achieve two goals: to help move agricultural surpluses into consumption and to help low-income Americans improve their chances of obtaining a nutritionally balanced diet.

The program has grown substantially through the years. The Committee on Agriculture has jurisdiction over the food stamp program, and we have tried to design a program that would have some semblance of fiscal discipline. Some years ago we chose—I was not among those who supported the effort—to abolish the so-called purchase requirement. Many households were required to put some of their resources up front, and then they received bonus stamps over and above that amount. Whether or not that was a wise move, I guess, is up to each Member to determine. But it seems to me that what we are attempting to do is to put some fiscal control over this program, since the reconciliation process does address itself primarily to budgetary restraint issues. We have not in this substitute denied any person who is presently eligible under the law to receive food stamps. What we are trying to get at is this unacceptable error rate, where people who are legally ineligible under the law and under the regulations are receiving benefits, and those where the local issuing office has overissued the number or value of the stamps.

Mr. ROEMER. I thank the gentleman for that statement. It means a lot to me. I would point out, in conclusion from my side, that you achieve savings of less than 60 percent of the savings achieved by the same program from the other body. For those who would criticize that you have been too harsh, you get less than 60 percent of what

they got, and I think deal with the question of eligibility and administration in a fair manner.

Mr. WAMPLER. I can only respond to my colleague from Louisiana by saying that if this bill passes, and if we go to conference with the other body, and if the gentleman from Virginia is a conferee—which I have every reason to expect I will be—it will be my purpose to see that we can keep the food stamp program intact as far as issuing adequate benefits to those who are eligible. But I am concerned today, as I have been for some years, about the fraud, the waste and the abuse in the food stamp program. To the extent that that exists, it denies needy people of the limited benefits that we may be able to finance. And in this time of fiscal restraint, we have to make every reasonable effort to eliminate people from the program who are not legally eligible or where they are issued stamps in error.

Mr. KAZEN. Mr. Chairman, will the gentleman yield?

Mr. WAMPLER. I yield to the gentleman from Texas.

Mr. KAZEN. I want to commend the gentleman for his statement. I think all of us want to get at this fraud and abuse.

The only thing that worries me is that we are not going to cure that situation unless we have the personnel out there to do the job that must be done to clear the rolls of those people who are committing the fraud and who are on these rolls and do not deserve to be on them.

Mr. WAMPLER. Let me respond to my friend, the gentleman from Texas, by saying again that there is nothing in this substitute that denies, takes, reduces, or takes away State personnel involved in the administration of the program.

Mr. KAZEN. I am not talking about taking away, because the job has not been done now with what they have. I am talking about putting some more in, into this particular effort, to weed the cheaters out. I know the gentleman has not cut any of them. But he has not put in any additional administration funds. And with what we have now, that number has apparently been inadequate.

Mr. WAMPLER. Let me say to my colleague that I think I understand his argument. But there is nothing in this substitute that in any way detracts from that effort of the State to administer the program.

I might also say that the Office of Inspector General of the Department of Agriculture has been quite active in recent months ferreting out fraud, waste, and abuse. I think it is important for State agencies to put more emphasis on trying to root out fraud and waste and abuse. It is a question of efficiency and effectiveness in the utilization of existing personnel.

Somes States are just more effective than others.

Mr. COLEMAN. Mr. Chairman, will the gentleman yield?

Mr. WAMPLER. I yield to the gentleman from Missouri.

Mr. COLEMAN. The gentleman from Texas has made a good point. We will provide not just the stick, we will provide the carrot, too, to the States; that if they get down to the 5-percent error rate before it is mandated, they will receive 60 percent of their administrative costs from the Federal Government. We are going to provide that incentive at the same time we are trying to get them to know that if they do not reach that error rate, it is going to cost them dollar for dollar that they give out in error.

Mr. KAZEN. If the gentleman will yield, my problem is trying to reconcile the fact that the bill cuts off, for instance, 25 percent of the funds going to administration, while I understand that the substitute cuts as much as 75 percent for Texas, my State.

Mr. COLEMAN. If I might respond, all I can say is that is not the fact, as I understand it. The gentleman comes from a State with a rather low error rate of less than 9 percent. So he would not be immediately affected. They are going toward the right direction. But the fact is that I cannot say that the statement that the gentleman made is an accurate statement. It is not my understanding, and I do not know that the gentleman from New York would state that that is his understanding of it either. I do not think the gentleman from New York would support that kind of draconian language in his bill.

Mr. KAZEN. I would just love to get that straightened out. If it does not cut 25 percent under the bill and 75 percent under this substitute, I would like to know what the percentages are, because as I understand it, as far as my State is concerned, these bills cut the funds for administration. Now, am I right or wrong?

Mr. COLEMAN. If I might respond, I do not want to say the gentleman is right or wrong. The information that has been supplied is incorrect.

Mr. KAZEN. What is the right information?

Mr. COLEMAN. We have absolutely no reductions in administrative expenses to the States by this amendment period.

Mr. WAMPLER. Mr. Chairman, I yield 2 minutes to the gentleman from Vermont (Mr. JEFFORDS).

Mr. CLAUSEN. Mr. Chairman, will the gentleman yield?

Mr. JEFFORDS. I yield to the gentleman from California.

Mr. CLAUSEN. Mr. Chairman, I rise in support of the substitute.

Mr. Chairman, the substitute offered by my distinguished colleague from Virginia (Mr. WAMPLER) is de-

signed to address the substantial error factor that contributes in a major way to the fraud and abuse that is being perpetrated throughout the food stamp program. While I am generally supportive of the food stamp program, it has been the subject to heavy taxpayer criticism, often leveled at flagrant examples of abuse. I believe we owe it to the taxpayers and to the legitimate food stamp recipients to correct this situation.

However, I wish to bring the attention of my colleagues other provisions of H.R. 6892 which are not addressed by the substitute.

Mr. Chairman, a very substantial number of Members from various States have expressed a desire to amend the dairy price support and other provisions of the committee bill. We are distressed over the decision of the Rules Committee to adopt such a restrictive rule, foreclosing the opportunity for several Members to participate in the amending process.

We from California believe that an excellent proposal was considered during the hearings conducted by the Subcommittee on Livestock, Dairy and Poultry on the dairy price support program. In discussions with the leadership of the Agriculture Committee, it became apparent that such an amendment would be subject to a question on germaneness and possibly jurisdiction. Thus, we were deprived of an opportunity to offer our amendment, due to the possibility of our effort being restricted on a germaneness ruling.

In light of these restrictions, I want to convey to the Members of the House and the leadership of the Agriculture Committee that it is our hope that they will work with us to include this amendment in the reconciliation bill. The amendment has a two-pronged purpose—to implement the program objectives of the California milk standards, and further, to give serious consideration to our sliding price incentive formula, which would minimize the impact of price support changes on farmers who have a substantial debt load, especially young farmers. I want to again emphasize my request to the committee leadership—give more in the way of consideration to the importance of raising the national milk standards to the levels that have been so successful in California, reducing Commodity Credit Corporation expenditures and providing a higher quality, better-tasting milk for the consumer.

If an opportunity to proceed along these lines develops in the House-Senate conference, and these provisions can be included, you would be going a long way toward eliminating the problems and criticisms associated with the costs of the dairy program, as well as providing something beneficial

to the consumer. If the leadership of the committee is restricted in including this proposal in conference, I urge them to become better acquainted with the benefits that will accrue from its adoption through other means.

Mr. EMERSON. Mr. Chairman, will the gentleman yield?

Mr. JEFFORDS. I yield to the gentleman from Missouri.

Mr. EMERSON. Mr. Chairman, I wish to associate myself with the remarks of the gentleman from Missouri, Mr. COLEMAN, whose statesmanship is an example to be emulated.

I enthusiastically support the reconciliation as reported by the Agriculture Committee on a bipartisan vote, but will also support the substitute of the gentleman from Missouri because of the savings and improvements effected in the food stamp program. The committee bill is excellent, but as with most matters, can always be made a little better. The Coleman substitute helps improve the efficiency in administration of food stamps, and provides the means to further reduce waste and fraud, so I urge two successive yeas here.

Mr. JEFFORDS. Mr. Chairman, first of all I would like to clear up this matter that was just rather summarily disposed of. The substitute says that the Secretary shall get back from the State, or withhold from the moneys going to the State for administration the penalty.

Now, how you can say that in one breath, and in the next breath say that is not going to cut back in administration, I do not know.

Let me get to what is a more important aspect of this situation, as far as I am concerned. Let us forget about budget cutting and the impact on States. Let us think about the fellow or woman who is going to be coming in to get expedited services. Let us take the situation that is going to be occurring.

□ 1415

He now has no money in his pocket. Under present law he can go into the office and he can get expedited food stamps. He can walk in and get stamps, so he can go out and get his family fed. This substitute says that even though he would have been eligible under present law if he had \$1,000 of income that month, now, under this provision if he had \$150, he cannot get his stamps, though an emergency situation exists. He, or she, is eligible for food stamps, has had less than \$150 of income, is broke, but has to wait weeks to get help for his hungry family.

Now, when you take a look at it from this perspective, what are we going to say to that individual. In order to save \$15 million from a \$10 billion bill, these families must face disaster. But these are human beings that we are going to have to deal with human

beings who will be forced to look somewhere else—to crime or whatever—to feed their families. I think that is ridiculous.

Now, back to the States. In the time I have left I would just point out that the present bill has sanctions which under present circumstances, would result in up to 100 percent of the funds slated for the States, administrative costs being taken back.

But the provision that we have here in the substitute would require 26 States to give back more money than they get from the Federal Government right now under present circumstances.

For instance, it is estimated that Alaska, Florida, Montana, New York, and Rhode Island would all be penalized an amount well over 200 percent of the Federal share of their administrative costs, based on the latest reported State error rates.

Now, as has been pointed out, the penalty money is going to have to come from that which the States use to administer the program. If you have a high error rate, you need the money to hire the people to make the error rate better, or else the State has to cough it up to the Federal Government. I cannot believe the Federal Government is going to end up suing these States to get the money back.

All in all, I think that the present bill handles these areas in food stamps just the same as the other body does. It is strict, but it is fair.

The CHAIRMAN. The time of the gentleman from Vermont (Mr. JEFFORDS) has expired.

Mr. DE LA GARZA. Mr. Chairman, I yield 1 additional minute to the gentleman from Vermont.

Mr. JEFFORDS. I would just like to inquire from the chairman of the subcommittee, if I am correct in my belief that if I had \$1,000 I might have been eligible for the program, but under the substitute's expedited service if I come in broke, but somehow had had \$150 during that month and had spent it on my family of four, that I would not be eligible for any expedited service and might have to wait until the end of the month to get any food stamps.

Mr. RICHMOND. Mr. Chairman, will the gentleman yield?

Mr. JEFFORDS. I yield to the gentleman from New York.

Mr. RICHMOND. The gentleman is correct.

Mr. JEFFORDS. I appreciate that. I think that is important to remember.

Mr. COLEMAN. Mr. Chairman, will the gentleman yield?

Mr. JEFFORDS. I yield to the gentleman from Missouri.

Mr. COLEMAN. I thank the gentleman for yielding.

I would like to put this in perspective because the gentleman from New York, who everybody knows is an advocate of the food stamp program, of-

fered an amendment with the same criteria that this substitute has in it regarding expedited service.

The gentleman just pointed out it would be \$150 gross income per month and \$100 liquid assets. That is an amendment the gentleman from New York offered last year. So it cannot be counted as an amendment without any sort of supportable evidence when the gentleman from New York offered it himself.

Mr. DE LA GARZA. Mr. Chairman, I yield 1 minute to the gentleman from Massachusetts (Mr. FRANK).

Mr. FRANK. Mr. Chairman, I was disappointed to see the substitute in no way changes the dairy part of the committee's bill.

I think it is regrettable that we are being asked to vote on, in the guise of a reconciliation bill, a 40-page title that creates an entirely new system for dairy subsidies. It seems to me to be that this program is as unlikely to bring serious cost savings this year as the bill passed last year.

We are going to set up our own OMEC, an Organization of Milk Exporting Counties. That is going to be the cartel that runs the dairy program, a cartel composed exclusively of dairy producers.

What we ought to do is to provide the Secretary of Agriculture the authority to lower the support price to give dairy farmers strong signals to keep their production down in order to cut Federal costs meaningfully. Instead, we are creating new boards, penalizing imports, and I think we are going shortly to see the same kinds of problems as last year.

I hope Members will vote against both the substitute and the whole bill and let us come back again in a form in which we can discuss the very significant changes in the dairy programs being proposed here.

While the committee purports to cut Government expenditures over the next 3 years, the history of this program makes clear that projections of this sort can be very unreliable. This year, for example, the costs of the dairy program are 50 percent higher than the estimates made only last October. What is sure to happen, however, under this bill is that a new anti-competitive, anticonsumer cartel will be established which will have the power to control the support price to be paid as well as supplies. The losers will most definitely be the consumers of this country but if history is our guide and the committee's cost projections, as well-meaning as they may be, do not turn out to be accurate, the taxpayers will also be big losers as they continue to support a bloated program.

The changes in the dairy program being proposed here are perhaps the most far reaching in over 30 years. I

regret that we were unable to have a full debate, and separate votes, on this aspect of the program.

Mr. DE LA GARZA. Mr. Chairman, I yield myself such time as I may consume and I do so in order to engage in a colloquy with the distinguished ranking minority member of the subcommittee, the gentleman from Missouri (Mr. COLEMAN).

In connection with the expedited service, the report of the committee on H.R. 6892 addresses other concerns; that there be no gap in benefits for those providing prompt verification of need, and that a State's issuance cycle not result in a migrant household, for example, being deprived of benefits in the second month of eligibility.

I understand that the ranking minority member of the subcommittee shares the views expressed in the committee report on these issues. I would ask the gentleman from Missouri (Mr. COLEMAN) if my understanding is correct.

Mr. COLEMAN. Mr. Chairman, will the gentleman yield?

Mr. DE LA GARZA. I yield to the gentleman from Missouri.

Mr. COLEMAN. I thank the gentleman for yielding.

Yes; the gentleman's understanding is correct.

Mr. DE LA GARZA. I thank the gentleman for his cooperation.

Mr. Chairman, I yield 3 minutes to the gentleman from Kansas (Mr. GLICKMAN).

Mr. GLICKMAN. Mr. Chairman, I would urge defeat of the substitute. I would like to speak specifically to the error rate questions that have been generating a lot of controversy here.

Both provisions, the committee provision and the substitute, contain penalties for States who fail to meet their error rate targets. The committee position reduces the Federal share of the administrative costs by 5 percent for each of the first 3 percentage points that the error rate exceeds the target and by 10 percent for each additional point that the error rate exceeds the targets.

I think we need to clarify this question.

The committee position does indeed penalize the States who do not meet their targets. Now the difference is that the substitute provision would establish basically a much lower percent error rate as a goal in this program, and based upon this assumption the States would be subject to enormous penalties if they do not meet the error rate reduction in the substitute provision. The States would still be subject to very significant penalties if they do not meet the error rate reduction in the committee provision.

I would like to read a bit from the remarks contained in the CONGRESSIONAL RECORD of the senior Senator

from Kansas when he made them back in May concerning this provision.

Under both of these approaches—

And by this Senator DOLE is talking about higher error rate provisions of the type proposed by the gentleman from Virginia (Mr. WAMPLER) as well as even more severe ones proposed by the administration—

States would be liable for hundreds of millions of dollars in sanctions starting next year and continuing every year thereafter.

Mr. COLEMAN. Mr. Chairman, will the gentleman yield?

Mr. GLICKMAN. I yield to the gentleman from Missouri.

Mr. COLEMAN. Is the gentleman talking about the administration's original proposal to have a zero error rate which I rejected and we rejected out of hand?

Mr. GLICKMAN. The gentleman is correct. But he is referring to both that provision and the one that Senator HELMS proposed. So he is talking about two. One is more closely identified with the gentleman's. But "under these approaches," and granted one of them is a zero rate proposal, "States would be liable for hundreds of millions of dollars in sanctions starting next year and continuing every year thereafter."

What these bills really do is transfer a portion of the cost of the food stamp program to State and local government. It would take an extraordinary effort for every State to lower its error rate to 5 percent. And this is the amendment of the substitute.

Then Mr. DOLE goes along to quote a GAO report, and my colleague from Missouri has cited a GAO report. In this report, July 18, 1980, the GAO said the following:

Fiscal sanctions create an adversary relationship between the Federal Government and the States at a time when a cooperative effort is needed to reduce errors. Using the quality control system as the basis for sanctions limits the system's value as a means for improving payment processes. Because a high error rate will result in sanctions, there is an incentive to identify fewer errors. To be most effective the quality control system should identify as many errors as possible.

GAO report says:

When penalties per error are too excessive, States might respond by hiding their errors or putting their energy into fighting the sanction policy rather than improving programs.

Mr. PANETTA. Mr. Chairman, will the gentleman yield?

Mr. GLICKMAN. I yield to the gentleman from California.

Mr. PANETTA. I thank the gentleman for yielding.

It is for that specific reason that the National Governors Association and the National Council of Welfare Administrators are strongly opposed to this amendment, because it in effect cuts the very costs that they need to

try to reduce the penalty rates in this area.

Mr. WAMPLER. Mr. Chairman, the gentleman from Kansas who just left the well, I know he is concerned about unacceptable error rates. We all are. However, using his State as an example, according to the data that was reported to me, Kansas has an error rate of 11.6 percent. That generally means for every \$100 of benefits issued in food stamps in Kansas, \$11.60 either are issued because the person was ineligible or there was an overissuance of stamps, or other similar problems.

So if the senior Senator from Kansas, working with the gentleman from Kansas, will impress upon their Governor and their director of public assistance, or whatever his title might be, to reduce that error rate only 2.6 percent during fiscal year 1983, they will be held harmless from the effect of the language in this amendment.

It seems to me it is not unreasonable to ask them to reduce the error rate by 2.6 percent.

Mr. COLEMAN. Mr. Chairman, will the gentleman yield?

Mr. WAMPLER. I yield to the gentleman from Missouri.

Mr. COLEMAN. I thank the gentleman for yielding.

We have heard a lot of talk today about what the other body has done and even have had from the well of this House remarks read to us and recited to us made by a Member of the other body, as if this is some reason why we are supposed to reject out of hand this substitute.

The reason the other body could make some changes that are incorporated in the committee bill is because the other body saved \$1.2 billion more in this program than what this committee bill could do. And that is why they can go down these avenues and vacillate here and there. But I do not think any Member of this House wants to be told how to vote because some Member of the other body has spelled out an argument.

The real argument on this substitute, and the only argument on the substitute, is whether or not we are going to get the States to reduce their error rates.

Now, who have we heard from? We have heard from the State administrative officials, the department of welfare, the department of social services from our home States. Are they for this substitute? No. And why are they not? Because it is their money that we want them to pay back to us.

These are the same States that petitioned the Congress for a balanced budget. We can reduce the error rates just down to 9 percent, and they are hounding us not to even do that.

Now, where do they stand? Do they stand for fiscal integrity and responsibility? Every time we have one of

these things they come down or call us up and tell us how bad it is.

You cannot have it both ways, Mr. Chairman. You either are going to reduce the error rate or provide some incentives to the States to administer this program. It is real great to go back and administer this program and call up and say, "vote against the Republican substitute." They can do that because it is our Federal tax dollars they are throwing away at the rate of \$1 billion a year.

Mr. DE LA GARZA. Mr. Chairman, I yield 1 minute to the gentleman from Wisconsin (Mr. OBEY).

Mr. OBEY. Mr. Chairman, I simply take this 1 minute to respond to the remarks made by the gentleman from Massachusetts (Mr. FRANK).

I would suggest to that gentleman that he is dead wrong in his analysis of the dairy situation.

This proposal today does not solve the problem because it is still skewed in favor of large operators and it makes no differentiation between what is happening on the part of small producers and large producers in terms of exceeding the production limits that the bill seeks to reach.

But I would also make the point that unless you attack national economic policy to bring down interest rates—which provide massive incentives for all sizes of operations to build their herds, to beat this interest rate situation, to enable them to make their payments at the bank—until you attack that problem, "You ain't doin' nothin'" to solve the dairy surplus problem.

Mr. DE LA GARZA. Mr. Chairman, I yield 2 minutes to the gentleman from California (Mr. PANETTA).

Mr. PANETTA. I would just basically make three important points that ought to be considered by Members in deciding on the substitute.

The first is that the committee has not only met their targets under reconciliation according to the CBO but has exceeded those targets.

Indeed, they were instructed to come up with \$3.2 billion in savings over 3 years. This committee has come forward with \$4.6 billion in savings confirmed by the CBO. That is \$1.3 billion more than they were instructed to do. It is \$1.2 billion in excess of what the Senate did.

Second, and I think importantly, food stamp reductions are included in this proposal as it comes before the House to the tune of \$1.3 billion over the next 3 years. That is added to almost \$7 billion that was included in reconciliation last year, for a total of \$8.3 billion that will be reduced from this program over the next few years.

And last, it is not as if this bill has not addressed the error rate issue or the jobs search issue. The fact remains that included in this bill is an error rate provision that would penalize the

States on a graduated basis. It is exactly the same provision included in the Senate as is the job search provision.

The reason we have gone for this approach is because there is validity to the fact that the more you cut back on the administrative costs of these programs, the more you feed into the presence of error and fraud that goes on at the local level.

□ 1430

So let us not cut off our noses to spite our faces. Let us try to improve the administrative program so that we can reduce the penalties and to improve the program overall.

Mr. DE LA GARZA. Mr. Chairman, I yield such time as he may consume to the gentleman from New York (Mr. WEISS).

Mr. WEISS. Mr. Chairman, I rise in strong opposition to the Wampler substitute amendment to the food stamp program.

Many recipients of food stamps are children and low-income elderly and are among the most truly needy in our society. They have already shouldered more than their fair share of budget cuts. Last year's cuts amounting to \$2 billion pared the program to a bare minimum; now, the poor who receive food stamp benefits are being asked to bare the burden of a further \$1.3 billion reduction. Further cuts, as required by the Wampler substitute, would be simply cruel.

It is tragic that barely 1 week after we authorized the largest single-year defense appropriation, we are faced with legislation that would slice \$200 million more than required from the food stamp program. In the context of last week's debate, that \$200 million would barely cover the cost to reactivate one outdated World War II battleship.

However, to the recipients of food stamps, the prospect of an additional \$200 million cut means that families in immediate and dire need, those most disadvantaged, can no longer receive immediate emergency benefits—they must wait 5 days. It means that the Agriculture Secretary can require them to fulfill mandatory job search requirements, even if jobseeking is rendered impossible because of individual family complications.

And, it means that States which may be making good faith efforts to improve error rates may be penalized by severe budgetary restraints. In my home State of New York, for example, significant progress has been made in reducing error rates, but it seems almost impossible to imagine New York—as well as many other States—achieving a 5 percent error rate by 1985. Under the provisions of the substitute bill, New York State could stand to lose \$30 million alone in food stamp benefits.

Mr. Speaker, the recommendations of the Agriculture Committee already provide deep and harsh cuts in food stamp benefits. Those cuts alone will take food out of the mouths of hungry children who have nowhere else to turn to relieve their starvation. The additional cuts sought by the substitute bill border on inhumanity.

The food stamp program has played a major role in eliminating the widespread hunger among the poor that existed in the 1960's. With the serious recession and record unemployment that Reaganomics has wrought, this is hardly the time to further shrink this vital food supplement program.

We have already seen evidence of the Reagan administration's attitude toward our Nation's hungry citizens. Drastic cuts in school lunch and breakfast programs, child care and summer feeding and WIC and the suggestion by an administration official that ketchup could be a suitable vegetable in a child's diet show clearly that the administration holds no compassion for the most destitute in our society.

I urge my colleagues to reject this cold-hearted proposal.

Mr. DE LA GARZA. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, first, I want to express my appreciation for the fact that this substitute, which I assume represents the consensus judgment of the minority members of the Agriculture Committee, adopts the provisions of the committee bill in almost all cases.

This means that we now have a bipartisan consensus in favor of the committee's proposals to help reduce surpluses and improve market prices for grains.

This means that we now have a bipartisan consensus in favor of the committee proposals to reduce dairy surpluses and the cost of the dairy support program.

This means that we now have a bipartisan consensus in favor of the committee's proposals for standby programs for cotton and rice.

And, finally, this means that we now have a bipartisan consensus in favor of almost all the important decisions represented in the committee's proposals for food stamps.

When you look at the substitute, Mr. Chairman, you find that it embraces about 95 percent of the committee bill. The only difference is that the substitute includes three additional cuts in the food stamp program.

I am encouraged by the fact that both I and the ranking minority member of our committee can stand before you together and urge the House to adopt 95 percent of the committee bill. Now, I want to urge the House to adopt that remaining 5 percent. I want to urge the House to

defeat the substitute because I believe that the proposed additional cuts in food stamps would do far more harm than good.

To begin with, Mr. Chairman, Members should ask themselves this question—are the additional proposed cuts needed in order to meet the Agriculture Committee's reconciliation goal?

The answer is—no. The committee bill as it stands makes cuts in spending which go 40 percent beyond our reconciliation goal. If even more reductions were desirable, I would support them for their own sake, but this is not the case with these amendments.

One of these amendments proposes a change in the treatment of people and families which apply for food stamps under the so-called "expedited services" provision. The amendment would try to save \$15 million in fiscal 1983 by setting up new requirements and by allowing delays of up to 5 days—instead of the current 2 or 3—in providing expedited service.

Mr. Chairman, the House should remember why we have expedited service in the first place. It is designed for people who are suddenly thrown out of work and have no resources to tide themselves over with. This is for people who will go hungry unless they get food stamps immediately. We have tightened the food stamp program repeatedly in recent years and we are doing so again in several portions of this bill. But when we tighten the program, we should do so in a way which avoids harm to the truly needy people who need this food stamp help and who are fully eligible for it. The amendment, if adopted, could result in denying food to fully eligible people at a time when they need food desperately.

You may say that the amendment could delay food assistance for only a few days. Mr. Chairman, if you are hungry, and if you are a migrant family and have no money to buy food for yourself and your children, a few days can be a very long time.

Another portion of the substitute proposes to stiffen penalties which are imposed on States which do not reach the targets we set for them. In this connection, we should remember that the committee bill already proposes such increases in penalties against States which do not meet targets—the amendment, however, would make those penalties stiffer than those in the committee bill.

Nobody disagrees with the basic fact that we want the States to reduce their error rates. We want to encourage them to make progress by providing a financial incentive—a reduction in the amount of money they get for administrative costs. This is, frankly, part of a carrot and stick approach. The substitute amendment on this issue, however, turns the stick into a cannon. It would cut administrative

payments to States dollar for dollar for all stamp errors above target rates which would reach 5 percent in fiscal 1985. This could amount, in a sense, to transferring the cost of the food stamp program from the Federal Government to the States.

The penalty provisions of the substitute are so harsh that I am afraid they might be counterproductive. It is possible that, although they are intended to save money, they might save less money than a more practical approach like the one which is already in the committee bill.

I share with the backers of the substitute a desire to reduce food stamp errors as much as possible. I am convinced, however, that the committee bill on this point is more practical and will reach our mutual goal more effectively.

For these reasons, Mr. Chairman, I urge defeat of the substitute amendment. The result will be a bill on which we have a bipartisan consensus already in place on all but a few amendments. It will be a bill which I believe practically all of us can support.

With that, Mr. Chairman, I have no further requests for time, and I yield back the balance of my time.

Mr. WAMPLER. Mr. Chairman, I have no further requests for time, and I yield back the balance of my time.

The CHAIRMAN. The question is on the amendment in the nature of a substitute offered by the gentleman from Virginia (Mr. WAMPLER).

The question was taken; and on a division (demanded by Mr. COLEMAN) there were—ayes 23, noes 14.

RECORDED VOTE

Mr. DE LA GARZA. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered. The vote was taken by electronic device, and there were—ayes 181, noes 210, not voting 43, as follows:

[Roll No. 256]

□ 1445

The Clerk announced the following pairs:

On this vote:

Mr. Goldwater for, with Mr. Akaka against.

Mr. Jeffries for, with Mr. Crockett against.

Mr. Grisham for, with Mr. Moffett against.

Mr. Madigan for, with Mr. Hawkins against.

Mr. Wolf for, with Mr. Conyers against.

Mr. Vander Jagt for, with Mr. Santini against.

Mr. Siljander for, with Mr. Rosenthal against.

Mr. Dornan of California for, with Mr. Ford, of Michigan against.

Mr. CARMAN and Mr. MITCHELL of New York changed their votes from "aye" to "no."

Messrs. ANDREWS, SKELTON, PATTERSON, and VOLKMER changed their votes from "no" to "aye."

So the amendment in the nature of a substitute was rejected.

The result of the vote was announced as above recorded.

The CHAIRMAN. Under the rule, the Committee rises.

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. GRAY, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 6892) to provide changes in legislation to meet reconciliation requirements of the first congressional budget resolution—fiscal year 1983—for the House Committee on Agriculture, pursuant to House Resolution 551, he reported the bill back to the House with sundry amendments adopted by the Committee of the Whole.

The SPEAKER. Under the rule, the previous question is ordered.

Is a separate vote demanded on any amendment? If not, the Chair will put them en gros.

The amendments were agreed to.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

MOTION TO RECOMMIT OFFERED BY MR. LATTA

Mr. LATTA. Mr. Speaker, I offer a motion to recommit.

The SPEAKER. Is the gentleman from Ohio opposed to the bill?

Mr. LATTA. I am, Mr. Speaker.

The SPEAKER. The Clerk will report the motion to recommit.

The Clerk read as follows:

Mr. LATTA moves to recommit the bill H.R. 6892 to the Committee on Agriculture with instructions that the committee make changes in laws within its jurisdiction sufficient to reduce budget authority and outlays in accordance with the provisions of the first concurrent resolution on the budget for fiscal year 1983, Senate Concurrent Resolution 92, and to submit such recommendations promptly to the House Committee on the budget, Senate Concurrent Resolution 92, the Congressional Budget Act of 1974 (Public Law 93-344), and the rules of the House.

The SPEAKER. The gentleman from Ohio (Mr. LATTA) is recognized for 5 minutes in support of his motion to recommit.

Mr. LATTA. Mr. Speaker, the only responsible action this House can take in regard to this bill is to send it back to committee with instructions to come up with the reconciliation savings mandated in the budget resolution.

The fiscal year 1983 budget resolution called for reconciled and nonreconciled savings from the Agriculture Committee of \$5 billion. But what does this bill provide in savings? It provides a grand total of only \$882 million over 3 years—that is less than 18 percent of what was required.

Of course, that is not what the Agriculture Committee believed when it put the bill together because it relied upon CBO estimates which have unfortunately proved to be too optimistic. Those CBO estimates were the ones incorporated into the first budget resolution baseline and were based on information developed earlier this year. According to those estimates, this bill could have saved a significant amount of Federal spending. Based on the latest Department of Agriculture estimates, using much more recent information, this bill will not reduce Federal spending nearly as much as the Agriculture Committee was instructed to do in the first budget resolution. In fact, it will increase spending by \$1.8 billion for feedgrains and cotton over 3 years, and offset that increase by reductions in milk—of \$1.4 billion—and food stamps of—\$1.1 billion—for a net savings of \$882 million over 3 years.

For example, where the committed claims \$3.3 billion in savings in the dairy price support program, OMB

tells us the savings will be only \$1.4 billion.

For feedgrains and cotton and other items covered in title II, the committee admits its handiwork would add \$363 million in fiscal year 1983. But, in fiscal years 1984 and 1985 they claim savings which would result in only \$4 million in additional spending over the period 1983-85.

However, that is not what the more up-to-date Department of Agriculture figures show us. They show that these programs are going to add to the budget deficit over the next 3 years some \$1.8 billion.

This bill pretends to be a spending-reduction bill. That is what reconciliation is all about. But what we have here is a farm bill that is adding \$1.8 billion in spending which almost wipes out the \$1.3 billion in savings from food stamps and the \$1.4 billion in the dairy program.

Even if the so-called savings in this bill were not a sham, I would oppose the bill and ask that it be sent back to committee because it is simply poor legislation.

This bill creates what is in reality a milk producers cartel in the guise of a national dairy board to be made up of people handpicked by the dairy industry who will oversee the dairy price program. They will decide how much milk will be subject to each of two proposed support levels, the price to be paid producers for the lower tier level of support, and tell the Commodity Credit Corporation how to dispose of the dairy products it acquires because of the price support program.

Can anyone tell me why the milk producers should be telling the Agriculture Department and the Commodity Credit Corporation how to run the milk support program? We do not do that for any other commodity. The wheat producers are not given that opportunity. The feed grain producers and the cotton and rice and tobacco producers are not given that chance. Why the dairy producers?

Mr. Speaker, this bill must be sent back to committee to be redrawn to comply with the budget resolution passed in June and the Budget Act of 1974.

● Mr. MICHEL. Mr. Speaker, I rise to support the motion to recommit this bill to the Agriculture Committee to make a better effort to comply with the reconciliation instructions of the first concurrent budget resolution.

On July 27 I wrote to the Speaker calling attention to what I perceived as our budget priorities this year:

I said:

We believe that the first responsibility of the House is the reduction of spending growth and then, and only then, an increase in revenues.

Let us turn then to this spending reduction package. Let us not kid our-

selves about this package. The dairy section is never going to be enacted into law—you know it and I know it. And we all know that is not what will come back to us from conference. We will not get \$1.3 billion in dairy savings in fiscal year 1983. We will probably get a little more than a tenth of that—\$150 million—just what is in the Senate bill.

This House dairy program will not survive in conference. It contains what I am convinced is an unconstitutional delegation of authority to a dairy board comprised principally of milk producers. The dairy title has more holes in it than swiss cheese.

So what kind of savings will we have if we accept what is in this basic bill? Add them up. Fiscal year 1983—paid diversion on wheat and feed grains is an add-on of \$313 million—on rice, an add-on of \$25 million—on cotton, an add-on of \$25 million and on dairy, only a cut of \$150 million. On commodities we come out with an increase in outlays of \$213 million. Not a savings, but another add-on of \$213 million.

Then what about food stamps where the budget resolution assumed a \$779 million savings? If the conferees accept what is in this committee bill we shall save \$334 million in fiscal year 1983, for a grand total—get this—for a grand total of \$121 million in savings for fiscal year 1983 based on farm commodity and food stamp savings. Now that is really something to write home about, is it not?

Even if the conferees split the difference on food stamps, it would still bring us up to less than half the savings required by the budget resolution.

I know—I know—it is the season to antagonize as few voters as possible—the dairy industry—food stamp recipients. But lest we forget, there is another interest group out there that we should better be really concerned about antagonizing—the taxpayers—the people who are footing the bill for all this.

This bill needs to be recommitted with instructions to the Agriculture Committee to do its duty.

The House adopted a budget resolution that assumed a \$5.2 billion retrenchment of spending for the commodity and food stamp program.

According to OMB figures, the committee has produced a document that has done less than one fifth the job—which our friends on the Budget Committee tell us saves only \$882 million and which OMB estimates saves only \$700 million. And in addition, it has proposed the creation of a dairy cartel of unprecedented constitutional damage.

Let us send this bill back to the Agriculture Committee where they can hopefully spend some time reading the budget resolution and the U.S. Constitution.

In summary, let me say that if we are serious about what we are supposed to be doing here, then we do not have much choice but to go this route. I am concerned that we are charting the very course I warned against on July 27—that of neglecting spending cuts and trying to make up the difference by raising taxes. We can make a mockery of this whole process or we can do something about it.●

□ 1500

Mr. DE LA GARZA. Mr. Speaker, I rise in opposition to the motion to recommit. I would like to inform my colleagues that we went through this debate in the general debate on this resolution, and the gentleman, my distinguished and dear colleague from Ohio, is arguing something that I have no control over and the members of our committee have no control over. His argument is with figures issued by CBO and figures issued by the Department of Agriculture and/or Mr. Stockman at OMB.

He says that this bill purports to cut. Mr. Speaker, we have got the scars to show that this bill cuts. It cuts, and it cuts heavily, and for someone to play with figures saying that it does not cut—the gentleman from Ohio should be here commending this committee for adhering to that Latta resolution that his House passed, wisely or unwisely, and we had to comply with it.

Now, how does it cut? I want the Members to understand this. We send them to CBO. CBO says, "Yes; you have saved so much."

What else does the gentleman from Ohio want? What can we do beyond that? He does not like some of the technical policy parts of the bill. Well, he has the privilege to disagree with that, but we do not rule on constitutionality or unconstitutionality. I say it is constitutional, but nonetheless the surplus which we have accumulated in the dairy, this bill addresses. We are going to cut down support to that individual farmer to make him reduce.

Now, the surpluses, he makes a big to-do that we are appointing a board. Well, it will be appointed by the President, by our President. The board will be appointed by the President and the Secretary of Agriculture.

Mr. LATTA. Mr. Speaker, will the gentleman yield at that point?

Mr. DE LA GARZA. I yield.

Mr. LATTA. I thank the gentleman for yielding. I think that he is leaving out one important part. The President can only appoint the individuals whose names have been submitted to him by these various co-ops. Is that not correct? He is limited.

Mr. DE LA GARZA. That is not true. The gentleman is not correct in that statement.

Now, let me say further, appointed by the President, but the people in

charge of the surplus and distributing now have not done a good job. They do not know how to give it away, Mr. Speaker. So, we are going to get somebody else to come in and to try something else. Yes, we accumulated the surplus. Yes, we are cutting to see that it is reduced. We know it is taxpayers' money. We have worked very hard to reduce that.

Now, when we reduce that, how do we get rid of the surplus? Let us put somebody else in that can do a better job.

Mr. PANETTA. Mr. Speaker, will the gentleman yield?

Mr. DE LA GARZA. I yield to the gentleman from California.

Mr. PANETTA. Mr. Speaker, I thank the gentleman for yielding. What the House has to keep in mind is what this committee was instructed to do. It was instructed to come up with \$3.2 billion in savings. According to CBO, it has come up with \$4.6 billion in savings. It has not only met its target, but it has exceeded its target, and that is why the committee ought to be upheld.

Mr. LATTA. Mr. Speaker, will the gentleman yield further? I am sure that he wants to be correct.

Mr. DE LA GARZA. I will yield very briefly.

Mr. LATTA. Let me read from page 10 of the bill. It says:

The fifteen members of the Board—

Meaning the Dairy Board—

shall be appointed by the President with the advice and consent of the Senate from recommendations submitted by organizations certified by the Secretary as eligible to make such recommendations.

Is the gentleman saying that that language is not in the bill as we presently have it?

Mr. DE LA GARZA. Would the gentleman read on page 12?

Mr. LATTA. Is this language I just read stricken from the bill?

Mr. DE LA GARZA. Let me read to the gentleman from page 12, line 15:

If the Secretary determines that a substantial number of milk producers are not members of, or their interests are not represented by any such eligible organization, nominations for the Board may be made from recommendations made by such milk producers in the manner authorized by the Secretary.

In the end, the Secretary has the final authority, and the President makes the appointments, anything to the contrary is not the intent of the law.

The SPEAKER. The time of the gentleman from Texas has expired.

Without objection, the previous question is ordered on the motion to recommit.

There was no objection.

The SPEAKER. The question is on the motion to recommit.

The question was taken; and the Speaker announced that the yeas appeared to have it.

Mr. LATTA. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

ANNOUNCEMENT BY THE SPEAKER

The SPEAKER. The Chair will make the following announcement:

Pursuant to the provisions of clause 5 of rule XV, the Chair announces that he will reduce to a minimum of 5 minutes the period within which a vote by electronic device, if ordered, will be taken on the question of passage.

The vote was taken by electronic device, and there were—yeas 145, nays 245, not voting 44, as follows:

[Roll No. 257]

□ 1520

The Clerk announced the following pairs:

On this vote:

Mr. Goldwater for, with Mr. Akaka against.

Mr. Grisham for, with Mr. Moffett against.

Mr. Siljander for, with Mr. Rosenthal against.

Mr. Wolf for, with Mr. Crockett against.
Mr. Oxley for, with Mr. Hawkins against.
Mr. Dornan for, with Mr. Ford of Michigan against.

Mr. Carney for, with Mr. AuCoin against.

Ms. FERRARO changed her vote from "yea" to "nay."

So the motion to recommit was rejected.

The result of the vote was announced as above recorded.

The SPEAKER. The question is on the passage of the bill.

The question was taken; and the Speaker announced that the yeas appeared to have it.

Mr. COLEMAN. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER. The Chair will announce that this will be a 5-minute vote.

The vote was taken by electronic device, and there were—yeas 268, nays 121, not voting 45, as follows:

[Roll No. 258]

□ 1530

The Clerk announced the following pair:

On this vote:

Mr. Akaka for, with Mr. Santini against.

Messrs. LONG of Maryland, SMITH of Iowa, and HENDON changed their votes from "yea" to "nay."

So the bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. DE LA GARZA. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill just passed.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

PROVIDING FOR RECONCILIATION PURSUANT TO FIRST CONCURRENT RESOLUTION ON THE BUDGET FOR FISCAL YEAR 1983

Mr. JONES of Oklahoma. Mr. Speaker, I ask unanimous consent for the immediate consideration in the House of a bill which I send to the desk, consisting of the texts of the bills H.R. 6892, 6812, 6862, and 6782 as passed by the House, and that the previous question be considered as ordered on said bill to final passage without intervening motion.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the request of the gentleman from Oklahoma?

There was no objection.

The Clerk read the bill, as follows:

H.R. 6955

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Omnibus Reconciliation Act of 1982".

TITLE I—AGRICULTURE, FORESTRY, AND RELATED PROGRAMS

Subtitle A—Dairy Price-Support Program

Sec. 101. Section 201 of the Agricultural Act of 1949, as amended by the Agricultural and Food Act of 1981, is amended by—

(1) effective October 1, 1982, striking out everything in subsection (c) after the first sentence and preceding the sentence which begins "Such price support shall be provided";

(2) adding a new subsection (d) as follows: "(d) Notwithstanding any other provision of law—

"(1)(A) For that portion of the national milk supply required to meet domestic commercial market needs (i) effective for the period beginning October 1, 1982, and ending September 30, 1983, the price of such milk shall be supported at \$13.10 per hundredweight of milk containing 3.67 per centum milkfat; and (ii) effective for each of the fiscal years beginning October 1, 1983, and October 1, 1984, the price of such milk shall be supported at such level that represents the percentage of parity that the Secretary determines \$13.10 represented as of October 1, 1982. That portion of the nation-

al supply required to meet domestic commercial market needs shall be the estimate of marketings of milk by producers minus the estimate of removals of milk from the market by the Commodity Credit Corporation under the price support program; and that portion of the national milk supply determined excess to domestic commercial market needs shall be the estimated removals of milk from the market by the Commodity Credit Corporation under the price support program.

"(B) The level of price support provided producers on that portion of the national milk supply determined excess to domestic commercial market needs shall be the level of price support provided for in subparagraph (A) reduced by such uniform rate as determined by the National Dairy Board as necessary to recover the funds required to meet that portion of the cost of the price support program which is the responsibility of producers of milk as defined in paragraph (2). Such level of price support shall be (i) determined by the National Dairy Board provided for in paragraph (6); (ii) announced prior to October 1 of the fiscal year to which the rate applies and may be adjusted during the fiscal year as determined necessary by the National Dairy Board; and (iii) shall be achieved through a uniform reduction of the price paid producers on that portion of the national milk supply determined excess to domestic commercial market needs. The funds represented by such reduction shall be remitted to the Commodity Credit Corporation at such time and such manner as prescribed by the Secretary by each person making payment to a producer for milk purchased from the producer, except that in the case of any producer who markets milk of the producer's own production directly to consumers, such funds shall be remitted to the Corporation by the producer. The Corporation shall credit the funds received by it under this provision to the account of the National Dairy Board. Such account shall bear interest at the same rate as payable by Commodity Credit Corporation on its borrowings from the United States Treasury. The funds represented by such reduction shall be considered as included in the payments to a producer of milk for purposes of the minimum price provisions of the Agricultural Adjustment Act of 1933, as reenacted and amended by the Agricultural Marketing Agreement Act of 1937.

"(2) Producers of milk shall have responsibility in each fiscal year during which this program is in effect for (A) that portion of the estimated total cost of Commodity Credit Corporation purchases under the price support program for milk represented by purchases in excess of five billion pounds (milk equivalent), related costs associated with such purchases and costs associated with inventory management and disposition of products related to said purchases in excess of five billion pounds (milk equivalent), (B) the amount of marketing reduction incentive payments due producers under paragraph (4) for reductions in their milk production, (C) anticipated administrative expenses of the Board, and the expenses arising from the operations of the Board under this subsection, and (D) any balance remaining from the immediately preceding fiscal year on advances made to the Board by the Commodity Credit Corporation as provided for in paragraph (3). There shall be deducted from such total amount the estimated receipts from the sale or transfer of dairy products and other operations conducted under this subsection.

For the purposes of this paragraph the estimated cost of purchases of five billion pounds (milk equivalent) shall be the dollar amount represented by the cost of purchasing and handling butter and nonfat dry milk produced from five billion pounds of milk of 3.67 per centum milkfat content. Price support operations under this Act shall not, however, be limited to the purchase of these products or to their purchase in the proportions they appear in milk. In the event of an increase in dairy product imports through action taken under section 22 of the Agricultural Adjustment Act of 1933 (7 U.S.C. 624), the portion of the cost of the price support program which is the responsibility of producers shall be reduced by the milk equivalent represented by such increased imports. The milk equivalent of any such increased imports shall be determined on either a solids-not-fat or milkfat-milk equivalent basis, whichever is higher.

"(3) The price of milk shall be supported through the purchase of milk and the products of milk. All such purchases shall be made at the level provided under paragraph (1)(A). If funds available to the Commodity Credit Corporation to meet that portion of the cost of the price support program which is the responsibility of producers are not adequate to meet current needs, purchases of dairy products shall be made using funds otherwise available to the Commodity Credit Corporation. Such expenditure shall be deemed an advance by the Commodity Credit Corporation to the National Dairy Board which shall be liable for its repayment with interest at the same rate as payable by the Commodity Credit Corporation on its borrowings from the United States Treasury. The National Dairy Board shall make provision for repayment of any balance outstanding at the end of any fiscal year by the end of the succeeding fiscal year. Funds for such repayment shall be provided in the manner prescribed in paragraph (1)(B) or through sales of products under the provisions of paragraph (8).

"(4)(A) If the level of price support provided for under paragraph (1)(B) is less than the level of price support provided for under paragraph (1)(A), a payment shall be made to any producer who can establish that the producer's marketings of milk during the period described in subparagraph (D) have been reduced from the level of marketings during the corresponding period of the prior fiscal year.

"(B) Prior to approving such payment, the Board shall require evidence that such reduction in marketings has taken place including a certification by the producer in a form specified by the Board, that such reduction is a net decrease in marketings of milk and has not been offset by expansion of production in other production facilities in which the person has an interest or by transfer of partial interest in the production facility or by the taking of any other action which is a scheme or device to qualify for payment.

"(C) The payment due any producer under this paragraph shall be determined by multiplying the number of hundredweights of milk by which marketings were reduced from those for the same period a year earlier by a rate in dollars per hundredweight established by the Board: *Provided*, That no refund shall be made on a quantity of milk in excess of the quantity for which the person was paid at the rate provided under paragraph (1)(B) nor shall the rate of payment exceed the difference between the level of price support provided

under the paragraph (1)(A) and the level of price support under paragraph (1)(B).

"(D) The Board shall provide for application for such payment at least on a quarterly basis but not more frequently than monthly: *Provided*, That if application for payment is made for any period during the year, a year-end statement of marketings must be filed by the applicant. *Provided further*, That payments made under this section during the year shall be considered preliminary settlements for reductions in marketings. In making final settlement for the year, the Board shall base such settlements on the volume of marketings for the entire fiscal year. If, based on total marketings for the year, the Board should determine that preliminary settlements have resulted in overpayment to the producer, the producer shall repay the amount of the overpayment plus interest.

"(E) If a reduced level of support is provided under paragraph (1)(B) for consecutive fiscal years, the Board shall recognize the actions taken by persons in reducing milk marketings in any of such years preceding the current fiscal year when determining eligibility for payment in the current fiscal year: *Provided*, That if a person increases milk marketings in the current fiscal year from the year of reduced marketings, any payment made to that person shall be adjusted to reflect such increase. If a person increases marketings to a level in excess of the marketings of said person during the fiscal year immediately preceding the first fiscal year the program was effective, no payment will be made.

"(F) Eligibility for payment under this paragraph is limited to those producers who made reductions in their marketings of milk and is not transferable to any other person.

"(5) In carrying out this subsection, the Board may, on a reimbursable or nonreimbursable basis, as it deems appropriate, utilize—

"(A) marketing administrators appointed by the Secretary for the administration of Federal milk marketing orders promulgated under provisions of the Agricultural Adjustment Act of 1933, as reenacted and amended by the Agricultural Marketing Agreement Act of 1937;

"(B) State and county committees established under section 8 of the Soil Conservation and Domestic Allotment Act (16 U.S.C. 590h); or

"(C) administrators of State milk marketing programs.

"(6)(A) There shall be established a National Dairy Board (hereinafter referred to as the "Board") that shall consist of fifteen members plus the Secretary;

"(B) The fifteen members of the Board (other than the Secretary) shall be appointed by the President with the advice and consent of the Senate from recommendations submitted by organizations certified by the Secretary as eligible to make such recommendations. Nominations to the initial Board shall be submitted by the President to the Senate for its advice and consent not later than January 1, 1983;

"(C) In making such appointments, the President shall take into account the geographical distribution of milk production volume throughout the United States;

"(D) The term of Board members shall be three years and no member shall be eligible to serve more than two consecutive terms: *Provided*, That in making initial appointments to the Board, the President shall designate one-third of the appointments as one-year terms, one-third of the appoint-

ments as two-year terms, and one-third of the appointments as three-year terms;

"(E) Vacancies on the Board shall be filled by the President in the same manner as initial appointments are made;

"(F) The members of the Board shall serve without compensation, if not otherwise officers or employees of the United States, except that they shall, while away from their homes or regular places of business in their performance of services for the Board, be allowed travel expenses, including per diem in lieu of subsistence, in the same manner as persons employed intermittently in the Government service are allowed expenses under sections 5701 through 5707 of title 5, United States Code.

"(G) The Secretary shall certify as eligible to make recommendations for Board membership, any organization that is determined to meet the eligibility criteria established by the Secretary upon the submission of a factual report which shall contain information deemed relevant and specified by the Secretary including, but not limited to the following:

(1) geographical territory covered by the organization's active membership;

(2) nature and size of the organization's active membership, including the proportion of the total number of active milk producers represented by the organization;

(3) evidence of stability and permanency of the organization;

(4) sources from which the organization's operating funds are derived; and

(5) functions of the organization.

"(H) If the Secretary determines that a substantial number of milk producers are not members of, or their interests are not represented by any such eligible organization, nominations for the Board may be made from recommendations made by such milk producers in the manner authorized by the Secretary.

"(7)(A) At its initial meeting, the Board shall elect from its members a chairman, vice chairman, and secretary-treasurer. These officers shall have a term of one year. The Secretary shall not be eligible for service in these positions.

"(B) The chairman shall preside at all meetings of the Board and shall be responsible for supervision and direction of any personnel employed by the Board to carry out the directives of the Act.

"(C) The Vice Chairman shall, in the absence of the Chairman, preside at meetings of the Board. In the event the office of Chairman is vacated by the death, resignation, or by disqualification of the incumbent, the Vice Chairman shall assume those duties until a successor has been duly named and qualified by the Board.

"(D) The secretary-treasurer shall be responsible for maintenance of such records as may be required by the Board. In addition, the secretary-treasurer shall prepare such reports as are necessary including an annual report to the chairman of the Committee on Agriculture, Nutrition, and Forestry of the United States Senate and the chairman of the Committee on Agriculture of the United States House of Representatives.

"(E) Regular meetings of the Board shall be held on a schedule determined by the Board. Special meetings may be called by the Chairman, by the Secretary or by a majority of the Board requesting the Chairman convene such special meeting.

"(F) The Board may issue such regulations as are necessary for the conduct of activities required by this subsection.

"(G) The Board may employ such personnel as may be required to assist in carrying out the purposes of this subsection. Such employees shall be considered employees of the Department of Agriculture, however, costs of such employment shall be met from funds available to the Board under this subsection for the conduct of its activities.

"(8) Notwithstanding any other provision of law, the Board shall have the following duties and responsibilities—

"(A) based on estimates of milk production, consumption, and Commodity Credit Corporation purchases, determine the relative proportions of milk to which the price support levels provided for in paragraph (1) shall apply;

"(B) determine the amount of the producer responsibility for dairy product purchases as determined under paragraph (2);

"(C) determine and announce prior to October 1 of each year, the level of price support under paragraph (1)(B) and the uniform rate by which the price paid farmers for milk determined to be in excess of domestic commercial market needs shall be reduced to achieve the level of price support provided for in paragraph (1)(B);

"(D) dispose of dairy products acquired by the Commodity Credit Corporation through price support operations provided for herein. Such dispositions may include, but are not limited to—

"(i) sales to the domestic commercial trade for unrestricted use: *Provided*, That in no event shall such sales be made at a price less than the higher of the current market price or 110 per centum of the currently effective price for purchase of the product by the Commodity Credit Corporation;

"(ii) transfer to Federal, State, and local government agencies for use in food assistance programs. Such programs shall include the child nutrition programs of the Department of Agriculture, elderly feeding programs, and others whether of an ongoing or of a temporary nature designed to meet short-term conditions. Unless otherwise provided for by law, the rate of reimbursement for commodities used in such programs shall be determined by the Board: *Provided*, That dairy products, not in excess of five billion pounds (milk equivalent) made available for child nutrition programs operated by the Food and Nutrition Service of the Department of Agriculture and similar programs including those conducted under the Older Americans Act, shall be made available at the request of the Secretary without cost annually;

"(iii) sales to persons engaged in international commerce for the purpose of commercial export sales of said dairy products;

"(iv) sales and transfers of dairy products to foreign governments, agencies of foreign governments, or international agencies; and

"(v) other sales or donation efforts to meet specific needs, as determined by the Board. This may include, but is not limited to, disposition of dairy products for other than unrestricted commercial use to prevent waste, deterioration, or loss of the product;

"(E) the Board shall have authority to direct the reprocessing and, if necessary, repackaging of dairy products to facilitate operations undertaken pursuant to this paragraph;

"(F) proceeds realized from any operations undertaken pursuant to this paragraph shall be remitted to the Commodity Credit Corporation and credited to the account of the Board;

"(G) if, in the judgment of the Board, any of the operations provided for in subpara-

graph (D) can be more effectively carried out through products other than those purchased by the Commodity Credit Corporation or on a basis other than through purchase by the Commodity Credit Corporation and subsequent resale or transfer, the Board shall develop and announce details of such programs;

"(H) make recommendations to the Secretary regarding details of the operation of the price support program for milk; and

"(I) establish and announce the rate of the marketing reduction incentive payment provided for in paragraph (4).

"(9) The Secretary of Agriculture shall—

"(A) exercise the authority vested in the Board by this subsection until such time as the initial Board has begun functioning, but in no event later than April 1, 1983;

"(B) serve as a member of the Board;

"(C) cooperate with the Board in the performance of its duties, including providing the Board access to all pertinent economic and financial data and information necessary to the achievement of its responsibilities, and provide the Board with such facilities and support as may be determined necessary;

"(D) collect from all persons who make payment to farmers for milk and from farmers who market milk of their own production directly to consumers, the funds derived from the reduction in prices paid farmers for that portion of the national milk supply determined excess to the needs of the domestic commercial market so as to achieve the level of price support provided for in paragraph (1)(B);

"(E) provide for audit and verification to determine that all funds due have been collected and properly credited;

"(F) provide for the delivery from the inventories of the Commodity Credit Corporation dairy products acquired in the conduct of the price support program for milk. Such deliveries shall be in the form and at the time and place directed by the Board; and

"(G) provide for the payment of obligations incurred by the Board in carrying out its responsibilities. Such obligations shall be paid from funds available to the Board under this subsection. Such payments shall be made at the direction of the Board.

"(10)(A) The district courts of the United States are vested with jurisdiction specifically to enforce, and to prevent and restrain any person from violation, any regulation issued under this subsection. Any such civil action authorized to be brought under this subsection shall be referred to the Attorney General for appropriate action: *Provided*, That nothing in this subsection may be construed as requiring the Secretary to refer to the Attorney General minor violations of this subsection whenever the Secretary believes that the administration and enforcement of this subsection would be adequately served by suitable written notice or warning to any person committing such violation.

"(B) Any person who willfully violates any provision of any regulation issued by the Secretary or the Board under this subsection, or who willfully fails or refuses to remit any amounts due thereunder shall be liable, in addition to payment of the full amount due plus interest, for a civil penalty (to be assessed by the Secretary) of not more than \$1,000 for each such violation which shall accrue to the United States and may be recovered in a civil suit brought by the United States.

"(C) The remedies provided in subsections (A) and (B) of this section shall be in addition to, and not exclusive of, the remedies otherwise provided at law or in equity.

"(11) Each producer who markets milk and each person required to make payment to the Corporation under this subsection shall keep such records and make such reports, in such manner, as the Secretary determines necessary to carry out this subsection. The Secretary may make such investigations as the Secretary deems necessary for the effective administration of this subsection or to determine whether any person subject to the provision of this subsection has engaged or is engaged or is about to engage in any act or practice that constitutes or will constitute a violation of any provision of this subsection or rule or regulation issued under this subsection. For the purpose of such investigation, the Secretary is empowered to administer oaths and affirmations, subpoena witnesses, compel their attendance, take evidence and require the production of any books, papers, and documents that are relevant to the inquiry. Such attendance of witnesses and the production of any such records may be required from any place in the United States. In case of contumacy by, or refusal to obey a subpoena to, any person, the Secretary may invoke the aid of any court of the United States within the jurisdiction of which such investigation or proceeding is carried on, or where such person resides or carries on business, in requiring the attendance and testimony of witnesses and the production of books, papers, and documents; and such court may issue an order requiring such person to appear before the Secretary, there to produce records, if so ordered, or to give testimony touching the matter under investigation. Any failure to obey such order of the court may be punished by such court as a contempt thereof. All process in any such case may be served in the judicial district whereof such person is an inhabitant or wherever such person may be found.

"(12) All operations conducted under this subsection shall be considered a program or operation of the Department of Agriculture for the purposes of section 22 of the Agricultural Adjustment Act of 1933."

Subtitle B—Dairy Promotion Act

SHORT TITLE

Sec. 110. This subtitle may be cited as the "Dairy Promotion Act".

FINDINGS AND DECLARATION OF POLICY

Sec. 111. (a) The Congress finds that—

(1) dairy products are basic foods that are a valuable part of the human diet;

(2) the production of dairy products plays a significant role in the Nation's economy; the milk from which dairy products are manufactured is produced by thousands of milk producers; and dairy products are consumed by millions of people throughout the United States;

(3) dairy products must be readily available and marketed efficiently to assure that the people of the United States receive adequate nourishment;

(4) the maintenance and expansion of existing markets for dairy products is vital to the welfare of milk producers and those concerned with marketing, using, and producing dairy products, as well as to the general economy of the Nation; and

(5) dairy products move in interstate and foreign commerce, and dairy products that do not move in such channels of commerce directly burden or affect interstate commerce in dairy products.

(b) It, therefore, is declared to be the policy of the Congress that it is essential and in the public interest to authorize the

establishment, through the exercise of the powers provided herein, of an orderly procedure for the financing (through adequate assessments on all milk produced in the United States for commercial use) and the carrying out of an effective and continuous coordinated program of promotion designed to strengthen the dairy industry's position in the marketplace, and maintain and expand domestic and foreign markets and uses for dairy products produced in the United States. Nothing in this subtitle may be construed to mean, or provide for, control of production or otherwise limit the right of individual milk producers to produce milk.

DEFINITIONS

SEC. 112. As used in this subtitle—

(1) the term "Board" means the National Dairy Promotion Board established under section 114 of this subtitle;

(2) the term "Department" means the Department of Agriculture;

(3) the term "dairy products" means manufactured products for human consumption which are derived from the processing of milk, and includes fluid milk products;

(4) the term "fluid milk products" means manufactured liquid products derived from the processing of milk and customarily consumed as beverages;

(5) the term "milk" means all classes of cow's milk produced in the United States;

(6) the term "person" means any individual, group of individuals, partnership, corporation, association, cooperative, or any other entity;

(7) the term "producer" means any person engaged in the production of milk within the United States for commercial use;

(8) the term "promotion" means actions such as paid advertising, sales promotion, and publicity to advance the image and sales of, and demand for, dairy products;

(9) the term "Secretary" means the Secretary of Agriculture; and

(10) the term "United States" means the several States and the District of Columbia, the Commonwealth of Puerto Rico, the Commonwealth of the Northern Mariana Islands, and the territories and possessions of the United States.

ISSUANCE OF ORDERS

SEC. 113. (a) Whenever the Secretary has reason to believe that the issuance of a proposed dairy products promotion order will tend to effectuate the declared policy of this subtitle, the Secretary shall give due notice and opportunity for hearing upon the proposed order. Such proposal for an order may be submitted and a hearing may be requested and proposed for an order submitted by an organization certified under section 116 of this subtitle, or by any interested person affected by the provisions of the subtitle, including the Secretary.

(b) After notice and opportunity for hearing are given, as provided for in subsection (a) of this section, the Secretary shall issue a dairy products promotion order if the Secretary finds (and sets forth in such order), upon the evidence introduced at such hearing, that the issuance of such order and all the terms and conditions thereof will tend to effectuate the declared policy of this subtitle.

(c) The Secretary may, from time to time, amend dairy products promotion orders.

REQUIRED TERMS IN ORDERS

SEC. 114. Any order issued under this subtitle shall contain the following terms and conditions:

(1) Providing for the establishment and appointment by the Secretary of a National

Dairy Promotion Board that shall consist of not fewer than thirty-six members; and providing for the definition of powers and duties of the Board that shall include only the powers enumerated in this section, including the powers to (A) administer such order in accordance with its terms and provisions, (B) make rules and regulations to effectuate the terms and provisions of such order, (C) receive, investigate, and report to the Secretary complaints of violations of such order, and (D) recommend to the Secretary amendments to such order. The term of an appointment to the Board shall be for three years with no member serving more than two consecutive terms, except that initial appointments shall be proportionately for two-year and three-year terms. The Board may appoint from its members an executive committee whose membership shall, to the maximum extent practicable, reflect the membership composition of the Board. Such executive committee shall have such duties and powers as are conferred upon it by the Board.

(2) Providing that members of the Board shall be milk producers appointed by the Secretary from nominations submitted by eligible organizations or associations certified under section 116 of this subtitle, or, if the Secretary determines that a substantial number of milk producers are not members of, or their interests are not represented by, any such eligible organization or association, then from nominations made by such milk producers in the manner authorized by the Secretary: *Provided*, That in making such appointments, the Secretary shall take into account, to the extent practicable, the geographical distribution of milk production volume throughout the United States. In determining geographic representation, whole States shall be used as a unit. A region may be represented by more than one director and a region may be made up of more than one State.

(3) Providing that the Board shall develop and submit to the Secretary for approval any promotion plan or project, and that any such plan or project shall take effect only if approved by the Secretary.

(4) Providing that the Board shall submit to the Secretary for approval budgets, on a fiscal period basis, of its anticipated expenses and disbursements in the administration of the order, including probable costs of dairy product promotion projects.

(5) Providing that each milk producer shall pay, at the plant of first receipt, an assessment based upon the number of hundredweights of milk for commercial use, handled for the account of the producer, in the manner as prescribed by the order, for the expenses and expenditures (including provision for a reasonable reserve and those administrative costs incurred by the Department after an order has been promulgated under this subtitle), as the Secretary finds are reasonable and likely to be incurred by the Board under the order during any period specified by the Secretary. The operator of such plant shall collect such assessment from the producer and shall pay the sum to the Board in the manner as prescribed by the order. The rate of assessment prescribed by the order shall be five cents per hundredweight of milk for commercial use, or the equivalent thereof. To facilitate the collection of such assessments, the order or the Board may designate different operators of plants or classes of such operators to recognize differences in marketing practices or procedures used in the industry. The Secretary may maintain a suit against any

person subject to the order for the collection of such assessment, and the several district courts of the United States are hereby vested with jurisdiction to entertain such suits regardless of the amount in controversy.

(6) Providing that the Board shall maintain such books and records (which shall be available to the Secretary for inspection and audit) and prepare and submit such reports from time to time to the Secretary, as the Secretary may prescribe, including reports requiring an appropriate accounting by the Board with respect to the receipt and disbursement of all funds entrusted to it.

(7) Providing that the Board, with the approval of the Secretary, may enter into contracts or agreements for the development and conduct of the activities authorized under the order under terms and conditions specified in subsection (a) of section 115 of this subtitle for the payment of the cost thereof with funds collected through the assessments under the order. Any such contract or agreement shall provide that (A) the contractors shall develop and submit to the Board a plan or project together with a budget or budgets that shall show estimated costs to be incurred for such plan or project, and (B) the plan or project shall become effective upon the approval of the Secretary, and (C) the contracting party shall keep accurate records of all of its transactions and make periodic reports to the Board of activities conducted and an accounting for funds received and expended, and such other reports as the Secretary may require.

(8) Providing that the Board, with the approval of the Secretary, may invest, pending disbursement under a plan or project, funds collected through assessments authorized under this subtitle only in obligations of the United States or any agency thereof, in general obligations of any State or any political subdivision thereof, in any interest-bearing account or certificate of deposit of a bank that is a member of the Federal Reserve System, or in obligations fully guaranteed as to principal and interest by the United States.

(9) Providing that no funds collected by the Board under the order shall in any manner be used for the purpose of influencing any governmental policy or action, except as provided by paragraph (1)(D) of this section.

(10) Providing that the Board members shall serve without compensation, but shall be reimbursed for their reasonable expenses incurred in performing their duties as members of the Board, including a per diem allowance as recommended by the Board and approved by the Secretary.

PERMISSIVE TERMS IN ORDERS

SEC. 115. Orders issued under this subtitle may contain one or more of the following terms and conditions:

(1) Providing for the establishment, issuance, effectuation, and administration of appropriate plans or projects for advertising and promotion of the sale and consumption of dairy products, and for the disbursement of necessary funds for such purposes: *Provided*, That any such plan or project shall be directed toward the sale and marketing or use of dairy products to the end that the marketing and use of dairy products may be encouraged, expanded, improved, or made more acceptable and shall make no reference to private brand or trade name: *Provided further*, That no such advertising or sales promotion program shall make use of unfair or deceptive acts or practices with respect to

the quality, value, or use of any competing product: *And provided further*, That during the two-year period beginning on the effective date of an order first issued under this section, fluid milk products may not be promoted under this subtitle.

(2) Providing that operators of plants receiving from producers milk for commercial use maintain and make available for inspection such books and records as may be required by any order issued under section 113(a) of this subtitle; and providing for the filing of reports by such persons at the time, in the manner, and having content prescribed by the order, to the end that information and data appropriate or necessary to the effectuation, administration, or enforcement of this subtitle, or any order or regulation issued under section 113(a) of this subtitle shall be made available to the Secretary: *Provided*, That all information so obtained shall be kept confidential by all officers and employees of the Department, and only such information so furnished or acquired as the Secretary deems relevant shall be disclosed by them and then only in a suit or administrative hearing brought at the direction, or upon the request, of the Secretary, or to which the Secretary or any officer of the United States is a party, and involving the order with reference to which the information to be disclosed was furnished or acquired. Nothing in this paragraph shall be deemed to prohibit (A) the issuance of general statements, based upon the reports, or the number of persons subject to an order or statistical data collected therefrom, which statements do not identify the information furnished by any person, or (B) the publication, by direction of the Secretary, of the name of any person violating any order, together with a statement of the particular provisions of the order violated by such persons. No information obtained under the authority of this subtitle may be made available to any agency or officer of the Government for any purpose other than the implementation of this subtitle and any investigatory or enforcement actions necessary for the implementation of this subtitle. Any person violating the provisions of this subsection, upon conviction, shall be subject to a fine of not more than \$1,000, or to imprisonment for not more than one year, or to both, and, if an officer or employee of the Board or the Department, shall be removed from office.

(3) Providing terms and conditions incidental to and not inconsistent with the terms and conditions specified in this subtitle and necessary to effectuate the other provisions of such order.

CERTIFICATION OF ORGANIZATIONS

SEC. 116. (a) The eligibility of any organization to represent milk producers, to request the issuance of an order under section 113(a) of this subtitle and to participate in the making of nominations under section 114(2) of this subtitle shall be certified by the Secretary. The Secretary shall certify any organization that the Secretary determines meets the eligibility criteria established by the Secretary under this section, and the Secretary's determination as to eligibility shall be final.

(b) Certification shall be based, in addition to other available information, upon a factual report submitted by the organization, which shall contain information deemed relevant and specified by the Secretary for the making of such determination, including the following:

(1) The geographic territory covered by the organization's active membership.

(2) The nature and size of the organization's active membership, including the proportion of the total number of active milk producers represented by the organization.

(3) Evidence of stability and permanency of the organization.

(4) Identification of the sources from which the organization's operating funds are derived.

(5) The functions of the organization.

(6) A statement describing the organization's ability and willingness to further the aims and objectives of this subtitle.

The primary considerations in determining the eligibility of an organization shall be whether its membership consists primarily of milk producers who produce a substantial volume of milk and whether the primary or overriding interest of the organization is in the production of milk and dairy products.

REQUIREMENT OF REFERENDUM

SEC. 117. (a) The Secretary shall conduct a referendum as soon as practicable among producers who during a representative period (as determined by the Secretary), have been engaged in the production of milk for commercial use for the purpose of ascertaining whether the issuance of an order is approved or favored by the producers. No order issued under this subtitle may be effective unless the Secretary determines that the issuance of such order is approved or favored by not less than one-half of the producers voting in the referendum.

(b) The Secretary shall be reimbursed from assessments collected by the Board for any expenses (other than salary payments to Government employees) incurred for the conduct of the referendum.

SUSPENSION AND TERMINATION OF ORDERS

SEC. 118. (a) The Secretary shall, whenever the Secretary finds that any order issued under this subtitle or any provision thereof obstructs or does not tend to effectuate the declared policy of this subtitle, terminate or suspend the operation of such order or such provisions thereof.

(b) The Secretary may conduct a referendum at any time, and shall hold a referendum on request of a representative group comprising 10 per centum or more of the number of producers subject to the order, to determine whether the producers favor the termination or suspension of the order. The Secretary shall suspend or terminate the order within six months after the Secretary determines that suspension or termination of the order is approved or favored by a majority of the producers voting in the referendum who, during a representative period (as determined by the Secretary), have been engaged in the production of milk for commercial use.

(c) Prior to the fifth anniversary of any order issued under this subtitle, the Secretary shall conduct a referendum to determine if producers support continuation of such order. The Secretary shall terminate such order unless its continuation is approved or favored by a majority of producers voting in the referendum who, during a representative period (as determined by the Secretary), have been engaged in the production of milk for commercial use.

(d) The termination or suspension of any order, or any provision thereof, shall not be considered an order within the meaning of this subtitle.

COOPERATIVE ASSOCIATION REPRESENTATION

SEC. 119. Whenever, pursuant to the provisions of this subtitle, the Secretary is required to determine the approval or disapproval of producers, the Secretary shall con-

sider the approval or disapproval by any bona fide cooperative association of producers, engaged in marketing milk or dairy products as the approval or disapproval of the producers who are members of or under contract with such cooperative association of producers: *Provided*, That if a cooperative association of producers elects to exercise this prerogative on behalf of its members, such cooperative association shall provide each producer on whose behalf the cooperative association is expressing approval or disapproval a description of the question presented in the referendum together with a statement of the manner in which the cooperative association vote was cast on behalf of the membership. Such information shall inform the producer of procedures to follow to cast an individual ballot should such producer choose to vote. Such individual ballots shall be tabulated by the Secretary and the vote of the cooperative association shall be adjusted to reflect such individual votes.

PETITION AND REVIEW

SEC. 120. (a) Any person subject to any order may file, with the Secretary a petition stating that any such order, any provision of such order, or any obligation imposed in connection with such order is not in accordance with law and praying for a modification thereof or for an exemption therefrom. The petitioner shall thereupon be given an opportunity for a hearing upon such petition, in accordance with regulations issued by the Secretary. After such hearing, the Secretary shall make a ruling upon the prayer of such petition, which shall be final, if in accordance with law.

(b) The district courts of the United States in any district in which such person is an inhabitant, or carries on business, are hereby vested with jurisdiction to review such ruling, if a complaint for the purpose is filed within twenty days from the date of the entry of such ruling. Service of process in such proceedings may be had upon the Secretary by delivering a copy of the complaint to the Secretary. If the court determines that such ruling is not in accordance with law, it shall remand such proceedings to the Secretary with directions either (1) to make such ruling as the court shall determine to be in accordance with law, or (2) to take such further proceedings as, in its opinion, the law requires.

ENFORCEMENT

SEC. 121. (a) The district courts of the United States are vested with jurisdiction specifically to enforce, and to prevent and restrain any person from violating, any order or regulation made or issued under this subtitle. Any such civil action authorized to be brought under this subsection shall be referred to the Attorney General for appropriate action: *Provided*, That nothing in this subtitle may be construed as requiring the Secretary to refer to the Attorney General minor violations of this subtitle whenever the Secretary believes that the administration and enforcement of this subtitle would be adequately served by suitable written notice or warning to any person committing such violation.

(b) Any person who willfully violates any provision of any order issued by the Secretary under this subtitle or who willfully fails or refuses to remit any assessment or fee duly required thereunder, shall be liable to a penalty (to be assessed by the Secretary) of not more than \$1,000 for each such violation which shall accrue to the United

States and may be recovered in a civil suit brought by the United States.

(c) The remedies provided in subsections (a) and (b) of this section shall be in addition to, and not in lieu of, the remedies otherwise provided at law or in equity.

INVESTIGATIONS; POWER TO SUBPENA AND TAKE OATHS AND AFFIRMATIONS; AID OF COURTS

SEC. 122. The Secretary may make such investigations as the Secretary deems necessary for the effective administration of this subtitle or to determine whether any person subject to the provisions of this subtitle has engaged or is about to engage in any act or practice that constitutes or will constitute a violation of any provision of this subtitle or of any order, rule, or regulation issued under this subtitle. For the purpose of such investigation, the Secretary is empowered to administer oaths and affirmations, subpoena witnesses, compel their attendance, take evidence and require the production of any books, papers, and documents that are relevant to the inquiry. Such attendance of witnesses and the production of any such records may be required from any place in the United States. In case of contumacy by, or refusal to obey a subpoena to, any person, the Secretary may invoke the aid of any court of the United States within the jurisdiction of which such investigation or proceeding is carried on, or where such person resides or carries on business, in requiring the attendance and testimony of witnesses and the production of books, papers, and documents. Such court may issue an order requiring such person to appear before the Secretary, there to produce records, as so ordered, or to give testimony touching the matter under investigation. Any failure to obey such order of the court may be punished by such court as a contempt thereof. All process in any such case may be served in the judicial district whereof such person is an inhabitant or wherever such person may be found.

ADMINISTRATIVE PROVISIONS

SEC. 123. (a) Nothing in this subtitle may be construed to preempt or supersede any other program relating to dairy product promotion organized and operating under the laws of the United States or any State.

(b) The provisions of this subtitle applicable to orders shall be applicable to amendments to orders.

AUTHORIZATIONS

SEC. 124. There are hereby authorized to be appropriated such sums as may be necessary to carry out the provisions of this subtitle. Sums authorized to be appropriated by this subtitle shall not be available for payment of the expenses or obligation incurred by the Board in administering any order issued under this subtitle.

Subtitle C—Donation of Dairy Products

SEC. 130. Section 416 of the Agricultural Act of 1949 is amended by adding at the end thereof the following: "Notwithstanding any other provision of law, such dairy products may be donated for distribution to needy households in the United States. Such dairy products may also be donated through foreign governments and public and nonprofit private humanitarian organizations for the assistance of needy persons outside the United States, and the Commodity Credit Corporation may pay, with respect to commodities so donated, reprocessing, packaging, transporting, handling, and other charges, including the cost of overseas delivery. In order to assure that any such donations for use outside the United States

are coordinated with and complement other United States foreign assistance, such donations shall be coordinated through the mechanism designated by the President to coordinate assistance under the Agricultural Trade Development and Assistance Act of 1954 and shall be in addition to the level of assistance programed under that Act."

Subtitle D—Adjustment Program for the 1983 Crops of Wheat, Feed Grains, Upland Cotton and Rice

1983 CROP WHEAT LOANS

SEC. 140. Section 107B(a) of the Agricultural Act of 1949 is amended by adding at the end thereof the following: "Notwithstanding the foregoing provision of this subsection, the Secretary shall make available to producers loans and purchases for the 1983 crop of wheat at not less than \$3.80 per bushel."

1983 CROP WHEAT ACREAGE REDUCTION AND DIVERSION PROGRAM

SEC. 141. Section 107B(e)(1) of the Agricultural Act of 1949 is amended by—

(1) striking out in the first sentence "Notwithstanding any other provision of this section, the" and inserting in lieu thereof "Notwithstanding any other provision of law—

"(A) Except as provided in subparagraph (B) of this paragraph, the"; and

(2) adding at the end thereof the following:

"(B) For the 1983 crop of wheat the Secretary shall provide for a combination of (i) an acreage limitation program as described under paragraph (2) or a set-aside program as described under paragraph (3) and (ii) a diversion program as described under paragraph (5) under which the acreage planted to wheat on the farm would be limited to the acreage base for the farm reduced by a total of 25 per centum, consisting of a reduction of 15 per centum under the acreage limitation or set-aside program and a reduction of 10 per centum under the diversion program. As a condition of eligibility for loans, purchases and payments on the 1983 crop of wheat, the producers on a farm must comply with the terms and conditions of the combined acreage limitation or set-aside program and diversion program."

WHEAT ACREAGE BASE

SEC. 142. Section 107B(e)(2) of the Agricultural Act of 1949 is amended by inserting immediately after the fifth sentence the following: "Notwithstanding any other provision of this paragraph, the acreage base to be used for the farm under the programs for the 1983, 1984, and 1985 crops of wheat shall be the same as the acreage base applicable to the farm under the acreage limitation program for the 1982 crop, adjusted to reflect established crop-rotation practices and to reflect such other factors as the Secretary determines should be considered in determining a fair and equitable base: *Provided*, That the acreage base for each wheat producing farm that follows a normal summer-fallow crop rotational practice and has a 3-year history of such practice shall be calculated by multiplying one-half the announced acreage limitation or set-aside percentage by the acreage annually idled and devoted to conservation practices and adding the result to the acreage planted on the farm to wheat for harvest in the crop year immediately preceding the year for which the determination is made or, at the discretion of the Secretary, the average acreage planted to wheat for harvest in the two crop years immediately preceding the year for which the determination is made."

1983 CROP RETIREMENT AND CONSERVATION PAYMENTS FOR WHEAT

SEC. 143. Section 107B(e)(5) of the Agricultural Act of 1949 is amended by adding at the end thereof the following: "Notwithstanding the foregoing provision of this paragraph, the Secretary shall make crop retirement and conservation payments available to any producer of the 1983 crop of wheat who participates in the acreage limitation or set-aside program for such crop of wheat under paragraph (2) or (3) of this subsection, as applicable, if the permitted acreage for the farm as determined under such paragraph is reduced by an amount equivalent to 10 per centum of the acreage base for the farm in addition to the reduction under such paragraph, and the producer devotes to approved conservation uses an equivalent acreage of cropland in addition to the acreage devoted to conservation uses under such paragraph. Such payments shall be made in an amount computed by multiplying (i) the rate of \$3.00 per bushel by (ii) the farm program payment yield for the crop, by (iii) the additional acreage diverted under this subsection. The Secretary shall make not less than 50 per centum of any payments under this paragraph to producers of the 1983 crop as soon as practicable after a producer enters into a land diversion contract with the Secretary and in advance of any determination of performance. If a producer fails to comply with a land diversion contract after obtaining an advance payment under this paragraph, subject to the provisions of subsection (f), the producer shall repay the advance immediately and, in accordance with regulations issued by the Secretary, pay interest on the advance."

1983 FEED GRAIN LOANS

SEC. 144. Section 105B(a)(1) of the Agricultural Act of 1949 is amended by inserting at the end thereof the following: "Notwithstanding the foregoing provision of this subsection, the Secretary shall make available to producers loans and purchases for the 1983 crop of corn at not less than \$2.71 per bushel."

1983 CROP FEED GRAIN ACREAGE REDUCTION AND DIVERSION PROGRAM

SEC. 145. Section 105B(e)(1) of the Agricultural Act of 1949 is amended by—

(1) striking out in the first sentence "Notwithstanding any other provision of this section, the" and inserting in lieu thereof "Notwithstanding any other provision of law—

"(A) Except as provided in subparagraph (B) of this paragraph, the"; and

(2) adding at the end thereof the following:

"(B) If on October 15, 1982, the Secretary estimates that the 1982 crop of corn will be in excess of 7.3 billion bushels, the Secretary shall announce on such date that there will be in effect for the 1983 crop of feed grains a combination of (i) an acreage limitation program as described under paragraph (2) or a set-aside program as described under paragraph (3) and (ii) a diversion program as described under paragraph (5) under which the acreage planted to feed grains on the farm would be limited to the acreage base for the farm reduced by a total of 20 per centum, consisting of a reduction of 10 per centum under the acreage limitation or set-aside program and a reduction of 10 per centum under the diversion program. As a condition of eligibility for loans, purchases and payments on the 1983 crop of feed grains, the producers on a farm must

comply with the terms and conditions of the combined acreage limitation or set-aside program and diversion program."

FEED GRAINS ACREAGE BASE

SEC. 146. Section 105B(e)(2) of the Agricultural Act of 1949 is amended by inserting immediately after the sixth sentence the following: "Notwithstanding any other provision of this paragraph, the acreage base to be used for the farm under programs for the 1983, 1984, and 1985 crops of feed grains shall be the same as the acreage base applicable to the farm under the acreage limitation program for the 1982 crop, adjusted to reflect established crop-rotation practices and to reflect such other factors as the Secretary determines should be considered in determining a fair and equitable base; *Provided*, That the acreage base for each feed grain producing farm that follows a normal summer-fallow crop rotational practice and has a 3-year history of such practice shall be calculated by multiplying one-half the announced acreage limitation or set-aside percentage by the acreage annually idled and devoted to conservation practices and adding the result to the acreage planted on the farm to feed grains for harvest in the crop year immediately preceding the year for which the determination is made or, at the discretion of the Secretary, the average acreage planted to feed grains for harvest in the two crop years immediately preceding the year for which the determination is made."

1983 CROP RETIREMENT AND CONSERVATION PAYMENTS FOR FEED GRAINS

SEC. 147. Section 105B(e)(5) of the Agricultural Act of 1949 is amended by adding at the end thereof the following: "Notwithstanding the foregoing provision of this paragraph, if the Secretary announces under paragraph (1)(B) of this subsection that there will be in effect a diversion program on the 1983 crop of feed grains, the Secretary shall make crop retirement and conservation payments available to any producer of the 1983 crop of feed grains who participates in the acreage limitation or set-aside program for such crops of feed grains under paragraph (2) or (3) of this subsection, as applicable, if the permitted acreage for the farm as determined under such paragraph is reduced by an amount equivalent to 10 per centum of the acreage base for the farm in addition to the reduction under such paragraph, and the producer devotes to approved conservation uses an equivalent acreage of cropland in addition to the acreage devoted to conservation uses under such paragraph. Such payment shall be made in an amount computed by multiplying (i) the payment rate, by (ii) the farm program payment yield for the crop, by (iii) the additional acreage diverted under this subsection. The payment rate for corn shall be in the amount of \$1.50 per bushel and in the case of grain sorghums, oats, and, if designated by the Secretary, barley shall be such rate as the Secretary determines fair and reasonable in relation to the rate at which payments are made available for corn. The Secretary shall make not less than 50 per centum of any payments under this paragraph to producers of the 1983 crop as soon as practicable after a producer enters into a land diversion contract with the Secretary and in advance of any determination of performance. If a producer fails to comply with a land diversion contract after obtaining an advance payment under this paragraph, subject to the provisions of subsection (f), the producer shall repay the

advance immediately and, in accordance with regulations issued by the Secretary, pay interest on the advance."

1983 CROP UPLAND COTTON ACREAGE REDUCTION PROGRAM

SEC. 148. Section 103(g)(9)(A) of the Agricultural Act of 1949 is amended by—

(1) inserting immediately after the third sentence the following: "If the Secretary should make the determination referred to in the first sentence of this subparagraph for the 1983 crop of upland cotton and establish an acreage reduction program for such crop, the Secretary shall provide that 25 per centum of any reduction required in the acreage base for the farm shall be made under the diversion program provided in subparagraph (B) and the balance of the reduction shall be made under an acreage limitation program as provided in this subparagraph. In such event, as a condition of eligibility for loans, purchases and payments on the 1983 crop of upland cotton the producers on a farm must comply with the combined acreage limitation and diversion program."

(2) inserting immediately after the eighth sentence (after the addition of paragraph (1) of this amendment) the following: "Notwithstanding any other provision of this subparagraph, the acreage base to be used for the farm under the programs for the 1983, 1984, and 1985 crops of upland cotton shall be the same as the acreage base applicable to the farm under the acreage limitation program for the 1982 crop, adjusted to reflect established crop-rotation practices and to reflect such other factors as the Secretary determines should be considered in determining a fair and equitable base."

1983 CROP RETIREMENT AND CONSERVATION PAYMENTS FOR UPLAND COTTON

SEC. 149. Section 103(g)(9)(B) of the Agricultural Act of 1949 is amended by adding at the end thereof the following: "Notwithstanding the foregoing provision of this paragraph, the Secretary shall make crop retirement and conservation payments available to any producer of the 1983 crop of upland cotton who participates in the acreage limitation program for such crop of upland cotton under subparagraph (A), if the permitted acreage for the farm as determined under such subparagraph is reduced by an amount equivalent to the reduction required by the Secretary to be made under this subparagraph in addition to the reduction made under the acreage limitation program, and the producer devotes to approved conservation uses an equivalent acreage of cropland in addition to the acreage devoted to conservation uses under such acreage limitation program. Such payments shall be made in an amount computed by multiplying (i) the rate of \$.25 per pound by (ii) the farm program payment yield for the crop, by (iii) the additional acreage diverted under this subparagraph. The Secretary shall make not less than 50 per centum of any payments under this subparagraph to producers of the 1983 crop as soon as practicable after a producer enters into a land diversion contract with the Secretary and in advance of any determination of performance. If a producer fails to comply with a land diversion contract after obtaining an advance payment under this subparagraph, subject to the provisions of paragraph (13), the producer shall repay the advance immediately and, in accordance with regulations issued by the Secretary, pay interest on the advance."

1983 CROP RICE ACREAGE REDUCTION AND DIVERSION PROGRAM

SEC. 150. Section 101(i)(5)(A) of the Agricultural Act of 1949 is amended by—

(1) striking out in the first sentence "Notwithstanding any other provision of this subsection, the" and inserting in lieu thereof "Notwithstanding any other provision of law, except as provided in the third and fourth sentences of this paragraph, the";

(2) inserting immediately after the second sentence of this paragraph the following: "If on November 15, 1982, the Secretary estimates that the 1982 crop of rice will be in excess of 145 million hundredweight, rough rice basis, the Secretary shall announce on such date that there will be in effect for the 1983 crop of rice a combination of (i) an acreage limitation program as described in this paragraph and (ii) a diversion program as described under paragraph (B) under which the acreage planted to rice on the farm would be limited to the acreage base for the farm reduced by a total of 20 per centum, consisting of a reduction of 10 per centum under the acreage limitation program and a reduction of 10 per centum under the diversion program. As a condition of eligibility for loans, purchases and payments on the 1983 crop of rice, the producers on a farm must comply with the terms and conditions of the combined acreage limitation and diversion program."; and

(3) inserting immediately after the ninth sentence (after the addition of paragraph (2) of this amendment) the following: "Notwithstanding any other provision of this subparagraph, the acreage base to be used for the farm under programs for the 1983, 1984, and 1985 crops of rice shall be the same as the acreage base applicable to the farm under the acreage limitation program for the 1982 crop, adjusted to reflect established crop-rotation practices and to reflect such other factors as the Secretary determines should be considered in determining a fair and equitable base."

1983 CROP RETIREMENT AND CONSERVATION PAYMENTS FOR RICE

SEC. 151. Section 101(i)(5)(B) of the Agricultural Act of 1949 is amended by adding at the end thereof the following: "Notwithstanding the foregoing provision of this paragraph, if the Secretary announces that there will be in effect a diversion program on the 1983 crop of rice, the Secretary shall make crop retirement and conservation payments available to any producer of the 1983 crop of rice who participates in the acreage limitation program for such crop of rice under subparagraph (A), if the permitted acreage for the farm is reduced by an amount equivalent to 10 per centum of the acreage base for the farm in addition to the reduction under subparagraph (A), and the producer devotes to approved conservation uses an equivalent acreage of cropland in addition to the acreage devoted to conservation uses under such subparagraph. Such payment shall be made in an amount computed by multiplying (i) a payment rate of \$3.00 per hundredweight by (ii) the farm program payment yield for the crop, by (iii) the additional acreage diverted under this subparagraph. The Secretary shall make not less than 50 per centum of any payments under this subparagraph to producers of the 1983 crop as soon as practicable after a producer enters into a land diversion contract with the Secretary and in advance of any determination of performance. If a producer fails to comply with a land diversion contract after obtaining an advance

payment under this subparagraph, subject to the provisions of paragraph (8), the producer shall repay the advance immediately and, in accordance with regulations issued by the Secretary, pay interest on the advance."

Subtitle E—Food Stamp Act Amendments of 1982

SHORT TITLE

SEC. 160. This subtitle may be cited as the "Food Stamp Act Amendments of 1982."

HOUSEHOLD DEFINITION

SEC. 161. Section 3(i) of the Food Stamp Act of 1977 (7 U.S.C. 2012(i)) is amended by—

(1) in the first sentence, striking out "parents and children" and inserting in lieu thereof "parents and children, or siblings," and inserting "or siblings" after "the parents"; and

(2) inserting after the first sentence a new sentence as follows: "Notwithstanding paragraph (1) of the preceding sentence, an individual who lives with others, who is 60 years of age or older, and who is unable to purchase food and prepare meals because such individual suffers, as certified by a licensed physician, from a disability which would be considered a permanent disability under section 221(i) of the Social Security Act (42 U.S.C. 421(i)) or from severe, permanent, and disabling physical or mental infirmity which is not symptomatic of a disease shall be considered, together with any of the others who is the spouse of such individual, an individual household without regard to the purchase of food and preparation of meals if the income of the others (as computed under section 5(d) for purposes of determining, without regard to such individual and spouse, eligibility to receive food stamp benefits) does not exceed 165 per centum of the applicable nonfarm income poverty guideline prescribed by the Office of Management and Budget, adjusted as described in section 5(c), for a household excluding such individual and spouse."

ROUNDING DOWN

SEC. 162. (a) The second sentence of section 3(o) of the Food Stamp Act of 1977 (7 U.S.C. 2012(o)) is amended by—

(1) in clause (1), inserting "(based on the unrounded cost of such diet)" after "adjustments"; and

(2) in each of clauses (6) and (7), striking out "nearest dollar increment" each place it appears and inserting in lieu thereof "nearest lower dollar increment for each household size".

(b) Section 5(e) of the Food Stamp Act of 1977 (7 U.S.C. 2014(e)) is amended by—

(1) in the second sentence, striking out "nearest \$5 increment" each place it appears and inserting in lieu thereof "nearest lower dollar increment"; and

(2) in the proviso to clause (2) of the fourth sentence, striking out "nearest \$5 increment" each place it appears and inserting in lieu thereof "nearest lower dollar increment".

(c) The first sentence of section 8(a) of the Food Stamp Act of 1977 (7 U.S.C. 2017(a)) is amended by inserting "lower" after "nearest".

DISABLED VETERANS AND SURVIVORS

SEC. 163. (a) Section 3 of the Food Stamp Act of 1977 (7 U.S.C. 2012) is amended by adding at the end thereof a new subsection as follows:

"(r) 'Elderly or disabled member' means a member of a household who—

"(1) is sixty years of age or older;

"(2) receives supplemental security income benefits under title XVI of the Social Security Act (42 U.S.C. 1381 et seq.);

"(3) receives disability or blindness payments under title I, II, X, XIV, or XVI of the Social Security Act (42 U.S.C. 301 et seq.);

"(4) is a veteran who—

"(A)(i) has a wartime disability, peacetime disability, or disability by treatment or vocational rehabilitation, which is rated as total under section 314, 334, or 351, respectively, of title 38, United States Code; or

"(ii) is considered in need of regular aid and attendance or permanently housebound under any such section; or

"(iii) is considered permanently and totally disabled, in need of regular aid and attendance, or permanently housebound under subsection (a), (b), or (c), respectively, of section 502 of title 38, United States Code;

"(5) is a surviving spouse of a veteran and—

"(A) is considered in need of regular aid and attendance or permanently housebound under subsection (d) or (e), respectively, of section 541 of title 38, United States Code; or

"(B) receives veterans' compensation for a service-connected death or pension benefits for a non-service-connected death under section 321 or subchapter III of chapter 15, respectively, of title 38, United States Code, and has a disability considered permanent under section 221(i) of the Social Security Act (42 U.S.C. 421(i)); or

"(6) is a child of a veteran and—

"(A) is considered permanently incapable of self-support under section 414 of title 38, United States Code; or

"(B) receives veterans' compensation for a service-connected death or pension benefits for a non-service-connected death under section 321 or subchapter III of chapter 15, respectively, of title 38, United States Code, and has a disability considered permanent under section 221(i) of the Social Security Act (42 U.S.C. 421(i))."

(b) The first sentence of section 3(i) of the Food Stamp Act of 1977 (7 U.S.C. 2012(i)) is amended by striking out "sixty" and all that follows through "Act" the second place it appears and inserting in lieu thereof "an elderly or disabled member".

(c) Section 5(c)(1) of the Food Stamp Act of 1977 (7 U.S.C. 2014(c)(1)) is amended by striking out "a member who is" and all that follows through "Act" the second place it appears and inserting in lieu thereof "an elderly or disabled member".

(d) Section 5(e) of the Food Stamp Act of 1977 (7 U.S.C. 2014(e)) is amended by—

(1) in the fourth sentence, striking out "a member" and all that follows through "Act" the second place it appears and inserting in lieu thereof "an elderly or disabled member";

(2) in the fifth sentence—

(A) striking out "a member" and all that follows through "Act" the second place it appears and inserting in lieu thereof "an elderly or disabled member"; and

(B) in clause (A), striking out "household" and all that follows through "Act" the second place it appears and inserting in lieu thereof "elderly or disabled members".

(e) The first sentence of section 6(c)(1) of the Food Stamp Act of 1977 (7 U.S.C. 2015(c)(1)) is amended by striking out "sixty years" and all that follows through "Act" the second place it appears and inserting in lieu thereof "elderly or disabled members".

COORDINATION OF COST-OF-LIVING ADJUSTMENTS

SEC. 164. Section 5(d) of the Food Stamp Act of 1977 (7 U.S.C. 2014(d)) is amended by—

(1) at the end of clause (10), striking out "and"; and

(2) adding before the period at the end thereof the following: ", and (12) through September 30 of any fiscal year, any increase in income attributable to a cost-of-living adjustment made on or after July 1 of such fiscal year under titles II or XVI of the Social Security Act (42 U.S.C. 401 et seq.), section 3(a)(1) of the Railroad Retirement Act of 1974 (45 U.S.C. 231b(a)(1)), or section 3112 of title 38, United States Code, if the household was certified as eligible to participate in the food stamp program or received an allotment in the month immediately preceding the adjustment".

ADJUSTMENT OF DEDUCTIONS

SEC. 165. Section 5(e) of the Food Stamp Act of 1977 (7 U.S.C. 2014(e)) is amended by—

(1) in clause (1) in the second sentence, striking out "July 1, 1983" and inserting in lieu thereof "October 1, 1983"; and

(2) in subdivision (i) of the proviso to clause (2) in the fourth sentence, striking out "July 1, 1983" and inserting in lieu thereof "October 1, 1983".

STANDARD UTILITY ALLOWANCES

SEC. 166. Section 5(e) of the Food Stamp Act of 1977 (7 U.S.C. 2014(e)) is amended by—

(1) inserting after the fourth sentence the following: "In computing the excess shelter expense deduction under clause (2) of the preceding sentence, a State agency may use a standard utility allowance in accordance with regulations promulgated by the Secretary, except that a State agency may use an allowance which does not fluctuate within a year to reflect seasonal variations. An allowance for a heating or cooling expense may not be used for a household that does not incur a heating or cooling expense, as the case may be, or does incur a heating or cooling expense but is located in a public housing unit which has central utility meters and charges households with regard to such expense only for excess utility costs. No such allowance may be used for a household that shares such expense with, and lives with, another individual not participating in the food stamp program, another household participating in the food stamp program, or both, unless the allowance is prorated between the other individual, household, or both."; and

(2) in subclause (B) of the last sentence, striking out "preceding sentence" and inserting in lieu thereof "fourth sentence of this subsection".

AVERAGING INCOME

SEC. 167. Section 5(f)(1) of the Food Stamp Act of 1977 (7 U.S.C. 2014(f)(1)) is amended by inserting after subparagraph (B) a new subparagraph as follows:

"(C) In computing household income under this section, household income that is received on a regular weekly or biweekly basis from the same source(s) shall be converted to a monthly amount."

MIGRANT FARMWORKERS

SEC. 168. The last sentence of section 5(f)(4) of the Food Stamp Act of 1977 (7 U.S.C. 2014(f)(4)) is amended by inserting after "subsection" the following: "(except the provisions of paragraph (2)(A) of this

subsection relating to migrant farmworker households).

ELIMINATION OF STUDIES AND REPORTS

SEC. 169. (a) The second sentence of section 5(g) of the Food Stamp Act of 1977 (7 U.S.C. 2014(g)) is amended by striking out "(1)" and ", and (2)" and all that follows through "1978".

(b) Section 8(a) of the Food Stamp Act of 1977 (7 U.S.C. 2017(a)) is amended by striking out the last sentence.

(c) Section 17 of the Food Stamp Act of 1977 (7 U.S.C. 2026) is amended by—

(1) striking out subsections (d) and (e); and

(2) redesignating subsection (f) as subsection (d).

CATEGORICAL ELIGIBILITY

SEC. 170. Section 5 of the Food Stamp Act of 1977 (7 U.S.C. 2014) is amended by adding at the end thereof a new subsection as follows:

"(j) Notwithstanding subsections (a) through (i), a State agency may consider a household in which all members of the household receive benefits under a State plan approved under part A of title IV of the Social Security Act (42 U.S.C. 601 et seq.) and whose income does not exceed the applicable income standard of eligibility described in subsection (c) to have satisfied the resource requirements prescribed under subsection (g)."

IMPROVEMENT IN COST-EFFECTIVENESS OF MONTHLY REPORTING SYSTEMS

SEC. 171. The first sentence of section 6(c)(1) of the Food Stamp Act of 1977 (7 U.S.C. 2015(c)(1)) is amended by—

(1) inserting "adult" between "all" and "members"; and

(2) adding, after "Secretary", the following: ", except that with the prior approval of the Secretary, a State agency may select categories of households which may report at specified less frequent intervals upon the State agency's showing to the satisfaction of the Secretary that to require households in such categories to report monthly would result in unwarranted expenditures for administration of this subsection".

REQUIREMENTS APPLICABLE TO JOB SEARCH

SEC. 172. Section 6(d)(1)(ii) of the Food Stamp Act of 1977 (7 U.S.C. 2015(d)(1)(ii)) is amended by inserting, after "Secretary", the following: ", which may include a requirement that, at the option of the State agency, such reporting and inquiry commence at the time of application".

VOLUNTARILY QUITTING A JOB

SEC. 173. Section 6(d)(1)(iii) of the Food Stamp Act of 1977 (7 U.S.C. 2015(d)(1)(iii)) is amended by striking out "sixty days" in the proviso and inserting in lieu thereof "ninety days".

ALTERNATIVE ISSUANCE SYSTEM

SEC. 174. Section 7 of the Food Stamp Act of 1977 (7 U.S.C. 2016) is amended by inserting at the end thereof a new subsection as follows:

"(g) The Secretary may require State agencies—

"(1) to issue or deliver coupons using alternative methods, including an automatic data processing and information retrieval system; or

"(2) to issue, in lieu of coupons, a reusable document to be used as part of an automatic data processing and information retrieval system and to be presented by, and returned to, recipients at retail food stores for the purpose of purchasing food;

if the Secretary determines, in consultation with the Inspector General of the Department of Agriculture, that the use of such document or such system is necessary to improve the integrity of the food stamp program: *Provided*, That the cost of such document or system shall not be imposed upon retail food stores participating in the food stamp program."

ELIMINATION OF INITIAL MONTH ALLOTMENTS OF UNDER TEN DOLLARS

SEC. 175. The first sentence of section 8(c) of the Food Stamp Act of 1977 (7 U.S.C. 2017(c)) is amended by inserting before the period at the end thereof the following: ", except that no allotment may be issued to a household for the initial month or period if the value of the allotment which such household would otherwise be eligible to receive under this subsection is less than \$10".

DISCLOSURE OF INFORMATION

SEC. 176. Section 11(e)(8) of the Food Stamp Act of 1977 (7 U.S.C. 2020(e)(8)) is amended by inserting before ", except that (A)" the following: "or of direct Federal assistance programs and Federally-assisted State programs".

EXPEDITED SERVICE

SEC. 177. Section 11(e)(9) of the Food Stamp Act of 1977 (7 U.S.C. 2020(e)(9)) is amended to read as follows:

"(9) that a destitute migrant or a seasonal farm worker household in accordance with the regulations governing such households in effect July 1, 1982, and any other household in immediate need because of no income as defined in sections 5(d) and (e) of this Act receive coupons on an expedited basis";

PROMPT REDUCTION OR TERMINATION OF BENEFITS

SEC. 178. Section 11(e)(10) of the Food Stamp Act of 1977 (7 U.S.C. 2020(e)(10)) is amended by inserting after "earlier" the following: ", except that in any case in which the State agency receives from the household a written statement containing information that clearly requires a reduction or termination of the household's benefits, the State agency may act immediately to reduce or terminate the household's benefits and may provide notice of its action to the household as late as the date on which the action becomes effective".

DUPLICATION OF BENEFITS

SEC. 179. Section 11(e) of the Food Stamp Act of 1977 (7 U.S.C. 2020(e)) is amended by—

(1) in paragraph (16), striking out the period at the end thereof and inserting in lieu thereof a semicolon;

(2) in paragraph (20), striking out "and" at the end thereof;

(3) in paragraph (21), striking out the period at the end thereof and inserting in lieu thereof "; and"; and

(4) adding at the end thereof a new paragraph as follows:

"(22) that the State agency shall determine, not less frequently than annually—

"(A) whether households participating in the food stamp program include as members individuals who, under section 6(g), may not be considered members of such households; and

"(B) whether households participating in projects conducted under section 17(b)(1) receive both coupons and any assistance provided under such projects in lieu of coupons."

ERROR RATE REDUCTION SYSTEM

SEC. 180. (a) Section 16 of the Food Stamp Act of 1977 (7 U.S.C. 2025) is amended by—

(1) amending subsection (c) to read as follows:

"(c) The Secretary is authorized to adjust a State agency's federally funded share of administrative costs pursuant to subsection (a), other than the cost already shared in excess of 50 per centum under the proviso in the first sentence of subsection (a) or under subsection (g), by increasing such share to 60 per centum of all such administrative costs in the case of a State agency which has—

"(1) a payment error rate as defined in subsection (d)(1) which, when added to the total percentage of all allotments under-issued to eligible households by the State agency, is less than 5 per centum; and

"(2) a rate of invalid decisions in denying eligibility which is less than a nationwide percentage which the Secretary determines to be reasonable.";

(2) striking out subsections (d), (e), and (g), and redesignating subsections (f), (h), and (i) as subsections (e), (f), and (g), respectively; and

(3) inserting after subsection (c) a new subsection as follows:

"(d)(1) As used in this subsection, the term 'payment error rate' means the total percentage of all allotments issued in a fiscal year by a State agency which are either—

"(A) issued to households which fail to meet basic program eligibility requirements; or

"(B) overissued to eligible households.

"(2)(A) The Secretary shall institute an error rate reduction program under which, if a State agency's payment error rate exceeds—

"(i) 9 per centum for fiscal year 1983,

"(ii) 7 per centum for fiscal year 1984, or

"(iii) 5 per centum for fiscal year 1985 or any fiscal year thereafter,

then the Secretary shall, other than for good cause shown or as provided in subparagraph (B), reduce the State agency's federally funded share of administrative costs provided pursuant to subsection (a), other than the costs already shared in excess of 50 per centum under the proviso in the first sentence of subsection (a) or under subsection (g), by the amounts required under paragraph (3).

"(B) The Secretary may not reduce a State agency's federally funded share of administrative costs pursuant to subparagraph (A)—

"(i) on the basis of the State agency's payment error rate for fiscal year 1983, if such payment error rate represents a reduction from the State agency's payment error rate for the period beginning on October 1, 1980, and ending on March 31, 1981, of at least 33.3 per centum of the difference between the State agency's payment error rate for such period and 5 per centum; or

"(ii) on the basis of the State agency's payment error rate for fiscal year 1984, if such payment error rate represents a reduction from the State agency's payment error rate for the period beginning on October 1, 1980, and ending on March 31, 1981, of at least 66.7 per centum of the difference between the State agency's payment error rate for such period and 5 per centum.

"(3)(A) The Secretary shall reduce a State agency's federally funded share of administrative costs, except as provided in subparagraph (B), by—

"(i) 5 per centum for each per centum or fraction thereof that the State agency's payment error rate exceeds the maximum payment error rate allowed for the fiscal year under paragraph (2); and

"(ii) if the State agency's payment error rate exceeds the maximum payment error rate allowed for the fiscal year under paragraph (2) by more than 3 per centum, an additional 5 per centum (for a total of 10 per centum) for each per centum or fraction thereof that the State agency's payment error rate exceeds the maximum payment error rate allowed for the fiscal year under paragraph (2) by more than 3 per centum.

"(B) The Secretary may not reduce a State agency's federally funded share of administrative costs for a fiscal year by an amount that exceeds the product of multiplying—

"(i) the per centum by which the State agency's payment error rate exceeds the maximum payment error rate allowed for the fiscal year under paragraph (2); by

"(ii) the total dollar value of all coupons issued by the State agency during the fiscal year.

"(4) The Secretary may require a State agency to report any factors which the Secretary considers necessary to determine the appropriate level of a State agency's federally funded share of administrative costs under this subsection. If a State agency fails to meet the reporting requirements established by the Secretary, the Secretary shall base the determination on all pertinent information available to the Secretary.

"(5) If the Secretary reduces a State agency's federally funded share of administrative costs under this subsection, the State may seek administrative and judicial review of the action pursuant to section 14."

(b) Section 11(e)(3) of the Food Stamp Act of 1977 (7 U.S.C. 2020(e)(3)) is amended by—

(1) striking out "subsections (h) and (i) of section 16" and inserting in lieu thereof "section 16(e)"; and

(2) striking out "quality control program" and inserting in lieu thereof "error rate reduction program".

(c) The first sentence of section 18(e) of the Food Stamp Act of 1977 (7 U.S.C. 2027(e)) is amended by striking out "sections 7(f), 11 (g) and (h), 13(b), and 16(g)" and inserting in lieu thereof "sections 7(f), 11 (g) and (h), and 13(b)".

(d) The amendments made by this section shall become effective on October 1, 1982.

BENEFIT IMPACT STUDY

Sec. 181. Section 17 of the Food Stamp Act of 1977 (7 U.S.C. 2026), as amended by section 310(c) of this title, is amended by adding at the end thereof a new subsection as follows:

"(e) The Secretary shall conduct a study of the effects of reductions made in benefits provided under this Act pursuant to part 1 of subtitle A of title I of the Omnibus Budget Reconciliation Act of 1981, title XIII of the Agriculture and Food Act of 1981, and any other laws enacted by the Ninety-seventh Congress which affect the food stamp program. The study shall include a study of the effect of retrospective accounting and periodic reporting procedures established under such Acts, including the impact on benefit and administrative costs and on error rates and the degree to which eligible households are denied food stamp benefits for failure to file complete periodic reports. The Secretary shall submit to the Committee on Agriculture of the House of Representatives and Committee on Agriculture, Nutrition, and Forestry of

the Senate an interim report on the results of such study no later than February 1, 1984 and a final report on the results of such study no later than March 1, 1985."

AUTHORIZATION FOR APPROPRIATIONS

Sec. 182. The first sentence of section 18(a)(1) of the Food Stamp Act of 1977 (7 U.S.C. 2027(a)(1)) is amended by—

(1) striking out "and" after "September 30, 1981"; and

(2) inserting before the period at the end thereof the following: "; not in excess of \$12,648,000,000 for the fiscal year ending September 30, 1983; not in excess of \$12,908,000,000 for the fiscal year ending September 30, 1984; and not in excess of \$13,651,000,000 for the fiscal year ending September 30, 1985".

PUERTO RICO

Sec. 183. (a) Section 19(a)(1)(A) of the Food Stamp Act of 1977 (7 U.S.C. 2028(a)(1)(A)) is amended by inserting "non-cash" before "food assistance".

(b) The amendment made by subsection (a) shall not apply with respect to any plan submitted under section 19(b) of the Food Stamp Act of 1977 (7 U.S.C. 2028(b)) by the Commonwealth of Puerto Rico in order to receive payments for fiscal year 1982 or fiscal year 1983.

(c) The Secretary of Agriculture shall conduct a study of the impact of making food assistance available to needy persons in the Commonwealth of Puerto Rico in the form of cash under section 19 of the Food Stamp Act of 1977 (7 U.S.C. 2028). The study shall include such impact on both the nutritional status of residents of Puerto Rico and the economy of Puerto Rico. The Secretary shall submit a report of the findings of such study to the Committee on Agriculture of the House of Representatives and the Committee on Agriculture, Nutrition, and Forestry of the Senate not later than six months after the effective date of this subtitle.

REIMBURSEMENT OF POLITICAL SUBDIVISIONS AND STATE AGENCIES FOR WORKFARE ADMINISTRATIVE EXPENSES

Sec. 184. (a) Section 20(g) of the Food Stamp Act of 1977 (7 U.S.C. 2029(g)) is amended by—

(1) redesignating paragraph (2) as paragraph (3); and

(2) by inserting after paragraph (1) a new paragraph as follows:

"(2)(A) From 50 per centum of the funds saved from employment related to a workfare program operated under this section, the Secretary shall pay to each operating agency an amount not to exceed the administrative expenses described in paragraph (1) for which no reimbursement is provided under such paragraph.

"(B) For purposes of subparagraph (A), the term 'funds saved from employment related to a workfare program operated under this section' means an amount equal to the three times the dollar value of the sum of the decrease in allotments issued to households, to the extent that such decrease results from wages received by members of such households for the first month of employment beginning after the date such members commence such employment if such employment commences—

"(i) while such members are participating for the first time in a workfare program operated under this section; or

"(ii) in the thirty-day period beginning on the date such first participation is terminated."

(b) The amendments made by this section shall take effect October 1, 1982.

AMENDMENTS MADE BY THE OMNIBUS BUDGET RECONCILIATION ACT OF 1981 AND THE AGRICULTURE AND FOOD ACT OF 1981

Sec. 185. (a) Notwithstanding section 117 of the Omnibus Budget Reconciliation Act of 1981 (7 U.S.C. 2012 note), the amendments made by sections 101, 102, 103, 104, 105, 106, 107 (other than subsection (b)), 108 (other than subsection (c)), 109, 110, 111, 112, 113, and 114 of such Act shall take effect on the date of the enactment of this subtitle, unless such amendments have taken effect before such date.

(b) Notwithstanding section 1338 of the Agriculture and Food Act of 1981 (7 U.S.C. 2012 note), the amendments made by sections 1302 through 1333 of such Act shall take effect on the date of the enactment of this subtitle, unless such amendments have taken effect before such date.

EFFECTIVE DATES

Sec. 186. (a) Except as provided in subsection (b), this subtitle and the amendments made by this subtitle shall take effect on the date of the enactment of this subtitle.

(b) Sections 321 and 325 shall take effect on October 1, 1982.

TITLE II—BANKING

TREATMENT OF FHA SINGLE-FAMILY MORTGAGE INSURANCE PREMIUMS

Sec. 201. (a) Section 203(b) of the National Housing Act is amended by—

(1) inserting after "150 per centum of such median price" in the first sentence of paragraph (2) the following: "Provided, That the foregoing maximum mortgage amounts may be increased by the amount of the mortgage insurance premium paid at the time the mortgage is insured"; and

(2) inserting after "cost of acquisition" in paragraph (9) the following: "(excluding the mortgage insurance premium paid at the time the mortgage is insured)".

(b) Section 203(c) of such Act is amended by inserting the following before the period at the end of the fourth sentence: "Provided, That with respect to mortgages (1) for which the Secretary requires, at the time the mortgage is insured, the payment of a single premium charge to cover the total premium obligation for the insurance of the mortgage and (2) on which the principal obligation is paid before the number of years on which the premium with respect to a particular mortgage was based, or the property is sold subject to the mortgage or is sold and the mortgage is assumed prior to such time, the Secretary shall provide for refunds, where appropriate, of a portion of the premium paid and shall provide for appropriate allocation of the premium cost among the mortgagors over the term of the mortgage, in accordance with procedures established by the Secretary which take into account sound financial and actuarial considerations".

(c) Section 213(b)(2) of such Act is amended by inserting after "exceeded by not to exceed 90 per centum in such an area" the following: "Provided further, That the foregoing maximum mortgage amounts may be increased by the amount of the mortgage insurance premium paid at the time the mortgage is insured".

(d) Section 221(d) of such Act is amended by—

(1) inserting after "in any geographical area where he finds that cost levels so require" in paragraph (2)(A) the following: "Provided further, That the foregoing maximum mortgage amounts may be increased by the amount of the mortgage insurance

premium paid at the time the mortgage is insured";

(2) inserting after "of its acquisition cost" in paragraph (2)(B)(i)(2) the following: "(excluding the mortgage insurance premium paid at the time the mortgage is insured)"; and

(3) striking out "mortgage insurance premium," in paragraph (2)(B)(i)(2).

(e) Section 234(c) of such Act is amended by inserting after "one-family house price in the area, as determined by the Secretary" in clause (A) of the third sentence thereof the following: "Provided, That the foregoing maximum mortgage amounts may be increased by the amount of the mortgage insurance premium paid at the time the mortgage is insured".

(f) Section 235(i) of such Act is amended by—

(1) inserting after "respectively" in paragraph (3)(B) the following: "Provided, That the foregoing maximum mortgage amounts may be increased by the amount of the mortgage insurance premium paid at the time the mortgage is insured";

(2) inserting after "respectively" in paragraph (3)(C) the following: "Provided, That the foregoing maximum mortgage amounts may be increased by the amount of the mortgage insurance premium paid at the time the mortgage is insured";

(3) inserting after "so require" in paragraph (3)(D) the following: "Provided, That the foregoing maximum mortgage amounts may be increased by the amount of the mortgage insurance premium paid at the time the mortgage is insured"; and

(4) inserting after "acquisition" in paragraph (3)(E) the following: "(excluding the mortgage insurance premium paid at the time the mortgage is insured)".

IMPLEMENTATION

SEC. 202. The amendments made by this Act, except for section 203, may be implemented only if the Secretary determines that the program of advance payment of insurance premiums, with specific regard to the effect of the provisions authorized by the amendments made by this Act, is actuarially sound.

SEC. 203. The last sentence of section 3552 of the Revised Statutes (31 U.S.C. 369) is amended to read as follows: "There are authorized to be appropriated for fiscal year 1983 not to exceed \$50,165,000 for all expenditures (salaries and expenses) of the mints and assay offices not herein otherwise provided for."

TITLE III—CIVIL SERVICE PROGRAMS

ROUNDING DOWN OF CIVIL SERVICE RETIREMENT ANNUITIES

SEC. 301. (a) Section 8340(e) of title 5, United States Code, is amended by striking out "fixed at the nearest dollar" and inserting in lieu thereof "rounded to the next lowest dollar".

(b) Section 8345(a) of title 5, United States Code, is amended by striking out "fixed at the nearest dollar" and inserting in lieu thereof "rounded to the next lowest dollar".

(c) The amendments made by subsections (a) and (b) shall apply with respect to any annuity commencing on or after October 1, 1982, and with respect to any annuity adjustment or redetermination made on or after such date.

LATER COMMENCEMENT DATE FOR CERTAIN ANNUITIES

SEC. 302. (a) Section 8345(b) of title 5, United States Code, is amended to read as follows:

"(b)(1) Except as otherwise provided—

"(A) an annuity of an employee or Member commences on the first day of the month after—

"(i) separation from the service; or

"(ii) pay ceases and the service and age requirements for title to annuity are met; and

"(B) any other annuity payable from the Fund commences on the first day of the month after the occurrence of the event on which payment thereof is based.

"(2) The annuity of—

"(A) an employee involuntarily separated from service, except by removal for cause on charges of misconduct or delinquency; and

"(B) an employee or Member retiring under section 8337 of this title due to a disability;

shall commence on the day after separation from the service or the day after pay ceases and the service and age or disability requirements for title to annuity are met."

(b) The amendment made by subsection (a) shall apply to annuities which commence on or after October 1, 1982.

FEDERAL EMPLOYEE PAY COMPARABILITY ADJUSTMENTS

SEC. 303. (a) Notwithstanding any other provision of law, if—

(1) before September 1, 1982, the President transmits to the Congress pursuant to section 5305(c)(1) of title 5, United States Code, an alternative plan which provides for an overall percentage pay adjustment which is less than 4 percent, and

(2) the alternative plan referred to in paragraph (1) is disapproved pursuant to such section 5305,

the rates of pay under the General Schedule and the rates of pay under the other statutory pay systems shall be increased under the provisions of such section 5305 by 4 percent in the case of fiscal year 1983.

(b) Each increase in a pay rate or schedule which takes effect pursuant to subsection (a) shall, to the maximum extent practicable, be of the same percentage, and shall take effect on the first day of the first applicable pay period commencing on or after October 1 of such fiscal year.

TITLE IV—VETERANS' PROGRAMS

SHORT TITLE; REFERENCES TO TITLE 38, UNITED STATES CODE

SEC. 401. (a) This title may be cited as the "Veterans' Disability Compensation and Survivors' Benefits Amendments of 1982".

(b) Except as otherwise expressly provided, whenever in this title an amendment or repeal is expressed in terms of an amendment to or repeal of a section or other provision, the reference shall be considered to be made to a section or other provision of title 38, United States Code.

Subtitle A—Compensation and Dependency and Indemnity Compensation Rate Increases

RATES OF DISABILITY COMPENSATION

SEC. 411. (a) Section 314 is amended—

(1) by striking out "\$58" in subsection (a) and inserting in lieu thereof "\$62";

(2) by striking out "\$107" in subsection (b) and inserting in lieu thereof "\$114";

(3) by striking out "\$162" in subsection (c) and inserting in lieu thereof "\$173";

(4) by striking out "\$232" in subsection (d) and inserting in lieu thereof "\$249";

(5) by striking out "\$328" in subsection (e) and inserting in lieu thereof "\$352";

(6) by striking out "\$413" in subsection (f) and inserting in lieu thereof "\$443";

(7) by striking out "\$521" in subsection (g) and inserting in lieu thereof "\$559";

(8) by striking out "\$604" in subsection (h) and inserting in lieu thereof "\$648";

(9) by striking out "\$679" in subsection (i) and inserting in lieu thereof "\$729";

(10) by striking out "\$1,130" in subsection (j) and inserting in lieu thereof "\$1,213";

(11) by striking out "\$1,403" and "\$1,966" in subsection (k) and inserting in lieu thereof "\$1,506" and "\$2,111", respectively;

(12) by striking out "\$1,403" in subsection (l) and inserting in lieu thereof "\$1,506";

(13) by striking out "\$1,547" in subsection (m) and inserting in lieu thereof "\$1,661";

(14) by striking out "\$1,758" in subsection (n) and inserting in lieu thereof "\$1,888";

(15) by striking out "\$1,966" each place it appears in subsections (o) and (p) and inserting in lieu thereof "\$2,111";

(16) by striking out "\$844" and "\$1,257" in subsection (r) and inserting in lieu thereof "\$906" and "\$1,350", respectively;

(17) by striking out "\$1,264" in subsection (s) and inserting in lieu thereof "\$1,357"; and

(18) by striking out "\$244" in subsection (t) and inserting in lieu thereof "\$262".

(b) The Administrator of Veterans Affairs may adjust administratively, consistent with the increases authorized by this section, the rates of disability compensation payable to persons within the purview of section 10 of Public Law 85-857 who are not in receipt of compensation payable pursuant to chapter 11 of title 38, United States Code.

RATES OF ADDITIONAL COMPENSATION FOR DEPENDENTS

SEC. 412. Section 315(1) is amended—

(1) by striking out "\$69" in clause (A) and inserting in lieu thereof "\$74";

(2) by striking out "\$116" in clause (B) and inserting in lieu thereof "\$124";

(3) by striking out "\$153" in clause (C) and inserting in lieu thereof "\$164";

(4) by striking out "\$192" and "\$38" in clause (D) and inserting in lieu thereof "\$206" and "\$40", respectively;

(5) by striking out "\$47" in clause (E) and inserting in lieu thereof "\$50";

(6) by striking out "\$86" in clause (F) and inserting in lieu thereof "\$92";

(7) by striking out "\$123" and "\$38" in clause (G) and inserting in lieu thereof "\$132" and "\$40", respectively;

(8) by striking out "\$56" in clause (H) and inserting in lieu thereof "\$60";

(9) by striking out "\$125" in clause (I) and inserting in lieu thereof "\$134"; and

(10) by striking out "\$105" in clause (J) and inserting in lieu thereof "\$112".

CLOTHING ALLOWANCE FOR CERTAIN DISABLED VETERANS

SEC. 413. Section 362 is amended by striking out "\$305" and inserting in lieu thereof "\$327".

RATES OF DEPENDENCY AND INDEMNITY COMPENSATION FOR SURVIVING SPOUSES

SEC. 414. (a) Subsection (a) of section 411 is amended to read as follows:

"(a) Dependency and indemnity compensation shall be paid to a surviving spouse, based on the pay grade of the person upon whose death entitlement is predicated, at monthly rates set forth in the following table:

Pay grade	Monthly rate	Pay grade	Monthly rate
E-1	\$445	W-4	\$639
E-2	459	O-1	563
E-3	470	O-2	582
E-4	500	O-3	622
E-5	514	O-4	658

Pay grade	Monthly rate	Pay grade	Monthly rate
E-6	526	O-5	726
E-7	552	O-6	817
E-8	582	O-7	884
E-9	608	O-8	969
W-1	563	O-9	1,041
W-2	586	O-10	1,139
W-3	603		

¹ If the veteran served as sergeant major of the Army, senior enlisted advisor of the Navy, chief master sergeant of the Air Force, sergeant major of the Marine Corps, or master chief petty officer of the Coast Guard, at the applicable time designated by section 402 of this title, the surviving spouse's rate shall be \$655.

² If the veteran served as Chairman of the Joint Chiefs of Staff, Chief of Staff of the Army, Chief of Naval Operations, Chief of Staff of the Air Force, or Commandant of the Marine Corps, at the applicable time designated by section 402 of this title, the surviving spouse's rate shall be \$1,222.

(b) Subsection (b) of such section is amended by striking out "\$48" and inserting in lieu thereof "\$51".

(c) Subsection (c) of such section is amended by striking out "\$125" and inserting in lieu thereof "\$134".

(d) Subsection (d) of such section is amended by striking out "\$62" and inserting in lieu thereof "\$66".

RATES OF DEPENDENCY AND INDEMNITY COMPENSATION FOR CHILDREN

SEC. 415. Section 413 is amended—

(1) by striking out "\$210" in clause (1) and inserting in lieu thereof "\$225";

(2) by striking out "\$301" in clause (2) and inserting in lieu thereof "\$323";

(3) by striking out "\$389" in clause (3) and inserting in lieu thereof "\$417"; and

(4) by striking out "\$389" and "\$79" in clause (4) and inserting in lieu thereof "\$417" and "\$84", respectively.

RATES OF SUPPLEMENTAL DEPENDENCY AND INDEMNITY COMPENSATION FOR CHILDREN

SEC. 416. Section 414 is amended—

(1) by striking out "\$125" in subsection (a) and inserting in lieu thereof "\$134";

(2) by striking out "\$210" in subsection (b) and inserting in lieu thereof "\$225"; and

(3) by striking out "\$107" in subsection (c) and inserting in lieu thereof "\$114".

EFFECTIVE DATE

SEC. 417. The amendments made by this subtitle shall take effect on October 1, 1982.

Subtitle B—Program Changes

ELIGIBILITY OF SENIOR RESERVE OFFICERS' TRAINING CORPS PARTICIPANTS INJURED DURING SUMMER MILITARY TRAINING CAMP FOR VETERANS' ADMINISTRATION BENEFITS

SEC. 421. (a) Section 101(22) is amended—

(1) by striking out "and" at the end of clause (C);

(2) by redesignating clause (D) as clause (E); and

(3) by inserting after clause (C) the following new clause (D):

"(D) annual training duty performed by a member of a Senior Reserve Officers' Training Corps program when ordered to such duty for a period of fourteen days or more; and".

(b) The amendments made by subsection (a) shall apply with respect to diseases and injuries incurred or aggravated during duty performed after September 30, 1982.

INCREASE IN COMPENSATION RATE FOR BLINDED VETERANS

SEC. 422. (a) Section 314(n) is amended by inserting "or has suffered blindness without light perception in both eyes," after "anatomical loss of both eyes,".

(b) Section 314(p) is amended by inserting "or service-connected anatomical loss or loss of use of one hand or one foot" after "in one ear".

(c) The amendments made by subsections (a) and (b) shall take effect on October 1, 1982.

ROUNDING OF RATES OF ADDITIONAL COMPENSATION FOR DEPENDENTS

SEC. 423. (a) The second sentence of section 315(2) is amended to read as follows: "The amounts payable under this paragraph, if not a multiple of \$1, shall be adjusted downward to the nearest dollar."

(b) The amendment made by subsection (a) shall take effect on October 1, 1982.

CORRECTION OF TECHNICAL ERROR WITH RESPECT TO ENTITLEMENT TO DEPENDENCY AND INDEMNITY COMPENSATION

SEC. 424. (a) Section 410(b)(1) is amended by inserting "or entitled to receive" after "was in receipt of".

(b) The amendment made by subsection (a) shall apply with respect to dependency and indemnity compensation payable for months after September 1982.

ADMINISTRATIVE IMPROVEMENTS TO LIFE INSURANCE PROGRAMS

SEC. 425. (a) Section 770 is amended—

(1) by striking out the second sentence of subsection (c); and

(2) by adding at the end the following new subsection:

"(h) Insurance payable under this subchapter may not be paid in any amount to the extent that such amount would otherwise escheat to a State. Payment of insurance under this subchapter may not be made to the estate of the insured or the estate of any beneficiary of the insured unless it is affirmatively shown that any sum to be paid will not escheat to a State. Any amount to be paid under this subchapter shall be reduced to the extent necessary to comply with this subsection."

(b) The amendments made by subsection (a) shall take effect on October 1, 1982.

BURIAL FLAGS

SEC. 426. (a) Section 901 is amended by adding at the end the following new subsection:

"(e) The Administrator shall furnish a flag to drape the casket of each deceased person who is buried in a national cemetery under eligibility for burial under section 1002(6) of this title. After the burial, the flag shall be given to the next of kin or to such other person as the Administrator considers appropriate."

(b) The amendment made by subsection (a) shall apply with respect to burials after September 30, 1982.

BURIAL BENEFITS FOR CERTAIN VETERANS WHOSE REMAINS ARE UNCLAIMED

SEC. 427. Section 902(a) is amended by striking out "When a veteran" and all that follows through "the Administrator," and inserting in lieu thereof the following: "When a veteran dies—

"(1) who was in receipt of compensation (or but for the receipt of retirement pay would have been entitled to compensation) or who was in receipt of pension; or

"(2) in the case of a veteran of any war or a veteran who was discharged from the active military, naval, or air service for a disability incurred or aggravated in line of duty, whose body is held by a State (or a political subdivision of a State) and with respect to whom the Administrator determines—

"(A) that there is no next of kin or other person claiming the body of the deceased veteran; and

"(B) that there are not available, from the deceased veteran's estate or otherwise, sufficient resources to defray the cost of the burial and funeral of the deceased veteran, the Administrator,".

(b) The amendment made by subsection (a) shall apply with respect to deaths occurring after September 30, 1982.

CLARIFICATION OF ELIGIBILITY FOR BURIAL BENEFITS FOR PERSONS DYING IN CONTRACT NURSING HOME FACILITIES

SEC. 428. (a) Section 903(a) is amended—

(1) by striking out "Where death occurs in a Veterans' Administration facility" and inserting in lieu thereof "When a veteran dies in a Veterans' Administration facility (as defined in section 601(4) of this title)"; and

(2) by inserting "or in an institution to which the deceased was properly transferred for nursing home care under section 620 of this title" after "of this title".

(b) The amendments made by subsection (a) shall apply with respect to deaths occurring after September 30, 1982.

SUPERINTENDENTS OF NATIONAL CEMETERIES UNDER THE JURISDICTION OF THE SECRETARY OF THE ARMY

SEC. 429. Notwithstanding section 7(b)(2) of the National Cemeteries Act of 1973 (87 Stat. 88), the provisions of the Act entitled "An Act to provide for selection of superintendents of national cemeteries from meritorious and trustworthy members of the Armed Forces who have been disabled in the line of duty for active field service", approved March 24, 1948, as in effect on the day before the effective date of section 7 of the National Cemeteries Act of 1973, shall not apply with respect to the appointment of superintendents of national cemeteries under the jurisdiction of the Secretary of the Army.

PROTECTION OF QUALITY OF HEALTH CARE

SEC. 430. (a) Section 5010(a) is amended by adding at the end the following new paragraph:

"(6)(A) Except as provided in subparagraph (B) of this paragraph, all activities carried out at a medical facility under the direct jurisdiction of the Administrator shall be performed by Federal employees unless the Administrator, after considering the advice of the Chief Medical Director, determines that such facility is not capable of carrying out any such activity through such employees or that contracting for the performance of such activity would enhance the quality of medical care for eligible veterans.

"(B) Subparagraph (A) of this paragraph does not prohibit or restrict any authority of the Veterans' Administration under any other provision of this title or any other provision of law to enter into contracts or cooperative sharing agreements with other Federal agencies or departments or with State or nongovernmental entities for the exchange or sharing of goods, services, facilities, or resources."

(b) Section 5010(a)(6) of title 38, United States Code, as added by subsection (a), does not apply with respect to a contract in effect on May 15, 1982, or to any renewal, extension, or modification of such a contract.

Subtitle C—Budget Savings Provisions

SHORT TITLE

SEC. 431. This subtitle may be cited as the "Veterans' Budget Reconciliation Act of 1982".

LOAN ORIGINATION FEE FOR VETERANS' ADMINISTRATION HOME LOANS

SEC. 432. (a)(1) Subchapter III of chapter 37 is amended by adding at the end the following new section:

"§ 1829. Loan fees

"(a) Except as provided in subsection (b) of this section, a fee shall be collected from each veteran obtaining a loan guaranteed, made, or insured under this chapter, and no loan may be guaranteed, made, or insured under this chapter until the fee payable with respect to such loan has been collected and remitted to the Administrator. The amount of the fee shall be one-half of 1 per centum of the total loan amount. The amount of the fee may be included in the loan to the veteran and paid from the proceeds thereof.

"(b) A fee shall not be collected under this section from a veteran receiving or entitled to receive compensation or from a surviving spouse described in section 1801(b)(2) of this title.

"(c) Fees collected under this section shall be deposited into the Treasury as miscellaneous receipts.

"(d) A fee may not be collected under this section with respect to any loan closed after September 30, 1985."

(2) The table of sections at the beginning of such chapter is amended by inserting after the item relating to section 1828 the following new item:

"1829. Loan fees."

(b) Section 1829 of title 38, United States Code, as added by subsection (a), shall apply only to loans closed after September 30, 1982.

EFFECTIVE DATE OF PAYMENTS

Sec. 433. (a)(1) Chapter 51 is amended by inserting after section 3010 the following new section:

"§ 3011. Commencement of payment based on an award

"(a) Notwithstanding section 3010 of this title or any other provision of law and except as provided in subsection (c) of this section, payment of monetary benefits based on an award or an increased award of compensation, dependency and indemnity compensation, or pension may not be made for any period before the first day of the calendar month following the month in which the award became effective as provided under section 3010 of this title or such other provision of law.

"(b)(1) During the period between the effective date of an award as provided under section 3010 of this title or other provision of law and the commencement of the period of payment based on such award as provided under subsection (a) of this section, an individual entitled to receive monetary benefits shall be deemed to be in receipt of such benefits for the purpose of all laws administered by the Veterans' Administration, except as provided in paragraph (2) of this subsection.

"(2) If any person who is in receipt of retired or retirement pay would also be eligible to receive compensation or pension upon the filing of a waiver of such pay in accordance with section 3105 of this title, such waiver shall not become effective until the first day of the month following the month in which such waiver is filed, and nothing in this section shall prohibit the receipt of retired or retirement pay for any period before such effective date.

"(c) This section shall apply to payments made pursuant to section 3110 of this title only if the monthly amount of dependency and indemnity compensation or pension payable to the surviving spouse is greater than the amount of compensation or pension the veteran would have received for the

month in which such veteran's death occurred."

(2) The table of sections at the beginning of such chapter is amended by inserting after the item relating to section 3010 the following new item:

"3011. Commencement of payment based on an award."

(b) Section 3011 of title 38, United States Code, as added by subsection (a), shall take effect on October 1, 1982.

EFFECTIVE DATE OF CERTAIN REDUCTIONS OF COMPENSATION AND PENSION

Sec. 434. Effective on October 1, 1982, section 3012(b)(2) is amended by striking out "calendar year" and inserting in lieu thereof "month".

ROUNDING OF PENSION TO NEXT LOWER DOLLAR

Sec. 435. (a)(1) Chapter 51 is amended by adding at the end the following new section:

"§ 3023. Rounding of pension payments

"The amount of any pension payment under section 521, 541, or 542 of this title or under section 306(a) of the Veterans' and Survivors' Pension Improvement Act of 1978 (Public Law 95-588), if not a multiple of \$1, shall be rounded down to the next lower multiple of \$1."

(2) The table of sections at the beginning of such chapter is amended by adding at the end the following new item:

"3023. Rounding of pension payments."

(b) Section 3023 of title 38, United States Code, as added by subsection (a), shall take effect on October 1, 1982.

ELIGIBILITY OF COLLEGE STUDENTS FOR PENSION

Sec. 436. (a) Section 501 is amended by adding at the end the following new paragraph:

"(5)(A) For the purposes of sections 521, 522, 541, 542, and 543 of this title, the term 'child' shall be as defined in section 101(4) of this title except as provided in subparagraph (B) of this paragraph.

"(B) The term 'child' includes a child who is over the age of eighteen if such child is pursuing a program of education for the purpose of receiving a secondary school diploma and is under the age of nineteen but does not include a child over the age of eighteen who is not pursuing such a program unless such child before attaining the age of eighteen became permanently incapable of self-support."

(b) The amendment made by subsection (a) does not apply to any child to whom or on behalf of whom pension or additional pension for the month of September 1982 is payable under section 521, 541, or 542 of title 38, United States Code, if such child has attained the age of eighteen years before October 1, 1982.

(c)(1) Notwithstanding any provision of section 521, 541, 542, or 3112 of title 38, United States Code, or section 306(a) of Public Law 95-588, and except as provided in paragraph (2) of this subsection, pension or additional pension payable to or on behalf of any child, including a child described by subsection (b) of this section, under section 521, 541, or 542 of such title or section 306(a) of Public Law 95-588, on the basis of the child's pursuit of a course of instruction at an approved educational institution, shall—

(A) not be paid for the months of May, June, July, and August, beginning with the months of May 1983;

(B) not be paid for any month after April 1985;

(C) not exceed for any month the amount of the pension or additional pension (attributable to such child) for the month of September 1982 (or a later month if the Administrator considers a later month appropriate under the circumstances), reduced by an amount—

(i) during the months after September 1982 and before May 1983, equal to 25 per centum of the benefit payable for September 1982 (or such later month);

(ii) during the months after August 1983 and before May 1984, equal to 50 per centum of the benefit payable for September 1982 (or such later month); and

(iii) during the months after September 1984 and before May 1985, equal to 75 per centum of the benefit payable for September 1982 (or such later month); and

(D) not be paid for any month after such pension or additional pension is discontinued at any time after September 30, 1982, by reason of such child's discontinuance of pursuit of a course of instruction at an approved educational institution.

(2) The limitations and reductions provided for under paragraph (1) of this subsection shall not apply to pension or additional pension payable to or on behalf of a child who—

(A) before attaining the age of eighteen became permanently incapable of self-support, or

(B) who, after attaining the age of eighteen and before attaining the age of nineteen, is pursuing a program of education for the purpose of receiving a secondary school diploma.

REPEAL OF AUTHORITY TO PURSUE CORRESPONDENCE TRAINING

Sec. 437. (a) Section 1631(c) is repealed.

(b)(1) Section 1652(c) is amended by striking out "correspondence school,".

(2) Section 1681(b) is amended by striking out "other than a program exclusively by correspondence,".

(3)(A) Section 1684 is amended to read as follows:

"§ 1684. Apprenticeship or other on-job training

"Any eligible veteran may pursue a program of apprenticeship or other on-job training and be paid a training assistance allowance as provided in section 1787 of this title."

(B) The item relating to such section in the table of sections at the beginning of chapter 34 of such title is amended to read as follows:

"1684. Apprenticeship or other on-job training."

(c)(1) Section 1701(a)(6) is amended by striking out "correspondence school,".

(2)(A) Section 1734 is amended—

(i) by striking out "(a)"; and

(ii) by striking out subsection (b).

(B) The heading for such section is amended to read as follows:

"§ 1734. Apprenticeship or other on-job training."

(C) The item relating to such section in the table of sections at the beginning of chapter 35 is amended to read as follows:

"1734. Apprenticeship or other on-job training."

(d)(1) Section 1780 is amended—

(A) in subsection (a)—

(i) by striking out "other than a program by correspondence,";

(ii) by inserting "or" at the end of clause (4);

(iii) by striking out clause (5); and
(iv) by redesignating clause (6) as clause (5);

(B) by striking out subsection (b) (including the center heading preceding such subsection); and

(C) by redesignating subsections (c), (d), (e), (f), and (g) as subsections (b), (c), (d), (e), and (f), respectively; and

(D) by striking out "subsection (d)(2)" in subsection (d) (as so redesignated) and inserting in lieu thereof "subsection (c)(2)".

(2) Section 1784 is amended—

(A) by striking out "or, in the case of correspondence training, the last date a lesson was serviced by a school" in subsection (a); and

(B) by striking out "section 1780(d)(4)" in subsection (c) and inserting in lieu thereof "section 1780(c)(4)".

(3)(A) Section 1786, relating to correspondence courses, is repealed.

(B) The table of sections at the beginning of chapter 36 is amended by striking out the item relating to section 1786.

(4) The second sentence of section 1798(c) of such title is amended by striking out "correspondence, or".

(e) Section 604(a) of the Vietnam Era Veterans' Readjustment Assistance Act of 1972 (38 U.S.C. 1712 note) is amended by striking out "(1) eligible to pursue a program of education exclusively by correspondence by virtue of the provisions of section 1786 of such title (as added by section 316 of this Act) or (2)".

(f) The amendments made by this section shall take effect on October 1, 1982.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

CONCERNING SUCCESSFUL COMPLETION OF THE TEST FLIGHT PHASE OF SPACE SHUTTLE PROGRAM

Mr. FUQUA. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the joint resolution (H.J. Res. 541) concerning the successful completion of the test flight phase of the Space Shuttle program, with Senate amendments thereto, and concur in the Senate amendments.

The Clerk read the title of the joint resolution.

The Clerk read the Senate amendments, as follows:

Strike out all after the resolving clause and insert:

That the Congress of the United States congratulates the National Aeronautics and Space Administration, the members of the Astronaut Corps, prime contractor Rockwell International, associate contractors Martin Marietta and Thiokol, the thousands of Shuttle subcontractors throughout the United States, and the tens of thousands of dedicated Space Shuttle workers who contributed to the successful completion of the Space Shuttle test flight period and to the entry of our Nation into a promising new era of spaceflight for the benefit of the people of the United States and all mankind.

Strike out the preamble and insert:

Whereas when the Space Shuttle Columbia flew through a blazing re-entry and skimmed to a perfect landing on the 4th of

July 1982, at Edwards Air Force Base, California, the National Aeronautics and Space Administration successfully completed the test flight phase of the Space Shuttle program and began a new era of operational Space Shuttle missions;

Whereas in four test missions, the Space Shuttle Columbia, a reusable spaceship designed to provide routine space travel for a wide variety of scientific, commercial, and military payloads at reduced costs and with a high reliability of success, lived up to its promise as the most advanced spacecraft in the world;

Whereas in four test missions, the Columbia was lifted from Earth, orbited in the vacuum of space like a satellite, operated a variety of scientific experiments, tested the capability of the remote manipulator system to deploy satellites in orbit and to retrieve satellites, descended into the Earth's atmosphere, was piloted by astronauts like a conventional winged airplane, and was landed at Edwards Air Force Base, California, and at White Sands missile range, New Mexico;

Whereas the Space Shuttle Columbia, the newly completed Space Shuttle Challenger, and the sister Shuttles Discovery and Atlantis, now under construction, will be able to fly repeatedly back and forth from space as an operational space transportation system;

Whereas the Space Shuttle orbiters will accommodate an unprecedented variety of payloads including a fully equipped scientific laboratory (Spacelab) provided by the European space agency, underscoring the commitment of the United States to international cooperation in space activities;

Whereas using the unique qualities of the space environment (weightlessness and a near perfect vacuum) the Space Shuttle orbiters will be used for experiments to produce special alloys, metals, glasses, crystals, and pharmaceuticals that cannot be performed on Earth;

Whereas the Space Shuttle orbiters will place in orbit satellites to observe the Earth's weather, provide improved communications, discover new mineral resources, monitor crop and timber yields, help United States forces to navigate, and monitor arms control agreements;

Whereas the Space Shuttle orbiters will also place in orbit the most powerful space telescope and will launch scientific probes to explore the planets;

Whereas the Space Shuttle program is a national enterprise, geographically and technologically, requiring tens of thousands of skilled workers to design, develop, test and evaluate the various Space Shuttle components;

Whereas the Space Shuttle program has been judged by independent research organizations to have a positive effect on the national economy, creating jobs, reducing inflationary pressures, and forwarding the development of advanced technologies; and

Whereas the Space Shuttle program is a source of great national pride and the United States now holds world leadership in its proven ability to operate a reusable Space Shuttle: Now, therefore, be it

The SPEAKER. Is there objection to the request of the gentleman from Florida?

There was no objection.

A motion to reconsider was laid on the table.

REPORT ON RESOLUTION PROVIDING FOR CONSIDERATION OF H.R. 5543, OCEAN AND COASTAL RESOURCES MANAGEMENT AND DEVELOPMENT BLOCK GRANT ACT

Mr. BOLLING, from the Committee on Rules, submitted a privileged report (Rept. No. 97-706) on the resolution (H. Res. 555) providing for the consideration of the bill (H.R. 5543) to establish an Ocean and Coastal Resources Management and Development Fund and to require the Secretary of Commerce to provide to coastal States national ocean and resources management and development block grants from sums in the fund, which was referred to the House Calendar and ordered to be printed.

REPORT ON RESOLUTION PROVIDING FOR CONSIDERATION OF H.R. 6666, PROVIDING ADDITIONAL AUTHORIZATION FOR LIBRARY OF CONGRESS JAMES MADISON MEMORIAL BUILDING

Mr. BOLLING, from the Committee on Rules, submitted a privileged report (Rept. No. 97-707) on the resolution (H. Res. 556) providing for the consideration of the bill (H.R. 6666) to amend the joint resolution of October 19, 1965, to provide additional authorization for the Library of Congress James Madison Memorial Building, which was referred to the House Calendar and ordered to be printed.

REPORT ON RESOLUTION PROVIDING FOR CONSIDERATION OF H.R. 6786, AUTHORIZING ADDITIONAL FUNDS FOR ACQUISITION OF CERTAIN PROPERTY FOR U.S. CAPITOL GROUNDS

Mr. BOLLING, from the Committee on Rules, submitted a privileged report (Rept. No. 97-708) on the resolution (H. Res. 557) providing for the consideration of the bill (H.R. 6786) to amend Public Law 96-432 relating to the U.S. Capitol Grounds to authorize additional funds for the acquisition of certain property for addition to the U.S. Capitol Grounds, which was referred to the House Calendar and ordered to be printed.

RADIO BROADCASTING TO CUBA ACT

Mr. FASCELL. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill (H.R. 5427) to authorize support to Radio Broadcasting to Cuba, Incorporated.

The SPEAKER. The question is on the motion offered by the gentleman from Florida (Mr. FASCELL).

The motion was agreed to.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill, H.R. 5427, with Mr. RATCHFORD in the chair.

The Clerk read the title of the bill.

The CHAIRMAN. When the Committee of the Whole House rose on Tuesday, August 3, 1982, pending was the first committee amendment recommended by the Committee on Energy and Commerce, and a substitute for said amendment offered by the gentleman from Iowa (Mr. LEACH).

The Chair recognizes the gentleman from Iowa (Mr. HARKIN).

AMENDMENT OFFERED BY MR. HARKIN TO THE ENERGY AND COMMERCE COMMITTEE AMENDMENT

Mr. HARKIN. Mr. Chairman, I offer an amendment to the committee amendment.

The Clerk read as follows:

Amendment offered by Mr. HARKIN to the Energy and Commerce Committee amendment: Page 4, strike out line 11 and all that follows through line 8 on page 6 and insert in lieu thereof the following:

"(2) any AM frequency broadcasting to Cuba under this Act may only be carried out under the authority provided by subsection (e).

"(e) For purposes of providing AM frequency broadcasting to Cuba under this Act, the Board is authorized to—

"(1) prepare or otherwise obtain material suitable for radio broadcasting; and

"(2) provide for the broadcasting of that material to Cuba by making expenditures for charges for the use of the facilities of commercial radio broadcasting stations which can be heard in Cuba."

Page 4, line 1, strike out "(A)" and insert in lieu thereof "(1) if the Board selects a non-AM frequency for broadcasting to Cuba and if such facilities can be converted for use for broadcasting on that non-AM frequency."

Page 3, line 24, strike out "(1)".

Mr. HARKIN (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Iowa?

There was no objection.

(Mr. HARKIN asked and was given permission to revise and extend his remarks.)

Mr. HARKIN. Mr. Chairman, this amendment requires that if the AM band is to be used, then the mechanism will be to have the material prepared by the Board, the Board of International Broadcasting, but broadcast on a number of commercial stations.

This amendment enables private enterprise to participate in and benefit

from the \$10 million project to broadcast to Cuba. It also permits broadcasters, rather than the administration, to decide whether they wish to expose their frequency and public service to the risk that Cuba will retaliate on their frequency.

This amendment adopts the voluntarism philosophy of Kenneth Giddens, a former Director of the Voice of America, a consultant to the Presidential Commission on Broadcasting to Cuba, and an AM-FM TV broadcaster in Mobile, Ala. Mr. Giddens told officials of WHO radio in Des Moines that they should be happy to sacrifice their station in this confrontation with Cuba. He suggested that WHO's reluctance indicated a "lack of patriotism."

In a recent issue of "Broadcasting," Mr. Giddens said that if he were in WHO's shoes he would be ashamed of the way WHO is acting in trying to protect its station and service. Mr. Giddens told Broadcasting: "Maybe I am more idealistic" than WHO. He added that broadcasters "are at a risk" in the radio confrontation with Cuba, and he said, "It's a gamble we all take." Further quoting Mr. Giddens in Broadcasting, he said: "Any soldier who goes to war might be shot."

This amendment that I am offering, therefore, would allow Mr. Giddens and other broadcasters who agree with him to volunteer to place their idealism, patriotism and stations on the frontlines.

Moreover, the adoption of this amendment will maximize the chance of Radio Marti's signal actually reaching Cuba and serving a useful purpose.

There is little doubt that in its present form, that is, a single AM radio station, Cuba can completely block the signal from reaching the island. The State and Defense Department have said so, as have the FCC, the NTIA and the ICA. That being the case, to invest \$10 million in Radio Marti in its present form would be a total waste of the public's money. There is a better way. The time-proven method used by international broadcasters to overcome jamming is to broadcast on multiple frequencies. As the House Committee on Government Operations found in its December 11, 1981, report on international broadcasting:

Multiple frequency broadcasting gives the jammer more to deal with and increases the possibility that listeners will be able to tune in an audible signal.

□ 1540

Mr. Chairman, there is a strong argument to be made that Cubans would be more likely to listen to existing AM stations than to Radio Marti. There are a number of stations from the United States and from other Caribbean countries that can be heard very well in Cuba. In fact, there are at least

two very worthy precedents for this type of paid rebroadcasting.

After 1962, WGBS, WKWF in Key West, WWL in New Orleans, Radio Caribbean from the Dominican Republic transmitted programs prepared by the Cuban Freedom Committee founded in Washington by Representative Roman Pucinski who believed that Cubans had been brainwashed with a "Hate America" campaign and thereafter they responded by taking money and buying time on then existing commercial radio stations.

These stations immediately volunteered their services and were connected through telephone line patches to the Voice of America in Washington. Again I am talking about these stations—WCKR, WGBS, WMIE, all from Miami, WSB in Atlanta, WGN in Chicago, WWL in New Orleans, WCKY in Cincinnati, WRUL in Massachusetts, WGEL in Belmont, Calif., the last two being shortwave stations.

So what I am saying with my amendment is rather than just build one radio station, Radio Marti, at one frequency to broadcast propaganda to Cuba, let us take the \$10 million, and go ahead and let the BIB prepare the material in any way that they want to, take the money and buy time on commercial radio stations, buy it on WINZ Radio in Miami, or WQBA, or WWL, or any other radio station that would be willing to broadcast to Cuba.

And I guarantee my colleagues if given the money to buy the time, they will broadcast. And rather than having Castro try to jam just one frequency, he is going to have 10 or 15 frequencies out there beaming into Cuba.

So I submit, if Members really want to get a message across to Cuba, support this amendment. No. 1, it will be a volunteer effort by radio stations to go ahead and broadcast. They will be paid handsomely for the time that we buy on their stations, and the material will be prepared by the Board for International Broadcasting.

It seems to me that this is the best way to get our message through to Castro without giving him the ability to block the signal.

I urge support of the amendment.

Mr. FASCELL. Mr. Chairman, I move to strike the requisite number of words and I rise in support of the amendment.

Mr. Chairman, the main points that the gentleman from Iowa has made have been made before and will probably unfortunately be made over and over again on every amendment.

Without having the slightest bit of doubt as to the seriousness of those who oppose this bill, basically when you examine the amendment what it does is simply kill the bill. It is a lot simpler just to vote against the bill if that is what the Members want to do, in all seriousness.

Now, I am glad the gentleman from Iowa brought up the problem about the radio stations in Miami. Some of them do reach Cuba with AM broadcasting. They reach the fringes of Havana. They by no means cover the entire island of Cuba. There is no way they could do that. Besides that, to do the kind of job that is necessary to reach the Cuban people, you would have to use quite sophisticated directional antenna and towers. You are not talking about just a plain old commercial radio station. And, sure, if you gave commercial stations the money they would want to try to do something with it. And, yes, of course they are all willing. But they would not reach the audience we are trying to reach.

So let us not fool anybody that if you suddenly went out and bought a lot of time on WHO, or WINZ, or some other radio station, that you are going to do the job as envisioned in this bill by the Board for International Broadcasting.

It would be like saying, in effect, that the way to broadcast into Poland is to buy a lot of time on German commercial stations, let them broadcast into Poland and in that way we would not have to operate the transmitters that we have in Munich and other sites in Europe in order to get our message across.

Now, you either want to do this job right or you do not. And obviously commercial stations are not a good substitute. The amendment simply guts all of the authority of the Board for International Broadcasting to use its experience in this type of international broadcasting. And if the Members want to do that, it is understandable, if you are opposed to the bill.

But from just a logical, common-sense, reasonable standpoint, there is no way that this amendment should be adopted. I would urge my colleagues to vote against it.

And let me say in conclusion we have several amendments that are rather substantive. And I am sure the gentleman from Iowa thinks this is a substantive amendment.

Mr. HARKIN. Mr. Chairman, will the gentleman yield?

Mr. FASCELL. I yield to the gentleman from Iowa.

Mr. HARKIN. I thank the gentleman for yielding.

I most assuredly think it is. We do have precedents for this.

Mr. FASCELL. I understand all of that. Of course we have precedents for it. That is the reason we had to quit, because it was not any good. And that is the reason we have to try something else if we are going to be sensible about it. I do not want to be ridiculous about this thing. The amendment just goes to the heart of the bill. It destroys all of the authority for the Board for International Broadcasting

to make these broadcasts. It would be just as if you reached in there and took all the authority away from the Board for International Broadcasting to run Radio Free Europe or Radio Liberty and say to them, "You prepare the material and give it to a commercial station." I think that is ridiculous.

I ask my colleagues to vote it down.

Mr. SWIFT. Mr. Chairman, I move to strike the requisite number of words.

I rise in support of the amendment. I would like to make some comments relative to this amendment and to several other amendments that may be offered as well.

I would like to begin with some comments that the gentleman from Iowa made with regard to the analogy that taking this action is analogous to going to war.

If broadcasting propaganda to Cuba is a helpful U.S. national policy, and I am satisfied to take the judgment of the Foreign Relations Committee which has expertise in that area that it is, then it does not follow that there is only one way to do that and that the State Department is the only agency of the U.S. Federal Government capable of determining how to achieve that particular policy end. That is a distinction that is terribly important to make in this debate.

The gentleman from Florida said that if you were opposed to the whole bill you would certainly want to support the Harkin amendment. I would think that is true. But I think it is also true that you do not have to be opposed to the whole bill to support the Harkin amendment or some of the other amendments that have been noticed in the Record that will be offered.

We are talking here not necessarily about opposing what policy initiatives the State Department wishes to make. We are suggesting that those policy initiatives can be satisfied in ways that are not deleterious to the functioning of U.S. broadcasting.

If you want to wrap the flag around the policy goal, fine. But do not let someone tell you that you necessarily have to wrap the flag about this specific means of doing it.

Mr. HARKIN. Mr. Chairman, will the gentleman yield?

Mr. SWIFT. I yield to the gentleman from Iowa.

Mr. HARKIN. I thank the gentleman for yielding.

The gentleman makes a very good point. Obviously I am opposed to the bill. I make no secret of that.

But I am saying that if the bill does pass and if the people who support the bill really wanted to do what they think it is going to do, the best way to do it would be to take whatever money we are going to expend to build this one station and to do what we did back in the sixties, and that is buy commer-

cial time on commercial radio stations and have those stations volunteer their time. We want this voluntarism. But they are going to be paid for their time.

Let me say that the amendment is not just limited to U.S. stations. We can buy time on Jamaican stations, they get to Cuba, radio stations in Santa Domingo that get there, and other countries that broadcast in Spanish to Cuba. It is not just limited to U.S. stations.

So I would submit that if you really want to broadcast to the Cuban people and not allow Castro to jam it, this is the single best way to do it.

Mr. SWIFT. I thank the gentleman for those remarks.

I would just summarize my point as saying there is nothing essential to establishing Radio Marti in the precise fashion established by the State Department in order to achieve that policy goal.

□ 1550

I would hope the Members of the House would listen to this particular amendment and other amendments that will be offered that provide alternative means of achieving the same end, because they do exist and they will not interfere totally with achieving that policy goal, regardless of what the Members who support it will tell you.

Mr. RINALDO. Mr. Chairman, I move to strike the requisite number of words. I rise in opposition to the amendment.

Mr. Chairman, the question arises, is this or is it not a viable alternative. The fact of the matter is that if we look at it realistically, the amendment offered by the gentleman from Iowa is not a real alternative. The South Florida Broadcasters Association in their testimony to the House Foreign Affairs Committee on March 3 stated: "Commercial operations are a poor substitute for the proposed Radio Marti."

Because of their distance from Cuba, because of their insufficient power and antenna which are not designed for broadcasting to Cuba, the U.S. stations can be heard only in limited areas of Cuba and cannot provide the blanket coverage that is needed and that is envisioned for Radio Marti. Radio Marti's transmitter will be located in the Florida Keys and will have a directional antenna. Even when Radio Marti will need a separate transmitter in the Caribbean to reach eastern Cuba.

Furthermore, we do not know what, if any, radio stations in Caribbean countries can be heard in Cuba. There is no reason to believe that any such station would be willing to broadcast to Cuba in our behalf.

We have to take a look at the philosophy of private stations. Many of them are often identified with positions that are too partisan to serve our interests, whereas Radio Marti would be nonpartisan.

Finally, private stations might be reluctant to give up prime time for Radio Marti, since this might affect their own commercial viability. The cost to Radio Marti, therefore, for leasing this prime time might be quite high.

In the final analysis, the amendment is a poor amendment. It would gut the legislation. It would kill its purpose. It would render it ineffective and the amendment should be defeated.

Mr. BEDELL. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I think we should point out that we are not just talking about the radio stations in southern Florida about which the last speaker spoke. This authorizes them to use stations from any area.

The gentleman said that they do not have adequate power to properly reach Cuba. There is a station in Mexico, for example, that uses 150,000 watts, compared to the 50,000 watts of the station in Florida; one in Colombia with 100,000; one in Venezuela with 100,000 watts. These are Spanish-speaking stations, widely heard in Cuba.

I hope that we will realize that whereas we are talking about American broadcasting stations, we are not limiting it to American broadcasting stations and this amendment of the gentleman from Iowa (Mr. HARKIN) makes it possible for them to contract not only with powerful stations outside of the country, but with stations which very possibly would have more credibility as we contract for such broadcasters.

Mr. RINALDO. Mr. Chairman, will the gentleman yield?

Mr. BEDELL. I would be glad to yield to the gentleman.

Mr. RINALDO. Has the gentleman discussed this proposal with the management of any of these stations? Have they agreed to this form of broadcasting on behalf of the United States?

Mr. BEDELL. I would leave it up to the gentleman, but I guess that normally when you buy time, you can buy time; but I would ask the gentleman from Iowa.

Mr. HARKIN. Mr. Chairman, if the gentleman will yield, just in response to the gentleman, as I said, we have precedents for this in the sixties when we did, indeed, buy time from commercial stations.

Again, what I am pointing out with my amendment is that if Mr. Giddens wants voluntarism and wants people to volunteer, let us let these radio sta-

tions volunteer their time in the United States.

Now, I would just say one further thing, that there are also precedents for using other stations, such as radio Clarin in Santo Domingo, which is an anti-Castro station; and WQBA in Miami, which broadcasts at 10,000 watts.

There is also radio Swan and all the other ones that the gentleman mentioned.

I am certain that if you want to buy time on those stations, you will get the time.

Mr. RINALDO. Mr. Chairman, will the gentleman yield further?

Mr. BEDELL. I would be glad to yield to the gentleman.

Mr. RINALDO. I am sure there are precedents; but as was very aptly pointed out earlier by the gentleman from Florida, the precedents are bad precedents. They were not workable. That is why the State Department, that is why the administration, that is why everyone who formulated this legislation feels that we need Radio Marti.

Mr. HARKIN. Mr. Chairman, will the gentleman yield?

Mr. BEDELL. I yield to the gentleman from Iowa.

Mr. HARKIN. I thank the gentleman for yielding.

Quite to the contrary, it was successful in the sixties, but the point is that what happened was that we found in the sixties that when these stations were broadcasting to Cuba, there was such a virulent anti-U.S. attitude in Cuba at that time that it was not getting through.

I submit perhaps times have changed, because we do know that Cubans are listening to Miami radio stations. I know from having been stationed in Cuba before at Guantanamo that they listen to Jamaican radio stations; so we can buy Jamaican time, too. They are listening to all these stations now which they did not listen to in the early sixties.

Mr. TAUKE. Mr. Chairman, will the gentleman from Iowa yield?

Mr. BEDELL. I will be glad to yield to my colleague, the gentleman from Iowa.

Mr. TAUKE. It is interesting that the proponents of the measure before us should use the failure of other efforts in the past as reason for denying the use of those efforts. If we go back over the last 25 years and review the record of U.S. broadcasting to Cuba, we have had dozens of efforts to broadcast information to Cuba; a program called Radio Swan, which was set up by the CIA back in the sixties was very similar to Radio Marti. That failed and I presume that it could be argued that this proposal, Radio Marti, could suffer the same fate if we are to judge by precedent.

We look at what happened to the program Cita Con Cuba, when it was broadcast by the Voice of America. That failed and was gradually phased out. I can assume that judging from precedent that the proposal that we have before us of Radio Marti could also fail.

I do not think that the proponents want to find themselves in the position of suggesting that simply because something has not worked well in the past that that is reason for rejecting it, because if they do offer that rationale, that is adequate rationale to reject the whole proposal.

Mr. LEACH of Iowa. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I will be very brief and just simply say that I rise in support of the amendment of the gentleman from Iowa, although I do have one concern that I think should be placed in the RECORD. That is, if it should pass, it should be clear that this authorizes the use of foreign stations, but does not require it.

I personally support the notion of using private stations. It is kind of a free enterprise approach, and very interestingly, I would suspect would be far cheaper than a governmental approach from a number of points of view.

I have to say that I have some sense of an unseemliness about the U.S. Government buying time on a foreign station in order to propagandize a particular point of view to a country like Cuba.

I would only say that the Harkin amendment makes a good deal of sense to me, although if I were to leave any advice for the record it would be that we should not be buying foreign time.

Mr. HARKIN. Mr. Chairman, will the gentleman yield?

Mr. LEACH of Iowa. Of course.

Mr. HARKIN. I appreciate the gentleman's viewpoint. I am just saying, in response to my other colleague, the gentleman from Iowa (Mr. TAUKE), that if you ever hoped to get through a message to the Cubans, it would seem to me that this is the most logical and reasonable way of doing it; rather than one single frequency owned and operated by the U.S. Government to have time on a number of commercial stations that the Cubans are already listening to. That is why I say that if you really want to get that message through and if you support the bill, that this ought to be the best, most economical way to do it.

Mr. LEACH of Iowa. I would agree with the gentleman, but simply stress that it is not only the most economical, it certainly has the best chance of surviving some sort of jamming offensive by the other side.

Mr. BEDELL. Mr. Chairman, will the gentleman yield?

Mr. LEACH of Iowa. Yes, of course.

Mr. BEDELL. I think we should also point out that there is great concern about the possible jamming of whatever frequencies are used. If that should occur, I should suspect that Castro would be somewhat less likely to jam the stations from Mexico or Santo Domingo or those other stations, if it were to be necessary to do that.

I share that gentleman's concern, but it certainly is a lifejacket that is there in case it needed to be used.

Mr. LEACH of Iowa. The gentleman makes a good point, but I would stress that a number of the bands that are used in the United States that might be used against Cuba also have similar frequencies used in South America and Mexico. One of the problems with the legislation before us is that if any band is jammed, it will have an effect in Mexico and South America on those stations.

I personally feel very strongly that Cuba will not be blamed for it, that the likelihood is that the United States will be perceived as the aggressor in this particular war and that in Latin America, Cuba will be seen as a country responding in a more rational fashion than perhaps we would like and that the problem will fall on the United States of America in terms of being perceived as a country that is decimating Latin American broadcasting.

□ 1600

Mr. DERWINSKI. Mr. Chairman, I rise to oppose the amendment.

Now, I recognize that it sounds so noble to say, "Let us use free enterprise." But let us look at the facts of life here: The facts of life here are that if we adopted an amendment like this it would create an administrative monstrosity that we could not control.

Can my colleagues imagine the total chaos an administrator of this program would face trying to decide what stations to use where, how and in what ratio?

The next thing we know we would have interested local friends trying to promote a certain slice of the pie.

Mr. FASCELL. Mr. Chairman, will the gentleman yield to me?

Mr. DERWINSKI. I yield to the gentleman from Florida.

Mr. FASCELL. Mr. Chairman, it is not only an administrative nightmare, but let us examine how fair the amendment is.

Under the bill, the Board for International Broadcasting would have the flexibility, and the administration would have the flexibility to do whatever seemed best in the country's interest. It does not mandate anything. It could contract out, which the gentleman from Iowa now supports—but

later on in another amendment he will be opposed to. They could go commercial. They could do whatever they wanted to do if it seemed the best way to do it.

What the amendment would do would be to foreclose all the options except the one that is in the amendment.

As the gentleman from Illinois points out, that is an administrative nightmare and probably would not get the job done because it would require all kinds of international agreements and a whole host of other arrangements.

Although it is possible theoretically and technically to do it, you could not reach your listening audience. It would be a disaster to operate a sensible program this way.

That is what the amendment means.

Mr. DERWINSKI. One other point I would like to make. I forget who the Member was who commented that the use of time on a commercial station would somehow be more acceptable than using a Government station; quite the contrary. Remember, we are supposed to be beaming a message to the people of Cuba. They want to know that the United States is interested in them. They want to know they are not forgotten. They want to know there is an alternative to messages other than those coming out of the Castro-Soviet propaganda machine.

The very fact that the U.S. Government is now showing this dramatic, long overdue interest is a sign of hope and inspiration to the people of Cuba. That is the gut issue before us.

There are all sorts of wonderfully phrased and clever amendments; but, remember, the attack behind every one of these amendments is on the very concept of Radio Marti and broadcasting to the people of Cuba. That is the issue before us and it will be the issue before us again and again and again.

The concept here is, to give the people of Cuba the truth which they have been denied for 23 years. They have been spoon-fed propaganda. That is a concept that justifies Radio Free Europe, Radio Liberty for Europe the recognition that behind the Iron Curtain you do not receive the truth. That is the real issue here. You could claim to be using a more effective station from Jamaica, the Dominican Republic, throw in others with the geographical potential, the facts of life are that you need a U.S. message to the people of Cuba, a message of truth. That is what we will be voting on again and again and again.

Mr. HYDE. Mr. Chairman, will the gentleman yield?

Mr. DERWINSKI. I yield to the gentleman from Illinois.

Mr. HYDE. I thank the gentleman for yielding.

Mr. Chairman, I just want to say I completely agree with the remarks of the gentleman. I spent an interesting week in Cuba once. I found it startling because I had not experienced it before.

I had been in countries like Chile and Argentina that are supposed to be repressive, but I could always find a copy of an American newspaper or Time magazine or Newsweek, or something, no matter how authoritarian those governments were. But in Havana it was impossible to find anything other than the Communist paper which was dripping with "Hate America, Hate America"; everywhere you went, there was propaganda either on a wall or on a building, "Hate America, Hate America."

Mr. DERWINSKI. Or on the billboards.

Mr. HYDE. Or on billboards. You just could not find the truth in that country. Those people who are warm people, friendly, disposed toward the United States, are being denied an opportunity to learn what is going on in the world.

The same thing is true in Czechoslovakia, Hungary, by the way. Communism has a way of stultifying and stamping out access to the truth.

This bill is a direct way of rectifying that, and I support it.

The CHAIRMAN. The time of the gentleman from Illinois (Mr. DERWINSKI) has expired.

(On request of Mr. BEDELL and by unanimous consent, Mr. DERWINSKI was allowed to proceed for 1 additional minute.)

Mr. BEDELL. Mr. Chairman, will the gentleman yield?

Mr. DERWINSKI. I yield to the gentleman from Iowa.

Mr. BEDELL. I thank the gentleman for yielding.

Mr. Chairman, I would ask the gentleman if anyone were to buy time on those stations and run these programs, does the gentleman think for a minute that the people who heard that would not know that was a message from the United States any more than if any other manufacturer or any other person bought time and ran it over that station?

Mr. DERWINSKI. Very definitely. First, how would they know after listening to, say, a message which would be advertising Post Toasties in Jamaica that, the following message was intended for them. We could not get this thing coordinated at all. That is the point we made earlier.

Also, from a practical accounting standpoint we would drive the General Accounting Office crazy trying to monitor what they were doing, how, why.

That is why I make the basic point that this amendment is one of many intended to do one thing: Attack the

very concept of the creation of this entity. That is what it does.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Iowa (Mr. HARKIN) to the Energy and Commerce Committee amendment.

The question was taken; and on a division (demanded by Mr. HARKIN) there were—ayes 7, noes 16.

RECORDED VOTE

Mr. HARKIN. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 78, noes 284, answered "present" 1, not voting 71, as follows:

[Roll No. 259]

AYES—78

□ 1620

Messrs. JOHNSTON, HOPKINS, and YATES changed their votes from "aye" to "no."

So the amendment to the Energy and Commerce Committee amendment was rejected.

The result of the vote was announced as above recorded.

AMENDMENT OFFERED BY MR. TAUKE TO THE ENERGY AND COMMERCE COMMITTEE AMENDMENT

Mr. TAUKE. Mr. Chairman, I offer an amendment to the committee amendment.

The Clerk read as follows:

Amendment offered by Mr. TAUKE to the Energy and Commerce Committee amendment: Page 4, strike out line 11 and all that follows through page 6, line 8, and insert in lieu thereof the following:

"(2) no Federal agency shall have any authority to select a frequency for such radio broadcasting, and the Broad shall not have any authority to operate on a frequency for such radio broadcasting, if such frequency, as of the date of the enactment of the Radio Broadcasting to Cuba Act (A) is allocated to non-Government radio broadcasting in the United States; or (B) is within 10 kilohertz of any frequency allocated to non-Government radio broadcasting in the United States."

Page 3, line 24, strike out "(d)(1)" and insert in lieu thereof "(d)".

Page 4, line 1, strike out "(A)" and insert in lieu thereof "(1)".

Mr. TAUKE (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Iowa?

There was no objection.

Mr. TAUKE. Mr. Chairman, I know that this bill has already been debated at some length, and I recognize that many of the Members are already becoming somewhat weary of the subject of radio broadcasting to Cuba.

The amendment that I have offered, however, is an amendment that I believe deserves careful consideration. It was approved by the Subcommittee on Telecommunications, Consumer Protection and Finance by a 12-to-2 vote when this issue first came before that subcommittee, and it was reported, of course, to the full Committee on Energy and Commerce. After extensive negotiations with the State Department, we had reached an agreement on what we thought was a compromise for this amendment to be offered to the full committee, only at the last moment to have the State Department back out. So this amendment was never considered by the full Committee on Energy and Commerce. And it did receive the 12-to-2 endorsement of the Telecommunications Subcommittee.

Mr. Chairman, one of the big concerns that we have had about the whole concept of Radio Marti is: How do we make certain that the information that is being broadcast on Radio Marti is actually heard by the Cubans? A second major concern is: How do we prevent major interference from occurring to those American broadcasters who are trying to reach our own

people with news, information, and entertainment?

It occurred to us, as we looked at this problem of how to reach the Cubans and how to prevent interference of American broadcasts, that the best alternative was to use the accepted form for international broadcasting—shortwave. Both Radio Free Europe and Radio Liberty use shortwave because it is the accepted frequency for international broadcasting. In addition, it is much more difficult to interfere with or to jam than AM or FM broadcasting. That is why the members of the Telecommunications Subcommittee said that it made a lot of sense to have shortwave be the frequency for broadcasting on Radio Marti.

□ 1630

It occurred to us that with shortwave we would first of all reach more people in Cuba.

I wish all of the members of the committee would have the opportunity to read the feasibility study on Radio Free Cuba done by the International Communications Agency that was issued last July.

I wish all of you had the opportunity to read the Voice of America broadcasting to Cuba study. Because I think that you would find in those studies clear evidence of what even the proponents of this proposal have recognized, and that is that there is going to be interference with domestic commercial broadcasters as a result of Radio Marti.

If it does what the Foreign Affairs Committee says it will do to the people of Cuba, if they hear it; namely, caused them to be disenchanted with their government, surely the Castro government has a great stake in preventing it from being heard.

If it is broadcast on AM, then, I am sure that it will be jammed or interfered with by Castro and will not be heard by the Cubans.

Now, I know there are going to be those who support Radio Marti on the AM band who will say that there are no shortwave sets in Cuba.

We have done some research into this. It is estimated by UNESCO that there are a half million shortwave sets in Cuba. The sets are being put together right now in Cuba. They come from the Soviet Union and they are assembled in Cuba.

For 80 pesos, virtually any Cuban can buy a shortwave set and many have done so already.

But the fact is it makes a great deal more sense to reach that 10, 20, or 25 percent of the Cubans who have shortwave sets with a shortwave broadcast than it does to spend millions of dollars to broadcast on AM with no assurance that any Cuban will hear it.

Moreover, this amendment protects American broadcasters. While we need

to look at the foreign policy repercussions, we must be very concerned as well about the domestic repercussions.

The CHAIRMAN. The time of the gentleman from Iowa (Mr. TAUKE) has expired.

(By unanimous consent Mr. TAUKE was allowed to proceed for 1 additional minute.)

Mr. TAUKE. If we have Radio Marti established on AM, even the State Department personnel suggest that there would probably be retaliation. That is the excuse they gave for not putting it on Radio Marathon. That is the excuse they gave for rejecting some other frequencies that also happened to have Government stations broadcasting on them.

I believe it is fair to say the commercial broadcasters in this country will also suffer from interference if they happen to be on the same frequency as Radio Marti.

With shortwave, however, we do not have that problem. We will protect the commercial broadcasters.

So because this amendment protects the commercial broadcasters in this country and because it will guarantee that Radio Marti will reach more Cubans than Radio Marti broadcast on AM, I urge support for this proposal.

Mr. FASCELL. Mr. Chairman, I rise in opposition to the amendment.

The effect of this amendment, Mr. Chairman, purely and simply is to take Radio Marti broadcasting off the AM band and to restrict the broadcasting to shortwave.

What that means is that the U.S. Government cannot do what it started out to do; it is just that simple.

Shortwave is fine; it is effective; we use it with Radio Liberty; we use it with Radio Free Europe. There are a lot of shortwave sets in the European area that can receive a broadcast.

In Cuba you have a different ball game. You have roughly 2 million AM receivers.

If you adopt this amendment you say in effect, "Forget 2 million people, we will just carry our message to 50,000 of the elite in Cuba who have shortwave receivers."

This does not make sense to me. I think we ought to vote down the amendment.

Mr. SWIFT. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendment.

Mr. Chairman, I just wish to reiterate a point that I made earlier about what we are wrapping the flag around.

The point is that one does not have to be opposed to the concept of Radio Marti in order to find the method the State Department has dictated we use to achieve that end. You do not have to support the method in order to

achieve the purpose or the policy goal that the State Department is after.

We hear every time we get about midway in the debate and when we start talking about what my committee has jurisdiction over and what my committee has some jurisdiction in, we run back to a lot of rhetoric about foreign policy.

We are not trying to tell the Foreign Affairs Committee how they should run their business, the area in which they have knowledge. If they believe Radio Marti is an important foreign policy initiative for the United States I will go along with that.

But when they then step totally outside their area of expertise and tell us how we have to do it, we discover that the method they suggest we have to use to do it is one that is going to directly interfere, and unnecessarily so, with U.S. broadcasters. And the only answer we have for that is, it is unpatriotic not to just roll over and play dead when Uncle Sam tells you your business has got to go down the drain in order that he can do this over here, that seems to me to be manifestly unfair.

The point we are hoping we can get the Members of this body to understand is you can support the Tauke amendment and achieve the goals of Radio Marti. You can do both. They are not fundamentally inconsistent.

I do not believe there is anyone here who would say that any American or any American business should unnecessarily give up something that is not needed in order to achieve a national foreign policy goal.

What the Tauke amendment says is we will do this for Cuba the way we do it in Europe, the way it has been done all over the world, the international method of conducting propaganda and informational programs, via shortwave.

That is all that is going on here.

So do not let them wrap a flag around the method even though it may be perfectly appropriate to wrap the flag around the foreign policy, and give very careful consideration to the Tauke amendment which is a thoughtful one, which says there is another way to achieve this goal that will not unnecessarily interfere with the American free enterprise system, with American broadcasters, and with the rights of the American public.

Mr. RINALDO. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in opposition to the amendment proposed by the gentleman from Iowa. Although this amendment is presented in terms of whether Radio Marti should operate on shortwave or on the AM band, the real issue before us is whether Radio Marti should exist at all.

Shortwave is not a legitimate, viable alternative for Radio Marti. The adoption of this amendment would be the death knell for Radio Marti.

It is essential that Radio Marti be able to broadcast on the AM radio band. AM receivers are the prevalent type owned by the people of Cuba—the target audience for Radio Marti. The Cuban Government uses AM radio to reach its own people. Shortwave receivers are scarce in Cuba and are owned by government officials and the political elite—hardly listeners who would be influenced by Radio Marti.

AM radio is used in other instances for international broadcasting. For example, the BBC, Deutsche Welle (West Germany), Radio Free Europe, Voice of America, Radio Moscow and Radio Havana all use the AM band in addition to shortwave for their international broadcasts.

The purpose of this amendment is to eliminate the potential problem of Cuban interference with the signals of American AM radio broadcasters. Yet prohibiting Radio Marti from using the AM band will have no effect on Cuban interference with U.S. radio broadcasters.

Passage of this amendment is tantamount to killing Radio Marti. And for what reason? To head off the possibility of Cuban interference which has absolutely no relationship to Radio Marti.

This approach was rejected by the Energy and Commerce Committee, which adopted an amendment directing that all radio frequencies and bands be considered for Radio Marti. I urge the House to defeat the amendment.

Mr. YATRON. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in opposition to the gentleman from Iowa's amendment.

I support H.R. 5427 and commend our distinguished colleague from Florida, Congressman FASCELL, for his diligent efforts and leadership in bringing this bill to the floor for consideration.

Mr. Chairman, I support the concept of this radio station because it is first and foremost, a foreign policy tool which will utilize truthful information to counteract the propaganda forced on the Cuban people by Fidel Castro. If we are to succeed in reaching as many Cuban people as possible, it is absolutely essential that this radio station broadcasts on an AM frequency. For too long Cuba's radio broadcasts have interfered with commercial radio transmissions in Florida and throughout the United States and for the most part, we have done little to stop it. Castro has threatened to jam U.S. radio transmissions which is just more of what he has been doing to us and will continue to do unless we take

some responsible actions to rectify this problem.

Mr. Chairman, if we adopt the gentleman from Iowa's amendment, we will severely cripple the effectiveness of Radio Marti. By transmitting Radio Marti on shortwave only, we would be reaching such a minute segment of the Cuban population that we would be wasting our time and money on this station all together. In fact, by using shortwave, Radio Marti's primary audience would be the Communist elite which is certainly not the audience this station is intending to reach.

The only way this station can be effective with respect to reaching the majority of the Cuban people is to use an AM frequency. The Castro government uses the AM dial to broadcast its propaganda reports and if we are serious about conveying a message to the Cuban people, we should use an AM band as well.

In my view, Radio Marti would serve two fundamental purposes. The first and most important is that it offers the Cuban people realistic and truthful information about their country which their government will not allow them to know.

For example, why is the Cuban government spending millions of dollars to support thousands of Cuban troops in Angola when the Cuban economy is in dire straits. In other words, this radio station will convey the truth to the Cuban people that the source of their economic difficulties stems from government manipulation and military adventurism.

Last, we should pass H.R. 5427 allowing it to transmit on an AM frequency because if we are going to continue to find ourselves in confrontations perpetrated by Fidel Castro, I would much rather utilize the airwaves to counteract his propaganda attacks with truthful information instead of military-related actions.

Mr. Chairman, I might add that recently the Hispanic caucus of the Democratic Party's miniconvention in Philadelphia unanimously endorsed Radio Marti. The bipartisan support this proposed radio station has received clearly dispels any notion one might have that this station is being promoted by conservative ideologues bent on overthrowing Castro's regime.

A vote in favor of this bill is a vote in favor of freedom for the oppressed people of Cuba.

I urge that we defeat the gentleman from Iowa's amendment.

I yield back the balance of my time.

Mr. TAUKE. Mr. Chairman, will the gentleman yield?

Mr. YATRON. I yield to the gentleman from Iowa.

Mr. TAUKE. The gentleman, as I understand it, really made two points against the amendment that I offered. The first point was that only the Cuban elite have shortwave stations.

The CRS reports that today we have about 500,000 shortwave sets in Cuba, which is about 20 percent of the number of AM sets available in Cuba, leading one to believe that perhaps about 20 percent of the population would have access to shortwave.

In addition, shortwave sets are being manufactured every day in Cuba.

It just occurs to me that to suggest that 20 percent of the people are in the Communist elite is going a little far.

The second suggestion that the gentleman makes is that if we broadcast on AM, we would reach more people, when even the VOA report on Cuban broadcasting and the International Communications Agency Feasibility Study, the FCC, the NTIA, all indicate that there will be jamming of the frequencies involved with broadcasting to Cuba, which would lead me to believe that there will be nobody in Cuba receiving this on AM because it is so easily jammed.

It appears to me that if the choice is between nobody receiving this on AM or 20 percent receiving it on shortwave, what you said argues in favor of shortwave.

Mr. DERWINSKI. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, this amendment clears the air a bit. This is a very practical amendment. It is one of the major challenges to the bill, to the concept before us.

Now, the gentleman from Iowa did state, and others have made the point, that in this amendment we are not debating foreign policy. We are debating the concern about the technical issues involving effective radio broadcasting.

Let me take a couple of points, and if I am wrong I stand to be corrected. My understanding is that this amendment was adopted in the subcommittee and then rejected by a vote of 24 to 18 in the full committee; is that correct?

Mr. WIRTH. If the gentleman will yield, the amendment that was offered by the gentleman from Iowa was accepted by the subcommittee by a 12 to 2 motion. We then had significant discussions with the State Department, and a substitute amendment was agreed to with the State Department that had the FCC involved in the process. And we talked about that 2 weeks ago. The amendment that was voted in the full committee was not this amendment. The full committee never focused on the amendment on shortwave. The full committee voted and focused only on the substitute relating to the FCC. It did not focus on this at all.

Mr. DERWINSKI. It related to this basic concern.

Mr. WIRTH. No, but this was not debated at all. The question voted on in full committee was, Who should allocate spectrum and make that decision? Should it be the FCC or the NTIA?

Mr. DERWINSKI. Let me reclaim my time. This was, however, the basic issue that your committee faced.

Mr. WIRTH. No, it was one of who made the decision, the FCC or the NTIA, is what was focused on in the substitute offered in the full committee. The issue of using the shortwave frequency was never debated.

Mr. DERWINSKI. But the facts are that this amendment did not clear your full committee.

Mr. WIRTH. It was not voted on in the full committee.

Mr. DERWINSKI. I am assuming it was never offered because you did not have the horses.

Mr. WIRTH. Just for the point of making the record, the gentleman from New Jersey had said that this had been voted down by the full committee. Not the case. It was never voted on in full committee because of all of the discussions which we had with the State Department, upon which the State Department reneged, as was pointed out in general debate 2 weeks ago.

Mr. DERWINSKI. Let me get back to the point, though. The key point here, the issue is AM versus shortwave in this particular case.

Let me point out a couple of practical things. Shortwave is used effectively in Europe. But it is not practical in reaching the vast audience in Cuba. That is why AM must be used. In fact, you might be interested to know that the Soviets beam shortwave to Cuba. The broadcasts are then translated by the Cuban Government into Spanish and put on AM in Cuba, which is an admission, I presume, that the audience in shortwave is not good enough.

May I also point out—that proponents of this amendment use the figure of reaching anywhere from 10 to 20 percent. Now, that means 80 or 90 percent of the audience in Cuba would not be reached, if my arithmetic is correct.

□ 1650

Therefore, this amendment would have the effect of minimizing the value of Radio Marti as the concept is advocated.

Mr. ROTH. Mr. Chairman, will the gentleman yield?

Mr. DERWINSKI. I yield to the gentleman from Wisconsin.

Mr. ROTH. I thank the gentleman for yielding.

I think that the gentleman is really hitting the nub of the problem. Whether it is a shortwave or whether it is AM, we have to take a look at what tools are available to us and how can we get the job done with the best

tools available. That means we have to go the route of the AM, because if, as the author of the amendment has said, half a million Cubans could be reached with shortwave, and we all are aware that there are over 10 million Cubans it stands to reason that AM is the only feasible approach. Shortwave means we would have a potential of reaching only one in 20 Cubans.

I think we have to keep our eyes on facts so we can make the proper judgments, which means that we have to go the route of the AM.

Mr. TAUKE. Mr. Chairman, will the gentleman yield?

Mr. DERWINSKI. I yield to the gentleman from Iowa.

The CHAIRMAN. The time of the gentleman from Illinois (Mr. DERWINSKI) has expired.

(At the request of Mr. TAUKE and by unanimous consent, Mr. DERWINSKI was allowed to proceed for 3 additional minutes.)

Mr. TAUKE. I thank the gentleman for yielding.

I think as the gentleman from Wisconsin said, this is the nub of the issue. The gentleman is suggesting that if we go on shortwave and reach 10 or 20 or 25 percent of the Cuban people, miss 75 to 90 percent of them, that we are diminishing the impact of Radio Marti.

Mr. DERWINSKI. That is correct.

Mr. TAUKE. Which means to me that the gentleman assumes that the AM broadcast of Radio Marti will be heard by Cubans.

Mr. DERWINSKI. Yes. If I may point out to the gentleman, AM is the Cuban Government's utilization main outlet. The Cuban Government has five national AM stations I understand.

Mr. TAUKE. That is right. And I agree with the gentleman that the Cubans would normally listen to AM if they had that option, and it would be a better option if they would get it.

I guess my point is this. The gentleman has pointed out what devastating impact broadcasts of the truth about Cuba to the Cuban people could have for Castro and his government. When it is abundantly clear that AM can easily be jammed or interfered with and when Castro has not only said he would so do, but is building the mechanism with which to do it, what makes the gentleman believe that the AM broadcasts from the United States will not be jammed, that there will not be interference?

Mr. DERWINSKI. I am assuming there will be an attempt to jam. May I also say I do not take at face value the threats or promises of Mr. Castro. Mr. Castro, for example, has been on record for 20 some years as promising his people Utopia. I was there last fall and it is a far cry from Utopia.

On this point, the assumption is on the side of the opponents of the bill

who keep assuming there would be some diabolical ability of Castro to totally destroy AM listening potential in the United States.

Mr. RINALDO. Mr. Chairman, will the gentleman yield?

Mr. DERWINSKI. I yield to the gentleman from New Jersey.

Mr. RINALDO. I thank the gentleman for yielding.

I think it is important to point out in this discussion of jamming the fact there is no one to the best of my knowledge in this Chamber who knows exactly what Castro is going to do.

Furthermore, I think it is important to point out that if Castro did decide to interfere with Radio Marti by using a nondirectional antenna he would also interfere with the following stations. And I think it is about time we got on the record just what he would be doing. It is highly unlikely that Castro would risk alienating these neighbors with whom he is very desirous of maintaining good relationships, and that is something I know personally.

The Castro government has always used nondirectional antennas, allegedly because they are less costly. But if he was attempting to jam WHO, he would also jam TGJP in Guatemala. He would also jam radio stations in Nicaragua, Honduras, Costa Rica, the Dominican Republic. In Mexico he would jam 10 stations, 2 in Venezuela, 7 in Colombia, and 1 in Grenada. In other words, he would jam a total of 26 stations, including 16 in operation, 1 under construction, and 9 assigned frequencies.

The important fact to remember is that he would be jamming stations of countries that he desperately wants to maintain good relations with. My own opinion is that he is not going to do that. I think it is a false fear that is being perpetrated or attempted to be perpetrated amongst the Members of this House.

The CHAIRMAN. The time of the gentleman from Illinois (Mr. DERWINSKI) has expired.

(At the request of Mr. SMITH of Iowa and by unanimous consent, Mr. DERWINSKI was allowed to proceed for 1 additional minute.)

Mr. SMITH of Iowa. Mr. Chairman, will the gentleman yield?

Mr. DERWINSKI. I yield to the gentleman from Iowa.

Mr. SMITH of Iowa. I thank the gentleman for yielding.

Could I just make a comment right here. Castro is already building a directional antenna. It is three-fourths completed.

Mr. DERWINSKI. That does not answer the point the gentleman from New Jersey made.

Mr. SMITH of Iowa. The gentleman just said they would not use a direc-

tional antenna. We know they would because they are constructing a directional antenna.

Mr. LEACH of Iowa. Mr. Chairman, will the gentleman yield?

Mr. DERWINSKI. I yield to the gentleman from Iowa.

Mr. LEACH of Iowa. I thank the gentleman for yielding.

I think the point the gentleman from New Jersey has made has underscored the position of the gentleman from Iowa (Mr. TAUKE). The point is if Castro jams these stations he has listed we will be considered at fault, not Mr. Castro. That is the perception in the Caribbean.

Second, he talks about what do we know. All we know is that Castro has the capacity to jam and he has stated that he intends to. Sometimes we make a major mistake in this body when we refuse to believe what Communist leaders say they are going to do. He said he is going to do it. Does the gentleman have any evidence that he will not do it?

The CHAIRMAN. The time of the gentleman from Illinois (Mr. DERWINSKI) has again expired.

(By unanimous consent, Mr. DERWINSKI was allowed to proceed for 30 additional seconds.)

Mr. DERWINSKI. Mr. Chairman, just to make the profound observation that it is hardly the most logical statement of our era for the gentleman to say that we would be blamed if Castro jammed stations in other countries. That leads me to believe that the gentleman is reaching out desperately to an illogical conclusion.

Mr. LEACH of Iowa. If the gentleman will continue to yield, this is the stated assessment of the U.S. State Department. It is not simply the belief of the gentleman from Iowa. The State Department is on record on this issue.

Mr. MITCHELL of Maryland. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the Tauke amendment.

Mr. TAUKE. Mr. Chairman, will the gentleman yield?

Mr. MITCHELL of Maryland. I yield to the gentleman from Iowa.

Mr. TAUKE. I thank the gentleman for yielding.

I want to point out that the Voice of America memorandum that was attached to the feasibility study on Cuban broadcasting said the following: "The diplomatic situation being what it is in this area, the United States will be held more responsible for originating the signal than will Cuba for jamming it," which was the point that my colleague from Iowa (Mr. LEACH) was attempting to make.

Mr. MITCHELL of Maryland. I thank the gentleman for his remarks.

I think this is a bad bill.

Many times I have noticed since I have been in the Congress we do

things on a pell-mell rush and it just does not make sense.

Remember swine flu? Remember when we voted the funds for swine flu and there was no swine flu but people got paralyzed? Remember when we changed daylight saving time? We had some little children going to school in the dark and others going at some other crazy hour.

We are kind of panicky on situations, but the Tauke amendment at least makes some sense out of it, to do it on a shortwave basis. Sure, I am not an expert, not in foreign affairs, nor in communications, but I know what I want.

I listen to WCAO radio in Baltimore. I get up at 5 o'clock each morning and when I turn that radio on I can hear the Castro propaganda. This is before we start fighting him even. There is an all-night talk show that comes on, and that talk show is interfered with because there is the music and propaganda coming out of Cuba—even without this proposed propaganda war.

I want to hear Stevie Wonder and what is that other fellow's name, with the Beatles, singing "Ebony and Ivory," in the morning. I do not want to listen to martial music. I want some old Glenn Miller tunes to wake me up gently rather than the music coming out of Cuba. If you start this war, you can bet your bottom dollar I will not hear anything. I am not going to hear Glenn Miller or Stevie Wonder, or even the all-night talk show.

I think it is a foolish kind of thing to do. But above and beyond that there is a more serious concern.

Whether you like it or not, the intent of this Radio Marti is to encourage the Cubans to rise up against what is called an oppressor. That is the intent. And that is what we did in Hungary. Remember? Remember, we encouraged the Hungarians to rise up in revolt, and when they were being shot down they were saying, "Americans, come on in to help us." But the Americans did not come in.

Mr. LELAND. Mr. Chairman, will the gentleman yield?

Mr. MITCHELL of Maryland. I yield briefly to the gentleman from Texas.

Mr. LELAND. I thank the gentleman for yielding.

Does the gentleman think we ought to do the same thing for South Africa?

Mr. MITCHELL of Maryland. Oh, no, South Africa is sacrosanct in foreign affairs. There is a tilt toward South Africa. We better not touch South Africa at all. No, I would not dare.

Mr. LELAND. Is the gentleman trying to say that apartheid is not as important to us as communism?

Mr. MITCHELL of Maryland. I am merely reflecting the views of the administration vis-a-vis South Africa.

Mr. LELAND. I see.

□ 1700

Mr. MITCHELL of Maryland. Let me go back to this business of encouraging people to rise up and overthrow governments. That becomes a very dangerous thing to do, unless you are prepared to send in some troops to back them up. Each time that we have waged a propaganda war that has resulted in an attempt to overthrow a government, we have not gone in and what has happened? We have earned contempt from the people in those nations, contempt for us because they say, "You sicced us on and then when we needed you, you didn't show."

Look, support the Tauke amendment. That helps a little bit; but then try to vote down the whole bill.

I want to wake up to nice music at 5 o'clock in the morning. That is the time I relax. I do not want to wake up to jamming, unless it is some old-time jazz jamming.

Let us stop playing around with it. Vote TAUKE, ease it down a little bit, and then when we get to final passage just ease this out quietly and gently to the martial strains of some Cuban music.

Mr. Chairman, I rise in opposition to Congressman CLEMENT ZABLOCKI's bill, H.R. 5427, Radio Broadcasting to Cuba Act.

According to the report submitted by the Foreign Affairs Committee, H.R. 5427 authorizes \$10 million in fiscal year 1982 and \$7.7 million in fiscal year 1983 to establish a radio station, Radio Marti, to provide the Cuban people with accurate information about Cuba and Cuban activities worldwide. However, since the Cuban Government incorporates the technology necessary to prevent the reception of Radio Marti's broadcasts by the Cuban people, my colleague's bill would prove to be an inefficient allocation of limited Federal resources.

Moreover, the establishment of Radio Marti could lead to a radio war with Cuba and, thereby, increase dramatically the amount of funds directed toward this ineffective program. Currently, Cuba plans to construct a radio station which will operate at 500 kilowatts—10 times more powerful than domestic U.S. stations which are limited to a maximum power level of 50 kilowatts. Consequently, in a radio war, Cuba would have the capacity to interfere and reduce the listening areas of AM radio stations in 32 States plus the District of Columbia.

To compensate for Cuba's interference, a U.S. radio station would have to spend between \$150,000 and \$200,000 to increase its power from 5 to 10 kilowatts and to modify its directional antenna. Since Congressman ZABLOCKI's measure requires the Federal Government to reimburse these stations for expenses incurred in mitigating the effects of Cuban interference

with U.S. broadcasts, the amount of moneys wasted as a direct result of Radio Marti could escalate well beyond the \$17.7 million authorized for the project initially.

Besides the fact that the Radio Marti bill is an inefficient allocation of the taxpayers' money, I am outraged at President Reagan's disregard for the Congress in this particular matter. I am sure that many of my colleagues are aware that the Navy has begun to build the radio station in Key West, Fla., even though Congress has not yet authorized one penny of the funding necessary for this project. The administration's blatant circumvention of the legislatively defined appropriations process is reason enough to oppose the Radio Broadcasting to Cuba Act.

Contrary to Radio Marti's stated purpose, to provide accurate information to the Cuban people, this administration plans to use it as an instrument to encourage revolt on that island. I wish to remind my colleagues that the United States exhorted the Hungarian people to revolt against communism in the fall of 1956. Yet, the United States refused their urgent requests for military aid when the Soviet Union invaded Hungary and ruthlessly repressed the uprising. As a result, many Hungarians lost their lives believing the United States would support their struggle. I am certain the same fate awaits any Cuban who may be deceived by Radio Marti broadcast into believing that the United States would send troops into Cuba to support a popular uprising.

Clearly, Radio Marti's primary and only purpose is to decrease the propaganda gap which exists between the United States and Russia. Currently, the Soviets outspend the United States about 7 to 1 in their broadcasting and information efforts around the world. Surely, the Congress cannot justify taking school lunches away from children, cutting health care programs for the elderly, and diminishing services for the handicapped, and, at the same time, authorize moneys for a propaganda contest with the Soviets. By opposing the passage of H.R. 5427, the House would prevent the allocation of Federal funds to a futile and impotent program, and, thereby, reject the ideological whims of President Reagan. I urge strongly that the measure be defeated.

Mr. WIRTH. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendment.

Mr. Chairman, let me bring us back, as the gentleman from Washington (Mr. SWIFT) did, in saying that we have two issues in front of us; one, do we want to authorize Radio Marti at all and broadcast to Cuba? This issue is not the subject of this amendment.

The subject of this amendment is, assuming we are going to broadcast to Cuba, how do we go about doing it?

Now, the question raised by the amendment of the gentleman from Iowa (Mr. TAUKE) is what kind of broadcasting are we going to do? Are we going to use the AM band or are we going to use the shortwave band?

I agree with the gentleman from Iowa in saying that it is folly for us to go on AM for a variety of reasons; foremost, the Cubans have made it very clear that they are going to retaliate which will greatly harm our broadcast industry. There was earlier discussion that there was no evidence that the Cubans are going to retaliate. That is not the case.

We have not only the word of the Cuban Government. We have an internal memorandum issued by the Voice of America. We have FCC memorandums to the State Department. We have CRS studies done on the subject, broad consensus that, yes, the Cubans are going to retaliate if we go on AM.

The question then is, What is the impact in this country if the Cubans retaliate? What the Cubans are going to do is very clearly—and they are already building—is to operate a 500,000-watt radio station to broadcast back in the United States.

Now, what does that mean? How big is 500,000 watts? The largest single radio station in the United States today is 50,000 watts; so the Cubans are going to build a radio station 10 times more powerful and broadcast back to the United States. What does that mean to the United States? That means that a great deal of harm for U.S. broadcasters. Cuban retaliation may well result in interference with some 200 radio stations in 32 States. Enormous harm would be done by that retaliation coming back from the Cubans and that is going to cost radio stations a great deal. After causing this harm the bill creates the ability for Uncle Sam then to bail out the broadcasters who are getting harmed by Uncle Sam's own radio signals going over the AM band; so the taxpayer is in this fashion paying double—first by having reception of its radio station interfered with, then paying to reimburse the victims. Though, if we are going to wreak such havoc on commercial broadcasters, there should be some means to make them whole.

What the gentleman from Iowa (Mr. TAUKE) does in his amendment is to say that we are not going to become involved in AM broadcasting, that does not make any sense, that is going to cause enormous harm to American broadcasters. The gentleman from Iowa (Mr. TAUKE) and the rest of us want to protect American broadcasters; so the gentleman from Iowa (Mr. TAUKE) says let us just broadcast on shortwave.

Now, how many people will be touched by shortwave? There has been a figure of 500,000 shortwave sets thrown around. That is the number of shortwave sets that have been sold in Cuba since 1978; 500,000 since 1978 alone, and there are some 20 shortwave stations already operating in Cuba. I repeat, within Cuba are 20 shortwave radio stations.

There are also, I understand, a whole variety of other shortwave radio stations that are coming into Cuba and on that subject I was wondering if I could engage the gentleman from Iowa (Mr. TAUKE) in a brief colloquy.

Am I correct in understanding that the Soviet Union and other Communist nations are currently broadcasting into Cuba and into other Caribbean Islands, as well as into Latin America?

Mr. TAUKE. Mr. Chairman, if the gentleman will yield, it is my understanding that that is correct. In fact, these nations outspend the United States today by about a 7-to-1 margin.

Mr. WIRTH. Are there other Communist nations involved in broadcasting into Cuba?

Mr. TAUKE. If the gentleman will yield again, in addition to the Soviet Union, China, East Germany, Romania, Hungary, Czechoslovakia, and Bulgaria all broadcast to Latin America.

Mr. WIRTH. We have heard in the previous discussion and debate that the Cubans do not have any shortwave sets; so consequently, they cannot be receiving shortwave signals from all of these other nations; so therefore they must all be broadcasting on the AM band, all the nations the gentleman was talking about; is that correct?

Mr. TAUKE. I am forced to say to the gentleman from Colorado (Mr. WIRTH), the gentleman will be surprised to find out that is not correct.

Mr. WIRTH. Oh, am I.

Mr. TAUKE. They all broadcast on the shortwave band.

Mr. WIRTH. Who is broadcasting on shortwave? I mean, if the Cubans do not have any meaningful number of shortwave receivers, as has been alleged, all these other countries are wasting their scarce taxpayer money to broadcast into Cuba on shortwave?

Mr. TAUKE. By a 7-to-1 margin, they are.

Mr. WIRTH. Well, who is doing that?

Mr. TAUKE. Well, Radio Moscow.

Mr. WIRTH. Radio Moscow is broadcasting shortwave; who else?

Mr. TAUKE. Bucharest.

Mr. WIRTH. Radio Bucharest?

Mr. TAUKE. Yes, Radio Bucharest, Radio Peking, Radio Prague, Radio Berlin International, and Radio Sofia, all operate on the shortwave band.

The CHAIRMAN. The time of the gentleman from Colorado has expired.

(By unanimous consent, Mr. WIRTH was allowed to proceed for 2 additional minutes.)

Mr. WIRTH. The State Department states that broadcasting by shortwave is unacceptable. The debate today has suggested that there are not any shortwave receivers. Now, why in the world would all those other countries have broadcasting into Cuba on shortwave?

Mr. TAUKE. That is a very good question. They probably did not want their AM to be jammed.

Mr. WIRTH. Well, the point of all this is again to clarify, why the shortwave amendment? The shortwave amendment is simply a way of making sure first, that the message broadcast on Radio Marti gets into Cuba without being jammed. It is very, very difficult to jam shortwave.

Second, broadcasting on shortwave is the internationally known way of broadcasting; so this is consistent with what is done all across the world.

Third, and for our domestic purposes very importantly, broadcasting on shortwave does not get us embroiled in all the problems of domestic interference, of intervening in the whole of the broadcast industry in the United States; so the gentleman from Iowa is not only assuring that the message will get through, but also assuring that we are going to protect the domestic broadcasting industry which provides very broad and great services. If we do not do this, we are going to see interference to more than 200 radio stations in more than 32 States.

So I would urge my colleagues to support the very fine amendment crafted by the gentleman from Iowa (Mr. TAUKE).

This amendment, which was adopted by an overwhelming bipartisan vote of 12 to 2 in the Telecommunications Subcommittee, will insure that any Cuban countermeasures directed against Radio Marti will not adversely affect any AM or FM radio stations. It will insure that AM and FM broadcasters in the United States are not forced to bear the burden and costs of increased interference caused by Cuban retaliation against a Government radio station. If the U.S. Government wants to broadcast to Cuba, the U.S. Government, and not private sector broadcasters and their audiences, should assume the risks associated with the operation of such a station.

Mr. Chairman, broadcasting on the AM band is normally reserved for domestic broadcasting, while international broadcasting normally occurs over shortwave frequencies. While the State Department proposes to operate Radio Marti on the AM band, Radio Free Europe and Radio Liberty both operate on the shortwave band. According to the State Department's Senior Adviser for Science and Technology:

The shortwave bands have been traditionally regarded as the proper frequencies for international broadcasting * * *.

In fact, Annexed Radio Regulation No. 423 of the 1959 Geneva Convention explicitly states that the AM band is to be used for domestic broadcasting only.

Not only is shortwave the internationally accepted band for international broadcasting, but it would be more difficult for the Cuban Government to jam Radio Marti if it operates on shortwave. The International Communications Agency, in a study completed last summer entitled "Radio Free Cuba Feasibility Study" stated:

Unlike jamming shortwave, deliberate electronic interference to medium-wave (AM) broadcasting is easier, less costly, and more effective.

More recently, in a study for the Senate Foreign Relations Committee, the Congressional Research Service noted: "Shortwave signals are more difficult to jam."

Mr. Chairman, despite what some would have us believe, this amendment will not kill Radio Marti. In fact, if Cuba proceeds with efforts to jam or interfere with Radio Marti, as is very likely, the operation of Radio Marti on the shortwave band may very well insure the survival of this proposal—and protect the foreign policy objective from being totally frustrated.

I urge my colleagues to join me in supporting this careful and balanced approach to the serious problems posed by the operation of Radio Marti.

Mr. ROTH. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I was going to ask the gentleman to yield, but being he did not I ask to strike that last word. I just have two questions. First, there is a reoccurring theme in this ongoing debate. It is this—Castro is going to jam Radio Marti should we construct it.

Well, my question is, Who is making foreign policy for the United States of America? Is it we in this body or is it Fidel Castro? That is the first question.

The second question I have is this. We are told that Castro is going to build a 500,000-watt station. With this station he is going to cause havoc with our radio stations in this country.

Well, our colleague, the gentleman from Iowa (Mr. SMITH) said that this radio station is already 75 percent completed. What is Castro going to do, dismantle it if we do not build Radio Marti?

I will tell you what he is going to do. He is going to jam and interfere with our stations at will. The real question is, Do we have the will to stand up for what we believe in?

It is about time we get a little backbone in this House.

Mr. FASCELL. Mr. Chairman, will the gentleman yield to me?

Mr. ROTH. I yield to the gentleman from Florida.

Mr. FASCELL. Mr. Chairman, I thank the gentleman for yielding.

I just want to make a couple of points to pursue the line the gentleman is following.

First of all, the question was asked, how about all these other countries using shortwave broadcasts in the Caribbean? It has something to do with shortwave sets. What the Cuban Government does is relay all those shortwave broadcasts over their AM network because they know that is the way to reach their people. So the argument that the Cuban people can be effectively reached through shortwave broadcasts is a fallacious argument.

As far as the 500-kilowatt transmitters are concerned, I think the gentleman in the well is right. We have to decide first and foremost who is making the decisions in this country with respect to our foreign policy. I think we have to bear that clearly in mind.

Then we need to point out the fact that the Castro government for years has sought to double its broadcasting capacity, the two 500-kilowatt stations are part of this plan. They were laid on the plate several years ago. It has got nothing to do with Radio Marti. That decision by the Castro government has been used by the opponents of this bill to scare everybody, including their own radio station in Iowa.

□ 1710

We do not have the slightest idea what Castro is going to do with those 500-kilowatt transmitters, and we do not know what he is going to do if he doubles his AM broadcasting, contrary to the regional broadcasting agreement.

Radio Marti, has nothing to do with that issue directly. It is peripherally involved.

Now, that still leaves one other issue, and I do need the time to answer this because the gentlemen keep making the argument over and over again, about jamming the 1040 band in Iowa. Well, if Castro is going to turn on the 500 kilowatt's to interfere with U.S. broadcasting, he is not going to go after a good station in Iowa, he is going to blanket out 7 million people in New York City. He is not going to fool around.

I hate to do that to your ego, but I can guarantee you that he is not going to worry about Iowa. If he is really going to get nasty, he is going to go after somebody else.

Now, as far as jamming is concerned, it is a lot cheaper to jam in Cuba, to prevent Cubans from listening, than it is to jam in the United States. They are not going to jam the transmitter; they are going to jam the receiver.

That is what they would be more likely to do.

For that purpose, it does not make any difference whether you have short-wave, longwave, medium wave, or any other wave; you can jam.

But the ultimate thing regarding this amendment is simply this: The bill does not mandate a single way for the administration to operate this radio. The bill makes it totally open and flexible for the administration to use its judgment about frequencies, manner of broadcast, contracts, no contracts, whatever.

The amendment says that it mandates shortwave. That is what is wrong with the amendment.

Mr. MICA. Mr. Chairman, will the gentleman yield?

Mr. ROTH. I yield to the gentleman from Florida.

Mr. MICA. Mr. Chairman, I would like to point out that the argument continues to be: What will Castro do? Let us look at what he has done for the past 13 years.

Castro has not abided by any of the international treaties; he has interfered, interfered with American broadcasts throughout Florida and throughout this Nation. We have no assurance that he is not going to interfere or jam anybody any more. He has continued to do it. He has done it in the past. He is building these transmitters, and was building them long before we ever had the idea of Radio Marti.

So I think the record speaks for itself. Castro walked out of the International Radio Conference. Castro to my knowledge is the only one in the world broadcasting in this manner.

The CHAIRMAN. The time of the gentleman has expired.

(On request of Mr. HARKIN and by unanimous consent, Mr. ROTH was allowed to proceed for 2 additional minutes.)

Mr. HARKIN. Mr. Chairman, will the gentleman yield?

Mr. ROTH. I yield to the gentleman from Iowa.

Mr. HARKIN. The gentleman in the well really has gotten to the nub of what we are here about. Mr. Duncan, Mr. James Duncan, a member of the special advisory staff to the Deputy Under Secretary of Defense for Policy, told an employee of WHO in Iowa, that—

Radio Marti was an international game of chicken and the United States will not blink. We will draw a line across which Castro will know he cannot step across without paying for it.

I understand the gentleman in the well, I will make a point first and then ask him a question.

No. 1, let us wait until Castro does build it. He has threatened to build these 500-kilowatt stations. Let us just tell him: "This is what you do, this is what we are going to do."

Second, if we build Radio Marti and he does, in fact, build that 500-kilo-

watt station, what does the gentleman propose that we do?

Mr. ROTH. Yes, I will tell the gentleman what I propose to do.

I propose that we in this Congress determine American foreign policy and not let Fidel Castro intimidate us and tell us what our foreign policy should be. That is No. 1.

No. 2, I am sick and tired of hearing what Fidel Castro is going to do. It is about time we in this Congress tell Castro and the world what our foreign policy is—I would hope this House would not be intimidated and frightened by some dictator.

Mr. HARKIN. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I would like to talk about this whole shortwave business for a minute.

Mr. WIRTH. Mr. Chairman, will the gentleman yield very briefly?

Mr. HARKIN. I yield very briefly to the gentleman from Colorado.

Mr. WIRTH. Mr. Chairman, a little bit of history is in order.

The Cuban Government has been a communications renegade for a long period of time. What we are doing is effectively saying we are not going to do anything to try to discuss with them radio frequency issues. We have been very successful in the past discussing fishing rights and getting that sorted out with the Cubans. We did not send the Coast Guard out and sink their ships. We sat down and figured out fishing rights.

On the question of hijacking, we worked out a treaty with the Cubans. We sorted that one out.

On this, what we are saying is that we are not going to sort out the problems on the use of the spectrum on broadcasting with the Cubans, but we are going to get into a war, an electronic war, which is going to harm many, many domestic broadcasters. It does not make any sense whatsoever.

I thank the gentleman for yielding.

Mr. HARKIN. I thank the gentleman for his comments.

Mr. Chairman, I just want to support the amendment of my colleague from Iowa.

In 1978, according to the Cuban Commission for UNESCO in Havana, Cuba had 2.7 million radio receivers. This number increased to over 3 million in 1981.

What is remarkable is that we had a 300,000 radio receiver increase in a 3-year period. Why? What is the reason for the increase? Perhaps it is due to the establishment of a Soviet radio assembly plant in Cuba. Cuban workers now assemble models from parts manufactured in the Soviet Union, the most popular being the radio called Ciboney, 240 model, which has—get this—8 shortwave bands and 1 AM band and sells for 80 Cuban pesos.

There is another radio that is a simple AM receiver that sells for about

40 pesos. Get this: Credit is available for the purchase of these radios at 2 percent. In other words, the Cuban Government is encouraging their people to buy these receivers with a shortwave band. Why?

It is very easy to understand—Radio Moscow broadcasts on shortwave and Radio Germany, and Radio Havana. There are a number of different radio stations that broadcast in shortwave to Cuba. I would submit that the way, the direction the Cubans are going in, is to shortwave because it is very difficult to jam. It is difficult for us to jam, also.

So here we are. It seems like we are going to spend all this money to build this radio transmitter to transmit on the AM band when Cuba is moving in the other direction, and they are going toward the shortwave band.

Again, I would say if you really want to make this bill work, you ought to support the Tauke amendment.

Let me say just one other thing: We have also found through information that during the Falklands crisis, many Cubans received news from BBC and they used it in their public discussions.

So when the Voice of America's AM transmitter is jammed at Marathon, Cubans will continue to listen to shortwave frequencies.

I want to make one other point: Aside from the Voice of America's single AM transmitter in Florida, no other governmental, international shortwave broadcaster uses the AM band in the Caribbean. No other one. There is one religious station in Bon Aire, on AM, but it is not a governmental radio station.

All rely on shortwave frequencies to broadcast to Cuba and the Caribbean. Now, just listen to this: BBC broadcasts for a total of 186 hours per week; Radio Moscow, 133 hours per week; Voice of Germany, 98 hours per week; Voice of America, 84 hours per week; Radio Peking, 67 hours per week; Radio Korea, that is, the Republic of Korea, 56 hours per week.

These are all shortwave. These are what these 8 bands on the new shortwave radios that they are building in Cuba are all about. So the use of a shortwave band by Radio Marti is not unreasonable, particularly considering that other international broadcasters seem satisfied with the shortwave.

They are on sale in the Cuban stores. The sales are increasing. They are being assembled in Cuba.

So what this amendment would do, again, would be to provide that we are not going to have the kind of interference back in the United States that we would have if we used the AM.

Second, I believe that we will be getting to more and more Cubans who are using shortwave rather than AM.

Mr. SMITH of Iowa. Mr. Chairman, will the gentleman yield?

Mr. HARKIN. I yield to the gentleman from Iowa.

Mr. SMITH of Iowa. I thank the gentleman for yielding.

I think the gentleman in the well has made a very important point. As a matter of fact, the longer this debate goes on, the more we seem to be exposed to some important information, including some from the supporters of the bill.

Now, it was said a few minutes ago that the Congress should set foreign policy. Now, if we were to admit that Congress is making the foreign policy in this country, that would mean Congress is to accept the blame for the mess our foreign policy is in.

The CHAIRMAN. The time of the gentleman has expired.

(On request of Mr. SMITH of Iowa and by unanimous consent, Mr. HARKIN was allowed to proceed for 1 additional minute.)

Mr. SMITH of Iowa. Mr. Chairman, will the gentleman yield?

Mr. HARKIN. I yield to the gentleman from Iowa.

Mr. SMITH of Iowa. I thank the gentleman for yielding.

Mr. Chairman, in addition to that, my friend from Florida says Cuba will jam radio stations in the whole Northeast. Well, that is the reason the Northeast representatives should be over here. It is not just Iowa that is involved. It is all stations that are on 1040, then they may turn to 770, they will jam that. And there are 1040 stations covering the Northeast, too.

So I thank the gentleman for helping us bring out some of the points that need to be brought out in this debate.

□ 1720

Mr. MICA. Mr. Chairman, will the gentleman yield?

Mr. HARKIN. I yield.

Mr. MICA. I would just like to carry that response a little further. What the gentleman is saying is, if Radio Marti really is possible, we are going to cause the Cubans to run out and buy Soviet products, Soviet-made radios. We certainly would not want to do that.

Mr. HARKIN. The facts are that they are already buying Soviet models in Cuba.

Mr. MICA. I think that was answered very adequately when we pointed out that all of these short-wave broadcasts are rebroadcast on AM.

Mr. HARKIN. Cuba only broadcasts AM from midnight to 6. That is all that Radio Havana rebroadcasts.

Mr. MICA. A number of all these shortwaves are rebroadcast, and all we would be doing is switching.

Mr. GONZALEZ. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise for the purpose mostly of asking some questions here.

This pending amendment has to do with selective radio bands and all of that, and I am not too familiar with that; also, all of the preceding discussions have gotten a little confused, and also apparently the Members here are very knowledgeable of Cuba. I am not. I have not been to Cuba except to Gitmo with the Navy, so I have a question I thought I would ask maybe of the author of this amendment or somebody on this side.

Talking of AM and all of that, is it true or is this a canard that Fidelito will only take FM stereo? Can that be jammed? Does the gentleman know, is that true? Have they gotten FM stereo or do they want only FM stereo, or have they gotten that sophisticated, as our U.S. listening audiences are? I think this is the only thing Fidel will take.

Mr. TAUKE. I have not heard this report before.

Mr. GONZALEZ. Well, also about these radios the gentleman mentioned made in the Soviet Union. I understood Sony has done pretty good in Cuba. Since actually what we are talking about is sort of an electronic invasion, why do we not take the matter up with Sony of Japan and maybe we can contract this whole business out to them, Mr. Chairman. Would that be possible? I am serious. Why not contract out to Sony this whole business, which brings to mind the other serious question: Is it true or is it not true that we already have either constructed or under construction a powerful defense or Army or something transmitter in Florida? Is that true, that all this discussion is really idle because the Defense Department has in place or in construction a transmitter that apparently will be utilized for the purposes that this legislation is intended to serve? Is that correct, may I ask the chairman? Is that true? What are we arguing about if that is true?

Mr. FASCELL. Well, the argument, of course, is that you need both an authorization and an appropriation. This is just the authorization bill.

Mr. GONZALEZ. But if the military is already constructing it, they are not worrying about authorization.

Mr. FASCELL. They are constructing it for whatever their defense purposes are. Whether it can be used for Radio Marti or not, remains to be seen. If it can, fine, but it still requires authorization and appropriation for the Board of International Broadcasting to do it. Whether Defense does something or not, what their purposes are, and whether or not they can make it available to the Board of International Broadcasting on a reimbursable basis is a different issue. I am told that the Armed Services Committee has been briefed on that issue. But the gentleman is right, there is an antenna form going up.

Mr. GONZALEZ. That confuses me further, because if the main thrust of

this bill emanates in the Foreign Affairs Committee and is foreign policy, and here we have defense—certainly the Defense Department's policy cannot be wholly separate or antagonistic to due foreign policy.

Mr. FASCELL. I gather the gentleman's thrust, and he makes the point. But that is the very reason that I have fought so hard to be sure that the Congress gets an opportunity to do what it is doing—that we have an authorization bill and we have an appropriation for this purpose—because I will tell the gentleman, there have been times in the past when that never was done.

Mr. GONZALEZ. Then I am afraid here I really am confused now, and kind of apprehensive because it looks as if we are heading for an electronic Bay of Pigs.

Mr. TAUKE. Mr. Chairman, will the gentleman yield?

Mr. GONZALEZ. I yield.

Mr. TAUKE. Mr. Chairman, it is interesting first that the gentleman would use that analogy, because of course we did establish Radio Swan, funded by the taxpayers, just prior to the Bay of Pigs in order to broadcast the truth about the Cuban Government to Cuba. But in any event the question the gentleman raised about authorization and appropriation is most interesting, because, as the gentleman from Florida acknowledged, we do have the Defense Department building a facility in Saddle Bunch, Fla.; and of course, as the documents that the Energy and Commerce Committee pointed out, there is adequate evidence to suggest that the intended purpose of that facility is for Radio Marti.

The CHAIRMAN. The time of the gentleman from Texas has expired.

(At the request of Mr. TAUKE and by unanimous consent, Mr. GONZALEZ was allowed to proceed for 1 additional minute.)

Mr. TAUKE. Will the gentleman continue to yield?

Mr. GONZALEZ. I would be delighted.

Mr. TAUKE. Of course, it is appropriate that the Congress act to authorize and appropriate funds. Usually, though, we try to do that before the facility is built and not do it after the facility is erected.

Mr. WIRTH. Mr. Chairman, will the gentleman yield?

Mr. GONZALEZ. I yield to the gentleman from Colorado.

Mr. WIRTH. Just to follow up on that, we inquired of the administration, of course, about building a facility before there was any authorization, and they denied it despite the fact that Comdr. Mark Newhart, who is a Public Affairs Officer for U.S. Caribbean Forces, admitted to a reporter from a Miami paper that the transmit-

ter being built by the Navy was designed for Radio Marti.

The gentleman raises another issue which is very important here, the Defense Department going out and building with no authorization whatsoever either from the authorizing committees or the appropriating committees—going out and building this facility for Radio Marti—and here we are, as the gentleman has correctly pointed out, after the fact arbitrarily authorizing something that has already been built, which is clearly in violation of article I, section 9, clause VII of the Constitution, which requires that no money be spent until Congress acts.

The CHAIRMAN. The time of the gentleman from Texas has again expired.

(By unanimous consent, Mr. GONZALEZ was allowed to proceed for 2 additional minutes.)

Mr. GONZALEZ. Mr. Chairman, I ask for this time because this is very disturbing. It encapsulates what I consider to be the American dilemma since World War II, and that is this confusion and conflict in policies, basic policies. What can the Defense Department policy be in a powerful transmitter for the purpose of hitting Cuba unless it is pro-American? It certainly cannot be anti-American. What would be the future purposes of this type of legislation if it is not the same way?

But, what are we going to propagandize the Cubans with? Our policy in Latin America? Which one? What policy do we have? What are we going to tell the Cubans to offset what they consider to be their mistaken notions? This is very disturbing because it proves to me that we are just like the old Bourbon kings, we remember nothing and we forget nothing.

I am very concerned because I think we are headed for an electronic or a radio Bay of Pigs. It is going to make us the laughingstock not only of Latin America, but the whole, entire world. What are we going to say to the Cubans that our policy in El Salvador, where we are cheek by jowl with the assassins of archbishops, of nuns, is? The continuation of the oppression of those nations and Latin America? The day has come when that is over with. We are either going to be identified with the aspirations of those people, and that includes Cuba, or we are not.

□ 1730

Mr. SHAW. Mr. Chairman, will the gentleman yield?

Mr. GONZALEZ. Yes, I will be glad to yield to the gentleman from Florida.

Mr. SHAW. Mr. Chairman, I have been listening to this debate, and I think it has reached high levels and low levels, but I would suggest that what we want to tell the Cubans about is their policy in El Salvador, their

policy in Central America, and their policy in Africa. That is what we want to tell them about, because when they find out about that, they will be shocked because they know what their economic condition is at home.

Mr. GONZALEZ. Mr. Chairman, is the gentleman under the impression that the overwhelming majority, the preponderant majority of Cubans 90 miles away from Florida are not aware of what their policy is? Does the gentleman believe that whatever casualties they have in Angola are not known to them there in Cuba?

Mr. SHAW. Yes. I am certainly not only of that opinion, but we know that from talking to the refugees who come into Florida with the Mariel boat lift. They were absolutely unaware of what their governments adventurism throughout the world, in Central America and Angola, was doing.

Mr. GONZALEZ. That is very unfortunate analogy because that was a Castro victory, not only in propaganda but every other way. Actually what our press has never reported is the motivation behind that exodus, the unloosening of the criminals from the jails and the mass exodus into the United States. It was Castro's answer to our solicitude for Cubans. That would be in my opinion the sorriest source of information. If we have reached that desperate point, we know nothing about Cuba.

The CHAIRMAN. The time of the gentleman from Texas (Mr. GONZALEZ) has expired.

(On request of Mr. SMITH of Iowa, and by unanimous consent, Mr. GONZALEZ was allowed to proceed for 2 additional minutes.)

Mr. SMITH of Iowa. Mr. Chairman, will the gentleman yield?

Mr. GONZALEZ. I yield to the gentleman from Iowa.

Mr. SMITH of Iowa. Mr. Chairman, the gentleman asked, What would we propagandize with? Let me give the gentleman a suggestion of one of the things they will propagandize with, and that is broken Spanish.

The State Department has a State Department foreign language school, and they manage to keep it full most of the time, mostly with people who have never spoken the language before. They go there about 6 months, and then they speak that language in kind of a broken way but think they are experts at it.

But the gentleman in the well is an expert bilingualist. He speaks Spanish and American; nobody speaks either one better.

I want to ask the gentleman, what does he think is going to be the effect when Radio Marti broadcasts that broken Spanish into Cuba day after day? Will we build up a generation of bilingual Cubans who speak both Spanish and broken Spanish? What

will the psychological effect be? How effective will it be anyway?

The gentleman is a better expert on that probably than anybody in the House.

Mr. GONZALEZ. Mr. Chairman, I am afraid that if we consider we have lost Cuba, this will insure its irretrievable loss permanently and into the future. I tried to warn all distinguished Americans from President Carter on down to beware of resorting to Spanish, when it is only "pidgin" Spanish. We lose friends and alienate people where we do that.

Mr. DERWINSKI. Mr. Chairman, will my good friend, the gentleman from Texas, yield for a question?

Mr. GONZALEZ. I am delighted to yield to the gentleman from Illinois. Now, there is an expert from the Foreign Affairs Committee.

Mr. DERWINSKI. Mr. Chairman, recognizing the intellectual integrity of the gentleman, I know he will give me a straight answer.

If the great gentleman from Texas were to make the inaugural broadcast on Radio Marti, would not an observant Cuban listener detect a Texan twang in his otherwise good Spanish?

Mr. GONZALEZ. I would doubt it. That is one of the reasons I began what I said with the words I used. Sometimes names like mine give the impression that anybody with a name like mine is an instant Latin American expert. Let me say I am not.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Iowa (Mr. TAUKE) to the Committee on Energy and Commerce amendment.

The question was taken; and the Chairman announced that the yeas appeared to have it.

RECORDED VOTE

Mr. TAUKE. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 109, nays 277, answered "present" 2, not voting 46, as follows:

□ 1750

Mr. RAHALL changed his vote from "aye" to "present."

So the amendment to the Energy and Commerce Committee amendment was rejected.

The result of the vote was announced as above recorded.

Mr. FASCELL. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I have had so many Members on both sides want to know how late we are going to be and what we are going to do with respect to this bill. We have tried to be very fair with respect to the opponents being heard on this matter, and I am sure they have no desire to be dilatory, even though they are opposed to the bill. But we have had three amendments that really go to the heart of this concept. The House has worked its will on those very substantially.

There is a budget amendment involved; there is a pending amendment; and there are some others from the gentleman from Iowa (Mr. HARKIN). I believe that with some cooperation and good will we could get through all of those and be heard fairly on them in 2 hours.

Mr. Chairman, I move that all debate on the committee amendment in the nature of a substitute and all amendments thereto end at 8 p.m.

The motion was agreed to.

AMENDMENT OFFERED BY MR. SWIFT TO THE ENERGY AND COMMERCE COMMITTEE AMENDMENT

Mr. SWIFT. Mr. Chairman, I offer an amendment to the Committee amendment.

The Clerk read as follows:

Amendment offered by Mr. SWIFT to the Energy and Commerce Committee amend-

ment: Page 3, strike out line 21 through line 23, and insert in lieu thereof the following: "(d) For purposes of providing for radio broadcasting in accordance with subsection (c)—"

Page 4, strike out line 6 through line 10, and insert in lieu thereof the following:

"(2) no Federal agency shall have any authority to select a frequency for such radio broadcasting, and the Board shall not have any authority to operate on a frequency for such radio broadcasting, if such frequency is within the band of frequencies extending from 535 kilohertz to 1605 kilohertz."

Mr. SWIFT (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Washington?

There was no objection.

Mr. SWIFT. Mr. Chairman, there is no need to take a long time, because this is quite an easy amendment to understand.

When the amendment of the gentleman from Iowa (Mr. HARKIN) was offered some time ago, the major argument against it was that Radio Marti had to be through a Government station. So when that was voted down, an amendment was offered by the gentleman from Iowa (Mr. TAUKE), which made it a Government station. But in order to avoid all of the problems that have been created by this proposal, it was suggested it be put on the short-wave band, and they said, "No, no, no, it has got to be on AM." I am about to offer an amendment that will resolve the problems posed.

I do think there is a central issue here, and this amendment may be able to resolve it. The central issue I am addressing is that the State Department is trying to do something that is laudable by a method that is unnecessarily harmful to American broadcasting.

We have tried an amendment that would have put it into the private sector on AM radio. That failed. And we have tried an amendment that put it on shortwave. I have an amendment that will leave it as a Government station, and the amendment leaves it on the AM band but it avoids the problem that is posed by the way the bill is written now.

Let me explain to the Members how we do that. It is not magic, and it may be a very rational solution to the conflict we have been so long debating.

The AM band runs from 540 kilocycles to 1600 kilocycles. But that is arbitrary. That is the area in which we will license commercial broadcasters on AM in this country. The fact is that the vast majority of the AM receivers will receive beyond those limits by about 10 kilocycles on each end. What my amendment says is that Radio Marti can be placed just outside of what is technically the AM band

but what in fact is receivable by the vast majority of the AM receivers.

That is how we seek to give the proponents of Radio Marti everything they want and avoid the conflict that is growing out of this with American AM broadcasters. And I would heartily commend to the Members that they seriously consider this before they knee-jerk on this vote because they assume that any amendment to this bill is somehow anti-Radio Marti. I am not anti-Radio Marti, and neither is this amendment.

What is the source, the technical source, that I would cite to buttress my claim that there is not going to be difficulty in receiving Radio Marti if it is in these areas? I have a letter from the Electronic Industries Association, from E. M. Tingley, who is the staff vice president in engineering of the consumer electronics group. It points out that "receivers fall into two types: mechanically and electronically tuned. It is standard practice for the mechanical type to tune through 1620 kilohertz."

ELECTRONIC INDUSTRIES ASSOCIATION,
Washington, D.C., July 29, 1982.

Hon. TIMOTHY WIRTH,
Chairman, Subcommittee on Telecommunications, Consumer Protection, and Finance, Rayburn Building, Washington, D.C.

DEAR CONGRESSMAN WIRTH: Information was requested on the ability of the U.S. radio receiver population to receive 1610 kHz. A canvas of manufacturers indicates that substantially all receivers tune in this frequency.

Receivers fall into two types: mechanical and electronically tuned. It is standard practice for the mechanical type to tune through 1620 kHz.

Electronically tuned (frequency synthesis) radios represent a relatively small, but significant, fraction of the receiver population. They were introduced in automobiles around 1978. All makes of early models did not tune to 1610 kHz, however, current models do. One manufacturer mass markets electronically tuned radios for the home. They all have been programmed to receive 1610 kHz.

Should your staff desire further information, contacts at manufacturers will be provided who can give more detail. Likewise, I will be available.

Very truly yours,

E. M. TINGLEY,
Staff Vice President, Engineering,
Consumer Electronics Group.

Here is further technical verification in the form of a staff memo prepared by the National Association of Broadcasters:

AM RECEPTION ON 1610 AND 530 KHz

(By M. C. Rau)

July 29, 1982

SUMMARY

The ability of an AM receiver to adequately receive a signal on 1610 kHz is a common feature. A conservative estimate is that 80 percent to 90 percent of existing AM receivers can receive 1610 with no technical problems.

DISCUSSION

There is one representation within the CRS study of July 28, 1982 that is simply not accurate. Because this factor concerns our industry, I believe it warrants clarification. The "issue" is the extent that AM radios are able to receive 1610 kHz. Referring to frequencies at either end of the AM broadcast band, CRS states: "The argument against using these frequencies is that most radio sets are not designed to receive them, since there are no commercial AM stations in those bands."¹

While it is true there are no commercial stations on 1610 kHz it is manifestly inaccurate to claim that AM receivers are, in general, unable to receive this frequency. In fact, according to Magnavox, it is a "general practice" to design manually-tuned radios (the most common form of receiver) for reception through 1620 kHz.²

In a test of 20 different receiver models, including 10 competitors, conducted by Delco electronics, only 5 were found to be unable to receive 1620 kHz.³ This particular test involved a radio design employing "frequency synthesis"—electronic tuning, rather than manual—which is a design increasing in popularity. Delco estimates that one out of every 6 radios "in the field" currently uses electronic tuning, and that the number is increasing. Delco maintains that 100 percent of manual tuned radios can receive 1610 kHz with no technical problems whatsoever.

The ability to receive 1610 kHz or 530 kHz has been helped by FCC establishment of the Traveler's Information Service (TIS). These stations began operation several years ago.⁴ While I am not aware of how many TIS stations have been built, Delco stated specifically that when the TIS service was established, radio design within Delco changed to insure TIS reception, i.e., before TIS was established, reception of 1610 and 530 was possible and likely, but only as a happenstance of design. After TIS, reception of 1610 and 530 became a Delco criteria for design.

In speaking with Panasonics, a worldwide manufacturer of AM radios, I again found that "the vast majority of AM radios can receive 1610 kHz."⁵

Reception of 1610 kHz is common. On the basis of the discussions mentioned herein, I conservatively estimate that 80 to 90 percent of existing AM receivers can receive 1610 kHz with no technical problems.

This estimate has apparently been arrived at elsewhere. On May 1, 1978, the Williams Sound Corporation ("Williams") filed a Petition for Rulemaking with the FCC (RM-3126) requesting, among other things, the authorization to operate "auditory training devices" on 530 and 1610 kHz.⁶ The FCC re-

sponded with a Notice of Proposed Rulemaking deferring consideration of this particular aspect of the Williams petition.⁷ Two points of interest are here:

(1) Williams assumed 1610 kHz can be received by public AM radios. Without such reception, clearly, his proposal would fail.

(2) The FCC assumed 1610 kHz can be received by public AM radios. In fact, the FCC used this property as one of its reasons for deferring the Williams proposal: "Williams reliance on standard AM radio receivers as an important feature in its proposal may be more of a deterrent than an advantage, because there is a distinct possibility that the easy availability of AM receivers would increase the likelihood of Williams' system being employed for purposes contrary to Commission policy." (emphasis added)—the FCC was concerned that the Williams system might be used for broadcasting on 1610.

Attached is a list of contacts employed in the preparation of this memo. While all discussions have not been incorporated herein, there has been no objections or inconsistency raised with any of the representations.

The reception of 530 kHz at the lower end of the band is equally likely, as the design of AM radios will be symmetrical about the AM band.

□ 1800

I will not read this material, but I have here a study made independently by the NAB, which indicates that the same is true on the low end of the scale as well.

In other words, if we put Radio Marti just above 1600 or just below 540 kilocycles, it can be heard on at least 80 percent of the AM radios in Cuba, and we totally avoid the problem of interference that we have been wrestling with here all today and in previous consideration of this bill.

The CHAIRMAN. The time of the gentleman from Washington (Mr. SWIFT) has expired.

(By unanimous consent, Mr. SWIFT was allowed to proceed for 1 additional minute.)

Mr. SWIFT. It seems to me that this is the ultimate compromise.

I thought the solution of the gentleman from Iowa (Mr. TAUKE) made more sense in terms of national policy. It was voted down.

This, I think, is a rational, considered, thoughtful alternative. And I would strongly urge all Members to not just wrap the flag around the technical aspect of this bill and understand that we can achieve the patriotic, foreign policy purpose in a way that is not going to interfere with American domestic broadcasting.

Mr. WIRTH. Mr. Chairman, will the gentleman yield?

having speech or hearing handicaps. See, 47 C.F.R. Sec. 15.4(1).

⁷ "Notice of Proposed Rulemaking," ("Notice"), Gen. Docket 81-786, adopted November 12, 1981, FCC 81-525, 47 Fed. Reg. 216 (January 5, 1982), paragraphs 9 through 12. A "Report and Order" has been recently issued in this Docket, action by the FCC July 22, 1982, FCC 82-331. The text has not yet been issued.

¹ CRS study, page 60.

² Conversation with Mr. Bud McDowell. See page 4. Magnavox, at its height of production, produced 500,000 radios per year.

³ Conversation with Mr. Tom Prewitt. See page 4. Delco manufacturers between 3 and 6 million automobile radios per year.

⁴ The TIS is a base station in the Local Government Radio Service that is used to transmit non-commercial voice information pertaining to local traffic and road conditions, points of interest, and other public information for travelers. See, 47 C.F.R. Sec. 90.242; FCC Rules and Regulations.

⁵ Conversation with Mr. John Marchetti. See page 4. Panasonics is a worldwide manufacturer of AM radios. Although it is not known exactly how many radios Panasonics manufactures each year, estimates are on the order of tens of millions per year.

⁶ An auditory training device is a transmitter or receiver used for instruction by sound of persons

Mr. SWIFT. I yield to the gentleman from Colorado.

Mr. WIRTH. I thank the gentleman for yielding.

I suspect the argument that will be made against this amendment is that radios cannot pick up below 535 or at the upper end of the scale above 1610. We therefore, in trying to look at the gentleman's amendment, asked the NAB and asked the Electronics Industry Association, and they came back to us with estimates that 90 percent of radio receivers could pick up the frequencies suggested by the gentleman more than 90 percent of radios could pick up radio stations on the frequencies the gentleman is suggesting.

The CHAIRMAN. The time of the gentleman from Washington (Mr. SWIFT) has again expired.

(At the request of Mr. FASCELL and by unanimous consent, Mr. SWIFT was allowed to proceed for 1 additional minute.)

Mr. FASCELL. Mr. Chairman, will the gentleman yield?

Mr. SWIFT. I yield to the gentleman from Florida.

Mr. FASCELL. Mr. Chairman, I thank the gentleman for yielding.

The gentleman, I gather, intended to offer an amendment to page 5, line 18 of the bill. The Clerk read the amendment to line 21 of page 3; is that correct?

Mr. SWIFT. That is my understanding.

The CHAIRMAN. The gentleman is correct.

Mr. FASCELL. And what the gentleman meant to do was to make his amendment apply to page 5, line 18?

Mr. SWIFT. That is correct.

Mr. FASCELL. I wonder if the Clerk would re-report the amendment correctly.

The CHAIRMAN. Without objection, the Clerk will reread the amendment in the correct form, since it is brief in nature; and without objection, the amendment pending will be considered as modified accordingly.

There was no objection.

The Clerk re-reported the amendment as follows:

Amendment offered by Mr. SWIFT to the Energy and Commerce Committee amendment: Page 5, line 18, insert before the period the following: "except that the Assistant Secretary shall not have any authority to select any radio frequency which is within the band of frequencies extending from 535 kilohertz to 1605 kilohertz".

Mr. FASCELL. Mr. Chairman, I move to strike the requisite number of words and I rise in opposition to the amendment.

Mr. Chairman, the thrust of this amendment has already been dealt with several times by this House in voting on other amendments, and what it seeks to do is simply to mandate a manner by which the agency shall do the broadcasting.

So let me just refresh everybody's memory about what the bill does. The bill has no mandate on the frequency to be used or the manner in which programs should be broadcast. It says, in order to carry out the purposes set forth in section 2 of this act, the Board is authorized to provide for the open communication of information and ideas through the use of radio broadcasting. The Board may carry out this subsection by means of grants, contracts, subject to availability of appropriations, or such other means as the Board determines will most effectively carry out the purposes set forth in section 2 of this act.

And then it says, "For this purpose the Assistant Secretary shall, after receiving public comment, determine and identify an appropriate frequency or frequencies."

It does not say short-wave, long wave, medium wave. It does not say on the band, off the band, under the band, on top of the band.

Now, it does not make sense for us to, one more time, by another amendment, get at the heart of this bill by saying that you can broadcast all right, broadcasting is fine, but just broadcast at the lower end of the band or the upper end of the band where nobody is listening.

So I would just ask my colleagues to vote this amendment down.

Mr. RINALDO. Mr. Chairman, I move to strike the requisite number of words and I rise in opposition to the amendment.

Mr. Chairman, I recognize that we want to move ahead rapidly with this bill, so I will be brief. But once again we have the same type of amendment, an amendment that will in effect gut the bill, an amendment that will make Radio Marti powerless.

When we take a look at the AM band, which, as was stated earlier, goes from 630 to 1610, some receivers may not be able to tune out of band. In addition, Cuba could use a crude, high-powered jammer without jeopardizing Cuba's international relations because that type of jammer would not cut out some of the stations in countries that I mentioned earlier with whom Cuba wants to maintain good relations.

Most serious of all, the out-of-band frequencies are not covered by any international agreements. The United States thus would not even have any ground for legitimate complaints about potential jamming.

For all of those reasons, I oppose the amendment and would urge my colleagues to vote against it.

Mr. EMERY. Mr. Chairman, I move to strike the requisite number of words.

I know a great many Members have come to the well and said, "I really did not intend to speak on this." But I have to say as an electronic engineer that the gentleman from Washington is exactly correct.

I have no particular thoughts on whether or not we should use one part of the band or another part of the band. But when the gentleman says that most receivers, expensive or inexpensive, tune outside of that prescribed band, the gentleman is exactly correct; they do.

I was in Los Angeles a short time ago and I had a chance to ride on one of the throughways on the way to the airport. I happened to notice on the side of the road there was a sign that said, "For traffic information tune to 530 on your AM dial." Well, that frequency is just outside of the AM standard broadcast band, but it is tuneable by probably every radio in every vehicle that ever drove down that throughway. It is exactly the principle that the gentleman is talking about.

Also let me tell my colleagues that the bands are allocated very strictly by international convention. Those regulations go all the way from the lowest frequencies that are used by the military for communication with submarines through "S" band and higher, which are used by satellite navigation and communications for a variety of purposes.

By convention, there is a zone between usable bands in which no broadcasting takes place, so that band separation will occur.

If you went to an electronics store and you took a look at a variety of AM radios you would find that some had 1600 marked on the dial, some would mark frequencies as high as 1640.

In short, it is merely a consequence of design, of the mechanical layout of the radio and a lot of other things that determine how high or how low the radio can tune in fact.

So without taking any strong position on whether or not Radio Marti ought to broadcast on any particular frequency on that band, let me just simply say that technically the gentleman is correct—you certainly could tune either above or below without interfering with any of the existing standard broadcast frequencies.

Most radios in Cuba or anywhere else could pick it up, and it probably is a sensible answer to this problem without bothering anyone at all.

□ 1810

Mr. FASCELL. Mr. Chairman, will the gentleman yield?

Mr. EMERY. I would be happy to yield to the gentleman from Florida.

Mr. FASCELL. The chairman knows, of course, that all the frequencies below the band and above the band are not regulated now, and the United States would have a problem in the sense of meeting its obligations in the international forum if it were to use these frequencies. There is an ITU meeting planning to deal with that

problem, but we have not gotten there yet; so I would say to the gentleman, following his line of reasoning, why not leave flexibility in the bill, rather than restrict it?

Mr. EMERY. Well, the point that I wanted to make is simply that this idea is technically practical.

Mr. FASCELL. It can be done.

Mr. EMERY. The gentleman from Washington is technically correct. Now, as far as the allocation of frequencies is concerned, I do not know, frankly, what is regulated by international convention and what is not with regard to jamming.

I rather suspect, though, that at the ends of the standard AM broadcast band there are frequencies that are not used by commercial standard AM broadcast activities, although I am not sure exactly what the actual end-of-band broadcast limitations might be.

Mr. DERWINSKI. Mr. Chairman, I move to strike the requisite number of words and I rise in opposition to the amendment.

Mr. Chairman, I would like to point out what this amendment does is in advance of the creation of Radio Marti, is to tie the hands of those people who will be charged with administering it. This would greatly restrict the administrative flexibility needed to effectively implement this program.

It is an imaginative amendment, I may say to the gentleman from Washington. I respect his motives and his concern; but this amendment would have the practical effect of stopping any effective commencement of this program merely because it would take away the kind of administrative flexibility you must have as you develop this long-overdue radio broadcasting.

Mr. WIRTH. Mr. Chairman, I move to strike the requisite number of words. I rise in support of the amendment.

Just very briefly, Mr. Chairman, this amendment does not handcuff anybody. What the Swift amendment does in a very careful way is to reconcile the two conflicting goals that we have been talking about all day. On the one hand is the goal for broadcasting to Cuba and on the other hand is protecting domestic broadcasting. Those are the two goals.

The amendment of the gentleman allows Radio Marti by all means to broadcast to Cuba on the AM band, but to do so, as the gentleman from Maine so well pointed out, without interfering with domestic broadcasting. That is all the amendment of the gentleman does.

If our colleagues are concerned about protecting domestic broadcasting, then support the Swift amendment. If you are not concerned about interference with domestic broadcasters, then do not support the Swift amendment.

It is my belief that we should protect the domestic broadcasting industry and I would hope that our colleagues would support the amendment offered by the gentleman from Washington (Mr. SWIFT).

Mr. SWIFT. Mr. Chairman, will the gentleman yield?

Mr. WIRTH. I would be happy to yield to the gentleman from Washington.

Mr. SWIFT. I just wish to make one more comment and then as far as I am concerned we can go to a vote on this.

What has flawed the Radio Marti concept from the very beginning is that somebody sitting in one agency of Government with a certain area of jurisdiction, the foreign policy of the United States, came up with a good idea, and then proceeded to develop and flesh out and build their idea without talking to anybody else in the Congress or in the Government who had other expertise.

Now, whatever happens here, ultimately I would hope the State Department would learn that just because they spend most of their time worrying about foreign policy, that when they come up with these bright ideas that have direct and harmful impact on domestic policy, that they talk to a few people who know something about domestic policy before they develop it to the point that they have virtually no alternative but to dig their feet in cement and sit there and demand that it has got to be their way or it will not work at all, because that is a load of nonsense.

Mr. WIRTH. Well, I would hope that we would also get the State Department to the point, and I would suspect that many Members would agree with this, at a time when we do have conflicts with the Cubans over the use of the spectrum, of not getting into electronic war with the Cubans, which is only going to harm our domestic broadcasters. Many broadcasters would like to sit down with the Cubans and sort out the problems of interference that exists in southern Florida and which are increasingly going to exist all over the country with the advent of Radio Marti with its enormous power across through our broadcasting areas. That is the responsibility of the State Department to sit down and figure out a solution, just as we did on the subject of hijacking, fishing rights, and other issues. Let us not pretend the Cubans are not there. They are very real problems and let us sit down and work them out rather than get into some kind of a cockamammy scheme that is going to provide real harm to our domestic broadcast industry.

The CHAIRMAN. The question is on the amendment, as modified, offered by the gentleman from Washington (Mr. SWIFT) to the Energy and Commerce Committee amendment.

The amendment, as modified, to the committee amendment was rejected.

AMENDMENT OFFERED BY MR. HARKIN TO THE AMENDMENT OFFERED BY MR. LEACH OF IOWA AS A SUBSTITUTE FOR THE ENERGY AND COMMERCE COMMITTEE AMENDMENT

Mr. HARKIN. Mr. Chairman, I offer an amendment to the amendment offered as a substitute for the Energy and Commerce Committee Amendment.

The Clerk read as follows:

Amendment offered by Mr. HARKIN to the amendment offered by Mr. LEACH of Iowa as a substitute for the Energy and Commerce Committee amendment: At the end of the substitute offered by Mr. LEACH, add the following: Page 3, strike out lines 21 through 23 and insert in lieu thereof the following:

"(d) If radio broadcasting to Cuba under this Act includes any AM frequency broadcasts, such broadcasts may only be carried out on a single AM frequency and—

Mr. HARKIN. Mr. Chairman, basically this amendment was drafted to clarify the intent of the Leach-Bedell substitute. The substitute seeks to have Radio Marti broadcast on the same frequency now used by the Voice of America. There are many reasons why this would be a considerable improvement over the present bill.

As the gentleman from Iowa (Mr. LEACH) said last week in debate, it would considerably reduce the amount of radio interference, interference that the American public would have to face if the substitute were not passed.

It would also save a considerable amount of money. As we face incredible deficits, we should try to save some money in this bill if we can.

Now, quite frankly, what this amendment does, it specifically limits the use of AM frequencies to a single frequency and when the amendment is combined with the Leach-Bedell amendment, the frequency is specified as the Radio Marathon frequency. By requiring that single frequency, we would be limiting the damage to American radio broadcasting. If this amendment is not adopted, the Board would have the power to pick several frequencies.

So while we are trying to get Radio Marti, on Radio Marathon under the Leach substitute, all I am saying is that if the Leach substitute is adopted that we ought to use just one frequency and not several frequencies.

They could set up a series of frequencies as they could under the bill right now and escalate the radio wars even further. Great damage would be done to many different American radio stations.

So, Mr. Chairman, I offer this amendment in good faith to the Leach substitute. It just says that if the Leach substitute is adopted, they would use only one frequency.

Mr. LEACH of Iowa. Mr. Chairman, will the gentleman yield?

Mr. HARKIN. Yes, I would be delighted to.

Mr. LEACH of Iowa. As the author of the substitute to which the gentleman from Iowa is offering an amendment, I would like to reflect that I think it is very constructive and would accept it. Hopefully there will be no need for a vote on this particular amendment.

Mr. FASCELL. Mr. Chairman, I move to strike the requisite number of words.

I yield to the gentleman from Iowa (Mr. BEDELL).

Mr. BEDELL. Mr. Chairman, as the coauthor of the amendment offered by the gentleman from Iowa (Mr. LEACH) I also would accept the Harkin amendment.

Mr. FASCELL. Mr. Chairman, I rise in opposition to the amendment and to the substitute.

As the gentleman from Iowa said, the amendment to the substitute requires that any broadcast may only be carried out on a single AM frequency and the substitute, of course, changes the language in the bill.

It makes it mandatory that the only radio frequency that can be used will be the Voice of America at Marathon, Fla. So, in effect, when you read the amendment and the substitute, this is another one of those efforts to direct the agency in this legislation on when, how and where the radio would be operated rather than leave the decision up to the Board for International Broadcasting and the Assistant Secretary of Commerce for Communications and Information, in consultation with the Federal Communications Commission, who shall have the responsibility to identify after receiving public comment an appropriate frequency or frequencies.

Now, in addressing the issue of frequencies, I do not claim to be a technical expert, but it seems to me that if you are going to have a directional antenna on one frequency, it would be rather difficult to build that installation so you could have several frequencies at the same time.

□ 1820

Mr. BEDELL. Mr. Chairman, will the gentleman yield?

Mr. FASCELL. I will be glad to yield to the gentleman from Iowa.

Mr. BEDELL. I thank the gentleman for yielding.

Mr. Chairman. I have checked with the radio stations in our district and they tell me that indeed that is no problem; they just put a separate transmitter, comparatively inexpensive, and they can jump from one frequency to another.

Mr. FASCELL. I am sure they can do that. It is not as easy as changing the crystal on your crystal set, but it can be done. I am just suggesting that it is a little more difficult than that.

But there again, it is a question of legislating and mandating. I see no need to do that. Somewhere, somehow, we have to trust some experts to deal with this matter and assume that they are going to have commonsense.

The language in the bill is broad enough, with the guidelines which the Committee on Energy and Commerce put on it, for the Assistant Secretary.

Mr. HARKIN. Mr. Chairman, will the gentleman yield?

Mr. FASCELL. I will be glad to yield to the gentleman from Iowa.

Mr. HARKIN. I thank the gentleman for yielding.

Mr. Chairman, I want to clarify one point. My amendment restricts it to one frequency only in the AM band. Obviously, if they want to use shortwave, which the gentleman knows they can—they can use any frequency they want. My amendment is only a restriction on the AM band.

Mr. FASCELL. What the gentleman is saying, in effect, and the way I read it is, that such broadcast may only be carried out on a single AM frequency.

Mr. HARKIN. AM frequency, but not shortwave.

Mr. FASCELL. But since it is amending the substitute which mandates that particular radio, it simply means that frequency on that radio.

Mr. DERWINSKI. Mr. Chairman, I rise to oppose the amendment.

Mr. Chairman, I will be brief. I make the basic points that the gentleman from Florida just made.

Here, again, we have had direct and indirect attacks on the effectiveness of the program once Radio Marti is authorized. This would, in fact, be the kind of limitation this House has rejected consistently this afternoon, and earlier when we had the bill on the floor. And since it is an amendment to the Leach substitute, which in itself is a restriction, we are really getting a one-two punch against the very concept we are trying so hard to get approved.

I urge rejection of the amendment.

Mr. FASCELL. Mr. Chairman, I move to strike the requisite number of words.

Mr. BEDELL. Mr. Chairman, will the gentleman yield?

Mr. FASCELL. I yield to the gentleman from Iowa.

Mr. BEDELL. Mr. Chairman, I would like to clarify something with the chairman of the committee.

Is it correct that it is not the intent of the committee that broadcasts should be going over a number of different frequencies, regardless of what prevails here in our vote?

Mr. FASCELL. I cannot think of any reason why anybody would want to broadcast over several frequencies at the same time.

Mr. BEDELL. I may not understand. Is it correct that it is understood that it is not expected that Radio Marti

will broadcast over several different frequencies, or is it expected that very possibly, if they wish to do so, Radio Marti would broadcast over several frequencies, which would very possibly lead to jamming of a whole number of frequencies?

Mr. FASCELL. I cannot answer the gentleman on that because I think that would depend basically on what the NTIA and FCC decide to recommend. Certainly, however, no frequency will be chosen which produces interference with the operations of other stations. That is fundamental to good broadcasting policy.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Iowa (Mr. HARKIN) to the amendment offered by the gentleman from Iowa (Mr. LEACH) as a substitute for the Committee on Energy and Commerce amendment.

The amendment to the amendment offered as a substitute for the Energy and Commerce Committee amendment was rejected.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Iowa (Mr. LEACH) as a substitute for the Committee on Energy and Commerce amendment.

The question was taken; and on a division (demanded by Mr. FASCELL) there were—ayes 11, noes 16.

RECORDED VOTE

Mr. LEACH of Iowa. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 109, noes 271, answered "present" 3, not voting 51, as follows:

□ 1840

Mr. STANGELAND changed his vote from "aye" to "no."

Mr. EVANS of Indiana changed his vote from "no" to "aye."

So the amendment offered as a substitute for the Energy and Commerce Committee amendment was rejected.

The result of the vote was announced as above recorded.

The CHAIRMAN. The question is on the first Energy and Commerce Committee amendment.

The Energy and Commerce Committee amendment was agreed to.

The CHAIRMAN. The Clerk will report the remaining Energy and Commerce Committee amendment.

The Clerk read as follows:

Committee amendment: Page 7 line 22, strike out "Board" and insert in lieu thereof "Federal Communications Commission", and insert "instruct the Board to" after "to".

Page 8, line 4, strike out "Board" and insert in lieu thereof "Federal Communications Commission".

Page 8, line 6, strike out "Board" and insert in lieu thereof "Commission".

Mr. WIRTH. Mr. Chairman, I rise in strong support of the Energy and Commerce Committee's amendment to section 6 of the bill. This amendment makes one very minor, but very important, change in the legislation as reported by the Foreign Affairs Committee.

The Foreign Affairs Committee, recognizing the devastating effects Cuban interference can have on domestic broadcasters, authorized the Board for International Broadcasting to compensate those broadcasters forced to take steps to mitigate the effects of Cuban interference. The Board was also authorized to establish the regulations and procedures necessary for the provision of compensation.

The amendment adopted by the Energy and Commerce Committee retains the BIB's discretionary authority and its control over authorized funds, but would enable the Nation's expert telecommunications agency, the Federal Communications Commission, to establish the necessary regulations and procedures, and to instruct the Board to provide such compensation. Very simply, the Board for International Broadcasting is an international

oversight board with responsibility for Radio Free Europe and Radio Liberty. It has absolutely no expertise, responsibility, or jurisdiction with respect to domestic broadcasting and the integrity of the U.S. broadcast system. The FCC, on the other hand, not only has the necessary technical expertise to determine the effects of Cuban interference on U.S. broadcasters, it is the agency charged with maintaining and promoting the integrity of our broadcast system.

If broadcasters are to be compensated, the FCC, not the BIB, should establish the rules and guidelines for such compensation.

I urge my colleagues to support the Energy and Commerce Committee's amendment to section 6.

The CHAIRMAN. The question is on the Energy and Commerce Committee amendment.

The Energy and Commerce Committee amendment was agreed to.

AMENDMENT OFFERED BY MR. FASCELL

Mr. FASCELL. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. FASCELL: Page 8, line 7, immediately before the closing quotation marks, insert the following:

In issuing such regulations and establishing such procedures, the Commission may establish criteria to evaluate the financial claims of affected licensees. Such criteria may include (but shall not be limited to) the duration, stability, and extent of alleged Cuban interference, including the establishment of a threshold loss of service prior to any compensation recommendation. The Commission may also establish limits on the type and extent of reimbursable expenses, prorate Cuba's share in situations involving multiple interference sources, and require affected licensees to revert to original station parameters without further compensation whenever Cuban interference ceases.

Mr. FASCELL (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Florida?

There was no objection.

Mr. FASCELL. As the distinguished subcommittee chairman just pointed out with respect to the committee amendment that came out of his committee, we felt it was necessary that we have some guidelines or instructions with respect to the FCC when they issue the regulations establishing the procedures on the questions of any claims. That is what this amendment does. It simply provides guidance to the FCC in making determinations on whether and how much broadcasters should be compensated for expenses if there are any direct costs with respect to Cuban interference with U.S. broadcasting efforts. So the FCC is given this power under the bill, and this

simply gives them some guidance in drawing up those regulations.

Specifically, Mr. Chairman, section 6(a) of the bill authorizes the Federal Communications Commission to determine whether and how much broadcasters should be compensated for expenses they incur in mitigating the effects on their operations of Cuban radio interference. This amendment would suggest certain criteria which the FCC may use to evaluate the claims of broadcasters and offer guidance to the Commission in implementing section 6(a). Such guidance was felt to be necessary in light of the extent of Cuban interference, the limited amount of funds for the purpose of compensation, the significant amount of expenses for which broadcasters could seek reimbursement, and the lack of legislative guidance in the bill and in legislative history as to how such compensation issues should be resolved. It is my hope that this amendment will prevent increased delays and expense for the Commission in issuing regulations regarding compensation.

Mr. WIRTH. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in support of the amendment to the Energy and Commerce Committee amendment being offered by the distinguished chairman of the Subcommittee on International Operations, Mr. FASCELL.

Mr. Chairman, this amendment will provide the FCC with criteria for the establishment of procedures for the compensation of those U.S. broadcasters forced to take steps to mitigate the effects of Cuban interference. The criteria include a loss of service threshold level which will trigger broadcaster compensation. I believe the record should show that Congress is deeply disturbed by the effects of Cuban interference on U.S. broadcasters and that this threshold loss of service should be sufficiently low to insure that all legitimate broadcaster claims can be accommodated.

I urge my colleagues to join me in support of this noncontroversial amendment.

Mr. SWIFT. Mr. Chairman, I move to strike the requisite number of words and rise in support of the amendment.

Mr. Chairman, this demonstrates so clearly the problem we have gotten ourselves into by rushing ahead on the advice of the State Department into areas that they do not understand very well.

If you look specifically at what the FCC is asking for, and I think they need it, and if you look at their justification for it, you can see that what we have here is a tub of worms.

For example, under these provisions what happens if a station is interfered with by Cuban interference and it has to build a new tower? Under provisions

of this amendment it says if that interference should stop, the licensee would be required to revert to the original station for parameters.

At what cost? The new antenna could then be useless—but the station would still have to pay for it. In other words, the very provisions that are designed to protect the American broadcasters are only “now you see them, now you do not” protections.

We have here the FCC saying: “What do you do about the highly intermittent and fluid nature and extent of Cuban radio interference?”

They say: “We need to know the likely significant amount of expenses for which affected broadcasters could seek reimbursement.”

The ask, “What should you do without the substantial impact on all the strained FCC resources,” et cetera, et cetera.

This is another example of where the State Department is storming around like a pregnant hippopotamus in an area that it does not begin to understand, and it is making a thorough mess of itself and of U.S. broadcasting in the process.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Florida (Mr. FASCELL).

The amendment was agreed to.

□ 1850

AMENDMENT OFFERED BY MR. WALKER

Mr. WALKER. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. WALKER: On page 8, after line 12, insert the following new section:

SEC. 13. No funds appropriated or authorized under this act shall be expended in violation of section 7 of Public Law 95-435 or until both Houses of the United States Congress have considered an amendment to the United States Constitution mandating a balanced federal budget.

POINT OF ORDER

Mr. FASCELL. Mr. Chairman, I raise a point of order against the amendment.

The CHAIRMAN. The gentleman will state his point of order.

Mr. FASCELL. Mr. Chairman, the amendment is clearly not germane.

The CHAIRMAN. Does the gentleman from Pennsylvania (Mr. WALKER) wish to be heard on the point of order?

Mr. WALKER. Yes, Mr. Chairman.

The CHAIRMAN. The Chair recognizes the gentleman from Pennsylvania.

Mr. WALKER. Mr. Chairman, I think the amendment is entirely germane. All it is, is a limitation of funding under the bill. It simply says that the program could go ahead and be authorized but that the funding must be limited under the provisions of Public Law 94-435. So I think that this is an entirely appropriate limitation of

funding. It does not in any way become nongermane to the bill.

The CHAIRMAN. Does the gentleman from Florida (Mr. FASCELL) wish to be heard further on the point of order?

Mr. FASCELL. I do not think so, Mr. Chairman. I think it is quite clear it is in violation of the rules. The bill is extremely limited. The amendment is extremely broad.

Mr. CHAIRMAN (Mr. RATCHFORD). The Chair is prepared to rule.

The Chair has examined the amendment. The amendment clearly imposes a contingency, the contingency being further action by the Congress of the United States on another subject and, therefore, in violation of House precedents.

The Chair rules that the amendment is not in order.

PARLIAMENTARY INQUIRY

Mr. WALKER. Mr. Chairman, I have a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. WALKER. Mr. Chairman, the Chair has ruled on a matter which was not raised in the point of order by the gentleman from the floor. The gentleman from the floor raised only the point of order that it was a nongermane amendment to the bill under consideration.

I would concede the point of order with regard to the question of the contingency on it, but that was not the point of order raised by the gentleman from Florida in his point of order.

The CHAIRMAN. Clearly the ruling of the Chair is based upon the germaneness issue raised and, therefore, the Chair adheres to its ruling.

Mr. WALKER. I thank the Chair.

AMENDMENT OFFERED BY MR. FASCELL

Mr. FASCELL. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. FASCELL: Page 6, beginning in line 15, strike out “\$10,000,000 for the fiscal year 1982 and \$7,700,000 for the fiscal year 1983” and insert in lieu thereof “\$10,000,000 for the fiscal year 1983”.

Mr. FASCELL. Mr. Chairman, we said earlier, in opening the discussion on this bill, that I would offer this amendment to comply with the Budget Act.

We strike out the 1982 authorization and simply make the authorization in the bill for fiscal year 1983. Therefore, this amendment would authorize \$10 million for the radio in fiscal year 1983 and drop the request for \$7.7 million.

AMENDMENT OFFERED BY MR. SWIFT TO THE

AMENDMENT OFFERED BY MR. FASCELL

Mr. SWIFT. Mr. Chairman, I offer an amendment to the amendment.

The Clerk read as follows:

Amendment offered by Mr. SWIFT to the amendment offered by Mr. FASCELL: Strike out “\$10,000,000 for the fiscal year 1983”

and insert in lieu thereof "\$7,500,000 for the fiscal year 1983".

Mr. SWIFT. Mr. Chairman, what this does is reduce the authorization from \$10 million to \$7,500,000, a 25-percent cut.

The reason for that is testimony before the Energy and Commerce Committee which indicated that what we are building here is a gold-plated transmitter on which to broadcast information to Cuba.

I have never yet talked to a technician that indicated that gold-plating the transmitter made it broadcast any better.

The cut specifically does these things. On competent engineering advice, we were told that a transmitter of the type being used here should cost between \$640,000 and \$957,000. We took the high figure. They need two transmitters for this operation. We give them two at the high estimate. That reduces the necessary amount for authorization by \$1.3 million.

They want three studios: one in New York, one in Miami, and one here in Washington, D.C. We eliminated two of the studios, at a budget cut of \$150,000 apiece.

For personnel and operation: if you do not have studios in New York, Miami, or Washington, D.C., whichever two of the three they wish to cut, it reduces personnel. This I must admit is a guess—somewhere in the vicinity of \$900,000. That comes up to a \$2.5 million cut that should give them exactly what they need, at least what they want, but removes the gold-plating.

Mr. FASCELL. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, this issue also came up in our committee, and we inquired about the difference in the cost between this kind of radio and a commercial radio. We found out very quickly that there is a tremendous difference between the two for a lot of reasons.

As far as the cost of the transmitter is concerned, we were advised that the first one would cost about \$1,200,000. This amount accounts for some of the differential between what the gentleman from Washington is offering by way of financing and what is in the bill.

The additional expense, of course, would be for purchasing another site.

There is a difference also in personnel and services that are required for this type of broadcast effort. This is not a commercial operation. You have tremendous research costs, startup costs in building a highly technical operation of this kind.

So when you consider the cost of the personnel required, personnel over and above those required by a commercial station, we find that the total cost comes to \$10 million, and then falls off

after that to just the operating costs thereafter. That covers the administration, the programming, the engineering and construction.

Now, as I have said, we have been advised that the first transmitter, excluding land, would be \$1.2 million. The second transmitter, including land, would cost \$1,900,000. So I think that accounts basically for the differential.

Mr. TAUKE. Mr. Chairman, will the gentleman yield?

Mr. FASCELL. I yield to the gentleman from Iowa.

Mr. TAUKE. Mr. Chairman, as the gentleman knows, we have talked before about the facility that has already been erected at Saddle Bunch, Fla. Does anything in this amendment preclude the use of that facility?

Mr. FASCELL. Absolutely not. Does the gentleman refer to the amendment of the gentleman from Washington?

Mr. TAUKE. Right.

Mr. FASCELL. No, I think he has the use of that site in mind, as a matter of fact, figuring that there is probably some savings to be realized in such use.

Mr. TAUKE. I noticed the gentleman, in the discussion of the cost of the radio station, was talking about purchase of a site.

Mr. FASCELL. Second site only.

Mr. TAUKE. Second site only?

Mr. FASCELL. Yes. If I did not make that clear, I was talking about the construction and the acquisition of the second site at \$1.9 million, whereas the first site, because the site theoretically would be available and it would be simply reimbursable cost, would be only \$1.2 million.

Mr. TAUKE. So we are going to have another tower erected and another facility?

Mr. FASCELL. That is what this operation contemplates ultimately, because you can only reach the western part of Cuba from the proposed site in Florida, and you would have to build another transmitter someplace else to reach the heavily populated eastern part of Cuba. That is the reason for the added cost.

Mr. TAUKE. Do we have any idea where we would build this second facility?

Mr. FASCELL. Not yet.

Mr. TAUKE. I thank the gentleman.

Mr. FASCELL. That is something that would be left up to the Board and the administration.

I was just trying to point out the difference between what was recommended in the bill and what the administration is seeking to support, in terms of the \$10 million authorization request, and what the gentleman has proposed by way of his amendment.

□ 1900

Mr. WIRTH. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, the gentleman from Washington made an eloquent case substantively for why this would not be a gold-plated facility. I think there is also a comparative case to be made in terms of the overall Federal budget. The gentleman from Washington is asking that there be a 25-percent cut in the Radio Marti budget. I should point out to members of the committee that we in the United States are spending a grand total of 7 cents per American for facilities to broadcast national public radio, public television and so on. Seven cents per American. Even under the amendment offered by the gentleman from Washington we are going to be spending almost \$1 per Cuban.

I just think the members of the committee ought to know the relative priorities here.

We are in passing this legislation saying that we think Cubans are in effect 15 times more important than Americans are when it comes to communications needs. That is the thrust of the dollars that are involved here. We are spending 7 cents an American for public broadcasting facilities and almost \$1 per Cuban.

The question I wanted to ask of the gentleman from Washington—of the \$7½ million available, will some of that be paid back to the hard pressed Defense Department which has built the facility in Florida already? They have built this for the use of Radio Marti. Will we be paying them back under the authorization?

Mr. SWIFT. Mr. Chairman, will the gentleman yield?

Mr. WIRTH. I yield to the gentleman from Washington.

Mr. SWIFT. I thank the gentleman for yielding.

I would assume if there is any way they can sneak by without getting paid back they would do that.

Mr. WIRTH. But there are no specific funds in here to pay back the Defense Department which has already built the facility for Radio Marti without any authorization or appropriation?

Mr. SWIFT. Considering they had no authority to build it in the first place, it may be extremely hard to make a legal expenditure.

Mr. WIRTH. They have illegally built the facility so far without funds or an appropriation. So why are we authorizing this money? We are authorizing a facility but not going to pay back the Defense Department that has already paid for the facility?

Mr. SWIFT. The gentleman understands very clearly.

Mr. WIRTH. I think the gentleman has a sound amendment. I urge our colleagues to pass it.

Mr. HEFTTEL. Mr. Chairman, will the gentleman yield?

Mr. WIRTH. I yield to the gentleman from Hawaii.

Mr. HEFTTEL. I thank the gentleman for yielding.

Having had reasonable experience in what we are constructing, radio studios, radio transmitters, I would have thought that the gold-plated station and/or stations could have been brought in at a cost of about \$4 million and you would have scaled downward from \$4 million. I do not understand why the budget is \$10 million.

I think the gentleman from Washington is being generous in suggesting a cut to \$7½ million. I would be aghast if we do not support the gentleman's amendment, because at \$7½ million we are expending more than is necessary to attain the objective.

Mr. WIRTH. Well, I tend to agree with the gentleman. Most of the testimony that we heard would agree completely with the gentleman's own expert advice and opinion on this. But we split the difference between what would happen in the private sector and what would be gold plated and then found the difference in what the Government would probably do. And that is where I think the \$7½ million came from.

Mr. HEFTTEL. If I could add one more observation. If these are the differentials in the way the rest of the Government is spending money, it is no wonder we are in such trouble, and it seems a shame that we would expend this kind of money unnecessarily where knowledge and experience would tell us you do not need these sums of money.

Mr. WIRTH. As the gentleman I think is pointing out, foolishness is expensive.

Mr. RINALDO. Mr. Chairman, I move to strike the requisite number of words and I rise in opposition to the amendment.

Mr. Chairman, I will not use the entire 5 minutes. The hour is getting late. But I think it should be pointed out and reiterated that costs for construction, start-up and operation of Radio Marti cannot be compared with the costs for a conventional AM radio station.

I recognize the expertise of the gentleman who just spoke. But I think we also have to understand that Radio Marti must operate with two separate transmitting facilities, one to be constructed in the Florida Keys, broadcasting to western Cuba, and one in the Caribbean, broadcasting to eastern Cuba.

These facilities must operate four-tower, highly directional antenna systems to protect broadcasters in the United States. And that is one of the

arguments that we have been pursuing all afternoon and evening. The complex antenna systems differ greatly from the conventional system and cost several times as much.

It is my understanding, for example, that the Florida antenna alone costs \$1,180,000 and construction costs for the Caribbean facility run in the neighborhood of \$1,930,000.

In addition, the operating costs of Radio Marti will be much higher than for conventional radio stations. And because of its unique position, Radio Marti's programming must be original, cannot be purchased from networks and other news agencies, and the station must maintain its own full-time highly competent paid staff.

While I normally recognize the value of cutting back on Federal spending, under the conditions outlined here today I think it would be a financial impossibility and would defeat the purpose of the legislation.

I urge the defeat of the amendment.

Mr. SWIFT. Mr. Chairman, will the gentleman yield?

Mr. RINALDO. I yield to the gentleman from Washington.

Mr. SWIFT. I thank the gentleman for yielding.

I just wanted to be sure the gentleman does understand it is a radio station we are voting, not a television station.

Mr. RINALDO. I understand that.

Mr. SMITH of Iowa. Mr. Chairman, I move to strike the requisite number of words and I rise in support of the amendment.

Mr. Chairman, the bill and the report anticipates reimbursement to the Navy for the station they have already illegally built. I think that is pretty clear. And if we do not have a prohibition of some kind against it, and I do not see any, we should reduce the amount of money they want or they certainly are going to give some to the Navy. Also, where can we find \$10 million, \$17 million, or whatever it is out of thin air for 1983. We just reported out of the full committee this morning the appropriations bill that I happened to handle for the Board for International Broadcasting. We approved \$90,300,000. That is for Radio Free Europe, Radio Liberty, and one way or another there is only so much money in the budget. We have used up our allocation.

If we are going to have some money in 1983 for Radio Cuba, just mark it down, it will come out of Radio Liberty and Radio Free Europe. There is no other place to get the money within the budget approved.

Now those of my colleagues who think Radio Liberty and Radio Free Europe are important and that we need them had better pay attention.

There is not any room in the budget to just add \$10 or \$15 million for this new station. The budget has already

been approved for 1983. Our 302 allocation has been given to us. We have used it up.

And so if you vote for more money for this station, what you are doing is voting to take some out of Radio Free Europe and Radio Liberty.

I do not care if it is only \$10 million. Where are we going to get it? That is the real question. You better vote for this amendment if you want to save those other stations from reductions of \$2½ million.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Washington (Mr. SWIFT) to the amendment offered by the gentleman from Florida (Mr. FASCELL).

The amendment to the amendment was agreed to.

AMENDMENT OFFERED BY MR. SCHUMER AS A SUBSTITUTE FOR THE AMENDMENT OFFERED BY MR. FASCELL, AS AMENDED

Mr. SCHUMER. Mr. Chairman, I offer an amendment as a substitute for the amendment.

The Clerk read as follows:

Amendment offered by Mr. SCHUMER as a substitute for the amendment offered by Mr. FASCELL, as amended: Page 6, strike out lines 9 through 17 and insert in lieu thereof the following:

PRIVATE FUNDING FOR RADIO BROADCASTING TO CUBA

Sec. 4. Section 7 of the Board for International Broadcasting Act of 1973 (22 U.S.C. 2876) is amended by inserting "(a)" immediately after "Sec. 7." and by adding at the end thereof the following new subsection:

"(b) The funds used for radio broadcasting to Cuba under this Act may be derived only from donations and other contributions from nongovernmental sources under this section. No appropriated funds may be used for such broadcasting to Cuba."

Page 7, beginning in line 4, strike out "or, at the direction of the President, without reimbursement".

Mr. SCHUMER (during the reading). Mr. Chairman, I ask unanimous consent that the substitute amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

Mr. DERWINSKI. Mr. Chairman, reserving the right to object, we have to identify it first.

Mr. FASCELL. Mr. Chairman, reserving the right to object to whatever the request was, which I did not hear, reserving points of order, and all other kinds of things, I would like to see a copy of the amendment before we start waiving things.

Mr. DERWINSKI. Mr. Chairman, may we have one on this side, please? Do we have one here?

Mr. SCHUMER. Yes.

The CHAIRMAN. The Chair believes we ought to allow the Clerk to read the amendment.

The Clerk will read.

The Clerk continued to read the substitute amendment.

Mr. SCHUMER (during the reading). Mr. Chairman, I ask unanimous consent that the substitute amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

There was no objection.

□ 1910

The CHAIRMAN. Does the gentleman from Florida (Mr. FASCELL) still reserve a point of order against the amendment?

Mr. FASCELL. No, Mr. Chairman. I withdraw the point of order.

Mr. SCHUMER. Mr. Chairman, this amendment that I am offering today is quite different than the other amendments that we will be debating, because the other amendments speak to technical operations and difficulties of Radio Marti.

This amendment speaks to the question of priorities. The ink on the first budget resolution for fiscal year 1983 is barely dry and each of us in our committees have been pondering how we can fit under the budget ceiling for the second year in a row; yet here we have before us a bill authorizing \$10 million for a foreign policy initiative that may be important, but is hardly essential.

Members will have to decide for themselves whether they think the existence of a station like Radio Marti is worthwhile; but I think we can all ascertain that such a station even if it is worthwhile is hardly a high enough priority to authorize \$10 million on the one hand while we are taking away millions and billions of dollars from other programs; and yet I am sure I will be asked, "Well, if we can't spend \$10 million, can we still have Radio Marti?"

The answer is yes, we can have Radio Marti by setting up the structure for the said-radio station and yet allowing voluntary contributions to fund that station instead of having Government funds fund the station.

We have heard a lot of talk about voluntarism from the President. The President tells us that there are millions of people in the private sector willing to fund worthy governmental endeavors.

I am certain that this kind of radio station would attract the kinds of funds that the President is talking about.

I am not trying to kill the bill. I am not soft on Cuba. I am as anti-Castro as any other Member in this body; but I simply believe that Government-funded foreign policy initiatives should send a clear signal, not muddled ones.

Radio Marti would still survive under my amendment. You can be both anti-Castro and reassert budget priorities by voting for this substitute.

Mr. FASCELL. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, first let me address the budget item. With the adoption of the amendment of the gentleman from Washington, I will say that the \$7.7 million is in the budget for fiscal year 1983 and is within the foreign affairs 150 function. The amount authorized now is below that, because the amendment took it down to \$7.5 million.

Now, as far as voluntary contributions are concerned, I think we had better keep the bill broad enough so that you can have appropriated funds and contributions if you want to, but do not limit it only to contributions.

When we have tried it in the past, we have had sad experiences. We were trying to fool ourselves and fool the world that the United States was operating covert radios and that there was no U.S. money in the operation. Therefore, we tried to get contributions from the public and our efforts on that were really not very good.

I have the figures now on RFE/RL, Inc. So far on voluntary contributions, even under the present operation, it is approximately \$50,000 for 1977; \$64,000 for 1978; \$30,000 for 1979; \$60,000 for 1980, and \$94,000 for 1981.

Now, even when we had covert operations, and I do not want to be held to this figure, but my best recollection is that we never did get above \$2 million at any time and that may even be a high estimate.

Mr. SCHUMER. Mr. Chairman, will the gentleman yield?

Mr. FASCELL. Certainly.

Mr. SCHUMER. I just would like to ask the gentleman how he can analogize from the European situation to this Radio Marti situation simply because there is a large segment of people in the gentleman's community and communities throughout the country that are very eager to see this radio station exist.

Furthermore, it seems to have been a pet project of a particular segment of the population of this country, an ideological segment, if you will, for many, many years. These are the same people who have been able to contribute to so many causes.

Mr. FASCELL. Well, let me take my time back.

The answer is that this is a governmental initiative. It is an administration policy request. The U.S. Government does not fund its foreign policy initiatives through voluntary contributions, and that is the answer to the gentleman.

As a governmental function, this ought not to be something done through contributions if we expect it to really work. Therefore, I would hope the amendment would be voted down, Mr. Chairman, because this would effectively kill the whole concept.

Mr. CORRADA. Mr. Chairman, I move to strike the last word. I rise in opposition to this amendment. I know it is well intended, but I believe it will not work.

As you probably know, right now in Cuba they are holding the Central American and Caribbean games. Of course, we have several newspaper men, journalists, from Puerto Rico covering that event of sports significance. Andrew Viglucci, who is the editor of the San Juan Star, a very responsible and serious newspaper in Puerto Rico, is there in Cuba. He just sent a column to his paper in Puerto Rico, "Report from Havana," and I would like to read something from that column of Mr. Viglucci. He is staying at the Havana Libre Hotel, formerly the Havana Hilton. He wandered around the hotel to see if he could get some newspapers about what is going on around the world.

He says:

I have not been able to locate a source of non-Cuban newspapers around the hotel, and I'm told not to waste my time trying. The Cuban newspapers are a numbing experience, heavy with "news" of Government activities and pronouncements.

Thursday's Granma—

And Granma is not Castro's grandmother, this is the official name of the Communist Party newspaper in Cuba, which is, of course, the largest circulating paper in Cuba. Thursday's Granma had the following headline:

West Beirut was converted today into an inferno when Nazi-Zionist aggressors launched a storm of North American firepower.

Now, of course, there is no reference there to Ambassador Habib's concern about arriving at a reasonable settlement of the problem in West Beirut. There is no expression of the deep concern of the people of the United States in seeing that something be done to stop the situation; simply for the Cubans, for Castro, this is North American firepower hitting the people of West Beirut.

Now, I would hope that by voting for this Radio Marti and not allowing it simply to be a voluntary effort and, obviously, Granma's newspaper by Castro is not a voluntary effort on the part of the Cuban Government, they put there all the money they need to get this kind of anti-American propaganda, that a vote for this bill that provides a modest amount to be able to tell the people of Cuba that, no, the North American firepower is not the reason why there is this problem in West Beirut, that the problem is a little more complicated, that we are concerned about that problem and that we stand for peace and a good settlement between the problems of the people of Israel and the people of Lebanon, and I believe that by voting for this bill and rejecting the kind of amendment that the gentleman is pro-

posing, that we are allowing the people of Cuba simply to be informed of the basic most elementary things happening around the world and, by God, I do not want that small Cuban child one day to face my son who is as Puerto Rican as I am and hate his guts simply because of this anti-American propaganda that Castro is feeding to them.

Let us give them the truth, not propaganda. Let us not use Radio Marti to tell any sort of propaganda about anti-Communists, communism or anti-Castroism. Let us use that Radio Marti simply to tell the truth so that the people of Cuba would know what it is and putting \$7 million or \$10 million, rather than just asking volunteers to do it, will do the work.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New York (Mr. SCHUMER) as a substitute for the amendment offered by the gentleman from Florida (Mr. FASCELL), as amended.

The question was taken; and the Chairman announced that the noes appeared to have it.

Mr. SCHUMER. Mr. Chairman, I demand a recorded vote.

Mr. Chairman, I withdraw my demand for a recorded vote.

So the amendment offered as a substitute for the amendment, as amended, was rejected.

□ 1920

The CHAIRMAN. The question is on the amendment offered by the gentleman from Florida, (Mr. FASCELL), as amended.

The amendment, as amended, was agreed to.

AMENDMENT OFFERED BY MR. LEACH OF IOWA

Mr. LEACH of Iowa. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. LEACH of Iowa: Page 3, line 16, insert after the period the following:

"Radio broadcasting to Cuba under this Act shall serve as a consistently reliable and authoritative source of accurate, objective, and comprehensive news, in the same manner as the Voice of America is required to function under its charter."

Mr. LEACH of Iowa. Mr. Chairman, I will be brief.

All this amendment does is make clear that the intent of Congress is for Radio Marti to broadcast responsible news rather than propagandistic perspectives for the purpose of subversion or inciting rebellion.

Time and time again, professionals have pointed out that low-key news is the most effective way of reflecting American values and the American way. All this amendment is intended to do is to establish a legislative mandate for Radio Marti to be responsible rather than subversive.

Mr. FASCELL. Mr. Chairman, will the gentleman yield?

Mr. LEACH of Iowa. I yield to the gentleman from Florida.

Mr. FASCELL. I thank the gentleman for yielding.

Mr. Chairman, the thrust of this language is fine as far as I am concerned. We have written language in the report which we thought addressed this. I can accept this language as long as the language is not read to mean that the mission of BIB with respect to this particular radio shall be the same as the mission of the VOA, because that would be impossible. We cannot do that.

We are concerned with two different charters under the law, and I do not want, by accepting the spirit of this amendment, to confuse the two requirements under the law; that is, the difference between VOA and BIB. So I just wonder if the gentleman from Iowa would clarify that point.

Mr. LEACH of Iowa. Mr. Chairman, I would respond to the gentleman from Florida by pointing out that it is my intent for Radio Marti broadcasting to be done in a manner of straightforward news rather than anything that might be considered subversive. But beyond that, there is no particular intent to make too great a distinction between the two different Government broadcasting efforts.

Mr. FASCELL. I think that helps, because the gentleman does use the language "in the same manner as," and I think that helps clarify the intent.

Mr. DERWINSKI. Mr. Chairman, will the gentleman yield?

Mr. LEACH of Iowa. I yield to the gentleman from Illinois.

Mr. DERWINSKI. I thank the gentleman for yielding.

Mr. Chairman, I am rather troubled by this. I think we have to read this a little carefully. If, in fact, this amendment is accepted, by indirection we have said Radio Marti shall be a carbon copy of the Voice of America because of the phrase "is required to function under its charter."

The Voice of America has charter restrictions. Now, the reason for that, part of it, is international public relations. We want to be sure that the Voice of America is, like Caesar's wife, "absolutely pure." Probably we have overdone it.

The point here is that if you want to differentiate between the two, I think this is a fine amendment down to the phrase "and comprehensive news."

Mr. FASCELL. Mr. Chairman, will the gentleman yield to me?

Mr. LEACH of Iowa. I yield to the gentleman from Florida.

Mr. FASCELL. I thank the gentleman for yielding.

Mr. Chairman, I was going to ask the gentleman from Iowa about that. Could the gentleman put a period at the end of "news"?

We have no opposition to the guidelines. We agree with the gentleman

thoroughly that it should be "accurate, objective, and comprehensive"; that it should be newsworthy; that it should be honest; that it should not be pure propaganda. The whole success of our operation in VOA, BIB, and RFE and RFL has been the fact that people can rely on what we are saying on the air. So we have no trouble with that.

We do have some serious problems, though, in saying that both BIB and VOA shall have the same mission.

Mr. LEACH of Iowa. Mr. Chairman, with that explanation by the gentleman from Florida, it being registered as clear legislative intent, I would accept an amendment placing a period after the word "news" and would ask unanimous consent that my amendment be revised to reflect the following: In line 3 of the amendment, strike all after the word "news" and insert a period.

Mr. DERWINSKI. Mr. Chairman, could we have the Clerk read the revised amendment?

The CHAIRMAN. The Clerk will report the amendment, as modified.

The Clerk read as follows:

Amendment offered by Mr. LEACH of Iowa, as modified: Page 3, line 16, insert after the period the following: "Radio broadcasting to Cuba under this Act shall serve as a consistently reliable and authoritative source of accurate, objective, and comprehensive news."

The CHAIRMAN. Is there objection to the request of the gentleman from Iowa to modify the amendment?

There was no objection.

Mr. DERWINSKI. Mr. Chairman, I rise in support of the amendment.

I will be very brief. Let me say to my friend from Iowa that, "Great men always rise to great responsibilities." By this amendment and the acceptance of the minor adjustment, the gentleman from Iowa demonstrates his basic interest in the practicality of truthful radio reporting. Anything that would not be reliable, accurate, objective, would not be in our national interest.

So I commend the gentleman for offering the original amendment, and for accepting the revision of that amendment.

Mr. EMERY. Mr. Chairman, will the gentleman yield?

Mr. DERWINSKI. I yield to the gentleman from Maine.

Mr. EMERY. I thank the gentleman for yielding.

Mr. Chairman, one of the gentleman's comments sparked a thought. Certainly I agree with the thrust of the amendment and intend to support it, but when we talk about accurate and unbiased—

Mr. DERWINSKI. Objective, comprehensive.

Mr. EMERY. Yes. Does that mean, however, that editorial opinions on an issue might not be broadcast because

they might not be entirely objective or would reflect one person's views of given subjects? I feel we should be able to broadcast such opinions to Cuba.

Maybe we ought to clarify that point for the legislative record.

Mr. LEACH of Iowa. Mr. Chairman, will the gentleman yield?

Mr. DERWINSKI. I yield to the gentleman from Iowa.

Mr. LEACH of Iowa. I thank the gentleman for yielding.

Editorial opinion, Mr. Chairman, that is clearly labeled editorial opinion would, of course, be acceptable.

Mr. Speaker, at this time I would like to reiterate an understanding I have with the gentleman from Florida (Mr. FASCELL) and stress the importance and need for reassurance that Radio Marti will, in fact, broadcast accurate, factual information to Cuba. It is my understanding that the purpose of Radio Marti is to promote open communication of information and ideas to Cuba. It is also my understanding that, if Radio Marti is established, programing will consist of honest, straightforward broadcasting of the news as opposed to militant propaganda or broadcasts which are subversive in character. In addition, a number of us are dismayed by the response made by certain midlevel Defense Department officials that the jamming of Radio Marti might constitute an "act of war" and that any such jamming would be countered by "surgically removing their transmitters." I have been reassured by the gentleman from Florida (Mr. FASCELL) that this militaristic response does not reflect congressional intent. If jamming occurs, I would think that such a response would clearly be uncalled for. Finally, Mr. Speaker, I think it would be remiss not to express the greatest alarm that this administration has chosen the route of constructing Radio Marti without congressional authorization or appropriation.

Just as ignorance of the law is no excuse for violation of the law, so constitutional illiteracy is no excuse for violation of the public trust.

The construction of the Navy's facility on Saddlebunch Key is particularly tragic because it implies an abuse of military as well as civil authority.

I do not ask for a response of the gentleman from Florida on this issue because he has been at the forefront of reestablishing a constitutional approach. In fact, I wish to express my appreciation for his sensitivity and leadership on this issue. As is his custom, he has been profoundly fair in allowing critics to make their case. For this, we are all very appreciative.

Mr. EMERY. If the gentleman will yield further, with that legislative record, and with the clear understanding that editorial opinion so labeled are not barred under the gentleman's

language, I think it is constructive and I certainly would support the amendment.

Mr. WIRTH. Mr. Chairman, will the gentleman yield?

Mr. DERWINSKI. I yield to the gentleman from Colorado.

Mr. WIRTH. I thank the gentleman for yielding.

Mr. Chairman, am I correct in assuming that the "fairness doctrine" and "equal time" would not apply to Radio Marti?

Mr. DERWINSKI. I detect a glimmer of a satire in the question.

Mr. WIRTH. No, only that related to this bill.

Mr. DERWINSKI. The term "fairness doctrine" immediately triggers in my mind the fairness between American candidates for various offices. Since there is no such thing as a two-party system in Cuba, I assume the fairness doctrine would be more applicable to the objectivity of the broadcasts than anything else.

Mr. WIRTH. That is the point I wanted to make. Since we were not involved with the FCC being involved with the regulation of this station to the extent it should, therefore, the fairness doctrine and related regulatory framework would not apply to Radio Marti or is it the gentleman's intent that it should apply?

Mr. DERWINSKI. No. I think the gentleman from Iowa, who is rising to great heights of statesmanship at this point, makes it very clear, and I quote from his amendment, "reliable, authoritative, accurate, objective and comprehensive." You cannot be more reassured than that.

Mr. SIMON. Mr. Chairman, I rise in support of the amendment.

Mr. Chairman, I shall not take 5 minutes, and I really am not speaking to the amendment but, rather, to the whole bill and the bigger picture.

I am going to vote for the bill for the reasons outlined by our colleague from Puerto Rico just a few minutes ago. I do not see any harm in seeing that our friends in Cuba can hear another side to things.

□ 1930

But it should be said at some point that our total foreign policy toward Cuba is a disaster. If a half-dozen people had gotten together in Moscow after Castro came to power and said, "How can we design American policy so that Cuba becomes a satellite of the Soviet Union," they could not have designed a better American policy. Cuba today is more of a satellite than is Romania; it is more of a satellite than is Hungary; it is more of a satellite than is, believe it or not, Poland. I can only think of one instance, the Law of the Sea, where Cuba has ever disagreed with the Soviet Union on anything.

The American policy ought to be—much as we disapprove of Castro—our

policy ought to be to woo Cuba away from Soviet dominance, and yet we seem intent on doing just the opposite.

I recognize the political popularity in southern Illinois or New Jersey or any other state represented here to go back home and hit Castro over the head; it is great American politics, just as it is great politics for Castro to hit Uncle Sam over the head—but we ought to be asking ourselves not how we can serve the national passion, but how can we serve the national interest.

The national interest ought to be to say to Cuba, "Let's sell you some soybeans. Let's sell you some medicine. Let's start pulling you away from dependence on the Soviets a little bit."

Again, I am going to vote for the amendment. But I am not really addressing the amendment. I am going to vote for the bill, but in discussing the bill we are talking about something that probably is not going to make one iota's worth of difference in the Cuban-American relationship. At some point what we ought to be talking about is: Is our policy a sound policy? I think it is a fundamentally flawed policy.

Mr. HARKIN. Mr. Chairman, will the gentleman yield?

Mr. SIMON. I yield.

Mr. HARKIN. Mr. Chairman, I thank the gentleman for yielding. I agree with him—it is a fundamentally flawed policy, so why perpetuate it with this kind of bill that does just what the gentleman says, pushes Castro and the Cubans further into the Soviet orbit? The very people—not those who are here right now, but the people who originally who thought up this crazy idea, who pushed through Radio Broadcasting to Cuba, Incorporated—are the very people who year after year tried to thwart just what the gentleman has said, namely, all meaningful dialogue and relationships with Cuba to bring them out of the Soviet orbit.

Mr. SIMON. If I could respond to the gentleman, I understand his point of view, and the gentleman may be correct. It does seem to me that whichever way we go on this, it really does not change our policy, and we have this confrontational situation. It is probably good that our friends in Cuba can hear another perspective on things, but I hope one of these days we in Congress will have the courage—and there will be an administration with the courage—to recognize that where we are going right now just does not make any sense at all.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Iowa (Mr. LEACH), as modified.

The amendment, as modified, was agreed to.

AMENDMENT OFFERED BY MR. LELAND

Mr. LELAND. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. LELAND: Page 6, after line 17, insert the following:

"(2) The funds authorized in paragraph (1) shall not be appropriated by the Congress unless the President proposes and the Congress enacts legislation, subsequent to the enactment of the Radio Broadcasting to Cuba Act, which authorizes the Board to provide accurate information to the people of South Africa (through the use of radio broadcasting) regarding the existence of apartheid and oppression in South Africa."

Page 6, line 13, strike out "(c) There" and insert in lieu thereof "(c)(1) Subject to the provisions of paragraph (2), there".

Page 6, line 17, strike out the quotation marks and the period following the quotation marks.

Mr. LELAND (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas?

Mr. FASCELL. Mr. Chairman, reserving the right to object, I need to know a little bit more about the amendment.

Mr. LELAND. I forwarded a copy to the gentleman.

Mr. FASCELL. Mr. Chairman, I reserve a point of order on the amendment.

The CHAIRMAN. The gentleman reserves a point of order on the amendment.

Is there objection to the request of the gentleman from Texas?

Mr. WIRTH. Reserving the right to object, Mr. Chairman—I will object, Mr. Chairman. I think the amendment ought to be read.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk concluded the reading of the amendment.

The CHAIRMAN. The Chair understands that the gentleman from Florida (Mr. FASCELL) has reserved a point of order on the amendment.

The Chair recognizes the gentleman from Texas (Mr. LELAND).

Mr. LELAND. Mr. Chairman, the point of this amendment is both clear and simple. It addresses a fundamental weakness—or perhaps more correctly, a hypocrisy—in the foreign policy on which the Radio Marti legislation is based. By amending this legislation to make South Africa a target, along with Cuba, of the concept embodied in Radio Marti and to make the appropriation of funds under this legislation contingent on the development of a similar broadcast station aimed at South Africa. We will add an element of balance sorely needed in the foreign policy of the Reagan administration.

Examine with me for a moment, the underlying assumptions on which the

Radio Marti legislation is based. The administration is concerned, and properly so, about human rights violations and political deprivations in Cuba. The administration is also clearly concerned about the fact that the Cuban Government is a Communist government * * * one which they see as a vehicle of Soviet influence in Latin America. Their response is to spend \$18 million to broadcast to the Cuban people. They conveniently ignore the fact that we have an existing mechanism for broadcasting the truth to the Cuban people, making the Radio Marti station unnecessary and duplicative. They ignore the fact that the Radio Marti broadcasts will not be heard by the Cuban people, because of the administration's choice of the AM frequency and because of the Cuban intent to jam the signal. They recognize the substantial disruption which will be suffered by domestic broadcasters in 32 States if the Cubans respond to Radio Marti with a high-powered station of their own by offering token financial compensation to the broadcasters.

But they do not ignore what bothers them the most: The Cuban Government is a leftist government. That is a critical point. Our foreign policy, as reflected in the Radio Marti concept, is not to broadcast the truth to the people under authoritarian and restrictive governments. Their concern is with the politics of those governments.

This amendment provides balance for that policy by including, in this effort to broadcast the truth, a glaring, undeniable example of human rights violations and political deprivations by a rightist government, namely the Government of South Africa. By amending the Radio Marti legislation to include not only the administration's pick of the leftist litter, Cuba, but to include a prime example of rightist totalitarianism, we have corrected the administration's oversight in appearing to be deeply concerned about the plight of the Cuban people yet not concerned enough about the plight of the 86 percent of the South African population that is not white and essentially without political rights to create a Radio Marti for them.

If, in fact, what the administration is really concerned about is an effort to offset the stifling impact of political oppression and provide a word of hope to oppressed peoples, they should have no problem with this amendment. Creation of a—and I will take the liberty of suggesting a name: Radio Biko, named for Steve Biko, whose death in the cause of freedom for the nonwhite population of South Africa is known to the world—creation of a Radio Biko for South Africa should appeal to the Reagan administration.

But it will not. This administration has worked quietly and subtly to liber-

alize the relationship between our Government and the Government of South Africa and to relax the embargoes which, in earlier administrations, reflected some outrage at the blatant disregard for human life and political freedom that is the hallmark of white minority rule in South Africa. The administration's eye for totalitarianism is not as sharp when it looks toward South Africa, nor is its love of freedom.

Those of you who support Radio Marti because of a concern for the plight of the people of Cuba should have no problem voting for this amendment. The plight of the people of nonwhite South Africa is at least as grave. They certainly need the truth.

Those of you who oppose Radio Marti can take heart. By requiring the administration to create a radio Biko before they can have their Radio Marti, we have effectively killed Radio Marti. The Reagan administration shows no inclination to take a tough public posture with the rightist Government of South Africa.

But should this administration, at some point, decide to apply its loudly expressed concern for human rights and political freedom to any country where these rights and freedoms are violated and abridged, this Radio Biko amendment will give them a perfect opportunity to implement such a balanced foreign policy.

So that this body does not become a party to the hypocrisy embodied in the Radio Marti legislation, I urge your support of this amendment.

□ 1940

The CHAIRMAN. Does the gentleman from Florida (Mr. FASCELL) insist on his point of order?

Mr. FASCELL. Mr. Chairman, I do insist on the point of order as being in violation under clause 7, rule XVI, as nongermane and has nothing to do with the subject matter of the bill.

The CHAIRMAN. Does the gentleman from Texas wish to be heard on the point of order?

Mr. LELAND. I sure do, Mr. Chairman. If nothing else, on the germaneness of the morality of this ridiculous legislation.

Mr. Chairman, the amendment is germane for two reasons which I will explain.

H.R. 5427 contains two basic proposals, neither of which are specifically related to Cuba.

First, that the foreign policy of the United States seeks to guarantee the human rights of all persons as defined by the Universal Declaration of Human Rights, and in particular article 19 of that declaration. Article 19 says that it is the right of all persons to "seek, receive, and impart information and ideas through any media and regardless of frontiers." That this is

the purpose of the bill is clearly stated in section 2 of H.R. 5427.

Second, that the Board for International Broadcasting (BIB), to carry out that purpose of our foreign policy, is authorized to "provide for the open communication of information and ideas through the use of radio broadcasting." This is clearly stated in section 3 of H.R. 5427, which is the operative clause of the bill. It is the BIB which is being instructed to carry out this part of our foreign policy.

My amendment is perfectly consistent with the operative clause of the bill (section 3), and with the broader foreign policy goals of the bill. Surely it is not the intention of the President and of the gentleman from Florida that article 19 of the Universal Declaration of Human Rights applies only to Cuba.

The CHAIRMAN. Does the gentleman from Florida (Mr. FASCELL) wish to be heard further on the point of order?

Mr. FASCELL. Yes, Mr. Chairman, I certainly do. The main purpose of this bill makes an amendment to the Board for International Broadcasting nothing else primarily, and the limitation on the policy findings are that it is to the people of Cuba and radio broadcasting to Cuba, and nothing else.

The CHAIRMAN (Mr. RATCHFORD). The Chair is prepared to rule.

The point of order raised is on the issue of germaneness and the Chair is persuaded that in spite of the strong arguments from the gentleman from Florida, the amendment, as offered, is not germane.

Let the Chair cite from precedents specifically to a bill authorizing appropriation of funds, an amendment holding the authorization in abeyance pending an unrelated contingency is not germane.

This particular germaneness precedent in the 96th Congress related to the issue of whether or not there could be a condition on fuel assistance, that condition being awaiting the action of the passage of a windfall profit tax. In effect, tonight what the gentleman is attempting to do is condition funding of broadcasting to Cuba, on an unrelated contingency, which is broadcasting to South Africa and, therefore, the Chair is prepared to sustain the point of order as raised by the gentleman from Florida.

PARLIAMENTARY INQUIRY

Mr. LELAND. Mr. Chairman, I have a parliamentary inquiry.

The CHAIRMAN. The gentleman will state his parliamentary inquiry.

Mr. LELAND. The Chairman does, however, agree that on moral grounds this amendment is completely germane?

The CHAIRMAN. The Chair is not acting in the capacity of chaplain this evening.

Mr. DERWINSKI. Mr. Chairman, I move to strike the last word.

I will be very brief. First of all, I ask for this time in order to correct, at least from my vantage point, the record as described by the eloquent gentleman from Texas.

May I state I have full respect for the gentleman from Texas, his integrity, his interest, and his very special concern over development in South Africa. May I say I will not retreat from comparison to any Member of this body in my abhorrence of apartheid, but that is not the issue here.

I think the gentleman, in his eloquence, has tended toward a slight exaggeration of the administration's record on the subject. May I point out that the administration has been very firm, very precise, and very clear in its continued opposition of apartheid. I think the record should so read.

Mr. LELAND. Mr. Chairman, will the gentleman yield?

Mr. DERWINSKI. Yes, of course I yield.

Mr. LELAND. I would like to point out to the gentleman that to this date we still have a trade embargo imposed on Cuba. The fact of the matter is though that there has been a White House mandate in the past, heretofore in the Reagan administration. The Reagan administration, indeed, lifted the trade restrictions against South Africa. So I think the gentleman's statement is not necessarily correct.

Mr. DERWINSKI. I think it is a matter of how we interpret the practicality of lifting any restrictions, because the facts of life are that within the economy of South Africa, notwithstanding their horrible application of apartheid, the standard of living of the people living in South Africa is substantially better than that of other people of Africa, and substantially higher than, say, in Cuba or probably in any country behind the Iron Curtain.

Mr. LELAND. I would beg to differ with the gentleman, and I think we need to engage in this colloquy at some other point in some other forum.

Mr. DERWINSKI. I think that we should, and in the spirit of good will that we have always demonstrated to each other. I am sure that it would be a mutually informative discussion. I would also like to point out that, according to the 1982 human rights report, South Africa has a particularly "active opposition press which continues to be a vigorous critic of the government and carries extensive reporting and commentary on basic government policies—and the conditions in various racial communities." There are frequent critical articles in the press. I do not believe this applies to Cuba. Furthermore, South Africa does not represent a direct threat to U.S. interests by serving as a proxy for the Soviet Union.

Mr. PEPPER. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, the solution to the problem of Cuba is not an easy one. If ever the United States were justified in preventing a head of state coming to office, we could have and should have, I think, prevented Castro from coming to power in 1959.

Now the time is late. He is a satellite of the Soviet Union.

We all know and have information here as Members of this House from time to time that there is almost a constant stream of Russian submarines coming by Iceland down the Atlantic Ocean to Cuba, and almost a steady stream of reconnaissance bombers and bombers with weapons aboard coming the same route, taking rendezvous in Cuba.

There was recently open information available, an embarrassment to President Carter that there were Russian troops, units of the Russian Armed Forces that were moving around in Cuba.

We do not know what all they have there.

If the letter of the Monroe Doctrine has not been violated by the establishment of a European system in the Western Hemisphere, certainly the spirit has been violated in Cuba.

□ 1950

Now, Castro is not only a minion, a satellite of the Soviet Union, but he is a cancerous influence in Central America and in the whole of the Western Hemisphere.

Only recently, when the Interparliamentary Union met in Cuba, many of us refusing to go because we anticipated that is what would happen, Castro spent about 2 hours denouncing the United States of America.

Now, what moved us to establish the Voice of America? To try to tell the truth about the news to the people of the world.

Why did we establish Radio Free Europe? To try to tell the people in Eastern Europe, confined in their Communist prisons, as it were, what was going on in their own countries.

What motivated us to establish Radio Liberty? To put the news, the facts about what was going on in Russia before the Russian people.

I say the same reason that actuated us to establish those instrumentalities for the dissemination of information moves us now.

I do not know what the solution is, but I do know that asking the Cuban mother what reason has she to let her son die in Angola or Ethiopia to serve imperialistic purposes of Russia is a touching inquiry to her.

I do know that if we tell those people down in Cuba that a few years ago a lot of people from Cuba fled the

despotism of Castro and came to Miami, Fla., and now the record shows that the average annual income of those Cubans is in excess of the non-Cubans who live in Dade County, Fla. It simply demonstrated that they have come to a free country, they have the right of free enterprise, they can enjoy American liberty. Constantly reminding those people down there still behind of what is over here in America; and their knowing what we are doing in America is a motivation to them to want to throw off the yoke of communistic and Castro tyranny and some time or another return to what was once called with pride the jewel of the Caribbean, Cuba. If they could simply dethrone this communistic imperialism that has been imposed upon them, again this rich isle could become the jewel of the Caribbean. And surely one way to promote the restlessness of the people, the resurgence of the people, demanding that sort of freedom, is to give them the truth about what is being done in their own country.

So I am going to support this bill. I think it is in the national interest to pass it.

● Mr. EVANS of Delaware. Mr. Chairman, I rise in strong support of this legislation to authorize radio broadcasts to Cuba. I have long supported all of our international broadcasting efforts through the Voice of America, Radio Free Europe, and Radio Liberty because they are an essential element of our national security. They are non-military, cost effective, and employable now.

One of the problems we have had in dealing with other nations is that we are often misunderstood by their people. The citizens of nations where freedom of the press is denied must rely on information from outside to learn of world events, or even what is happening in their own land. The people of Cuba have access to only one international broadcast targeted especially to their nation: That broadcast is Radio Moscow. The Cuban example graphically illustrates that when truthful information is denied it is far easier to disseminate anti-American propaganda—and have it accepted as truth.

This legislation will authorize a radio that is very similar to Radio Free Europe and Radio Liberty. It is important for Members to understand the difference between these radios, and the Voice of America. RFE and RL broadcast to the people of Eastern Europe and the Soviet Union news about their own nations. They act as surrogate domestic news services to the millions of people behind the Iron Curtain. The Voice of America is completely different. It acts as a worldwide news agency, and also presents a U.S. perspective on current events.

Therefore, news from Czechoslovakia or East Germany or Cuba or any other nation is only reported when it has major international significance. Zeroing in on Cuban news would be totally inappropriate for the Voice of America, and indeed, would violate its charter.

The creation of Radio Marti will provide the truth-starved people of Cuba a desperately needed service of domestic news and information. We do not intend to establish a propaganda agency, but merely relay the truth to Cuba in a strong and clear voice. The truth speaks for itself, and as Americans our ideas and accomplishments have always spoken for themselves. This is the weapon we have that is so much more powerful than arms. It is the weapon the Castro's of the world fear most. As Thomas Jefferson said,

Here, we are not afraid to follow the truth, wherever it may lead so long as reason is free to combat it.

He was speaking of the University of Virginia, but it certainly also applies to our country.

I would also point out to my colleagues that Radio Marti is an integral component of the PrErident's Caribbean basin initiative. Along with our efforts to more closely cooperate economically with our southern neighbors, we must not neglect the need to foster responsible, democratic political development as well.

I do not believe we can say enough about how important international broadcasting is to our national security, and to the millions of people around the world who hunger for the truth. I compliment the committee on its fine work and urge my colleagues to support this important legislation.●

Mr. WEISS. Mr. Chairman, H.R. 5427 would authorize a Government-run radio station to broadcast to Cuba. The intent of the Reagan administration in requesting this authority is to tell the Cubans about life in their own country. This is both presumptuous and senseless, and Radio Marti is a waste of taxpayers' money.

Broadcasting propaganda to Cuba is certain to heighten the antagonism which characterizes our relations with Cuba under the Reagan administration. Cuban President Fidel Castro already has made it clear that Cuba will respond to Radio Marti by counter-broadcasting signals that would jam radio stations in as many as 32 States. This would likely lead to an airwaves stalemate that eventually would force the administration to end its broadcasts, and the money we are being asked today to authorize would be wasted.

What does the President presume to tell the Cuban people? There would be nothing instructional in telling them what to think about the Castro government, which they know far better than we do. It would be of little educa-

tional value to describe to them their own quality of life.

I can only think that the Cubans will recognize Radio Marti propaganda for what it will be, carefully packaged half-truths. The people of Cuba are as intelligent as those of any other nation, and it is a delusion to believe they will be taken in by transparent propaganda.

The stature and role of the United States with the people of the Caribbean and Central America will be diminished by Radio Marti. No one welcomes meddling into their internal affairs, as this station is intended to do. Radio Marti would, in fact, further damage our already unstable policy toward the region.

Our relations with Cuba gradually improved through the 1970's, and we seemed to be approaching an opportunity to ease tensions which have permeated the Caribbean since the 1962 Cuban trade embargo was put in place. The Reagan administration quickly dispelled this hope, however, by shunning contact with the Cubans and launching an international anti-Cuba campaign.

Even suggestions by Cuban officials that an informal dialog between our nations be established were dismissed without consideration by Reagan officials. Cuban officials were denied visas to come to Washington to participate in a seminar that was well attended by Members of Congress, and the opportunity for an exchange of ideas was lost. Most recently, the administration put tight restrictions on American travel in Cuba.

Our own best interests would be met by increasing cultural, social, and technical exchange with Cuba. But Radio Marti is certain to interfere with all such programs. This legislation should be defeated.

PARLIAMENTARY INQUIRY

Mr. WIRTH. Mr. Chairman, I have a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. WIRTH. Mr. Chairman, are we at the point now, at the end of general debate at 8 o'clock, and then thereafter, of offering only amendments that have been printed in the Record?

The CHAIRMAN. Amendments may be offered, but only those printed in the Record; and the author would then be limited to 5 minutes on the amendment. We are at that point.

Mr. WIRTH. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I posed the parliamentary inquiry only for the purpose from the perspective of those who oppose this bill, to summarize where we are in the arguments that have been made over the last few weeks.

The gentleman from Florida (Mr. PEPPER) makes a very eloquent statement on behalf of those who advocate

the bill. There are others of us who see the world quite differently in terms of the way in which you approach Cuba, and from the perspective that was reflected by the gentleman from Illinois (Mr. SIMON) earlier, and that is that our policy toward the Cuban Government is fundamentally bankrupt and that all we are doing with Radio Marti is further reinforcing that bankruptcy, pouring more good money after bad.

As I have pointed out on a number of occasions, we have been in a situation in which there is 90 miles off of our coast a government, and we are pretending as if that government is not there. It seems to me that it does not make any sense at all. Those are the foreign policy goals which have been discussed and debated.

Getting back on the domestic side of it, there are a variety of issues here that Members ought to be aware of. First of all, Members should be aware that this radio station, which the FCC and the Voice of America and other analyses that have been done, clearly suggest is going to create very significant interference which will likely lead to interference for over 200 radio stations in 32 States. That is going to cause very, very significant harm. And who is going to pay for that harm? The American taxpayer. Who causes that harm? This silly bill causes that harm. And the taxpayer then goes and bails out what harm has been caused with taxpayer money. It just does not make any sense whatsoever. In terms of spending, the taxpayer loses twice.

The taxpayer also loses in terms of our domestic priorities. We are spending almost \$1 per Cuban to build this facility. We are willing to spend less than 7 cents per American on facilities to bring public broadcasting—such as, "All Things Considered"—and, everything else that one hears on public radio or sees on public television—to the American public.

We have got a gold-plated operation, even cutting it back, as was done by the Swift amendment.

We also have a very anomalous and serious situation in terms of the Constitution. We have a facility under construction right now being built with taxpayers' money, using the umbrella of the Defense Department, with documentation available to all of us that says that yes, the Defense Department is going to turn over this facility for Radio Marti; no authorization, no appropriation. Clearly a violation of what Congress is all about—which is to authorize and appropriate money. This is not a function to be co-opted by the executive branch.

What happens in Cuba? The Cubans are listening to radio from Miami—they are listening to Florida radio all the time. There are dozens of radio stations broadcasting, some in Spanish, some in English, some all over

Cuba, some just in parts of Cuba, and there are some five radio stations from our Guantanamo base, which as a matter of fact, are right in Cuba. We already have radio stations there broadcasting. We have got Radio Marathon, we have got a plethora of outlets.

The whole operation just does not make any sense. It comes out of a deep-felt cold war concern about how you deal with Cuba. That is one perspective, a legitimate perspective, that I do not happen to share, but it is a legitimate perspective. It fuzzes over the nature of our overall relationship with the Cuban Government; fuzzes over the constitutional nature of how we are spending our money; fuzzes over the very significant harm that this legislation is going to have on domestic broadcasting and American radio listeners.

The final insult, Mr. Chairman, comes in calling this Radio Marti. Jose Marti was a great Cuban patriot, I am sure. But he did not have very many nice things to say about the United States of America. I have a number of quotes from him, in which he is referring to the United States, Mr. Chairman, which I include in the RECORD at this point:

May 18, 1895: "It is my duty—inasmuch as I realize it and have the spirit to fulfill it—to prevent, by the independence of Cuba, the United States from spreading over the West Indies and falling, with that added weight, upon other lands of our America. All I have done up to now, and shall do hereafter, is to that end . . . I have lived inside the monster and know its entrails—and my weapon is only the slingshot of David."

1889: "What is apparent is that the nature of the North American government is gradually changing its fundamental reality. Under the traditional labels of Republican and Democrat, with no innovation other than the contingent circumstances of place and character, the republic is becoming plutocratic and imperialistic."

March 23, 1894: "... those structural qualities which, for their constancy and authority, demonstrate who useful truths to our America: the crude, uneven, and decadent character of the United States, and the continuous existence there of all the violence, discord, immorality, and disorder blamed upon the peoples of Spanish America."

Those quotes, Mr. Chairman, are perhaps the final insult to our consideration of this very, very ill-thought through piece of legislation. To call it Radio Marti is an insult not only to the very goal of this legislation, as it has been stated by its proponents today, but also to the taxpayers of this country who are supporting this ill-fated project.

AMENDMENT OFFERED BY MR. HARKIN

Mr. HARKIN. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. HARKIN: Page 8, after line 12, insert the following new section:

GENERAL ACCOUNTING OFFICE INVESTIGATION OF POSSIBLE IMPROPER USE OF GOVERNMENT FUNDS

SEC. 7. The preceding provisions of this Act shall not take effect until 30 days (excluding any day on which both Houses of Congress are not in session) after the Comptroller General of the United States has submitted to the Congress a report on the results of an investigation by the General Accounting Office into the possible improper use of Government funds by the Department of Defense or any other Federal agency to build a broadcasting facility, prior to the enactment of this authorizing legislation, for use for radio broadcasting to Cuba.

The CHAIRMAN. Has the gentleman's amendment been printed in the RECORD.

Mr. HARKIN. Yes, Mr. Chairman.

Mr. Chairman, what my amendment would do would say that none of the funds authorized under this act could be expended until 30 days after the Comptroller General of the United States has submitted to Congress a report on the results of an investigation by the GAO into the possible improper use of Government funds by the Department of Defense or any other agency to build a broadcasting facility prior to the enactment of this authorizing legislation.

It is widely known that the Navy has been building a transmitter at Saddlebunch Key, Fla. It is also clear that this will become the Radio Marti transmitter. In spite of the fact that this Congress has not authorized any expenditure for such a facility, under the thinnest veil of national security the Defense Department is falsely using its authorization to build this transmitter.

I am talking about a fundamental question of our Constitution. The Constitution requires that funds not be spent without being first passed, authorized and appropriated by Congress.

Once again, my amendment just requires that this will not take effect until we have a report from the GAO.

Now, some think that we are dealing with just a minor bill here. But I submit that the actions by the executive branch violate article 1, section 9 of the Constitution, upon which the balance of powers of our Government is based: "No Money shall be drawn from the Treasury, but in Consequence of Appropriations made by law * * * ." Now, on September 18, 1981, Under Secretary of Defense Fred Ikle wrote to the Assistant Secretary of Commerce, Bernard Wunder:

On request of the Assistant to the President for National Security Affairs, the Department of Defense is preparing to provide, upon enactment of authorizing legislation, a medium wave AM transmitter facility for radio broadcasting to Cuba.

That was in September of 1981, saying that they would provide it upon enactment of authorizing legislation.

□ 2000

In this letter, he says that a medium wave transmitter facility for radio broadcasting to Cuba would be built and the National Security Council is attaching considerable urgency to this matter as a key foreign policy matter.

Now, what happened since then? On June 18, 1982, a UPI report from Key West says that, and I will quote:

In Key West, however, Navy officials tell a different story. Lt. Commander Mark Newheart, Public Affairs officer for U.S. Caribbean Forces, said the antennas were designed for Radio Marti. But they won't be used until Congress has given its approval.

I also have a letter written to Congressman TIM WIRTH, a colleague of ours, from Mr. ADDABBO, chairman of the Defense Subcommittee. And I would just quote from this, from his investigation by his Defense Subcommittee staff. It says here:

Originally Radio Marti * * * Department of State was to pay for the facility and DOD would have seizure rights for the classified mission. Funds are included in pending fiscal year 1982 funding request for this purpose. However, as Radio Marti proposal has run into trouble in Congress, the Department of Defense in March 1982 directed that the Navy proceed with construction of a four tower antenna at Saddle Bunch Key, Fla. According to DOD, this decision was made because DOD could not wait any longer to get a facility for its classified function. However, if Radio Marti is authorized, DOD will not be required to reimburse the Navy for the costs incurred in constructing the antenna array.

So clearly what we have is the Department of Defense building an antenna array, expending moneys for Radio Marti before we have had a chance to authorize and appropriate those moneys.

And all I have said in my amendment is none of these funds can be expended until at least 30 days after we receive a report back from the GAO into the possible improper use of Government funds by the Department of Defense.

I urge adoption of the amendment.

Mr. FASCELL. Mr. Chairman, I move to strike the requisite number of words.

I rise in opposition to the amendment.

First of all, the gentleman has already read right from the letters from the Defense Department with regard to the DOD necessity, need, and purpose for the classified mission. I am informed that DOD representatives have already advised the Armed Services Committee to their purposes, and I assume is in that committee's budget somewhere.

The main thing that concerns us regarding this authorization is that the administration will not operate Radio Marti until such time as an authorization and appropriation is made available by the Congress of the United States in accordance with the requirements of the Constitution.

Now, the gentleman wants the GAO to examine the proposal for Radio Marti. However, if the Appropriations Committee or the gentleman from Iowa makes a heated request to them for a study, they cannot ignore it. We all know you do not have to write a requirement for such a study in legislation if you want GAO to perform an investigation.

If we legislate this, we simply throw another roadblock, another obstacle, another question into the authorization process.

I do not see any need to do that. If the gentleman is seriously concerned, if the Armed Services Committee is concerned, or the Appropriations Committee is concerned, they can request a study.

This authorization simply says that you will operate, you will expend funds, based on this authorization passed by the Congress.

Mr. DERWINSKI. Mr. Chairman, will the gentleman yield?

Mr. FASCELL. I yield to the gentleman from Illinois.

Mr. DERWINSKI. I thank the gentleman for yielding.

Mr. Chairman, I support the comments made by the gentleman from Florida and remind all the Members that this radio is a bipartisan measure supported in a very obvious fashion by Members from both sides of the aisle.

In that spirit I urge rejection of the amendment and final passage of the bill.

● Mr. WIRTH. Mr. Chairman, I rise in support of the amendment offered by the gentleman from Iowa (Mr. HARKIN) Iowa to provide for a GAO study.

This amendment will add a new section to the legislation prohibiting the expenditure of any funds until the General Accounting Office has conducted a study into the possible unauthorized construction of Radio Marti prior to the passage of authorizing legislation. As I said 2 weeks ago, it has come to my attention, and the attention of several other Members of Congress, that the facility to be used by Radio Marti has, in fact, already been constructed at Saddlebunch Key in Florida.

It is apparent that the executive branch, under the guise of a national security requirement, has proceeded with the construction of a facility which it planned from the outset to turn over to Radio Marti. In fact, the Defense Appropriations Subcommittee staff conducted an investigation into the matter and concluded that the transmitter facility being built by the Navy in Florida is for use by Radio Marti.

Mr. Chairman, the U.S. Constitution clearly states:

No money shall be drawn from the Treasury, but in consequence of appropriations made by Law.

I am very concerned that the executive branch has not only usurped the powers of Congress, but that it has violated the U.S. Constitution by proceeding with this station months before Congress has acted on authorizing legislation.

Mr. Chairman, this amendment will require Congress watchdog agency, the General Accounting Office, to conduct a thorough investigation to determine if, in fact, funds have been spent to render Radio Marti operational without authorization. If so, these funds should be fully accounted for prior to any additional funding being spent on this project, if we are to act responsibly.

I urge my colleagues to vote to protect the clear separation of powers set forth in the Constitution and to join me in support of this important amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Iowa (Mr. HARKIN).

The amendment was rejected.

AMENDMENT OFFERED BY MR. HARKIN

Mr. HARKIN. Mr. Chairman, I offer an amendment.

The CHAIRMAN. Is the amendment printed in the RECORD?

Mr. HARKIN. It is, Mr. Chairman.

The Clerk read as follows:

Amendment offered by Mr. HARKIN: Page 8, after line 12 insert the following:

PROHIBITION ON HIRING OF ADDITIONAL PERSONNEL FOR RADIO BROADCASTING TO CUBA

SEC. 7. (a) Except as provided in subsection (b), functions relating to radio broadcasting to Cuba under this Act may only be carried out by personnel of Federal agencies, and no Federal agency may employ additional personnel for purposes of carrying out any such function.

(b) Nothing in this section precludes the Board for International Broadcasting from utilizing the services of existing news reporting organizations.

Page 3, line 16, strike out "The" and all that follows through the end of line 20.

Mr. HARKIN. Mr. Chairman, I think this is one amendment on which I think we ought to have a vote. Because what this does is to prohibit a great building up of some kind of bureaucracy to operate this radio station.

Let me just read to my colleagues some material from the International Communication Agency, the ICA, which discussed the employment requirement of Radio Marti.

Quite frankly I was amazed. They indicated that 159 employees would be needed. Let me repeat that. One hundred and fifty-nine employees.

Let me just read a portion of that memo.

A daily 14-hour program would require two shifts for a personnel total of 159. Seventy-four editors, commentators, analysts, writers, broadcasters, a program aide/secretary, 15 producers, directors and aides, 16 technicians and aides, nine correspondents assisted by secretary/media/aide, and a technician in Washington, D.C., and a tech-

nician in New York, support personnel would increase accordingly to a research office of six, including a music librarian

How about that—

a music librarian, an executive administrative staff of five, a directorate of six, and transmitter staffs of 24. Back-up research and reference materials would continue to be added and a comprehensive music and sound library established.

Do we really want to hire 159 new bureaucrats to run anything in this Government? I think not.

And we do not want to contract out either.

Now, under the bill as written, they could contract this service out to some kookie organization someplace and they could hire 159 people. But ICA said if they are going to go to this 14-hour broadcasting, like they envision, they need 159 people.

So what my amendment says basically is that if a few employees are needed to run the radio station they will have to come from positions already authorized in the Federal Government.

It would require that the Federal bureaucracies would not be expanded because of this activity. It would not, however, prevent the hiring of news reporting services to do some of the functions of reporting the news to them.

However, my amendment would stop bureaucratic growth. And the amendment does allow, however, transfer of positions from one agency to another.

So basically I just ask my colleagues. Even if you are in favor of Radio Marti, if you would like to keep them from hiring 159 new people, or contracting out to hire 159 new people, I ask the Members' support for this amendment.

They can get existing personnel from Voice of America. They can get existing personnel from the State Department, they got them all over down there. Let them get them from there without hiring 159 new people.

I urge adoption of this amendment.

Mr. FASCELL. Mr. Chairman, I move to strike the requisite number of words.

I rise in opposition to the amendment.

Mr. Chairman, this is a serious effort to dismantle this bill. And we have come too far to let that happen.

The agencies that the gentleman is talking about—VOA, BIB, and the State Department—I guarantee they are under budget right now. We have cut into their muscle and the bone is shining. I know, because our subcommittee is responsible for those budgets and has fought to increase the budgets or, failing that, to minimize the cuts.

□ 2010

I can tell you right now that they are operating at about a 1959 personnel level. They are hurting. That is point No. 1.

Point No. 2: The kind of trained people we want and need to carry on this operation are not in those agencies now. They would have to be trained. We have to go out and get additional people. Putting this additional duty upon an agency—the Board for International Broadcasting—which already has all they can say grace over now is unconscionable and defeats the purpose of this bill. They would have to pull their people out of Radio Liberty and Radio Free Europe. I do not think that is a wise idea at all. I also do not think it is wise to take them from VOA.

We are not doing enough with those radios now. The main thrust of what we have been saying in this legislation from the very beginning is this: We are in a contest in this world. Let us not make any mistake about it. I am not talking about cold war confrontation mentality and I am not looking under the bed. I am being as cold and as pragmatic and as practical as any Member of this House when I say that we are in a contest of ideas and ideals.

One of the things we had better learn how to do is to get our message across affirmatively and we had better use every tool at our command. It is called clear language, not clear channel, but I will say clear channel also for the fight we have had here today because of the gentleman from Iowa who put up such a wondrous defense against this radio station and the concept of what he believes is a wrong bill. But I will take and we need for this country every conceivable means to get our message across affirmatively: Radio, books, people, television, and any other public diplomacy tools, and I will tell you right now that we are being outspent in that contest about 7 to 1. We do not want any more roadblocks in it.

Let us use this small step to say that we are enhancing our international capability to communicate freely to people about ideas and ideals and let those people make the judgments.

Mr. SHARP. Mr. Chairman, will the gentleman yield?

Mr. FASCELL. I would be delighted to yield.

Mr. SHARP. I appreciate the gentleman yielding. I would hope that some of our colleagues who feel intensely about this issue would recognize that a good deal of time has been spent on it in the House and would recognize there have been two or three opportunities already and there will be one more opportunity for people to make clear to the American public where they stand on this issue.

I would hope that we would not have to lock the House up in additional votes on these other amendments because the fact is we have important things that will make a big difference to the lives of my constituents that I want on this agenda.

I think it is time the Congress started dealing with those and I think we ought to conclude this matter. Everybody has had their say. Everybody is getting their say, and we can resolve this once and for all.

Mr. DERWINSKI. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I want to get back to the argument made by the distinguished gentleman from Iowa. You cannot pirate personnel from Radio Free Europe or Radio Liberty. Their expertise is Eastern Europe and the Soviet Union proper.

The CHAIRMAN. All time has expired. Under the previous motion and action of the House, all time on this amendment has expired.

The question is on the amendment offered by the gentleman from Iowa (Mr. HARKIN).

The amendment was rejected.

PREFERENTIAL MOTION OFFERED BY MR. DELLUMS

Mr. DELLUMS. Mr. Chairman, I offer a preferential motion.

The Clerk read as follows:

Mr. DELLUMS moves that the Committee do now rise and report the bill back to the House with the recommendation that the enacting clause be stricken out.

Mr. DELLUMS. Mr. Chairman, I offer this preferential motion simply to provide myself with an opportunity to state my position on the matter before the body.

Mr. Chairman, I rise in opposition to this legislation. I would suggest that with 20 years, experience with Cuba since the overthrow of Batista, we have embarked upon a course of action that in my estimation requires that we move in some radically different way.

For a moment, let us recap history. In 1959, Mr. Chairman, this country attacked agrarian reform which nationalized land holdings in Cuba.

We attacked Cuban relationships with the Eastern bloc.

We attacked the Cuban sanction when Cuba developed a sanctuary for Latin American revolutionaries, we challenged that.

Hostility grew, Mr. Chairman. Washington moved to strangle the economy of Cuba. Cuba then was forced to find a patron.

Mr. Chairman, in the 1960's the development of a policy of hostility on the part of the United States with CIA paramilitary operations, U.S. sanctions supported by OAS; Cuba reacted by supporting Latin American revolution.

In the 1970's we had a U.S. reassessment of American policy toward Cuba. Then President Ford eased the embargo on U.S. subsidiaries. We relaxed OAS sanctions. We dropped the demand that Cuba sever its relationship with the Soviet Union.

The reassessment ended with the introduction of Cuban troops in Angola. In 1977, we had a new reassessment on the part of the Carter administration. Carter was seeking Cuban withdrawal from Angola.

We saw fishing agreements and other mutual concessions, such as stopping U.S. overflights. Cuba released political prisoners. There were Cuban discussions with exiles.

In 1978, normalization between the United States and Cuba collapsed over the misunderstanding of Cuban introduction of troops in Ethiopia.

Further deterioration when we began to believe that the invasion of Zaire in some way included Cuban troops and as I recall history, we never quite proved that.

Then we discovered 23 Soviet Mig's in Cuba.

In 1979 we came to the startling conclusion that there was a Soviet brigade in Cuba and then here we are with the Reagan hard line.

I would suggest, Mr. Chairman, that there is no more likelihood that we will succeed with this hard line than we did 20 years ago over what we have done in the past 20 years.

There are mutual interests that exist between our two countries. Previous sanctions have changed nothing in Cuba.

I do not believe that any of us ought to be naive enough to believe that with this Radio Marti that there will suddenly be some mass response to Cuba, some mass opposition.

I would suggest that those persons who oppose the Cuban Government probably have already left, or are probably here, some of them languishing in some of our manmade, home-made prisons.

Mr. Chairman, at this moment we face two policy options. We can continue our coercive strategy, which I would suggest cannot and will not work, or we can begin to open up the process of communication. It seems to me tragic and ludicrous for a nation not to be in communication with a tiny nation 90 miles off our coast.

While we are asking the Israelis and the Palestinians to communicate, while we are asking Iran and Iraq to communicate, while we are asking a number of countries around the world to communicate, we are now threatening our ability to communicate with another nation. That is not healthy. In the world of the 1980's, Mr. Chairman, America ought to be a beacon of peace. To engage in this absurdity is a waste of resources. It is embarking upon a strategy that cannot and will not work. It is a naive and absurd approach.

As I have said before, the only dignity that this legislation brings is the dignity that the gentleman from Florida brings because of his intellectual and political acumen; but there is no

dignity in this legislation. This is an absurdity. It is a throwback to propaganda. It would seem to me that the role of the United States in the 1980's ought to be to declare a much more helpful and useful role in the world.

Mr. FASCELL. Mr. Chairman, I rise in opposition to the preferential motion and I ask that it be defeated.

The CHAIRMAN. The question is on the preferential motion offered by the gentleman from California (Mr. DELUMS).

The preferential motion was rejected.

AMENDMENT OFFERED BY MR. HARKIN

Mr. HARKIN. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The Chair will ask the gentleman, Is the amendment printed in the RECORD?

Mr. HARKIN. Yes, Mr. Chairman, it is printed in the RECORD.

The Clerk read as follows:

Amendment offered by Mr. HARKIN: Page 2, strike out lines 3 through 5 and insert in lieu the following:

SHORT TITLE

SECTION 1. This Act may be cited as the "John Foster Dulles Cold War Mentality Memorial Radio Broadcasting to Cuba Act."

□ 2020

Mr. HARKIN. First of all, I just want to say to the gentleman from Indiana who took the floor a little bit ago saying that it was important legislation that affected his constituency, I want him to know that this legislation I consider important, too, not only to my constituents but to the entire country because I believe we are going down the wrong road in this.

Mr. Chairman, I am not spending my time here in this well fighting this bill for no reason, to try to delay or use dilatory tactics. It is because I believe deeply that this bill is the wrong thing to do and I want to do whatever I can to convince these Members that we are going down the wrong track.

I believe it is in the interest of the constituents of the gentleman from Indiana (Mr. SHARP) and mine, too. So, gentlemen, please give me the benefit of that doubt.

I am not standing here just to try to delay this thing needlessly.

Mr. SHARP. If the gentleman will yield—

Mr. HARKIN. I will yield later. I only have 5 minutes.

Mr. Chairman, I only offer this amendment to retitle this bill "The John Foster Dulles Cold War Mentality Memorial Radio Broadcasting to Cuba Act" because that is what it is. The whole concept of this comes out of the 1950's.

The proponents of this bill in the beginning had their credentials deeply rooted in rightwing movements in our present age. The first mention was in the so-called Santa Fe Report of the

Council for Inter-American Security, that ultrarightwing group.

In June of 1981, Senator JESSE HELMS proposed to the Senate Foreign Relations Committee that we have such a thing, and this is his idea, basically. By January of 1982, President Reagan had announced the creation of the Presidential Commission on Broadcasting to Cuba. The Commission has a decidedly rightwing and anti-Castro complexion. It is headed by F. Clifton White, now a public relations specialist in Connecticut.

White ran Senator GOLDWATER's campaign in 1964 and was a senior advisor to Ronald Reagan's campaign in 1980.

ICA Director Charles Zwick is also on it, a lawyer and former Hollywood music promoter who once told Congress that Communist agents are influencing U.S. media.

The same Mr. Zwick also raised \$50 million for the Reagan campaign.

Two Cuban Americans serve on the Commission. Jorge Luis Mas Canosa, president and chief executive officer of Church & Tower of Florida, Inc. He lobbied hard for the Radio Free Cuba idea.

Mas only became a U.S. citizen in November 1981 when it became essential for his appointment as a Commissioner.

The other Cuban American is Dr. Tirso del Junco, chairman of the California Republican Party.

But perhaps the most conservative credentials on the Commission come from personalities long known as in rightwing supporters in the United States: Joseph Coors, who helped launch the Heritage Foundation, and a lot of other rightwing causes yearly. Millionaire Richard Mellon Scaife's philanthropies for the Heritage Foundation and the Forum World Features, which was exposed in 1975 as a CIA-sponsored operation.

The point I am making is this: The personalities who first devised this are right out of the 1950's, and the theoretical base of propaganda and persuasion is also based on the now outdated and wornout concepts of the cold war of the 1950's.

Radio Marti is predicated on the old, outmoded hypodermic needle model of propaganda. According to this theory, all they have to do is inject a foreign audience with our message and their behavior will be shaped according to our desires.

You can find no credible estimate in Washington today that predicts the Cubans are as dissatisfied as, say, the Poles. After all, most of the so-called dissidents have already left Cuba. Those who remain are generally supportive of the Castro regime.

Yet the logic of this station rests on the premise that Radio Marti will be as successful as Radio Free Europe has

been in Poland. And I say that is ridiculous, it is as outmoded as the 1950's.

And the title of this bill really ought to be "The John Foster Dulles Cold War Mentality Memorial Broadcasting to Cuba Act."

Mr. FASCELL. Mr. Chairman, I rise in opposition to the amendment.

I have some clever amendments in mind myself, for the amendment, but I will just keep them to myself and say to my colleagues that the bill has a correct title. We bypassed everything the gentleman is talking about by authorizing an existing Federal agency to do this work, to wit: The Board for International Broadcasting.

I ask my colleagues to vote down the amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Iowa (Mr. HARKIN).

The amendment was rejected.

AMENDMENT OFFERED BY MR. HARKIN

Mr. HARKIN. Mr. Chairman, I offer an amendment.

The CHAIRMAN. Is the amendment printed in the RECORD?

Mr. HARKIN. It is, Mr. Chairman.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Amendment offered by Mr. HARKIN: Page 2, beginning in line 4, strike out "Radio Broadcasting in Cuba Act" and insert in lieu thereof "Radio Broadcasting to Dictatorships in the Caribbean Basin".

Mr. HARKIN (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

Mr. FASCELL. Mr. Chairman, I reserve a point of order.

The CHAIRMAN. The gentleman from Florida reserves a point of order.

Mr. FASCELL. I did not know the gentleman was bringing this one up.

The CHAIRMAN. The gentleman will state his reservation.

Mr. FASCELL. Mr. Chairman, is this the one starting on page 2, beginning in line 4?

Mr. HARKIN. Yes; it is, Mr. Chairman.

Mr. FASCELL. I see.

Mr. Chairman, let me make a point of order against this amendment under clause 7, rule XVI, because this is an amendment which is obviously an attempt to broaden the subject matter of this bill to include dictatorships in the Caribbean basin and to set other parameters that are just not in this bill and, therefore, it is not germane.

The CHAIRMAN (Mr. RATCHFORD). Does the gentleman from Iowa wish to be heard on the point of order? If not, the Chair is prepared to rule.

The Chair is prepared to sustain the point of order on the basis that the amendment, as proposed, is more general in scope and is not germane to the relatively narrow purpose of the bill.

AMENDMENT OFFERED BY MR. HARKIN

Mr. HARKIN. Mr. Chairman, I offer an amendment.

The CHAIRMAN. Is the amendment printed in the RECORD?

Mr. HARKIN. Yes, Mr. Chairman.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Amendment offered by Mr. HARKIN: PAGE 2, STRIKE OUT LINES 3 THROUGH 5 AND INSERT IN LIEU THE FOLLOWING:

SHORT TITLE

SECTION 1. This Act may be cited as the "Throwing Money at the Castro Problem Through Radio Broadcasting to Cuba Act".

The CHAIRMAN. The gentleman from Iowa (Mr. HARKIN) is recognized for 5 minutes in support of his amendment.

Mr. HARKIN. Mr. Chairman, I ask unanimous consent to withdraw my amendment.

The CHAIRMAN. Is there objection to the request of the gentleman from Iowa?

Mr. DERWINSKI. I object. I would like to hear the request again, Mr. Chairman.

The CHAIRMAN. Does the gentleman reserve the right to object?

Mr. HARKIN. I asked unanimous consent to withdraw my amendment.

Mr. DERWINSKI. I object, Mr. Chairman.

The CHAIRMAN. Objection is heard.

PARLIAMENTARY INQUIRY

Mr. DERWINSKI. Mr. Chairman, I have a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. DERWINSKI. The gentleman offered his amendment. He has 5 minutes to speak for it?

The CHAIRMAN. That is correct under the rules.

Mr. DERWINSKI. Then there is 5 minutes in opposition presumably?

The CHAIRMAN. That is also correct under the rules.

DERWINSKI. The gentleman could not use his 5 minutes. I would like 1 minute or 2 at this point to say something for the RECORD if the gentleman affords me a technically proper vehicle.

The CHAIRMAN. The gentleman from Iowa (Mr. HARKIN) is recognized for 5 minutes.

Mr. HARKIN. I yield to the gentleman from Illinois.

The CHAIRMAN. The gentleman yields back his time and the gentleman from Illinois does not rise to seek time.

The question is on the amendment offered by the gentleman from Iowa (Mr. HARKIN).

The amendment was rejected.

AMENDMENT OFFERED BY MR. HARKIN

Mr. HARKIN. Mr. Chairman, I offer an amendment.

The CHAIRMAN. Is the amendment printed in the RECORD?

Mr. HARKIN. Yes, Mr. Chairman, No. 14.

Mr. CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Amendment offered by Mr. HARKIN: Page 2, strike out lines 3 through 5 and insert in lieu the following:

SHORT TITLE

SECTION 1. This Act may be cited as the "Refugee Recruitment Through Radio Broadcasting to Cuba Act".

Mr. HARKIN. Mr. Chairman, I ask unanimous consent to withdraw the amendment.

The CHAIRMAN. Is there objection to the request of the gentleman from Iowa?

There was no objection.

AMENDMENT OFFERED BY MR. HARKIN

Mr. HARKIN. Mr. Chairman, I offer an amendment.

The CHAIRMAN. Is the amendment printed in the RECORD?

Mr. HARKIN. Yes, Mr. Chairman, No. 13.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Amendment offered by Mr. HARKIN: Page 8, line 12, immediately before the period, insert ", which shall not include either military or paramilitary operations conducted or supported by the United States".

Mr. HARKIN. Mr. Chairman, I ask unanimous consent to withdraw the amendment.

Mr. DERWINSKI. I object.

The CHAIRMAN. Objection is heard.

The gentleman from (Mr. HARKIN) is recognized for 5 minutes.

Mr. HARKIN. I yield to the gentleman from Illinois.

Mr. DERWINSKI. I will take the 5 minutes in opposition to the amendment.

Mr. HARKIN. I yield back the balance of my time.

The CHAIRMAN. The gentleman from Iowa yields back the balance of his time.

The gentleman from Illinois is recognized for 5 minutes in opposition.

□ 2030

Mr. DERWINSKI. Mr. Chairman, I shall not use the 5 minutes, but I think at this point the record should be set clear that some of these amendments could at best be described as overimaginative, and at worst as something less than a good hour for the House of Representatives. This kind of procedure does not lend itself to the respect from the public that this body should have, nor does it lend itself to the respect that we should give to the awesome assignment before us in this bill and many other measures involving foreign affairs.

I suggest to the Members of the House that after they approve of Radio Martí, which I am sure they will

since I have great respect for the Members of this body, they will shortly be called upon to support something called the Caribbean Basin Initiative. There will be a lot of flak about it, but that is a long-overdue initiative that rises far above the present administration and the partisan shots it suffered this afternoon.

The facts of life are that when you debate foreign affairs there ought to be a limit to what is considered a necessary partisanship. Because no President of the United States—and I want to say this in view of the chain of amendments that were offered by the gentleman from Iowa (Mr. HARKIN), no President of the United States approaches foreign affairs with any point of view but what is in the best interests of the United States. Why cannot we in this House of Representatives rise to at least a similar measure of interest and concern for the well-being of our country? Can you show me how this amendment or others offered recently are in the best interests of our country and consistent with the respect the people should have for this body can you show me that?

I would like the record to read clearly that these amendments, if they were not withdrawn, received minimum support as they were shouted down.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Iowa (Mr. HARKIN).

The amendment was rejected.

AMENDMENT OFFERED BY MR. HARKIN

Mr. HARKIN. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. HARKIN: Page 2, strike out lines 3 through 5 and insert in lieu the following:

SHORT TITLE

Section 1. This Act may be cited as the "School Lunch Fund Memorial Radio Broadcasting to Cuba Act".

Mr. HARKIN. Mr. Chairman, I have some 30 or 40 amendments filed in the RECORD. I can get 5 minutes on each. I could ask for votes. I can do all those things. The only reason to do that would be to try to change the bill or to improve it to reflect a different viewpoint or philosophy. However, the votes on the board on the amendments offered so far indicate one very obvious fact: The skids are greased on this bill and it is going to pass intact.

I do not believe, however, that this is due to the compelling nature of the bill, but I believe quite frankly that the support for the bill is due to the personal power and the leadership of the gentleman from Florida, DANTE FASCELL. No one in this body has more personal or professional respect for the gentleman from Florida, DANTE FASCELL, than I do. He is truly one of the best in this House. So, the bill will pass, I believe, because of DANTE FASCELL's leadership.

But, there are two points I would like to make. First, much has been said and implied both in this body and in the administration about the patriotism of Iowans and of radio station WHO in particular; certainly these remarks do not come from the distinguished gentleman managing this bill. I resent those remarks and those implications both on behalf of Iowans and on behalf of radio station WHO.

Second, I want to make it clear that even if this bill had nothing to do with frequency 1040 kilohertz, the clear channel frequency of WHO, I would still be fighting as hard as I am now to defeat this legislation. I am convinced that there is more to this bill than meets the eye. There has to be. If the intent is really to broadcast to the people of Cuba, we would have done it through other means; short-wave, commercial stations, or the Voice of America. Also, I know that the U.S. Navy has already expended money to build the towers at Saddle Bunch, Fla.

I do believe that we need a GAO investigation of this, but the point I want to make is this; that there is more to the bill than just broadcasting to Cuba. I believe, in an unguarded moment, perhaps because they thought they were talking with their ideological soulmates, Mr. James Duncan of the Department of Defense and Kenneth Giddens, the consultant to the Presidential Commission on Broadcasting to Cuba, really let us know what is behind all this: A "game of chicken" with Castro, a "drawing of the line in the sand" across which Castro will not be able to step; that if Castro blocks the broadcast to Cuba it will be an "act of war," and we would be within our rights to "surgically remove" Castro's transmitters.

So, I am compelled to stick my finger in the dike, to make a stand to the bitter end because I feel that strongly about stopping this bill even though my efforts will be futile. On the other hand, vote taken indicate a desire by this House to pass the bill intact without any amendments, and so I will not exercise my parliamentary right to offer my amendments. That is why I was offering these amendments and then withdrawing them, because I wanted to make the point as clearly as I could in the shortest possible time of why I am so opposed to this bill. While I will give up my parliamentary right to offer my amendments, to debate those amendments and to ask for votes on those amendments, I will not give up my opposition to this bill and what it represents. I will continue to write, to speak and to vote against what I consider is a counterproductive policy toward Cuba, Central America, and Latin America.

Someone said earlier in the debate that we seem to learn nothing and remember nothing regarding Latin

America. Also, someone said to me, "All those people in Latin America make a practice of hating us in America."

We know Abraham Lincoln said it best. He said:

There are two ways of getting rid of our enemies. We can kill them or we can make them our friends.

In Latin America and in Cuba we have put too much emphasis on the former and too little on the latter, and so I will not offer any more of my amendments, but I stand on the principle that this legislation is not in the best interests of this country, and notwithstanding my personal and professional high respect for DANTE FASCELL, this bill ought to be defeated.

Mr. DERWINSKI. Mr. Chairman, I rise to oppose the amendment. At this point I wish to compliment the gentleman from Iowa (Mr. HARKIN) for his resourcefulness, for his energy, for his determination and for his imaginative approach to the procedures of the House. But I would like to point out to the Members that this concept should well have been adopted after the missile crisis in 1962. That is how far back we should have discussed this kind of message we intend to send to the people of Cuba.

Let us not forget, of all the people in this hemisphere, the people of Cuba have suffered more in the last 20 years than those of any other country. What we are debating here is not a new ideology of this administration. This is old-fashioned American interest in a country just 90 miles off our shore. I wish there had been enough imagination in previous administrations and previous Congresses to come up with an idea like this.

Mr. ROTH. Mr. Chairman, will the gentleman yield?

Mr. DERWINSKI. I yield to the gentleman from Wisconsin.

Mr. ROTH. Mr. Chairman, I want to compliment the gentleman for his remarks. I know there has been a good deal of scoffing and ridiculing on this legislation, but as I see it, what people think is still the most powerful influence in the world.

This year we in this body are going to be spending over \$200 billion on defense, when the most powerful evidence we have in our arsenal is the story of America. It is not being told and we are not utilizing it. It is high time we in America realize we have a story to tell, we are going to tell it.

Mr. Chairman, as I see it, the strongest force in the world is still what people think. And the strongest force in Cuba is "what the Cuban people think." That is basically why Castro is so alarmed and opposed to Radio Marti.

In my opinion, as long as Castro can control what the population in Cuba think—as long as he has thought con-

trol—he can keep the people of Cuba uninformed—that is how long he can control Cuba and only that long. That is why this station is so necessary: It will tell the Cuban people what is happening in their own country.

I take a great interest in the powers represented by the Voice of America, Radio Free Europe, and Radio Liberty. Recently, I had a visitor from Czechoslovakia in my office. He told me that the people of Czechoslovakia listen attentively to the broadcasts from the West. I thought that it was to gain information about happenings in the West; but he corrected me. My visitor told me that Western broadcasts are appreciated because "They give us a chance to learn about what is happening in our own country of Czechoslovakia." This is what Radio Marti can do for the populace of Cuba. The Cuban people do not know what is going on in their own country, yet there is a terrific desire on the part of people living under dictatorships to know what is happening in their own country.

Tight control over information has led to a situation such that the people in one part of Cuba know very little about what is happening only a few miles away from them. This "information void" means that the Communist leadership has been left relatively free to do whatever it wanted. Furthermore, the Castro government has had more than 20 years in which to isolate its population from contact with the world at large, thereby raising up a new generation which has never known anything other than life in a police state.

There is a real vacuum in Cuba about information on Cuba. Because of this vacuum, it became possible for Castro in the early 1970's to launch his nation onto the road of naked imperialism. Had the Cuban people been aware of the facts, I'm convinced Castro would have been more circumspect and his actions would have been nipped in the heels by an outraged Cuban public opinion.

Cubans have been misruled and exploited by Castro—how else can we account for the over-1-million Cubans who have fled to the United States—1 million since 1970—that is 10 percent of the total population.

Castro will have to recognize that we are going to be calling him to account for his actions. All totalitarian governments—all dictatorships—fear uncensored information that is received by their people. This is true of the politburo in Moscow, the satellite states of Eastern Europe and the puppet state of Cuba.

Now, in a "Dear Colleague," we are told that we cannot vote for this station because Radio Marti would be provocative to Castro. Well, let us analyze that contention.

By the very fact that Castro warns us that he will jam these broadcasts,

we have proof-positive that he is hiding the truth from the Cuban people. But critics of Radio Marti tell us "we cannot be provocative."

Well, then, are we to sit here—intimidated, frightened by some dictator who is afraid to let his people know the truth about what is going on in their country?

If we succumb to that argument—the argument that our hands are tied because it could be provocative to the Cuban dictator—then are we truly brave and free? We must not, we cannot, allow ourselves to be intimidated. It is my opinion that in the past, all too often we have allowed ourselves to be intimidated or deterred from the course we knew to be right, taking the easy way out, to the point where our word in foreign affairs is scoffed at and ridiculed by every two-bit dictator around the world.

If America is to continue to stand for something, then we must act. We must stand tall and be willing to proclaim the truth to the world at large. We cannot continue to let the dictators of the world work their way, unchallenged by the truth.

Mr. DERWINSKI. In the spirit of bipartisanship, I also wish to commend the gentleman from Florida, DANTE FASCELL. It is always a privilege and honor and inspiration to work with him, and may I point out this has been a truly bipartisan legislative effort.

Mr. RINALDO. Mr. Chairman, will the gentleman yield?

Mr. DERWINSKI. I yield.

Mr. RINALDO. Mr. Chairman, I want to take this opportunity to rise in opposition to the amendment, but also to compliment the ranking Republican on the Foreign Affairs Committee for the job that he has done on this bill, and most importantly, the subcommittee chairman, the distinguished subcommittee chairman, for the fine manner in which he handled an extremely delicate and difficult task for the few days we were in session on this piece of legislation.

□ 2040

I want to commend him for his leadership, resourcefulness and patience. He certainly is a credit to this body and has done an exemplary job.

Mr. SHAW. Mr. Chairman, will the gentleman yield?

Mr. DERWINSKI. I yield to the gentleman from Florida.

Mr. SHAW. I would like to also compliment the ranking member and the chairman of the subcommittee, the gentleman from south Florida. We in south Florida know the spirit and the courage of the Cuban people, and we know that they are people that will be free, but they must be given the truth. They must be told what is going on in the world.

This is the most important piece of legislation and it is legislation that can help set the Cuban people free. The Cuban people will be free from communism and we will see a democracy back on that island.

Mr. FASCELL. Mr. Chairman, will the gentleman yield?

Mr. DERWINSKI. I yield to the distinguished gentleman from Florida.

Mr. FASCELL. I just want to say that it has been great working with everyone on this bill, including those who have been opposed. The gentleman from Iowa, the gentleman from Colorado and others have worked very hard and very seriously, and very intelligently and skillfully and, I might add, they have certainly taken me over the ropes. I can say that for them.

But the important thing is this, we have spent 8 hours of very intense discussion on an important policy matter. Some people, of course, are a little bit nervous about that, but I think it was extremely healthy to have that kind of discussion.

This was not just a little old bill and some kind of a discussion about a radio station out in Iowa. That is not what it was all about.

It was very healthy to have this bill go through two committees and come to the Congress rather than have adopted some other subterranean manner of dealing with the issue. The issue ought to be before the Congress and before the American people. It is an important issue.

All of us have made a tremendous contribution to the dialog in this country that is extremely vital, and I hope that my colleagues who have supported us this far would thus vote for the bill on final passage.

Mr. Chairman, in an effort to correct some of the distortions which have accompanied debate on the proposal for Radio Marti, I would like to insert into the RECORD a letter from Mr. William C. Salmon, Acting Coordinator for International Communications and Information Policy, Department of State. This letter refutes the contention that shortwave is the only internationally accepted form of international broadcasting:

UNDER SECRETARY OF STATE FOR SECURITY ASSISTANCE, SCIENCE AND TECHNOLOGY,

Washington, August 2, 1982.

ACTING COORDINATOR FOR INTERNATIONAL COMMUNICATIONS AND INFORMATION POLICY

HON. DANTE B. FASCELL,

Chairman, Subcommittee on International Operations, Committee on Foreign Affairs, House of Representatives.

DEAR MR. CHAIRMAN: It has been brought to my attention that in a May 25 letter to Members and Staff of the Committee on Energy and Commerce I am described by Congressman Wirth as having told the Government Operations Committee last fall that "... shortwave is the internationally accepted form of international broadcasting". The Committee on Energy and Com-

merce Report on the Radio Broadcasting to Cuba Act (Report 97-479, Part 2) repeats this distortion (page 14).

That statement does not accurately quote what I said, nor does it reflect my knowledge of international broadcasting. In my October 23, 1981, testimony before the House Subcommittee on Government Information and Individual Rights, Committee on Government Operations, I stated that "nearly all international broadcasting is conducted in the high frequency (HF) radio bands—roughly 5 to 26 megahertz (MHz)—the so-called shortwave bands".

There is also a considerable amount of medium wave (AM) international broadcasting that has been going on for decades. The BBC has high powered transmitters broadcasting to Western Europe, the Arabic world and Southeast Asia on medium wave. The Federal Republic of Germany broadcasts to Western Europe, Africa, and the Caribbean on medium wave. RFE broadcasts on medium wave to Eastern Europe; the Soviet Union uses high powered medium wave to broadcast to every one of its neighbors, reaching even the Alaskan islands of the United States (a map of Soviet AM broadcasting is enclosed); Cuba broadcasts on medium wave to its neighbors. The Voice of America uses medium wave transmitters, including some of the world's largest, in Europe, the Middle East, the Far East and the Caribbean. In fact, there are many other examples of international medium wave broadcasting, long used by the U.S. and others.

As to Radio Marti, short wave will not accomplish the purpose. All information available to me indicates that few Cubans have shortwave receivers. Only AM can reach Radio Marti's intended audience, the Cuban people.

Sincerely,

WILLIAM C. SALMON.

Mr. DERWINSKI. On that high note, let us pass the amendment and pass the bill.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Iowa (Mr. HARKIN).

The amendment is rejected.

The CHAIRMAN. Are there further amendments?

Mr. LEACH of Iowa. Mr. Chairman, I move to strike the requisite number of words.

The CHAIRMAN. The Chair would indicate to the gentleman from Iowa that under previous action of the Committee that motion is not in order at this time.

Mr. LEACH of Iowa. Mr. Chairman, I ask unanimous consent to enter into a colloquy with the gentleman from Florida.

The CHAIRMAN. Is there objection to the request of the gentleman from Iowa?

Mr. BLILEY. Mr. Chairman, I object.

Mr. FASCELL. Put it in the record.

The CHAIRMAN. The question is on the Foreign Affairs Committee amendment in the nature of a substitute, as amended.

The committee amendment in the nature of a substitute, as amended, was agreed to.

The CHAIRMAN. Under the rule, the Committee rises.

Accordingly the Committee rose; and the Speaker pro tempore (Mr. WRIGHT) having assumed the chair, Mr. RATCHFORD, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 5427) to authorize support to Radio Broadcasting to Cuba, Incorporated, pursuant to House Resolution 529, he reported the bill back to the House with an amendment adopted by the Committee of the Whole.

The SPEAKER pro tempore. Under the rule, the previous question is ordered.

Is a separate vote demanded on any amendment to the committee amendment adopted by the Committee of the Whole? If not, the question is on the amendment.

The amendment was agreed to.

The SPEAKER pro tempore. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

The SPEAKER pro tempore. The question is on the passage of the bill.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

RECORDED VOTE

Mr. WIRTH. Mr. Speaker, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 250, noes 134, answered "present" 2, not voting 48, as follows:

□ 2100

The Clerk announced the following pairs:

On this vote:

Mr. Akaka for, with Mr. Ford of Michigan against.

Mr. Santini for, with Mr. Hawkins against.

Mr. Jeffries for, with Mr. Conyers against.

Mr. Napier for, with Mr. AuCoin against.

Mr. Stanton of Ohio for, with Mr. Richmond against.

Mr. MARTINEZ changed his vote from "no" to "aye."

So the bill was passed.

The result of the vote was announced as above recorded.

The title of the bill was amended so as to read: "A bill to provide for the broadcasting of accurate information to the people of Cuba, and for other purposes."

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. FASCELL. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks, and to include extraneous matter, on the bill just passed, H.R. 5427, and specifically to include the colloquy between the gentleman from Iowa (Mr. LEACH) and myself.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Florida?

There was no objection.

The SPEAKER pro tempore. The Chair would have to explain to the gentleman that all those requests are granted without objection, save and except for the request that the colloquy be included in the RECORD, and would have to explain to the gentleman from Florida that a colloquy which was not spoken upon the floor cannot be inserted into the RECORD.

Mr. FASCELL. Mr. Speaker, I will renew my request and leave that out because I can do it under the revision of remarks with no difficulty.

The SPEAKER pro tempore. Without objection, the requests are agreed to.

There was no objection.

REQUEST FOR PERMISSION FOR COMMITTEE ON ENERGY AND COMMERCE TO SIT TOMORROW, AUGUST 11, 1982, AND BALANCE OF WEEK, DURING 5-MINUTE RULE

Mr. DINGELL. Mr. Speaker, I ask unanimous consent that the Committee on Energy and Commerce be permitted to sit while the Committee of the Whole is considering legislation under the 5-minute rule tomorrow and for the balance of the week.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan?

Mr. WAXMAN. Mr. Speaker, reserving the right to object—

The SPEAKER pro tempore. The gentleman reserves the right to object.

The Chair will make clear that the request of the gentleman from Michigan would require 10 objections and no fewer.

Mr. WAXMAN. Mr. Speaker, reserving the right to object, I do so to inquire whether this is to consider the Clean Air Act in the Energy and Commerce Committee.

Mr. DINGELL. Mr. Speaker, will the gentleman yield?

Mr. WAXMAN. I yield to the gentleman from Michigan.

Mr. DINGELL. It is to consider H.R. 5252, the amendments to the Clean Air Act.

Mr. WAXMAN. Mr. Speaker, I regret the fact I must object because it seems to me we have too many other important items on the floor and our Members ought to be here.

Therefore, Mr. Speaker, I object.

The SPEAKER pro tempore. Objection is heard.

Those Members objecting will stand. (Messrs. BARNES, MATSUI, WEISS, MINETA, DYMALLY, FAZIO, McHUGH, DIXON, STOKES, LEVITAS, FRANK, ANDERSON, GONZALEZ, and SOLARZ also objected.)

The SPEAKER pro tempore. A sufficient number has objected.

Objection is heard.

CONFERENCE REPORT ON H.R. 5930, EXTENDING AVIATION INSURANCE PROGRAM FOR 5 YEARS

Mr. MINETA submitted the following conference report and statement on the bill (H.R. 5930) to extend the aviation insurance program for 5 years:

CONFERENCE REPORT (H. REPT. No. 97-722)

The committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 5930) to extend the aviation insurance program for 5 years, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its disagreement to the amendment of the Senate and

agree to the same with an amendment as follows:

In lieu of the matter proposed to be inserted by the Senate amendment insert the following:

That the last sentence of section 303(b)(1) of the Independent Safety Board Act of 1974 (49 U.S.C. 1902(b)(1)) is amended to read as follows: "At any given time, no less than three members of the Board shall be individuals who have been appointed on the basis of technical qualification, professional standing, and demonstrated knowledge in the fields of accident reconstruction, safety engineering, human factors, transportation safety, or transportation regulation." The amendment made by the preceding sentence shall not preclude the reappointment of any individual serving as a member of the Board on the date of enactment of this Act.

SEC. 2. Section 306 of the Independent Safety Board Act of 1974 (48 U.S.C. 1905) is amended in subsection (a) by striking "pursuant to subsection (b)" and substituting "pursuant to subsection (b) or (c)" and by adding at the end thereof the following new subsection:

"(c) COCKPIT VOICE RECORDER.—Notwithstanding any other provision of law, the Board shall withhold from public disclosure cockpit voice recorder recordings and transcriptions, in whole or in part, of oral communications by and between flight crew members and ground stations, that are associated with accidents or incidents investigated by the Board: Provided, That portions of a transcription of such oral communications which the Board deems relevant and pertinent to the accident or incident shall be made available to the public by the Board at the time of the Board's public hearing, and in no event later than 60 days following the accident or incidents: And provided further, That nothing in this section shall restrict the Board at any time from referring to cockpit voice recorder information in making safety recommendations."

SEC. 3. Section 1312 of the Federal Aviation Act of 1958 (49 U.S.C. 1542) is amended by striking out "1982" and inserting in lieu thereof "1987".

SEC. 4. (a) Section 408 of the Federal Aviation Act of 1958 is amended to read as follows:

*"EMPLOYEE ARRANGEMENTS**"DEFINITIONS*

SEC. 408. (a) For purposes of this section—
"(1) the term 'employee' means an employee of an air carrier involved in a qualifying transaction, other than a temporary or part-time employee, who is a member of a craft or class which is subject to the Railway Labor Act (45 U.S.C. 151 et seq.); and

"(2) the term 'qualifying air carrier' means—

"(A) an air carrier providing passenger service with aircraft having a maximum passenger capacity of more than 60 seats,

"(B) an air carrier providing cargo service in foreign air transportation with aircraft having a maximum payload capacity of 18,000 pounds or more, and

"(C) an air carrier providing cargo service in interstate or overseas air transportation with aircraft having a maximum payload capacity of 18,000 pounds or more.

"QUALIFYING TRANSACTIONS

"(b)(1) For purposes of this section, the term 'qualifying transaction' means—

"(A) any consolidation or merger by two or more qualifying air carriers or persons controlling qualifying air carriers of their

properties, or a substantial portion thereof (in cases meeting the standards set forth in paragraph (2) of this subsection), into one person for the ownership, management, or operation of the properties previously in separate ownerships, and any acquisition of control in any manner whatsoever of any qualifying air carrier by another qualifying air carrier or by a person controlling another qualifying air carrier;

"(B) any purchase of, lease of, or contract to operate all of the properties, or a substantial portion thereof (in cases meeting the standards set forth in paragraph (2) of this subsection), of any qualifying air carrier by another qualifying air carrier or by a person controlling another qualifying air carrier; and

"(C) any purchase of, lease of, or contract to operate all of the properties, or any acquisition of control in any manner whatsoever, of any direct air carrier which is not a qualifying air carrier by a qualifying air carrier or by a person controlling a qualifying air carrier, but only if and when the carrier which is not a qualifying air carrier provides passenger service with any aircraft having a maximum passenger capacity of more than 60 seats or provides cargo service in foreign air transportation with aircraft having a maximum payload capacity of 18,000 pounds or more.

"(2) A transaction described in subparagraph (A) or (B) of paragraph (1) of this subsection involving a substantial portion of the properties of an air carrier shall be a qualifying transaction only if—

"(A) the transaction involves aircraft constituting more than 20 percent of the total number, market value, or lift capacity of aircraft owned by the seller or lessor;

"(B) the transaction involves assets other than aircraft constituting more than 20 percent of the total assets of the carrier selling or leasing properties; or

"(C) the transaction involves any purchase of, lease of, or contract to operate properties which directly or indirectly involves the right to operate any route or other equivalent air carrier market (including, but not limited to, any agreement or understanding not to compete on such route or market), and the Civil Aeronautics Board determines, after notice and an opportunity for hearing, that such transaction would cause widespread impact on the employees of an air carrier involved in the transaction, such that labor protective provisions should be imposed to prevent labor strife and disruption that could impair the continued stability and efficiency of the carriers involved.

The Civil Aeronautics Board shall make the determination required by subparagraph (C) not later than 90 days after a request is made in writing, or a court issues an order to the Civil Aeronautics Board, to make such determination. Any transaction which can be a qualifying transaction only under subparagraph (C) shall not take effect before the date on which the Civil Aeronautics Board makes such determination.

"(3) Notwithstanding any other provision of this subsection, no transaction involving only carriers described in subparagraph (C) of paragraph (2) of subsection (a) of this section shall be a qualifying transaction.

"IMPOSITION OF LABOR PROTECTIVE PROVISIONS
"(c)(1) Except as otherwise provided in this section, in the case of any qualifying transaction, the labor protective provisions imposed by the Civil Aeronautics Board in the Allegheny-Mohawk merger, 59 CAB 45, shall apply with respect to the employees of

the air carriers who are involved in such transaction.

"(2) Sections 4, 5, 6, 7, 8, 9, and 12 of the Allegheny-Mohawk provisions specified in paragraph (1) of this subsection shall not apply with respect to any qualifying transaction which becomes effective more than five years after the date of enactment of this section.

"(3) In the case of any purchase, lease, contract to operate, or acquisition of control described in subsection (b)(1)(C) of this section, the qualifying transaction shall be considered to have become effective on the date on which service described in such subsection begins, and paragraph (1) of this subsection shall apply only on or after such date.

"(4) Nothing in this section shall preclude any agreement between an air carrier or air carriers (or their assignees or successors in interest) and one or more of the representatives of the employees of such carrier or carriers concerning the manner in which the provisions made applicable by paragraph (1) of this subsection will be implemented, or concerning a limitation on or extension of such provisions. Any such agreement shall apply, in lieu of the provisions made applicable by paragraph (1) of this subsection, with respect to the employees for whom such agreement is made.

"enforcement

"(d) The district courts shall have jurisdiction over any action to enforce this section, any arbitration award resulting from the application of this section, and any agreement applicable under subsection (c)(4) of this section, and any action to enforce any labor protective provisions imposed by the Civil Aeronautics Board under section 408 of the Federal Aviation Act of 1958 (as in effect before the effective date of this subsection), any arbitration award resulting from such provisions, and any agreement reached in lieu of such provisions. Any person with standing (including any labor organization representative of such person) may bring any such action in the appropriate district court, determined in accordance with section 1391 of title 28, United States Code, without regard to the amount in controversy."

(b) Section 409 of the Federal Aviation Act of 1958 is repealed.

(c) That portion of the table of contents contained in the first section of the Federal Aviation Act of 1958 which appears under the center heading

"TITLE IV—AIR CARRIER ECONOMIC REGULATION"

is amended by striking out

"Sec. 408. Consolidation, merger, and acquisition of control.

"(a) Acts prohibited.

"(b) Power of Board.

"(c) Interests in ground facilities.

"(d) Jurisdiction of accounts of noncarriers.

"(e) Investigation of violations.

"(f) Presumption of control.

"Sec. 409. Interlocking relationships."

and inserting in lieu thereof

"Sec. 408. Employee arrangements.

"(a) Definitions.

"(b) Qualifying transactions.

"(c) Imposition of labor protective provisions.

"(d) Enforcement."

(d)(1) Section 1601(a)(3) of the Federal Aviation Act of 1958 is amended to read as follows:

"(3) The authority of the Board under section 408 of this Act is transferred to the De-

partment of Transportation on January 1, 1983."

"(2) Section 1601(b)(1)(C) of the Federal Aviation Act of 1958 is amended by striking out "The authority of the Board under sections 408 and 409 of this Act (relating to foreign air transportation), the" and inserting in lieu thereof "The" and by striking out "sections 408, 409, and" and inserting in lieu thereof "section".

(3) Section 414 of the Federal Aviation Act of 1958 is amended by striking out "408, 409, or"

(4) Section 1010 of the Federal Aviation Act of 1958 is amended by striking out "408, 409, 412," and inserting in lieu thereof "412" and by striking out, "except in the case of an application submitted under section 408 of this Act, the Board shall issue its final order or decision not later than the last day of the sixth month after submission".

(e) This section and the amendments made by this section shall take effect on the date of enactment of this section.

And the Senate agree to the same.

HOWARD CANNON,

Managers on the Part of the Senate.

JOINT EXPLANATORY STATEMENT OF THE COMMITTEE OF CONFERENCE

The managers on the part of the House and the Senate at the conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 5930) to extend the aviation insurance program for five years, submit the following joint statement to the House and the Senate in explanation of the effect of the action agreed upon by the managers and recommended in the accompanying conference report:

The Senate amendment struck out all of the House bill after the enacting clause and inserted a substitute text.

The House recedes from its disagreement to the amendment of the Senate with an amendment which is a substitute for the House bill and the Senate amendment. The differences between the House bill, the Senate amendment, and the substitute agreed to in conference are noted below, except for clerical corrections, conforming changes made necessary by agreements reached by the conferees, and minor drafting and clarifying changes.

WAR RISK INSURANCE

House bill

Reauthorizes War Risk Insurance Program through September 30, 1987.

Senate amendment

Same as House bill.

Conference substitute

Same as the House bill.

COCKPIT VOICE RECORDERS

House bill

No provision.

Senate amendment

Provides that, notwithstanding any other provision of the law, the National Transportation Safety Board shall withhold from public disclosure cockpit voice recorder re-

cordings and transcriptions involving flight crew communications that are associated with accidents investigated by the Board. The Board is required to make available to the public those portions of the transcriptions of such communications that the Board deems relevant and pertinent to the accident, at the time of the Board's public hearing on the accident, and in any event no later than 60 days following the accident. In the event that the CVR is not recovered immediately after the accident, the conferees intend that the Board have 60 days after recovery of the CVR before release. The conferees emphasize that this amendment would not affect the Board's current practice of sharing CVR information with parties to the investigation.

Conference substitute

Same as Senate amendment.

QUALIFICATIONS OF MEMBERS OF THE NATIONAL TRANSPORTATION SAFETY BOARD

House bill

No provision.

Senate amendment

Requires the President to appoint individuals to be members of the National Transportation Safety Board upon the basis of technical qualification, professional standing, and demonstrated knowledge in the fields of accident reconstruction, safety engineering, human factors, transportation safety, or transportation regulation.

Conference substitute

Provides that at any given time no less than three members of the National Transportation Safety Board shall have technical qualification, professional standing, and demonstrated knowledge in the fields of accident reconstruction, safety engineering, human factors, transportation safety, or transportation regulation. Moreover, the conferees believe it would be desirable if future Chairmen of the NTSB possessed these qualifications.

This requirement is not intended to preclude the reappointment of any persons serving as a member of the Board upon the date of enactment.

LABOR PROTECTION PROVISIONS FOR AIRLINE EMPLOYEES

Current Law

Two sections of current law affect the authority to impose labor protection provisions. Under section 408 of the Federal Aviation Act of 1958, the CAB has wide discretion to impose such conditions (including labor protection provisions) as it sees fit on certain transactions among air carriers. Under section 1601(a)(3) of the Act, however, this authority, insofar as it relates to interstate and overseas air transportation, is transferred to the Department of Justice on January 1, 1983. This raised a great deal of uncertainty in the aviation community as to how this broad discretion would be applied by a new agency after January 1, 1983.

House Bill

The House bill did not address the issue of labor protection provisions for airline employees. Thus the effect of the House bill was to permit the authority to impose such provisions to be transferred to the Department of Justice on January 1, 1983 in accordance with current law.

Senate amendment

The Senate amendment sought to address the uncertainty of how the Department of Justice would apply its discretion in the field of labor protection by repealing the

section in existing law which would transfer this authority to the Department of Justice on January 1, 1983 (section 1601(a)(3)). As a result of the amendment, the authority to impose labor protection provisions would remain at the CAB until January 1, 1985 when that agency would be abolished under another provision of existing law. At that time the authority would be transferred to the Department of Justice.

As Senator Kassebaum, the author of the amendment, stated on the floor of the Senate:

If jurisdiction were transferred to the DOJ, it is not clear whether that agency would or could impose the standard Allegheny-Mohawk merger labor protective provisions which have traditionally been employed by the CAB to prevent labor disruption resulting from work force consolidations. The Board's labor protective provisions have been an integral part of the consolidation process. Until the Congress had had an opportunity to consider fully to what extent labor protective provisions should be required after CAB sunset, it is important that jurisdiction remain at the Board with authority to impose them.

Conference substitute

The conference substitute fulfills the intent of the Senate amendment by spelling out how labor protection provisions are to be applied in the future. The thrust of the conference substitute is to maintain the standard Allegheny-Mohawk merger labor protective provisions in accordance with the Senate amendment.

Specifically, the conference substitute requires that labor protective provisions continue to be imposed in the case of certain qualifying transactions. The labor protective provisions which are to be applied to these transactions are those imposed by the Civil Aeronautics Board in the Allegheny-Mohawk merger case, 59 CAB 45, including conforming changes typically made by the Board to tailor these conditions to the various types of transactions which might be involved, such as acquisition of control, or route transfers.

The requirements in the Board's standard labor protective provisions for integration of seniority lists are applicable to qualifying transactions consummated at any time after the effective date. The requirements in the protective conditions for financial benefits to displaced employees or to employees whose compensation is reduced are required only for transactions consummated within five years after the date of enactment.

Labor protective conditions are required for transactions involving two or more qualifying air carriers or persons controlling qualifying air carriers. A qualifying air carrier is (a) an air carrier providing passenger service with aircraft having a maximum passenger capacity of more than 60 seats, (b) an air carrier providing cargo service in foreign air transportation with aircraft having a maximum payload capacity of 18,000 pounds or more, and (c) an air carrier providing cargo service in interstate or overseas air transportation with aircraft having a maximum payload capacity of 18,000 pounds or more. Transactions involving the carriers described in (c) are covered only if a carrier described in (a) or (b) is also party to the transaction.

Qualifying transactions are also covered if the transaction is between an air carrier which is not a qualifying air carrier (such as commuter air carriers operating only aircraft with less than 60 seats) and a qualifying air carrier, only if and when the non-

qualifying air carrier begins providing passenger service with aircraft of more than 60 seats, or cargo service in foreign air transportation with aircraft with a maximum payload capacity of 18,000 pounds or more. In these cases labor protective conditions shall apply only on and after the date on which the non-qualifying carrier becomes a qualifying carrier.

The transactions involving qualifying air carriers in which labor protective conditions are required are consolidations, mergers, acquisitions of control, and purchases, leases, or contracts to operate all of the properties of a qualifying air carrier. Cases involving the purchase lease or contract to operate a substantial portion (but not all) of the properties of qualifying air carrier are subject to specified standards. If a transaction involving acquisition of a substantial portion of a carrier's property does not include the right to operate a route, protective provisions are required if the aircraft in a transaction constitutes more than 20% of the total number, market value, or lift capacity of aircraft owned by the seller or lessor, or if the non-aircraft assets in the transaction are more than 20% of the total assets of the seller or lessor. If in these transactions (i.e. transactions involving acquisition of a substantial portion of a carrier's property where no routes are involved) the foregoing numerical tests are not met, labor protective conditions are not required.

Under these numerical tests, labor protective provisions will be required for certain transactions in which there is a sale or exchange of a substantial portion of a carrier's property and no routes are involved. A majority of the conferees felt that it was desirable to have numerical standards which would give certainty both to airlines and employees so that they could make appropriate contractual and collective bargaining arrangements. Nevertheless, the conferees recognize that Representatives Clausen, Snyder, and Hammerschmidt had and continue to have concerns over the extent to which labor protection provisions as included in the conference substitute change the current CAB policy of considering all these transactions on a case-by-case basis.

In transactions involving the acquisition of a substantial portion of the properties of an air carrier in which the properties involved include the rights to operate routes, the Civil Aeronautics Board is required to determine, after notice and an opportunity for hearing, whether the transaction would cause a widespread impact on the employees of an air carrier involved in the transaction, such that labor protective provisions should be imposed to prevent labor strife and disruptions that could impair the continued stability and efficiency of the carriers involved. The Civil Aeronautics Board is required to make this determination not less than 90 days after a request is filed. The CAB's authority to make these determinations is transferred to the Department of Transportation on January 1, 1983.

The requirements imposed by the conference substitute are not intended to preclude any agreement between an air carrier and one or more of the representatives of the employees of the carrier concerning the manner in which labor protection provisions will be implemented, or concerning a limitation of or extension of such provisions. Any such agreement shall apply, instead of the standard labor protective provisions, with respect to the employees for whom the agreement has been made.

The Conference substitute terminates the requirement that the Civil Aeronautics Board approve specified transactions involving airlines and other aeronautical interests under section 408 of the Federal Aviation Act of 1958 and the requirement that the CAB approve specified interlocking relationships under section 409 of the Act.

A TRIBUTE TO OTTO CORUM

(Mr. HUBBARD asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. HUBBARD. Mr. Speaker, I speak today in tribute to a longtime friend of mine, Otto Corum, who died last month on July 15 at the age of 71 in Madisonville, Ky.

Corum, who was involved in many diverse and successful business interests, helped to build Madisonville by donating land or selling it half price. His business interests included farming, land development, coal mining, a river boating facility, concrete and paving contracting, a shopping center, motels, a fuel distributing company, an engineering company, and a resort in the Bahamas.

In 1976, Corum was named the Madisonville Lions Club Man of the Year. He was also instrumental in expanding and beautifying the campus of Madisonville Community College. The city's Elks Lodge, the local chamber of commerce, and the Boy Scout Camp at Wild Cat Hollow have dedicated and/or named facilities for him and in his honor.

Corum, a member of the hometown First United Methodist Church, served on the board of Kentucky Wesleyan College, Madisonville Community College, and Associated Industries of Kentucky.

Corum was a self-made man, as well as a generous one. His basic philosophy was to share any assets he had. Many organizations were recipients of his generosity. Most of his donations were anonymous. He was not a man who looked for recognition.

He attended Madisonville High School and earned a B.S. degree in biology and chemistry from Western Kentucky University.

I was very fond of Otto Corum and considered him an outstanding, unselfish, hard working, dedicated American.

His son-in-law, State Senator Kenneth Gibson of Madisonville, was one of many who admired Otto Corum.

Mr. Corum was very helpful to several public officials, including Senator Gibson and me.

Other family survivors are his lovely and talented wife, Martha L. Corum, two children, Ann Gibson and Frank Corum, both of Madisonville, and two stepdaughters, Jean Bohne and Carolyn Chumley, both of Central City.

I extend my sympathy to the survivors and friends of this fine gentleman, who was truly an inspiration to those who knew and respected him.

□ 2110

A TRIBUTE TO THE HONORABLE JONATHAN B. BINGHAM

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. ADDABBO) is recognized for 60 minutes.

GENERAL LEAVE

Mr. ADDABBO. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the retirement of our colleague, the Honorable JONATHAN BINGHAM.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. ADDABBO. Mr. Speaker, it is with mixed emotions that I have requested this special order today to honor our dear friend and distinguished colleague, JONATHAN BINGHAM; in extolling the great achievements of our colleague, and sadness in knowing that his service in this House and to the people of his district will end at the end of this session of Congress.

I know that my colleagues share my sentiments and I would like to thank all of you who are joining me in this tribute.

To our great sorrow, Jack will be leaving us at the end of the 97th Congress, but there are very few of us whose lives have not been happily touched in some way by him.

Mr. STRATTON. Mr. Speaker, will the gentleman yield?

Mr. ADDABBO. I yield to the gentleman from New York.

Mr. STRATTON. Mr. Speaker, I want to commend the gentleman from New York (Mr. ADDABBO) for taking this special order to honor one of our senior colleagues, the gentleman from New York (Mr. BINGHAM), who unfortunately is going to be leaving this House as a result of reapportionment. We in New York have suffered more severely from reapportionment than any other State, losing five of our Members as a result of reapportionment, and the House will certainly be the loser as a result.

I have not always agreed with Mr. BINGHAM on some of the matters that have come before the House, but I certainly respect him and he has had a

distinguished career. I can remember at the end of World War II when we were coming back as veterans that he was instrumental in helping to reorganize political activity in New York City with a group of younger leaders. After that, he was an Ambassador to the United Nations.

Perhaps the most important job from the point of view of our association was his service as Secretary to Governor Harriman when Governor Harriman moved into the capitol in the State House in Albany in 1954.

Subsequent to that time, Mr. BINGHAM was elected to Congress in what was regarded as a kind of David and Goliath victory when he defeated the distinguished Charles Buckley of the Bronx and he has been a leading member of the Foreign Affairs Committee and a leader in the House since that time.

We certainly are going to miss him and also his very talented and remarkable wife, June. We want to wish all of them Godspeed.

Mr. ADDABBO. Mr. Speaker, I yield to the gentleman from New Jersey.

Mrs. FENWICK. Mr. Speaker, I thank my colleague for yielding.

I, too, would like to speak for a moment about JONATHAN BINGHAM of New York.

We use the word distinguished in this House quite frequently; but of whom can it be said more truly than of this man, whose motives never are questioned by anybody, no matter how one may disagree with him; a straight, an honorable, a high-minded and principled man.

I wanted very much to be on the Foreign Affairs Committee and I so longed to serve with such a person and it has been a fine experience. He is chairman of the subcommittee on which I serve and all of us there have learned to respect and admire him.

We lose people in this House and we cannot afford a loss like this. This is one of the few people that is a real ornament to the Congress of the United States and the House of Representatives.

This is somebody who speaks every day for what we all believe in; honest and courteous dissent. I have never heard him say something beneath the dignity of a human being of his quality.

I could go on, Mr. Speaker, but there are many who want to say another word and so I will only say to JONATHAN BINGHAM and June, Godspeed. You have served your country and all of us well.

Mr. ADDABBO. Mr. Speaker, I yield to the gentleman from New York (Mr. BIAGGI).

Mr. BIAGGI. Mr. Speaker, I thank the gentleman for yielding and commend him for his initiative in this special order for JONATHAN BINGHAM.

Mr. Speaker, I rise tonight to join with my colleagues in this special order paying tribute to our esteemed colleague and good friend JACK BINGHAM who is retiring after 18 years of exemplary service to the people of the Bronx and the Nation.

It is an especially personal experience for me to participate in this tribute tonight for throughout my 14 years in the Congress it has been my high privilege to have served alongside JACK BINGHAM. I say this both in the sense of serving together in the House—but also geographically for JACK and I represent neighboring districts in the Bronx. As a result JACK BINGHAM and I have worked on so many common initiatives it would be impossible to enumerate them in these remarks.

On this occasion we look fondly on all the good JACK BINGHAM has done in his congressional career. He is the consummate constituent service Congressman. He worked the various neighborhoods of his district helping people from all walks of life cope with the many problems that government can sometimes offer. As a result for the 18 years he served in the House his constituents were provided with the highest quality representation by JACK BINGHAM.

JACK will also be remembered as an effective and principled legislator. His service on both the Foreign Affairs and Interior and Insular Affairs Committees were both distinguished. He is responsible for some of the more progressive export legislation to be produced by Congress in the past several years. JACK is also a staunch supporter of Israel and for human rights around the world.

Yet—JACK may best be remembered for being the pioneer of a movement which has now become national in scope—the so-called nuclear freeze movement. JACK was one of the main authors of the resolution which narrowly was defeated in a vote last week in the House. He had been pointing to the dangers of the nuclear arms race for years—well before others were aware of the hazards. It was my pleasure to join JACK as a cosponsor of the nuclear freeze resolution and hopefully sometime in the near future, as a tribute to men like JACK BINGHAM we can begin to take the steps to reduce our nuclear arms.

JACK BINGHAM will retire from this House with a reputation of being a gentleman—a statesman—a man of high principle and integrity but one who knows how to get things done in Congress. He represents the epitome of what a Member of the House of Representatives should be. He has effectively blended a passion for serving the needs of his constituents with a desire to be an effective legislator. He has succeeded in both.

It was evident that JACK was destined to go into politics having been born into a political family. His father was the late Senator Hiram Bingham of Connecticut. JACK's effectiveness as a member of the Foreign Affairs Committee might have developed its origins from his stint as a reporter for the New York Herald Tribune covering beats in Europe, the U.S.S.R. and the Far East. JACK served with distinction in the military service having enlisted as a private and discharged as a captain in Military Intelligence. Prior to his election to Congress in 1964, JACK amassed an impressive record of public service on the city and State level and a period of service with the United Nations.

JACK BINGHAM was a good friend to me and I benefited from his wisdom and counsel. He set a standard which would be well for this House to maintain. He is a man of extraordinary competence, commitment, and compassion. He has distinguished the career of public service. He has given 18 years of quality work as a member of the House.

As JACK contemplates his retirement—all of his friends and colleagues hope that he will continue to speak out on issues of concern to him. His will be a voice of influence in the future especially with respect to disarmament. His family will no doubt cherish the additional time JACK can spend with them. I convey my warmest sentiments to his lovely and devoted wife June and his four children.

JACK BINGHAM is being honored tonight by those of us who have had the honor to serve with him. We have learned much from him and for that we are grateful. I wish my friend well in the future and hope that his future features good health and happiness and anything else he desires.

Mr. ADDABBO. Mr. Speaker, I yield to the gentleman from Maryland (Mr. BARNES).

Mr. BARNES. Mr. Speaker, I appreciate the opportunity to join in this tribute to our colleague, JACK BINGHAM.

As a relatively new Member of the House, I have not had the opportunity of serving with JACK during all or even most of his 18 years in this body. I have a different perspective—that of a new Member coming into the House, looking around, and trying to sense who is effective, who gets things done, who is respected by his peers in Congress and around Washington—who, in short, provides a model for a younger Member seeking to carve out his own role and his own style.

JACK BINGHAM is not a headline grabber. It takes some time to figure out who he is. But after a while, serving with him on the Committee on Foreign Affairs, you find yourself listening when he speaks. One of the reasons you listen when he speaks is that

he does not speak on every issue. He speaks when he has something to say—and when he does, you know that he has thought the issue through carefully, marshalled his facts, and is prepared to make a real contribution to the debate.

Another reason you listen is that he deals with the issues on their merits. JACK BINGHAM is a liberal Democrat and proud of it, but that does not mean that he has a knee-jerk reaction to the issues. JACK BINGHAM approaches each issue seeking to do what is right. He can be a loyal Democrat without being partisan about it; it seems like a contradiction in terms, but my colleagues know what I mean.

JACK BINGHAM is one of the true gentlemen of this House. He is a man of unquestioned integrity. He is unfailingly courteous, never raises his voice in anger, always conducts debate on a high level, never grandstands, never seeks to draw attention to himself, is always gracious both in victory and defeat.

For nearly two decades in Congress JACK has stood foursquare behind certain principles he believes must be followed in the interest of achieving a better world. Among these are the importance of arms control and international development. His name is associated with the "Bingham-Nelson" amendment to the Arms Export Control Act, which provides for a congressional veto to major arms sales, but his contributions to the annual foreign economic aid legislation have been equally important. One of the assets he has brought to the House is broad experience in the executive branch and, in this regard, his experience in the executive branch and, in this regard, his experience as an administrator of our foreign aid program in the 1950's has given him insights that have proven invaluable in the consideration of our foreign aid legislation. He has been a friend of the United Nations, where he also served before coming to Congress. And as all friends of Israel know, he has been a staunch defender of Israel throughout his career in Congress.

In 1975 JACK became chairman of the Subcommittee on International Trade and Commerce, later renamed the Subcommittee on International Economic Policy and Trade. In that capacity, he deepened and broadened his impact on policy. As chairman, he is best known as the author of the Nuclear Non-Proliferation Act, one of the most important pieces of legislation ever produced by the Foreign Affairs Committee. But perhaps not all my colleagues are aware of the other legislation that JACK authored, coauthored, or helped steer through the House: the Export Administration Act of 1979, which is a complete rewrite of the basic law governing U.S. export

policy; the antiboycott legislation, which prohibits U.S. complicity in the Arab boycott of Israel; the International Emergency Economic Powers Act, which provided the authority for the U.S. sanctions against Iran during the hostage crisis; the Deep Seabed Hard Mineral Resources Act, which provides a basis for what I hope will be eventual U.S. participation in cooperative efforts to mine the seabed; the export trading company legislation, which finally passed the House this year after years of effort.

I literally cannot imagine the Foreign Affairs Committee without JACK's voice of reason and compassion. Inescapably, the House will be diminished by his departure.

Fortunately, we know that JACK is not really headed for "retirement," but for a new stage in his career, in which he will continue to contribute to our country and to the causes he believes in. As he leaves, we wish him well, and we thank him for giving us the benefit for 18 years of his example of the highest standards of public service.

□ 2120

Mr. SOLARZ. Mr. Speaker, will the gentleman yield?

Mr. ADDABBO. I yield to the gentleman from New York.

Mr. SOLARZ. I thank the gentleman for yielding.

Mr. Speaker, I have been privileged to serve with JACK BINGHAM in the House for the last 8 years now, and I do not think there is another Member for whom I have more admiration or more affection.

Several of the other Members who have already spoken have talked to the question of JACK BINGHAM's character, his integrity, his intelligence, his decency. Everything that has been said about him in that regard is absolutely true, but I think there are some other things that can be said as well.

All of us, when we make the decisions that confront us in the Congress, try to decide what to do on the basis of what we think is in the best interests of the country. Most of us, of course, also take into consideration political factors which are important in determining whether or not we will be reelected.

I do not think there has been another Member of this institution who has more consistently decided the important issues confronting the Congress on the merits than JACK BINGHAM, and I think that is one of the reasons he enjoyed such widespread respect in this body, because people knew that when JACK BINGHAM spoke, he was not speaking simply on the basis of what his constituents wanted or what would help him to get reelected; but he was speaking on the basis of what he thought was in the best interests of this country.

All of us are going to remember JACK BINGHAM because of his character. We are all going to remember him because of the very special kind of person he was.

But JACK BINGHAM was one of a handful of Members who has really left his imprint on the laws of this land.

My good friend, the gentleman from Maryland (Mr. BARNES) has spoken about several of his achievements, and I would like to mention just a few more.

First, he was clearly one of the leading supporters of Israel in the U.S. Congress, and I say that as someone who not only cares very deeply, personally, about Israel, but who represents what may be the largest Jewish constituency in the country.

JACK BINGHAM was no fair-weather friend. In good times as well as bad, he was willing to speak up on behalf of an American policy that was sympathetic and supportive of the State of Israel, and the friends of Israel all over this country and the world are going to miss him sorely.

I remember in my first year in the House working very closely with JACK BINGHAM on the Arab antiboycott legislation which he was one of the key architects of, and if it were not for his efforts, I doubt that we ever would have passed that historic legislation.

JACK BINGHAM was also, as the gentleman from Maryland indicated, the chief author of the Nuclear Non-Proliferation Act, and I think that we all recognize that JACK BINGHAM carved out nuclear nonproliferation as a special area of expertise. When most of us looked for guidance on that issue, which may perhaps be more important than any other issue confronting our country and the world today, JACK BINGHAM was the Member we looked to because he devoted so much time to understanding the complexities of this question.

JACK BINGHAM was one of the leading supporters and sponsors of the freeze resolution which we debated and voted on just a week ago. While feelings in the House, obviously, ran very high on this question and sentiment was very closely divided, JACK BINGHAM's willingness to take the leadership on this question and the fact that so many Members looked to him for guidance on the issue is once again a tribute to the impact he had on the House.

I do not know how many remember back in 1975 when JACK BINGHAM, as a member of the Steering and Policy Committee, insisted that there be a closed ballot on the question of whom to recommend for committee chairmanships to the Democratic Caucus. It was as a result of his efforts at that time that the complete grip of the seniority system in terms of determining committee chairmanships in the

House was broken. Not every Member may have appreciated his efforts at that time, but I think the great majority of us now recognize that the House is a more open institution and that it is easier for Members to have an impact on what goes on here as a result of his efforts.

Of course, as the gentleman from Maryland mentioned, JACK BINGHAM was the author of the legislation which gave the Congress for the first time the right to disapprove the sale of arms to other countries, thereby significantly enhancing our ability to have an impact on foreign policy.

So, JACK BINGHAM has really left his imprint on this institution. I suspect if the definitive history of this institution is ever written, JACK BINGHAM will rank extraordinarily high on the list of those Members who have emerged from the anonymity of the mass who have served here over the centuries as one of a handful who really made a difference.

I personally will miss him a good deal, not only because he has become a very good friend, not only because he was the one who first strongly suggested that I ask to serve on the Foreign Affairs Committee, which has given me opportunities that I never would have thought I might have enjoyed as a Member of this House, but also for one very special reason. Unlike my very good friend from New York (Mr. STRATTON) the dean of our delegation, who indicated that from time to time he disagreed with Mr. BINGHAM, I have to say that almost invariably I agreed with him. The reason I will miss him is that whenever we have a rollcall, I come in usually through those doors facing the Longworth Building, and the first thing I do when I come up is look on the scoreboard over there under the B's to see how Mr. BINGHAM, the gentleman from New York, has voted. And I find that almost invariably his judgment on the issue before us is very similar to my own.

When I am not really sure about what to do, but I have to make a decision because time is running out, if I see a green light next to the gentleman from New York, I will probably vote yes, and if I see a red light, I will vote no, completely confident that that vote is a vote which will have been cast in the best interests of this Nation.

So I just want to say in conclusion that I consider myself truly privileged to have been able to work with JACK BINGHAM. He will always be an inspiration to me.

Mr. WOLPE. Mr. Speaker, will the gentleman yield?

Mr. ADDABBO. I yield to the gentleman from Michigan.

Mr. WOLPE. I thank the gentleman for yielding.

I want to thank the gentleman in the well for taking a special order this evening to provide all of us an opportunity to express, however briefly, the enormous meaning that JACK BINGHAM has had for each of us during our time that we have served in this body.

When I arrived in the Congress a few years ago and was appointed to the Foreign Affairs Committee, I began to consult with a number of my new colleagues on the committee with respect to my subcommittee assignments. Almost unanimously, I was urged to seek appointment to the Subcommittee on International Trade and Economic Policy, not so much because of the subject matter that fell within the jurisdiction of that subcommittee, but because of the opportunity it would provide for me to work under the chairmanship of JACK BINGHAM.

I must say that there is no decision that I have regretted less than the one to seek membership on that subcommittee.

□ 2130

During the past 3½ years that I have worked with JACK BINGHAM on that committee, I have learned from him and I have been inspired by him. I have tried to think through, as I have heard the listing of all of the various accomplishments with which his name has been associated in previous remarks this evening, for a common theme that I think runs through all of JACK BINGHAM's work and all of his service to the Nation. I think that fundamentally it is his sense of vision, that he sees a world that ultimately can and must be governed on the basis of mutual respect, a world in which we can each recognize the common humanity that we all share independent of race or color, nationality, ethnic origin, or what have you.

He applies to every one of the legislative initiatives he has undertaken within this body over the past several years that very deep respect for humanity. I think it infuses all of his work and all of his contributions. I think it is that, fundamentally, that has touched each and every one of us.

JACK BINGHAM will be missed by the Congress. His voice, I think, will be missed by the entire Nation, but I know that he will remain active; he will remain involved, and we will continue to hear from him in many other ways as he continues his public service.

I will personally miss JACK BINGHAM. It has been for me one of the greatest privileges of my service in the Congress to have been able to serve with him on the Foreign Affairs Committee.

Mr. ADDABBO. Mr. Speaker, I yield to the gentleman from Minnesota (Mr. FRENZEL).

Mr. FRENZEL. Mr. Speaker, I thank the gentleman for yielding, and I

thank him for taking this time. I am sort of a casual visitor; I did not know it was the gentleman's intention to do this tonight, but I thank him for doing it.

Unlike the distinguished gentleman from New York (Mr. SOLARZ) I use Mr. BINGHAM's voting record as a benchmark too, but to vote in exactly the opposite way. Nevertheless, I want to join the colleagues bemoaning the departure of the distinguished gentleman from New York, the Honorable JONATHAN BINGHAM, from this august body.

JACK BINGHAM is as described by the previous speakers, a man of decency, a man of humanity, a man of thoughtfulness, and a man of consistency. People on this side of the aisle as well as those of his own good friends in the Democratic Party can recognize those qualities and be impressed by them, and I have never ceased to be impressed by JACK BINGHAM since I first came to the Congress.

He was a man who understood the role of this great country and the position and stature of this great country in our international community. He particularly understood the trade relationships of this country and the position which it should hold. And that was where I knew him best, and I must say that in the bills that JACK brought before this body, in every case they were better as he brought them out of committee than this body sent them on to other disposition.

I hate to see him go. I think the Congress needs JACK BINGHAM's, and I wish that he would stay. On the other hand, I never second-guess a Member's decision. I know that JACK and June are only graduating to some other good purpose and good goal in life, and I know that they will be very useful and that they will be as effective in other roles as they have been in Congress. I wish them the very best, and I thank them for the inspiration and example that they have provided for this House and for me personally.

Mr. ADDABBO. Mr. Speaker, I yield to the gentleman from New York (Mr. McHUGH).

Mr. McHUGH. Mr. Speaker, I thank my friend for yielding, and especially for the opportunity he has given all of us to express our great respect for JACK BINGHAM and his wife, June.

Long before I was elected to Congress I admired JONATHAN BINGHAM from afar. I was a resident of New York City at one time. At that time, as well as subsequent to my move to upstate New York, I followed JONATHAN BINGHAM career with admiration. I found that not only agreed with most of his votes in Congress, but that he always issued thoughtfully and in a way which ennobled politics and public service. That was no small accomplishment in an age when people were

often skeptical and even cynical about public service and politicians.

Since I was elected to Congress I have gotten to know, JACK personally as a colleague, as a friend, and as a fine example to each of us who serves in the Congress of the United States. In an institution which imposes incredible pressures for self-advancement, JACK BINGHAM has always been self-effacing. In an institution which imposes incredible pressures for coping with the demands and crises of the moment, JACK BINGHAM has always had vision. In an institution which imposes incredible pressures to advance simple nostrums to complicated problems, JACK BINGHAM has been thorough and thoughtful. In these and many other ways JACK BINGHAM has made major contributions to the country, but also to those of us who have worked with and served with him here.

So, it is with mixed emotions that I join with my friends and colleagues in expressing appreciation to JACK for his years of outstanding public service. While cherishing my association with him here, and regretting to see him retire, we know that he and June have earned some respite from the pressures of this frenetic life. We also know this period represents a transition for JACK and June into another productive phase of their lives.

JACK BINGHAM has more energy and resourcefulness at his age than most of us do who are years younger, and we will continue to look to JACK for good example, for the vision and thoroughness and thoughtfulness he has demonstrated to us here.

Again, I want to thank the gentleman from New York for giving us the opportunity to say these few words on behalf of JACK BINGHAM and his wife, June.

Mr. ADDABBO. Mr. Speaker, I yield to the gentleman from Florida (Mr. FASCELL).

Mr. FASCELL. Mr. Speaker, I thank the gentleman for yielding, and I appreciate his taking this time and giving me an opportunity also to express myself about JACK BINGHAM and his wife June as they leave the congressional Halls and as they embark on other things.

Mr. Speaker, if I were to choose a man who needed to be quiet but forceful, incisive but restrained, of unquestioned integrity but capable of forging compromise, JACK BINGHAM is the man I would turn to.

Having served with JACK for 18 years—most of those shared on the House Foreign Affairs Committee—I have known him to be an individual of remarkable intellectual courage and commitment. When he first arrived here in 1965, I remember being struck by this quiet man from New York whose diplomatic bearing and

thoughtful comments captured my attention, almost by surprise.

But over these past years, I have discovered that I never regretted the time I spent in considering JACK's comments and points of view. Whether the topic be human rights and the need for U.S. policy to reflect our sense of social justice or the need to toughen the House Code of Ethics or the need to reevaluate our nuclear energy policies, JACK has established himself as a voice of reason and intellect.

By taking part in this special order to pay tribute to the gentleman from the 22d District of New York, I salute JACK BINGHAM as committee member, a respected colleague and a valued friend whose counsel and advice I will miss. My best wishes to JACK and June BINGHAM as they undertake new adventures.

□ 2140

Mr. GILMAN. Mr. Speaker, will the gentleman yield?

Mr. ADDABBO. I yield to the gentleman from New York (Mr. GILMAN).

Mr. GILMAN. Mr. Speaker, I rise to thank my colleague, the gentleman from New York (Mr. ADDABBO) for arranging this special order, and for the purpose of joining in this tribute to our dear friend, and colleague, the gentleman from New York, JONATHAN BINGHAM.

Mr. Speaker, the redistricting process has dealt many of us from New York blows of various kinds, but I know that we all felt a real sense of loss to learn that Congressman BINGHAM had decided to retire from the House.

JACK BINGHAM came to the House after a distinguished career in public service and at the bar. Besides his 18 years of service in the House of Representatives, he was a journalist, an author, an assistant to a Governor and a secretary of state, and a captain in military intelligence in World War II.

JACK defeated an entrenched incumbent, in a rough primary to gain the privilege of serving in the House. Ever since, he has worked tirelessly to further the welfare of his constituents and to guide our House Foreign Affairs Committee through many a crisis.

JACK's experience in international affairs and military intelligence led him, perhaps inevitably, to serve on the Committee on Foreign Affairs. When I joined the Foreign Affairs Committee, years later, I often looked to him for guidance. We serve together on the Subcommittee on International Economic Policy, where he is my distinguished chairman. We may disagree on some issues, as is natural, but I can tell the Members that no one's voice is more carefully listened to than his.

Some of our earlier speakers have alluded to JACK's devotion to the cause

of peace in the Middle East. He is truly a man of peace, a devotee of peace, a true statesman. He has worked tirelessly to strengthen the ties between this Nation and the State of Israel. Through good times and bad in that relationship, he has taken a stand of constructive action in every respect.

I will miss JACK BINGHAM's presence in our deliberations and activities in connection with the affairs of our State, and I should also allude to his work on his other committee, the Committee on Interior and Insular Affairs, where I know he has been a voice of reason and a voice in favor of preservation of natural resources. The work of that committee does not serve too many accolades for the Members from the East who serve on it. But geographic balance is important, and JACK has served all of us well by keeping an eagle eye on the activities of the Interior Department, sometimes called the Department of the West.

To JACK, and his devoted spouse, June, go our sincere best wishes for good health and happiness in all your future endeavors. This body will miss you.

Mr. WEISS. Mr. Speaker, will the gentleman yield?

Mr. ADDABBO. I yield to the gentleman from New York.

Mr. WEISS. I thank the gentleman for yielding to me and I want to thank him at the outset for arranging this special order to honor our colleague, JACK BINGHAM.

I know that my regret at JACK BINGHAM's retirement is shared by Members on both sides of the aisle. This legislative body at all times and perhaps especially now needs Members with the ability, integrity, and wisdom that have marked JACK's 18-year congressional career.

Of a career filled with many outstanding achievements, I want to touch on just one, his impressive record of leadership on issues concerning international peace.

In 1967 he was 1 of only 18 Members who voted to stop the bombing of North Vietnam. Two years later he was the principal House sponsor for the McGovern-Hatfield bill to end the war.

He began his work to curb nuclear proliferation in the 1970's. He wrote and sponsored comprehensive legislation to place strict control on nuclear exports. He guided the bill through the House and it was enacted in 1978.

This year he has led efforts to strengthen the 1978 legislation on nuclear exports.

He also has been a leader, as we know, and an original sponsor in support of an immediate bilateral nuclear freeze. I chose to highlight his work on nuclear nonproliferation not only because of its overriding importance as an issue, but also because it reveals his

dedication. It is a highly technical and complex issue requiring a mastery of detail.

He does not always get the public recognition he deserves for his work because his style is to work cooperatively and behind the scenes, often without concern for the public fanfare.

On a personal level, I shall always be grateful to JACK BINGHAM for his selfless conduct in this year's reapportionment and redistricting struggles. Last May when the New York State Legislature drew lines in a situation which under the best of circumstances would have been difficult, because five of our Members were going to have to be cut out of districts, the size of our delegation being reduced, JACK, in the most selfless political action that I know of, when he and I were thrown into a district combining our mutual districts, indicated that since he and I had no issue differences, although he would prefer staying in the House, he would not run against someone with whom he had no issue differences.

That was a remarkable act and he accompanied it with a remarkable statement.

The most remarkable thing about it though was that as I went throughout the district, both in the Riverdale area where JACK and June had lived and do live, and throughout the other parts of my district, indeed throughout the city, people who had read that statement came up to me and said, "Isn't that just like JACK BINGHAM. He really demonstrated the tremendous class that we know he has always had."

People were not surprised. They expected of JACK always and got always the very, very finest.

In an era when public regard for Congress has reached an all time low, Members like JACK BINGHAM should receive national acclaim. His constituents have always recognized his excellence.

Since he was first elected in 1964, they have repeatedly voted overwhelmingly to return him to Congress.

The work he has done in Congress will continue to affect Americans across the country and people throughout the world. I will miss him, for he is a thoughtful legislator and an effective leader as well as a good friend. I will be proudest of the fact that as I remain here he and June will continue to be my constituents.

Mr. SHAMANSKY. Mr. Speaker, will the gentleman yield?

Mr. ADDABBO. I yield to the gentleman from Ohio.

Mr. SHAMANSKY. Mr. Speaker, I wish to precede my remarks by thanking the gentleman from New York for arranging this evening.

Mr. Speaker, I rise to pay tribute to our esteemed colleague from New

York, Representative JONATHAN BINGHAM.

JACK BINGHAM's retirement at the end of this Congress, after 18 years of service to the people of his 22d District and the Nation will cost this House not only a knowledgeable, skillful legislator, but a true gentleman as well.

I must at this point say that I am a 55-year-old freshman. That means that I have been around a lot as a businessman and as a business lawyer. I have had a chance to evaluate many people. I can tell you that the impact of JACK BINGHAM upon anyone who first comes upon him is very great. He is a good and rational man, a man of integrity, and to me those are the hallmarks of a leader.

□ 2150

As a lawyer, a journalist, an officer in military intelligence, a diplomat, administrator, author and Member of Congress, JACK BINGHAM's career has, in effect, defined the American ideal of public service.

His father, Senator Hiram Bingham, provided an outstanding example of one who understands civic duty and leadership. JACK BINGHAM followed and extended that example.

It has been my pleasure to serve on the Foreign Affairs Subcommittee on Economic Policy and Trade, which JACK BINGHAM ably and thoughtfully chairs. His leadership last fall of our subcommittee trip to six countries, including Saudi Arabia, proved invaluable.

At this point I would like to mention that on that trip I got to know June Bingham, and it is a delight to see a couple who genuinely like each other. Especially was I amused when I heard June Bingham refer to her husband as "Bingham," and I thought that was fun.

His commitment to strong American-Israeli relationships highlights his understanding and support of America's democratic allies around the world. JACK BINGHAM's exemplary service in Congress and his many contributions to this country stand as an inspiration to all of us. He has earned the thanks and gratitude and best wishes of his colleagues and countrymen.

Mrs. BOGGS. Mr. Speaker, will the gentleman yield?

Mr. ADDABBO. I yield to the gentleman from Louisiana.

Mrs. BOGGS. I thank the gentleman for yielding, and I thank him so much for taking this opportunity and allowing us the opportunity of being able to pay tribute to our colleague, JACK BINGHAM.

JACK BINGHAM comes from a long tradition of service to our country, and he has accepted his inheritance with such fervor and with such good humor. He has always been associated with everything that is best in this

country and in this body. He has been associated throughout his career first with reporting the news and then making the news and being able to be with the people who meant so much to all of us, being associated with Averell Harriman in New York in State government, being associated with Adlai Stevenson in the United Nations and international government, and then coming to the U.S. Congress in the great 89th Congress and being associated with so many exciting and wonderful people and ideas that really pushed this country forward.

But most of all, he has had a continuing association with an American of such dedication and who has such a beautiful way of sensitively interpreting service of others, not only of others of this country, but leaders of the world—June Bingham; and that, to me, means that together they have not only accepted all of the aspects of their own tradition, but have left their own legacy to this House, to this Nation and to generations to come.

Mr. PEASE. Mr. Speaker, will the gentleman yield?

Mr. ADDABBO. I yield to the gentleman from Ohio.

Mr. PEASE. I thank my colleague, the gentleman from New York, for yielding and for organizing this special order.

I know the hour is late so I shall not be long. But I did want to pay tribute to our retiring colleague, JACK BINGHAM.

When I first came to Congress 6 years ago, I asked to be appointed to the Foreign Affairs Committee. In trying to select which subcommittees to seek, I looked more at the subcommittee chairman in each case than really I did the subject matter. Frankly, I selected the Economic Policy Subcommittee specifically because of the reputation of JACK BINGHAM. I must say that in serving on that subcommittee for 4 years I was never once disappointed in my selection.

As a subcommittee chairman, JACK brought to the workings of the Economic Policy Subcommittee something which most Members of Congress cannot, and that is a superb background to serve as a framework within which to fit the pieces of legislation which came before us. Adding strength to that background was his natural capacity and penchant for scholarship, a thoughtful approach to legislating. He was on that subcommittee a voice of reason, very much respectful of facts. Beyond that, he was a careful craftsman. Any bill which went out of our subcommittee was well drafted and we need not have worried about that.

Finally, I think he was always consistent through one administration after another in fashioning policy and in standing for policy, which makes sense for the people of America.

In the full committee, it was really more of the same. I viewed him as a very valuable colleague on the full committee because he brought the same qualities of his work at the committee level. As others have said, he was and is a gentle person but not soft in any respect. He is a person of genuine conviction and determination, and his strength comes from that determination and conviction. Without question, he was a leader on the committee, although certainly not a self-proclaimed one. Having JACK BINGHAM on your side on any controversy within the Foreign Affairs Committee was worth a great deal, not only for his legislative skill, but also for the respect which all members of the committee had for any position that he arrived at.

I think that that respect showed up in the committee and also on the floor in connection with the nuclear freeze resolution which we discussed just last week.

Lastly, I would like to say that I have valued JACK BINGHAM as an example, certainly as an example which I have tried in some small measure to follow, an example which I know he has set for many, many other newer Members of Congress. As I said, he is a true gentleman, a gentle person, self-effacing, genuine, an example of the ability of Members of Congress to be successful without bombast. His commitment to facts, to logic, to reason, and to reasonableness has been a beacon for many, many younger Members of Congress, although probably not enough of them have told him of that fact.

Mr. Speaker, Members come and Members go from this Chamber. I am sure that as JACK BINGHAM retires and goes on his way, others of us will serve as examples for the new Members of Congress yet to come. All I can say is that if we serve as good examples, it will be very largely because we have had the example of JACK BINGHAM to go before. But I am not at all confident, in fact I am quite confident to the contrary, that we will be able to measure up in any significant respect at all as examples of other Members of Congress. Because JACK BINGHAM really is a unique person, it is unlikely that there will be in years to come many new Members who bring to this body the background and the intelligence, the innate good sense and decency which JACK BINGHAM has imparted to us over his many years in Congress.

In closing, I, too, would like to call attention and pay tribute to the contributions made by the team of Bingham and Bingham. June Bingham and JACK BINGHAM have been a team in Congress in Washington for a long time. This is truly a case where they have made a joint contribution.

Again, I thank the gentleman from New York for giving me this opportunity.

● **Mr. BOLAND.** Mr. Speaker, I would like to thank my good friend from New York, **JOE ADDABO**, for arranging this special order in honor of one distinguished and very deserving colleague, **JONATHAN "JACK" BINGHAM**.

In his 19 years as a Member of Congress, Jack has displayed with perseverance and integrity, his deep devotion to the democratic principles which have made this Nation great. Through his many achievements as a scholar and author, a civic leader, as well as his dedicated service in many various government positions before coming to Congress, Jack has enhanced this body with excellence.

As a member of the House Foreign Affairs Committee where he is chairman of the Subcommittee on International Economic Policy and Trade, a member of the Subcommittee on International Security, and a member of the Commission on Security and Cooperation in Europe, Jack has revealed a deep concern for the development of sound U.S. foreign policies. His most recent concerns in this area were evidenced by his introduction of House Joint Resolution 521, calling for a nuclear weapons freeze, approval of the SALT II Treaty and substantial reductions in nuclear weapons. His work on the nuclear freeze resolution both echoed the cries of the public for a solution to the problem of nuclear weapons buildup and opened the eyes of many legislators at home and abroad to the need for an adequate solution to one of the most significant problems of our times.

We are indeed fortunate to have had the pleasure of working alongside this great statesman from New York. I know that his departure from the House does not mark the end of his career of public service. It merely marks a change of forum. I want to join in saying farewell to a fine man and an honorable and distinguished colleague.●

● **Mr. ROSENTHAL.** Mr. Speaker, during the 20 years that I have had the privilege to sit in this Chamber, I have served with many colleagues whom I have come to admire. But in all my years, I can think of no one who I have respected and trusted more than **JACK BINGHAM**. Rarely, do we in Congress have the honor to pay tribute to as distinguished a man as my longtime friend and colleague from New York.

Jack is a very special colleague of mine. Over the years that we have served together in the House, Jack has become a trusted friend and adviser; a person with whom I could always turn to for a sincere, thoughtful, and well-reasoned viewpoint on the often difficult issues which we must all grapple with in these Chambers. We all have

had the opportunity to view Jack's abilities as a legislator: his eloquence, his passionate dedication, his unyielding stamina, his leadership, and his knowledge of the issues. These are the essential qualities for an effective legislator and with them, Jack has become the quintessential legislator, accomplishing goals that few among us could come close to.

But Jack's distinction as a Member of Congress goes beyond his many legislative accomplishments. It is his style that marks his greatness.

During the years that I have served with Jack on the Foreign Affairs Committee, I have been witness to his ability to get things done in a style that contributes to his effectiveness. Quietly, without fanfare, he has staked out a position as a leader for a sane, rational foreign policy: a policy based on diplomacy over militarism, cooperation over confrontation, peace over war. And during his 19-year career he has helped to make these ideals a very real part of our policy.

With Jack's retirement from the House—a retirement due to the quirks of political redistricting, not a weakening of stamina—there will be one less voice to articulate these ideals, one less leader for us to work with, and one less friend for us to admire. I will miss him.●

● **Mr. RODINO.** Mr. Speaker, I want to join all my colleagues in paying tribute to one of the most respected Members of Congress, **JONATHAN BINGHAM**, who is retiring at the end of this term.

The House will greatly miss **JACK BINGHAM** for many reasons. As a friend, I will miss his sharp wit and his intelligent and thoughtful advice on foreign policy issues. The House will especially feel the loss of his expertise on the Foreign Affairs Committee, where, as chairman of the Subcommittee on International Economic and Trade Policy, **JACK BINGHAM** has been an outspoken leader for a more enlightened and forward-looking foreign policy. His deep commitment to the cause of human rights at home and abroad has had a substantial impact on our country's policies. He was in the forefront of opposition to the Vietnam war and he has worked tirelessly for social programs to benefit the poor and minority members of society. His dedication to principle has led him into many battles in his 17 year congressional career, and I have been proud to stand with Jack in many of those fights. I believe his early work to enact effective handgun control measures and a nuclear weapons freeze will bear fruit one day—and we will have **JACK BINGHAM** to thank for pushing these issues to the public forum.

The devotion that **JACK BINGHAM** has shown to helping the citizens of New York and to preserving the best interests of our Nation stands as a shining

example to all those who aspire to public office.

I will miss the wise counsel of my friend from New York. He has brought a great deal of dignity to this House, and we all owe him a debt of gratitude. I am proud to serve with him, and I wish him all the best in the future.●

● **Mr. RANGEL.** I am proud to take part in the special order honoring my distinguished friend and colleague from New York, the honorable **JONATHAN BINGHAM**.

This outstanding legislator has ably represented his Bronx district for the past 18 years, gaining widespread respect for his ability, leadership and acumen here in Washington and at home in New York.

Mr. BINGHAM's work on the House Foreign Affairs Committee has been exemplary. His patience and his knowledge have won the admiration of his colleagues countless times. And his leadership on the International Policy and Trade Subcommittee has fostered an extremely positive influence on American trade policy.

There is no doubt that **JONATHAN BINGHAM** has been one of the House's finest gentlemen. We will sorely miss this great public servant.●

● **Mr. OBERSTAR.** Mr. Speaker, the presence of **JONATHAN BINGHAM** as a Member of this House has enhanced the reputation of this body. When one hears the name of **JACK BINGHAM**, one immediately thinks of integrity, intelligence, and a fierce commitment to progressive domestic and foreign policies.

As a Member deeply concerned about peace and nuclear proliferation, I have personally felt more secure in the course that this House would take because of the presence of **JONATHAN BINGHAM** on the House Affairs Committee.

As I have worked in this House to protect those programs necessary to the very existence of some of the neediest Americans, as I have fought for a progressive, honest tax system, I have regarded **JACK BINGHAM** as an ally and a friend, as I know so many Members have.

He has been a leader in the nuclear arms control debate, a champion of human rights as a basis for U.S. foreign policy, an articulate spokesman for a sane, responsible defense budget, based on legitimate security considerations, and not on wild pursuit of costly, unnecessary and unworkable technologies. As a Member of the House Interior, **JACK BINGHAM** has been relentless in his defense of the environment.

He has tirelessly and effectively represented the people of New York. They have been fortunate to have had him.

JACK BINGHAM leaves this body having earned the respect of his col-

leagues. There are too few like him, and his loss will be felt.●

● Mr. CONTE. Mr. Speaker, it is with a deep sense of regret that I rise to note the retirement of one of this body's most intelligent, respected, and forward-thinking Members, JONATHAN BINGHAM.

In his 17 years in the U.S. House, JACK has established the reputation as the conscience of the Congress in both domestic and international affairs. His compassion for those in need and commitment to the principles of justice have made his record in this body one that many of us could only aspire to attain.

Although JACK has represented areas in and around New York during his tenure in the House, he has always displayed the finest attributes of a Yankee gentleman. Soft-spoken, thoughtful, and gentlemanly, he has always given all sides a fair hearing, but has pursued his chosen course of action with dogged enthusiasm and unrelenting passion.

While JACK and I have worked together on many issues in the past, I consider myself most fortunate to have been shoulder to shoulder with him on one of his last and most important legislative pursuits, our nuclear freeze resolution. As the chief architect of this resolution, JACK's concerns were based on an overriding responsibility for our children and the hope that they be spared the devastation that would certainly result from a continuing, senseless pursuit of super-bomb superiority.

It is on issues like these where we will most miss JACK in the future—issues that demand both compassion and sensibility, qualities that JACK possesses in abundance. His friendship has meant a great deal to me through the years, and I wish him and his lovely wife June luck and Godspeed in whatever path they choose in the future.●

● Mr. SCHEUER. Mr. Speaker, I take great pleasure in joining with the many distinguished Members of this House today in paying tribute to one of our most illustrious colleagues, the gentleman from New York (Mr. BINGHAM).

I must, in candor, Mr. Speaker, admit to some mixed feelings as we gather to review his career, which is so distinguished by his intellectual achievements and his universally recognized and respected integrity. I say mixed feelings because it saddens me that we will be losing him as a force and a presence in this House.

JONATHAN BINGHAM has left his mark in the course of his 18-years of service to the people of New York. His record of service has earned him the warmth and affection of his constituents, his city and his State. Mr. Speaker, his record has also earned him the admira-

tion and appreciation of his colleagues and his country.

Mr. Speaker, I have had the great privilege of knowing Mr. BINGHAM and watching him in action from his days as a courageous reform-minded progressive in the late fifties and early sixties. Our paths have twined and intertwined on more than one occasion. It is from this wellspring that my esteem has grown over the years.

Anyone seeking to highlight the major milestones of his career is surely faced with an embarrassment of riches.

From his early days working with former New York Governor Averell Harriman and then U.N. Ambassador Adlai Stevenson, JACK BINGHAM became a leader in the reform movement that swept New York City in that turbulent decade of the sixties.

Representative JONATHAN BINGHAM has been a reasoned, often eloquent voice in this House on matters relating to the foreign policy of the United States. JACK BINGHAM stood in the well of this House raising his voice for a rational, human rights oriented foreign policy in the days before this was a totally acceptable form of behavior. His voice was heard early in opposition to the war in Vietnam. And he has been a respected advocate of gun control from his first days in the House. Civil rights found an impassioned champion in the gentleman from New York. And more recently his sense of justice found him a key manager in the efforts to establish a freeze on nuclear weapons.

Yes, Mr. Speaker, there are many points in JACK BINGHAM's career that deserve our attention. But perhaps the most enduring monument to his service among us is one which came at the midpoint of his distinguished tenure.

In 1974 he led a movement that has had a most profound effect on this body. He authored a reform of the Seniority system in the selection of Committee chairmen. To us today it seems eminently logical that chairmanships should be awarded on the basis of individual votes, but a decade ago this was regarded as heresy. It is to JACK BINGHAM's credit, and the ultimate benefit of our democratic system, that he ignored conventional thinking and proceeded to do what he thought was the right and honorable thing. He was right in 1974 and the results over the past decade stand as a secure monument to his career.

I am confident that JACK's retirement from active membership in this House will not signal an end to his active contributions to government. We will all welcome the opportunity to avail ourselves of his wise counsel in the years ahead.●

● Mr. MITCHELL of New York. Mr. Speaker, I wish to add my voice to those who have risen today to honor the Honorable JONATHAN B. BINGHAM.

At the end of this session of Congress, JACK BINGHAM will complete his ninth term in the House of Representatives. His 18 years of service have been a distinguished, productive tenure.

JACK is a thoughtful, effective legislator who has certainly left his mark—on the institutional operations of the House of Representatives and the Nation as a whole.

Although he and I have frequently differed on matters of political philosophy, I have always found JACK BINGHAM to be a man of the highest personal integrity. I am proud to have had the opportunity to serve with him as a member of the New York delegation. I know that his colleagues and his constituents will miss his diligent and effective service.●

● Mr. ZEFERETTI. Mr. Speaker, I rise to join in paying tribute to my New York friend and colleague, JONATHAN BINGHAM.

JONATHAN BINGHAM has managed to combine longevity with youthfulness, wisdom with exuberance, and good fortune with an extraordinary sense of public responsibility. Before his exemplary nine-term service in this great body, JONATHAN BINGHAM served his Nation in a variety of foreign service posts under Presidents Truman, Kennedy, and Johnson.

Nevertheless, he will be remembered first and foremost for his leadership in the House of Representatives. In addition to his forceful advocacy and leadership in formulating policy relevant to the Foreign Affairs and Interior Committees, JONATHAN BINGHAM was in the forefront of the successful fight a decade ago to reform the seniority system.

Generations of Americans will remember JONATHAN BINGHAM for his crucial role in preventing both military and civilian modes of nuclear proliferation. As the author of the congressional resolution advancing a mutual and verifiable freeze on nuclear weapons among superpowers, JONATHAN BINGHAM has become the leading advocate of the most critical issue of this generation.

The leadership of JONATHAN BINGHAM will be sorely missed in the 98th Congress. In paying tribute to this fine friend and gentleman, I want to add my personal best wishes for continued health and happiness in the years ahead.●

● Mr. MINETA. Mr. Speaker, I would like to join in this occasion to honor a distinguished colleague and a dedicated public servant, JONATHAN BINGHAM. In his 18 years of service in the House of Representatives, Mr. BINGHAM has earned wide respect among his colleagues and constituents by speaking out with a strong and steady voice for his convictions. Throughout his long career, he has consistently sought solutions to difficult problems with an

admirable sense of fairness and decency. A man who stands quietly but firmly for his principles. Mr. BINGHAM has been a model for us all.

JONATHAN BINGHAM has served a vital role in the area of foreign affairs, where, like a beacon, he guided many of us in the direction he believed was right. Long before such issues were fashionable, he worked to bring the United States back from the brink of nuclear Armageddon through a nuclear freeze and mutual arms reductions. He has long stood out as a champion of human rights and a clean and safe environment.

It is with great regret that we commemorate his intended retirement today, but I wish Mr. BINGHAM the best in any endeavor he may pursue in the future. I know I speak of all Members in thanking Mr. BINGHAM for his years of wisdom and unselfishness, which have given him such a proud history of service in this House.

● Mr. NOWAK. Mr. Speaker, it is a pleasure to join my colleagues in paying tribute to my good friend, Representative JONATHAN BINGHAM, who is completing 18 years' service in the House of Representatives from the Empire State. Mr. BINGHAM recently announced his plans to retire from the House at the completion of the 97th Congress. I would like to salute the Congressman's outstanding record of commitment and service.

Mr. BINGHAM serves on the House Foreign Affairs Committee where he is chairman of the Subcommittee on International Economic Policy and Trade and a member of the Subcommittee on International Security. He is a member of the House Interior and Insular Affairs Committee, with assignments on the Subcommittees on Energy and the Environment, and National Parks and Insular Affairs. He is also a member of the Commission on Security and Cooperation in Europe, which monitors the Helsinki accords, and serves on the steering committee of the Northeast-Midwest Congressional Coalition.

Aside from Congressman BINGHAM's accomplishments as a legislator, he has distinguished himself in other professions such as the law, journalism, the military, and diplomacy. A graduate of Yale College, Phi Beta Kappa 1936, and Yale Law School, Mr. BINGHAM was an occasional correspondent to the New York Herald Tribune from Europe, the U.S.S.R., and the Far East. He was admitted to the New York bar in 1940 where he practiced law at various times and was a member of the Judiciary Committee of New York's City Bar Association.

Mr. BINGHAM's military service was marked by his promotion to Captain of Military Intelligence during World War II.

Our colleague's diplomatic career was an eminent one. He served as:

Deputy Administrator of the Point 4 Program under President Truman, assistant director, Office of International Security Affairs 1951; President of the United Nations Trusteeship Council 1961; U.S. representative on the Economic and Social Council of the United Nations with rank of Ambassador and as principal adviser to Ambassador Adlai E. Stevenson in economic and social affairs, 1963-64.

Congressman BINGHAM's service in the military, diplomatic corp, and as an elected public official has been distinguished by sustained commitment and excellence in the public service of his country.

I would like to extend my best wishes to JONATHAN BINGHAM as he reaches a new milestone in his life. May the future bring him continued success and happiness. He will be sorely missed.

● Mr. RICHMOND. Mr. Speaker, today we honor our colleague, JACK BINGHAM, who has announced his retirement from this House after nine terms of brilliant, dedicated, and effective service to his constituents and the people of the United States.

JACK BINGHAM is a true and conscientious liberal, a great humanitarian, a warm and sensitive individual, a dear and reliable friend and, certainly, one of the most highly respected Members of Congress.

Always at the forefront of legislative efforts to help the poor and downtrodden, JACK has consistently demonstrated how deeply he cares about people. Just last week, JACK spearheaded the effort to gain House approval of the resolution calling for a mutual, verifiable freeze of nuclear weapons—one more of his many actions over the years to reduce the threats to humankind posed by nuclear power.

Through the years that he has served in the House, JACK has been an outspoken foe of rightwing dictatorships, and a great friend of the state of Israel. JACK BINGHAM will long be remembered in this House as an expert in all matters of foreign policy and he ends his congressional career as the chairman of the Foreign Affairs Subcommittee on International Economic Policy and Trade.

Mr. Speaker, as he closes out a most distinguished career in Congress, JACK BINGHAM leaves an enviable record of effectiveness and caring. Of our respected colleague, it can truly be said that he has not an enemy in the world. JACK, we will miss you.

● Mr. YATES. Mr. Speaker, JONATHAN BINGHAM is a dear, dear friend, and I love him. His decision to retire from the House after this Congress saddens me greatly and I can only say that there is no one who I will miss more than this wonderful man from New York. JACK and I have worked together on many things over the years and from the very beginning his wisdom,

courage, and bright good humor impressed me, and they still do. The world needs more people like JACK BINGHAM. He is everything a public man should be and I hope very much that his public career will not end with this Congress, and I have a feeling that it will not. But regardless of where the future leads, Addie and I wish June and him all possible happiness and good fortune.

● Mr. HOWARD. Mr. Speaker, I am pleased to participate in honoring our good friend, the distinguished gentleman from New York, JONATHAN BINGHAM. JACK and I were elected to our first term in 1964 and it has been a real pleasure to serve with him for these past 18 years.

Although, JACK will be missed by the Members of this Chamber, the impact of his intellect will not soon be forgotten. His presence on the House Foreign Affairs Committee, and most notably, his leadership as chairman of the Subcommittee on International Economic Policy and Trade, helped instill a commonsense approach to these vital issues.

JACK never sought headlines with flashy rhetoric, but he achieved results through hard work and determination. He was instrumental in making the Congress realize that perhaps nuclear energy was not the best alternative in the development of energy sources.

Of course, all of this praise has been substantiated by the voters of the 23d district. In every election including the first one in 1964, JACK has received over 70 percent of the vote.

Finally, Mr. Speaker, I would also like to pay tribute to JACK's wife, June. She has been very active in various organizations and has made enormous contributions of her own time on behalf of charitable causes.

We are all saddened to see JACK BINGHAM retire, but we wish him and his family all the best of luck in the coming years. For the past 18 years, not only have the residents of the Bronx benefited from his excellent service, but the rest of the Nation as well. His leadership and foresight will be missed by all.

● Mr. GORE. Mr. Speaker, JONATHAN BINGHAM is a man of immense personal integrity, good humor, and intelligence. His commitment to principle and his capacity for leadership put him in a very select group. He is the type of individual that we cannot afford to lose in public life, and he will indeed be sorely missed in Congress.

During my first few years in office, I quickly grew to respect his judgment, especially in the area of foreign affairs. My admiration increased as I saw broader dimensions of JONATHAN BINGHAM—the way he approached and analyzed issues and the way he main-

tained a conscientious regard for the public interest.

Recently, I had an opportunity to work with him on the nuclear freeze resolution. It is a credit to his organizational skills, his perseverance, and his stature that the vote was so close. He deserves much credit for translating this movement into a potent legislative force.

JONATHAN BINGHAM has many skills and many interests and he will find exciting challenges in the days beyond next January. I cannot help but feel that it is the Congress and the people of New York that will feel the deepest loss. We are clearly losing one of our premier defenders of the public interest. With respect and affection, I wish him well.●

● Mr. LONG of Louisiana. Mr. Speaker, the retirement of our respected colleague, and my good friend, JONATHAN "JACK" BINGHAM, a fellow Member of the House, saddens me. Though we all know JACK is going on to other works of importance, I hate to lose him as a trusted fellow Congressman. Since my return to Congress in 1972, I have had the pleasure of serving in the House with this fine and decent man. His quiet intellect and fiery belief in what is just will be missed by all.

JACK's work as chairman of the Subcommittee on International Economic Policy has been both exploring and inventive. But more important than JACK's grasp of international economics, is his deep understanding and concern of how the working men and women of America fair in today's economy. JACK's special interest was not the powerful lobbyist or the giant multinational corporation, but the working men and women of his district.

In the area of preserving our environment, no other Member of Congress could be more aptly described as a conservationist.

After 18 years of loyal service, the House will sorely miss JACK BINGHAM. It is very gratifying to know that JACK will stay active politically, and in his own words, "look forward to devoting a substantial part of my time and energy to helping drive out of office an administration that is 50 years out of date."

I wish JACK good luck and best wishes in his upcoming endeavors. I am sure we will be hearing from JACK for a long time to come.●

● Mr. ANNUNZIO. Mr. Speaker it is a genuine pleasure for me to join my colleagues in paying tribute to the Honorable JONATHAN B. BINGHAM, who came to the Congress with me in 1965. He and I were members of the same class—the 89th Congress. JACK's outstanding dedication to high standards is an inspiration to his friends and fellow citizens, and his record of excellence and creative accomplishments as a citizen, as a public servant, and as a

Member of Congress are most commendable.

He served the United States with honor during World War II, enlisting as a private, and leaving the Army with the rank of captain in military intelligence. He is a man of exceptional writing ability as well, and has authored books as well as magazine and newspaper articles.

Before coming to the House of Representatives, Congressman BINGHAM served our country with great distinction in international relations and foreign affairs. From 1945 to 1946, he was Special Assistant to an Assistant Secretary of State, and in 1951, he served as Assistant Director of the Office of International Security Affairs. He also held the position of Deputy and Acting Administrator of the Technical Cooperation Administration from 1951 to 1953, and was secretary to Governor Averell Harriman of New York from 1955-58.

While serving as the U.S. Representative on the Economic and Social Council for the United Nations, Congressman BINGHAM held the rank of Ambassador. He served as Principal Adviser to United Nations Ambassador Adlai E. Stevenson in economic and social affairs from 1963 to 1964. He also was a member of the U.S. delegation to four United Nations General Assemblies from 1961 to 1963, and the U.S. Representative on the United Nations Trusteeship Council with the rank of Minister and President of the Council during the years 1961 and 1962.

During his tenure in the Congress, JACK has distinguished himself while serving on the important Foreign Affairs Committee. He is chairman of the committee's Subcommittee on International Economic Policy and Trade, where he has compiled a splendid record of achievement, and his diligent efforts as a member of the House Interior and Insular Affairs Committee and the Commission on Security and Cooperation in Europe have been both fruitful and beneficial to the citizens of this Nation.

JACK is a fine legislator, a dedicated and devoted American, and a Congressman of outstanding ability, deep compassion and courage, who has provided exemplary service to his constituents in the 22d District of New York for the last 18 years. He will be missed here in the House of Representatives, especially by those who have had the opportunity to work with him.

I extend to JONATHAN BINGHAM my best wishes for continued success in devotion to highest principles, and for a healthy and happy retirement.●

● Mr. CORRADA. Mr. Speaker, it is with a deep sense of respect and great honor that I join my colleagues today in paying tribute to the distinguished gentleman from the 22d District of

New York, JONATHAN BINGHAM. JACK is retiring at the end of this Congress, after having served for nine consecutive terms as a highly respected Member of the House of Representatives.

His extensive knowledge and expertise in the area of foreign affairs are well recognized and appreciated by his colleagues and will be missed by all of us. JACK has always impressed those who deal with him by his calm and deliberative approach to the issues. JACK is a Member whose even temper has been a steadying force during heated debates.

I have been privileged to serve with him as members of the Committee on Interior and Insular Affairs during the past 6 years. I know I speak for my colleagues in that committee when I say that JACK will be missed by all of us.

I want to wish JACK and his wife June, the very best of health and happiness for the future.●

● Mr. FRANK. Mr. Speaker, JONATHAN BINGHAM's decision to retire at the end of this term, brings to a close one of the most distinguished congressional careers in the postwar period. JACK BINGHAM has been a model Member of Congress. His devotion to world peace, his dedication to social justice, his scholarly approach to the issues in which he has been involved, and his absolute integrity, have contributed enormously to the deliberations of the House of Representatives. On such issues as the fight against nuclear proliferation, support for a strong and independent Israel, and many others, JACK BINGHAM has provided an extraordinary degree of leadership, not only to the House but to the country and to the world.

Moreover, in an era when contentiousness and vitriol have all too often dominated the public debate, JACK BINGHAM has shown through example that it is possible to maintain a sense of dignity and to show respect for both the personality and the ideas of ones adversaries, while still being an extremely effective advocate. By combining a passionate commitment to his ideals, with a profound respect for the democratic process, JACK BINGHAM has provided an example of the way in which a legislator ought to behave in a democratic society. His district, this House and the country will be diminished by his retirement.

When publicity is given to the small minority of Members of Congress who fail to live up to their obligations, people ought to remember the example of individuals like JACK BINGHAM who show what parliamentary democracy can be at its finest.●

● Mr. SUNIA. Mr. Speaker, American Samoa remembers fondly the services and support of the Honorable JONATHAN BINGHAM to the territory of

American Samoa and at this moment we wish to join in the chorus of honors for the Congressman.

On behalf of my district, I want to say thank you for your sensitivity to our needs exemplified through the years you served as a member of the House Interior and Insular Affairs Committee. Because of the pressure of other issues pending before Congress it is difficult for many to give of their time to issues that may not be directly related to their own districts, yet you have often given us of your time and concern.

The association of the Bingham name with American Samoa goes a long way back in the history of the territory. The first congressional delegation ever to visit American Samoa was led by your father. Many of our people have preserved this memory by bestowing the Bingham name on their children. The Bingham name lives on in Samoa today.

I wish you well on your retirement and give my sincere thank you for your contributions to this Congress and those passed. Thank you.●

● **Mr. AuCOIN.** Mr. Speaker, a magnificent gentleman will be leaving Congress at the end of this year. It was with real sadness that I noted the decision from my distinguished colleague from New York, JONATHAN BINGHAM, to retire from this House which he loves so much and which loves him in turn.

As I reflect on Mr. BINGHAM's numerous contributions to the American people, I see a pattern, a harmony in all his actions. This is a man who has a goal which goes beyond personal ambition or gain. His intention is, it seems to me, to instill justice and balance into the lives of as many individuals as possible in all segments of society and in society as a whole. With quiet eloquence, Mr. BINGHAM has tried to smooth the way for those in this world who are oppressed or fearful or just plain outnumbered.

Many of the bills he has authored have helped people in this country. His Citizens' Anticrime Patrol Assistance Act provided \$15 million to organize citizen anticrime patrols. He realizes that policing is not all that is needed to make people feel secure in a world of soaring crime statistics. They have to feel that they have some control over their own lives. His concern for senior citizens led to legislation which provided jobs for 4,800 older Americans, thereby lessening the dependence and feelings of uselessness that mark the lives of too many of our aged.

His hand has been as graciously extended to those in other countries who need his help. He is a leader in the effort to stop oppression of Soviet Jews and was the principal sponsor of legislation providing funds for resettlement of Soviet Jews in Israel. He is a member of the Commission on Secu-

rity and Cooperation in Europe which monitors the Helsinki accords and the many "dear colleagues" from him which come across my desk shows that he takes the post seriously.

With his usual foresight, he was one of the first Members of Congress to oppose the Vietnam war, bravely taking a stand which was unpopular at the time. In fact, only 17 of his colleagues dared vote in 1967 for an end to the bombing of North Vietnam. Most recently, he urged a nuclear freeze because, as a thinking man, he fears the precarious arms race in which we have embroiled ourselves.

Mr. BINGHAM's accomplishments in the 17 years he has served as a Member of Congress, are too numerous to mention individually. He came to this body with a knowledge of the world which is rare. He applied his knowledge in a manner even more rare for its wisdom and humility.

That he is a leader, there can be no doubt. But to lead and still retain one's placidity, one's modesty, and one's dignity is remarkable. Few men in public office can retain all three. Few know Mr. BINGHAM's secret. I wish he could teach it to all those who contemplate entering public office. I only know that all of us who have had the privilege to serve with JONATHAN BINGHAM have benefited from our contact with him. To you, JON, I want to say: we will sorely miss you.●

● **Mr. REUSS.** Mr. Speaker, I am pleased to join in this tribute to my friend and colleague, JONATHAN BINGHAM, who recently announced his plans to retire at the end of this Congress. Since he began his congressional service in 1965, JACK has been a most effective and conscientious Congressman. His constituents have demonstrated their appreciation of his hard work by reelecting him every 2 years by overwhelming margins.

JACK has specialized in foreign affairs during his years in Congress, continuing a life-long effort on behalf of world peace and international cooperation. As the chairman of the Foreign Affairs Subcommittee on International Economic Policy and Trade, he has been a tireless fighter for foreign aid programs that meet real human needs, while actively opposing aid to regimes that deny human rights. His membership on the Commission on Security and Cooperation in Europe, which monitors the Helsinki accords, is symbolic of this commitment.

Before his years in Congress, JACK was the Deputy Administrator of the "Point Four" program, the precursor of the Peace Corps. Later, he served as an Ambassador at the United Nations.

JACK's indefatigable devotion to world peace has placed him at the forefront of the most important issue of all: The nuclear freeze. He is a key sponsor of and campaigner for the nuclear freeze resolution, which he describes as "an important glimmer of

hope in a depressing time." His leadership in the effort to end the current nuclear insanity will be sorely missed in Congress. But I am sure that JACK's voice will continue to be heard advocating a more enlightened and humanitarian American foreign policy.●

● **Mr. BRINKLEY.** Mr. Speaker, it is a privilege to participate in this special order honoring the distinguished congressional career of my good friend JONATHAN BINGHAM, who is retiring at the end of the 97th Congress, after 18 years of exemplary service.

JACK BINGHAM has represented the 22d district of New York with uncommon commitment. As chairman of the House Foreign Affairs Committee's International Economic Policy and Trade Subcommittee and as a member of the Interior and Insular Affairs Committee, JACK has provided our committee system with invaluable economic expertise over the past two decades.

From his Phi Beta Kappa achievements at Yale, to his influential role as U.S. representative on the United Nations Economic and Social Council, to his splendid record in this House, JACK has combined the finest qualities of thoughtful scholar and dedicated public servant. And this is how we will remember him.

But I will remember him, also, in a lighter vein, as a teammate on our Democratic baseball teams of years past. It was my pleasure to play side-by-side with JACK during some of those dry years. HENRY GONZALEZ was our pitcher and he deserved at least a "pair of Jacks," to open. JONATHAN BINGHAM poured out the same energy and perseverance on the baseball field that have hallmarked his years in Congress, and I am grateful for the excellence of his example and the quality of his friendship.●

Mr. ADDABBO. Mr. Speaker, as a wise and thoughtful man, JACK's dedication to humanitarian principles is probably his greatest legacy to us. His efforts to further world peace will always serve as an inspiration. As chairman of the Subcommittee on International Policy and Trade of the House Foreign Affairs Committee, he has diligently sought to foster international cooperation. As a member of the Commission on Security and Cooperation in Europe, which monitors the Helsinki accords, JACK has worked tirelessly for international human rights, especially for oppressed Soviet Jewry. His work on behalf of senior citizens and community crime prevention programs have brought these values and concerns to the grassroots level.

Certainly one of the most important undertakings of JACK's career has been his involvement with the nuclear freeze. His hard work and determination have been instrumental in helping us all see the horror and futility of the arms race. In the days ahead, his

vision and wisdom will be sorely missed.

We will all miss JACK, as friend, mentor, and extraordinary colleague. But I would like to take this opportunity to wish him all the best in his future endeavors, and to thank him for everything he has given us. I know that JACK will continue to have a positive and humanizing influence wherever he goes. I know that he will not just retire with his beautiful family to a life of idleness, but will continue a life of service to the world and our Nation. With his vast expertise—as former Ambassador to the United Nations, as Deputy Administrator of the "Point 4" program under President Truman, as secretary to the Governor of New York State under Averell Harriman, he brings many great ideas and hopes to the world.

JACK and June, we all wish you good health and enjoyment in the many years ahead, and will still look forward to watching your family grow with each beautiful Christmas card we so much enjoy.

Mr. Speaker, JACK's compassion for his fellow colleagues never ends. As the hour grew late this evening, JACK told me he did not wish us inconvenienced and suggested this special order not to be taken and that we only insert our statements for the RECORD. But, JACK, no matter how late the hour, we your colleagues wanted this opportunity to express our admiration for you.

□ 2200

PERSONAL EXPLANATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Oklahoma (Mr. SYNAR) is recognized for 5 minutes.

● Mr. SYNAR. Mr. Speaker, on Thursday, August 5, I was in my congressional district on official business and was unable to cast my vote on rollcall. Nos. 248 to 251. Had I been present, I would have voted in this fashion: rollcall No. 248, "yes"; rollcall No. 249, "no"; rollcall No. 250, "no"; and rollcall No. 251, "yes."●

A TRIBUTE TO WRIGHT PATMAN

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. GONZALEZ) is recognized for 15 minutes.

Mr. GONZALEZ. Mr. Speaker, this last Friday, August 6, was the anniversary of the birth of the tremendously great American who sadly passed on a few years ago, and was a preeminent Member, one of the most outstanding Members that the House of Representatives has ever had in its history since the first one in 1789.

I speak of former Chairman Wright Patman of Texas. May his soul rest in peace.

Wright Patman was born on August 6, 1892, in what has been called through the years Patman's Switch, which clearly reveals the association of Mr. Patman's illustrious forebears in that part of Texas, which is actually in a place near what is known as Hughes Springs in Cass County, Tex., which is up in the eastern, northeast part of Texas.

And Wright Patman studied law. In fact I think he came to Cumberland University in Kentucky, got his license, went back, and served as county attorney for Cass County for a while. Then he served for quite a number of years as district attorney. Then he eventually came to the Congress.

When he came to the Congress back in 1928, the United States was in a very similar period of time as that which we have just come from in the last few years. And as the depression broke, he was in the midst of all of that. He was defined by historians as a populist. But actually Mr. Patman to me symbolizes the bedrock of fundamental strength of this thing that has made and continues to sustain America.

He is what I call the old stock American.

Those of us who are by the very nature of the circumstances of the place and the environment in which we were born into, and bearing names that indicate different origins, find ourselves—and I am of that age where I can cover a pretty good span of history, and therefore can render testimony to this. I can recall when in my part of the country we were actually living in a country within a city. San Antonio became the focal point of a large exodus or mass of people from Mexico during and over the course of a 30-year period of time, the so-called Mexican revolutionary period. It was a turbulent, tough time.

This was back in the days when things were a little bit more crude.

Today, the people that came in in the successive waves, because you had revolution, counterrevolution, counter-counterrevolution and the like. It was bloody. Mexico at that time had a population of less than 14 million. And during the course of that revolutionary struggle over a million died, over a million left the country.

Most of those that left who belonged to the poorer, or those not in the upper classes economically speaking of Mexico, used the main lines of transportation, which were the national railway lines leading into Texas.

The more affluent went into the North and West and into California. All of these are sociological phenomena that have not been written about. The history of all of this has yet to be written.

But those of us born in this context then learned what it was to identify, first self-identification, a process that is still going on in the case of this conglomeration known as the Mexican American, or the American of Mexican descent of the Southwest.

This is reflected by the fact that there is no consensus even as to the descriptive phrase that is proper to cover the area. Today we hear the popular phrase for today, Hispanic American. But even that is inadequate because it does not cover the Portuguese. And Hispanic does not really convey this great, great amalgam of the Southwest known as the Mexican American, which is still the predominant group in this generally labeled class known as Hispanic American.

But its proximity to the mother country, Mexico, does put it in a very special niche or category, so that you find even today, for example, in my district, we have three full-time radio stations in Spanish—100 percent—San Antonio has the first television, a full-time television in the United States, going back quite a number of years, almost from the very inception of TV, which in San Antonio came in 1950.

So this station must have come to San Antonio not more than 4 years later, in the middle fifties.

So that we are talking about an America that is truly a very cosmopolitan country.

But growing up in that environment, one learned what it was to live in a country as this one, pluralistic, many peoples, many creeds, many cultures, and more than one language.

Coming from an environment in which English was not used—I for one had to learn English, for I knew not one word when I went to the first grade, through I was born in San Antonio.

But I soon learned that despite the then crude and abrasive out-and-out discrimination and racial tones of antagonism, that there was an element that my father recognized immediately. My father always inculcated a love and respect for this country, even though he died a Mexican. My mother did not. My mother became a naturalized American citizen, but not my father. And he died at the age of 90.

The reason was that his roots go back into the history of the North American Continent in Mexico—over 450 years. A family house is still standing in the State of Durango, in a mining town known as Mapeno, and it is over 450 years old. It is a historical monument because the Mexican Government has made it a historic site for several reasons, principally because it was there that Benito Juarez, when he was fleeing from the French invaders, stayed at the family house with his Cabinet.

My grandfather was the north Mexican leader of the Juarez forces fighting the French invaders. As a matter of fact, he was one of those that led the charge and successfully defeated the French Legionnaires of Napoleon III and the Emperor Maximilian in the battle known as El Sombrerete, which was a fight as great and important as the Battle of Pueblo of May 5.

So I give this history and personalize it in order for you to understand my eulogy of Wright Patman, because in growing up, I soon recognized this tremendous debt to these great figures that I call, for lack of a better descriptive phrase, the oldstock American.

I have always said, and this has angered some of the activist, ethnic, hot, outspoken leaders who predicate or did predicate their positions on antagonism and hatred of what they called the dominant or the Anglo—why that word, I do not know. I dislike labels. I dislike them now. I have always said that we are either Americans or we are not. And this has infuriated, believe it or not, people from time to time.

But nevertheless, out of the context of that environment, and in deepest appreciation for these figures that I identify with the stalwart, such as Wright Patman, I rise today to evoke his memory, because Wright Patman, had he lived long enough to this period of time, would have probably singlehandedly done more than any other person could have to have either diverted or arrested or at least attenuated the ravages of high interest rates, which he was one of the most fierce opponents of in the history of the American Congress, and who successfully, as chairman of the House Committee on Banking and Finance, as it was known then, or Banking and Currency as it was known then, was the last chairman to successfully get, after great fights, the funds to conduct the studies that since then have not been able to be conducted, and that is the review of just what has been happening to our financial and banking institutions, the things that have been happening that are at the root of this terrible dilemma that this country faces.

□ 2210

Never before have we faced such a challenge and a danger to what we know and take for granted as the American standard of living. The idea that we would ever have reached the point of 20 and 21 percent prime interest rates I am sure has caused this great, venerable preeminent American to turn over in his grave at least 100 times. It is just so unthinkable.

I had the great privilege of getting to know him particularly after I came to the Congress, and he was instrumental in having me assigned to this prime committee. When I was sworn in on January 8, 1962, I was one of

three that were sworn in in the middle of that Congress, the second half of the 87th Congress; but I was the only one that was assigned to a prime standing committee. The others had to wait until the next Congress, and the reason was Wright Patman; but also I had the pleasure in my last year in the State Senate of having welcomed to the board membership of the State senate his son, the Honorable BILL PATMAN, who now is a U.S. Congressman from Texas; so that today I evoke the memory of Wright Patman. His birthday would have been this last Friday, August 6. We were in recess, so I could not speak then; but I do so now in order to, in a very humble way, try to perpetuate his memory, an honorable, distinguished preeminent American, a great Texan, who did more than anyone I know of in the 20th century to maintain that most precious thing, and that is economic freedom, without which our political freedoms in this day and time in the context of our society so structured today is a hollow mockery.

So I evoke this memory and pray to God that his soul may rest in peace and hope I will be around to continue to evoke that great American's name and memory, Wright Patman, from Patman Switch, Tex.

UNITED STATES SHOULD OPPOSE WORLD BANK LOAN FOR BRAZILIAN IRON ORE DEVELOPMENT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Minnesota (Mr. OBERSTAR) is recognized for 5 minutes.

● Mr. OBERSTAR. Mr. Speaker, yesterday I addressed the House on the subject of an iron ore development in Brazil to be financed by the World Bank. This project is of such far-reaching significance that it deserves more detailed consideration than is possible during a 1-minute speech.

Summing it up: With the help of a low-interest loan from the World Bank, Brazil is about to disrupt world markets in iron ore in a way that will have lasting consequences for both the domestic iron ore and steel industries.

With the help of this very attractive financing, Brazil will be in position to bring on stream the production of iron ore exceeding by more than double the production capabilities of the largest iron ore production facilities in the United States; United States Steel's Minntac facility in Mount Iron, Minn.

The Brazilian ore will be sold at prices substantially below the current domestic prices of Minnesota taconite pellets; and it will be sold to the principal competitors of our domestic steel industry. Ultimately the Brazilian ore will be in direct competition with Minnesota and Michigan ores.

This loan is being processed at a time when devastating unemployment on the Mesabi Iron Range has attracted national attention as expressed in the three news stories which I ask unanimous consent to include in the RECORD at the conclusion of my remarks.

I would now like to describe the Brazilian iron ore project in more detail.

The Carajas project consists of an open pit mine situated in the state of Para and a port on the South Atlantic Ocean in the state of Maranhao. The facility is operated by the Cia Vale Rio Doce—C.V.R.D.

Following testing and commissioning, the facilities of the Carajas project will be physically available for start up in 1984, with exports of iron ore commencing in 1985 and amounting to an estimated 15 million metric tons shipping during that first year. With completion of construction in 1986, the quantity is expected to increase to 25 million metric tons in the second year and then reach initial production capacity of 35 million tons in 1987.

Until 1979 most of Brazil's iron ore was exported. Even with the rapid growth of the steel industry in Brazil over the last decade, domestic consumption of iron ore now accounts for only about 20 percent of production. In 1980, the overall iron ore shipments of CVRD totaled an all-time high of 80 million tons. The principal quantity amounted to 62 million tons exported to world markets and the remaining 18 million tons for consumption in the domestic Brazilian market.

The capital cost of the Carajas iron ore project totals an estimated \$6 billion. The estimated total investment comprises 40 percent equity and 60 percent in the form of loans including those from the Government of Brazil, \$600 million from a consortium of EEC banks, \$500 million from a group of Japanese banks and \$150 million from a West German bank. In addition to its consideration of the \$300 million CVRD loan application, the World Bank has also provided technical feasibility assistance, market research, and financial planning for the project in the part, and will continue.

I would like to point out that the World Bank has loaned the Government of Brazil more than \$300 million over the past 5 years for continued expansion of their steel and iron ore industries at interest rates which clearly would be the envy of our domestic marketplace.

CVRD has negotiated contracts with steel producers in several countries, including Japan, Korea, Belgium, Italy, West Germany, Luxembourg, and France for the sale of Carajas ore. This project will further disadvantage the domestic iron mining industry and enhance the position of our foreign

steel-making competitors with the ready availability of a low-cost, essential raw material to be sold thousands of miles distant from its source, at a price more than 25 percent less than that of U.S. taconite ore.

In short, not only does this project pose an immediate and long-range threat to the crippled domestic iron ore industry, it will also disadvantage basic steel.

I have no problem with a privately financed venture in which the principals are risking their capital and know-how against the forces of an open market. I do have a problem, however, with a venture in which the risks are muted by below market rate financing and the constant protective vigilance of an international lending organization and the presence of government ownership and subsidy of the venture.

United States participation in the World Bank loan for the Brazilian project will be interpreted as a very discouraging and confusing signal to the domestic steel and iron ore industries. On the one hand, this administration is attempting to move aggressively on foreign subsidized or "dumped" steel; but on the other hand, if it votes to approve this loan, it is helping to provide a further unfair advantage to foreign competitors. Consistency, at least, would require a no vote by the U.S. representative to the World Bank.

In conclusion, I urge our World Bank Representative not only to vote no on this loan application but to also urge the Bank to defer any further action on this project at least until we begin to see signs of a worldwide economic recovery and have a better picture of the future of the domestic iron ore and steel industries.

RECESSION SILENCES THE MINES OF THE MINNESOTA IRON RANGE

(By William Serrin)

HIBBING, MINN.—From Babbitt and Biwabik on the east, through Virginia, Mountain Iron and Hibbing, to Calumet and Grand Rapids on the west, a depression has fastened upon the Iron Range and is holding on like a dog to a bone.

Perhaps 11,000 of 12,100 miners are laid off; seven of the range's eight taconite mine operations are closed, and the one left operating, at Eveleth, is on a reduced schedule.

In city after city across the range, an area in northern Minnesota that is steeped in the lore of mines, miners and machines, unemployment is enormous. It is far greater than the national rate on the Iron Range, which provided the basic raw material, iron ore, that in large part fueled America's industrial growth.

It is about 25 percent in Hibbing, in the center of the Iron Range, said James Collins, the Mayor. In other towns, unemployment might be as high as 50 to 60 percent. Unemployment benefits and supplemental benefits are running out. Food banks for unemployed miners have been established. The state has advanced aid to the area, and some government agencies are employing laid-off miners in a range of other jobs.

What happened in autos and then steel has now rippled onto this high plateau of pines and huge mine pits and red-sided waste heaps. Unlike some other areas of the country where people can sometimes find other work, the Iron Range often offers few other employment opportunities.

"Things are pretty bad," said Roger Klander, president of United Steelworkers of America Local 6115, in Virginia, Minn. Only half joking, he said, "When the winter comes, when it gets 32 below and you're trying to keep your house warm, well, I'm not sure there will be a tree in Minnesota."

Some people caution against such icy views, Joe Samargia, president of Local 1938 of the Steel workers, in Virginia, said miners have learned to struggle. He said that he does not believe that mining companies will walk away from their productive mines, even though they will attempt to make operations more efficient.

Bob Umhauer, who has been laid off since last October at his job as a track laborer at the United States Steel Corporation Minntac plant at Mountain Iron, said he knew he would not be called back to work until next spring, at the earliest. But he described himself as "one of the lucky ones," because he has obtained a job at a food distribution agency, where he makes about \$6 an hour, in contrast to about \$10.50 at the mine. "Things will pick up again," he said.

Hibbing contains the largest open pit iron mine in the world. In the glory days of the 1920's and 1930's, 16 companies operated here. Today only one small company is operating. But Mayor Collins said everything is not "gloom and doom." People, he said, are not "in the gutter starving to death."

But Mr. Collins said that the situation was bleak for iron and its ancillary industries, and that the economy of the Iron Range would not recover until the American automobile industry recovered. Even then, he said, many ore companies already have supplies of taconite, a pellet form of low-grade ore that has been the mainstay of the Iron Range since the 1950's after high-grade ore had run out, that can last months and perhaps years.

And if prosperity returns to the range, he said, 10 to 20 percent of the miners will find that their jobs will be permanently gone. "The companies have found they can get along with less people," he said.

Although the area has known distress before, as in the Great Depression, the current conditions seem starker in light of the widespread prosperity that often characterized the Iron Range in the past.

When Hibbing completed its high school in 1921, the building offered a library, two gymnasiums, an indoor running track, forge and foundry shops, a swimming pool and a greenhouse.

Fears that the high-grade ore would give out rose early in this century. The ore lasted, though, and provided a basis for the nation's armaments industry in World War II. Then it ran down, and it was the development of the taconite process, which brought the commercialization of low-grade ores, that saved the Iron Range.

Now, however, many people fear for the future of the range.

"ONE-HORSE ECONOMY"

Jeanne Cadeaux of Virginia, who lost her job as an electrician at the Minntac plant two months ago, lives on \$177 a week in unemployment benefits and works as a volunteer hairdresser at a nursing home. "I'm trying to be real positive, but it's not easy," she said.

Patrick McGauley, a commissioner of the Iron Range Resources and Rehabilitation Board, said, "I perceive a slow recovery, but I do perceive a recovery." He said the future of the Iron Range hinges on diversification of industry, and suggested a heavier reliance on tourism, petting gathering and perhaps copper mining, among others.

He said nothing the state is doing, such as the jobs program for miners, is addressing the region's basic problems of low-priced ore imports from Brazil and inexpensive steel from Japan. "It's scary how these big companies can walk away from multi-million-dollar plants," he said.

"The Range has been through ups and downs before, but there is a little different mind-set on this one," he said. "It's a one-horse economy and that horse is sick."

IN MINNESOTA'S IRON ORE COUNTRY, HIT HARD BY SLUMP, JOBLESS SCRATCH FOR WAY TO GET BY

(By Lawrence Ingrassia)

VIRGINIA, MINN.—On street corners and in bars, at gas stations and in supermarkets, conversations here inevitably start the same way.

"You laid off?" "Any job prospects?" "Are you still working?"

They are questions of people gripped by the recession. This tidy town in the woods of northern Minnesota is a long way from the steel mills of Pittsburgh and the assembly lines of Detroit, but its fate is tied to theirs.

Virginia is in the heart of Minnesota's famed Mesabi Range, whose open-pit mines supply iron ore for the nation's steel mills. But with the steel and auto industries in a slump, there is little mining going on.

Seven of the eight mines on the range are shut down, most until fall and some until winter. About 12,000 of the 14,000 miners have been laid off. All across the range—in Virginia as well as Keewatin and Hibbing, Chisholm and Eveleth, Biwabik and Babbitt—the unemployment rate is 40 percent to 50 percent.

"OLD-TIME MINING TOWNS"

As the mining companies and the miners stop spending money, the entire region feels the effect. "We're like an old-time mining town, only we have sidewalks and street lamps," says Stuart Murray, manager of the Minnesota Job Service office in this town of 12,450. "Half the people work for the mining industry, and the remainder serve the industry or the people who work in the mines."

Hardest hit are the younger miners who were laid off last fall and winter. Many have recently exhausted their unemployment compensation benefits and are applying for public aid. "We never thought we'd see the day that we'd have to go on welfare," says Debbie Perslin, whose husband was laid off from his mining job last February.

What makes this recession shocking to many Rangers (as people hereabouts call themselves) is that the region had enjoyed unprecedented good times for nearly two decades. Until the 1960s, the higher-grade iron ore mines that operated on the range closed every winter. But as those ore deposits were depleted, companies began mining taconite, a low-grade ore that is processed into higher-grade pellets before shipment.

The taconite mines, which are operated year around, ended the seasonal ups and downs. "We've told people here that the taconite industry operates 365 days a year, day and night, and all of a sudden we've

changed. The hardest part is that there hasn't been a turndown in operations for some 20 years," says a spokesman for U.S. Steel Corp.'s taconite mine in nearby Mountain Iron, Minn.

The taconite industry's best year was 1979, when production was 56 million tons of pellets. This year, industry officials estimate, production will be 30 million tons.

It isn't clear when things will pick up. After slowing production for a while, most of the mines shut down early this summer. Nowhere has the effect of the slump been more severe than at U.S. Steel's Mountain Iron mine, the largest on the range. Last October, about 1,600 miners were laid off, and the mine closed—putting another 2,150 out of work—on June 6. The company initially planned to resume operations July 11, but now says the mine will remain closed at least until Aug. 23.

Even then, the workers with the most seniority will be the first called back. Those laid off last October figure they won't return to work before next spring.

"I don't expect to get called back until August of '83," says Thomas Wilson, a U.S. Steel miner who lives in Eveleth. When he was laid off nine months ago, Mr. Wilson began growing a beard and vowed not to shave until he was called back. He recently changed his mind. "If I kept it till then, I'd be walking on it," he says.

Most laid-off miners have given up looking for work. "Nobody's hiring. People are real polite, though. At least they haven't laughed at me," says David C. Anderson. He plans to study electronics at a vocational school using G.I. bill benefits because he's worried that he may never be called back to his mining job.

Many miners aren't interested in taking jobs that pay much less than the \$9 to \$12 an hour they earned mining. But even low-paying jobs are hard to find. Harley Melin tried unsuccessfully to get jobs as a sales clerk and a taxi driver in Duluth, which is an hour's drive from here.

The employment outlook is so bleak that the unemployed are lining up for state public-works jobs that will last just four weeks and pay \$3.50 an hour. "It's kind of a joke. It's not going to go far at all," says Mr. Melin, who nonetheless applied for the work.

LOOKING ELSEWHERE

A few miners have left the range for jobs elsewhere. Most, however, return poorer and even more discouraged. "I've had people call me from almost every state out traveling and looking for jobs. One guy put 1,800 miles on his car and couldn't find anything better than \$3.25 an hour. There is no place in this country that has jobs," says Joe Samargia, president of Local 1938 of the United Steelworkers of America, which represents the U.S. Steel miners.

While waiting for the economy to pick up, most people are learning to get by with less money. That's easier here than in a big city. Stacks of firewood that will be used to heat homes cheaply during the frigid winter sit alongside many dwellings. Rummage sales attract big crowds of bargain hunters. "I've been buying shirts for my children and blouses for myself for 50 cents to 75 cents and jeans for \$1," says Mrs. Perslin, the wife of the unemployed miner. Instead of giving away clothes her children have outgrown, as she usually does, Mrs. Perslin is planning her own rummage sale.

Like many others, unemployed miner John B. Gornick is cultivating an expanded vegetable garden that features everything

from sweet corn and squash to cabbage and cucumbers. He also plans to harvest wild blueberries and kill a deer (the one that nibbles on his vegetable garden.)

Still, now that his unemployment compensation has run out, Mr. Gornick is counting on getting Food Stamps and Aid to Families with Dependent Children to help support his wife and two children. "I was at home when my dad went through layoffs years ago," Mr. Gornick says. "He made it, and I'll make it."

Bankers here, because they know their customers personally, are more willing to let people fall behind on loan payments. "We're going to do everything in our power to keep people in their cars, houses and mobile homes," says Frank McCarthy, president of the First National Bank of Virginia.

Virginia merchants have managed to hold on so far, though they are worried about what will happen as more and more laid-off workers use up their unemployment benefits.

Sales actually are up a bit at a local hardware and auto parts store, as unemployed workers become do-it-yourselfers to save money and pass the time. But down the street, at Palace Clothing, sales have declined. "The layoffs affect all of us," says owner Donald Schibel. "There are some people who have money and are spending, but they aren't spending as easy as they have."

Dick Olson, who owns a service station and bait shop, says gasoline sales are down because people are driving less to conserve cash. And even though people are fishing more, both for fun and food, his bait sales have dropped as well. "A lot of guys are catching their own bait. When they're working, they don't have time, but now they do," Mr. Olson says. In fact, he adds a lot of them have called. "They want to know if we'll buy minnows and worms from them."

[From the News-Tribune & Herald, Aug. 10, 1982]

BRAZIL LOAN A SLAP IN OUR FACE

It would be a slap in the face to this area if the Reagan administration goes along with an application by Brazil to secure a \$300 million World Bank loan for construction of an iron ore production plant in that South American country.

Quite simply, there are far too many North American iron ore production facilities—most of them in this area—that are sitting idle for this country to support construction of major foreign competition.

The World Bank is expected to consider the loan—with an interest rate at a low 11.6 percent—today. U.S. Rep James Oberstar, D-Minn., has strongly recommended to Treasury Secretary Donald Regan that the U.S. oppose the loan when the World Bank leaders assemble. The U.S. provides 21 percent of the funding for the World Bank, allowing it 21 percent of the voting power in the bank's decisions.

Oberstar has said that while the Treasury Department earlier indicated it would oppose the loan, that opposition appears to be waning.

It makes no sense whatever for our country to contribute to this kind of project when its own ore-processing facilities are virtually shut down, its employees out of work and facing an uncertain future.

If the loan is approved, the U.S. contribution to the Brazil project would amount to about \$63 million, and amount that would go far in extending American unemploy-

ment benefits for jobless workers in the mining and steel industries.

If it is approved it would be a slap in the face to those many Americans who pin their hopes on a domestic steel industry recovery for their livelihoods. ●

ELIMINATING THE FEAR OF A FIRST STRIKE: A RESPONSE TO EUREKA

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Tennessee (Mr. GORE) is recognized for 30 minutes.

● Mr. GORE. Mr. Speaker, there is an urgent need for the United States to reassess its position and policy on nuclear arms. Millions of Americans appear to have concluded that the only way either we or the Soviets can win the arms race is by ending it. Freeze resolutions, not only in the Congress, but all around the country, attest to the strength of this belief. Last Thursday's razor edge vote on the freeze resolution shows how far this idea has gone, and how closely the Congress is divided at a critical moment. Congress has before it spending bills that will define the scope and pace of U.S. strategic weapons programs for years to come. But without SALT II, and years away from some new agreement with Moscow, there is no agreed framework within which to make these decisions.

The President is urging Members of the Congress to follow his lead in arms control or at least to refrain from actions that would undermine his negotiating position. Unfortunately, his proposals, both for nuclear weapons procurement and for START, have failed to prevent erosion of the bipartisan consensus vital to both. Without significant change in our current policy, requisite unity will be, I fear, unachievable.

Many Members of Congress and much of the public are convinced that the President's overall approach is not viable. Worse still, an apprehension is building that even an occurrence of events along lines preferred by the President, would promote greater tensions and dangers relating to nuclear weapons than ever before.

This skepticism has already manifested itself in a series of close votes not only on the freeze resolution but on the MX missile, and by the rapid House approval of an amendment to the defense appropriations bill, the practical effect of which was to legislate SALT II constraints.

The President cannot afford to ignore what is happening, nor can Congress. If this polarization continues, vital choices about nuclear weapons may be stalemated, and we will have another stillborn negotiating effort with the Soviets.

On the other hand, those who question the current policy and direction

of the President, including advocates of a freeze, cannot welcome the prospect of a deep national division over matters that touch directly on our security and on peace.

Mr. Speaker, this situation can be altered; unity on this urgent matter is not irretrievable. With constructive bipartisan leadership in Congress, and responsive leadership from the President and his party, we can reestablish a common denominator about nuclear weapons and arms control. We need some bedrock level of agreement that permits the President to pursue a course that most of us can, in good conscience, support—if not totally, then at least on basic thrusts.

If this is to be done, however, those of us who disagree with the President must be prepared to acknowledge elements in his approach that have merit, while, hopefully, those who support the President's ideas will concede the existence of faults and the need for correction.

It is my purpose today, Mr. Speaker and my colleagues, to critique the President's proposals and to underscore what I believe to be their strengths but, also, to offer proposals designed to demonstrate how the current approach could be altered, so as to retain its best features and to preserve and enhance the conditions needed for a meaningful halt to the nuclear arms race.

START: WHAT IS RIGHT ABOUT IT

The President's public statements on strategic nuclear arms control have correctly centered on the notion of stability. While we hope for reductions of nuclear weapons, the fact is that even one nuclear submarine contains enough weaponry to ravage a continent. It is crucial, therefore, that at any level of armament, United States and Soviet nuclear forces be designed in a way that avoids a bias toward first use. In some future moment of crisis, the last thing we should want is for decisionmakers on either side to be under a compulsion to launch a nuclear war, for reasons that have to do with the mechanical characteristics of the weapons themselves. On the contrary, we need to make sure, if possible, that weapons in being—in their qualities and in their relationship to each other—do not add to the uncertainties and fears that threaten to drive events out of control in periods of great tension.

Increasingly, however, we seem to be moving in the opposite direction. For a decade, U.S. weapons programs and U.S. approaches to arms control have reflected a deep concern about the vulnerability of our ICBM force to Soviet attack. Today, the Soviet Union possesses enough weapons of the requisite quality to destroy a very large proportion of our ICBM force while using up only a fraction of the Soviet Union's inventory; leaving them with a large

reserve to use for purposes of coercion—the so-called counterforce scenario. Many students of nuclear weaponry doubt that Soviet leaders would ever seriously entertain the idea of such an attack, but their judgment does not offset the fact that the Soviets own the means for carrying it out, and have paid dearly to acquire it for reasons that invite apprehension.

A decade from now, the shoe could be on the other foot. We are moving toward the deployment of two new systems, either of which would give us the means to carry out a full counterforce strike against the Soviet Union's ICBM silos: the MX ICBM and the Trident D-5 submarine-launched ballistic missile. At that time, the Soviets would be even more vulnerable than we are at present, because they have deployed so much more of their nuclear force on land. Nothing could be more detrimental to strategic stability than for both sides to be vulnerable to a first strike. Under those conditions, the side which refrains from using its weapons first must be prepared to gamble, at every instant, its political destiny and perhaps its physical survival.

The fear of a first strike, even if it is persistently labeled as an "irrational" fear, will continue to sustain and nurture the state of mental siege warfare which now exists between the United States and the Soviet Union.

The present psychology of conflict frustrates progress toward our mutual goal of making nuclear war less likely. But this psychology of conflict is unlikely to change until the tangible fear of attack is removed. In turn, the fear of attack cannot be removed so long as the nation which strikes first has what some persist in calling an "advantage."

START: WHAT IS WRONG WITH IT

Although the President's statements have emphasized the goal of enhanced stability, there is reason to doubt whether his specific proposals for arms control, as well as for new weapons, work together as advertised: that is, whether his combined approach is a plausible means for achieving a more stable nuclear balance at lower levels of armament.

Regrettably, the administration has not produced anything to demonstrate that this would be the case. All we know is that, in his Eureka speech, the President announced a proposal for 5,000 ballistic missile warheads for each side, on no more than 850 missiles, with not more than 2,500 of the warheads to be land based. Since then, there has been a regrettable absence of reasoned argument of how the United States and the Soviet Union can find mutual solutions to their strategic problems within this framework. Meanwhile, knowledgeable analysts and thoughtful citizens outside the administration have begun to do their own analytical work, which has led

many to the belief that the President's START proposal would actually diminish, rather than enhance, strategic stability.

In this connection, I want to commend to your attention a recent publication by the Congressional Research Service, entitled "President Reagan's START Proposal: Projected U.S./U.S.S.R. Ballistic Missile Forces." This paper provided the first detailed effort to apply principle to practice in order to produce a logical assumption as to how both we and the Soviets would adapt our strategic forces in accordance with the President's proposal, and how these revised forces would likely relate to each other in terms of stability. Although the paper is a model of impartiality, it is disturbing nonetheless. What the charts in this paper indicate to me is that the President's proposals, even if fully accepted and followed, would result in nuclear arsenals which, though smaller, would be both deadlier and mutually vulnerable. This could be a fatal flaw: it must be avoided.

Stability is not something inherent in the strategic forces of either country taken in isolation. It depends instead on the relationship between the two forces and on how these forces tend to influence decisionmaking when they are played off against each other.

Within the architecture of the President's START proposal, the Soviet Union would retain its ability to launch a first strike on U.S. ICBM silos. Indeed, the ratio of their warheads to our silos would more than double. At the same time, the United States—through the deployment of the MX ICBM and the Trident II D-5 missile—would have acquired the means to target all of the Soviet Union's silos. This result would make nuclear war far more likely than it is today. Mutual fear would increase dramatically.

Obviously, such a situation is intolerable. Some administration spokesmen have already recognized as much by pointing out that it is premature to judge the effect of START reductions on U.S. ICBM forces until the administration announces how the MX is supposed to be based. Their argument is that a secure basing mode, for example the so-called Dense Pack, would give us the means to neutralize the Soviet Union's ability to launch a counterforce attack. That may well be true, although it remains to be seen whether Dense Pack, or any other scheme, will hold water. But assuming this to be the case, we would also be acquiring the means to launch a first strike against the Soviet Union. Our disclaimer of any such intention, however sincere, would hardly dispel the Soviet fear of such a capacity.

Now, if we had a choice between a world in which U.S. forces can be destroyed by invulnerable Soviet weapons, and a world in which it was the other way around, then Americans would obviously prefer to have things arranged in our favor. But that choice does not exist. Any effort to create such a world would ignore its likely impact on Soviet planning and behavior, and consequently, upon the strategic relationship, the prospects for arms control, and upon stability.

It is certain that the Soviet Union will look for remedies to the threat of a U.S. counterforce capability. In so doing, the Soviets will have options involving new strategic deployments, and other options that might be attainable through arms control. With respect to the former, the Soviets would have many alternatives, including: launch on warning (which would greatly increase the risk of nuclear war); deceptive basing (which would sharply reduce prospects for future arms control because of the loss of verifiability); and/or abrogating the ABM Treaty (which would remove the only permanently agreed restraint to all-out competition in nuclear weapons).

In contrast to this rich menu of "hardware" options available to the Soviets, there is very little available to them at present through arms control. So far as I can tell, the President's program in essence invites the Soviet Union to trade down from precisely those significant advantages he has said they enjoy, while allowing the United States to deploy new weapons which would subject them to new forms of risk.

It is important, at this point, to note that the START proposal is entirely silent on the matter of cruise missiles, at a time when the administration has plans for deploying more than 10,000 of them, capable of being launched from the air, the ground, and from the sea. There is a certain technical justification for this omission, based on the internal logic of the START proposal, which is centrally concerned with fast-moving systems suitable for the counterforce attack. There may even be good reason from a negotiator's point of view to let the Soviets make their own case for limits on these weapons. But commonsense and realism require us to know that we cannot reach agreement with the Soviet Union if our position ignores and even violently contradicts that country's security requirements. A recent article in the *New York Times* put it very well:

There is no sure way to verify a cruise missile's range, no way to tell whether it is carrying a conventional or nuclear warhead. And apart from being a potential nightmare for the strategic balance, cruise missiles affect prospects for achieving reductions in other weapons. The Russians will not agree to big cuts in their ballistic missiles and bombers if they must prepare to face thousands of new cruise missiles.

A NONCOUNTERFORCE ALTERNATIVE

It seems to me that what is missing, and what we badly need, is another option: one which will combine a minimum of new weaponry and maximum of arms control in a package which would resolve the fear of a first strike, by eliminating it as a convincing alternative for either side. There is a way to achieve such an outcome, if we and the Soviets are prepared to act boldly while there is still time.

On March 22, I described (and entered into the *CONGRESSIONAL RECORD*) a proposal designed to accomplish this. My suggestion was to go to the root of the problem by phasing out land-based MIRV'd ballistic missiles, in favor of replacements that would carry only a single warhead. I introduced calculations which showed that if such a conversion took place, neither we nor the Soviets would be in a position to attack each other's ICBM silos under conditions that could, by any stretch of the imagination, ever be considered advantageous. It followed from this line of reasoning that, if the Soviets were prepared to dismantle weapons that presently allow them to threaten our ICBM silos, we should agree on to deploy new weapons that would give us the means to carry out a counterforce first strike on the Soviet Union. This meant an immediate agreement not to upgrade existing forces in ways that would make them counterforce weapons, not to move beyond the research and development stage in weapons such as the MX and the D-5, which are in fact counterforce weapons.

Since the President's Eureka speech, I have been undertaking to construct and to rationalize a program by which he could adjust and advance from where he is to where, I am convinced, the President of the United States should be at this critical period. With the aid of experts from the Library of Congress and of other specialists, I have concluded that a promising solution is possible. Today, therefore, I am introducing a proposal by which it would be possible to convert the President's pending proposal into a non-counterforce alternative.

The core of this proposal is the common ceiling of 5,000 ballistic missile warheads, which is, of course, the major component of the President's negotiating offer. What I suggest is that this number of warheads should be reallocated in ways which are inherently stable. Specifically, we and the Soviets should phase out—as I have suggested earlier—all our land-based MIRV'd ICBM's, and retain only that portion of our present ICBM force which is un-MIRV'd; our Minuteman II missiles, and their SS-11's. It so happens, moreover, that these missiles exist in nearly equal numbers, 450 to 518, which provides the basis for parity. However, because each

country regards these missiles as old, I suggest that they be replaced by a new, lightweight ICBM specifically designed to carry just one warhead. The balance of the 5,000 warheads allotted each side would be deployed at sea, thereby continuing a trend in the evolution of both sides' nuclear forces which is salutary, because nuclear weapons at sea are likely to remain relatively invulnerable for the foreseeable future. In sum, the effects of an agreement on these lines would be:

First, no first strike capability for either side. Although both the United States and the Soviets would have weapons with counterforce capabilities—the ability to destroy hardened silos—neither side would have anywhere near enough of these weapons for purposes of a first strike, unless the attacker was prepared to deplete the bulk of all his ballistic missile forces. The fear of a first strike, and its distorting effect on the planning and negotiating behavior of both sides, would be dealt with and neutralized.

Second, all changes would be consistent with the maintenance of essential equivalence. A glance at the tables I am introducing into the *RECORD* will show that both sides end up with equal numbers of ICBM launchers, equal numbers of ICBM warheads, equal SLBM warheads, and equal numbers of ballistic missile warheads, overall—at the 5,000 level proposed by the President. Further calculations would show near equality in ballistic missile throw-weight.

Third, limits on cruise missiles would establish a framework for dealing with the so-called gray area weapons. It should be noted also that Soviet perceptions about intermediate-range weapons, like the Pershing II, may moderate once it is clear that this system could not become part of an integrated U.S. first-strike capability.

Were the Soviets ready and willing to make the necessary major changes in their strategic forces, we should be willing to forego deployment of the MX and the Trident D-5. And both sides should be willing to negotiate meaningful restraints on cruise missiles. In this regard, I suggest again a portion of my earlier proposal, which dealt with air-launched cruise missiles, and add a proposal for limiting them at sea. While I acknowledge that these ideas are bound to be controversial, I venture to advance them in the hope that they will invite and encourage others to come forward with ideas they consider to be better. Serious, enlightened, nonpartisan debate on this most-critical-of-all public issue is urgently imperative.

I believe that the proposal I submit today offers a way to bridge the gap between critics and supporters of the President's proposal. It is consistent with the basic objectives of the freeze

movement, in that it requires a stand-down on the deployment of new counterforce weapons, followed by a phasing out of those which already exist. It is, however, also consistent with the President's view as to an acceptable number of ballistic missile warheads, and it would mandate a reasonable level of activity to continue the development of nuclear weapons designed to replace those whose useful life is ending.

Finally, in my opinion, there is a better chance now than ever before that the Soviet Union may be willing to undertake fundamental changes in strategic weaponry through arms control. They have been showing, for the first time, public concern at the prospect and consequences of first strike capabilities on both sides. If recent leaks to the press from Geneva are correct, they are also hinting at a readiness to contemplate major reductions within the context of an agreement which would adequately address their security needs as they interpret them.

Of course, this is not the first time that the Soviets have made a gesture in the direction of major reductions, and their public talk about the danger of first strike capability could be more for our consumption than theirs. But the purpose of negotiations is to explore, rather than preclude avenues of agreement. We should get to the bottom of what the Soviets mean; we should test their sincerity. The gravity of the developing threat to mankind requires no less.

If we follow the President's proposals we will enter a more dangerous world. With some imagination, however, the President's stated principles can lend themselves to a better, less threatening outcome.

A NONCOUNTERFORCE ALTERNATIVE TO PRESIDENT REAGAN'S START PROPOSAL

PROPOSED GUIDELINES

It is suggested that during the forthcoming strategic arms reduction talks (START) the United States propose the following guidelines to the Soviet Union:

(1) Pending a successful conclusion of the START, the Soviet Union and the United States will:

Continue to abide by the provisions contained in the unratified SALT II Treaty.

Not convert additional ICBM launchers to launchers for MIRVed ICBMs.

Not initiate or continue accuracy-improvement tests of currently deployed types of MIRVed ballistic missiles.

Not impede the verification, by national technical means of verification, of the above provisions.

(2) A new strategic arms reduction agreement would contain the following provisions:

Ceilings

Neither nation will possess more than 5,000 ballistic missile warheads by the end of 1994. Within this ceiling, no more than 500 warheads will be in silo-based ICBMs.

Neither nation will possess MIRVed ICBMs by the end of 1994.

By the end of 1994, the aggregate throw weight of each nation's ICBM force will not exceed the aggregate throw weight of 500 SS-11 or 500 Minuteman II ICBMs, whichever is larger.

Neither nation will possess more than 200 long-range heavy bomber aircraft by the end of 1994. Within this ceiling, no more than 120 bombers will be equipped to launch air-launched cruise missiles (ALCMs).

Neither nation may deploy more than 2,400 ALCMs with their long-range heavy bomber force.

Sea-launched cruise missiles (SLCMs) capable of ranges of over 600 kilometers will not be deployed on surface ships or attack submarines. However, if SLCMs are deployed in ballistic missile-launching submarines (SSBs/SSBNs), the SLCMs must be stowed in and launched from SLBM launching tubes, and each SLCM warhead would be counted as a SLBM-launched warhead.

Reduction process

Starting January 1, 1983, the Soviet Union and the United States will proceed to reduce the number of their strategic offensive weapons launchers (launchers for ICBMs and SLBMs, and heavy bombers) toward the 5,000-warhead ceiling on ballistic missiles and the 200-aircraft heavy bomber ceiling.

The Soviet Union will dismantle the launchers for its MIRVed SS-18, SS-19, and SS-17 ICBMs (in that order), followed in the same order by dismantlement of launchers for the single-warhead versions of these ICBMs. Concurrent to Soviet dismantlement of these ICBM launchers, the United States will retire some launchers for the Poseidon SLBM and launchers for the Minuteman III ICBM (in that order). Each nation will retire at least 80 launchers per annum until all the launchers for MIRVed ICBMs have been retired. However, the retirement of launchers for the Minuteman III will take place after the Soviet Union dismantles 80 launchers of the MIRVed version of the SS-18; and, the United States will be allowed to modify 50 of the Minuteman III ICBM silos to launchers for Minuteman II ICBMs or a new single-warhead ICBM.

As applicable, each nation will reduce the size of its long-range strategic bomber force to 200 aircraft by the end of 1994. Until the 200-aircraft ceiling is met, reductions in the number of long-range heavy bomber aircraft will begin in 1983 at a net rate of no less than 13 aircraft per annum.

New deployments

As the replacement to currently deployed single-warhead ICBMs, both nations are allowed to develop, test, and deploy a new single-warhead silo-based ICBM (without a "bus" to dispense MIRVs) possessing a throw weight no larger than the throw weight of the Soviet SS-11 or the U.S. Minuteman II ICBMs, whichever has the larger throw weight.

Both nations may develop, test, and deploy new ballistic-missile-launching submarines and new long-range heavy bomber aircraft.

As hedges against failure to reach a START agreement, or an abrogation of an agreement, both nations may develop and test, but not produce and deploy, a new MIRVed ICBM and a new MIRVed SLBM.

VERIFICATION OF COMPLIANCE WITH PROVISIONS CONTAINED IN THE ALTERNATE START

The deployment of silo-based ICBMs is verified from overhead photography.

Silos containing MIRVed ICBMs have characteristics (signatures) that are distinct

from silos containing single-warhead ICBMs.

Currently, the numbers and types of SLBMs being deployed is routinely verified by observing the SSBN in which the SLBM is being introduced. Overhead photography and other means of detection are used.

SLCMs deployed in SLBM-launching tubes could be verified in the same way SLBM deployment is now verified.

Verification that ICBM or SLBM launchers are being dismantled is made from overhead photography and other means.

The performance and characteristics of new types of ICBMs and SLBMs is primarily determinable from data intercepted when the missiles are tested.

The accuracy improvements of ICBMs and SLBMs is verified from intercepted test telemetry, and by tracking the missiles during operational tests.

The Soviets would not be able to attain a comfortable degree of confidence in the performance of additional accuracy improvements to their ICBMs and SLBMs without thorough testing of the whole missile system.

Bomber aircraft equipped with ALCMs have observable differences from bombers not equipped to carry these weapons.

The numbers and types of heavy bombers deployed is verified by photographic surveillance of the aircraft production facilities and bomber operational bases.

Significant violations in the number of ICBM and SLBM launchers and bombers deployed would be readily detected.

U.S. STRATEGIC PROGRAMS UNDER THE PROPOSED ALTERNATE START

Reductions

No hard-site ABM defense needed.

No procurement and deployment of the M-X ICBM, and no construction for basing the M-X, but continue its development.

No procurement, production, and deployment of the Trident II SLBM, but continue its development. Consequently, Trident I SLBMs that were recently deployed, and those that will be deployed in the near future, would not be retired prematurely.

No implementation of ballistic missile accuracy improvements (such as stellar-inertial system) to existing ballistic missiles.

No deployment of larger or more lethal re-entry vehicle warheads.

Retirement of the Titan II and Minuteman III ICBM force, and an option to retire the Minuteman II force.

Phased retirement of the B-52D, B-52H, and B-52G bombers.

Reduction in the number of B-52 aircraft that would be modified to carry ALCMs. Without a ceiling on the number of heavy bombers equipped to launch ALCMs, more than 120 B-52 bombers could be converted to ALCM carriers.

Curtailment in the total number of tanker aircraft needed to support the strategic bomber force.

Phased retirement of the Lafayette-class (Poseidon and Trident I) SSBNs from the strategic forces, and the conversion of some of these boats to attack submarines. Some of Lafayette-class boats equipped to launch the Trident I SLBM could be conveyed to Great Britain, as an alternative to the Trident II SLBM.

Curtailment in the total number of ALCMs that would be deployed. Without a ceiling on ALCMs the number of long-range strategic weapons would continue to grow.

Indirect curtailment in the total number of nuclear bombs and short-range attack

missiles (SRAMs) that would be deployed. Without a ceiling on heavy bombers, the number of bomber-deliverable weapons would continue to grow.

Indirect curtailment in the total number of long-range sea-launched cruise missiles (SLCMs) that could be deployed. Unless the number of long-range SLCMs that can be deployed is limited, the number of long-range strategic weapons would continue to grow.

New deployments

If the 450 Minuteman II ICBMs currently deployed are retired, and the U.S. does not deploy in modified Minuteman III silos 50 additional Minuteman IIs now in storage, 500 new single-warhead ICBMs (denoted in tables as MX-2) would be needed.

100 B-1B bomber aircraft (initially tasked to be penetrating bombers, and later phased to ALCM carriers, replacing B-52G CMCs, as the more advanced STEALTH aircraft assume the penetrating role). As an alternative to the B-1B, 100 new cruise missile carrying aircraft could be deployed.

100 STEALTH penetrating bombers or 100 advanced CMCs.

PROBABLE EFFECT ON SOVIET STRATEGIC PROGRAMS UNDER THE PROPOSED ALTERNATE START

Reductions

No expansion of current ABM capabilities. No deployment of a mobile ICBM with a hard-target capability.

No construction for basing of a mobile ICBM.

No deployment of larger or more lethal reentry vehicle warheads.

No deployment of SLBMs with hard-target capability.

No implementation of accuracy improvements to existing MIRVed ballistic missiles.

Retirement of the entire SS-11 ICBM force if 500 units of a new single-warhead ICBM (denoted as SS-X in tables) are deployed to replace the SS-11 missiles.

Retirement of the SS-17, SS-18, and SS-19 ICBMs a few years earlier than anticipated.

Retirement of all the Yankee I SSBNs and the one Yankee II SSBN, or their conversion to attack submarines.

Retirement of SS-N-6 SLBMs on Yankee I SSBNs.

Retirement of the one Golf III SSB, all the Hotel II SSBNs, and the one Hotel III SSBN.

Retirement of SS-N-5 SLBMs on Hotel II SSBNs.

Retirement of the TU-95 Bear and Mya-4 Bison bombers.

Retirement of the Kangaroo air-launched missile.

New deployments

500 New single-warhead ICBMs (denoted in tables as SS-X), if 500 SS-11s are not retained.

200 new heavy bombers (denoted in tables as TU-X SWL and TU-X).

Deployment of ALCMs and SRAMs with the new heavy bombers.

Replacement of Yankee I SSBNs with a new SSBN (denoted in tables as SSBN-X) equipped with 16 launchers for SLBMs.

Continued deployment of Typhoon-class SSBNs.

Continued deployment of SS-N-20 SLBMs on Typhoon-class SSBNs.

Deployment of SS-N-17 SLBMs (or other existing type) on a new SSBN (denoted in tables as SSBN-X) replacing the Yankee I SSBNs.

ESTIMATED TYPE AND NUMBER OF SOVIET AND U.S. SLBM'S IN SSB'S AND SSBN'S

Soviet ballistic-missile-launching submarines (SSBs and SSBNs) are believed to

carry the following number and type of SLBMs: 20 SS-N-20s in Typhoon SSBNs; 16 SS-N-18s in Delta III SSBNs; 16 SS-N-8s in Delta II SSBNs; 12 SS-N-8s in Delta I SSBNs; SS-N-17s in Yankee II SSBNs; 16 SS-N-6s in Yankee I SSBNs; 6 SS-N-8s in Hotel III SSBNs; 3 SS-N-5s in Hotel II SSBNs; and 6 SS-N-8s in Golf III SSBs. A new SSBN (denoted as SSBN-X in tables) is projected would carry 16 SS-N-17s or other existing SLBM.

U.S. SSBNs carry the following number and types of SLBMs: 16 Poseidon or 16 Trident I in Lafayette-class SSBNs; and 24 Trident I in Ohio-class SSBNs.

WARHEAD LOADINGS USED IN PROJECTIONS

Unless otherwise specified in the tables, all other ballistic missiles except the following are estimated or projected to carry a single independently-targetable reentry vehicle (RV):

Soviet—SS-N-20, 10 MIRVs; SS-N-18, 7 MIRVs.

U.S.—Minuteman III, 3 MIRVs; Poseidon, 9 MIRVs (average); Trident I, 8 MIRVs.

Bombers weapon loadings are estimated and projected to be as follows:

Soviet—TU-95 Bear, 1 AS-3 Kangaroo missile or four bombs; Mya-4 Bison, 2 bombs; TU-X SWL, 12 ALCMs (average) plus 4 bombs; TU-X, 6 SRAMs plus 2 bombs.

U.S.—B-52D, 2 SRAMs plus 4 bombs; B-52G/H, 4 SRAMs plus 4 bombs; B-52G CMC, 12 ALCMs plus 4 SRAMs plus 4 bombs through 1985 (thereafter, 348 ALCMs added per year, to replace SRAMs and bombs, until all B-52G CMCs are equipped with 20 ALCMs); B-1B, 8 SRAMs plus 4 bombs; B-1B CMC, 24 ALCMs; Stealth, 8 SRAMs plus 4 bombs.

* It is assumed that all the SS-11 ICBM's would be retired. However, if the Soviets do not deploy a new single-warhead ICBM (denoted SS-X in this projection), and retain 500 SS-11's, the number of ICBM's retired would be reduced by 500.

¹ It is assumed that all the Minuteman II ICBM's would be retired. However, if the United States does not deploy a new single-warhead ICBM (denoted MX-2 in this projection), and retains the 450 Minuteman II ICBM's (in addition to deploying 50 Minuteman II's from storage into Minuteman III silos), the number of ICBM's retired would be reduced by 450.

² Trident I SLBM's are shown as being retired. In reality, however, these SLBM's would be removed from Lafayette-class SSBN's and redeployed with additional Ohio-class SSBN's. Thus, reducing the number of Trident I SLBM's that would be retired by 192 SLBM's.

³ See notes above.

¹ It is assumed that all the Minuteman II ICBM's would be retired. However, if the United States does not deploy a new single-warhead ICBM (denoted MX-2 in this projection), and retains the 450 Minuteman II ICBM's (in addition to deploying 50 Minuteman II's from storage into Minuteman III silos), the number of ICBM warheads retired would be reduced by 450.

² Trident I SLBM warheads on Lafayette-class SSBN's are accounted to be retired. In reality, however, the SLBM's and their warheads would be removed from the Lafayette-class SSBN's and redeployed with additional Ohio-class SSBN's. Thus, reducing the number of SLBM warheads that would be retired by 1,536 warheads.

³ The number of SRAM's shown are those projected would be retired. In reality, however, 132 SRAM's are projected would be redeployed and are herein treated as new deployment, thus, reducing the number of SRAM's that would be retired by 132 SRAM's.

⁴ See notes above.

Soviet:														
SS-18 (10 RV's)	750	750	0	0	0	0	0	0	0	0	0	0	0	0
SS-18 (8 RV's)	1,400	1,400	1,360	720	80	0	0	0	0	0	0	0	0	0
SS-19 (6 RV's)	1,800	1,800	1,800	1,800	1,800	1,380	900	420	0	0	0	0	0	0
Total	3,950	3,950	3,160	2,520	1,880	1,380	900	420	0	0	0	0	0	0
United States:														
Minuteman III (3 MK-12A)	900	900	900	900	900	660	420	180	0	0	0	0	0	0
Minuteman III (3 MK-12)	750	750	750	750	750	750	750	750	690	600	210	0	0	0
Total	1,650	1,650	1,650	1,650	1,650	1,410	1,170	930	690	600	210	0	0	0
Strike ratio (RV's/ICBM's): ^a														
Soviet	3.75	3.75	3.00	2.59	2.11	1.70	1.23	0.62	0	0	0	0	0	0
United States	1.18	1.18	1.25	1.33	1.42	1.31	1.17	1.01	0.82	0.79	0.31	0	0	0

¹ The RV's carried by the MIRV's version of the SS-17 are not included. Currently, the MIRV'd SS-17 does not have sufficient accuracy to destroy U.S. ICBM silos with a high degree of probability.

² Assuming 100-percent availability and reliability of the missiles and warheads (an optimistic assumption), a strike ratio equal to or larger than 2 denotes a theoretical capability to target at least 2 reentry vehicles against each silo. Thus, if each of the reentry vehicles has a high single-shot-kill probability (SSKP) of destroying a silo, a strike ratio equal to or larger than 2 signifies a theoretical capability to destroy the opposing ICBM force at their silos.

GOOD SENSE ON CHEMICAL WEAPONRY

The **SPEAKER** pro tempore. Under a previous order of the House, the gentleman from Florida (Mr. FASCELL) is recognized for 5 minutes.

● Mr. FASCELL. Mr. Speaker, on July 22, 1982, the House of Representatives rejected by a vote of 251 to 159 the administration's request for production of lethal binary chemical weapons.

Although most people do not realize it, this vote was extraordinarily significant. I would even go so far as to call it historic. For the first time in a decade, the House of Representatives decisively rejected a major defense program, in the face of heavy lobbying by both the White House and Defense Department.

Mr. Speaker, I believe that this unprecedented vote on the binary chemical weapons program was largely a result of the efforts of one man, Congressman CLEMENT J. ZABLOCKI of Wisconsin, the chairman of the House Foreign Affairs Committee.

With the help of Congressman ED BETHUNE of Arkansas Congressman ZABLOCKI succeeded in putting together a bipartisan coalition of Members opposed to binary chemical weapons production. Congressman ZABLOCKI's success in defeating the costly and unnecessary binary program illustrates once again what the esteemed chairman of the House Foreign Affairs Committee can accomplish in this legislative body.

I believe that the people in his district in Wisconsin, the American people and, indeed, the entire world can be proud of Congressman ZABLOCKI for his outstanding work on this most important issue.

I would like to bring to the attention of my colleagues an excellent editorial which appeared in the August 1, 1982, Milwaukee Journal:

GOOD SENSE ON CHEMICAL WEAPONRY

"Rather than expend the American taxpayers' dollars on producing unnecessary additional chemical weapons, the United States must address the widely recognized deficiencies in our chemical protective posture if we are truly to deter a chemical attack by the Soviet Union."

Thus rightly spoke Wisconsin's Clement Zablocki, chairman of the House Foreign Affairs Committee, in leading a successful charge against authorization for new "binary" chemical weapons.

By a vote of 251-159, House members voted to scratch \$54 million from President Reagan's defense proposal to begin production of the new chemical weapons—which ultimately could cost \$10 billion, according to Zablocki. The House did approve expenditure of \$651 million, primarily for desperately needed protective equipment and training in anti-chemical warfare.

Toxic weapons and their indiscriminate deadliness are profoundly repugnant. That is true in degree of all weaponry, to be sure,

but the insidiousness of chemical and biological agents puts them in a special category of the inhumane and the uncivilized.

Zablocki cogently argued that the new chemical weapons might well precipitate a whole new arms race. They also would be viewed by the global community as representing the abandonment of past US policy to eliminate the awful threat of chemical warfare.

He also emphasized a key distinction: An adequate defensive capability can be decisive in determining the outcome of a conflict in which chemical weapons are used. If deterrence can be achieved by enhancing military ability to defend against chemical weapons, why not concentrate resources in that direction?

Unfortunately, the Senate earlier approved the \$54 million to begin binary-chemical production. But the substantial margin against doing so that was reflected in the House vote may prove sufficient to swing final agreement when the two chambers reconcile their versions of the bill.

This is an instance in which morality and practicality coincide. ●

A LETTER TO MENACHEM BEGIN

The **SPEAKER** pro tempore (Mr. GONZALEZ). Under a previous order of the House, the gentleman from California (Mr. DYMALLY) is recognized for 10 minutes.

Mr. DYMALLY. Mr. Speaker, recently I had the privilege of visiting Israel and met the Prime Minister, during which time we had a very lively conversation. I said to the Prime Minister then that I had been a strong supporter of Israel and when I returned to the Congress I was going to send him some material which I had written and which I had participated in having advertised in Los Angeles; so my letter reads as follows:

HOUSE OF REPRESENTATIVES,
Washington, D.C., August 10, 1982.
Hon. MENACHEM BEGIN,
Prime Minister, The Knesset, Jerusalem,
Israel.

DEAR PRIME MINISTER: During my recent visit to Israel, with a Congressional delegation, you inquired what critics of the war in Lebanon had done for Israel, in the past, when its security was under attack.

I informed you then that I was a strong supporter of Israel and had been very active as a California Legislator, and Lieutenant Governor working for Israel's security. I also informed you that I would mail some evidence of that support.

Attached please find the following:

(1) A statement by me "Israel Must Live" delivered during my successful campaign for Lt. Governor of California.

(2) An advertisement by the California Legislative Black Caucus, which appeared in the Los Angeles Times, Friday, March 22, 1974 and was sponsored by the "Youth Committee for Peace and Democracy in the Middle East", which was co-chaired by my present Chief of Staff, Kenneth M. Orduna.

On leaving your office I asked that you acknowledge receipt of this information.

With best wishes for Peace in the Middle East.

Respectfully,

MERVYN M. DYMALLY,
Member, House Committee
on Foreign Affairs.

ISRAEL MUST LIVE

(By Senator Mervyn M. Dymally, Chairman, California Senate Majority Caucus, to B'nai B'rith, San Francisco, November 7, 1973)

I have come before you this evening for the purpose of expressing my concern about the need to galvanize public opinion and commitment in every sector of the American public concerning the survival of Israel and building an enduring peace in the Middle East.

I have not come here tonight to ask you for your votes or support for any public office I may seek. There will come a time, and I hope there will be an opportunity later on, when that will be an appropriate topic for us to consider together. But this is not the time.

From its birth in 1948, the growth, prosperity, and most of all, the survival of Israel have been matters of central concern to the people of the United States, particularly for those people whose interest in human rights and human liberties is especially strong.

While the existence of Israel as an organized political State dates back only 25 years, its existence as a dream in minds of the Jewish people goes back many centuries. Anything which threatens the survival of Israel threatens something deep within the soul of every person of the Jewish faith. But it also threatens something which I believe to be of the greatest importance for everyone of us, Jew and Gentile, White and Black. The extinction of the only democratic state which now exists, or to my knowledge has ever existed, in the Middle East, would be a profound tragedy for the whole world. America's longstanding commitment that this shall not take place must now be backed with solid and sensible policy decisions.

In a few days, I expect to be leaving for my second trip to Israel, at the invitation of the Israeli Government. My first visit to Israel took place shortly after the events of the Six Day War had changed attitudes toward Israel, not only in outsiders like me, but among the Israelis themselves. No longer was Israel the small, embattled nation of pioneers almost pathetically vulnerable to the numerical superiority of her hostile neighbors. Rather she had become a formidable military power, able to defend herself.

While I was in Israel six years ago, the Israeli Government was calling for direct negotiations with her Arab neighbors which included negotiation concerning withdrawal from Arab territories occupied in the war as part of a permanent peace settlement. As you know, those direct negotiations never took place.

It is indicative of the frustrating nature of the situation in the Middle East that Israel is once again asking for direct negotiations with a renewed offer to withdraw from Arab territories as a part of the peace settlement. I think we all hope this time those negotiations will take place.

I mentioned earlier the change in attitude toward Israel resulting from the Six Day

War. That new attitude is understandable, but it may also have been damaging because it gave many Americans an unrealistic confidence that Israel could not defend herself unaided.

Some of the seeds of the present hostilities were surely planted in 1971 when the United States deferred commitments to sell Phantom jets to Israel. It was about that same time that President Sadat adopted a more aggressive attitude toward Israel, as if he sensed that the American willingness to provide military assistance was crumbling. That is just one clear indication of how critical is the military balance of power in the Middle East. The United States must never again give cause for the slightest suspicion that we will allow that balance to tip in favor of the Arab states.

As events have proved, the October 25th military alert called by the President was an act in defense of Israel. But that praiseworthy act was followed a few days later by yet another White House effort that is symptomatic of the moral blindness that is destroying the Nixon Administration.

A representative of the President, using the Middle East situation as an excuse, went to Congress to ask that the Jackson-Mills-Vanik amendment guaranteeing free emigration for Soviet Jews and all others who wish to exercise the right to leave be removed from the East-West trade agreement legislation.

I am hopeful that the Congress will repudiate this attempt to use a crisis in one part of the world as an excuse for the continued denial of freedom to people in another part of the world. I believe that we must have a trade bill including the Jackson-Mills-Vanik amendment, and that the Soviet Union will be forced to coldly weigh its economic needs against its outworn and vicious emigration policy, and will very quietly opt for most favored nation status on our terms.

After all, it is the American people who must subsidize the trade agreements favoring the Soviet Union. We pay in higher taxes for credit and investment guarantees, and we pay in higher prices for commodities as basic as food, as last year's wheat deal with Russia proved. When we are paying such a cost for trade agreements, we have a right to demand a return in the form of concessions. There can be no more vital concession than one protecting the rights of our fellow human beings. The right to emigrate is an international issue, not an internal one. The granting of most-favored-nation treatment to any government is also an international question. Both the United States and the USSR are signatories of the United Nations Human Rights covenant which guarantees the right of free emigration. This has the force of a treaty.

The legal fiction that somehow international agreements cannot be used to relieve the suffering of oppressed people is, perhaps, best refuted by the words of Alexander Solzhenitsyn in the Nobel Lecture he was not free to deliver. The great author pointed out that in matters of human rights, "there are no internal affairs left on our crowded earth."

The Nixon Administration and others who oppose the Jackson amendment must answer some questions: If the trade bill is not the right vehicle to secure freedom to emigrate for Soviet Jews, what is the vehicle? If the United States is not the world power to demand respect for human rights, who is that power? And if now is not the time to end the suffering of an oppressed people, when will that time come?

Admittedly, the plight of Soviet Jewry and the war in the Middle East are not high on the agenda of concerns of most American Blacks. We are still struggling for an end to poverty, for jobs, for decent housing and schooling, and for equality in all phases of our society. But throughout that struggle, Blacks have had the strong support of American Jews.

The founding of the National Association for the Advancement of Colored People (NAACP) early in this century was roughly coincident with the founding of the B'nai B'rith Anti-Defamation League, and other Jewish organizations concerned with civil rights and human liberties. The coincidence in time soon became a coincidence in purpose. Throughout the long struggle to obtain our rights, freedoms and economic justice, Blacks have been able to count on the wholehearted support of many courageous American Jews.

To be sure, anti-Israel voices have been raised in the Black community. Some Black nationalists openly identify with the cause of the Arab states in the Middle East based on a misunderstanding of their African heritage, which overlooks the fact that Arabs were among the most active traders of Black slaves in world history. Others merely include Jews in their general, paranoid criticism of all whites. But these are not representative voices in the Black community, nor are they the voices of the future.

American Blacks are very much aware of their friendship with American Jews, who have always fought beside us in the civil rights movement. The Jewish passion for justice has produced a much stronger commitment to the struggle for equality than most white Americans have been led to make. Black America will never forget the friendship of our brothers and sisters of the Jewish faith.

And it is because of our long, mutual dedication to freedom and justice that American Blacks must be more concerned than other non-Jews with the crisis that Jews face today. We join you in speaking out against the oppression of Soviet Jews as one more statement of human rights like the statements we made together in the past against Jim Crow laws. We join you in insisting that Israel must live, just as we insisted together in the past on full access for Blacks to the political system.

As individuals committed to the cause of freedom, concerned with the fate of racial ethnic and religious prejudice and discrimination, dedicated to civil rights and human progress for all, we feel a particular sense of solidarity with Israel's struggle to survive as a democracy in security and peace.

We share Israel's aspirations to integrate people from vastly different backgrounds and to provide them all—including Arab and Jew alike—with the benefits of an advanced social system. The realization of that aspiration can be seen in Israel today, in vastly improved educational levels for Arabs citizens of Israel, equal access to all the economic benefits available to Jews, membership in the same trade union movement and full rights of freedom of speech for Arabs, including the right to oppose Israeli government policy. Arabs in Israel serve at all levels of government, including the Knesset.

As the day nears for my visit to Israel, I find myself thinking of what has occurred since the Egyptian sneak attack across the Suez Canal on Yom Kippur. On that bleak day Israel was once again faced with the very real prospect of being overrun by her

hostile, numerically superior and very well equipped neighbors. Now that outbreak of hostilities, like the one which occurred in 1967, has been brought to an end with a fragile cease fire, at a time when Israel's armies were again on the threshold of electrifying military victories.

But the price Israel has paid for its military success has been terribly high. In these first weeks of the Yom Kippur War, Israel lost 1,854 soldiers, with 1,800 hospitalized. Let me put that into perspective. Israel is about the size of Los Angeles. It is as if Los Angeles were to lose over 3,600 young men during a few weeks of war. This staggering loss must not have been suffered in vain.

My experience in state government does not give me a position from which to speak as an authority on international affairs, and these remarks tonight must be judged in that light. However, I have hope that by the time the parties to the conflict and others in the international community, who have taken an interest in the Middle East, move toward creating a more permanent resolution to the military crisis in the Middle East, one fundamental principle will be adopted. And most importantly, I believe the United States should take the lead in insisting upon this principle, instead of joining with other nations in urging the abandonment of the principle.

That principle is that before Israel is asked to give up one square mile of territory purchased with the blood of its soldiers, either in 1973 or in 1967, a necessary and fundamental first step must be a recognition of Israel's existence as a State in some permanent fashion by its Arab adversaries. Neither the performance of their armies nor the moral force of their arguments place the Arab States in a position where they can continue to insist that Israel does not exist and some day will be wiped off the face of the map.

Our task together is to galvanize the broadest possible support among the American people of every race and religion for American solidarity with Israel in its struggle to insure its survival.

This means: (1) guaranteeing Israel's access to arms, (2) guaranteeing her right to face-to-face negotiations with her Arab neighbors, and (3) guaranteeing her right to secure and defensible borders based on a permanent peace treaty.

This will not be an easy task, but it is one to which I have been committed in the past and remain committed to today. Perhaps there is something in the experience of a race which has been abused and discriminated against for many centuries which leads to a better understanding of the feelings, concerns and aspirations of another people who also have been abused and discriminated against for many centuries. In any event, that is my commitment and will remain my commitment.

It will be a joyous day of all Blacks, whose fate is inseparably linked with the fate of the Jews, when Israel is free of all threats to her integrity. We have learned in our struggle for dignity and equality that no minority is safe if any minority is threatened, and that freedom is not the separate privilege of some people, but the inalienable right of all people.

Thank you very much for this opportunity.

[Advertisement from the Los Angeles Times, Mar. 22, 1974]

"BEHOLD HOW GOOD AND HOW PLEASANT IT IS FOR BRETHREN TO DWELL TOGETHER IN UNITY." PSALMS 133

As Black elected officials we feel impelled to speak out on the seemingly endless tensions, alarms, and bloody collisions in the Middle East. We speak with compassion for the ordeal of Arabs and Jews caught in the continuing hostilities. We speak in the certainty that this may be the decisive period for establishing the future pattern of war or peace in that area—with far-reaching implications for the future of America and the world.

The agonies of the Israelis and Arabs will only be prolonged, and world peace jeopardized, by continuing armed violations such as that of the Yom Kippur war.

The existence of Israel as a sovereign state must be affirmed with finality by the world. Israel's right to secure and viable boundaries must be recognized by her Arab neighbors. Differences between them must be resolved by face to face negotiations. There is clearly no other road to enduring peace.

As Black Americans who have suffered disadvantage and discrimination and inequality, we feel a particular identity with Israel's aspirations to bring together people from vastly different backgrounds and to provide them all—including Arab and Jew alike—with the benefits of democracy and an advanced social system.

Out of our own experience in the world we understand the nature of oppression and racism. Forces of genocidal racism have encompassed the mass murder of six million Jews and have driven Jews from many lands. Similar tides of racism have swept over Blacks on every continent down through history.

We must never permit Israel to be destroyed. The Soviet Union has employed its vast power to stir dissension, incite violence, and arm aggressive groups to spill more blood in the Middle East.

To counter this, the United States' role should be to provide all necessary material aid to Israel, to insist upon recognition of Israel by her neighbors, to encourage their face to face negotiation and to propose constructive solutions.

As Black legislators we will work through American institutions to press for this policy. We appeal to all Americans to join with us in support of Israel's struggle to live and be free.

Yvonne B. Burke, Member of Congress, 37th District.

Mervyn M. Dymally, Senator, Co-Chairman, Nat'l Conference of Black Elected Officials.

Frank Holoman, Assemblyman, Vice-Chairman, Committee on Government Operations.

Willie Brown, Assemblyman, Assembly Ways & Means Committee.

Bill Greene, Assemblyman, Chairman, Assembly, Select Committee on Manpower Development.

John Miller, Assemblyman, Chairman, California Black Legislative Caucus.

Julian C. Dixon, Assemblyman, California Conference of Black Elected Officials.

Augustus F. Hawkins, Member of Congress, 21st District.

Leon Ralph, Assemblyman, Chairman, L.A. Conference of Black Elected Officials.

Sponsored by the "Youth Committee for Peace and Democracy in the Middle East", 1506 Sargent Pl., Los Angeles, CA 90026.—

George Curtin, Chairman; Ken Orduna, Co-Chairman.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. HUTTO (at the request of Mr. WRIGHT), after 5 p.m. today, on account of a medical emergency in the family.

Mr. FORD of Michigan (at the request of Mr. WRIGHT), for today, on account of a necessary absence.

Mr. CARNEY (at the request of Mr. MICHEL), for today, on account of official business.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. HILER) to revise and extend their remarks and include extraneous material:)

Ms. FIEDLER, for 60 minutes, August 17.

(The following Members (at the request of Mr. GONZALEZ) to revise and extend their remarks and include extraneous material:)

Mr. SYNAR, for 5 minutes, today.

Mr. GONZALEZ, for 15 minutes, today.

Mr. ANNUNZIO, for 5 minutes, today.

Mr. COELHO, for 5 minutes, today.

Mr. OBERSTAR, for 5 minutes, today.

Mr. GORE, for 30 minutes, today.

Mr. NELSON, for 5 minutes, today.

Mr. FASCELL, for 5 minutes, today.

Mr. DYMALLY, for 10 minutes, today.

Mr. HUBBARD, for 5 minutes, today.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. WEISS, immediately preceding vote on H.R. 5427, today.

(The following Members (at the request of Mr. HILER) and to include extraneous matter:)

Mr. CONTE.

Mr. DAUB.

Mr. YOUNG of Alaska.

Mr. SCHULZE.

Mr. RUDD.

Mr. GILMAN in three instances.

Mr. DERWINSKI in three instances.

Mr. LAGOMARSINO.

Mr. CARMAN.

Mr. MARLENEE.

Mr. SHUMWAY in two instances.

Mr. PARRIS.

Mr. EVANS of Iowa.

Mr. HUNTER.

Mrs. MARTIN of Illinois.

Mr. DREIER.

Mr. COLLINS of Texas in two instances.

Mr. HAGEDORN.

Mr. PORTER.

(The following Members (at the request of Mr. GONZALEZ) and to include extraneous matter:)

Mr. OBERSTAR.

ADJOURNMENT

Mr. DYMALLY. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to: accordingly (at 10 o'clock and 16 minutes p.m.), the House adjourned until tomorrow, Wednesday, August 11, 1982, at 10 a.m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

4566. A letter from the Clerk, U.S. House of Representatives, transmitting his quarterly report of receipts and expenditures for the period April 1 through June 30, 1982, pursuant to section 105(a) of Public Law 88-454, as amended (H. Doc. No. 97-223); to the Committee on House Administration and ordered to be printed.

4567. A letter from the Chairman, Council of the District of Columbia, transmitting D.C. Act 4-238, "D.C. Theft and White Collar Crimes Act of 1982", pursuant to section 602(c) of Public Law 93-198; to the Committee on the District of Columbia.

4568. A letter from the Acting Director, Defense Security Assistance Agency, transmitting the Army's proposed lease of defense articles to Australia (Transmittal No. 15-82), pursuant to section 62(a) of the Arms Export Control Act; to the Committee on Foreign Affairs.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. HOWARD: Committee on Public Works and Transportation. H.R. 4230. A bill to facilitate the transportation of coal by pipeline across Federal and non-Federal lands; with an amendment (Rept. No. 97-423, Part II). Referred to the Committee of the Whole House on the State of the Union.

Mr. DE LA GARZA: Committee on Agriculture. Report on allocation of budget totals for fiscal years 1982 and 1983 (Rept. No. 97-703). Referred to the Committee of the Whole House on the State of the Union.

Mr. SAM B. HALL, JR.: Committee on the Judiciary. H.R. 6204. A bill to amend title 28 of the United States Code and related statutes with respect to the appointment and jurisdiction of the Supreme Court Police; with amendments (Rept. No. 97-704). Referred to the Committee of the Whole House on the State of the Union.

Mr. PERKINS: Committee on Education and Labor. Report of the Committee on Education and Labor pursuant to section 302(b) of the Congressional Budget Act of 1974 (Rept. No. 97-705). Referred to the Committee of the Whole House on the State of the Union.

Mr. MOAKLEY: Committee on Rules. House Resolution 555. Resolution providing for the consideration of H.R. 5543, a bill to establish an Ocean and Coastal Resources Management and Development Fund and to require the Secretary of Commerce to provide to coastal States national ocean and resources management and development block grants from sums in the Fund (Rept. No. 97-706). Referred to the House Calendar.

Mr. BONIOR of Michigan: Committee on Rules. House Resolution 556. Resolution providing for the consideration of H.R. 6666, a bill to amend the joint resolution of October 19, 1965, to provide additional authorization for the Library of Congress James Madison Memorial Building (Rept. No. 97-707). Referred to the House Calendar.

Mr. HALL of Ohio: Committee on Rules. House Resolution 557. Resolution providing for the consideration of H.R. 6786, a bill to amend Public Law 96-432 relating to the U.S. Capitol Grounds to authorize additional funds for the acquisition of certain property for addition to the U.S. Capitol Grounds (Rept. No. 97-708). Referred to the House Calendar.

Mr. UDALL: Committee on Interior and Insular Affairs. H.R. 6419. A bill to direct the Secretary of the Interior to release certain conditions contained in a patent concerning certain land conveyed by the United States to Eastern Washington University; with amendments (Rept. No. 97-709). Referred to the Committee of the Whole House on the State of the Union.

Mr. UDALL: Committee on Interior and Insular Affairs. H.R. 6029. A bill to authorize the Secretary of the Interior to acquire by exchange certain lands within the Indiana Dunes National Lakeshore in the State of Indiana; with an amendment (Rept. No. 97-710). Referred to the Committee of the Whole House on the State of the Union.

Mr. UDALL: Committee on Interior and Insular Affairs. H.R. 5627. A bill to direct the Secretary of the Interior to release certain restrictions contained in a previous con-

veyance of land to the State of Florida and to allow the State of Florida to purchase the mineral interests of the United States in such land; with amendment (Rept. No. 97-711). Referred to the Committee of the Whole House on the State of the Union.

Mr. UDALL: Committee on Interior and Insular Affairs. H.R. 5536. A bill to authorize the Secretary of the Interior to engage in feasibility studies of water resource development and for other purposes in the Central Platte Valley, Nebr.; with amendment (Rept. No. 97-712). Referred to the Committee of the Whole House on the State of the Union.

Mr. UDALL: Committee on Interior and Insular Affairs. H.R. 6188. A bill to authorize the Secretary of the Interior to participate with the State of Nebraska in studies of Platte River water resource use and development, and for other purposes; with an amendment (Rept. No. 97-713). Referred to the Committee of the Whole House on the State of the Union.

Mr. BOLAND: Committee on Appropriations. H.R. 6956. A bill making appropriations for the Department of Housing and Urban Development, and for sundry independent agencies, boards, commissions, corporations, and offices for the fiscal year ending September 30, 1983, and for other purposes (Rept. No. 97-720). Referred to the Committee of the Whole House on the State of the Union.

Mr. SMITH of Iowa: Committee on Appropriations. H.R. 6957. A bill making appropriations for the Departments of Commerce, Justice, and State, the Judiciary, and related agencies for the fiscal year ending September 30, 1983, and for other purposes (Rept. No. 97-721). Referred to the Committee of the Whole House on the State of the Union.

Mr. MINETA: Committee of Conference. Conference Report on H.R. 5930 (Rept. No. 97-722). And ordered to printed.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. FISH: Committee on the Judiciary. S. 215. An act for the relief of Lourie Ann Eder (Rept. No. 97-714). Referred to the Committee of the Whole House.

Mr. SAM B. HALL, JR.: Committee on the Judiciary. S. 167. An act for the relief of Juan Esteban Ramirez (Rept. No. 97-715). Referred to the Committee of the Whole House.

Mr. FISH: Committee on the Judiciary. H.R. 684. A bill for the relief of Kang Ok Boon; with amendments (Rept. No. 97-716). Referred to the Committee of the Whole House.

Mr. MAZZOLI: Committee on the Judiciary. H.R. 1481. A bill for the relief of George Herbert Weston and Mabel Gregson Weston; with amendments (Rept. No. 97-717). Referred to the Committee of the Whole House.

Mr. FISH: Committee on the Judiciary. H.R. 2193. A bill for the relief of Berendina Antonia Maria van Kleeff; with amendments (Rept. No. 97-718). Referred to the Committee of the Whole House.

Mr. MAZZOLI: Committee on the Judiciary. H.R. 6811. A bill for the relief of Alejo White and Sonia White (Rept. No. 97-719).

Referred to the Committee of the Whole House.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. WHITE (for himself, Mr. STRATTON, Mr. MOLLOHAN, Mr. DAN DANIEL, Mr. ASPIN, Mr. MAVROULES, Mr. ROBERT W. DANIEL, JR., and Mr. NELLIGAN):

H.R. 6954: A bill to amend title 10, United States Code, to provide for more efficient and effective operation of the Joint Chiefs of Staff and to establish a Senior Strategy Advisory Board in the Department of Defense; to the Committee on Armed Services.

By Mr. JONES of Oklahoma:

H.R. 6955: A bill to provide for reconciliation pursuant to the first concurrent resolution on the budget for fiscal year 1983 (S. Con. Res. 92, 97th Congress); which was considered and passed.

By Mr. BOLAND:

H.R. 6956. A bill making appropriations for the Department of Housing and Urban Development, and for sundry independent agencies, boards, commissions, corporations, and offices for the fiscal year ending September 30, 1983, and for other purposes.

By Mr. SMITH of Iowa:

H.R. 6957. A bill making appropriations for the Departments of Commerce, Justice, and State, the Judiciary, and related agencies for the fiscal year ending September 30, 1983, and for other purposes.

By Mr. COLLINS of Texas:

H.R. 6958. A bill to amend title 18 of the United States Code to permit the plea and verdict of guilty but mentally ill in Federal criminal cases, and to establish the consequences of such a verdict; to the Committee on the Judiciary.

By Mr. EVANS of Iowa:

H.R. 6959. A bill to amend the Internal Revenue Code of 1954 to exclude from the Federal estate tax 50 percent of the value of farmland having no significant degradation of agricultural productivity in each of the 5 years ending before the date of the decedent's death; to the Committee on Ways and Means.

By Mr. KASTENMEIER:

H.R. 6960. A bill to amend chapter 207 of title 18 of the United States Code to provide that the safety of other persons and the community can be considered in the setting of conditions of release before trial in Federal criminal cases, to provide for detention before trial in certain cases, and for other purposes; to the Committee on the Judiciary.

Mr. LAGOMARSINO:

H.R. 6961. A bill to disallow the Secretary of the Interior from issuing oil and gas leases with respect to a geographical area located in the Pacific Ocean off the coastline of the State of California; to the Committee on Interior and Insular Affairs.

By Mr. MILLER of California (for himself, Mr. FROST, Mr. BEVILL, Mr. RATCHFORD, Mr. ECKART, Mr. D'AMOURS, Mrs. SCHROEDER, Mr. MATTOX, Mr. HUGHES, Mr. BONIOR of Michigan, Mr. FAZIO, Mr. VENTO, Mr. GORE, Mr. AKAKA, Mr. LUNDINE, Mr. HARKIN, Mr. WILLIAM J. COYNE, Mr. STARK, and Mr. SMITH of Iowa):

H.R. 6962. A bill entitled "The Pay As You Go Balanced Budget Act of 1982"; jointly, to the Committees on Rules and Government Operations.

By Mr. ROEMER:

H.R. 6963. A bill to redesignate the building known as the Veterans' Administration Medical Center in Shreveport, La., as the "T. Overton Brooks Memorial Veterans' Administration Medical Center"; to the Committee on Veterans' Affairs.

By Mr. SKELTON:

H.R. 6964. A bill to amend title II of the Social Security Act to provide for the establishment of appropriate accounting procedures to deal with social security benefit checks which are not negotiated within 36 months; to the Committee on Ways and Means.

By Mr. ANDERSON (for himself, Mr. HOWARD, Mr. CLAUSEN, and Mr. SHUSTER):

H.R. 6965. A bill to authorize for fiscal year 1983 appropriations for construction of certain highways in accordance with title 23, United States Code, for highway safety, mass transportation in urban and rural areas, and for other purposes; to the Committee on Public Works and Transportation.

By Mr. MILLER of California (for himself, Mr. BARNES, Mr. BEDELL, Mr. BEILSON, Mr. BIAGGI, Mr. BINGHAM, Mrs. BOGGS, Mr. BOLAND, Mr. BONIOR of Michigan, Mr. BRODHEAD, Mr. JOHN L. BURTON, Mr. CORRADA, Mr. DELLUMS, Mr. DOWNEY, Mr. EDGAR, Mr. EDWARDS of California, Mr. FAUNTROY, Ms. FERRARO, Mr. FOGLIETTA, Mr. FORD of Tennessee, Mr. FORD of Michigan, Mr. FRANK, Mr. GUARINI, Mr. HARKIN, Mr. HOYER, Mr. HUGHES, Mr. KASTENMEIER, Mrs. KENNELLY, Mr. KILDEE, Mr. LANTOS, Mr. LEHMAN, Mr. LOWRY of Washington, Mr. McDADDE, Mr. McHUGH, Mr. MATSUI, Ms. MIKULSKI, Mr. MINETA, Mr. MOFFETT, Mr. OBERSTAR, Mr. OTTINGER, Mr. PATTERSON, Mr. PEPPER, Mr. PERKINS, Mr. PEYSER, Mr. RICHMOND, Mr. RODINO, Mr. ROYBAL, Mr. SCHUEER, Mrs. SCHNEIDER, Mrs. SCHROEDER, Mr. SHAMANSKY, Mr. SIMON, Mr. SOLARZ, Mr. STARK, Mr. STOKES, Mr. STUDDS, Mr. VENTO, Mr. WALGREN, Mr. WASHINGTON, Mr. WEISS, Mr. WIRTH, Mr. WYDEN, and Mr. YATES):

H.J. Res. 567. Joint resolution concerning changes in regulations for the special supplemental food program for women, infants, and children of the Child Nutrition Act of 1966; to the Committee on Education and Labor.

By Mr. BIAGGI (for himself, Mr. RICHMOND, Mr. WEISS, Mr. BRODHEAD, Mr. FITHIAN, Mr. PEPPER, Mr. McGRATH, Mr. MARKEY, Mr. HORTON, Mr. BEDELL, Mr. SMITH of New Jersey, Mr. SANTINI, Mr. MOAKLEY, Mr. WON PAT, Mr. HOYER, Mr. FORD of Tennessee, Mr. STARK, Mr. RODINO, Mr. DOWNEY, Mr. BINGHAM, Mrs. CHISHOLM, Mr. ADDABBO, Mr. GEJENSON, Mr. HOPKINS, Mr. RATCHFORD, Mr. WOLPE, Mr. EDGAR, Mr. GILMAN, Mr. GORE, Mr. MILLER of California, Mr. ROE, Mr. PEYSER, Mr. FOGLIETTA, Mr. BONER of Tennessee, Mr. MARTINEZ, and Mr. WORTLEY):

H. Res. 558. Resolution expressing the sense of the House of Representatives that regulations recently proposed by the Secretary of Education under the Education of

the Handicapped Act should not be permitted to take effect; to the Committee on Education and Labor.

MEMORIALS

Under clause 4 of rule XXII,

455. The SPEAKER presented a memorial of the House of Representatives of the Northern Marianas Commonwealth, relative to trusteeship agreement for the former Japanese mandated islands; to the Committee on Foreign Affairs.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII,

AMENDMENTS

Under clause 6 of rule XXIII, proposed amendments were submitted as follows:

H.R. 5203

By Mr. MCHUGH:

—Page 40, line 14, insert "(a)" after "Sec. 4."

Page 41, line 12, strike out "and" and insert in lieu thereof the following new paragraph:

(3) striking out "(ii) a request for a hearing is made by a person adversely affected by the notice," and inserting in lieu thereof "(ii) a request for a hearing is made by any interested person, including any person adversely affected by the Administrator's failure to propose action providing for greater restrictions on the use of the pesticide involved, for a more rapid phasing out of its registration, or for a change in its classification."; and

Page 41, line 13, strike out "(3)" and insert in lieu thereof "(4)".

Page 42, after line 2, insert the following new subsection:

(b) The first sentence of section 6(e)(2) of the Federal Insecticide, Fungicide, and Rodenticide Act is amended by striking out "a person adversely affected by the notice," and inserting in lieu thereof "any interested person, including any person adversely affected by the Administrator's determination with respect to the disposition of existing stocks."

By Mr. LEVITAS:

—Page 42, strike out line 3 and all that follows through line 20 on page 52, and insert in lieu thereof the following:

DISCLOSURE OF INFORMATION TO FOREIGN AND MULTINATIONAL PESTICIDE PRODUCERS

SEC. 5. (a) Section 10(g) of the Federal Insecticide, Fungicide, and Rodenticide Act is amended—

(1) by redesignating paragraphs (2) and (3) as paragraphs (3) and (4), respectively;

(2) by adding at the end thereof the following new paragraph:

"(2)(A) Before allowing such person to inspect data, and before disclosing such information to a person under section 552 of title 5, United States Code, or any other law, the Administrator shall require the person in-

volved to submit a written request for inspection or disclosure and a signed affirmation specified in subparagraph (D).

"(B) The Administrator shall transmit a copy of the request and affirmation to the applicant or registrant who submitted the data or information with respect to which inspection or disclosure is requested. During the 30-day period beginning on the date such copy is transmitted, such applicant or registrant may submit to the Administrator evidence that such person is ineligible under this subsection to inspect such data or receive such information.

"(C) After the expiration of such 30-day period, the Administrator may allow such inspection of data, and may disclose such information, as authorized by other provisions of law only if the Administrator determines that such person is eligible under this subsection to inspect such data or receive such information. For purposes of making such determination, the Administrator may refer to the Attorney General for investigation, the matter of such person's eligibility.

"(D) For purposes of complying with this subsection, the Administrator may accept only the following affirmation:

"I have requested access to information submitted by an applicant or registrant under the Federal Insecticide, Fungicide, and Rodenticide Act (7 U.S.C. 136 et seq.) to the Environmental Protection Agency. I hereby affirm:

"(1) That I do not seek access to the information for purposes of delivering it or offering it for sale to any business or other entity engaged in the production, sale, or distribution of pesticides in countries other than the United States or in addition to the United States or its agents or employees; and

"(2) That I will not purposefully deliver or negligently cause the data to be delivered to such business or entity or its agents or employers.

"I am aware that I may be subject to criminal penalties under 18 U.S.C. 1001 if I have made any statement of material facts knowing that such statement is false or if I willfully conceal any material fact.

(b) Section 10 of the Federal Insecticide, Fungicide, and Rodenticide Act is amended by—

Page 52, line 21, strike out "(7)" and insert in lieu thereof "(1)".

Page 53, line 2, insert "involving the production, registration, distribution, or sale of a pesticide" after "purpose".

Page 53, line 10, insert "and" at the end thereof.

Page 53, line 11, strike out "(8)" and insert in lieu thereof "(2)".

Page 53, line 22, insert a period at the end thereof.

Page 55, beginning on line 11, strike out "or under regulations promulgated under section 10(d)(2)".

Page 61, beginning on line 17, strike out "Notwithstanding the provisions of section 10(g)(2) of this Act, but subject" and insert in lieu thereof "Subject".

Page 73, after line 21, insert the following new section:

STUDY OF DISCLOSURE OF SUBMITTED INFORMATION

SEC. 17. The Administrator of the Environmental Protection Agency shall enter

into an agreement with the National Academy of Sciences, which provides that the National Academy of Sciences—

(1) shall conduct a study to determine with respect to the disclosure of information under section 10(d) of the Federal Insecticide, Fungicide, and Rodenticide Act—

(A) the type and volume of information disclosed under such section;

(B) the type or volume of information which the Administrator refused to disclose under such section;

(C) the economic result of the disclosure of information under such section on the submitter of such information;

(D) the effects of the refusal to disclose information under such section on competition among pesticide producers;

(E) the effects of the disclosure of, and the refusal to disclose, information under such section on research and development of pesticides and pest control methods; and

(F) the extent to which the refusal to disclose information under this section has reduced the capacity of scientists to make accurate determinations with respect to any adverse effects of a pesticide on health and the environment; and

(2) shall submit to the Commission on Agriculture, Nutrition, and Forestry of the Senate and the Committee on Agriculture of the House of Representatives a report, not later than 2 years after the date of the enactment of this Act, stating its—

(A) findings with respect to the matters described in paragraph (1); and

(B) any legislative and administrative recommendations based on such findings.

Page 74, strike out line 1 and all that follows through line 23 on page 84.

By Mr. GLICKMAN:

—On page 53, delete all after the word "violation" on line 4 through the word "violation" on line 7.

By Mr. SMITH of Alabama:

—Delete the period after the word "farmworkers"

On page 71, line 14 add the following: "and members of their families including their unborn children from the moment of conception who are exposed to pesticides. The Congress hereby further finds and declares that it is a fundamental principle of American law to recognize and affirm the intrinsic value of all human life and that each human life exists from conception and that the administrator shall carefully consider the intrinsic value of all human life in considering the safe use of pesticides."

By Mr. BARNES:

—Page 84, after line 23, insert the following new section:

REPORT ON IMPACT OF RESTRICTIONS ON DISCLOSURE OF CERTAIN INFORMATION TO FOREIGN GOVERNMENTS

SEC. 18. (a) Not later than 300 days after the date of the enactment of this Act, the Administrator of the Environmental Protection Agency shall publish a document in the Federal Register which contains proposed findings and conclusions of the Administrator with respect to the following:

(1) The nature and extent of the impact which the prohibition imposed by section 10(g)(2) of the Federal Insecticide, Fungicide, and Rodenticide Act on disclosure of information described in paragraphs (1)(A), (1)(B), (1)(C), and (3) of section 10(d) of such Act to foreign governments and international organizations of countries has on the Administrator's ability—

(A) to obtain information from such governments and organizations which is necessary to effectively carry out the Administra-

tor's responsibilities under such Act, especially the Administrator's responsibilities with respect to protecting humans and the environment from unreasonable adverse effects of pesticides; and

(B) to cooperate with such governments and organizations with respect to the development of pesticide research and regulations.

(2) The willingness of persons associated with the pesticide industry to disclose, or to consent to the disclosure of, such information to such governments and organizations in cases in which such disclosure is necessary to protect humans and the environment from unreasonable adverse effects of pesticides.

(b) During the 60-day period beginning on the date of the publication of the document described in subsection (a), the Administrator of the Environmental Protection Agency shall allow interested persons to submit written comments with respect to the proposed findings and conclusions contained in such document.

(c) Not later than 30 days after the end of the period described in subsection (b), the Administrator of the Environmental Protection Agency, after considering any comments submitted under such subsection, shall submit to the President of the Senate and to the Speaker of the House of Representatives a report containing final findings and conclusions of the Administrator with respect to the matters specified in subsection (a).

H.R. 5595

By Mr. PARRIS:

—Page 2, line 8, insert ". Of any funds appropriated for the fiscal year ending on September 30, 1983, under the authorization contained in this section, not less than \$14,300,000 must be paid to the District of Columbia Retirement Board to eliminate any deficits in the District of Columbia Teachers' Retirement Fund and the District of Columbia Police Officers and Fire Fighters' Retirement Fund" after "the sum of \$361,000,000".

H.R. 6046

By Mr. ZABLOCKI:

—Page 12, strike out line 7 and all that follows through line 13 on page 13 and insert in lieu thereof the following:

"(2) For the purposes of this section, a political offense does not include—

"(A) an offense within the scope of the Convention for the Suppression of Unlawful Seizure of Aircraft (signed at The Hague on December 16, 1970);

"(B) an offense within the scope of the Convention for the Suppression of Unlawful Acts Against the Safety of Civil Aviation (signed at Montreal on September 23, 1971);

"(C) a serious offense involving an attack against the life, physical integrity, or liberty of internationally protected persons (as defined in section 1116 of this title), including diplomatic agents;

"(D) an offense with respect to which a multilateral treaty obligates the United States to either extradite or prosecute a person accused of the offense;

"(E) an offense that consists of the manufacture, importation, distribution, or sale of narcotics or dangerous drugs;

"(F) rape; or

"(G) an attempt or conspiracy to commit an offense described in subparagraphs (A) through (F) of this paragraph, or participation as an accomplice of a person who commits, attempts, or conspires to commit such an offense.

"(3) For the purposes of this section, a political offense, except in extraordinary circumstances, does not include—

"(A) an offense that consists of homicide, assault with intent to commit serious bodily injury, kidnapping, the taking of a hostage, or a serious unlawful detention;

"(B) an offense involving the use of a firearm (as such term is defined in section 921 of this title) if such use endangers a person other than the offender; or

"(C) an attempt or conspiracy to commit an offense described in subparagraph (A) or (B) of this paragraph, or participation as an accomplice of a person who commits, attempts, or conspires to commit such an offense.

"Page 13, line 14, strike out "(3)" and insert in lieu thereof "(4)".

—Page 13, immediately after line 23, insert the following:

"(C) In determining the application of subparagraphs (A) and (B) of this paragraph, the Secretary of State shall consult with the appropriate Bureaus and Offices of the Department of State, including the Bureau of Human Rights and Humanitarian Affairs.

—Page 18, at the end of line 18, insert the following: "The Secretary of State, in ordering the surrender of a person extraditable under this chapter, shall make every effort to ensure that the requesting state will comply with relevant international law, including international law relating to the protection of human rights."

H.R. 6100

By Mr. HAGEDORN:

—Page 28, line 16, strike out "All" and insert in lieu thereof "(a) Except as provided in subsection (b), all".

Page 29, after line 5, insert the following:

(b) If, on any portion of a project assisted by the Secretary under this Act, the lowest bid on construction work, not based on paying wages in accordance with the Davis-Bacon Act, as amended (40 U.S.C. 276a-276a-5), is at least 10 percent less than the lowest bid based on paying wages for such work in accordance with such Act, and the bid of the contractor or subcontractor whose bid, not based on paying wages in accordance with such Act, is accepted, subsection (a) of this section shall not apply to such construction work.

H.R. 6214

By Mr. PATTERSON:

—Page 24, after line 22, add the following new section:

PROHIBITION ON CONSTRUCTION OF HOUSING UNITS AT LOS ALAMITOS ARMED FORCES RESERVE CENTER

SEC. 206. None of the housing units authorized by section 204(c) to be constructed for the Long Beach Naval Station, Long Beach, California, may be constructed at the Los Alamitos Armed Forces Reserve Center, Los Alamitos, California.

By Mr. DELLUMS:

—Page 29, strike out lines 13, 14 and 15.

—Page 29, line 15, strike out "\$103,000,000" and insert in lieu thereof the following: "\$36,700,000".

By Mr. HARKIN:

—At the end of the bill add the following new section:

RESTRICTION ON CONSTRUCTION OF AIR FIELDS IN HONDURAS

SEC. 806. None of the funds appropriated pursuant to an authorization contained in

this Act may be obligated or expended to improve, expand, extend, acquire, construct, convert, rehabilitate, or install a permanent or temporary air field or air base (including any facility in connection with an air field or air base) in Honduras.

H.R. 6308

By Mr. MATSUI:

(To the amendment in the nature of a substitute.)

—Page 2, lines 3 and 4, strike out “amended by adding at the end a new subsection as follows:” and insert in lieu thereof the following:

amended—

(1) by amending subsection (h)(1) to read as follows:

“(h)(1)(A) The Secretary shall, within one year after the date of enactment of the Federal Railroad Safety Authorization Act of 1982, issue initial rules, regulations, orders, and standards as may be necessary to insure that the construction, maintenance, and operation of railroad passenger equipment maximize safety to rail passengers. The Secretary shall, as a part of such rulemaking, consider comparable Federal regulations and procedures which apply to other modes of transportation, especially those administered and enforced by the Federal Aviation Administration. The Secretary shall periodically review such rules, regulations, orders, and standards and shall, after a hearing in accordance with subsection (b) of this section, make such revisions in such rules, regulations, orders, and standards as may be necessary.”;

(2) by redesignating subsection (h)(2) as subsection (h)(1)(B);

(3) by striking out “subsection” in subsection (h)(1)(B), as redesignated by paragraph (2) of this section, and inserting in lieu thereof “paragraph”;

(4) by inserting after subsection (h)(1)(B), as so redesignated, a new paragraph as follows:

“(2) The Secretary shall, within two years after the date of enactment of the Federal Railroad Safety Authorization Act of 1982, issue initial rules, regulations, orders, and standards as may be necessary to require initial and periodic subsequent training of on-board railroad operating and service personnel in evacuation procedures and the use of emergency equipment. The Secretary shall, as a part of such rulemaking, consider comparable Federal regulations and procedures which apply to other modes of transportation, especially those administered and enforced by the Federal Aviation Administration. The Secretary shall periodically review such rules, regulations, orders, and standards and shall, after a hearing in accordance with subsection (b) of this section, make such revisions in such rules, regulations, orders, and standards as may be necessary.”;

(5) by redesignating subsection (h)(4) as subsection (h)(5);

(6) by inserting after subsection (h)(3) a new paragraph as follows:

“(4) The Secretary shall submit to the Congress a report—

“(A) within one year after the date of enactment of the Federal Railroad Safety Authorization Act of 1982 with respect to rules, regulations, orders, and standards issued under paragraph (1) of this subsection, and

“(B) within two years after the date of enactment of the Federal Railroad Safety Authorization Act of 1982 with respect to rules, regulations, orders, and standards issued under paragraph (2) of this subsection,

which describes any rules, regulations, orders, and standards issued or to be issued under this subsection, explains the reasons for their issuance, and compares them to comparable Federal regulations and procedures which apply to other modes of transportation, especially those administered and enforced by the Federal Aviation Administration.”; and

(7) by adding at the end a new subsection as follows:

H.R. 6324

By Mrs. SMITH of Nebraska:

—At the end of title II, add the following new section:

Sec. 205. (a) The Secretary of Commerce (hereinafter in this section referred to as the “Secretary”), at least 60 days before making a determination as to the necessity for the closing or consolidation of any Weather Service Office (whether such determination is made pursuant to the plan described in section 2204(3) or is made without regard to such plan), shall provide adequate public notice of his intention to make such a determination in order to ensure that all persons served by such Office will have an adequate opportunity to present their views.

(b)(1) The Secretary, in deciding whether or not to close or consolidate a Weather Service Office, shall take fully into account any views expressed by persons served by such Office during the 60-day period described in subsection (a), and shall specifically consider—

(A) the effect of such closing or consolidation on the community served by such Weather Service Office;

(B) the effect of such closing or consolidation on employees of the National Weather Service employed at such Office;

(C) the economic savings to the National Weather Service resulting from such closing or consolidation; and

(D) such other factors as the National Weather Service determines are necessary.

(2) In making a decision under paragraph (1) the Secretary may hold such hearings as he deems necessary.

(3) The Secretary shall compile a written record including or reflecting all views presented and information received or developed in the course of his consideration of the matters involved in making such a decision, whether or not hearings are held with respect thereto as authorized by paragraph

(2). The Secretary shall retain all written materials received or developed in the course of such consideration, for possible use by the Federal Committee for Meteorological Services and Supporting Research under subsection (e).

(c) Any decision of the Secretary to close or consolidate a Weather Service Office shall be in writing and shall set forth the findings of the Secretary with respect to the matters set forth in subparagraphs (A) through (D) of subsection (b)(1) along with a statement of the reasons for such findings and of the basis on which the decision was made. The Secretary's decision shall be made available to persons served by such Weather Service Office.

(d) The Secretary shall take no action to close or consolidate a Weather Service Office until 60 days after his written decision is made available to persons served by such Office as required by the last sentence of subsection (c).

(e) A decision of the Secretary to close or consolidate any Weather Service Office may be appealed by any person served by such Office to the Federal Committee for Meteorological Services and Supporting Research within thirty days after such decision is made available under the last sentence of subsection (c). The Committee shall review such decision on the basis of the record compiled by the Secretary under subsection (b)(3) in the making of such decision; and in the course of such review the Committee may obtain and inspect the written materials retained by the Secretary under the last sentence of subsection (b)(3). The Committee shall make a determination based upon such review no later than one hundred and twenty days after receiving any appeal under this subsection. The Committee shall set aside any such decision which is found to be—

(1) arbitrary, capricious, and abuse of discretion, or otherwise not in accordance with the law;

(2) without observance of procedure required by law; or

(3) unsupported by substantial evidence on the record.

The Committee may affirm the decision of the Secretary or order that the entire matter be returned for further consideration, but the Committee may not modify the decision. The Committee may suspend the effectiveness of the decision until the final disposition of the appeal (within the time prescribed by the third sentence of this subsection) in any case where the closing or consolidation involved might otherwise occur before the Committee's determination under this subsection can be made.

(f) Any determination or decision made by the Administrator of the National Oceanic and Atmospheric Administration with respect to the closing or consolidation of a Weather Service Office shall be considered for purposes of this section to have been made by the Secretary.

EXTENSIONS OF REMARKS

SPECIAL WARFARE ASSAULT CRAFT AND FORCES: AN INTERNATIONAL PERSPECTIVE

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 10, 1982

● Mr. McDONALD. Mr. Speaker, special warfare units of the United Kingdom played a crucial role in the British success in the Falklands. Since Vietnam, our own special warfare units have been reduced and little notice has been given to them, except for a brief flare of publicity over the ill-fated rescue attempt in Iran. David Fitzgerald, himself a former SEAL, has written an article on special warfare that appeared in *Military Technology* magazine for May 1982. In my view, this type of warfare needs more attention from our military leaders, and Mr. Fitzgerald's article provides a good forum for discussion of the naval aspects of special warfare. The article follows:

SPECIAL WARFARE ASSAULT CRAFT AND FORCES: AN INTERNATIONAL PERSPECTIVE
(By David Fitzgerald)

(America's war in Vietnam has increasingly been a topic for analysis among those scholars and analysts who are attempting to draw some conclusion from that unfortunate experience for future U.S. military operations, both with respect to strategy and tactics. Most of the military analysis to date has focused on the large issues such as the effectiveness of the pacification programs, the costs and benefits of Vietnamization or the utility of the bombing campaign in the north.)

Unaddressed as yet, however, have been some special military issues, one of which was dramatized by Francis Ford Coppola in "Apocalypse Now," an updated rendition of Joseph Conrad's classic *Heart of Darkness*, that is riverine warfare and special operations. While perhaps a sideshow of the major conflict, the U.S. devoted significant assets to controlling the Mekong River with somewhat greater success than in other areas of the war.

The American experience with riverine warfare in Vietnam is not so important as an aspect of that war, but it does hold some significance in that it would well reflect an important dimension of naval warfare in the future. Although the British fleet has been dispatched to the Falkland Islands in a naval exercise reminiscent of traditional naval missions, the British effort in the South Atlantic could well be the exception to the rule in the future. If, as seems likely, the majority of conflicts witnessed by the world during the next decade will be in those of irregular warfare and in areas of the globe defined as the Third World. Large scale naval encounters of the World War II variety, let alone Trafalgar, will not occur. The most likely will be the use of smaller, unconventional naval forces in specialized

roles. During the last decade, technology has combined with geopolitical change, such as a new law of the sea regime, to propel a proliferation of missile-armed fast patrol craft around the globe. For the most part, these vessels are used for routine patrol activities. In some cases, however, small naval craft are being developed for specialized tasks that, in some military confrontations in the Third World especially, could spell the difference between naval success and failure. It is this Special Warfare and its implications for naval technology that the remainder of this essay is addressed.

Special Warfare is a limited, but dangerous, activity. Those trained for Naval Special Warfare are highly motivated and prepared for unconventional military actions in and near hostile waters to reconnoiter and clear beaches, blow up bridges, attach mines by swimmer attack to docked ships in enemy areas, and generally conduct direct highly sensitive missions against an unsuspecting enemy. Most usually they are organized into underwater demolition teams as frogmen or, in the U.S. case at least, into SEAL (Sea-Air-Land) Teams.

It is important to understand what Special Warfare is not. By Special Warfare, one is not referring to amphibious assault, the capability for forcible entry into hostile areas from the sea by large numbers of marines. Amphibious assault remains an important naval mission and an amphibious capability is a vital component for any navy seeking the ability to project power. It differs from Special Warfare, however, in that the goal of an amphibious assault is often the direct defeat of enemy forces whereas the goal of Special Warfare differs significantly. Special Warfare is often designed to have an indirect impact by disrupting the enemy's ability to conduct military operations through attacks on his logistical pipeline and political and military infrastructure. Amphibious assault is frequently straightforward; Special Warfare often uses deception and capitalizes on unique intelligence, equipment, and experienced personnel. The difference can be seen in alternative plans that have been put forward for the British recapture of the Falkland Islands. Some have suggested an over-the-beach assault by British marines to defeat entrenched Argentine troops. Others have suggested first inserting special commando squads of royal marines at night which could engage in special operations to disrupt Argentine capabilities prior to a British assault.

Special Warfare must also be distinguished from the new tasks imposed on maritime forces as a consequence of the changing maritime environment flowing from the establishment of 12-mile territorial waters, 200-mile Exclusive Economic Zones and so on. Many countries of the world have procured or are procuring a variety of small attack craft to protect their newly found maritime resources from encroachment. There is also concern in some countries, especially in the Third World, that they need some capability to protect themselves against power projection by superpower navies or neighbors with relatively strong naval capabilities. Consequently, the small craft that are being procured are often

equipped with a relatively significant destructive capability in their surface-to-surface missiles. These craft, however, are not usually conceived to be employed in the rather specialized tasks associated with Special Warfare.

The number of navies that actually design or can adapt vessels for Special Warfare is actually quite small. Not surprisingly, they are navies of nations with considerable naval capabilities across the board, that are concerned with the projection of naval power, and/or that have the industrial resources that can be devoted to such a specialized task.

THE UNITED STATES

In many ways, the United States has been the leader in conceptualizing the requirements for Special Warfare from the naval perspective. Since its experience in Vietnam, in particular, the U.S. Navy has explored alternatives for the conduct of these specialized tasks.

The American experience has been based in part on its use of the PBR (Patrol Boat River) that was first introduced into Southeast Asia in 1966. Designed for high speed patrol of rivers in hotly contested areas, the PBR was heavily armed and crew areas were given additional protection with ceramic armor. Extremely maneuverable, the PBR combined a fiberglass reinforced hull with pump jet propulsion so that it could operate in shallow, debris-filled waters. In order to achieve maximum patrol, guidepost and insertion capabilities the PBR was equipped with engine silencing and limited radar. They were often used to support SEAL Team operations which required a craft for effective insertion and extraction in enemy controlled areas of interest.

The United States built more than 500 PBRs between 1967 and 1973, attesting to its ruggedness, versatility and popularity. Most of the boats were subsequently transferred to South Vietnam with a few sent to Thailand. The Thais continue to use them for duty on the Mekong River. In Vietnam, however, the PBRs, totaling almost 300, are listed as "non-operational."

A second important development by the U.S. Navy was the PB (Patrol Boat) series, the MK I version of which was constructed by Sewart Seacraft of Beswick, Louisiana. The MK III was constructed by Peterson Builders in Sturgeon Bay, Wisconsin.

The 65-foot PB was designed to be a high speed weapons platform for naval inshore warfare (NIW) forces. Using a modular design concept, the PB represents an extremely flexible platform that could be used for a number of missions, especially in rivers, harbors and coastal environments, although open sea performance would also not be ruled out. Initial missions for which the craft was designed included patrol, surveillance, interdiction, fire support against targets both ashore and afloat and insertion extraction of NIW units. Future mission capabilities that were considered possible when the craft was designed included ASW and mine-laying, detection of sweeping.

The main deck of the all-aluminum craft was reinforced to provide the capability for these additional tasks once the appropriate hardware systems became available. Other

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

design features worthy of note are the low silhouette, low radar cross section and low acoustic noise levels to avoid detection and reasonable stability in heavy seas that, together with good communication and radar capabilities, allows for all weather, day or night operations. It is interesting to note that in moving from the MK I to MK III version, the pilot house was offset to starboard to provide additional space for weapons on the port side, thereby further enhancing the craft's flexibility.

A third vessel produced by the United States with applicability in Special Warfare operations is the MINI Armored Troop Carrier (ATC). As the PB, the MINI is constructed of an all-aluminum hull with a low silhouette for difficult detection (made even more so by the craft's extreme quiet). As the earlier PBR, it is equipped with ceramic armor and pump jet propulsion. In addition to making the ACT effective in shallow waters laden with debris, the propulsion system also allows for effective beaching operations. This is especially important for the MINI since it is designed to transport 15 combat equipped troops. It could also carry frogmen swimmers or SEALs, or, in lieu of troops, 4400 pounds of cargo.

Like the PB and PBR, the MINI's mission is high speed patrol and interdiction in rivers, harbors and protected coastal areas. Its unique feature, obviously, is an assault capability for these restricted areas. The MINI would likely be less than totally effective in a traditional amphibious assault operation given its small size (36 feet, 15 tons displacement). In restricted environments, however, it could well fill an important need for the U.S. Navy, which currently has 22 ATCs in its inventory.

The newest American vessel contributing to the naval dimension of special warfare is the SEAFOX, developed after the Chief of Naval Operations advised in 1975 of the need for a craft especially for Special Warfare missions. Specifications that developed following the CNO's statement defined requirements for a craft that was to be small and light so as to be air-transportable, liftable by standard Navy davits and transportable over highways on its own trailer. At the same time, it had to be large enough to carry at least 10 frogmen or SEALs with their equipment, carry sufficient fuel for an endurance of 200 nautical miles at speeds in excess of 30 knots and be equipped with a wide range of electronics including radar, a variety of communications equipment, IFF, depth sounders and ESM. Additional requirements were the ability to operate at high speeds in sea state 3 and low detectability (that translates into low heat signature and radar signature as well as quiet engines).

SEAFOX, the first of which was undergoing final testing in late 1981, has yet to prove conclusively that it can meet these rigorous requirements. Nevertheless, it can meet its design reflects a variety of unique features making it especially suited to special warfare needs. Among these are the craft's dark grey finish to decrease detectability at night, a tailgate for frogmen egressing the stern when the craft is moving at high speeds, and easily folding canopies and removable hinged masts to facilitate transportability. The craft's size (36 feet, 13 ton displacement) should make it transportable by air.

SEAFOX has chalked up several "firsts" in its development. Among these are the fact that, in addition to being air-transportable, SEAFOX is the first naval craft to

apply an IFF system developed for aircraft, to use the latest DOD standard secure voice system and to install a new series of high reliability General Motors engines.

The SEAFOX represents the first major development in the area of light naval forces that could be applied to Special Warfare since 1976-1977 when the Navy phased out its other small craft, such as Assault Support Patrol Boats and Swimmer Support Craft. Clearly, the Navy does not apply to the development of this kind of capability as high a priority as it does to other missions.

Some critics contend that this position reflects an attitude held more generally throughout the services that Special Warfare is not receiving the attention it deserves since effective capabilities can be developed in areas of Special Warfare at limited costs. They argue that these capabilities could be particularly effective in Third World contingencies in which the conflict situation is often ambiguous and military confrontation likely to be limited in scope. Some key Reagan administration officials appear set on revitalizing Naval Special Warfare forces including Navy Secretary John Lehman. With the exception of Vietnam, the United States has yet to experience such a situation directly, with the exception of the hostage crisis in Iran in which naval power was rendered irrelevant. Nevertheless, the Falkland Islands crisis demonstrates that such contingencies could arise. In such a situation, the SEAFOX could prove to be a valuable addition to the American inventory.

THE SOVIET UNION

The Soviet Union has emerged during the last 15 years as a blue water Navy, prior to which its primary function was protection of the homeland and surrounding seas. As a consequence, the Soviet Union has not provided great evidence of paying great attention to the naval dimension of Special Warfare. However, they do understand the effectiveness and economy of highly trained naval KGB personnel who carry out sabotage and political operations. They often utilize the traditional means of covertly entering and leaving a target country. Within their inventory they do have some classes of vessels that could be used in support of special operations roles.

One such class is the ZHUK coastal patrol craft. First seen in 1976, these craft, of which 30 are in service in the Soviet Union, are manned primarily by the KGB. At 60 tons displacement, the ZHUK class is rather large for special warfare operations, although it is large enough for a complement of 17 men, but probably fewer if fully equipped. Nor is the ZHUK class designed for the insertion/extraction mission, although with two 14.5 mm guns and a 12.7 mm gun it has some armament for the interdiction role. The ZHUK has been a popular export item for Moscow which has sent it to at least 10 countries since 1976. These include Angola, Cuba, Iraq, Vietnam and both North and South Yemen among others.

Another Soviet light vessel that might be mentioned is the SHMEL class river patrol craft. Built between 1967 and 1974, the SHMEL class boats measure 92 feet and displace 80 tons fully laden. They are attached to the Black Sea and Pacific Fleets for riverine operations on the Danube, Amur and Ussuri Rivers. They are also part of the Soviet Navy's flotilla in the Caspian Sea.

Most of the other naval vessels of the Soviet Union usually classed as light forces

are well over 100 tons displacement, demonstrating that the Soviet Union defines its light forces more for the traditional role of coastal protection than any kind of Special Warfare role. The widespread distribution of the ZHUK class patrol boats around the world and the experience with the SHMEL suggests that in the future the Soviet Union could move in that direction, if only to fill out its naval capabilities.

Little is known about the Soviet irregular swimmer forces. However, training is thought to be comparable with that of their U.S. counterparts. Moscow appears particularly interested in this type of investment as they reportedly employ more than 200,000 military personnel in their Special Purpose forces under the KGB.

PEOPLE'S REPUBLIC OF CHINA

The Chinese experience has been similar to that of the Soviet Union's in that it has concentrated on the development of light naval forces. Unlike the Soviet Union, however, it has not enjoyed the resources to allow major expansion into blue water regions. Consequently, the Chinese Navy has perhaps the largest force of light craft in the world, operating almost 20 different classes of light vessels for fast attack coastal and river patrol. As with the Soviet Union, however, none were designed specifically for the specialized missions associated with Special Warfare. The four major classes of ships designed for riverine duties were built in the 1950's and 1960's and some are soon to be removed from service.

Over one third of the Peoples Republic of China's light craft are various types of the SHANGHAI class patrol boat. A conventional general purpose craft, the SHANGHAI class vessels are mainly intended for coastal patrol work. With combinations of 37 mm, 25 mm and 57 mm guns depending on the type, they carry a powerful complement of light weapons. Whether they could be used for Special Warfare missions beyond interdiction and fire against some select targets afloat or on shore remains an open question. The Chinese are known to have a frogman team which could be supported by various types of boats in the Chinese inventory depending upon the particular coastal mission.

ISRAEL

Given its unique military requirements and innovative strategy, it should not be surprising that Israel has produced a system that exhibits characteristics adaptable to Special Warfare missions. The DABUR class is a small (65 feet, 35 ton displacement) coastal patrol craft with an aluminum hull. Initially, twelve of the craft were built in the United States and the balance of the 37 now in service were produced by the RAMTA division of the Israeli Aircraft Industries. Deployed in both the Mediterranean and the Red Sea, the DABUR class boats have been praised for their good rough weather performance and the flexibility in armaments of which there are several variations. The DABUR can carry two 20 mm. guns or twin machine guns. It can also be equipped with two launchers for MK. 48 torpedoes or depth charges. Some reports also indicate that the vessel will be equipped with GABRIEL surface-to-surface missiles.

A particularly interesting feature of the DABUR class system is that it has been designed for overland transport, suggesting a flexibility in employment that dovetails with Israel's emphasis on exploiting the maximum from limited resources.

It should be noted that in 1978 Israel transferred 4 DABUR class vessels to Argentina. Israel has also been developing a somewhat larger version of the class and armed it with GABRIEL missiles. This DVORA class boat is 71 feet and 47 tons displacement. While it represents the smallest missile craft built thus far, its larger size and standard armaments limits its flexibility and potential for use in Special Warfare roles. Israeli special swimmer forces are an elite group of highly trained men who have perfected their warfare.

Special Warfare from the naval perspective is a narrowly defined mission which most navies of the world have little call to seek. As a consequence, few naval platforms are specifically designed to facilitate the performance of tasks associated with Special Warfare such as small landings in hostile territory of under circumstances intended to surprise the potential adversary. This is not to say that the myriad variety of patrol vessels and fast attack craft now in service with virtually all of the navies in the world could not be used for such missions should specific circumstances dictate the need. Perhaps they could, but unless they are used with great creativity, these vessels will not be as effective as craft, like the SEAFOX, designed specifically for that mission. It should not be surprising that in addition to the United States, which has had the resources to explore exploiting Special Warfare, one country that seems to have given some attention to the possibilities is Israel, a nation that has had to make up in innovative strategy and tactics what it lacks in resources and physical military power. The other is the Soviet Union. Special Warfare has been a neglected realm of military combat in the last decade. Perhaps we could learn a lesson from these two countries. ●

SCIENTISTS FROM 36 STATES SEEK ACID RAIN CONTROLS

HON. ANTHONY TOBY MOFFETT

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 10, 1982

● Mr. MOFFETT. Mr. Speaker, I insert for the RECORD a statement endorsed by 100 scientists from 36 States calling for acid rain controls. Their remarks are timely, particularly in light of the decision by the Commerce Committee to resume work on Clean Air Act legislation.

[News release of the National Wildlife Federation, June 28, 1982]

100 EXPERTS SUPPORT ACID RAIN CONTROLS, ACCORDING TO NATIONAL WILDLIFE FEDERATION— POSITION REFUTES ADMINISTRATION POLICY

100 acid rain scientists across the country say there's a need for immediate control of the pollutants that cause acid rain, according to the National Wildlife Federation, a leader in the ongoing debate over congressional reauthorization of the Clean Air Act.

The scientists have endorsed an NWF position statement which concludes that control of acid rain-causing pollutants is called for by existing scientific evidence.

The statement refutes the Reagan administration's stand on acid rain, which claims that further study is necessary before control measures can be designed and implemented.

"Our position statement, endorsed by so many scientists, lends important weight to our contention that most knowledgeable scientists consider the evidence in support of acid rain control to be ample and compelling," said Dr. Jay D. Hair, executive vice president of the NWF.

The NWF mailed the position statement to over 400 acid rain specialists in late May, seeking their endorsement. Ninety-three percent of those responding agreed to publicly identify with the statement. Of those who declined to sign the statement, many claimed to have a governmental affiliation that prevented them from taking a public stand that contradicted their employing agency. Only seven took issue with the statement's premise.

Scientists from the following states endorsed the NWF statement:

Arizona 1	New Hampshire 3
California 5	New Jersey 2
Colorado 3	New Mexico 1
Connecticut 3	New York 12
District of Columbia 1	North Carolina 4
Florida 5	Ohio 3
Georgia 2	Oregon 4
Idaho 2	Pennsylvania 4
Illinois 4	South Carolina 1
Indiana 1	Tennessee 1
Kansas 1	Texas 2
Kentucky 1	Utah 1
Maine 4	Vermont 1
Maryland 3	Virginia 4
Massachusetts 3	Washington 1
Michigan 4	West Virginia 1
Minnesota 3	Wisconsin 2
Mississippi 2	Wyoming 1

POSITION STATEMENT ON ACID DEPOSITION

Overwhelming circumstantial evidence indicates that the primary cause of acid precipitation in the eastern United States is fossil fuel emissions of sulfur and nitrogen oxides. As these emission products are transported by wind and air mass movements, they are further oxidized into acidifying compounds and hydrogen ions before falling back to earth in either wet or dry form.

Acid deposition stresses aquatic ecosystems, particularly poorly buffered ones, and can kill sensitive plant and animal populations, either directly or by creating food web imbalances. In addition, acid precipitation promotes the loss of soil nutrients and cations in a manner which may be irreversible. Leaching of ions from soils can be damaging to both the soil and to aquatic organisms. Acid deposition also destroys man-made materials by accelerating metal corrosion, by blistering painted surfaces, by destroying surface cohesion of sandstone and limestone, and by eroding statues and stone structures.

As has been concluded recently by two panels of acid rain specialists, slowing the rate of deterioration of sensitive freshwater ecosystems would require a reduction of 50 percent in deposited hydrogen ions (i.e., an achievement in precipitation pH levels to no lower than 4.6 to 4.7) (NAS, 1981) and a possible even greater reduction in wet sulfate deposition (U.S.-Canada Work Group I, 1982). Although uncertainties regarding the kinetics of atmospheric transformation processes make precise predictions impossible, it can be anticipated that a significant reduction in sulfur and nitrogen oxide emissions will produce significant (although perhaps not directly corresponding) reductions in acid deposition.

Accordingly, a plausible acid rain control strategy should seek to begin reducing emis-

sions of sulfur and nitrogen oxides—especially in the eastern U.S. where most sources and receptors are concentrated—by an amount on the order of 50 percent. Since control of sulfur dioxide and nitrogen oxide emissions from new electrical generating plants would be insufficient to accomplish this, restrictions on older plants must be considered.

Although gaps remain in our knowledge of acid precipitation and further research is needed to fill these gaps, we the undersigned scientists believe that what is already known about acid deposition justifies and requires immediate legislative steps to begin abating sulfur and nitrogen oxide emissions, particularly in the eastern half of the United States.

SCIENTIST SIGNERS OF ACID DEPOSITION STATEMENT

Professor Quintus Fernando, University of Arizona.

Bruce R. Appel, Group Leader, California Dept. of Health Atmospheric Research.

Professor Robert E. Connick, University of California.

McADORY WILL BE MISSED

HON. RICHARD C. SHELBY

OF ALABAMA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 10, 1982

● Mr. SHELBY. Mr. Speaker, I would like to share with my colleagues in the House of Representatives an editorial that appeared in the Independent Advertiser on Tuesday, July 27, 1982. The article written by the editorial board of the newspaper is a tribute to the late Louis McAdory.

It's difficult to say goodbye to a friend. But yesterday, Chilton County had to say goodbye to a real friend when Louis McAdory, retired air force colonel, was buried.

His obituary is located elsewhere in this edition. It contains the essentials that all obituaries should: his age, date of death, survivors and funeral arrangements. But it says very little about the man who spent his entire life in the service of his country.

For more than 30 years, that span three wars, Col. McAdory fought for his country. He could have retired earlier, but there was still a job to be done and he knew his duty to his country.

After retiring and moving to Chilton County, he began a new career. It was a

career of working long hours for no pay to help make this county a better place to live for everyone.

He worked day and night for the Chilton County Cattlemen's Association and has served the past several years as its president. He served on the state level as vice president of the Cattlemen's Association and has served the past several years as its president. He served on the state level as vice president of the Cattlemen's Association and treasurer of the Alabama Beef Cattle Improvement Association as well as president of the Central Alabama Feeder Calf Association.

He is immediate past president of the Chilton County Chamber of Commerce and was named Man of the Year in 1981 for his untiring efforts to improve the chamber and attract new jobs for the unemployed in this county.

In addition to the many organizations he served, he was willing to take on additional responsibilities when asked, no matter how busy he actually was.

He was a man who lived to serve, expecting nothing in return.

At the time of his death, he had offered his services again to the people of this county.

His hopes of becoming probate judge here were founded on the idea that he could help lead this county unselfishly into a new era where the government took an active, energetic role in attracting new jobs here. A goal that all candidates for that office would do well to adopt.

To say Col. Louis McAdory will be missed is not sufficient. Very few people in the recent history of this county have worked so hard for no pay just because he believed wholeheartedly in paying his civic rent.

He was a man that touched the lives of many thousands of people through his civic work. His efforts will continue to help people here for years to come.

Chilton Countians are fortunate that he chose to make this county his home. And now it is his final resting place. That is only proper for a man who did so much, for so many, for so little in return.

Mr. Speaker, not many people achieve the measure of admiration and respect that Louis McAdory enjoyed. He earned that admiration and respect because he genuinely cared about people and about the welfare of his community.

His life should serve as a memorial to him for all his time in Chilton County, for he truly devoted it to serving the people that he loved and cared for.

It is indeed an honor for me to share this tribute with my colleagues in the House of Representatives. He will be deeply missed by me and all others who were touched by his life.●

NEW FEDERALISM

HON. PETER A. PEYSER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 10, 1982

● Mr. PEYSER. Mr. Speaker, homeowners of this country who have been faced with steadily increasing property

taxes are now sitting on a time bomb that is set to go off in the next 2 or 3 years unless we do something about it. The Reagan administration's proposed New Federalism will have the effect of increasing property taxes at the local level by at least 20 to 30 percent.

For 8 years before coming to the Congress, I served as mayor of a suburban community. I know firsthand what the loss of revenue sharing, highway, water and sewer moneys will do to local taxes. I also know what the Federal cuts in education will do to property taxes. These homeowners, who are the providers of most of our tax dollars at both the Federal and State levels, are going to be hit with outrageous and unfair increases.

In 1983, we must move to restore sanity to our tax program and utilize our Federal dollars to help local communities rather than hurt them. The Federal Government does have a role to play and can do it and still lower interest rates and decrease the national deficit. ●

A THOUGHT-PROVOKING COMMENTARY ON NUCLEAR NON-PROLIFERATION

HON. ROBERT J. LAGOMARSINO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 10, 1982

● Mr. LAGOMARSINO. Mr. Speaker, on August 3, the Subcommittees on International Economic Policy and Trade and International Security and Scientific Affairs held a hearing on proposals to amend the Nuclear Non-proliferation Act of 1978. Our colleague, the Honorable MARILYN L. BOUQUARD, appeared as a witness at that hearing offering some valuable insights into the issues facing the administrations and this Congress on the subject of nuclear nonproliferation.

I urge my colleagues to consider the thought-provoking comments of Mrs. BOUQUARD.

The statement follows:

PREPARED STATEMENT OF MARILYN L. BOUQUARD BEFORE THE SUBCOMMITTEE ON INTERNATIONAL SECURITY AND SCIENTIFIC AFFAIRS AND INTERNATIONAL ECONOMIC POLICY AND TRADE

Chairman Zablocki and Chairman Bingham, I want to thank you for the opportunity to testify before your Subcommittees this first day of the House Committee on Foreign Affairs' hearings to consider amending the Nuclear Non-Proliferation Act (NNPA) of 1978.

Undoubtedly, the most visible and controversial problem in the international nuclear power arena is that of weapons proliferation. The international market for trade in nuclear power facilities has become increasingly competitive, and a growing number of nations have active nuclear programs—some signatories of the Nuclear Proliferation Treaty (NPT) and some not. As we are all aware, controversy is particularly wide-

spread over the domestic development and international marketing of sensitive enrichment and reprocessing technologies and the breeder reactor.

The link between civilian nuclear power and nuclear weapons is an inescapable fact of nature because nuclear power reactors simultaneously generate heat, which is converted into electricity, and plutonium. It is this inevitable consequence of civilian nuclear power which causes much concern about proliferation—a concern we all share. In fact, I have just briefly recessed the first of two days of hearings on nuclear safeguards research and development in our Committee on Science and Technology. The Subcommittee on Energy Research and Production, which I chair, is hearing from DOE, ACDA, the Department of State, and NRC on this technology and its implementation.

While the aforementioned link is indeed of legitimate concern, it should be made clear that it is neither inevitable, nor even probable, that a nation's civilian nuclear power program will lead to a nuclear weapons program. Japan and West Germany are but two of a number of nations which have developed peaceful uses of the atom while renouncing all intentions of developing nuclear weapons even though it is clearly within their technical capability. This lack of inevitability of such a route to nuclear weapons development is also reinforced by examining the historical record.

No nation has yet developed nuclear weapons from materials diverted from a civilian nuclear powerplant. From 1945 to today, the 5 weapons states and India exploded nuclear devices while civilian nuclear power went from being nonexistent to well over 140,000 megawatts of capacity in 22 countries. In addition, for each of the five nuclear weapons states, the explosion of their first nuclear weapon preceded the operation of their first prototype commercial powerplant.

The historical record, then, does not suggest a casual relationship between the expansion of civilian nuclear power reactors and the development of nuclear weapons. The reason for this is basic economics. It is relatively simple, and quick to produce and extract nuclear weapons grade materials in small, specialized facilities. Constructing but one civilian nuclear power reactor, however, requires the expenditure of well over \$1 billion as well as a considerable amount of time to nurture and build a complex technological infrastructure.

While the historical record does give us comfort, we must not, of course, allow it to make us overly sanguine concerning the future. Clearly, we all agree that we should do what we can to minimize the risks of proliferation. Where we disagree, of course, is on the methods and techniques which should be employed to minimize these risks.

I have long been on the record as opposing the previous Administration's misguided and bankrupt approach to nuclear energy in general, and to nuclear nonproliferation in particular. President Carter's April 1977 decision to postpone indefinitely the commercial reprocessing of spent fuel in the United States and to propose to stop work on the Nation's breeder reactor at Clinch River has been accurately characterized by the famous French scientist, scholar, and statesman, Dr. Bertrand Goldschmidt, as an "extraordinary and unique act of self-mutilation." As Dr. Goldschmidt points out in his recently published masterpiece on the political history of nuclear energy entitled "The Atomic Complex:" "an already declining American nuclear industry was to become

paralyzed in two key sectors of future development, fuel reprocessing and breeder reactors, precisely the sectors in which the United States was already between 5 and 10 years behind the Soviet Union and western Europe, in particular, France."

The Carter administration's unfortunate approach to nonproliferation was totally counterproductive. It stimulated a proliferation of nuclear suppliers worldwide while simultaneously causing us to lose significant nuclear export business and lessening our ability to influence the nuclear policy of other nations. This message has been reinforced time and time again to me during my discussions with leaders of other nations with active nuclear programs. In particular, I wanted to share with you the comments I received during discussions I participated in during June 1981 with officials in Spain, Denmark, Finland, the United Kingdom, and France. I summarized the major findings and recommendations of my trip report in a letter to President Reagan in July 1981. With your permission I would like to append this letter to my prepared remarks today and briefly note the views of the Spanish and the United Kingdom officials. Spanish officials were left in a state of quiet rage as a result of their treatment by the Carter administration in terms of nuclear nonproliferation policy. They felt that the United States had effectively blackmailed them into adopting retroactive measures with respect to their nuclear program and as a result they went to the Soviet Union and other suppliers for nuclear fuel enrichment services.

United Kingdom officials felt that the Carter nonproliferation policy convinced many nations that they could not rely on the United States. They urged that the United States distinguish between potentially real proliferation offenders and those who wish to pursue civilian nuclear power programs—a position which I wholeheartedly endorse. I believe that if this Nation is to maintain a major leadership role in the nuclear proliferation arena in the years ahead, we must adopt a genuinely selective approach which distinguishes between our friends and real proliferation risks. Cooperation, not denial, should be the main thrust of our nonproliferation policy.

Unfortunately, the NNPA enshrined into law too much of the Carter approach, based on the faulty premise that other nations would remain dependent indefinitely on U.S. nuclear assistance. A nonproliferation strategy emphasizing technology denial which reduces confidence among importing states about access to nuclear materials and services will undoubtedly speed the development abroad of indigenous fuel cycle capabilities, including reprocessing. The NNPA, while well-meaning, is flawed and in need of improvement.

I would like to conclude my remarks with what I propose should be done. As I stated earlier, I believe that the main thrust of our nonproliferation policy should be cooperation, not denial. I would recommend that the NNPA be amended to incorporate this principle by ending its retroactive effect and substituting the presumption that cooperation with the other nations should continue as long as there has been no change in the proliferation risk. I would further recommend that programmatic approvals take the place of case by case exercise of U.S. consent rights regarding transfers of spent fuel. I also believe that we must pursue vigorously the internationalization of reprocessing and waste management to discourage the

further development of indigenous national programs. Further, we must do all we can to strengthen the international safeguards system. Finally, we must as a nation, recognize our obligations under article VI of the Treaty on the Non-Proliferation of Nuclear Weapons and vigorously pursue serious strategic arms control negotiations. Moderation of vertical proliferation would aid greatly in our efforts to control horizontal proliferation.

I believe this set of recommendations amounts to a sensible approach. Thank you very much, Mr. Chairman, for this opportunity to express my views.

CONGRESS OF THE UNITED STATES,
HOUSE OF REPRESENTATIVES,
Washington, D.C., July 15, 1981.

The President,
The White House,
Washington, D.C.

MR. PRESIDENT: I have just returned from an oversight trip during which I had discussions on international energy issues in Spain, Denmark, Finland, the United Kingdom, and France. My particular interest in these discussions was nuclear energy development and, more specifically, the question of U.S. nuclear nonproliferation policy. As you know, I have concluded that the Carter Administration's unfortunate approach to nonproliferation was counterproductive such that it caused a proliferation of nuclear suppliers worldwide and resulted not only in the loss of significant U.S. nuclear export business but also a lessening of the related ability of our country to influence the nuclear policy of other nations.

As you might expect, of the nations we visited those most interested in the prospects for change in U.S. nuclear nonproliferation policy were Spain and the United Kingdom. I carried with me the April letter from Under Secretary Buckley which responded to my own query as to what we could expect in terms of a shift in U.S. policy. I can assure you that Mr. Buckley's statement, "... we plan to support rather than interfere with the nuclear programs of our key allies and to focus our nonproliferation efforts on countries of real proliferation concern," was well received and seemed to provide a basis for some assurance among our friends that the unfortunate policy of recent years will be turned around. I urge you to make a statement on nonproliferation policy at the earliest possible date to begin the process of recovering the reputation of the United States as a reliable supplier with genuine concerns about nuclear weapons control.

I have attached the major nuclear findings and recommendations of my trip report which will be sent to the whole House of Representatives next month.

As you can see, if Europe is a microcosm of such views there is a positive international climate for you to make a policy pronouncement. However, its implementation will require, as the British noted, "extreme statesmanship" on your part.

I would respectfully request the opportunity to discuss these matters in detail with you and I am looking forward to working with, Mr. Buckley, and Mr. Malone in reshaping U.S. policy and its implementation. I hope that the Foreign Affairs Committees in the House and Senate will not use the events of recent weeks as a basis for suggesting an arbitrary and counterproductive tightening of export controls for nuclear shipments to our friends as well as any potential weapons threats. I hope we shall

have the opportunity to achieve a genuinely selective approach which distinguishes between our friends and such real proliferation risks as Pakistan and Iraq.

Sincerely,

MARILYN L. BOUQUARD,
Chairman, Subcommittee on Energy
Research and Production. ●

REMARKS OF ARIEL MELCHIOR, SR., AT THE COMMENCEMENT EXERCISES OF THE COLLEGE OF THE VIRGIN ISLANDS

HON. CHARLES B. RANGEL

OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Tuesday, August 10, 1982

● MR. RANGEL. Mr. Speaker, I want to bring to the attention of my colleagues the remarks of Ariel Melchior, the former publisher and owner of the Virgin Island Daily News, made at the recent commencement exercises of the College of the Virgin Islands. Mr. Melchior's remarks review the history and progress of the College of the Virgin Islands from its inception in 1962 as a 2-year college to its full accreditation as a 4-year institution of higher learning.

The College of the Virgin Islands has served as a cornerstone for the education of the young people of the islands, many of whom have gone on to participate in the developing economy of the islands.

Mr. Melchior's words serve as an inspiration to the graduating class of 1982, and I believe, deserve to be brought to my colleagues' attention for a better understanding of the Virgin Islands.

The text of Mr. Melchior's remarks follows:

COMMENCEMENT ADDRESS BY ARIEL MELCHIOR, SR.

Dr. Arthur A. Richards, Acting Governor Henry Millin, Honorable Elmo Roebuck, members of the Board of Trustees, Members of the Faculty and Administrative staff, graduating seniors, their parents, their relatives and all other members of our beloved Virgin Islands community, good evening.

I am deeply honored to have this opportunity to address the 1982 graduating class of the College of the Virgin Islands.

Since it opened its doors in 1963, this college has been a reservoir of hope for young men and women from the Virgin Islands and from across the Caribbean who have come here eager and thirsting for knowledge and academic excellence. The College of the Virgin Islands has met their needs and met them well.

When it began, and the first student walked this campus, the college was only a two year institution. But with expanding programs and increasing numbers of students, it quickly developed into a thorough four year scholastic program. Today, it is one of the premier institutions of its type in the Caribbean and in the nation.

Under the leadership of its first president, Dr. Lawrence Wanlass and its current president, Dr. Arthur A. Richards, the college of

the Virgin Islands has brought disciplined and devoted higher education to these shores. In its brief life, it has made an earnest contribution to our community.

It has been like a fountain, each year providing our community with fresh young minds, possessing new and exciting ideas. It has stood for academic excellence and intellectual honesty and maturity. It has played and will continue to play a most vital and vibrant role here.

The college has provided us with scholars when we most needed them; vision when it was required; and it has served as a cultural center, enriching our lives through theater, concerts and art exhibits.

(Its significance and importance has been recognized by the Congress of the United States. As Dr. Richards mentioned earlier, the college has been identified by federal authorities in Washington as a seat of learning. Young men and women from the Eastern Caribbean will be coming here for cultural, technical, and scientific training. This will be a major step in the life of the college and in the life of the entire Caribbean.)

We have needed this institution, and as we move further into the 1980's, we shall need it, and the quality graduates that it will provide even more.

The role that the College of the Virgin Islands will continue to play will require greater financial support from both the public and private sector.

We must make a greater financial investment in this institution. We must see to it that its monetary resources are increased and that its fiscal future is made more secure. The consequences of failing to do so could have a retarding effect on its growth.

Yes, during the last two decades, we have progressed. Of course, we have had our share of problems, but imagine for just one moment where we might be today without the presence of the College of the Virgin Islands in this community.

Graduates of the class of 1982, today in the Virgin Islands, we stand at a critical point in our development, requiring a choice between irreconcilable courses.

We stand at a political crossroad. We stand at an economic crossroad. We stand at a spiritual crossroad.

Our community is deeply troubled. It is searching for its soul. We seem to be in the midst of chaos and misunderstanding. As a people we are indifferent towards one another and the plights of our neighbors.

As we walk the streets, we can see a look of hopelessness and despair of the faces of many of our young people.

They seem to be without purpose or a reason for living. Some of them have declared that they have little or no faith in this society, their society.

They are our lifeline to the future, but large numbers of them have turned against us. They have become embittered, frustrated, and angry. We must remember that when we look at them, we are looking at ourselves.

They stand at the crossroads with us, side by side. Their fate is interwoven with the very fabric of a society that we cherish, one that we love and one which must endure.

As a community, our fate, a collective fate, is in our own hands and only a common belief in the goodness of our people, and the sacredness of our ideals will keep us from coming apart.

We find people asking themselves, in despair, why should I live through this misery. We find people asking themselves why

should I contribute to a community when so few seem to care.

But we must remember the words of the noted French philosopher, Albert Camus, who once said that the very purpose of life, itself, was to bring about change. And change we must bring about here; not later, but now; not tomorrow, but today; not with complacency, but with compassion and determination.

And even though we stand at a crossroad and our future appears uncertain, we must remember and acknowledge that our very existence we owe to those who came before us, those who shaped this society and to whom we owe a tremendous debt.

Yes, our ancestors before us stood at crossroads. They survived because they had the will to maintain a sense of themselves. They moved forward because they addressed their problems honestly. They endured because they refused to bow to the pressures of a confused society, nor to the greed that temps all men and all women in life.

During the Great Depression, when we stood at what seemed to be the very abyss of life, we pulled together. We pulled together as young and old, we pulled together regardless of race, we pulled together as people—people who had very little in the way of material goods, but who had an abundance of heart and a desire to strengthen and maintain the Virgin Islands. We pulled together then, and because of that effort we are here today.

Some might say that is is unfair to the class of 1982 to present them with a society that appears so bleak and where there is little apparent hope. I disagree! There is hope, the future is not bleak. We shall endure, but first we must recognize and understand that we stand at crossroads.

The class of 1982 did not create the myriad of problems that we are faced with today. You are innocent by-standers, who, if you chose to, can walk away from it all, and live lives of relative comfort. But we know that you choose to be concerned.

Let you are misinformed, having a college degree does not mean that this community of which you are a part owes you something. Let me tell you here and now, it owes you nothing! It has provided you with an opportunity to excel in your chosen fields of endeavour, use that opportunity wisely.

Your obligation is to support your alma mater so that others who will follow you will enjoy the same advantages that you enjoy today.

The times that we live in call for young men and women who will confront the dilemmas that face this community. It is most important that you not become part of the problem, but you must become architects of the solutions.

Sitting here today are young men and women, who, if they have the will and vision, will feed the needs that we have. This class will be called upon to share its wealth of information not only with these islands, but with the region and the world.

From this class will come the leaders of tomorrow in science, engineering, medicine, law, art, agronomy, and writing.

From this class must not only come scholars but men and women of high personal integrity with a strong commitment to social justice and respect for law. Keep in mind that every right you enjoy carries with it a corresponding obligation.

To put it frankly, we need you and we need you desperately. And you will find that despite the level of your education, you will need those whom you will serve.

You will need them for moral support, you will need them for spiritual support, you will need them as allies as we all face the crossroads together.

Do not be afraid to go it alone when those around you are pursuing their fantasies. This class must not forsake the righteous cause.

This class must not stand silently on the sidelines of life while the vast majority of the less fortunate of our people are being battered about in their daily struggle to survive in an environment in which the prices of the basic necessities for living are unreasonable and unaffordable.

You must help us in our search for answers. More than one-third of our population lives in substandard and unfit housing.

We will need your expertise in the area of housing development. What we have now is inadequate. The answer, and I think that you will agree with me, is not in high-rise institutionalized apartments, but in sufficient individualized dwellings where people can develop a sense of family and a sense of pride and build their lives around a home they love and cherish.

Additionally, we cannot afford to close our eyes to the fact that there are racial tensions in this community and they are mounting daily.

There is a direct relationship between those tensions and the economic imbalance that exists here. If there is going to be sustained progress, all levels of our society must share in that progress.

Unfortunately, the resources of our growth do not seem to be distributed reasonably. Therein, lies one of the many causes for discontent. It is a situation that we all know exists and to which we should all address ourselves with candor.

Is it any wonder that many of us are confused, bewildered, frustrated and angry, given such a situation. We live in constant fear. People are afraid to walk the streets at night and murders and assaults are committed in broad daylight with impunity.

We have retreated to our homes and our businesses, and even there we are not able to enjoy the safety and comforts that flow from life.

Yes, we are troubled. Yes, the waters are not still. There are divisions between factions, between classes, between races. There are even divisions over ideas and directions. Leadership is lacking. All is not well.

However, this is not a time for us to throw our hands up in the air. It is a time for us to come together and work towards viable and practical solutions.

We must learn to grow our own food, and become self-sustaining. If the state of Israel can grow food in the desert for its own consumption, certainly we can grow food in this land of plentiful green foliage.

The same methods that were used in that hardened desert can be used here. The same type of expertise that was applied there can be applied here. But first we must begin to think in bold terms.

As a community of Islands, we must find new ways to determine our own destiny. We must not allow ourselves to be held hostage to the economic contingencies that we do not control.

There is every reason that we should be looking forward to, and planning for the day when we produce, here, many of the things that we now import.

It is hoped that many of you will decide to serve in positions of leadership in government, business, religion, education, and other fields.

The people who assume these roles must command the public trust. If they are going to represent us, they must be people of dignity, honesty, unselfishness and courage. They must be above scheming and petty bickering, they must deport themselves in an exemplary manner, discharge their sworn duty with efficiency, decorum, dedication and sincerity of purpose. They must conduct the people's business in no less a manner than they would conduct their own. They must lead, follow or get out of the way.

It is no secret that selfishness, greed, lawlessness, and wide spread disrespect are symptoms of a society that is not totally well. A society begins to deteriorate when the people leave their futures to chance and to fate.

This class, the class of 1982, must reach for new heights. It must establish formidable goals. Its members must reject deception. Each of you must give fresh meaning to life. It will not be any easy task, but for us, with our meager resources, it has never been easy.

At this crossroad, we must make an investment in our futures and the futures of those who are still unborn.

Currently, we are mortgaging the lives of future generations of Virgin Islanders to pay for the ego trips that a power hungry leadership is enjoying today.

The economic philosophy, which is in vogue today, can only lead to disaster. We must stop living beyond our means and halt the fraudulent practice of writing bad checks that the next generation will be called upon to honor. You should be concerned about this situation.

The class of 1982 can help turn things around. It must think and act in bold and daring terms. None of you can afford to be indifferent to the presence of crime just as you cannot afford to accept waste, dishonesty, and corruption in government as a way of life.

As individuals you must be self-reliant. You must be firm yet compassionate. You must be willing to endure pain when necessary and make sacrifices for the good of the community when called upon to do so.

Your formal educations will be tested each day of your lives. Do not give up. Rekindle the sparks of determination with new vigor and even greater conviction.

Remember always the great sacrifices that some of your parents and loved ones made so that you might attend school. Remember that some of them scrubbed floors and worked tirelessly so that you could receive an education.

Remember that they sometimes worked an extra job so that you could buy books, and that without them this moment would not have been possible.

You are our hope! We need you now more than ever! Together we stand at the crossroad. Together we shall confront the irreconcilable courses and together we shall go forward.

Each of you must consider what you can do for the Virgin Islands in return for what the Virgin Islands has done for you. If you are diligent and faithful, time and events will record your contributions.

It is my personal conviction that if you set standards in your life, consistent with the high standards that the college has set in its twenty year history, you shall not fail and consequently, we shall not fail.

I leave you this evening with this final thought. Live your lives in such a manner that in the twilight of your years, when all

is said and done, you may look back on your life with pride and a sense of satisfaction.

Give of yourselves each day for the betterment of the Virgin Islands. Help make it the land in which you want to live and raise a family. Inspire other generations. Leave a legacy that they will want to pass on to their children.

God bless each and every one of you. May you realize your dreams. May your accomplishments be many and may you come to know the real joy of living!

Thank you.●

BRIGHTON BEACH BATHS CELEBRATES 75 YEARS OF SERVICE TO BROOKLYN FAMILIES

HON. STEPHEN J. SOLARZ

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 10, 1982

● Mr. SOLARZ. Mr. Speaker, this month in my district in Brooklyn, a community institution, the Brighton Beach Baths, will celebrate its 75th year of operation as a family-centered recreational facility.

In 1907 the Brighton Beach Baths began as a beach club. Then situated in the wilds of Brooklyn on 30 acres of land, it has survived and flourished as a recreational oasis in the now highly urbanized Brighton Beach section of New York City. Its membership of 6,000 probably makes it one of the largest beach clubs in the country.

The baths, as it is fondly known, has served as a home away from home to literally millions of people over the years. Some of its members have belonged to the club for over 60 years, and it is a common sight to see families spanning three and four generations enjoying its lovely open spaces, salt water air, and unsurpassed recreational facilities and programs. Open 10 months a year, the baths offers dancing, entertainment, sports, nursery, and day camp programs in addition to swimming in three pools.

The baths is ably managed by Hy Cohen, a remarkable and energetic man, who has seen to it over the years that the baths plays an active role in the civic and charitable activities of the area. Hy has made the baths accessible to numerous organizations for fundraising activities and opened its doors to provide much needed recreational opportunities for organizations like the Vacations and Community Services to the Blind, so that they could provide several days or recreation activities for the elderly blind in the community. The baths has hosted field days for children from local public schools, provided free medical screening to its members and even hosted State of Israel bond rallies.

The baths has been an integral part of the shore front community for the past 75 years and is indeed a community institution of which we can all be proud. Today I would like to take the

opportunity to salute the baths, its exceptional management, staff, and above all, its wonderful members who have made it such a marvelous place to visit and a source of enjoyment for literally thousands and thousands of New Yorkers.●

SOVIET PRISONERS FOR GAS PIPELINE

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 10, 1982

● Mr. McDONALD. Mr. Speaker, the question of forced-labor utilization in the construction of the Yamal pipeline has again arisen. This time the question came up in West Germany. It will be recalled that I mentioned this matter in the CONGRESSIONAL RECORD Of July 13, 1982, pages 16054 and 16055. The London Daily Telegraph of August 1, 1982, states information reaching Bonn, Germany, is that an estimated 100,000 political prisoners are working on the U.S.S.R. pipeline. Perhaps this news of forced-labor participation in the project will give pause to those Germans who are rushing to make money and not thinking about the other aspects of this matter. France has instructed its Moscow Embassy to inquire about the use of slave labor on the pipeline also, according to the Wall Street Journal of August 9, 1982. The two news items follow:

[From the Sunday Telegraph, Aug. 1, 1982]

SOVIET PRISONERS "FOR GAS PIPELINE"

(By Michael Farr in Bonn)

West German conservative MPs are pressing for a Bonn investigation into claims that Russia was putting tens of thousands of political prisoners to work on the controversial Siberian-West European natural gas pipeline.

One Christian Democratic MP, Herr Heinz Landre, said that the International Society for Human Rights has estimated that 100,000 Russian prisoners sentenced to terms of hard labour were working on the construction of the 3,500-mile pipeline, which has been strongly opposed by President Reagan.

Herr Landre said the prisoners, the majority of whom were serving terms for political or religious reasons, were being housed in primitive conditions in railway stock.

He urged West German politicians, bankers and businessmen involved in the multi-million project—billed the largest-ever between East and West—to take these facts into account.

APPEAL TO SCHMIDT

In answer to a question from another Christian Democrat, MP, Frau Ingeborg Hoffman, the Bonn Foreign Ministry said it has not yet been able to find out definitely whether and how many political prisoners may have been put to work on the pipeline.

The Frankfurt-based human rights society said recently that civil rights activists in the Soviet Union had informed the group that the prisoners were being forced to work on the pipeline in appalling conditions.

The society said it was appealing to Chancellor Schmidt to end West German involvement in the project because of the Russian use of forced labour.

But with West German companies winning contracts for pipeline worth millions of pounds and several thousand German jobs at stake, Bonn has remained firmly committed to the deal despite American disapproval.

[From the Wall Street Journal, Aug. 9, 1982]

FRANCE PROBES REPORTS INVOLVING SLAVE LABOR ON SIBERIAN PIPELINE

PARIS—France said it has instructed its Moscow embassy to investigate reports that the Soviet natural gas pipeline to Western Europe is being built with slave labor.

The International Association for Human Rights, based in West Germany, previously had warned European countries involved in the controversial project that tens of thousands of Soviet political prisoners had been pressed into slave gangs to work on the mammoth project.

The humanitarian organization has issued a list of political prisoners who, it asserted, were forced to work on the pipeline. They included dissident psychiatrist Semyon Gluzman and Ukrainian writer Zinovi Krasinski.●

RAY FITZGERALD: FONDLY REMEMBERED, SORELY MISSED

HON. ANTHONY TOBY MOFFETT

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 10, 1982

● Mr. MOFFETT. Mr. Speaker, although I never met Ray Fitzgerald, I feel as though I knew him well. And, I know that he had a positive effect on me during many of my formative years.

As a sports-minded young person in Suffield, Conn., I read the Springfield, Mass. Union, a morning newspaper. Ray Fitzgerald was their main sports writer.

He kept me interested in sports, perhaps kept me thinking more positively than I might have otherwise.

I feel good about those years. And, I feel good about what Ray Fitzgerald contributed to many of us in those years. More recently, I have read his columns in the Boston Globe. I have looked forward to them.

To the end, Ray Fitzgerald remained a breath of fresh air.

We will miss him greatly, even those of us who did not have the honor of knowing him personally.

The article follows:

[From the Boston Globe, August 4, 1982]

RAY FITZGERALD, AT 55 . . . WONDERFUL WRITER AND MAN

(By Neil Singelais)

Globe sports columnist Ray Fitzgerald died early yesterday in Brigham and Women's Hospital in Boston after a long illness. He was 55.

During the last 16 years, the words of Ray Fitzgerald had been a fixture on the sports pages of The Globe, to which he came from

the Westfield Advertiser, in 1966. He covered virtually every sport for The Globe in that time, writing with versatility when assigned to report events and, later, with a special flair and wit when, upon the retirement of the veteran columnist Harold Kaese in 1975, he moved into the lead columnist's chair.

Said Globe sports editor Vince Doria of Mr. Fitzgerald: "Anyone who has read The Globe sports pages over the years knows what a wonderful writer Ray Fitzgerald was. He was an equally wonderful man. He was a tremendous talent, yet he never let ego get in the way. He couldn't say no to anyone. If an aspiring journalism student sought his advice, Ray would make time for that student. At the end of a bad day, you could always stop by Ray's desk, where his humor would remind you that things could be worse. I'll miss his writing greatly, but I'll miss his friendship more."

Mr. Fitzgerald came to the Globe in 1966, at the invitation of sports editor Jerry Nason, with an assist from Ernie Roberts. Roberts now executive sports editor, was rejoining The Globe that spring after six years in the Dartmouth College athletic department.

"I was still in Hanover when I received a call one morning from Nason," Roberts recalled. "Do you know a writer in Springfield named Fitzgerald? He's interested in a job with us, preferably with your afternoon sports page," said Nason.

"Sign Ray on as fast as possible," I answered. "Fitz is not only an exceptional writer but an outstanding person and asset to any paper." We both arrived the same day and found The Globe closed by a strike. "Figured," said Ray with his crooked grin. "It's April Fool's Day."

Mr. Fitzgerald's desk always drew a crowd when he was in the office. He had both humor and modesty, an unusual parlay among prominent columnists. He also had an Irish temper, most apparent when one of his lefthanded tee shots would fly into the woods at Marshfield. On vintage Fitzgerald days his lefthanded driver shortly would follow the golf ball.

Ray Fitzgerald made a habit of winning the Massachusetts Sportswriter of the Year Award, taking down the honor an unprecedented 11 times in balloting by sportswriters throughout the state.

But what set Mr. Fitzgerald apart from most of his colleagues was his ability to laugh at himself. No crusader, he lived and worked to entertain his readers while regarding himself as "just another working stiff in The Globe's sandbox."

To copy editors, all Ray Fitzgerald copy was a dream, something to be enjoyed, not worked over.

Mr. Fitzgerald was widely recognized as a master of the quick quip and the one-liner. He possessed the rare ability to apply a gentle but inoffensive needle, still he didn't hesitate to spice the humor with a dash of satire when the situation required it.

Mr. Fitzgerald's tongue-in-cheek humor never failed him. When asked several years ago to fill out a biographical sketch, his answer to a question about activities in public or social service was: "Borrowing money from the South Shore National Bank to pay for kids in college." Another blank sought information on "Miscellaneous Facts." He scribbled, "Constantly broke."

After joining The Globe's staff, Mr. Fitzgerald covered the Red Sox, Celtics and Patriots until he became a fulltime columnist in 1975. He began his newspaper career as a

writer with the Schenectady Union-Star, working there from 1949 to 1951. He then took a public relations job with the General Electric Co. for two years before resuming his journalistic career with the Springfield Union in 1953. In 1965, he left the Springfield paper to become part owner of the Westfield Advertiser, but he left that job a short time later to come to The Globe.

A graduate of Westfield High School in 1944, Mr. Fitzgerald excelled there in three sports—baseball, basketball and football. In baseball, Mr. Fitzgerald starred as a left handed pitcher-first baseman. In basketball, he attracted attention as a good-shooting guard. And in football, he did a fine job as a defensive end. His baseball ability earned for him a scholarship to Notre Dame. He was graduated from there in 1949.

In the immediate post-Notre Dame years, he and his wife, Barbara, concentrated on raising their lively family of two boys and two girls. A voracious reader, he put aside time for the books which, when money and time were so precious, filled his need to learn as much as he could about the world. In later years, when the young Fitzgeralds had gone their own ways, Ray and Barbara hit the road often, touring Ireland several times and visiting classical sites in Greece. Relaxation meant activity for Mr. Fitzgerald; a standout bowler and golfer through the years, he visited the lanes and the links often with family and friends.

Still, baseball remained his first love. In the 1950s, he played professionally for two years with Brattleboro in the Northern League before hanging up the spikes for good. Or so he thought. Some 10 years later, while he was working for the Springfield Union, the urge returned and he joined the semipro Holyoke Allies of the Two-County League for a brief time. In his first mound appearance he went the distance, and won.

His athletic talents surely were inherited in great part from his father, Raymond Fitzgerald, a minor league power hitter in the 1920s who played for teams in the Eastern and International Leagues. The elder Fitzgerald also played pro basketball during that era in the Interstate League.

Springfield (Mass.) Union executive sports editor Garry Brown, who for many years worked alongside Mr. Fitzgerald, said he remembers the late Globe columnists as "a good humor guy. We never had anyone here with such a wit. He was so enjoyable to be with."

Mr. Fitzgerald leaves his wife, Barbara S. (Gray); two sons, Kevin, of Boston, and Michael Fitzgerald of Quincy; two daughters, Karen Murphy of Southwick, and Dr. Eileen Fitzgerald of Clinton, Ark.; a brother, John; two sisters Marie Gallo and Claire Case; and his mother, Katherine (Halloran) Fitzgerald, all of Westfield; and a grandson.

A funeral Mass will be said Friday at 9 a.m. in St. Francis of Assisi Church, South Braintree. Graveside services will be held at 2 p.m. Friday in St. Mary's Cemetery, Westfield. ●

SENATE JOINT RESOLUTION 58

HON. RICHARD C. SHELBY

OF ALABAMA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 10, 1982

● Mr. SHELBY. Mr. Speaker, I wish to congratulate the Senate for favorably voting on Senate Joint Resolu-

tion 58, the balanced budget/tax limitation constitutional amendment.

It is encouraging that two-thirds of the U.S. Senate rose above partisanship and agreed to this historic resolution. Democrats and Republicans joining together have made a solemn commitment to the American people that deficit spending must end.

It is imperative that the House move swiftly to bring the balanced budget/tax limitation amendment to the floor for full and fair debate. The Representatives of the American people have an obligation to act promptly on Senate Joint Resolution 350. This bipartisan issue affecting all Americans must be given a fair hearing by Representatives of all the people. ●

NEW EXTRADITION LEGISLATION

HON. BOB EDGAR

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 10, 1982

● Mr. EDGAR. Mr. Speaker, I would like to call to the attention of my colleagues some excerpts from an analysis of new extradition legislation prepared by a group concerned about the rights of Filipino dissidents in the United States. In light of the fact that we will be considering the new bill—H.R. 6046—in the House soon, and in light of the upcoming visit of Philippines President Marcos, I believe that this information is valuable. Members should also be aware of the relationship of this legislation with the United States-Philippine Extradition Treaty pending in the Senate.

NATIONAL COMMITTEE TO OPPOSE THE U.S.-PHILIPPINE EXTRADITION TREATY

THE STRUGGLE AGAINST REPRESSIVE EXTRADITION LEGISLATION: THE NEW PHASE

A brief study of the origins, purposes, and provisions of the bill shows, that it carries substantial threats to constitutional rights and traditional judicial protections.

The push to revise U.S. extradition law began in 1979 and was initially sparked by the legal difficulties faced by the Carter State Department in extraditing three individuals that it was under heavy pressure to return: the Irishmen Peter McMullen and Desmond Mackin and the Arab Ziad Abu-Eain.

In May 1979, a U.S. court ruled that McMullen, a member of the Irish Republican Army (IRA) was not extraditable to Great Britain because the crime for which he was sought—assaulting British troops—was a political offense, and proceeded to grant him political asylum. More recently, Desmond Mackin, another member of the IRA, was also declared non-extraditable after a magistrate took extensive evidence on political conditions in Northern Ireland and upheld Mackin's claim that the wounding of a British soldier was a relative political offense.

Frustrated by these appeals to the political offense exception, the State Department threw all its resources at preventing Ziad

from doing the same. Its tactic was to paint the young Palestinian—who was dubiously linked to a bombing incident in the West Bank in the twice recanted testimony of an alleged accomplice—as a “terrorist” and deny any political motivation or political context for the alleged offense. While it was successful in winning Ziad’s extradition to Israel, the State Department was nevertheless frustrated by the fact that it took more than two years for the judicial process to yield Ziad.

How H.R. 6046 makes extradition law more repressive

An even cursory examination of H.R. 6046 reveals that beneath the liberal rhetoric, there is a radical move away from traditional U.S. extradition practice.

First, it contains a very restrictive definition of the political offense exception. Under the Hughes Bill, only “pure” political offenses like treason would qualify for the exception. “Relative” political offenses—that is, crimes of violence committed in connection with a political objective—are to be treated as common crimes. All such offenses would thus be extraditable, except under “extraordinary circumstances.”

This constitutes a dangerous abridgement of the political offense exception, which has been traditionally regarded as one of the virtues of U.S. extradition law. To give an indication of how profoundly illiberal the proposed restriction is, it should be pointed out that the House Bill would make extraditable nearly all the important leaders of liberation movements in the last 200 years—persons like George Washington, William Connolly of Ireland, Garibaldi of Italy, Simon Bolivar of Latin America, Bernardo O’Higgins of Chile, Jose Marti of Cuba, Andres Bonifacio of the Philippines, to name but a few. Elimination of the concept of relative political offense institutionalizes a bias against members of freedom and independence movements—movements which almost invariably involve widespread violence against repressive regimes.

H.R. 6046 and the U.S.-Philippine Extradition Treaty

With the likely passage of H.R. 6046, the State Department is now floating the line that the U.S. Philippines Extradition Treaty—with the Hughes Bill’s key provision incorporated into it—is now acceptable. As Rep. Hughes has recently revealed, “The Administration has indicated to me informally that in the event that the House version of the Extradition Reform Act passes that the proposed extradition treaty with the Philippines will not be submitted until the decisionmaking authority on the political offense question has been changed to preserve the vote of the Courts.”

However, the reality we are in fact confronted with is that H.R. 6046, though reserving nominal authority over the exception for the courts, virtually emasculates it by severely restricting its application. This makes it all the more imperative, then, to oppose the ratification of the Philippine Treaty and other treaties—particularly those with repressive regimes, since their application will be guided by new laws which shall have essentially obliterated a traditional and vital keystone of U.S. extradition practice.

More important, however, the opposition to the U.S.-Philippine Extradition Treaty has never been solely—or even principally—based on the issue of who has jurisdiction over the political offense exception. A more vital concern has been the fact that it is po-

litically unethical to have an extradition agreement with a regime which has no independent judiciary and whose judicial proceedings amount to no more than kangaroo courts employed to condemn political dissenters—a fact documented by Amnesty International, the International Commission of Jurists, the Task Force for Detainees, and other human rights agencies.

The rationale for this concern as been aptly put by Republican Congressman James Jeffords of Vermont:

Traditionally, the U.S. has negotiated extradition treaties with foreign governments that apply their laws in an equitable and consistent manner. If we did not, we would create a repressive environment in our own country for those persons who want to express openly a dissatisfaction with their country of origin.●

PRESERVE HEALTH AND NUTRITIONAL ASPECTS OF THE WIC PROGRAM

HON. GEORGE MILLER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 10, 1982

● Mr. MILLER of California. Mr. Speaker, I am introducing legislation to protect one of our most effective programs, the special supplemental feeding program for women, infants and children—WIC—from an assault by the U.S. Department of Agriculture. Sixty-two of my colleagues have joined me in seeking to maintain the WIC program’s proven success.

No one in this Congress will forget USDA’s planned alchemy to convert ketchup into a vegetable in school meal programs. This year, the same administration is considering a new proposal to weaken safeguards for low-income pregnant women and infants at risk of retardation and birth defects.

The administration’s proposals would erode the high-protein food package which supplements the diet of 2.2 million vulnerable pregnant, postpartum and breast-feeding women, infants and children who have been certified by health professionals to be at nutritional risk.

Why should we tamper with, or possibly undermine, such a tremendously successful program? The successes and cost-effectiveness of the WIC program have been amply documented by reputable governmental and private studies.

Last year, the Massachusetts State Health Department completed a study of 12,000 WIC participants which showed that the WIC program significantly decreases the mortality rate of newborns by increasing infant birthweight. Low birthweight is currently the eighth leading cause of death in the United States. A low birthweight infant is 20 times more likely to die than a normal birthweight infant.

This large-scale study follows others which have indicated the savings

reaped by the WIC program. A 1979 Harvard University School of Public Health study demonstrated that every dollar spent on WIC’s prenatal component alone results in a savings of \$3 in averted medical costs for low birthweight babies. Treating low birthweight after birth is three times more expensive than preventing it through WIC.

The U.S. Department of Agriculture, which is now suggesting that we severely alter the WIC diet, has itself estimated a \$450-million savings in averted hospital care required to bring low birthweight babies up to normal weight in fiscal year 1980 alone. USDA further estimated that, at WIC’s fiscal year 1980 program level, the Federal savings in medicaid, SSI, and special education would be approximately \$260 million. If the program reached all eligible pregnant women, the Federal savings in aid programs would reach \$600 million to \$1.2 billion.

Why does this administration insist upon tampering with these repeatedly proven successes? To please selected segments of the food industry?

My resolution requires that, before proposing changes in the WIC food package, the Secretary of Agriculture make a finding that the proposed changes will be beneficial to the health and nutritional status of WIC participants. This finding, together with supporting evidence, must be submitted to the Congress before any such changes are made.

We in Congress cannot afford to sit idly by and watch the erosion of the WIC program by administrative fiat. Senator Hubert Humphrey and I wrote the legislation to extend this program in 1975 in response to testimony from the March of Dimes and other health groups that this country had the knowledge and skills to prevent retardation and birth defects. We now have evaluations of WIC which show clear and dramatic results in improving children’s chances for healthy development, saving lives and saving money. The WIC program represents one of those rare moments in the Congress when we design something to respond to a serious problem in the country, and the program actually works in solving the problem. In fact, its successes have far exceeded even our best hopes.

I urge you to join me in cosponsoring legislation to preserve and continue the health and nutritional benefits of the WIC program, and to send a message to the USDA that Congress will not stand for unnecessary and destructive tampering with this proven, cost-effective program.

H.J. RES. 567

Joint resolution concerning changes in regulations for the special supplemental food program for women, infants, and children of the Child Nutrition Act of 1966

Whereas the Special Supplemental Food Program for Women, Infants, and Children (WIC) was created to prevent occurrence of health problems and improve the health status of pregnant, post-partum and breast-feeding women, infants and young children from families with inadequate income who are at special risk to their physical and mental health by reason of inadequate nutrition or health care, or both;

Whereas repeated evaluations of the WIC program by the United States Department of Agriculture, the Center for Disease Control, State public health departments and university schools of medicine and public health have demonstrated that participation in the WIC program has decreased infant mortality rates, decreased the incidence of low birth-weight babies (low birth-weight is directly associated with increased deafness, blindness and retardation), and decreased the incidence of anemia;

Whereas cost-benefit analysis has proved that the WIC program is one of the most effective programs initiated by the Federal Government;

Whereas the Secretary of Agriculture placed in effect regulations which meet the goals of that program, the implementation date for which has been delayed until December 31, 1982; and

Whereas the Secretary of Agriculture has under consideration changes in regulations for the WIC program which would not contribute to improving the health status of WIC participants: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States in Congress assembled, That:

SECTION 1. The Secretary of Agriculture may not place in effect any rule pursuant to Section 17 of the Child Nutrition Act of 1966 which would not maintain or enhance the nutritional integrity of the supplemental foods made available under the Special Supplemental Food Program for Women, Infants and Children of the Child Nutrition Act of 1966.

SEC. 2. (a) The Secretary of Agriculture shall make a finding that any changes subsequent to enactment of this resolution in rules governing supplemental foods provided to WIC participants shall be beneficial to the nutritional status of those participants; and

(b) Such finding, and any supporting documentation, made pursuant to subsection (a) shall be submitted to the Committee on Education and Labor of the House of Representatives and the Committee on Agriculture, Nutrition, and Forestry of the Senate at least 14 days prior to issuance of proposed rules in the Federal Register.

SEC. 3. The Secretary of Agriculture shall implement the rule effective on November 12, 1980, concerning supplemental foods made available under the Special Supplemental Food Program for Women, Infants and Children (WIC), no later than December 31, 1982.

COSPONSORS FOR "WIC RESOLUTION"

Mr. Barnes, Mr. Bedell, Mr. Beilenson, Mr. Biaggi, Mr. Bingham, Mrs. Boggs, Mr. Boland, Mr. Bonior of Michigan, Mr. Brodhead, Mr. John L. Burton, Mr. Corrada, Mr. Dellums, Mr. Downey, Mr. Edgar, Mr. Edwards of California, Mr. Fauntroy, Ms. Ferraro, Mr. Foglietta, Mr. Ford of Tennessee,

Mr. Ford of Michigan, Mr. Frank, Mr. Guarini, Mr. Harkin, and Mr. Hoyer,

Also, Mr. Hughes, Mr. Kastenmeier, Mrs. Kennelly, Mr. Kildee, Mr. Lantos, Mr. Lehman, Mr. Lowry of Washington, Mr. McDade, Mr. McHugh, Mr. Matsui, Ms. Mikulski, Mr. Mineta, Mr. Moffett, Mr. Oberstar, Mr. Ottinger, Mr. Patterson, Mr. Pepper, Mr. Perkins, Mr. Peyser, Mr. Richmond, Mr. Rodino, and Mr. Roybal,

Also, Mr. Scheuer, Mrs. Schneider, Mrs. Schroeder, Mr. Shamansky, Mr. Simon, Mr. Solarz, Mr. Stark, Mr. Stokes, Mr. Studds, Mr. Vento, Mr. Walgren, Mr. Washington, Mr. Weiss, Mr. Wirth, Mr. Wyden, and Mr. Yates.●

AN UNWARRANTED PATENT STRETCH

HON. ALBERT GORE, JR.

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 10, 1982

● Mr. GORE. Mr. Speaker, the following editorial from the New York Times of August 7, 1982, provides a forceful argument against H.R. 6444, the patent-term extension legislation. I commend it to the attention of my colleagues in the House.

AN UNWARRANTED PATENT STRETCH

The pharmaceutical industry is about to receive an extraordinary favor from Congress: the right to extend the patent protection of new drugs up to seven years beyond the conventional period of 17. Congress has let itself be persuaded, after a hasty review, that the extension is fair and will foster innovation. But the drug industry's case is dubious.

Its chief premise is that extension will restore the time unfairly lost from patent life by having to prove to the Government that new drugs are safe and effective. But the testing of drugs in animal and clinical trials is something that any responsible company would wish to do anyway.

Besides, the complaints gloss over the common practice of "evergreening"—filing a patent application early, so as to beat any rival, but then filing new applications that modify or extend the original to postpone the time at which patent life actually starts.

For example, the original patent for the tranquilizer Valium was first filed in 1959 and gained the Food and Drug Administration's market approval in 1963. But because of a series of renewed applications, as well as a rival claim, the patent was not issued until 1968. When it expires in 1985, the drug will have enjoyed 22 years of protection.

The eight best-selling drugs in the United States in 1980 enjoyed an exceedingly healthy average patent life of 15.1 years, according to statistics kept at the Office of Technology Assessment. Even when a brand-name drug comes off patent, companies can still protect its market share by advertising; one study of off-patent drugs showed that half retained a 97 percent market share against companies selling the identical chemical under different names.

The industry contends that effective patent life time has been dropping, from 14 years for pre-1965 patents to 10 years or less for those now being issued. But the law did not intend to guarantee every inventor a clear 17 years of market monopoly. Many inventions, not just drugs, enjoy less patent

protection because of obstacles on the path to market. The drug companies complain that Government delays hold them back. But the bills that have passed both Senate and House committees grant an extension that goes far beyond any delay attributable to Government review.

The companies also contend that reduced patent life has discouraged investment in research and development. But figures from the technology assessment office show that the industry's investment in R & D has increased every year from 1965 to 1978, and has remained a strikingly constant percentage of sales. There is no proof that the windfall profits from a patent extension would in fact be plowed back into research. Even if research were in decline, Congress has many other means, like tax incentives to reverse it.

The pharmaceutical industry is efficient, profitable and healthy. It has no demonstrable need for any special break. The patent system as a whole may need reform, but that is a different issue. Monopoly rights should not be doled out to anyone with a hard-luck story, as Congress seems to believe. The proposed extension is unjustified, unsuited to the stated purpose of increasing research and offensive to the basic principle of a free economy.●

JOB TRAINING PARTNERSHIP ACT

HON. HAL DAUB

OF NEBRASKA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 4, 1982

● Mr. DAUB. Madam Chairman, unemployment—the Nation's most serious domestic problem—is draining our human potential and devastating the lives of millions of Americans. The Job Training Partnership Act which we have passed in the House of Representatives provides a new approach to this national problem. Years of Federal involvement and billions of dollars have not noticeably affected chronic unemployment. This does not mean that we cannot affect it; it simply means that our efforts to date have failed and it is time for a change. The Job Training Partnership Act embodies that change.

On September 30, the CETA manpower and training program will expire. Passage of this new legislation, H.R. 5320, represents a profound effort to eliminate what went wrong with CETA and to maintain the subprograms which succeeded. This legislation is truly a job training measure, not a public works job creation bill for local governments. A program that focuses on short-term placement of people in dead-end jobs is of less value to the individual and society than one that takes somewhat longer, but prepares the individual for jobs with a future.

The principles and values in the Job Training Partnership Act first represent a new trust in the decisions of local and State officeholders, and less

Federal involvement. Although we could have gone even further in this regard; this increased recognition in the abilities of local officials to define their own local problems and local needs is itself a long-needed improvement. In the past, local governmental units have been responsible for developing employment programs for their labor market areas without a great deal of coordination at the State level. Very little was done to develop linkages between local prime sponsors within the State; to develop a comprehensive plan to match available workers with available jobs in other parts of the State, and to retain skilled workers who have been displaced because of changing conditions in the economy.

Second, they represent a new trust in the contributions which local businessmen and women can make in this effort. Eighty-five percent of available jobs are in the private sector, and private employers already are spending \$40 to \$100 billion annually on training activities. The House of Representatives has used this opportunity to enlarge the role played by private enterprise and enlist the experienced executives who expend these dollars from the very start. The improvement of skills and abilities of our labor force is an enormous task—a task in which many sectors of our economy must play an active role. The primary role, by necessity, belongs to private enterprise and Congress must insure that Government policies do not inhibit private investment training. Since the intended outcome of training is in fact an unsubsidized job in the private sector, it is time that we involve these employers in decisions which will be meaningful to them and to our national economy years from now.

Third, they represent a recognition of the fact that our Nation's educational system can also be an effective partner in the effort to help our young people become employable. In June 1982, youth unemployment was at 19.2 percent, with black unemployment at 52.6 percent. To allow these statistics to go unnoticed would be to continue to relegate an entire generation to low productivity and dependency on the Federal system. We can make these young people productive, as I am convinced they want to be, only if we invest in them. Educational assistance is one way and job training is another. A country which invests in its human capital will yield tremendous rewards in terms of increased economic benefits. And, rather than create new, separate institutions for training, existing educational institutions can play an important role. From a local perspective, I have been well aware of a local community college, Metropolitan Community Technical College, which is actively seeking the challenge to fill this need. Vocational

education leaders in Nebraska have been to my offices telling me that they are willing and wanting to contribute in this partnership. The Job Training Partnership Act involves the education community, and I look forward to their input.

Fourth, it represents less tolerance for those who are feeding at the Federal trough, and more compassion for those who truly want to be trained for future, nonsubsidized, private employment.

Fifth, it represents a Federal program which finally is results oriented, rather than procedure oriented. Accountability is built right into the legislation. Performance standards will be set up. A program's effectiveness will be measured by the increase in earnings, the reductions in cash welfare payments or the placement of participants in private employment.

And sixth, it represents the knowledge that huge administrative overheads will no longer be tolerated by this Congress. We have restricted the percentage of Federal funds which can be utilized for this purpose to assure that the moneys get funneled for the purpose for which the program is intended—job training of disadvantaged and displaced workers.

The Job Training Partnership Act represents a new kind of Federal program; one that gives Americans a handup, rather than a handout. It represents the faith we should have in local officials and local business leaders in solving local problems, and it holds them accountable to do what they say they will do. Although further steps at improvement could still be taken, I am confident that this marks the beginning of a better, more humane approach to the serious problem of unemployment in America.●

PROVIDING VISION FOR GOVERNMENT

HON. GEORGE E. BROWN, JR.

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 10, 1982

● Mr. BROWN of California. Mr. Speaker, the need for governments to anticipate crises is universally accepted. In traditional national security planning, that is, military planning, we spend hundreds of billions of dollars for future contingencies that we hope will never happen. But for intelligence gathering or prevention of the causes of war we spend a pittance.

There are ways to improve our vision and provide the tools for seeing future problems. U.S. policymakers need these tools if they are to make intelligent judgments about the future. Unfortunately, the Reagan administration seems determined to reverse the process begun in previous administra-

tions to improve U.S. capabilities to understand and act on global resource problems.

I am pleased that some Members of Congress are acting in spite of the attitude of the administration. Our colleague from Massachusetts, Mr. MAVEROUKES, has introduced a House concurrent resolution which would address some of these issues, including the need for foresight in the management of national resources. Similar legislation has been introduced in the other body.

As the following essay by Dr. Russell Peterson, one of the leading advocates of a Global 2000 perspective, describes, we can hardly act too soon.

The article follows:

[From the Christian Science Monitor, July 29, 1982]

SEEING TOMORROW'S WORLD TODAY

(By Russell W. Peterson)

In this day and age, it is inexcusable that the US federal government does not have an organized and coordinated "foresight capability" to aid policymakers in understanding the global population, resource, and environmental trends that shape the world in which we exist.

The United States and its leaders are beset by crises which cannot be understood, much less resolved, without an appreciation of their causes beyond our borders and their consequences beyond the next decade or even the next election. Yet, if anything, since the "Global 2000 Report to the President" two years ago first documented the federal government's lack of foresight capability, the situation has deteriorated.

In its simplest terms, foresight capability is a matter of sound data, coordinated projections of global trends, analysis of their interactions, and informed policymaking. Based on the work of the 13 federal agencies and departments which went into the preparation of "Global 2000," the Council on Environmental Quality (CEQ) and the State Department concluded that "the executive agencies of the US government are not now capable to presenting the President with internally consistent projections of world trends . . . for the next two decades."

Just what does this mean for US policymaking? Misinformation and misperception.

For example, the health of the economy, at home and abroad, is currently the most politically pressing problem in the U.S. Yet at a time when our economic interdependence with other countries is greater than ever (the third world alone accounts for more than 25 percent of our overseas investment, more than 35 percent of our exports, and more than 45 percent of our imports), "Global 2000" found that the government's measure of worldwide economic health—GNP—is based on questionable assumptions. Among other things, federally used projections assumed major expansion in agricultural production as a result of stepped up fertilizer use. But they didn't consider possible changes in climate or explicit environmental impacts. They did assume unlimited water availability at constant real prices and no deterioration of the land resulting from urbanization.

I believe the government's lack of foresight capability exists at three levels—data analysis, projections coordination, and political commitment. And I am convinced that

at every level we are witnessing serious setbacks. The quality of government data, particularly the already limited global data, is being undercut dramatically by budget reductions in federal resource agencies.

Efforts to ensure consistency of assumptions and data, which go into projections for different sectors, are almost impossible without clear coordination. The only existing mechanism for coordination, the Office of Management and Budget's Statistical Policy Branch, has been eliminated. Political commitment to calling attention to issues that look across jurisdictions and beyond elections is vital. But despite its theoretical potential, the administration's "Interagency Global Issues Working Group" chaired by CEQ has thus far failed to respond substantively to even the problems of technical coordination so basic to providing useful foresight capability. I know of no instance in which the President personally has used his office to call attention to this problem.

Such setbacks are totally out of sync with growing public interest, both at home and abroad. Since the publication of "Global 2000," countries such as Japan, Canada and Mexico have begun their own Global 2000 inquiries. In the U.S., 56 separate organizations, including the National Audubon Society, the League of Women Voters, the Overseas Development Council, and the Planned Parenthood Federation of America, have joined together in the new Global Tomorrow Coalition to call attention precisely to the need for understanding global interdependence. Their initial action supported unanimously has been to call out for the creation in the Executive Office of the President of "an improved capacity to coordinate and analyze data collected by federal agencies and other pertinent sources on the long-term interactions of trends in population, resources, and environment—and their relationship to social and economic development."

Clearly, this is not a question of government "planning for the world." It is the question of whether the right hand of the government knows what the left is doing. That requires central coordination and communication, backed up by commitments to improve agency resources and educate officials on a regular basis. Congress has begun to explore the issue of foresight capability—reports on government computer projections are being prepared; House hearings have examined the problem conceptually; and three bills touch upon it legislatively.

In the Senate, S. 1771 includes among its requirements an interagency Council on Global Resources, Environment, and Population, to be chaired by CEQ and funded by the member departments. It would coordinate agencies' biennial production of long-term projections of global population, resource, and environment trends; encourage their analysis, particularly in light of current policy; and report regularly to Congress on these efforts. The fact that this bill is authored by Sen. Mark Hatfield and co-sponsored by such senators as Charles Mathias, Slade Gorton, Alan Cranston, and Bill Bradley is proof of serious congressional concern about foresight capability.

The time for action is now. S. 1771 is pending before the Governmental Affairs Committee, chaired by Sen. William Roth whose experience with the problems and relations of federal, state and local governments should be helpful in focusing on the problems that permeate and plague the global community. The Governmental Af-

fairs Committee should undertake during the summer the kind of critical debate this issue and this bill warrant.

Its goal should be Senate enactment of legislation on foresight capability in 1982, signaling to both the administration and the nation that we cannot afford even in an election year to lose sight of global population, resource, and environment trends and their impacts on social and economic factors.

(Russell W. Peterson, chairman of the President's Council on Environmental Quality during the Nixon and Ford administrations, is president of the National Audubon Society and chairs the board of directors of the Global Tomorrow Coalition.)

THE 200TH ANNIVERSARY OF THE ORDER OF PURPLE HEART

HON. BENJAMIN A. GILMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 10, 1982

• Mr. GILMAN. Mr. Speaker, last Saturday, August 7, 1982, was a glorious day in the Mid Hudson Valley of New York, and for our Nation.

Two hundred years prior to that day, General George Washington, Commander-in-Chief of the Revolutionary forces, created and presented the first "Badge of Merit" for valorous service to the American cause.

This badge, a heart-shaped purple insignia, later became one of the most famous and most honored military decoration in the U.S. military . . . the order of the Purple Heart.

The "Purple Heart" was founded by General Washington while he was headquartered in Newburgh, N.Y., overlooking the majestic Hudson River, with its breathtaking view of that river winding its way through the Highland Mountains.

Last weekend, the National officers and members of the Military Order of the Purple Heart held ceremonies at Washington's Headquarters in Newburgh marking this Bicentennial occasion. It was further commemorated by the issuance of an embossed envelope by the Postal Service honoring the Purple Heart and the brave defenders of our freedom who have received this badge of merit.

At the Washington Headquarters ceremonies, I had the honor of introducing as keynote speaker our former colleague, the Secretary of the Army John O. Marsh, Jr., whose remarks were so impressive that I would like to take this opportunity to share his words of inspiration with my colleagues. Accordingly, Mr. Speaker, I ask that Secretary Marsh's speech be inserted at this point in the RECORD:

REMARKS BY THE HONORABLE JOHN O. MARSH, JR., SECRETARY OF THE ARMY

Two centuries ago this day, our War for Independence was in its twilight days.

Past was Valley Forge and Saratoga, behind was Cowpens, Trenton and Ticonder-

oga; over was Bunker Hill, Brandywine, and Kings Mountain.

Even Yorktown was a memory.

The American Army that encamped here—the Continental line—was the finest light infantry in the world.

In Washington's Army had marched men who stood their ground at Lexington Green and stunned the British army at Bunker Hill.

In seven years of war this Army had become a mosaic of colonial America. The battlefield and the campaign trail forged a sense of nationhood as regiments for former colonies served together and suffered together in a common cause.

Among its soldier-patriots were Rangers who had marched to Boston with Dan Morgan of Virginia—clad in buckskin, their long rifles and aimed fire made the difference at Saratoga.

The great marbleheaders, watermen from New England, who not only rowed Washington across the Delaware to attack Trenton, but with their seafaring skills had saved his Army at Manhattan.

Some had marched in sleet and snow to Valley Forge in '77, and through sheer will survived the terrible winter. A historian wrote:

"Nothing much happened in the lines at Valley Forge. Men simply set their teeth and stayed alive and thus kept alive the Army which was the active expression of their cause, quite unaware of the deep glory of what they did there."

One of those who suffered by the campfires at Valley Forge was a young officer named John Marshall who would one day become the Chief Justice of the Republic he fought to establish.

Another Valley Forge officer was a 20-year old Major from Virginia who had crossed the Delaware with Washington—was severely wounded at Trenton leading a reconnaissance unit. History knows him better as James Monroe, the Fifth President of the United States.

These were tough, lean, combat-trained veterans who had marched from Canada to Georgia and crossed the Hudson, the Delaware, the Susquehanna, Potomac, the James, the Rappahannock and the Dan. Many had felt the pain of shrapnel—some had wept bitterly as they searched a battlefield in late evening for the body of a brother or a close friend. They had known the despair of being out-numbered, out-equipped, out-clothed, barely fed and rarely paid.

Yet in the ranks of these Regiments were men who in silent formation stood on Yorktown's Surrender Field and watched Cornwallis' soldiers lay down their arms.

They were the victors.

In the hour glass of history, over seven years of war had run. The sands of time:

Had seen the lanterns hung from the steeple of Old North Church.

Saw fired the shot heard round the world—whose sound echoes into the 20th century.

Saw drafted and signed a Declaration of Independence.

Saw created an Army, a Navy and Marine Corps.

Saw forged an alliance with France.

Saw come together a fledgling Nation under the Articles of Confederation.

Here on the banks of the Hudson, in the Highlands of New York, near the Tappan Zee, close to the Palisades and the legends of Sleepy Hollow, it is hard to imagine that 200 years ago this was the bitter ground—torn between patriot and loyalist, where old

and new allegiances divided families and destroyed friendships.

For an infant nation that nearly died aborning, these grains in the hour glass of time were not sand—they were gold.

Moments of our national greatness were expressed in documents and in deeds—in the political courage of statesmen, and the sacrifices of those who bore arms for their country.

Shakespeare wrote that "all the world's a stage . . ." Across the stage of the American Revolution marched a host of Americans who changed forever the human experience.

Near the western reaches of the American frontier—hardly a backwater to the parlor society of Western Europe—Newburgh, 200 years ago was at the center of this drama.

Here had come into confluence both duty and tribute. A duty to recognize the deeds of the enlisted soldier to achieve the declaration's promises of Life, Liberty, and the Pursuit of Happiness, and a tribute to his valor.

The Revolution had its Valhalla of heroes and warriors—Washington, Green, Wayne, Dan Morgan, Ethan Allen, Knox, Nathan Hale and Marion, the Swamp Fox—but, in this, as in all wars, they are won by the combat soldier who bears the brunt of battle. Unsung, they were then, and still are, the anonymous heroes of freedom.

This Bicentennial Ceremony marks a tradition that began with American arms to give a place of honor to those who marched in the ranks and served with uncommon valor.

It is fitting that in an Army of a free people purple should be the color of this decoration. It is the symbol of royalty. It denoted that among the brave and courageous there is an equality that bears no relationship to rank or station.

The event we commemorate today confirms the debt we owe to really just a few people. So it has often been in times of great national trial. Washington's army in Newburgh was barely more than 12,000 soldiers. Our infant Navy and Marine Corps were only a hand full when compared to their counterparts in the great powers of the world.

Three soldiers of the Continental Line were to win this decoration. All had served for more than seven years. All were sergeants—all were from Connecticut. We should call their names this day.

Sergeant Elijah Churchill, of the 8th Connecticut and 2d Continental Light Dragoons, cited for gallantry in action at Fort St. George, Coran and Tarrytown, New York.

Sergeant William Brown, 5th and 8th Connecticut Regiments for gallantry in the night bayonet assault on Redoubt 10, Yorktown, Virginia, October 14th, 1781.

Sergeant Daniel Bissel, Jr., of the 8th, 5th and 2d Connecticut Regiments, for his successful and courageous action in a clandestine intelligence operation behind enemy lines in New York City, upon the request of the Commander-in-Chief.

A half century ago, as a part of the commemoration of the 200th anniversary of Washington's birth, this Revolutionary award was designated the Purple Heart. It has since been presented to those in the Armed Forces of our country who have received wounds in battle.

In honoring these three sergeants of Connecticut, we pay tribute to the tens of thousands of our fellow countrymen who have suffered and sacrificed for this great Nation.

Referring to the Battle of Agincourt, Shakespeare wrote:

"We few, we happy few, we band of brothers;

For he today that sheds his blood with me Shall be my brother."

Those who wear the Purple Heart belong to an American Brotherhood.

Let us remember that freedom is never free. It is one thing to declare independence, it is another to achieve it.

The last line of the Declaration is a pledge that was kept through the efforts of a comparatively few people in order that promises of Life, Liberty, and the Pursuit of Happiness would have meaning. That line reads:

"And for the support of this declaration, with a firm reliance on the protection of divine providence, we mutually pledge to each other our lives, our fortunes and our sacred honor."

This pledge was kept by a small and gallant Army whose sacrifices gave us freedom and independence.

Your Army will keep it today.

If we all so dedicate ourselves, we shall ensure that 100 years hence our countrymen will again assemble at Newburgh to honor those who bear the wounds of battle for their service to America.●

CANADA IS THE ECONOMIC BENEFICIARY OF ACID RAIN

HON. NICK JOE RAHALL II

OF WEST VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 10, 1982

● Mr. RAHALL. Mr. Speaker, recently, information has come to my attention which casts a shadow over much of the Canadian Government's efforts to see that an acid rain control program is initiated in this country. Ever since the Congress began work on the reauthorization of the Clean Air Act, my office has been bombarded with reports, studies, and letters from Canadian Government officials outlining environmental horrors of acid rain and calling for mitigating actions.

However, these entreaties are suspect, and I am beginning to believe they are founded in economic rather than environmental concerns.

A number of electric utilities in New England are continuing with efforts to reduce oil consumption in keeping with the national goal of increasing energy independence from foreign suppliers. Many of the utilities are considering converting oil boilers to coal produced in Pennsylvania, West Virginia, and Kentucky. Indeed, Consolidated Edison of New York is in the process of trying to convert its Arthur Kill 2 and 3 and Ravenswood 3 units to coal. United Illuminating Co. is on schedule in the conversion of its Bridgeport Harbor 3 unit to coal, Central Maine Power Co. is considering plans to convert three small units to coal, and Boston Edison is contemplating a number of coal conversions to name a few.

Yet some of these same utilities, under the threat of new and costly

controls aimed at reducing acid rain, are now studying the feasibility of purchasing power from Canada. A number of coal conversion plans have been dropped and a few of these utilities may be forced to buy Canadian power.

The chief economic beneficiary of an acid rain control program would be Hydro-Quebec's James Bay Hydro Complex now under construction in Canada. It is my understanding that this project of approximately 5,000 megawatts would have excess capacity and the firm is aggressively marketing this capacity in the Northeastern region of the United States.

Boston Edison, for one, may consider the purchase of Canadian hydro power as a means to reduce oil consumption. The United Illuminating Co. is also expressing an interest in Canadian power. And, it is my understanding that the Maine Public Utility Commission is giving favorable response to a New England Power Pool purchase agreement for 690 mw of Canadian power from Hydro Quebec. Central Main Power Co. would receive a portion of this imported power.

Mr. Speaker, while these activities are taking place there is evidence that at least one major source of pollution in Canada, Ontario Hydro, is backing away from plans to install acid rain controls. According to a report sent to my office by the chairman of the Subcommittee on Acid Rain in the Canadian House of Commons in September 1981, entitled "Still Waters: The Chilling Reality of Acid Rain," emissions from Ontario Hydro can produce acid rain in parts of the United States. The subcommittee in its report applauded "the decision by the corporation to effect an emission reduction of more than 40 percent by 1990. We believe, however, that even greater reductions in emissions are feasible and affordable." Nonetheless, according to a statement made in the Canadian House of Commons by a Member from Hillsborough on July 22, 1982: "Earlier this week Ontario Hydro announced that it is going to shelve plans to install acid rain controls on its plants in Ontario."

This information in my mind undermines the concerns of the Canadians over the impacts of acid rain for environmental reasons. There is more to the acid rain story, Mr. Speaker, than the Canadians are telling us.●

INHERITANCE TAX RELIEF FOR CONSERVATION FARMERS

HON. COOPER EVANS

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 10, 1982

● Mr. EVANS of Iowa. Mr. Speaker, in order to provide an inducement, in ad-

dition to those that presently exist, and to install and maintain conservation practices which will protect the soil from the ravages of soil erosion, I am introducing legislation which would exclude from Federal estate tax 50 percent of the value of farmland on which there was no significant degradation of agricultural productivity in each of the 5 years prior to the death of the owner.

The problem our Nation faces with respect to the deterioration of our land resources is more than a passing one. It has tremendous long-term implications for our ability both to meet the food needs of people around the world and to contribute to a favorable balance of trade for the United States. Currently, soil erosion exceeds tolerable levels, that is, levels that would result in sustained productivity over the long term, on nearly 120 million acres, or more than 25 percent of our cropland. This situation exists in spite of excellent achievements in soil and water conservation over the past 50 years by our Department of Agriculture.

We have been slow to realize that all of our people share the responsibility for stewardship of our soil. Future generations are the major benefactors of our erosion control work. But there is not time to wait for future generations to solve the problem. If we fail to control erosion, future generations will pay dearly for that failure. We have expected the farmer to shoulder more than his share of the cost of soil and water conservation. Today his profits and ability to pay for soil conservation work are squeezed by increasing production costs and decreasing prices of his products. Society must help.

Existing Federal estate taxes have been a hardship on many farm families. Numerous cases have come to our attention where farms which have been owned by a family for several generations were divided and a portion sold in order to pay these taxes. This legislation would relieve a part of this burden for farmers who do a good job of protecting their soil for future generations. Mr. Speaker, these farm families are the backbone of our Nation's productivity and I urge my colleagues in this body to join ranks in providing them the support they need to carry out effective soil conservation work on their farms.●

THE RIGHT TO EMIGRATE

HON. BARNEY FRANK

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 10, 1982

● Mr. FRANK. Mr. Speaker, Tzalo and Khaya Lipchin have been waiting

almost 4 years to be reunited with their son Leonid, who lives in Brookline, Mass. His parents live 9,000 miles away in Leningrad, and they have been denied exit visas since they first applied to leave almost 4 years ago. Now 35 years old, Leonid was allowed to leave the Soviet Union in 1978 after his 16-day hunger strike embarrassed Soviet authorities into granting him an exit visa. Unfortunately, the Soviets have denied that same right to his parents.

Since March 1981, I have been in contact with Dr. Sergey Chetverikov, Counselor of the Soviet Embassy, urging that his government grant exit visas to the Lipchins so that their family may be reunited. Several times I have requested the assistance of the Counselor in facilitating the Lipchins departure. Unfortunately the Soviet Government has been unwilling to grant the Lipchins exit visas, which would be in compliance with international accords which the U.S.S.R. has signed.

I am deeply concerned with the current emigration situation of Soviet Jews and the role of the American Government in helping to alleviate this problem. The rate of emigration has dropped sharply and reports of harassment of refuseniks has increased. Clearly, the Soviet Government is trying to break the will of Soviet Jews, who have pursued their goal of emigrating from the Soviet Union to practice their religion in freedom.

Over the past decade, the United States played an integral role in opening the doors of the Soviet Union for thousands of Jews seeking to emigrate. As discussions on various issues of mutual concern continue, it is essential that we reaffirm to the Soviets the American commitment to human rights and that adherence to the Helsinki accords is vital to an improvement in the relations between our nations.

Mr. Speaker, it is known that an active concern on the part of the U.S. Government is important in assisting individuals like Leonid Lipchin who is seeking to be reunited with his retired father and ailing mother. We must express our concern for the welfare of individuals wishing to emigrate, and support the basic human right of Soviet Jews to emigrate. I commend Leonid Lipchin for his efforts to reunite his family, and I hope my colleagues will continue to press the Soviet Union to honor the international agreements it has signed which guarantees the right to emigrate.●

PARRIS JOINS WITH PRINCE WILLIAM RESIDENTS IN EXTENDING ROYAL INVITATION

HON. STAN PARRIS

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 10, 1982

● Mr. PARRIS. Mr. Speaker, I would today like to commend the Board of County Supervisors, the governing body of Prince William County, Va., on their congratulatory and thoughtful recognition of the birth of Prince William, the Prince of Wales.

I deeply share the kind words of their letter to Prince Charles and Princess Diana. In it, they write:

The Board of County Supervisors is thrilled that you have chosen to name your son Prince William, and we hope that as he grows to manhood, he will always feel a close friendship to the United States, the Commonwealth of Virginia, and particularly, Prince William County.

These remarks are very significant, for it is believed that Prince William County, Va., is the only county in the United States bearing that name. This distinction is also shared by at least 50 area organizations and business firms. In addition, many of the 146,000 inhabitants of Prince William County are of English descent.

I am particularly proud of Prince William County, the only county in Virginia that stretches from the mountains in the West to the Coastal Plain in the East. Discovered by Capt. John Smith in 1608, it is rich in cultural heritage and is the site of many historical landmarks. Its residents benefit from a national forest and park, a chamber of commerce, a tourism council, and symphony orchestra which is celebrating its 10th anniversary this season. Presently underway is the Prince William summer festival, and the Prince William County fair which is scheduled to open August 14.

Mr. Speaker, because this is a great occasion for the residents of Prince William County and the Nation, I join with the Board of County Supervisors in extending a standing invitation to the royal couple and their new son, to visit Prince William County whenever their travels bring them to the United States. I believe such a visit would be a prodigious and joyful event that could be shared by all.

For my colleagues use and information, I would like to insert at this time into the CONGRESSIONAL RECORD the contents of the letter from the Board for Prince William County of Virginia.

The letter follows:

COMMONWEALTH OF VIRGINIA,
COUNTY OF PRINCE WILLIAM,
Manassas, Va., July 14, 1982.

His Royal Highness Prince and Princess of Wales,

Buckingham Palace, London SW1 England

DEAR PRINCE AND PRINCESS OF WALES: On behalf of the citizens of Prince William County, Virginia, United States of America, congratulations on the birth of your son, Prince William. The Governing Body of Prince William County, the Board of County Supervisors, is thrilled that you have chosen to name your son Prince William. We hope that as he grows to manhood, that he will always feel a close friendship to the United States, the Commonwealth of Virginia and particularly, Prince William County.

Prince William County is located in the Washington Metropolitan area, approximately 30 miles southwest of our Nation's Capital. The County has 345 square miles and is inhabited by 146,000 people, many of whom are of English descent. The County seat is Manassas.

Captain John Smith discovered Prince William County in 1608, although, there is some evidence that the Spanish were in this area as early as 1565. There were various divisions of land into counties between 1653 and 1759 affecting Prince William County and the latter year, Prince William became an independent county with boundaries that exist today. Prince William County is the only county in Virginia that stretches from the mountains in the west to the coastal plain in the east.

The citizens of Prince William County are quite excited that you have chosen the name Prince William for your son. On behalf of the Board of County Supervisors and the citizens of Prince William County, we wish for your son good health, a long, productive and happy life filled with every success. When your travels bring you to the United States of America we hope that you and your son will visit Prince William County.

Yours Sincerely,

KATHLEEN K. SEEFELDT,
Chairman,
Board of Supervisors.

RESOLUTION

Whereas, the Royal Highness, the Duke and Duchess of Wales, have given birth to a son and named him Prince William; and

Whereas, the citizens of Prince William County, Virginia, United States of America and its governing body, the Board of County Supervisors, are thrilled with the birth of the Prince and with the selection of William as his name; and

Whereas, it is the desire of the governing body of Prince William County, Virginia, United States of America, to note the birth of Prince William and to congratulate his parents, Prince Charles and Princess Diana; and

Whereas, it is the desire of the Board of County Supervisors to extend a standing invitation to the Duke and Duchess of Wales and their son, Prince William, to visit Prince William County whenever their travels bring them to the United States; and

Whereas, it is the hope of Prince William County, Virginia that Prince William will always feel a close kinship with the County and visit it whenever he can; and

Whereas, the Board of Supervisors sends its fond greetings to his parents, Prince William and the people of England and commend them all on the birth of Prince William;

Now therefore, be it resolved by the Board of County Supervisors of Prince William County, Virginia, United States of America that this resolution be read among the official minutes of the meeting on July 6, 1982 and that the Chairman of the Board is hereby authorized and directed to communicate with the Royal Highness, the Duke and Duchess of Wales, commending them on the birth of their son Prince William.●

NOT GUILTY BY REASON OF INSANITY

HON. CARROLL HUBBARD, JR.

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 10, 1982

● Mr. HUBBARD. Mr. Speaker, just after the jury's verdict of "not guilty by reason of insanity" in the John Hinckley trial, I received an excellent letter from one of my constituents, Randall W. Shaffer of Paducah, Ky. Mr. Shaffer's letter is indicative of the cries of outrage that were heard throughout the entire country with regard to this defense plea. As the Congress works with changes in the laws dealing with the insanity defense, I would like to share Mr. Shaffer's comments with my colleagues. The letter follows:

PADUCAH, KY., June 22, 1982.

HON. CARROLL HUBBARD,
Rayburn Office Building,
Washington D.C.

DEAR CARROLL: I've just heard the jury's verdict of "not guilty by reason of insanity" given John Hinckley for the terrible crimes he has committed.

I was shocked, stunned and then upset. The very idea of the possibility of him being turned loose on innocent victims again frightens me. What have we come to in this country? How can we call this the "land of the free" when soon we will all be prisoners in our own homes, afraid to get out for fear of being killed by a so-called insane person?

I wonder if Jim Brady would rather be shot by a sane person instead. Sane or insane, what's the difference? They kill just as deadly and should be locked up.

Please, I realize this is written in haste, but maybe it's time we acted with haste to protect ourselves from all the rationalities that so-called "puritans" and "save those who can't help themselves, do-gooders" promote.

Please use your influence to do whatever is necessary to deal with these matters. If what I'm suggesting is unconstitutional, call for an amendment; if a law needs to be written or changed, do it; whatever, get this thing turned around.

I'm sorry, but I had to yell at someone. But, you or I may be a Jim Brady or one of the others some day.

Most sincerely,

RANDALL W. SHAFFER.●

BUDGET REDUCTION

HON. NORMAN D. SHUMWAY

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 10, 1982

● Mr. SHUMWAY. Mr. Speaker, during the past weekend in California I met with constituents to discuss pending legislation. Particular concern was focused on my views of the tax bill which will raise \$100 billion in taxes over the next 3 years. I explained to my constituents that, in my opinion, the recession will not be solved through tax increases, and that I would not vote for the tax bill without some assurance that Congress can uphold the budget reductions approved earlier this summer.

Unfortunately, I am not confident of the ability of the House to do so, or even to abide by the budget process. This lack of resolve was strikingly illustrated last week by the passage of H.R. 6862, the reconciliation bill of the Post Office and Civil Service Committee.

The first concurrent fiscal year 1983 budget resolution instructed this committee to achieve savings of \$376 million in fiscal year 1983. These savings were to be achieved through the imposition of a 4 percent COLA cap on Federal annuities, and through other administrative changes in the civil service retirement system. Instead of being submitted to the Budget Committee to be combined with the other committees' reconciliation bills, H.R. 6862 was granted a rule so that the bill could be voted on separately.

The bill the committee reported achieved only \$32 million of the mandated \$376 million in savings for fiscal year 1983—a shortfall of \$244 million. It did not cap COLA's, and provided for outlay reductions of only \$113 million for fiscal year 1983-85, or only 3.5 percent of the \$3.2 billion savings that the committee was instructed to achieve. This was the first major test of the budget process, yet partisan political considerations were clearly more important to the committee than the integrity of this process.

Unfortunately, the bill passed by a vote of 268-128. A motion to return the bill to committee with instructions to achieve the mandated savings failed by a vote of 160-236. How can we convince the financial markets of our sincerity in reducing Federal spending when at the first major test of the budget process, our resolve crumbles? How can we justify a tax increase when we cannot even hold to the spending levels we approved 2 months ago?

Good arguments were made both for and against capping COLA's for Federal retirees, and my votes for the motion to recommit and against H.R.

6862 were difficult for me personally. But COLA's were not the issue in this case. The issue is the budget process and congressional commitment to it. These are not normal economic times. Unless we have the courage to stand by the budget process—imperfect as it may be—we are never going to reduce spending. I continue to feel that the financial recovery of this country is our first priority, and that healthy economy cannot but improve the lot of all Americans, particularly retirees living on fixed incomes for whom inflation is the cruelest punishment.

Of course the final determination will rest with the Appropriations Committee. Yet the passage of H.R. 6862 signals that Congress will make only superficial efforts to control spending, and will not have the courage to uphold them when difficult political choices arise. If the budgetary capitulations embodied by the passage of H.R. 6862 continue, I predict a rough road for the tax bill.●

A CONGRESSIONAL WELCOME FOR CYCLISTS TO END WORLD HUNGER

HON. BENJAMIN A. GILMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 10, 1982

● Mr. GILMAN. Mr. Speaker, today, I was pleased to join a number of my colleagues on the Capitol steps in welcoming to Washington, teams of Cyclists to End World Hunger. These marathon participants, who departed from Atlanta, Ft. Lauderdale, and Denver, arrived in Washington yesterday and will soon begin the final leg of their journey to the United Nations in New York. The cyclists crossed 15 States, met with State and local officials, and brought their message about the need to intensify our commitment to alleviating hunger to millions of citizens.

The riders, in addition to raising a considerable sum of money to directly assist those suffering from hunger, compiled over 10,000 signatures from individuals alining themselves with efforts to end hunger. Those names, together with the more than 3,000 signatures collected during a bike marathon last year, were placed in the "Presidential Book," a document, presented today to my colleagues and I, which contains the names of more than 2.2 million individuals firmly committed to working to resolve the critical problem of hunger and malnutrition.

Mr. Speaker, the Presidential Commission on World Hunger, of which I was a member, recognized that raising public awareness about hunger and generating the political will to resolve that problem, is the primary prerequisite if our Nation is to develop new

comprehensive antihunger policies. I commend these dedicated cyclists, and the many individuals and private organizations who helped to make the bike marathon possible, for their important contribution to raising the consciousness of the public and policymakers about the urgent need to resolve the world hunger problem.●

PAY AS YOU GO BALANCED BUDGET ACT OF 1982

HON. GEORGE MILLER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 10, 1982

● Mr. MILLER of California. Mr. Speaker, I am today introducing the Pay as You Go Balanced Budget Act of 1982. The legislation is a statutory form of the "Pay As You Go" process which I offered to the House in May during consideration of the first budget resolution for 1983. It is my hope and my intention that the House will consider this legislation as a rational and preferable alternative to the proposed balanced budget amendment to the Constitution, and at the appropriate time, I will offer this legislation as a substitute.

Mr. Speaker, the proposed cynical and ineffective amendment would simultaneously abuse the amendatory process and attempt to deceive the people of the United States who vigorously—and understandably—want Congress to take action to reduce the deficit and balance the budget.

The constitutional amendment will not achieve those goals, as some of its chief proponents have openly confessed:

"Frankly, it doesn't do a thing."—Majority Leader Senator HOWARD BAKER.

"I don't think it would have any practical effect."—Finance Chairman Senator ROBERT DOLE.

"I think that the whole exercise on this constitutional amendment is the ultimate confession of failure on the part of the Congress of the United States . . . This is a matter that should not really be in the fundamental law of this land."—Senator JOHN G. TOWER.

Yet Congress need not fail to enact legislation which will realistically and surely move us toward a balanced budget immediately, instead of declaring our constitutional intention to reach that goal at some indeterminate time in the future.

The pay-as-you-go budget procedure is a proven means for radically reducing the deficit in 1983 and 1984, and balancing the budget by 1985, according to the Congressional Budget Office. The pay-as-you-go budget plan would, in fact, achieve a balanced budget before the proposed amendment would even be ratified. Pay as you go is the means of balancing the budget in the mid-1980's; the constitu-

tional con, as the Washington Post has termed the proposed amendment, is a vague promise to try by the mid-1990's.

Pay as you go was considered by the House during the budget debate in May. It received 181 votes, including 80 percent of the Democrats voting, and the highest proportion of votes of any budget plan presented that week.

Yet pay as you go is not a Democratic, nor a Republican, plan. Nor is it conservative or liberal.

Pay as you go requires that whenever Congress decides to increase spending above the 1982 baseline amount for any program, we simultaneously agree to raise an equivalent amount in revenues or cut back spending elsewhere.

If we follow this straightforward process, as 39 States currently do, the CBO projects a \$27.5 billion surplus by 1985.

By contrast, the current budget resolution, supported strongly by those who now call upon us to pass the constitutional amendment, would raise \$225 billion in new taxes, add perhaps \$600 billion to the national debt, and still come nowhere close to balancing the budget.

In addition, implementation of pay as you go would save about \$100 billion on interest payments on the debt over the next 3 years as a result of deficit reductions. This is the kind of budget program that will persuade the business and investment communities that we in Congress are serious about achieving a balanced budget. Simply passing an amendment declaring our commitment to a balanced budget will fool no one in the financial community.

It is obvious that merely mandating a balanced budget is not enough. If Congress cannot find the courage to enact a budget balancing process like pay as you go, how could we ever find the backbone to construct a balanced budget itself?

I urge you to consider the Pay as You Go Balanced Budget Act of 1982 and support its enactment in lieu of any ill-advised and ineffectual tampering with our Constitution. I believe it provides what the American people, and the majority of the Congress, truly want: Not a balanced budget amendment, but a balanced budget.

John Chancellor, the distinguished NBC News commentator, recently compared the attractiveness of the "pay-as-you-go" balanced budget process to the ineffectual constitutional amendment. I would like to place Mr. Chancellor's commentary in the RECORD at this point:

JOHN CHANCELLOR, NBC NEWS

A lot of people including the President are beating the drum this week for a constitutional amendment that some day, maybe, would sort of require a balanced budget.

There's a better way: a plan floating around the Congress that would balance the budget in three years. Guaranteed.

It's the "Pay As You Go" budget proposal, offered to the House of Representatives by George Miller, Democrat of California, and ingenious and practical plan.

Here's how it would work: first, it would freeze government spending at its present level. So if the Congress wanted to spend more on defense, it would have to spend less on something else, such as spending on social programs. Or if the Congress wanted to spend more on defense and social programs, it would have to reduce non-defense spending. All within a frozen total budget. If the Congress wanted to spend more than that, it would be forced to bite the bullet and raise taxes. Fiscally sound, if politically dangerous.

The beauty of this is that it would make Members of Congress directly accountable for the money they spend. Everybody would have to stand up and be counted. And, with spending frozen, the natural growth of the economy would increase tax revenues and balance the budget.

The Congressional Budget Office confirms that the plan would lower the deficit by fiscal 1984, and produce a glorious surplus of 27 billion dollars in 1985. Think of that.

Congressman Miller's "Pay As You Go" budget plan was defeated in the House last May, voted down by most Republicans and a few Democrats. Senator Christopher Dodd is going to ask the Senate to approve it instead of the constitutional amendment to balance the budget.

"Pay As You Go" is a better way than tinkering with the Constitution. Let's see what the Senate does with it.

Unfortunately, Mr. Speaker, the Senate did not take heed of Mr. Chancellor's comments, and as a result passed an amendment which even the Republican leaders of the Senate confess publicly to be a fraud and an abuse of the constitutional amendatory process. Let the House not follow suit in such a cynical and meaningless fashion.

Mr. Speaker, I submit to the RECORD a column by Washington Post syndicated columnist Mark Shields on the pay-as-you-go budget process. Mr. Shields is well known and highly respected for his insightful and barded commentary on political activities in Congress. I would hope that each member of the House would review this column before voting on the balanced budget question.

[From the Washington Post, June 25, 1982]

A BUDGET WITH A BACKBONE

(By Mark Shields)

During the recent congressional budget fight, there occurred a verifiable sighting of something the Democrats have been frantically in search of since being run out of office in 1980: an authentic new idea. It was California Rep. George Miller's "pay-as-you-go" budget plan, which won the support of four-fifths of voting House Democrats, but not House passage.

Upon closer scrutiny, some of those House Democrats might not have been so enthusiastic about the budget plan with the attractive label. Miller, a fourth-term liberal with an independent streak, proposed that Congress freeze all federal spending at the 1982 level and only allow itself to increase any

spending program—Medicare or MX—by first coming up with the revenues to pay for that increase. Those new revenues could be obtained either by cutting other existing programs or by increasing taxes. Those are the only two options. No more rigged projections of rosy revenue increases in 1988, thank you. Miller allows for no exemptions from the freeze. Social security, too, would be subject to the pay-as-you-go formula.

Unlike the administration's 1981 tax-cut plan, which promised instant and ouchless prosperity by next Tuesday, the Miller plan offers some political pain, especially for his congressional and party colleagues. No longer would members of Congress—of both parties—be able to finance their favorite untouchable programs through the federal deficit. Congress would be required to make real choices among competing interests and constituencies. Republicans who have simultaneously favored big defense spending boosts and big tax cuts would be exposed, just as quickly as those "no-choice" Democrats who have appeared constitutionally incapable of saying no to any appropriations scheme remotely mentioning "old" or "small." What Miller is suggesting is nothing less than a congressional vertebrae transplant, without benefit of anaesthetic.

According to the Congressional Budget Office, alone of all the budget proposals, the pay-as-you-go plan would have produced a federal budget surplus of \$27 billion by 1985. Furthermore, as its sponsor conceded, the plan would "put politics back on the floor of the House. I want to find out what Republicans—and Democrats—are really willing to pay for," says Miller.

To the criticism that pay-as-you-go would not allow for any future economic stimulus through planned public deficits, the California responds. "A \$4 billion program may mean something when the debt is \$10 billion, but not when our annual deficit is \$140 billion."

Mr. Speaker, reducing our Federal deficit, ending our mindless reliance on the debt, and balancing the Federal budget are the major goals of this Congress. If we fail to take serious actions to achieve these popularly supported goals, all of our other efforts to revive the economy are bound to fail.

The American people expect more of this Congress than partisan brick-throwing. They want answers. And to provide those answers demands a new budget process.

The people we represent, Mr. Speaker, do not expect miracles from the Congress. But they do expect the truth. We owe them an honest response to their reasonable demand for a balanced budget, and the pay as you go balanced budget process is a workable, understandable, and effective means of reducing our debt and revitalizing our economy.

The text of the act follows:

Be it enacted by the Senate and the House of Representatives of the United States of America in Congress assembled, That (a) (1) notwithstanding any other provision of law, and except as provided in paragraph (2), it shall not be in order in the Senate or the House of Representatives to consider any concurrent resolution on the budget for any fiscal year beginning after September 30, 1982, or any amendment thereto or any conference report thereon if—

(A) the adoption of such concurrent resolution as reported;

(B) the adoption of such amendment; or

(C) the adoption of the concurrent resolution in the form recommended in such conference report, would cause—

(i) the appropriate level of total budget outlays set forth in such concurrent resolution for such fiscal year to exceed the appropriate level of total budget outlays set forth for the preceding fiscal year in the most recently agreed to concurrent resolution on the budget for that preceding fiscal year; or

(ii) the recommended level of Federal revenues set forth in such concurrent resolution for such fiscal year to be less than the recommended level of Federal revenues for the fiscal year preceding that fiscal year set forth in the most recently agreed to concurrent resolution on the budget for that preceding fiscal year.

(2) Notwithstanding paragraph (1), a concurrent resolution on the budget for a fiscal year may—

(A) provide for an amount of budget outlays for such fiscal year in excess of the appropriate level of total budget outlays for the fiscal year preceding that fiscal year set forth in the most recently agreed to concurrent resolution on the budget for that preceding fiscal year if the concurrent resolution on the budget for such fiscal year also—

(i) provides for an amount of revenues for such fiscal year in addition to an amount of revenues equal to the recommended level of Federal revenues for the fiscal year preceding that fiscal year set forth in the most recently agreed to concurrent resolution on the budget for such preceding fiscal year, which is not less than such amount of excess budget outlays; and

(ii) identifies the source of such additional amount of revenues and proposed changes in law to achieve such additional amount of revenues; or

(B) provide for a reduction in the recommended level of Federal revenues for such fiscal year below the recommended level of Federal revenues for the preceding fiscal year set forth in the most recently agreed to concurrent resolution on the budget for that preceding fiscal year if the concurrent resolution on the budget for such fiscal year also—

(i) provides for a reduction in budget outlays for such fiscal year below the appropriate level of total budget outlays for the fiscal year preceding such fiscal year set forth in the most recently agreed to concurrent resolution on the budget for such preceding fiscal year, in an amount not less than the amount of the reduction in revenues for such fiscal year; and

(ii) identifies the program or activity in which such reduction in budget outlays is to be made and proposes changes in law to accomplish such reduction in budget outlays.

(3) Any additional amount of revenues contained in a concurrent resolution on the budget pursuant to paragraph 2 (A) (i) shall only include additional revenues which will result from proposed changes in law. Any reduction in budget outlays contained in a concurrent resolution on the budget pursuant to paragraph 2 (B) (i) shall only include reductions in budget outlays which will result from proposed changes in law.

(b) Subsection (a) may be waived by a two-thirds vote of the Members of each House of Congress, duly chosen and sworn.

Sec. 2. (a) Notwithstanding any other provision of law and except as provided in sub-

section (b), the Budget transmitted pursuant to section 201 (a) of the Budget and Accounting Act, 1921, for the ensuing fiscal year shall not contain—

(1) an estimate of total budget outlays for such ensuing fiscal year which exceeds the appropriate level of total budget outlays for the fiscal year in progress set forth in the most recently agreed to concurrent resolution on the budget for such fiscal year in progress; or

(2) an estimate of total revenues for such ensuing fiscal year which is less than the recommended level of revenues for the fiscal year in progress set forth in the most recently agreed to concurrent resolution on the budget for such fiscal year in progress.

(b) Notwithstanding subsection (a), the Budget transmitted pursuant to section 201(a) of the Budget and Accounting Act, 1921, for the ensuing fiscal year may—

(1) contain an estimate of budget outlays for such ensuing fiscal year in excess of the appropriate level of total budget outlays for the fiscal year in progress set forth in the most recently agreed to concurrent resolution on the budget for such fiscal year in progress if such Budget also—

(A) contains an estimate of revenues for such ensuing fiscal year in addition to an amount of revenues equal to the recommended level of Federal revenues for the fiscal year in progress set forth in the most recently agreed to concurrent resolution on the budget for such fiscal year in progress, which is not less than the amount of such excess budget outlays; and

(B) identifies the source of such additional estimated revenues and proposes changes in law to achieve such additional estimated revenues; or

(2) contain an estimate of a reduction in revenues for such ensuing fiscal year below the recommended level of Federal revenues for the fiscal year in progress set forth in the most recently agreed to concurrent resolution on the budget for such fiscal year in progress if such Budget also—

(A) contains an estimate of a reduction in budget outlays for such ensuing fiscal year below the appropriate level of total budget outlays for the fiscal year in progress set forth in the most recently agreed to concurrent resolution on the budget for such fiscal year in progress, in an amount not less than the amount of the reduction in revenues for such ensuing fiscal year; and

(B) identifies the program or activity for which such estimated reduction in budget outlays is proposed and proposes changes in law to achieve such estimated reduction in budget outlays.

(c) Any additional estimated revenues which, pursuant to subsection (b)(1)(A), are contained in the Budget transmitted pursuant to section 201(a) of the Budget and Accounting Act, 1921, shall only include additional estimated revenues which will result from proposed changes in law. Any estimated reduction in budget outlays, which, pursuant to subsection (b)(2)(A), are contained in any such Budget shall only include estimated reductions in budget outlays which will result from proposed changes in law.

SEC. 3. For purposes of this Act—

(1) the term "budget outlays" has the same meaning as in section 3(1) of the Congressional Budget and Impoundment Control Act of 1974; and

(2) the term "concurrent resolution on the budget" has the same meaning as in section 3 (4) of such Act.

SEC. 4. (a) The provisions of the first section and section 3 of this Act are enacted by the Congress—

(1) as an exercise of the rulemaking power of the House of Representatives and the Senate, respectively, and as such they shall be considered as part of the rules of each House, respectively, or of that House to which they specifically apply, and such rules shall supersede other rules only to the extent that they are inconsistent therewith; and

(2) with full recognition of the constitutional right of either House to change such rules (so far as relating to such House) at any time, in the same manner, and to the same extent as in the case of any other rule of such House.●

LET'S "OPEN UP THE SKIES" AT UNISPACE '82

HON. GEORGE E. BROWN, JR.

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 10, 1982

● Mr. BROWN of California. Mr. Speaker, last month the Pugwash Conference had its 25th anniversary meeting. Pugwash, probably the most respected nongovernment association of scientists, has its origins in the most sensitive scientists our society has known. While scientific ideas in the past have threatened the structure of civilization and reshaped our understanding of religion, Albert Einstein's discoveries posed a new threat, that of destroying the world. Painfully aware of this, Einstein spoke out of his concerns which lead to the founding of the Pugwash Conference in 1957. The conference has promoted important concepts involving nuclear testing, arms limitation and verification, and other proposals for addressing the problems we face in the nuclear age.

If Einstein were alive today I think he would have mixed feelings about how the products of the nuclear age are responding to the threat of nuclear war. On the one hand, he would be alarmed at the capability we have developed to destroy the world many times over; our nuclear arsenal has never been so great. But he would be pleased to see the heated public debate going on in more public arenas than ever before; the nuclear freeze resolution will be on the ballot in seven States this fall. And the nuclear freeze proposal voted on by the House last week lost by only two votes. The discussion is becoming more serious both on a political level as well as on a technical level.

One proposal I am pleased to see attention given to is a proposal offered by my colleague the gentleman from Kansas (Mr. WINN). This proposal, which has been of great interest to me since I first heard about it, would begin the dismantlement of the mystique and secrecy that surrounds the two nuclear superpowers, the United States and the U.S.S.R. The proposal is for an international peacekeeping satellite which would be part of a

larger United Nations satellite monitoring agency. "Peacesat", as it has been referred to, would serve to monitor military activities over the globe and aid in arms control verification. I plan to promote this concept at the upcoming Second United Nations Conference on the Exploration and Peaceful Uses of Outer Space (Unispace '82) in Vienna this week. Although the two superpowers will try to avoid discussion of this issue, many developing nations as well as Western European nations will want to discuss this peacekeeping satellite which is sometimes referred to as the "French proposal".

Mr. Speaker, I truly believe that one of the most serious threats to world peace is uncertainty and the fear that uncertainty leads to. Fear provokes aggression. I often wonder what such a great nation as ours has to fear so much that we need the capability of destroying the world. This may be naive, but I think we should promote what our country stands for, and not just concentrate on destroying what is different from us. I hope the public outcry will lead us to listen to ourselves and to our own fears. A constructive step toward eliminating some of the uncertainty would be the adoption of a peacekeeping satellite.

Mr. Speaker, the following article discusses how fear is a fuel for nuclear arms buildup, and that the unknown is often a cause for fear. A peacekeeping satellite would alleviate some of this problem by "opening up the skies" to the world and help in the monitoring and decisionmaking in arms limitation activities.

The article follows:

[From the New York Times, July 18, 1982]

MORE SPIES IN THE SKY

(By Floria Lewis)

PUGWASH, NOVA SCOTIA, July 17.—There has been a strange cycle of public indifference and militant activity against the danger of nuclear arms since the first two were dropped. Distressed at failure to understand, Bertrand Russell and Albert Einstein issued a dramatic manifesto in 1955.

That led to a meeting of top scientists from East and West at the boyhood home of Cyrus Eaton, the late U.S. industrialist, in 1957. So was founded the Pugwash Conference.

For its 25th anniversary, the conference is here again. The two signatories of the Russell-Einstein document still alive, Linus Pauling and Joseph Rotblat, noted that all those years, marches and U.N. conferences later, the threat is greater than ever.

And people are stirring again. The peace movement has never had broader support. Once again, East-West relations are cold and angry. The U.S. and the Soviets are talking in Geneva about breaking the arms race, and sustaining it at home.

Time is running out on even the chance of arms control, the scientists say, because science itself has made possible new weapons so much more accurate, so much faster, so much harder to detect that agreements may become meaningless.

There isn't much point in calling for trust. If there were trust, there would be no need for verifiable agreements, no excuse for having atomic weapons at all.

Nor has public pressure yet brought tangible response. The words are there, but who knows what they mean. Soviet Chairman Leonid Brezhnev announced a unilateral freeze on deployment of SS-20's (after the program was virtually complete). A few months later, the United States said a number of additional Soviet missiles had been deployed facing Western Europe. Moscow said that this was a lie.

There has been no explanation. The same problem weakens the call for an American pledge of "no first use" of any atomic weapon, which Mr. Brezhnev has proclaimed. How can you tell, until it's too late?

Mr. Pauling, a twinkly-eyed veteran of declarations for disarmament supported by fellow Nobel laureates, urged a unilateral freeze on all nuclear arms by both the United States and the Soviets until they get around to a binding treaty. But nobody has defined the proposal. The United States would presumably abandon not only MX, all cruise missiles and Pershings in Europe, but planned Trident submarines and Minuteman improvements. What would the Russians do?

It is the underlying fear of discarding the nuclear shield that makes it so hard to blunt the nuclear sword. The numbers game of balancing off missile for missile to set a level of security is clearly nonsense in a world that stocks 50,000 warheads with more than a million times the power of the Hiroshima bomb.

Any yet, the awesomeness of the bomb has maintained nuclear ceasefire in a world that hasn't stopped fighting since 1945. This morning's news reported on three full-scale wars (in Lebanon, Iraq and Somalia), two long, bloody guerrilla campaigns (in Northern Ireland and the Basque country) and a shattering new spy scandal in Britain. Peace is not at hand. Declarations aren't settlements.

The dilemma of fear remains. In an early attempt to confront it, President Eisenhower proposed an "open skies" program so the United States and Soviets could see for themselves what the other was doing. Moscow refused. It happened anyway, with satellites and electronic intelligence. But nobody is reassured.

So the issue comes back to information, a way to know and judge what is being prepared, in order to weigh the self-serving official counter-declarations.

One of the most hopeful ideas engaging some of the Pugwash scientists is what Australia's Sir Mark Oliphant calls "technological spying" by the middle powers. A lot of countries are now advanced enough to compete with the United States and Russia in monitoring preparations for war if they pool scientific and economic resources, though none could do it alone.

A group including delegates from Canada, Australia, France, Britain, Germany, Japan, Austria, Sweden, among others, is to meet in October to work on further details, already set out in an experts' report to the U.N. The European satellite launcher Ariane would put their own spies in the sky.

The U.S. has opposed the idea on the grounds that ambiguous intelligence could be politically abused to confound the world even more. Given experience, Washington has a point if it's to be a U.N. operation. But the countries capable of participating could set up their own structure. An objective

(which doesn't mean neutral) verification of superpower agreements and menacing moves would go a long way toward easing the question of what to believe. Then unilateral restraints could be monitored and the argument of balance better judged. It's something concrete to do quickly, worth more than talk. ●

AGE IS ACTIVITY

HON. ROBERT GARCIA

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 10, 1982

● Mr. GARCIA. Mr. Speaker, age has long been a topic of interest and concern in every culture and society. We respect our elder citizens because of their age, but we sometimes overlook the fact that most are active and productive members of society.

I am submitting an article from the newsletter of the Vacations and Community Services for the Blind, in which they honor one active centenarian of my district.

Maximo Gomez, a member of the Hunts Point Aged Program, located at 750 Failla Street, and a long time VCB client, reached his 102nd birthday late in 1981. It is true that 102 is quite old, but Maximo still comes twice weekly to the Failla Street Center, joins discussions, exercises, and, in fact, whatever may be happening at the Center.

It gives the Bronx Advisory Board of VCB tremendous pleasure to honor Maximo Gomez at a June 17 wine and cheese party at the Snuff Mill of the New York Botanical Gardens. Maximo is honored not only because of his age, but because of his incredible will to live and live completely. His failing vision and occasional bouts with pneumonia cannot keep him down.

Congratulations, Maximo, for showing everyone how to live.

And thank you for showing us that "age is activity." ●

THE IMPORTANCE OF HOUSE PASSAGE OF H.R. 5540

HON. STAN LUNDINE

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 10, 1982

● Mr. LUNDINE. Mr. Speaker, I wish to call attention to a bill that will be coming to the House floor for consideration in the very near future, the Defense Industrial Base Revitalization Act (H.R. 5540). As we begin one of the largest military buildups in our history, passage of this legislation could prove to be one of the most significant actions of the 97th Congress. In his recent book, "The Defense Industry," Jacques Gansler, whose association with the defense industrial base spans 25 years, including service as a Deputy Assistant Secretary for Defense wrote:

The defense industry's ability to rapidly expand production is an essential part of

the overall defense posture. There are many reasons for believing that this capability has been eroding badly in the U.S. over the last few decades, owing to the nature of the equipment as well as the problems within the defense industrial base. * * * Surprisingly, the U.S. government has taken no steps to address this problem. Brief studies that have been done have shown that current programs are largely ineffective and expensive. * * * The major cause of economic inefficiency in the defense industry is the rapid decline in the number of suppliers at these lower (the subcontractor) levels, which reduces competition and causes extraordinary price increases.

The industrial decline that plagues America is the foremost threat to our national security. H.R. 5540 takes an important step toward addressing this problem through creation of a program to revitalize thousands of small- and medium-sized businesses that contribute to defense production. Under the provisions of this bill, these firms would be eligible to enter into arrangements with the Federal Government for Government loan guarantees, purchase agreements, price guarantees, and arrangements for direct loans to modernize their equipment, which will greatly increase our domestic capability to produce critical and strategic materials and hardware for national defense.

In addition, the bill establishes a program to train, retrain, and upgrade workers' skills in occupations in short supply needed by defense-related industries. This continuous capability to upgrade worker skills is essential in the high-paced technological world of defense production.

This legislation has received enthusiastic support from a broad variety of organizations, including labor unions, business groups, trade associations, and vocational, and higher education organizations. An excellent summary article on this bill which appeared in the July 5 edition of Nation's Cities Weekly follows for your information, along with a letter sent to Members of Congress by the Industrial Union Department, AFL-CIO. As you will note, among other things, a recent Department of Defense internal memo from Deputy Defense Secretary Frank Carlucci and a letter from Defense Secretary Caspar Weinberger highlight the need for an effective program to address the problems of our ailing defense industrial base.

[From Nation's Cities Weekly, July 5, 1982]

TRAINING, REVIVAL AID URGED FOR DEFENSE-LINED ECONOMY

(By Frank Shafroth)

A bill is moving quietly through Congress to piggyback onto the nation's defense readiness efforts a \$6.75 billion, five-year program to revitalize smaller industries.

Included in the proposal is \$250 million a year for job training aid through state agencies and \$100 million a year for professional training through higher education institutions.

Though city governments would have no direct role in obtaining funds or running any of these programs, analysts believe that the program would benefit those that have been victimized by economic woes because of outmoded manufacturing and industrial bases. The state-supported training would be aimed at labor surplus areas.

States would have to share the training costs—10 percent in the first year, increasing to 50 percent.

Over the five years, \$5 billion would be authorized for loans and loan guarantees, price guarantees and purchase agreements with small and medium sized businesses in a number of priority industries. The industries would be designated by the Defense and Commerce departments, and the eligible businesses would be those that currently manufacture and supply defense materials and components, or are likely to do so in time of emergency or war.

Proponents of the bill [HR 5540] say the program would help modernize the nation's defense industrial base, ease manpower shortages in critical jobs by training new workers and help industries keep pace with technological changes.

It is sponsored by Rep. James J. Blanchard (D-Mich.) and has a bipartisan list of 70 cosponsors. The legislation awaits House floor action after being cleared by the Banking Committee and the Education and Labor Committee.

Though the bill does not say which federal agency would spend the money, it says the president should set up a cooperative effort among the Defense, Commerce and Interior departments and the Federal Emergency Management Agency.

The proposals would amend the 1950 Defense Production Act, which gives the president basic authority for peacetime stockpiling of materials and civil defense programs as well as the authority to mobilize a wartime economy.

The administration opposes the bill because of its cost, according to a letter from Budget Director David A. Stockman to Rep. J. William Stanton (R-Ohio), ranking minority member of the Banking Committee and a cosponsor of the bill. Instead, Stockman urged a simple 5 year extension of the Defense Production Act.

However, supporters of the proposal have published high-level internal administration memos suggesting strong support for efforts to shore up the defense-related industrial base and to reduce dependence on foreign sources of equipment.

This includes a March 6 memo from Deputy Defense Secretary Frank A. Carlucci III to the department's leadership warning of the consequences of continued deterioration of the industrial base and a March 20 letter from Secretary Caspar A. Weinberger to Stockman.

In that letter, Weinberger told the budget director that even with an optimistic view of President Reagan's economic recovery program, the recovery will take "several years and may not provide sufficient incentives for expansion of the industries which are subject to predatory pricing from unstable foreign sources and are critical to the production of national security systems."

INDUSTRIAL UNION DEPARTMENT,
AFL-CIO,

Washington, D.C., July 15, 1982.

DEAR REPRESENTATIVE: The Industrial Union Department, AFL-CIO strongly endorses H.R. 5540, the Defense Industrial Base Revitalization Act, which is scheduled

for a Floor vote in the near future. This bill, which enjoys bipartisan support in the House, will provide a key element in revitalizing our industrial base, which is crucial to our nation's economic future. The revitalization program set forth in this legislation not only would improve productivity and lessen our dependence on foreign imports, but also would strengthen our security and provide hundreds of thousands of job opportunities at a time when the nation's unemployment rate is at its highest level since World War II.

Of Particular interest to us are the bill's training provisions, to be administered at the state and local level, to train and upgrade workers' skills in areas currently in short supply and needed by defense-related industries. In the next few years, hundreds of thousands of high skill jobs will be created in skill shortage occupations—machinists, computer technicians, tool and die makers, mechanics, etc.—jobs that have application to the civilian economy as well as for defense. The training program will provide workers with the skills needed for those jobs, particularly via retraining workers laid off in depressed industries such as auto and steel. The training program is crafted to complement, not duplicate, existing job training and apprenticeship programs, and will encourage participation of women and minorities.

We understand that Representative Erlenborn intends to offer an amendment to strip the Davis-Bacon provision included in the bill. This prevailing wage standard, which has been in effect since 1935, is one of the nation's most important labor provisions that protects workers in the construction industry and insures the highest quality of work on federal construction projects. We urge you to vote against this and any other weakening amendments.

We strongly urge you to support H.R. 5540, which addresses many of our country's underlying economic problems—obsolete machinery, shortages of skilled labor in crucial industries, and a severely deteriorating industrial base. Enactment of this legislation will be an important first step in revitalizing the American economy.

Sincerely,

BRIAN TURNER,
Director of Legislation.●

ARCHITECT OF THE CAPITOL

HON. GREGORY W. CARMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 10, 1982

● Mr. CARMAN. Mr. Speaker, one of the greatest antidotes to overwork, or just about any other malady affecting those of us on Capitol Hill is the special tour of the Capitol dome. Recently, members of my staff and I took advantage of this opportunity and made the long walk to the top of the dome. It was an exhilarating and moving experience.

My staff and I were directed through the winding passageways and over the climbing catwalks by Mr. Kevin O'Connor, one of the extremely capable, knowledgeable, and personable members of the Architect's staff. In addition to informing us of the background and history of the art and

construction of the dome, Mr. O'Connor conveyed a sense of his own enthusiasm and pride in this symbolic centerpiece of American democracy, the U.S. Capitol. I am very grateful and appreciative of Mr. O'Connor's warm personality and outgoing manner.

Although this is not the first time I have taken this special tour, it left me with the same sense of awe and excitement that I experienced on my first visit. My staff were also encouraged and renewed after getting a closer and more detailed look at an important aspect of their own history.

I encourage my colleagues to make the trip to the top. It is a great experience, and a trip well worth the time. In addition, it is a terrific view of a terrific city.●

STRATHMORE PAPER CO.
HONORED

HON. SILVIO O. CONTE

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 10, 1982

● Mr. CONTE. Mr. Speaker, I am pleased to inform my colleagues today of an important event in the First District of Massachusetts. The Strathmore Paper Co. of Westfield, Mass., was a recent winner of the prestigious American Paper Institute and National Forest Products Association Award for the most effective air pollution control program in the paper industry in 1981. This award is one of six given by a panel of environmental and energy experts from outside the industry for significant environmental achievements.

Strathmore won this award for its innovative use of technology at its Woronoco No. 2 plant to reduce emissions. The company's dry flue gas desulfurization installation, the first in North America, enables Strathmore to burn high sulfur coal with lower emission levels than were achieved earlier with low sulfur oil. Moreover, the company has saved \$1.5 million by burning 70 tons of coal a day at the plant rather than thousands of gallons of costly fuel oil.

Strathmore's achievement is especially significant since it was the first company in New England to switch back to coal burning. Its accomplishment will thus inspire other companies in New England and across the United States to help decrease our country's dependence on imported oil by switching their plants from use of costly foreign oil to plentiful American coal, without many of the environmental problems previously associated with the use of coal.

Mr. Speaker, this example shows what can happen when American industry uses American know-how to solve a problem. I heartily commend

the Strathmore Paper Co. for its concern for the beautiful environment of western Massachusetts and for its imagination and hard work in effectively harnessing coal in this new way. I trust that its example will inspire others to explore new ways of solving our energy problems while protecting the environment. My congratulations go to Strathmore president John Gallup and to all the officers and employees of the Strathmore Paper Co. on the occasion of this well-deserved award.

Thank you Mr. Speaker. ●

TAX BILL KNOCKS REAGAN OFF COURSE

HON. NORMAN D. SHUMWAY

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 10, 1982

● Mr. SHUMWAY. Mr. Speaker, this morning's Los Angeles Times carried an article by the Times Board of Economists entitled "Tax Bill Knocks Reagan Off Course." It is an articulate explanation of economic reality, one which draws an analogy between supply-side economics and a three-legged stool. To be sturdily used, the stool must consist of personal tax cuts, business tax cuts, and Government spending cuts. I commend the article to my colleagues' attention as a graphic presentation of what occurs when one of the legs is removed.

The article follows:

[From the Los Angeles Times, August 10, 1982]

TAX BILL KNOCKS REAGAN OFF COURSE

The bipartisan coalition, in effect since 1954, that believed that business tax cuts were good for investment and hence for the economy appears to have been shattered beyond repair by the Senate tax bill.

In testimony before Congress concerning the 1981 tax package, most leading Democratic economists testified that the problem with the Reagan tax bill was that it was skewed far too heavily to individuals, leaving too little for capital formation. Indeed, the Reagan tax package gave business only 21 percent of the total cut over the 1982-86 period compared to the 33 percent that business received during the first five years of the Kennedy-Johnson tax cuts.

Now, however, the imbalance is much more pronounced. Senate Finance Committee figures show that by 1986 about 64 percent of the business tax cuts will be wiped out, while over the 1982-86 period business will receive only 12 percent of the total tax cuts. The combined tax legislation of 1981 and the 1982 has created the most skewed tax bill in history.

If one word could be used to characterize this tax cut, it would be antisaving. Not only will the increase in business taxes reduce corporate saving and cash flow, but the withholding on interest and dividends, the reduction of pension funding, the corporate minimum tax and the disallowance of municipal bond proceeds for "private" capital formation will all contribute to reduced saving in future years.

The tax bill will have virtually no effect on the economy for 1983 for three reasons. First, the effect of tax changes on investment always lags a year or more. Second, investment decisions are generally not affected by changes in the tax laws in either direction in the middle of recessions when operating rates are 70 percent or lower. Third, the decrease in the budget deficit is offset by the decrease in corporate saving. Net saving is unchanged, and thus on balance so are interest rates.

The net effect of the Reagan programs so far—including the increase in interest rates—has been to reduce capital spending by about \$15 billion in 1982. The tax incentives incorporated in the 1981 act raised fixed business investment by about \$10 billion per year; that is, \$10 billion in 1982, \$20 billion in 1983, and so on until the bill was fully implemented in 1986. However, the increase in interest rates reduced capital spending by about \$25 billion. Now, the Senate has passed a tax increase that takes away about 60 percent of the benefits originally embodied in the 1981 tax legislation, yet without reducing interest rates.

NEGATIVE EFFECT BY INCREASES

Furthermore, the figures quoted above for changes in investment hold during times of equilibrium, but not in the middle of recessions. Thus, the negative effect of these tax increases will become more apparent once the economy does start to recover and interest rates move down. In the past, it has been under these conditions that the benefits of lower corporate taxes have always induced greater investment. However, with most of the tax benefits wiped out, we will have only a moderate increase in investment during the period of recovery. Ironically, it will not be until the Democrats come back into power and vote more business tax cuts that the increase in investment will lead the economy back to higher productivity growth.

Assuming no further changes in the bill, the net effect of this tax increase by 1986 will be to lower investment by about \$30 billion with no offsetting decline in interest rates. Gross national product will total roughly \$4.2 trillion in 1986, so the tax increase will reduce investment by 0.7 percent; with the normal multiplier effect of 2, GNP will be about 1.4 percent lower by 1986. At current levels, each reduction of one percentage point in GNP increases the deficit by about \$10 billion, so about half the tax increase will disappear because of slower economic growth.

The conclusion would be quite different if government spending were to be cut, because national saving would then increase, monetary policy would ease, and interest rates would decline, thereby stimulating economic growth. But we certainly cannot expect such expansionary effects to occur when any increase in public-sector saving is fully offset by reduction in the private sector. That is why a tax increase designed almost exclusively to diminish private-sector saving is peculiarly inappropriate at a time when the total national saving rate is already at a postwar low.

The only parts of the tax bill that do not have harmful implications for saving are two very minor parts: the increase in the floor for medical and casualty deductions and the increase in excise taxes. The deductions for medical expenses and casualty losses were originally put into the code for reasons of equity: Someone who had suffered extraordinary expenses should receive some partial offset in the form of lower

taxes. For the most part, however, these deductions gravitated into methods of reducing taxes even for routine medical expenses and casualty losses. This tax can be raised without destroying any incentives to save, and from an economic point of view can be considered the opposite of a rebate.

Previous studies have shown that, while most of a rebate is saved during the first quarter, most of it has been spent by the end of the year. In the same manner, we would expect these tax increases to come out of consumption rather than saving. As a result, total national saving will increase and interest rates should thereby be reduced. However, the magnitudes are very small—only about \$4 billion per year once the tax increases are completely phased in—and hence unlikely to make much of a dent in interest rates.

COST-OF-LIVING PAYMENTS

The analysis of the excise tax is slightly more complicated because it has an added dimension—one of inflation. The tax increases are once again very small, but are duly reflected in the consumer price index for cigarettes, telephone calls, airplane travel, and various boat and fishing equipment. Once again the amount involved is only about \$5 billion per year. However, the CPI will rise proportionately by this amount, and hence all cost-of-living payments in both the private and public sector will increase apace. Since about half of government expenditures are either formally or informally linked to the cost of living, about \$2.5 billion of that increase in revenue will be reflected in higher government expenditures. The other \$2.5 billion will serve to increase saving and lower inflation.

It is more difficult to quantify the effect of the 10 percent withholding on interest and dividend income. The fact that the government gets the money a little sooner only changes the rate of return by about 0.1 percent; besides, most large taxpayers with large interest and dividend income are already required to file quarterly. It is instead more a question of the nuisance value, even though exempting most small savers from the withholding requirement reduces that problem. The net effect will be to drive savers into tax-sheltered investment, possibly even creating a net loss of revenue to the Treasury.

The amount of tax collected by the IRS could be increased substantially if institutions paying interest and dividend income—and any other source of income not subject to withholding—were more vigilant about issuing Form 1099 for all such income; issuance has heretofore been very lax. In addition, the IRS has been inept in matching 1099 information with the proper 1040 forms. Thus a breakdown in information transmission has occurred at both ends.

It would have been much more sensible to fix the defects in the existing system than to move to a withholding pattern that is likely to drive an increasing number of taxpayers into tax-free or tax-sheltered investments. However, in any case the amounts are small compared to the damage done by the business tax increases.

Properly structured, supply-side economics can be likened to a three-legged stool: personal tax cuts, business tax cuts and government spending cuts. Remove one of the three legs and the entire stool collapses. Until now, the reason for failure of the Reagan programs had been that the overall level of government spending in real terms grew faster in fiscal 1982 than it did during

the average of the last 20 years. However, I had thought that the other two legs of the stool would still remain in place.

It now appears that the second leg of business tax cuts has also been knocked to the ground. Reagan and the Republicans have thus reduced themselves to formulating economic policy on a one-legged stool. I can only intensify my speculation that it will prove to be both an economic and a political disaster. ●

SECTION 936 NEEDS REFORM, NOT REVENUE

HON. RICHARD T. SCHULZE

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 10, 1982

● Mr. SCHULZE. Mr. Speaker, among the revenue-raising proposals to be considered this week by the House and Senate conferees on H.R. 4961, the Tax Equity and Fiscal Responsibility Act of 1982, is one that would drastically cut back the tax incentives mainland corporations receive for investing in new plants and creating new jobs in Puerto Rico. This Senate Finance Committee proposal, if enacted, would have a devastating effect on the economy of Puerto Rico, already suffering from an unemployment rate of 23 percent. Also, this provision of H.R. 4961 is in direct contradiction with the administration's efforts to provide tax and other incentives for investment in the Caribbean Basin countries in order to bolster their economies and foster political stability.

Mr. Speaker, this issue is explored in a cogent article in the Wall Street Journal of Monday, August 9, 1982, by former Under Secretary of the Treasury Norman B. Ture. In his article, "Puerto Rico: Hostage to U.S. Tax Reform," Dr. Ture explains that the conferees are considering also a modification of the Senate Finance Committee proposal that has been presented by the Treasury Department. But Treasury's proposal, says Dr. Ture, would also largely erode the tax incentives for investment in Puerto Rico.

What is most alarming, though, is Dr. Ture's assertion that still other suggestions for dealing with IRS section 936—suggestions that would preserve incentives for investment in Puerto Rico and raise even more tax revenues than would be raised under the original Senate Finance Committee proposal—are not being given due consideration by the administration or the conferees.

Mr. Speaker, in the interest of the economy of Puerto Rico and its people, and in the strategic interest of the United States in preserving a healthy Puerto Rico as an American outpost in the Caribbean, I ask the House and Senate to give due consideration to all proposals for modifying the tax incentives provided by IRS section 936, known in Puerto Rico as

Operation Bootstrap. I also ask unanimous consent that, the thoughtful article, "Puerto Rico: Hostage to U.S. Tax Reform," by Dr. Norman B. Ture be printed in the RECORD.

[From the Wall Street Journal, Aug. 9, 1982]

PUERTO RICO: HOSTAGE TO U.S. TAX REFORM (By Norman B. Ture)

All obscure provision of the Senate-passed tax-increase bill would, if enacted, heavily damage American policy in the Caribbean and cripple our efforts to promote economic development there through private initiative.

This provision would in effect cancel Puerto Rico's "Operation Bootstrap," a set of tax provisions, accommodated by a provision in the U.S. Internal Revenue Code, which creates significant incentives for U.S. companies to set up affiliates and to produce in Puerto Rico. The Senate provision would deal a stunning blow to Puerto Rico's economy, already reeling from the U.S. recession and from the setback to new investment resulting from the IRS's tax-audit policies and its litigation against several major U.S. firms with affiliates in Puerto Rico.

A FAILURE BEFORE IT BEGINS

The legislation would be construed throughout the Caribbean as a lack of firm commitment by the U.S. to fostering private-sector initiatives as the vehicle for economic development. The Reagan administration's Caribbean Basin Initiative, in which Puerto Rico was to be the linchpin, would fail before it began. Puerto Rico could no longer serve as a model for the region; it could no longer demonstrate what can be achieved when the private sector takes the lead in promoting economic progress.

The effects of the Senate action in overturning this important foreign policy initiative vastly outweigh any gains in the form of tax-policy niceties. The elimination of an alleged "tax abuse" and the supposed pick-up of a small amount of tax revenue would be purchased at the extraordinary price of forgone economic advances and political stability in Puerto Rico and throughout the Caribbean.

The "tax abuse" to which the Senate provision is directed is difficult to identify, even in the terms of the most zealous old school tax reformers. The principal charge against the offending Internal Revenue Code Section 936 is that it affords U.S. mainland companies with Puerto Rican affiliates too much U.S. tax forgiveness, considering the number of jobs these companies provide in Puerto Rico. The tax revenue loss to the U.S. Treasury is alleged to be well over \$40,000 per created job. The same number of jobs, the critics maintain, could be provided at a lower cost by direct federal outlays such as those under CETA. The "abuse," then, turns out to be the charge that the tax incentive is inefficient.

There is far less in this charge than meets the eye. The estimated tax revenue loss to the Treasury presupposes that in the absence of the tax credit, there would be the same amount of investment, employment, output and income in Puerto Rico (or that there would be an equal amount of investment, employment, output and income added in mainland U.S. operation) as there is under the present powerful incentives afforded by very nearly full tax exemption. This obviously is not true.

Even the most severe critics of Section 936 concede that a very substantial amount of U.S.-company investment in Puerto Rico is in response to the highly favorable tax treatment. Repeal or serious curtailment of Section 936 would result in prompt major disinvestments by U.S. companies in Puerto Rico and in the flight of capital to non-U.S. tax-haven jurisdictions. The revenue "loss" attributed to Section 936 is very largely fictitious; so, too, therefore, is the revenue "gain" from the Senate action or any significant cutback on the tax benefits for Puerto Rican-produced income. The revenue loss per job created in Puerto Rico is nowhere near the extraordinary figure that is bandied about; it is, in fact, much closer to zero.

Even if one were to accept the revenue loss estimate upon which the Senate's proposal appears to depend, it doesn't follow that Section 936 is inefficient. The large amount of tax dollars per job reflects large capital returns per job which, in turn, reflect large capital investment per job. In the course of its development since Operation Bootstrap got underway in the late 1940s, the Puerto Rican economy has progressed from emphasis on agriculture and low-productivity, labor-intensive industries to capital-intensive, technologically advanced industries. This change has been associated with a rapid advance in the skill, productivity and real wage rates of an increasing number of Puerto Rican workers. If that's not what economic policy aims to achieve, if that's not the very essence of economic progress, if that's not what economic development is all about, what is?

Indeed, isn't that just what we're looking for in the mainland U.S. as the achievement of the Reagan program? A large (putative) tax revenue loss per worker should, if anything, be taken as a measure of the success of Section 936 in making Operation Bootstrap an effective device for economic development initiated by the private sector.

It appears that the administration has some reservations about the Senate's proposed cutbacks of Section 936. The Treasury has offered a proposal that it claims would deal adequately with the uncertainties arising from the IRS's current audit policies and litigation stance, while raising substantial tax revenues. In fact, the Treasury proposal would erode much of the tax incentives for investment in Puerto Rico.

TREASURY'S VENGEFUL PURSUIT

The administration's concern about the adverse effects of the Senate bill on the Puerto Rican economy has not been substantial enough to persuade the Treasury to forgo its vengeful pursuit of a relative handful of high-technology companies in favor of tax changes that would restore economic stability to Puerto Rico by continuing the demonstrably successful incentives of Section 936. Several suggestions for modifying Section 936, recently presented to the Treasury, the White House and the Senate and House conferees on the tax bill, would accomplish that result while providing a significant increase in U.S. tax revenues—substantially more than the amount estimated as raised by the Senate bill. These suggestions have been shunted aside by the administration.

One must hope that the conferees will give them careful consideration and will reject both the Senate and the Treasury proposals. If they do so, there may still be a reasonable chance for the Reagan administration to realize a successful Caribbean

Basin Initiative, led by a thriving Puerto Rico.●

REAGAN'S EL SALVADOR CERTIFICATION IS CONTRARY TO THE FACTS

HON. RICHARD L. OTTINGER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 10, 1982

● Mr. OTTINGER. Mr. Speaker, I rise to strongly protest President Reagan's recent certification that El Salvador has complied with economic and human rights reforms. I have cosponsored legislation introduced by my good friend from Massachusetts, Representative GERRY STUDDS, declaring that certification null and void.

The Americas Watch Committee and the American Civil Liberties Union have published a remarkable report on the current situation in El Salvador which clearly refutes the administration's dubious claim that the Salvadoran Government has met the standards included in the certification process. Calling the administration's certification a "misrepresentation of the Salvadoran reality," the report points out:

No serious examination of conditions in El Salvador and of U.S. law can lead to the conclusion that any of the requirements for certification have been satisfied.

The first requirement, that the Government of El Salvador has made a "concerted effort to comply with internationally recognized human rights" has not been met—it has been flaunted. The Government and its security forces remain involved in a pattern of systematic human rights abuses, including violations of the rights to personal liberty, humane treatment, free speech, free assembly, due process of law, and fair trial. El Salvador remains under a state of siege imposed on March 6, 1980. Decrees remain in effect which permit arbitrary and limitless detention and torture.

The second requirement of certification, that the Salvadoran Government achieve "substantial control over all elements of its own armed forces so as to bring to an end the indiscriminate torture and murder of Salvadoran citizens by these forces" also cannot be reasonably certified. An estimated 34,000 civilians have been murdered in El Salvador for political reasons since 1979. Since Reagan's first certification, over 3,000 civilians have been killed, according to the Legal Aid Office of the Archdiocese in El Salvador.

In March an election was held, as required to be under the certification, yet its legitimacy is now in doubt as evidence of electoral fraud is uncovered. The elections did not alter the armed forces dominance of policy. Nor did it result in the hoped-for moderation of the Salvadoran Government. Rather, it invested great power in the

EXTENSIONS OF REMARKS

hands of one of El Salvador's most brutal human rights violators, Roberto D'Aubisson. Meanwhile, there has been no movement whatsoever toward negotiations with all parties to the conflict, violating an explicit requirement for certification.

The agrarian reform program is in shambles. The Americas Watch/ACLU report notes:

While pledging to restore the land reform, (the Government) has abrogated the law that affected El Salvador's most valuable lands under Phase II of the reform and has sent a signal to land owners that it opposes the redistribution of land to El Salvador's tenant farmers and share-croppers.

Nine thousand and six hundred peasants have been evicted from their land, and some 140,000 intended beneficiaries are still without provisional titles.

For the families of the Americans killed in El Salvador, the most distressing aspect of certification concerns the investigation of those deaths. We have seen a highly dubious investigation plagued with uncertainties and delays. Five suspects await trial, yet abundant evidence collected by the Lawyers Committee for International Human Rights and other groups suggest that responsibility goes well beyond the five individuals charged. Our own Government has displayed an astounding attitude of unresponsiveness and delay which seems to border on complicity with Salvadoran authorities. Last month, I initiated a letter to four Federal agencies demanding the release of pertinent documents under the Freedom of Information Act. I am still waiting for two of those agencies to respond.

Facing a situation more dangerous and unstable than ever, President Reagan has once again sought to escalate United States military involvement in El Salvador by ignoring the facts and falsely certifying compliance with human rights and economic reforms. The result of this policy will be increased instability as we hand Moscow a victory it could not otherwise contemplate. As the former Ambassador to El Salvador, Robert White, recently wrote in the New York Times:

Each time the Salvadoran military invades a poor neighborhood in San Salvador with United States-furnished weapons, hundreds of recruits and sympathizers are recruited into the revolutionary movement.

Ambassador White correctly noted that by ignoring the aspirations of liberty that countless Salvadoran's hold, and by attributing their desire for change to Marx and Lenin while siding with the military elite, the United States assumes the role of counterrevolutionary power and abandons to Cuba and communism the sponsorship of change.

The President's certification on El Salvador marks the absolute failure of his policies there and throughout Cen-

August 10, 1982

tral America. I urge my colleagues to reject the attempts to continue allying us with the forces of repression, and to support legislation to prohibit further U.S. assistance to El Salvador by declaring the certification null and void.

RELIEF OF THEDA JUNE DAVIS

HON. ELDON RUDD

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 10, 1982

● Mr. RUDD. Mr. Speaker, I rise today to introduce a private bill to correct an injustice that has been done to a constituent of mine while working for a program funded and supervised by the Federal Government.

Mrs. Theda June Davis of Phoenix, Ariz. is a schoolteacher who was hired by a federally funded job training program known as SER-jobs for progress in 1970-71.

During the course of her employment, Mrs. Davis was passed over for promotion. She filed a claim against jobs for progress for discrimination based on sex, and was successful in that claim. In addition, she was awarded some \$35,000 compensatory damages by a Federal court.

While jobs for progress is a fully federally funded grant program, it cannot, by law, use its funds to pay claims. The Federal Government supervises this program, funds this program, makes all the rules for this program. Yet, Mrs. Davis, who has been wronged by this program, cannot be compensated at this time. The bill that I am introducing would not right the wrong that has been committed, but it will compensate Mrs. Davis for her hardship, and carry out the lawful award given her by a Federal court for damage done to her by a Federal program.

H.R. 6966

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Treasury shall pay to Theda June Davis of Phoenix, Arizona, out of any money in the Treasury not otherwise appropriated, the sum of \$35,499.25 plus interest thereon calculated at the rate of 6 percent per year from December 1, 1976, to April 3, 1980, and at the rate of 10 percent per year from April 4, 1980, to the date the sum is paid. Such sum is the amount of a court judgment in favor of Theda June Davis against a non-profit Arizona corporation based upon a finding of sex-based discrimination. The Arizona corporation is totally funded by federal grants from the Department of Labor.

Sec. 2. No part of the amount provided for in the first section of this Act in excess of 10 percent thereof shall be paid to or received by an agent or attorney on account of services rendered in connection with the claim described in the first section, and the payment or receipt in excess of 10 percent of

the amount provided for in the first section shall be unlawful, any contract to the contrary notwithstanding. Violation of the provisions of this section is a misdemeanor punishable by a fine not to exceed \$1,000.●

FISHERMEN WARN CONGRESS TO BE CAREFUL OF LAW OF THE SEA TREATY

HON. DON YOUNG

OF ALASKA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 10, 1982

● Mr. YOUNG of Alaska. Mr. Speaker, on a number of previous occasions, I have warned my colleagues of the problems that the U.S. fishing industry might face if the United States were to sign the Law of the Sea Treaty. In reply, at least one treaty supporter has suggested that my concerns are fanciful and that the opposition of the U.S. fishing industry to the treaty is manufactured rather than genuine.

Recently, the New England Fisheries Development Foundation, Inc., submitted (unsolicited) some comments on the treaty and its potential interaction with existing U.S. law regarding the fishing industry. Mr. Kenelm Coons, the executive director, and Mr. Ralph Gillis, the general counsel, provided my office with a copy of these comments. Because the document is too long to print in the RECORD in its entirety, I have included only the two introductory paragraphs and the concluding pages here. I would be happy to supply a copy of the entire document to any Member who is interested in reading it.

LAW OF THE SEA HEARINGS

On behalf of the New England Fisheries Development Foundation, Inc., (Foundation), the following comments are raised for your consideration at the ongoing Committee on Merchant Marine and Fisheries' hearings to evaluate the status of the United States position in the law of the sea negotiations. These comments are presented neither in support of, nor in opposition to the United States signing the Convention on the Law of the Sea (Convention). Whether to sign the Convention involves questions of law and policy beyond the scope of this letter. The Foundation's comments are intended only to bring forward points of possible significance for persons reviewing our national law of the sea policy.

The Foundation is a trade association consisting of over 100 seafood companies, cooperatives and local associations in the New England fishing and seafood business. The Foundation draws its membership from the maritime communities of New England, and has its office in Boston, Massachusetts. Its primary activity is fish and seafood marketing, for both domestic and export markets, as well as research and development

projects. As a trade association, the Foundation is able to undertake projects that its ordinary members cannot.

In conclusion, the Foundation notes that the FCMA states that Congress has found the fishery resource to be a contributor to the food supply, economy, and health of the nation and a source of recreation. 18 USC 1801(a)(1). The Convention does not mention coastal state interests in fishery conservation and management as being at all associated with recreation. And yet, Congress found in the FCMA that commercial and recreational fishing was a major source of employment. 18 USC 1801(a)(3).

It was the intent of Congress, expressed in the FCMA, that the fisheries be conserved and maintained to achieve optimum yields on a continuing basis. 18 USC 1801(a)(5). And the Convention in Articles 61 and 62 complements the objective of developing and maintaining optimum sustainable yield. But the criteria for use of the optimum sustainable yield set out by Congress in the FCMA include primarily domestic interests to be secured under a "national" conservation and management plan (18 USC 1801(a)(6)) and a "national" program for development of under- and non-utilized species "for citizens to benefit from the employment, food supply, and revenue" (18 USC 1801(b)(7)). Thus, the idea of the fishery conservation zone, since its 1976 inception, has been to promote domestic commercial and recreational fishing, as well as to obtain optimum yield from each fishery for domestic use, pursuant to the establishment of the zone as an area where the United States is to assume exclusive fishery management authority. 18 USC 1801(b).

In evaluating the national law of the sea policy toward the Convention on the Law of the Sea, the Foundation suggests that consideration be given to the effect of the Convention's Articles 56, 61, 62, 63, 64, and 70, both in vesting a legal right in other states to fish the surplus catch within the EEZ, and in setting out criteria which provide how the priority of states to fish in the EEZ will be set. The effect of these articles at a minimum could well be to delay or cause unnecessary pressure on fishery or other negotiations with which the United States is involved. In addition, the Convention's compulsory conciliation mechanism has the potential for built in delays which could be implemented adversely to the best interests of the United States, which is not to ignore the possibly undesirable exposure which compulsory conciliation and mandatory arbitration could install against even-as-yet undetermined interests of the United States.

The concern of the Foundation is that the immediate effect of adverse results from application of the Convention to matters involving the United States would impact directly on the fishing industry, especially in New England. Therefore, the Foundation asks that any decision to change the applicability of the FCMA by ratification of the Convention be carefully reasoned and made to assure the protection of United States interests at many levels and from a variety of perspectives, but including the needs of the New England fishing and seafood industries.

Respectfully submitted.

KENELM W. COONS,
Executive Director.
RALPH J. GILLIS,
General Counsel.●

WITHHOLDING FLIMFLAM

HON. NORMAN E. D'AMOURS

OF NEW HAMPSHIRE

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 10, 1982

● Mr. D'AMOURS. Mr. Speaker, the interest and dividend withholding proposal is as much "flimflam" today as it was when the Wall Street Journal criticized the President's original proposal this January. If anything, the provisions included in the Senate tax bill are even more complex and burdensome than the original proposal.

Mr. Speaker, this is not and should not be a partisan or ideological issue. Interest and dividend withholding has been opposed by a wide range of Members from both parties. A nearly unanimous House rejected withholding 401 to 4 under President Carter and it should do so again under President Reagan.

Interest and dividend withholding simply makes no sense when we can achieve the same compliance goal through other, less burdensome, means such as better processing of existing 1099 forms on interest and dividend earnings.

I invite my colleagues to join me in cosigning the following letter to the House Rules Committee asking for a separate vote on this issue when the conference report on the tax bill comes back to the full House. Members who wish to cosign the letter should call my office at 5-5456.

[From the Wall Street Journal, Jan. 29, 1982]

WITHHOLDING FLIMFLAM

In an effort to puff up revenue projections for the February 8 budget message, the Treasury Department is proposing a 5 percent withholding tax on dividend and interest income. The proposal makes no economic sense, and hasn't a ghost's chance of passage through Congress, something the Treasury must surely have known.

After all, we've been down this track many times before. Similar withholding tax proposals have been rebuffed in Congress in 1942, 1943, 1950, 1951 and 1962. On an appropriations rider in August 1980, the House of Representatives voted by 401-to-four to prevent the Internal Revenue Service from even studying the idea of a withholding tax on interest and dividends. This year's proposal is opposed by powerful members of the President's own party, including Representative Barber B. Conable Jr., ranking Republican on the House Ways and Means Committee, who says the committee won't approve the measure.

And with good reason. For fairly minimal gains in revenues—Treasury is estimating an extra \$2 billion for fiscal 1983, less afterwards—a withholding tax would impose heavy paperwork burdens on banks, savings and loans and brokerages, among others. In a study commissioned before the American Bankers Association, the accounting firm Arthur Young & Co. estimated that the Carter administration's 1980 withholding proposals would cost a bank with \$100 mil-

lion in deposits roughly \$200,000 in startup costs and \$80,000 in annual operating costs.

A withholding tax on interest and dividends, moreover, would lower the effective yield on savings and stock ownership. And many of the withholding payments would most likely be drawn from interest-bearing accounts. At a time of enormous fear of "crowding out" by government borrowing in the capital markets, it makes no sense to reduce the deficit by reducing personal saving.

The IRS says it needs a withholding tax to prevent underreporting of interest and dividend income. But what it really means is that its computer programs and management are so sloppy that it can't match interest and dividend reports filed by corporations and banks with individual tax returns. The answer is for the IRS to put its own house in order, rather than to transfer an enormous administrative burden to the private sector.

Since the withholding measure has little hope of passage, its major purpose is to allow the Treasury to pretend that it will be collecting \$2 billion more next year than it actually will. The window dressing wasn't worth the cost in budget credibility.

HOUSE OF REPRESENTATIVES,
Washington, D.C.

Hon. RICHARD BOLLING,
Chairman, House Rules Committee, the
Capitol, Washington, D.C.

DEAR MR. CHAIRMAN: You will soon be asked to approve a rule for the consideration of the Conference Report on H.R. 4961, a minor House-passed tax bill to which the Senate has appended many substantive changes in U.S. tax law. We ask that you approve a rule allowing a separate vote or motion to strike from the Conference Report any provisions requiring withholding on interest and dividend earnings.

We realize that this is an unusual request but we believe that this is a most unusual situation in which the facts warrant a separate vote on this issue. First, the House was never given an opportunity to consider and vote on the individual issues contained in the Senate tax bill. Second, only two years ago an overwhelming bipartisan majority of the House voted 401-4 to reject a similar proposal made by the Carter administration. Third, by properly processing existing 1099 forms the IRS can achieve the same compliance objective without burdening millions of taxpayers, financial institutions, and businesses. Fourth, the imposition of interest and dividend withholding would act as a disincentive to savings and investment and would impede economic recovery. Fifth, the original Senate vote to impose interest and dividend withholding was very close, 47-50.

For these reasons, and on behalf of the many millions of our constituents who will otherwise be adversely affected by interest and dividend withholding, we ask that you approve a rule permitting a separate vote on this important issue.

Sincerely,

STEWART MCKINNEY.
FRANK HORTON.
CLARENCE E. MILLER.
NORMAN E. D'AMOURS.
FERNAND ST GERMAIN.
DOUG BARNARD, Jr.●

JOB TRAINING HELP NEEDED FOR TRADE WAR VICTIMS

HON. JOSEPH M. GAYDOS

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 10, 1982

● Mr. GAYDOS. Mr. Speaker, the Japan Economic Institute of America recently circularized the Congress with an economic monograph that acknowledged that 2 million American jobs have been lost to imports in recent years.

The essay on trade failed to note that many of these goods were unfairly traded, but I will make that notation.

Unfair trade is the way the world works in these days of economic war on a pacifistic and still complacent America, which is the largest market in the world for everything made in the world.

Furthermore, that these goods worth 2 million American jobs can be unfairly traded—traded in violation of international agreements and law—is a policy of the U.S. Government from administration to administration.

Therefore, these 2 million jobs were lost as a matter of Government policy.

And those injured as a direct result of Government policy ought to be helped, also by the Government and also as a matter of policy.

By the way, these lost jobs equal about 20 percent of our present unemployment rate.

In this connection, the debate on the Job Training Partnership Act (H.R. 5320) mentioned 1.2 million workers in declining industries. Declining industries generally are those targeted for penetration by one of our trading partners or another.

In one recent decline, an American automobile manufacturer closed a plant in New Jersey not long ago—closed it permanently.

After 18 months, 56 percent of the workers who did not choose to retire were still unemployed.

The trade adjustment programs are insufficient and they are used far too sparingly.

So, the Government is injuring people and it isn't helping them.

And that is wrong!

So, the \$1 billion the Training Act seeks to direct toward displaced workers speaks strongly in its favor. I think we ought to be doing more in this regard, and that events will compel us to do more. But getting this bill out of the House is a start and it will be \$1 billion more than we have now—if the Senate will accept it and if the administration will let it become law.

In addition, the act seems to be free of the potential for manipulation and abuse that gave the CETA program so much trouble. And that, too, is in its favor.●

LET US GET ON WITH THE BUSINESS OF REAUTHORIZING A STRONG, FLEXIBLE CLEAN AIR ACT

HON. RON WYDEN

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 10, 1982

● Mr. WYDEN. Mr. Speaker, on April 28, the Energy and Commerce Committee overwhelmingly adopted an amendment I offered to reform and streamline the prevention of significant deterioration (PSD) program of the Clean Air Act.

Enacted in 1977, the PSD program budgets the amount clean air is allowed to deteriorate in our Nation's parks, wilderness areas and other areas of our Nation whose air is cleaner than the national ambient health standards.

The PSD amendment adopted by the committee was the product of a fair and open debate, as reflected by the consensus support behind it.

Yet, after a 3-month hiatus on the consideration of any clean air amendments, the Energy and Commerce Committee will soon be asked once again to reconsider the PSD section of the Clean Air Act.

Committee members will be asked to support amendments designed to remove new national parks, wilderness areas and other national treasures—less than 4 percent of the continental United States—from the protections of their clean air budget under the PSD.

The PSD program has been criticized as being too complex. My amendment responded to those legitimate concerns by making specific changes to reduce that complexity.

The 25-to-13 vote to adopt this amendment suggests it is an acceptable compromise that addresses head-on the concerns many of us share about the existing PSD program, while preserving the emphasis on keeping our clean air areas clean and protecting our national parks and other treasures.

My amendment reduced the need for complicated modeling of air quality impacts that both States and industry have complained are complicated and unworkable. The amendment streamlines the PSD permitting process and reduces the number of sources that come under PSD permitting review. For national parks, wilderness areas and other national treasures the PSD budget protections remain. For all other PSD areas, however, States may elect to "opt-out" of the PSD budget protection, thereby allowing pollution up to the level of the national ambient health standards.

This Congress knows that the American people want us to live within budgets. Given this budget-conscious

mood, it is ironic that once again the Energy and Commerce Committee will markup amendments intended to undercut the clean air budget and reconciliation process known as the prevention of significant deterioration program.

Mr. Speaker, an important part of the business of this Congress is to reauthorize a strong, flexible Clean Air Act.

Let us quit covering old ground and move on to the many other important issues that must be resolved before the committee can report out a clean air bill. ●

COURT WATCH PROJECT

HON. ROMANO L. MAZZOLI

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 10, 1982

● Mr. MAZZOLI. Mr. Speaker, I believe that judges typically are too lenient on the criminals who come before them, and I hope the Court Watch Project, in today's parlance, raises judicial consciousness on the need to match the penalty to the crime.

The following article is well worth reading:

[From the Washington Post, Aug. 5, 1982]

COURT WATCH GROUP PUTS PRESSURE ON

"LENIENT" JUDGES

(By Ruth Marcus)

The sentences raise eyebrows:

A Wisconsin judge gave three years probation to a man convicted of sexually assaulting a 5-year-old girl because, he said, the girl was a "sexually promiscuous young lady."

A California judge reduced a first-degree murder conviction to second degree because he said the slayer did not act in a "premeditated and deliberate" way when he stabbed his victim 130 times.

A Pennsylvania judge put an armed robber—out on bail for a previous conviction when he committed the crime—on probation for five years, because prisons are "inhumane and degrading."

Such court decisions prompted the Washington Legal Foundation, one of a new breed of conservative "public interest" law firms, to launch the Court Watch Project, asking its 80,000 members across the country to monitor judges and report any who appeared to be giving criminals slap-on-the-wrist sentences.

"We have hit a nerve," said WLF head Daniel Popeo of the project, which began last year. "We got bags and sacks of letters and support."

Complaints and newspaper clippings about judges who are soft on crime are now pouring into the group's headquarters here at the rate of "10 a day, six days a week," he said.

"There is a tremendous breakdown in the public's mind of the effectiveness of the criminal justice system," Popeo said. Court Watch was needed, he said, to counteract the "tremendous pro-criminal lobby" made up of liberal organizations like the American Civil Liberties Union, which he calls the American Criminal Lovers Union.

After reading Court Watch reports, the Washington Legal Foundation selects the most egregious cases, and writes letters asking the judges involved to justify their actions. It has written more than 500 letters so far.

The campaign would bear special significance for judges who are elected rather than appointed. According to the National Center for State Courts, about 30 states elect lower state court judges, the judges who sentence in most criminal cases. But the threat is equally as weighty for those judges who are appointed for set terms.

One letter was fired off Monday to a Missouri judge who made headlines when he sentenced a university professor who had killed his wife with a hammer to 60 days in jail.

Another sentence in which a Massachusetts judge freed on bail a doctor accused of raping two women patients, even though he had been convicted earlier of raping a nurse, drew a sharp response. "The court's action can accurately be labeled an outrage," the foundation charged in a letter.

In a local case, the foundation asked D.C. Superior Court Judge Henry H. Kennedy Jr., who sentenced a man to 18 to 54 months in jail after he pleaded guilty to killing a 20-month-old girl, "By what strange reasoning or process did you arrive at such a lenient sentence?"

"In our view, the sentence dangerously approaches the level of judicially sanctioning child abuse and infanticide," the group said. "The Washington Legal Foundation believes that if you are unable or are unwilling to mete out appropriate sentences for violent crimes, you should seriously consider resigning from the bench."

If the group doesn't receive a satisfactory response from a judge, it files a complaint with the state judicial review commission. Six complaints are currently pending, and the foundation is about to lodge another five.

Apparently, however, when the Washington Legal Foundation talks, many judges listen.

"I have tried many murder cases, and this is the first time I've ever reduced a first-degree murder conviction in my 10 years on the Superior Court," California Judge Peter S. Smith told the group, noting that he was appointed to the bench by former governor Ronald Reagan and has "a reputation as a hard sentencer."

Legal Foundation lawyers believe their letters make a difference. "In the next case, that judge is going to be a little more sensitive to the victim and the public, and that's a beneficial effect," said lawyer Nicholas E. Calio.

In an expansion move, the foundation is about to expand the Court Watch program. It has printed 50,000 copies of a "Court Watch Manual" to send to various groups detailing how to set up local court-monitoring programs.

The manual suggests activities for "concerned citizens" who want "to hold judges, parole boards, prosecutors and other criminal justice personnel accountable for their actions." Such groups are already active in California and Illinois.

Recommendations include monitoring court proceedings, recall drives; letters to newspapers complaining about lenient judges or parole boards; demonstrations in front of courthouses; newspaper advertisements criticizing a judge's handling of a case, and a "worst judge" award to those too lenient with criminals and who disregard the rights of victims.

Some critics say the Court Watch project represents a dangerous attack on judicial independence.

"I never thought it was proper for judges to sentence out of fear," Vermont Supreme Court Chief Justice Albert W. Barney, chairman of the Conference of Chief Justices, said of the project. "If that's the way they're going to do business it's somewhat extortionate."

Barney noted that judges are often hamstrung by pre-existing legal rules or errors by police that keep evidence from being introduced, and are unable to explain seemingly lenient sentences because of confidentiality requirements.

"The judge gets blamed for all of these things," he said, "I don't really think that it's very satisfactory to key in on whether a sentence appears to the outsider to be lenient."

John Shattuck of the American Civil Liberties Union, argued that "judges need to be kept apart from lobbyists."

"Maybe members of Congress have to take the heat," Shattuck said, "but judges should be making their decisions based on the evidence before them, and not on letters coming in from any political group of whatever stripe."

"We've never received a nasty letter from a judge," Popeo countered. "We feel we are really protecting the judicial establishment from the attacks of the ACLU and the rest of the criminal defense lobby." ●

INSANITY DEFENSE

HON. JAMES M. COLLINS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 10, 1982

● Mr. COLLINS of Texas. Mr. Speaker, earlier this year, a Washington jury found John Hinckley "not guilty by reason of insanity" of shooting President Reagan and three other men last March. I believe that we must take a very hard look at what the insanity defense has become. A man should not shoot the President in front of millions of people on television and then be eligible to be released in as little as 50 days because of the insanity defense.

Now is the time for reform. In many areas of the Nation, criminals are escaping punishment by use of the insanity defense. In Michigan, during the 1970's, 223 criminals escaped punishment by claiming they were insane. Of these 223, 124 were released after only a 60-day hospital stay. This is the type of thing that has to end.

Recently, a Georgia man was twice released from hospitals after two juries found him insane. After he left the hospital the last time, he walked into a hotel lounge and killed his wife and two bystanders.

The insanity defense appeals particularly to defendants with no other defense. Hinckley was able to hire three psychiatrists to try to justify his actions to a jury. Then the jury of laymen was forced to make a decision

on Hinckley's sanity on which expert psychiatrists could not agree.

I believe that a good solution would be legislation similar to that enacted by several States which creates a verdict of "guilty but mentally ill." This verdict would result in criminals being sent to prison after treatment for mental illness rather than being released into the public. Today, I am introducing a bill that would create such a verdict in Federal cases.

There is something very wrong when a man can shoot the President and three other men and then escape punishment by hiring three psychiatrists to say that he was insane. The worst part is that he could soon hire other experts to say that he is now sane and should be released.●

MILITARY CONSTRUCTION AUTHORIZATION SUPPORT FOR MALMSTROM AFB

HON. RON MARLENEE

OF MONTANA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 10, 1982

● Mr. MARLENEE. Mr. Speaker, on Wednesday the House will consider H.R. 6214, the military construction authorization bill. I support this legislation as a much needed step toward upgrading our military facilities.

I am particularly concerned with the present condition of our housing on our military bases. Many of our bases are struggling to provide adequate housing for our military personnel, and this includes one base in my district, Malmstrom Air Force Base. In fact, 82 percent of the Strategic Air Command's existing dormitory spaces do not meet current Air Force standards. Our Nation must invest in this area and make substantial quality of life improvements as an incentive for our military personnel.

I am gratified, and appreciative, of the actions by the Committee on Armed Services to include \$5.1 million to upgrade unaccompanied enlisted personnel housing at Malmstrom as well as its actions to include funds for a heat plant there.

This Nation cannot continue to allow housing at our military bases to deteriorate as it has been and I join with the military personnel at Malmstrom Air Force Base in Great Falls, Mont., in thanks for the actions of the House Armed Services Committee.●

BUFFALO'S UKRAINIANS KEEP MEMORY, DREAM OF FREEDOM FOR HOMELAND

HON. HENRY J. NOWAK

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 10, 1982

● Mr. NOWAK. Mr. Speaker, Ukrainian-Americans during the month of August will celebrate the 100th anniversary of the establishment of their community in the Buffalo, N.Y., area.

The Buffalo Chapter of the Ukrainian Congress of America is the vehicle by which their heritage and appreciation of freedom are communicated to our community and beyond. Mrs. Dasha Procyk, who was a 4-year captive of the Nazi's Auschwitz concentration camp during World War II, is the president of Buffalo's local chapter. Mrs. Procyk spoke of local Ukrainian-American groups as striving to "teach their children a love for their homeland and at the same time a love for their American heritage and an appreciation of the freedoms they have here."

Ukrainian dreams of freedom were trounced when the revolt against czarist Russia failed. To this day the policy of "Russification" continues in Ukraine with a ban on the teaching of the Ukrainian language, the imprisonment of dissidents, religious persecutions, mass postwar deportations, and manmade famines.

The Buffalo Chapter of the Ukrainian Congress Committee of America has "adopted" jailed dissidents and sent food to their homeland in an effort to alleviate human suffering.

The following appeared August 2, 1982, in the Buffalo Courier Express: "Buffalo's Ukrainians Keep Memory, Dream of Freedom for Homeland".

[From the Buffalo Courier Express, Aug. 2, 1982]

BUFFALO'S UKRAINIANS KEEP MEMORY, DREAM OF FREEDOM FOR HOMELAND (By Bill Osinski)

It was only a local ethnic fair, but the organizers committed the diplomatic blunder of putting a flag with a hammer and sickle over the Ukrainian booth.

Dasha Procyk told the festival people there would be no Ukrainian booth until the flag of the Soviet Union was replaced with a blue-and-yellow one symbolizing the independent Ukraine.

"To us, the cause is maybe a little more burning than to other captive nations," said Mrs. Procyk, president of the Buffalo Chapter of the Ukrainian Congress Committee of America and a member of that organization's national board. "But the Ukrainians were the first victims of Russian expansion and the most forgotten, so we have to be the loudest."

This month about 30,000 Ukrainian-Americans in the Buffalo area mark the 100th anniversary of the establishment of their community here. To many of them, it is more than an ethnic milestone: it is a chance to demonstrate a national identity of a home-

land that most of the world recognizes only as the westernmost cave of the Russian bear.

To Ukrainians, the Ukraine is part of the Soviet Union only on political maps. It was from their homeland that the Cossacks rebelled against the czar in the 18th century, and that Ukrainian patriots mounted an army of hundreds of thousands to fight both the Communists and Fascists in World War II.

Now that the Ukraine has once again been absorbed by Russia—this time into the Union of Soviet Socialist Republics—it falls to the Ukrainians in the United States to keep alive the concept that the Ukraine is a distinct land, with its own religious, social and political tradition.

"We feel we must speak for those who cannot speak on their own behalf," Mrs. Procyk said. "We have a sacred duty."

Even those who are three or four generations removed from their homeland feel, to some degree, that same responsibility, she said.

"Some people think once you emigrate, you should forget," said Mrs. Procyk. "I am an American, but an American who doesn't know what is going on in the world isn't a good American."

On the local level, Ukrainian food and folk arts will be the featured attractions at the 10th Annual Ukrainian Day Celebration, to be held Aug. 15 at St. Basil the Great Church on Walden Avenue.

On the international political level, the Ukrainians are perhaps the most active bloc in the National Captive Nations Committee, an advocacy group for the national groups—not 31—that are under Soviet domination, she said.

By federal law, since 1959 the third week in July has been designated as Captive Nations Week in the United States. Mrs. Procyk participated in a ceremony in the White House Rose Garden last month as part of the 1982 commemoration of the Captive Nations cause.

Representatives of the various nations believe they have a strong friend in President Reagan, she said, but most of the strength of their cause comes from personal convictions.

For Mrs. Procyk, those convictions were forged during four years she spent as a captive in a Nazi concentration camp.

"My foremost thought was, 'Does anybody care, does anybody know I'm here?'" she said. Her own antipathy toward the Soviets was hardened, she said, when the Soviets took control of her camp, Auschwitz, and treated the Ukrainians almost as poorly as the Nazis had.

Because she could speak Russian, she could understand the talk among the soldiers of eventually marching to London and Washington, D.C., she said.

Marian Boraczok uses artistic language to make his statement on the Ukrainian spirit.

He had been trained in the Ukraine and Poland as an artist, but when he came to America the only work he could find was in the steel mills of Lackawanna. He remembers reporting for his first day of work at the mill in a ski outfit. But the end of the day his hands were blistered from pushing a coal-laden wheelbarrow, and the seat of his pants had been eaten away by chemical fumes.

"That was like in the hell," Boraczok said of his first impressions of working in his new country. "All the time I was thinking I was in my beautiful country."

Boraczok continued to work in the mills for 18 years, but his mind's eye continued to be filled with visions of his homeland.

His artistic works, done in oils, wood sculptures and ceramics, consist almost entirely of Ukrainian folk themes, from impressionistic paintings of country life to the traditional Ukrainian ceramic plates and Easter eggs.

Boraczok helped start a scout troop for Ukrainian youths and participated in the fund-raising drive to get a summer camp for the troop in the late 1950s.

He also used his free time to come to the community center that the Ukrainians had purchased on Genesee Street and to paint most of the frescoes that practically cover the walls of the center's main hall.

But the heart of Boraczok's contribution to his community is a large room in the center in which he displays his collection of Ukrainian art and lesser memorabilia.

Because the center does not have a separate staff for the room, Boraczok's collection can be viewed only by appointment with Boraczok. The eclectic collection includes some non-Ukrainian items, but most it is Boraczok's statement on the national identity of his homeland.

There are tributes to Ukrainian artists and patriots, mannequins dressed in traditional costumes, and pieces of old Ukrainian currency. The room also holds things that have mostly personal value, such as the threadbare piece of Ukrainian embroidery that an immigrant woman carried on an odyssey through three continents, and a photo of a weeping Ukrainian woman, whom Boraczok later discovered was the mother of a Buffalo man.

"Here is my blood," Boraczok said in explaining why he maintains the collection. "I want people from the third and fourth generation to come here and say 'I am proud to be Ukrainian.'"

Monsignor Paul Iwachiw, pastor of St. Nicholas Ukrainian Catholic Church, said most Ukrainian-Americans believe they have a duty to act as "ambassadors before the world of freedom of religion, because they know their brothers in the Ukraine don't have it."

The Soviet government allows some external expressions of national identity—such as language and folk arts—to all the republics, he said. But expressions of religion that go against the essential atheistic nature of communism are harshly repressed, he said.

This is one reason why people from lands such as the Ukraine are among the most ardent supporters of the American way of life, he said.

"Yes, we have crime here in America, but it is not the same kind of crime as we saw in Europe (the parts of Europe dominated by communism), where a man did not have the right to call himself who he is," Msgr. Iwachiw said.

"We want to be not a dead body but alive," he said, referring to Ukrainians both in their homeland and abroad.

To illustrate the determination of this spirit, Msgr. Iwachiw translated from a letter he received from a friend in the Ukraine, a man who is forced to perform his priestly functions only in secret gatherings:

"We are washed by waves of atheism in a sea of falsehoods, but we do not drown; we are knocked down to the ground, but we are not conquered." ●

A TRIBUTE TO DR. W. LLOYD JOHNS

HON. ROBERT T. MATSUI

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 10, 1982

● Mr. MATSUI. Mr. Speaker, it is my pleasure to rise in tribute to an outstanding educator in my district, Dr. W. Lloyd Johns, president of California State University, Sacramento.

I join with alumni, friends, faculty, students, and staff at "Sac-State" University who will be celebrating Dr. Johns' continued service at a special reception on Sunday, August 29. As president of the State capital campus of the California State University system since 1978, Dr. Johns presides over an \$80 million annual budget, with a faculty and staff of 2,000 and a student population of 23,000.

He is an educator with over 30 years' experience in classroom teaching and administration at all levels, including elementary, secondary, and postsecondary. But Dr. Johns' interests and activities extend far beyond his profession. He is a recognized management consultant, and accomplished public speaker with a fine sense of humor, a published author, and a professional musician.

The Sacramento area and the entire State of California is indeed fortunate to continue to enjoy his service and benefit from his leadership.

I am sure my colleagues—and particularly my colleagues from the State of California—will join me in extending appreciation and best wishes to Dr. W. Lloyd Johns for his outstanding contributions to higher education. ●

AMERICAN JEWS WHO OPPOSE THE ISRAELI INVASION

HON. MARY ROSE OAKAR

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 10, 1982

● Ms. OAKAR. Mr. Speaker, many varieties of groups have courageously spoken out against the Israeli invasion in the interest of world peace. They do not condemn the Israeli people. However, they do condemn the leaders of the Israeli Government who have promoted this invasion and victimized so many innocent people.

On my recent congressional tour of the Middle East, I found many Israelis who also oppose the invasion of Lebanon. These people want to live in harmony with their Arab brothers and sisters.

Can we do less as an American Government? Why are we so mysteriously silent when it is our weapons that are responsible for this devastation of a country and her peoples?

The following inserts are messages from two groups of Americans who

care about the people of the Middle East.

STATEMENT OF WASHINGTON AREA JEWS OPPOSED TO THE ISRAELI INVASION OF LEBANON

As American Jews, we are deeply saddened by Israel's invasion of Lebanon. The death and destruction wrought by the Begin/Sharon government are a betrayal of the vision of Israel's founders and the historical commitment of Jewish people to human rights.

Israel's long-term security is jeopardized, not enhanced, by poisoning the political atmosphere of the Middle East with excessive and senseless violence against civilians.

The violence against Israeli citizens must also be ended so that Israelis can be freed from their legitimate fears—but this must be accomplished by political and diplomatic means, not by subjecting other civilians to even more terrible devastation.

The dream of a peaceful homeland will never be realized so long as Israel denies the legitimate national aspirations of the Palestinian people.

We call on the Israeli government to withdraw from Lebanon, to respect the territorial integrity of all her neighbors and to let the Lebanese decide the fate of their country.

We join hands with the thousands of Israelis who are demanding: Peace Now.

This statement has been endorsed by over one hundred Jewish citizens of the Washington area as well as the "Washington Area Jews Opposed to the Israeli Invasion of Lebanon" and the "New Jewish Agenda". Among the signatories are Rabbi Harold White of Temple Sinai in Washington, Ken Giles of "New Jewish Agenda" and journalist I. F. Stone.

(Telegram)

AUGUST 4, 1982.

President RONALD REAGAN,
Hon. GEORGE SHULTZ,
Secretary of State,
Hon. WILLIAM CLARK
Director of the National Security Council.

Israel's latest offensive coupled with Beirut's serious food shortage caused by Israeli troops blocking supplies of water, food, and medical supplies to the city is beyond the bounds of human decency.

That a half million civilians should be held hostage to Israel's seeking revenge on 6,000 PLO members indicates an insensitivity to world opinion on the part of Israel which exceeds our ability to comprehend. Common humanity demands immediate action.

Because of Israel's special relationship to the United States, it is imperative that the Administration publicly make clear its concern over Israel's siege in a manner that cannot be misunderstood: We should tell Israel that if the siege is not lifted it is our intention to supply food by means of the Sixth Fleet.

INTEGRATION OF THE CENTAUR INTO THE SPACE SHUTTLE

HON. DUNCAN HUNTER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 10, 1982

● Mr. HUNTER. Mr. Speaker, I regret that a good colleague of mine has recently inserted a statement into the CONGRESSIONAL RECORD which contains several substantive errors. I sincerely believe that my colleague is quite concerned about the Space Shuttle system and the type of upper stage which will be used in the Shuttle. I am impressed by the sincerity of his concern. Unfortunately, my colleague's statement is confusing because it is in total variance with other statements he has made on this exact same subject. As the ranking minority member of the Space Shuttle, Science, and Applications Subcommittee of the House Science and Technology Committee, my colleague vociferously criticized the administration for including the interim upper stage—IUS—for two important NASA science missions.

There are errors in my colleague's extended remarks that must be set straight.

In spite of the fact that the Boeing Co. has built and delivered eight IUS units at a cost in excess of \$700 million for a solid fuel upper stage for the military and civilian spacecraft.* * *

On this point my distinguished colleagues is correct. The IUS was initial-

ly supposed to cost the taxpayer \$150 million and now is costing the taxpayer \$700 million * * * a 500-percent cost increase.

Congress has passed legislation (urgent supplemental) forcing NASA to pay the losing contractor \$150 million over the next 2 years.

The money which will be expended for the Centaur system over the next 2 years will mean that the taxpayer will not have to pay for the IUS vehicle for the Galileo and International Solar-Polar missions. Additionally, the Centaur is a high-energy upper stage and its inclusion into the Shuttle will save the taxpayer an investment of in excess of \$1 billion that would be required to develop a brand-new high-energy upper stage. Such an expenditure would only be necessary if the Centaur is not used for these missions "To build and develop a system that does the same thing."

The Centaur does not do the same thing as the IUS. The Centaur has in excess of twice the lift capability of the IUS. The Centaur also provides an operational flexibility not provided by the IUS which will be of greater value to our intelligence community, scientists, and commercial users.

This was the same system that was rejected by NASA because its design allegedly made it far too dangerous to put aboard the Space Shuttle.

NASA does not maintain that the Centaur poses a safety problem to the Space Shuttle. In fact, the ability of the Centaur to expel its propellants makes it less of a safety concern than the IUS solid propellant could cause the Shuttle to have to operate an abort maneuver with increased weight in the Shuttle bay.

Now I have learned that the switchover back to the Centaur upper stage will cost an additional \$1.4 billion.

This statement is incorrect. It appears my colleague was multiplying when he should have been subtracting.

This is for a system that is untried and untested. If NASA had been allowed to use the Boeing IUS for the planetary flights to Jupiter and the Solar Polar Mission flight, the IUS would have been tested a dozen times before. Now NASA is faced with flying half-billion-dollar spacecrafts on Centaur Upper Stages that have never been flown before.

The Centaur upper stage has flown before. In fact, the last 44 Centaur flights have been 100 percent successful. I am sorry to note that it is the IUS vehicle that has never flown before. The first IUS flight will be an operational flight. A failure on a flight such as this would not only destroy a similarly expensive space payload but would leave the Galileo and ISPM missions without a backup were it not for the now planned integration of Centaur into the Space Shuttle.

Deciding on what system to use for a booster rocket should not be determined by politicians, but should be left to the discretion of the technical experts.

If this is true, one might ask my colleague why he has reintroduced this matter into the political realm. As for the "Technical Experts," I would urge my colleague to dial his telephone, call NASA and ask them what they think because I agree with them. Let us examine what the "Technical Experts" have said on this issue.

Letter from Verne Orr, Secretary of the Air Force and Hans Mark, Deputy Administrator of NASA to Chairman FURQUA of House Committee on Science and Technology:

NASA should undertake the adaptation of the Centaur to be used in the Shuttle to support the near-term Galileo mission and the projected mid-term high energy requirements of NASA, DOD, and commercial users.

Report to the Congress from the Defense Department and NASA entitled, "Upper Stage Alternatives for the Shuttle Era":

An IUS Galileo, combined spacecraft mission, case 5 in Section 5.3.1.3, utilizing the IUS on a Delta-VEGA trajectory was also analyzed with development of preliminary cost figures. Based on preliminary mission analysis, this option provided, at best, major compromise to the mission which would have to be subjected to detailed review by the scientific community. Further mission analysis, while possible, to identify other mission options would involve much more detailed weight and CG location for a Galileo combined spacecraft with kick stage would represent a load to the generic IUS which is greater than design limits. This fact would require, as a minimum, structural modifications to stiffen that upper stage. The implications of such a modification and the cost and schedule consequences as well as risks are not well understood at this time. In summary, while it is apparent that a mission with a combined Galileo spacecraft can be accomplished with upper stage performance characteristics equivalent to an IUS, it is not clear that such a mission could be accomplished without major science compromises as well as high costs and schedule risks which would make a single launch in 1985 undesirable.

Consequently, as this portion provided for extremely high technical risk and a low mission accomplishment reliability factor, the assessment and cost analysis was discontinued.

I hope that my good colleague from New Jersey will join me and his other colleagues in Congress who agreed with his earlier view that this decision has turned out as it should have. Integration of the Centaur into the Space Shuttle will save the taxpayer millions if not billions of dollars. It will provide an increase in capability and will make the Galileo mission, as well as many future missions, much more certain and much more effective.●

IN HONOR OF JAMES A. COLE

HON. EUGENE V. ATKINSON

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 10, 1982

● Mr. ATKINSON. Mr. Speaker, I would like to take this opportunity to congratulate one of my constituents, the Honorable James A. Cole, who celebrated his 75th birthday on the 28th of July 1982. Mr. Cole was born in and has been a life long resident of Wexford, Pa., where his family is one of the oldest and most revered in the community.

He holds degrees from Duquesne University in both accounting and law.

Mr. Cole's life has been dedicated to community service. His contributions and accomplishments are many and varied. The following are but a few of his significant achievements:

Forty-four years as a district justice and justice of the peace;

Over 50 years service as a notary public;

Forty years employment with Duquesne Light Co. of Pittsburgh. During the last 15 years with the company, he was president of Local 149 I.B.E.W., as well as president of the joint board of all the Duquesne Light Co. locals. In addition he was an officer in both Duquesne Light Co. Credit Union and Pittsburgh Officers Credit Union for many years;

Mr. Cole spent more than 30 years as a director of Farmer's Mutual Fire Insurance Co. of Pennsylvania and was its president for the past 10 years—an office he continues to hold;

Mr. Cole has been an active member of the Wexford Volunteer Fire Co. and is now a life member. This service covers more than 50 years with the fire company.

Mr. Cole is still an active member of Perry Highway Lions Club. He has just completed a third term—not consecutive—as president of this group. He has also served as district officer in International, Pennsylvania, District 14B of the Lions Club.

Mr. Cole has been and is a life long member of St. Alphonsus Roman Catholic Church. He has been an active participant in many congregational duties. In addition, he now serves as eucharistic minister.

The Honorable Mr. Cole has performed outstanding community service. He has profound respect for law and the office he served as justice of the peace. He never allowed personal feelings, friendships, nor favoritism to interfere with due process of the law.

Though he is retired from office, he continues to do what comes naturally to him—serve his fellow man.●

TRIBUTE TO GIUSEPPE PREZZOLINI

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 10, 1982

● Mr. BIAGGI. Mr. Speaker, I would like to pay tribute to the late Giuseppe Prezzolini an internationally known author, journalist, and scholar who passed away recently. My good friend Dr. Peter Sammartino, founder-president and chancellor of Fairleigh Dickinson University was especially close to Professor Prezzolini especially during the latter's tenure at Columbia University. Dr. Sammartino together with Sister Margherita, a renowned authority on Italian-American culture and history issued a statement paying tribute to Professor Prezzolini which I would like to place into the RECORD at this point.

PREZZOLINI, A WORLD CITIZEN

MORRISTOWN, N.J.—Giuseppe Prezzolini passed away in Lugano, Switzerland, a few days ago. He was a highly productive scholar and journalist whose intellectual alertness lasted to the very end. What he has been and will remain, as a scholar and a man, lives in countless books and articles written in several languages and which have been since translated into many more languages.

A Nobel Prize candidate, Giuseppe Prezzolini was the founder and first editor of *La Voce* (1908-1914). He may be called "an impresario of culture," as he said of himself. He has been instrumental in bringing foreign literatures to Italy, interpreting them to his audience, and then sharing with the rest of the world the rich outpouring of Italian literary and cultural achievements. These accomplishments were the direct result of his spadework and unceasing labors in the cause of introducing modern thought to the literary and artistic community.

Of himself Prezzolini wrote in 1922 (*Amici*, Vallecchi, p. 8):

I am not a writer, I have no originality as a philosopher, and I mistrust those who would like to do over the universe. But it seems that I possess a certain clarity of ideas, the capacity to grasp the character of a man or of a movement, the strength of soul to refuse to be seduced by friendships or to be upset by hatreds in evaluating merits and in measuring defects. At a certain point in my life, having buried the romantic turmoils and aspirations. I decided to become the "useful man" for others; to clarify certain ideas to Italians, to indicate their inferiorities in order to overcome them, to characterize foreign people and foreign movements, to translate from different languages, to reveal promising young men, to point out hidden greatness; that is what one calls work of culture. It is very much like building ditches, plowing the soil, planting trees, pruning, sowing, weeding, trimming, and all the operations of a good agriculturalist. Yes, I have always wanted to be useful. I don't say I have always succeeded, but that was my intention. I have always put myself at the service of a man who needed to be known, of an idea that needed conquering, of a propaganda that needed dissemination. This was the principal char-

acter of the *Voce* but it is in a way the character of all my works.

Prezzolini—Columbia University Professor Emeritus of Italian—was an internationally-known author, journalist, scholar, critic, teacher who, while directing the Literary and Information Department of the Bureau for Intellectual Cooperation funded by the League of Nations in Paris, was invited to become director of Casa Italiana in 1930.

A man of culture made for study, but also for action and responsibility, Prezzolini won the trust of the University and its administrators and was much appreciated by colleagues and students. At the outbreak of World War II he became an American citizen and for another decade continued to teach, to study, and to write at Columbia University.

Intellectual stimulation, moral integrity and the spiritual values exemplified in his own life were characteristics of Prezzolini's teaching, not only at Columbia University, but throughout his life. His writings, whether scholarly or journalistic, are delightful because of his clear, precise, well-balanced style. He has a great variety of interests and his pen ranges from German mysticism to an erudite history of spaghetti, with biography, criticism, philosophy, scholarship, reportage, allegory, religion, and psychology filling the gap.

For the past 20 years he lived in Italy and Switzerland, where he continued his literary scholarship and journalistic endeavors. He recently prepared the manuscript for a sequel to his most popular book: "God is a Risk" (*Dio è un rischio*), which will soon be published. His lucidity and keenness of mind can well be attested to by the hundreds of interviews which appeared in newspapers and magazines throughout the world, and by the many radio and TV programs on which he appeared during the celebrations honoring him on his 100th birthday.

In July 1971, in recognition of his contribution to Italian culture, the President of the Republic of Italy bestowed on him the Italian government's highest honor, and in January 1982, he received the Penna d'Oro Award from President Sandro Pertini.

Prezzolini will live on in his works which include over 60 books, with an additional 50 new editions, as well as over 70 anthologies, volumes of correspondence and translations. He wrote for over 175 newspapers and magazines to which he contributed articles during the past century in Italy, France, Germany, India, Yugoslavia, Holland, Switzerland, Venezuela, Spain, England, Sweden, Belgium, and the United States.

Prezzolini's impressive contribution to the growth, spread, and development of Italian thought and literature will never be forgotten, for he has been the catalyst whose skillful blending of literary and philosophical developments with Italian genius brought forth a new Italian renaissance in the early years of the twentieth century.

Dr. Peter Sammartino, Founder-President and Chancellor of Fairleigh Dickinson University remembers Professor Prezzolini at Columbia University: "It was the period of the greatest ebullience and of the most important thrust forward, intellectually, of Italian Studies. Never in the history of American universities had so much been accomplished in a relatively short time. The Casa Italiana, one of the most beautiful buildings on any campus, shone as a beacon light of Italian culture in America."

An inscription carved on the facade of Casa Italiana of Columbia University reads:

"Italy Mother of Arts Thy Hand Was Once Our Guardian and Is Still Our Guide" (Lord Byron's *Childe Harold*, 4.47). It will always be applied by countless Columbia University graduates to Prezzolini: "Whose hand was once our guardian and is still our guide." ●

TENN-TOM INVESTIGATION

HON. BOB EDGAR

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 10, 1982

● Mr. EDGAR. Mr. Speaker, I would like to bring to the attention of the House information contained in news reports filed by WSMV-TV in Nashville concerning allegations of criminal activity relating to the Tennessee-Tombigbee navigation project in Mississippi and Alabama. This Corps of Engineers project, which has been the subject of considerable controversy in the past, will need fiscal year 1983 funding this year. I anticipate offering an amendment affecting Tenn-Tom's funding, and I believe Members should be aware of the information reported in Nashville before they decide how to vote on this project.

I also believe that the reports emanating from Nashville deserve congressional attention. Therefore, I have requested that the House Public Works and Transportation Committee to investigate this issue. Excerpts from last week's news reports and my letter requesting an investigation follow:

[WSMV-TV News, Aug. 2, 1982]

Channel Four News has learned a federal grand jury in Nashville is investigating possible charges of fraud in the construction of the Tennessee-Tombigbee Waterway . . .

The waterway is planned to connect 234 miles of canals, locks, dams, and lakes. But it is this stretch in upper Northeast Mississippi that is the subject of this story. The Corps of Engineers calls this the greatest single construction feat of the Tenn-Tom . . . A manmade canyon 27 miles long through what's called the Tennessee divide, and it is a bigger earth-moving job than the digging of the Panama Canal. But a Nashville grand jury suspects that one of the projects contractors may have cheated the taxpayer out of millions of dollars.

The contract to cut through the first part of the divide was awarded in 1976. . . The contract's title was "Divide Cut Section 4-A—its price was \$21 million. But with the contract more than half done the original contractor went broke and the job was given to a subcontractor already doing the work—Paul Bosco and Sons from Detroit.

Bosco finished the job in January of 1979. And by the time it was finished the cost had skyrocketed from the original \$21 million to \$39 million. Since then two Bosco foremen have been indicted for allegedly lying to the Nashville grand jury investigating divide cut section 4-A. . .

The cost overruns Apparently raised a red flag to the Army's Internal Audit Agency because they came here to what used to be the offices of the Corps of Engineers in Iuka, Mississippi to get records of the Bosco contract. They studied these records from

March through August of 1980. They discovered this single change order alone—Modification No. 3—added \$12 million to the cost of the contract.

The auditors, along with the Army's Criminal Investigation Division and the FBI began questioning foremen, engineers, and officials involved in the Bosco contract. Two of the people they questioned told Channel Four the Army suspected Bosco had overcharged the Corps for the equipment it used and possibly tried to slow the project down.

Last summer the US Department of Justice joined the probe and a Nashville grand jury here began questioning some of the same people who had been grilled by the Army and the FBI. Two of the people are scheduled to be tried here in September for allegedly lying to the grand jury—Former Bosco foremen Lewis Cass and Robert Douglas Holt, both of Mississippi.

In the indictments of the two men, the grand jury states it was conducting an investigation to determine whether violations of the mail false claims, false statements, and other criminal statutes of the United States had been committed in connection with the divide cut Section 4-A of the Tennessee-Tombigbee Waterway. . . .

[WSMV-TV News, Aug. 3, 1982]

Alabama Representative Tom Bevill is chairman of the committee responsible for oversight on water projects like Tenn-Tom. But Bevill said he did not know about the grand jury probe until Channel Four told him about it last week.

He said no congressional investigation is needed because the Department of Justice is taking care of it. Bevill said the Corps of Engineers, which is building the Tenn-Tom, is cooperating with the Justice Department 100 per cent. But he claimed even if indictments and conviction result from the grand jury probe, the project will still be finished. . . .

[WSMV-TV News, Aug. 4, 1982]

The contract, being worked by Paul Bosco and Sons, specified the earth would be sandy, like this. But instead, according to the Corps, Bosco ran into wet, mucky soil like this—soil that is harder to move.

According to the Corps, Bosco had the right to demand extra time to finish the job, but the Corps did not want to extend the deadline. So Area Engineer said the Corps decided to pay Bosco more money so he could meet his original deadline. The Corps did not know how much the so-called changed conditions would cost. So Bosco started working around the clock and no price was agreed upon in advance.

The work was put on a cost plus basis. Bosco told the Corps what the work cost him plus a certain percentage profit. Corps Engineer said the Corps avoids cost plus situations wherever possible because they put all the risk on the government.

The final cost of the Bosco contract was \$18 million more than the original price. And the federal grand jury here in Nashville apparently suspects the Corps took a risk and lost.

The grand jury indicted two former Bosco foremen for perjury in answers to questions about the Bosco contract. One indictment read: "Lewis Cass knew that he told certain heavy equipment operators to slow down because they were in cost plus.

Paul Bosco himself is now working in Dallas. He told Channel Four he feels he is being targeted by authorities. He would make no further comment except to say

someday he will have a story of his own to tell. . . .

HOUSE OF REPRESENTATIVES,
Washington, D.C., August 3, 1982.

HON. JAMES J. HOWARD,
Chairman, House Public Works and Transportation Committee Rayburn House Office Building.

DEAR JIM: I have recently learned of allegations of criminal activity relating to the Army Corps of Engineers Tennessee-Tombigbee project. I believe that this information merits the attention of our committee, and I am writing to request that the committee conduct a further investigation of this matter.

Let me briefly outline the allegations that have been made public thus far. Last night, Nashville television station WSMV reported that a federal grand jury has been investigating one of the contractors of the Tennessee-Tombigbee Waterway project over the past year. The investigation specifically concerns the divide-cut portion of the project in northeast Mississippi. The investigation focused on a portion of the divide-cut for which the original contract in 1976 was \$21 million. In 1979 the original contractor went bankrupt before completing its obligations and the contract was given to a subcontractor, Paul Bosco, Co. of Detroit.

With Bosco doing the work, costs on this portion of the project gradually escalated to \$39 million. It is this \$18 million escalation under the new contractor that the allegations specifically concern. Two men working for Bosco have been indicted for allegedly lying to the grand jury. It is my understanding that the questions they were asked by the grand jury involved whether they had deliberately slowed work and deceived the Corps in order to escalate their "cost plus" contract. The investigation is still continuing, and either the investigation or the trial of the two men, set for September, may turn up new facts.

I believe this episode could have implications for the whole project and perhaps even for the whole Corps of Engineers program. The suspicion that a contractor may have hidden as much as \$18 million in fraud from the Corps is extremely serious. Presumably, the alleged fraud may have gone undiscovered without the eventual involvement of the Federal Bureau of Investigation and the Justice Department which brought an investigation to the grand jury. Given the Corps' close working relationship with Congress and our committee and congressional reliance on the Corps for facts and oversight on projects, I feel that we have a responsibility to look into this matter further.

As you know, the Tennessee-Tombigbee is the largest and most expensive project the Corps has ever undertaken. I and many other colleagues have opposed the project in the past on its merits, but I believe that both supporters and opponents of the project are shocked by allegations of criminal activity connected with this federal project. As the Public Works Committee moves along with further activity on the authorization of projects and examination of the Corps program, I believe it is essential that we address the questions which are raised by the activities of the Nashville grand jury. I hope that you agree that a committee investigation is appropriate and that we can discuss this matter further at your convenience.

Sincerely,

ROBERT W. EDGAR. ●

SENATE—Wednesday August 11, 1982

(Legislative day of Monday, July 12, 1982)

The Senate met at 9:30 a.m., on the expiration of the recess, and was called to order by the President pro tempore (Mr. THURMOND).

PRAYER

The Chaplain, the Reverend Richard C. Halverson, LL.D., D.D., offered the following prayer:

Righteousness exalteth a nation
* * *—Proverbs 14: 34.

Lord God of righteousness and justice, there is in each of us a spirit of self-interest which inclines us to pragmatism as a way of life. We deceive ourselves by rationalizing less than honorable action on the grounds that our purpose is good. Help us to resist the expediency that the end justifies the means. Help us to understand that means are as important to Thee as ends, that a righteous purpose does not sanctify an evil process.

Protect the Senators from the subtlety of self-deception. Give to each wisdom to examine his plans in the light of Thy truth; sensitize the conscience of each to Thy holy will; and grant courage to do what his God-enlightened conscience dictates. For the sake of God and country, we pray. Amen.

RECOGNITION OF THE
MAJORITY LEADER

The PRESIDENT pro tempore. The majority leader is recognized.

Mr. BAKER. I thank the Chair.

THE JOURNAL

Mr. BAKER. Mr. President, I ask unanimous consent that the Journal of the proceedings of the Senate be approved to date.

The PRESIDENT pro tempore. Without objection, it is so ordered.

REASON NO. 11: THE
PERCENTAGE GAME

Mr. BAKER. Mr. President, on this day in 1937, Ernest Hemingway punched Max Eastman in the nose in Maxwell Perkins' office. Events, such as they are, do not necessarily repeat themselves. But to guarantee that the pugilistic spirit of Members of the Congress is not similarly excited, I urge that we consider the necessity of completing the must list of legislative activity and recessing on August 20.

So, Mr. President, today I wish to assert reason No. 11 of my 18 reasons why we should push forward and

recess on the 20th. Reason No. 11 is the percentage game. My guess is, that should the Senate fail to take advantage of the next 10 days, thus necessitating sessions during the week of the 22d through the 27th, a great many Senators, nonetheless, will stick by their plans and leave this city and this Chamber on the 20th, notwithstanding the entreaties of the leadership and the announcement of formal sessions of the Senate.

However, I urge that they consider that if they do so—if they leave on the 20th and we have not yet completed the must list—embedded in that act is both good news and bad. The good news is that they will be out of the city; they will be home with their families; they will be on vacation, perhaps, or wherever. But the bad news—and I now apologize to my colleagues from Georgia for this remark—is that their voting record is going to look like the record of the Atlanta Braves during the past 2 weeks, because we are not going to sit here and have idle quorum calls for a week.

If we have not finished the must list of legislation, I remind Senators that the adjournment date is August 27; and if we are in session for that extra week in order to complete the must list, I can assure them that we will not be sitting idly by, that there will be votes, that there will be votes after votes. There will be votes enough to make even the heartiest voting record fall into shambles.

Mr. President, I have no further need for my time under the standing order; and in the absence of any other Senator seeking recognition, I suggest the absence of a quorum.

The PRESIDENT pro tempore. The clerk will call the roll.

The Assistant Secretary of the Senate proceeded to call the roll.

Mr. NUNN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. BAKER. Mr. President, will the Senator yield, so that I may make a statement?

Mr. NUNN. I yield to the majority leader, although I do so with great trepidation, having heard by the grapevine that there have been certain disparaging analogies relating to the record of the Atlanta baseball team.

Mr. BAKER. Mr. President, I was careful to point out that no disparagement was intended toward the two Senators from Georgia. However, the

rapid plummet in standings of the Atlanta Braves inspired me to make certain analogies to the slow pace with which the Senate has acted.

Mr. NUNN. I say to my friend and colleague from Tennessee that it should be noted that if the U.S. Senate were only one-half game behind, we would probably have improved our record.

Mr. BAKER. As usual, the Senator and I agree.

Mr. President, I ask unanimous consent that the time remaining to me and the time allocated to the distinguished minority leader under the standing order, as abbreviated this morning, may be reserved for our use at any time during the course of this day.

The PRESIDENT pro tempore. Without objection, it is so ordered.

ORDER OF PROCEDURE

Mr. BAKER. Mr. President, is there an order for the transaction of routine morning business to follow the execution of the special order?

The PRESIDENT pro tempore. There is. The first order is for the Senator from Georgia, for 5 minutes. Then there will be a period for the transaction of routine morning business, not to extend beyond 10 a.m., with statements therein limited to 2 minutes each.

At 10 a.m., the Senate will resume consideration of the pending business, H.R. 6863.

Mr. BAKER. I thank the Chair.

RECOGNITION OF SENATOR
NUNN

The PRESIDENT pro tempore. The Senator from Georgia is recognized.

THE CRIME CONTROL ACT OF
1982: TITLE IV—HABEAS
CORPUS REFORM

Mr. NUNN. Mr. President, in our criminal justice system the writ of habeas corpus has been flagrantly abused by career criminals for decades upon decades. Such blatant misuse of habeas corpus has enabled hundreds of convicted wrongdoers to wait years after their conviction, then successfully file petitions on the basis of a vague technicality in their original trial. This improper and unfortunate mistreatment of habeas corpus has generated substantial criticism of the system by many legal scholars and au-

thorities as well as the public. Senator CHILES and I are aware of the growing concern over such abuse. As a result, we have been addressing this Congress for over 2 months about the urgent need to correct this longstanding abuse of habeas corpus.

To illustrate this problem, the case of Henderson against Kibbe serves as yet another excellent example. On December 30, 1970, Barry Warren Kibbe and a friend encountered a thoroughly intoxicated man named Stafford in a bar in Rochester, N.Y. After robbing Stafford of over \$200, they drove him to a nearby town and abandoned him on an unlighted, rural road in a state of partial undress, and without his coat or glasses. The temperature was near zero, visibility was obscured by blowing snow, and snow banks flanked the roadway. At about 10 p.m., while helplessly seated in a traffic lane about a quarter mile from the nearest lighted building, Stafford was killed by a pickup truck.

Kibbe and his accomplice were subsequently convicted in a New York trial court of grand larceny, robbery, and second-degree murder. His conviction was upheld by the Appellate Division of the New York Supreme Court. On his appeal, the New York Court of Appeals rejected his argument that the truck driver's conduct constituted an intervening cause that relieved the defendants of criminal responsibility for the victim's death.

Kibbe then filed a habeas corpus petition in U.S. District Court for the Northern District of New York which refused to review his attack on the sufficiency of the judge's advice to the jury. They held that his petition failed to raise a question of constitutional dimension. However, the U.S. Court of Appeals for the Second Circuit reversed on the ground that failure to instruct the jury on the essential element of causation violated due process standards. On certiorari, the U.S. Supreme Court reversed the U.S. Court of Appeals decision. In an opinion by Justice Stevens joined by Justices Brennan, Stewart, White, Marshall, Black, and Powell, the Court held that the trial court's failure to instruct the jury on causation was not constitutional error in violation of due process standards. The evidence at the trial was more than sufficient to prove beyond any reasonable doubt that Kibbe's conduct had caused the victim's death.

When one considers the strong factual record in the State courts, the Kibbe case stands out as another illustration of time-consuming and needless relitigation of issues by the Federal courts. The Federal appellate court granted Kibbe's petition on the basis of an objection to a jury instruction which Kibbe had never even raised in the State court despite every opportunity to do so. Even more disturbing is

the appellate court's acceptance of his argument that the jury did not consider the issue of causation because of the lack of a specific instruction on the issue. Even a cursory review of the trial record showed that the causation issue was the central argument placed before the jury, time and again, both in trial evidence and counsel's argument. Fortunately, the Supreme Court was not so easily misdirected from the true facts by Kibbe's petition, which they eventually denied, after much needless and costly Federal litigation.

This type of situation contributes to the ever-increasing backlog of cases in our criminal justice system. Senator CHILES and I have presented this Congress with S. 2543, the Crime Control Act of 1982, which contains necessary reforms in habeas corpus proceedings. It would require the Federal courts to pay more deference to State courts' decisions. For too long, the Federal courts have been granting habeas corpus petitions despite strong factual findings by the State courts to the contrary. Our proposed legislation would give more weight to State court decisions, thus helping to eliminate needless, costly, and time-consuming Federal litigation.

Mr. President, I yield back the remainder of my time.

ROUTINE MORNING BUSINESS

The PRESIDING OFFICER (Mr. GARN). Under the previous order there will now be a period for the transaction of routine morning business not to extend beyond the hour of 10 a.m. with statements therein limited to 2 minutes each.

Mr. NUNN. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The Assistant Secretary of the Senate proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

SENATE SCHEDULE

Mr. BAKER. Mr. President, I have just instructed the Republican cloakroom to issue a hotline notice that the vote will occur at 10 a.m.; that all time has expired on the Symms amendment; that after that vote the remaining amendments qualified under the unanimous-consent agreement to section 6 will be voted on.

It is the hope of the leadership that all action on chapter VI, which is the foreign assistance section of the supplemental, can be disposed of by noon; that after that we will proceed to consider the remainder of the bill, with the hope that we can finish that bill

sometime at a reasonable hour this afternoon or this evening.

The hotline also notified Senators on this side of the aisle, however, if we have not finished the bill by normal recess or adjournment hour this afternoon or this evening that we will continue late into the evening. It is the intention of the leadership to finish this bill today if it is possible to do so, and I believe it is.

The bill will be followed then, Mr. President, on tomorrow by the immigration bill.

I wish to make that statement on the floor so that all Members will be aware of the fact that tonight is perhaps a late night, and even perhaps a very late night, in order to finish this bill.

Mr. President, may I further announce that I have an indication from the manager of the bill on this side that he wishes to finish this bill and that he will object to any window for lunch or for dinner, as we have sometimes done. So Senators should also be on notice that the voting pattern will be continuous during the day today without any interruption.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

All time for morning business has expired.

Mr. HELMS. I ask unanimous consent that I may proceed for 2 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

RESPONSE OF FRED C. IKLE CONCERNING FIDEL CASTRO

Mr. HELMS. Mr. President, shortly we will be voting on the Symms amendment. It has been suggested that instead of drawing a clear line of demarcation we should pursue a course of moderation and friendship with Fidel Castro. It is asserted that such a policy will give positive results.

Earlier this year, I made inquiry of Dr. Fred C. Ikle, the Under Secretary of Defense for Policy. Dr. Ikle's response to my questions are significant in terms of the argument that is being made that it is safe for us to discard the Monroe Doctrine.

I ask unanimous consent that my questions and the answers given by Dr. Ikle be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

Senator HELMS. It has been suggested that Fidel Castro is merely reacting to the hostile

ity displayed by the United States, and that a more moderate and flexible US policy might give him an alternative to relying almost exclusively on Moscow. Do you find any merit in this reasoning?

Mr. IKLE. I think that question is adequately answered by Castro's actions in response to varying US policy shifts during the past six years under several Administrations. You will recall that about six years ago Cuban military forces were just beginning their military buildup in Angola. President Ford and Secretary of State Kissinger made strong public statements that the United States would not tolerate such conduct, and for a period of time in December 1975, the Soviet airlift of Cuban troops and equipment to Angola was halted. Then the Congress passed the Tunney/Clark Amendment, tying the President's hands by prohibiting further assistance to the non-communist elements in Angola. The Soviet-Cuban airlift resumed immediately, and within two weeks the number of Cuban troops in Angola had doubled. It continued to increase gradually in the following year, so that at the end of the Ford Administration there were estimated to be about 14,000 Cubans in Angola.

President Carter's Administration took a more sympathetic approach to the Cuban problem, and made a significant effort to improve US relations with the Castro government. For example, the Carter Administration:

Opened an "interest section" in Havana, and permitted the Cuban Government to do the same in Washington.

Relaxed the travel restrictions on Cuban diplomats at the United Nations and in Washington.

Encouraged increased cultural exchanges between the two countries.

Lifted the restrictions on vessels which had previously called at Cuban ports allowing them to subsequently visit US ports.

Lifted the ban on travel by US citizens to Cuba.

Permitted the resumption of charter flights between Cuba and the US.

It is worth recalling the response of Mr. Castro to these friendly overtures. During the Carter Administration, Cuba:

Increased the number of Cuban military personnel in Angola from about 14,000 to 20,000.

Increased the Cuban presence in Ethiopia from 0 to a height of 17,000 in 1978 and in Nicaragua from 0 to 500.

Initiated a massive effort to subvert non-communist regimes in Latin America. Cuba provided military assistance to Nicaragua to include advisors, weapons such as surface to air missiles, anti-aircraft guns and light arms. In the case of Grenada, Cuba provided advisors and anti-aircraft weapons and began construction of an airfield which would have military utility.

Denounced the United States at the summit meeting of the Non-Aligned Movement in Havana in September 1979. Castro charged that Latin America had historically suffered greatly from U.S. aggression, colonialism, and neo-colonialism.

These actions hardly support the contention that a more conciliatory approach by the U.S. to U.S.-Cuban relations will make Castro our friend.

The U.S. is not looking for a confrontation with Cuba. Nevertheless, we are unwilling to sit idly by while Fidel Castro and his Soviet bosses subvert and seek to overthrow the less powerful non-communist governments of the region. If Castro truly desires

peace and improved relations with the U.S., he should begin such a rapprochement by stopping his aggression and permit other States to live in peace. We assure you that a halt in Cuban efforts to subvert other countries would not go unnoticed by this Administration.

However, so long as Fidel Castro continues his aggressive policies in Latin America, Africa, and other regions of the world, we will continue to regard him as a serious threat to international peace and stability. We believe—and the history of the 1975 Tunney-Clark Amendment suggests—that the credibility of our deterrent rests in large part on Congressional attitudes; and thus the need to resort eventually to the use of U.S. military forces will be determined in part by Castro's perception of Congressional views. Unless the Congress is perceived to be supportive of the President's strategy, no U.S. action short of actual military force is likely to have much influence on Cuban policy.

Senator HELMS. What effect do you believe knowledge of the fact that the Joint Chiefs have contingency plans to meet Cuban aggression in the region will have on Cuban decision makers?

Mr. IKLE. Unfortunately, history demonstrates that peace is not furthered by failing to respond effectively to the threat or use of armed force. We believe it is important that Fidel Castro be put on notice that the United States is capable of responding to continued aggression with a wide range of flexible options aimed at making the costs of aggression and subversion greatly outweigh any perceived benefits.

If Mr. Castro wants to promote the security of Cuba, he should cease his efforts to undermine and overthrow the governments of other states. We hope that by alerting him to our deep concerns, and our strong commitment to the cause of freedom, he will appreciate the wisdom of ceasing his subversion of other States.

SUPPLEMENTAL APPROPRIATIONS ACT, 1982

The PRESIDING OFFICER. Under the previous order, the hour of 10 a.m. having arrived, the Senate will now resume consideration of the pending business, H.R. 6863, which the clerk will report.

The assistant legislative clerk read as follows:

A bill (H.R. 6863) making supplemental appropriations for the fiscal year ending September 30, 1982, and for other purposes.

The Senate resumed consideration of the bill.

VOTE ON AMENDMENT NO. 2020

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Idaho (Mr. SYMMS). The yeas and nays have been ordered and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Delaware (Mr. ROTH) is necessarily absent.

Mr. CRANSTON. I announce that the Senator from Connecticut (Mr. DODD), the Senator from Kentucky (Mr. HUDDLESTON), and the Senator from Maryland (Mr. SARBANES), are necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 68, nays 28, as follows:

(Rollcall Vote No. 306 Leg.)

YEAS—68

Abdnor	Garn	Melcher
Andrews	Goldwater	Metzenbaum
Armstrong	Gorton	Mitchell
Baker	Grassley	Murkowski
Bentsen	Hatch	Nickles
Boren	Hawkins	Nunn
Boschwitz	Hayakawa	Pressler
Brady	Hefflin	Quayle
Burdick	Heinz	Randolph
Byrd	Helms	Rudman
Harry F., Jr.	Hollings	Sasser
Byrd, Robert C.	Humphrey	Schmitt
Cannon	Jackson	Simpson
Chiles	Jepson	Specter
Cochran	Johnston	Stafford
Cohen	Kassebaum	Stennis
D'Amato	Kasten	Stevens
DeConcini	Laxalt	Symms
Denton	Levin	Thurmond
Dole	Long	Tower
Domenici	Lugar	Wallop
East	Mattingly	Warner
Exon	McClure	Zorinsky

NAYS—28

Baucus	Ford	Packwood
Biden	Glenn	Pell
Bradley	Hart	Percy
Bumpers	Hatfield	Proxmire
Chafee	Inouye	Pryor
Cranston	Kennedy	Riegle
Danforth	Leahy	Tsongas
Dixon	Mathias	Weicker
Durenberger	Matsunaga	
Eagleton	Moynihan	

NOT VOTING—4

Dodd	Roth
Huddleston	Sarbanes

So Mr. SYMMS' amendment (No. 2020) was agreed to.

Mr. HELMS. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. SYMMS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The Senator from Oregon.

Mr. HATFIELD. Mr. President, under our unanimous-consent agreement reached last night, we have two more amendments pending on this chapter, one by Senator PERCY, and two others, one by Senator MATTINGLY and one by Senator MOYNIHAN.

Mr. BUMPERS. Will the distinguished floor manager yield?

Mr. HATFIELD. Yes, I yield.

Mr. BUMPERS. What is the agreement as far as the rest of the bill goes?

Mr. HATFIELD. There are no agreements on the other chapters pending. The only agreement we had was on chapter VI dealing with foreign operations.

Mr. BUMPERS. Under the existing agreement, we must go to the next two amendments, is that correct?

Mr. HATFIELD. That is correct.

Mr. BUMPERS. But after that, it is a la carte?

Mr. HART. That is correct. We do have a list of Members, and we are

trying to maintain some equality between both sides on Senators offering amendments. If the Senator from Arkansas wishes to be on the list, we shall be happy to put him on.

Mr. BUMPERS. Only to this extent: I apologize to my colleagues and my constituents for not being here during the debate on the amendment we just adopted. I wanted some time, maybe 5 minutes, to engage the sponsor of the amendment in a colloquy on its meaning.

Mr. HATFIELD. I shall be happy to accommodate the Senator.

Mr. BUMPERS. I thank the Senator.

Mr. HATFIELD. Mr. President, I noticed with some interest and concern an article in this morning's Post which stated, in part:

The major "must" item in the measure is funds to cover the military and civilian government pay raises that have been paid since last October. But Senate sources said the money is not needed until late next month...

Mr. President, I do not know who these unnamed Senate sources might be, but I trust they are not associated with the Appropriations Committee. It is our understanding that the pay supplemental in this measure is urgently required, particularly for the military. In that regard, I ask unanimous consent that a letter to Senator STEVENS, chairman of the Defense Subcommittee, from Secretary of the Army John Marsh be printed in the RECORD at the conclusion of my remarks. I emphasize for my colleagues that the Secretary informs us that the pay supplemental is required by August 20 in order to pay the troops beyond that date.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

SECRETARY OF THE ARMY,
Washington, D.C., July 16, 1982.

Hon. TED STEVENS,
Chairman, Subcommittee on Defense, Committee on Appropriations, U.S. Senate,
Washington, D.C.

DEAR MR. CHAIRMAN: As you know, the funds we have requested in the 1982 Supplementals are essential to our continued operation for the rest of this fiscal year. This is especially true in military pay accounts where the supplemental funds required are so great that we really cannot absorb them. We have just completed a comprehensive review of our military pay accounts which shows that the funds to pay our soldiers—Active, National Guard and Reserve—will be exhausted in the 20 August timeframe. Unless legislation is provided, we cannot continue to pay our troops after that date. From the Department's perspective, the best course of action would be passage of the supplementals in their full amounts. This would not only resolve our fiscal dilemma but also provide a clear signal of Congressional support to our soldiers and their families around the world.

If, for some reason, the supplemental could not be enacted before 20 August, we would need special Congressional action to pay our troops. Some piece of legislation that is signed into law must contain a provi-

sion to allow us to obligate and disburse funds for the increases in pay and personnel entitlements in anticipation of the supplementals. Since we would still require the approval of our supplemental requests, this approach would appear to add to the already heavy Congressional workload.

We are absolutely committed to continuing to pay our military personnel in an orderly fashion. While we recognize the issue must be resolved in the context of overall defense funding, we feel that we cannot lose sight of the fact that the issue touches all of our people and our credibility with them. We appreciate the assistance and support that you and your committee have given us in the past. We solicit your backing for the enactment of the supplementals before our current funds are exhausted.

An identical letter is being sent to the Chairman, Subcommittee on Defense, Committee on Appropriations, House of Representatives. If I or members of my staff can assist further in this process, please let me know.

Sincerely,

JOHN O. MARSH, JR.

Mr. HATFIELD. Mr. President, I only add that over 80 percent of this supplemental has immediate outlay requirements for this current fiscal year.

Mr. PROXMIRE. Will the Senator yield?

Mr. HATFIELD. I yield.

Mr. PROXMIRE. I support the manager of the bill. He is absolutely correct. I do not know, either, who in this Congress indicated to the Washington Post that the funds included in this bill would not be needed until late next month, but if we wait that long to act on it, only 10 or 15 days will remain in the fiscal year. As I indicated in my opening statement on Friday; and as the manager just said, 82 percent of the money in the bill will be spent in the next 2 months. That is \$7.4 billion, most of which will be needed for the military.

Anyone who thinks that the Defense Department is being shortchanged by this bill, incidentally, should understand that 57 percent of the budget authority contained in the bill as reported by the Senate Appropriations Committee goes to the Defense Department. To be more precise, of the total budget authority of \$8.98 billion in the bill as reported, \$5.72 billion will be dedicated to our national defense.

The table in question also indicates that the bill is below the Appropriations Committee's allocation under the budget resolution by \$8.7 billion in budget authority and \$1.3 billion in outlays. However, further economies can and, hopefully, will be made, either on this floor or when we go to conference. For example, I believe we should strike the \$355 million the committee added to the bill for the Caribbean Basin Initiative.

Given the state of the Nation's economy, particularly the history-making budget deficits everyone agrees we are facing in fiscal year 1982 and beyond, I particularly hope that my colleagues

will restrain the impulse to add money to the bill as reported. Although many worthy programs are short of funds, nothing could be more devastating to the health of our economy than an orgy of budget add-ons at this point in time. The bill, as reported, is a good one in most respects and we should do our best to cut, not add to, the totals recommended by the Appropriations Committee.

I ask unanimous consent that a table on the back of the committee report headed Budgetary Impact of H.R. 6863, showing how much of this fund will be needed over the next 2 months, be printed in the RECORD at this point.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

BUDGETARY IMPACT OF H.R. 6863

(In millions of dollars)

	Budget authority		Outlays	
	Remain- ing	In bill	Remain- ing	In bill
Comparison of amounts in the bill with the amount remaining under the revised budget resolution for 1982		8,979		7,404
Scoring impact	10,743	12,001	1,987	1,672
Projections of outlays associated with budget authority recommended in the bill:				
1982				7,404
1983				1,304
1984				232
1985				61
1986 and future year				5
Financial assistance to State and local governments for 1982 in the bill		348		13

¹ Adjusted for mandatory amounts in bill already counted in amount remaining under revised budget resolution.

Prepared by the Congressional Budget Office Pursuant to sec. 308(a), Public Law 93-344.

Mr. HATFIELD. I thank the Senator.

Mr. PERCY addressed the Chair.

The PRESIDING OFFICER. The Senator from Illinois.

Mr. PERCY. Mr. President, I advise all Senators that it is possible we would have a rollcall vote very quickly on the amendment that I will offer.

UP AMENDMENT NO. 1206

Mr. PERCY. Mr. President, I send to the desk an amendment that I discussed in some detail last night and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Illinois (Mr. PERCY) proposes an unprinted amendment numbered 1206.

Mr. PERCY. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HELMS. Mr. President, I believe we should have the amendment read, if the Senator does not object.

The PRESIDING OFFICER. Will the Senator from North Carolina repeat that? The Chair did not hear the Senator without his microphone.

Mr. HELMS. I apologize to the Chair.

If the Senator from Illinois, my good friend, would not mind, I would like to have the amendment read by the clerk.

Mr. PERCY. It might take 10 minutes, but certainly if the Senator wishes it read, I would be happy to have it read. I could summarize it in 2 minutes.

Mr. HELMS. Let us have a bit of it so we get the flavor.

Mr. PERCY. My concern is I am not sure how many are listening anyway, but if the Senator would like it read, I have no objection at all.

The PRESIDING OFFICER. The clerk will report.

Mr. HELMS. I thank the Senator.

The assistant legislative clerk read as follows:

On page 31, strike lines 15 to 19 and insert in lieu thereof the following:

"be available only for Jamaica: *Provided*, That none of the funds appropriated for this purpose may be obligated until September 15, 1982, or until the enactment of authorizing legislation, whichever comes first. The Senate reaffirms that it is the policy of the United States in the Western Hemisphere, in cooperation with all like-minded states, and in accordance with the obligations under the Inter-American Treaty of Reciprocal Assistance, the Charter of the Organization of American States, the Additional Protocols to the Treaty for the Prohibition of Nuclear Weapons in Latin America, the North Atlantic Treaty, and the United Nations Charter,

To support—
the principles of non-intervention in the affairs of nations of this hemisphere by external powers which have been historically defended under the Monroe Doctrine;

the peaceful resolution of disputes between states and of conflicts within states;

the right of individual and collective self-defense consistent with the Charter of the United Nations;

the self-determination of the peoples of all states—

Mr. HELMS. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SYMMS. Mr. President, reserving the right to object on that, I make a parliamentary inquiry. I ask the question to the distinguished chairman of the Foreign Relations Committee, this says: "On page 31, strike lines 15 to 19." Is the Senator not amending something that has already been amended in the bill?

Mr. PERCY. The procedure that I had outlined has been checked with the Parliamentarian. The Parliamentarian assures me that this procedure is the only way that it can be done now and is perfectly acceptable so far

as parliamentary procedures are concerned.

Mr. SYMMS. I thank the Chair. I reserve a point of order.

The PRESIDING OFFICER. Does the Senator from Idaho object to the reading being dispensed with?

Mr. SYMMS. No; I withdraw my objection. I reserve a point of order on the amendment.

The amendment is as follows:

On page 31, strike lines 15 to 19 and insert in lieu thereof the following:

"be available only for Jamaica: *Provided*, That none of the funds appropriated for this purpose may be obligated until September 15, 1982, or until the enactment of authorizing legislation, whichever comes first. The Senate reaffirms that it is the policy of the United States in the Western Hemisphere, in cooperation with all like-minded states, and in accordance with the obligations under the Inter-American Treaty of Reciprocal Assistance, the Charter of the Organization of American States, the Additional Protocols to the Treaty for the Prohibition of Nuclear Weapons in Latin America, the North Atlantic Treaty, and the United Nations Charter,

To support—
the principles of non-intervention in the affairs of nations of this hemisphere by external powers which have been historically defended under the Monroe Doctrine;

the peaceful resolution of disputes between states and of conflicts within states;

the right of individual and collective self-defense consistent with the Charter of the United Nations;

the self-determination of the peoples of all states and territories in the hemisphere by means of democratic, internationally respected procedures which allow for fair and reasonable participation by all political groups;

the economic development of all countries and regions of the hemisphere by expanding opportunities for trade and investment, providing reasonable assistance, promoting individual initiatives, and broadening the opportunities for all persons to share in the benefits of such development;

the human rights of all people in the hemisphere, especially the rights to political expression and participation and to be free from officially sponsored or other acts of terrorism, preemptory judicial or extra-legal proceedings, and cruel or excessive punishment;

the control and reduction of conventional armaments into and within the hemisphere; reasonable and humane standards and procedures for the temporary and permanent movement of people within the hemisphere; and

To oppose—
the threat or use of force by any state within or outside the hemisphere against the territorial integrity or political independence of any state or territory within the hemisphere in violation of the Charter of the United Nations;

the acquisition of territory or resources within the hemisphere by the threat or use of force;

the establishment of military bases or other hostile, unprovoked military presence in the hemisphere by states outside the hemisphere in contravention of the historic policy of the United States to resist external interference into the affairs of the hemisphere; and

the development or acquisition of nuclear weapons by any other state in the hemi-

sphere, the stationing of nuclear weapons in any state or territory within the hemisphere by a state outside the hemisphere, or the threat or use of nuclear weapons by any state within or outside the hemisphere against any state or territory within the hemisphere: Now, therefore, be it

Declared by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. That the United States reaffirms its longstanding determination—

(a) to prevent in Cuba the stationing of nuclear weapons by the Soviet Union, the development or acquisition of nuclear weapons, or any other externally supported military capability endangering the security of the United States;

(b) to resist efforts by Cuba to extend its Marxist-Leninist ideology or political system in the hemisphere by force or the threat of force in violation of the Charter of the United Nations;

(c) to pursue any diplomatic opportunity, including those afforded by the Organization of American States, with a reasonable prospect of leading to the reduction of aggressive or subversive activities by Cuba or any other state in the hemisphere; and

(d) to work through the Organization of American States and with peoples throughout the hemisphere to achieve peaceful and democratic self-determination in Cuba and in all states and territories of the hemisphere.

SEC. 2. Nothing in this Act shall be deemed to change or otherwise affect the standards and procedures provided in the National Security Act of 1947, as amended, the Foreign Assistance Act of 1961, as amended and the War Powers Resolution of 1973. This Act does not constitute the specific statutory authorization for introduction of United States Armed Forces contemplated in sections 2(c) or 8(a) of the War Powers Resolution. Consideration of such extraordinary measures must include the required consultations by the President with the Congress in light of the particular future circumstances and possible justifications for any such action.

MILITARY ASSISTANCE PROGRAM

For an additional amount for necessary expenses to carry out the provisions of section 503 of the Foreign Assistance Act of 1961, \$16,987,999, to remain available for—

The PRESIDING OFFICER. The Senator from Illinois.

Mr. PERCY. Mr. President, I had hoped to offer my amendment as a substitute to the Symms amendment, but the parliamentary situation precluded that. As a result, I have drafted this amendment to supersede the Symms amendment. The Senate has voted to support what appears to be a very attractive amendment by Senator Symms. It is a restatement of the Monroe Doctrine and current law passed in 1962.

Furthermore, it is very tough on Cuba. I can certainly understand why a majority of my colleagues voted for it. There is one fundamental problem with the Symms resolution which I ask all of my colleagues to consider. This was a problem that was considered by the Foreign Relations Committee in the many hearings held on this subject, in hours of deliberation,

and that resulted in a resolution, the substance of which is the amendment that I have offered. It was adopted by the Foreign Relations Committee by a vote of 14 to 1. That was after months of consideration by the committee.

The problem that we discovered and that I wish to point out now to my colleagues is that the Symms resolution might be considered a Gulf of Tonkin resolution for Cuba. The Symms resolution states that the United States is "determined to prevent by whatever means may be necessary, including the use of arms, the Marxist-Leninist regime in Cuba from extending by force or the threat of force its aggressive or subversive activities to any part of this hemisphere."

This language may be interpreted as an authorization for the use of U.S. Armed Forces against Cuba. The Symms resolution has no reference in it to the 1973 War Powers Resolution. Since we would be reenacting this 1962 provision after passage of the war powers resolution, there might be a serious legal question as to whether this amendment constitutes the congressional authorization required under the War Powers Resolution.

Certainly if Senator Javits, one of the coauthors of the War Powers Act, were here, he would have argued strongly with the committee on this step being taken by the Congress today.

We might look back, not knowing what can happen in our hemisphere and under what conditions—just take into account the Falkland Islands and what happened down there—a year ago would anyone had envisioned that kind of action. But what if some kind of action were taken? The law would stand that the President of the United States would resist with any means necessary, including the force of arms, any spread of a Marxist-Leninist philosophy anywhere, to any part of the hemisphere.

I think those decisions should be subject to the War Powers Act which we debated for over a year, and we finally overrode the Presidential veto. We felt strongly that the Constitution of the United States gives the power to the Congress and only to the Congress to make war. The problem is we have had a series of wars through the years, the Korean war, the Vietnamese war, other wars where no war has been declared. We make war but we do not declare it. That is a clear evasion of the intent of the Constitution.

I also point out that Senator STENNIS, who was chairman of the Armed Services Committee and the coauthor of the War Powers Act, voted to table the Symms amendment last night. No one could accuse Senator STENNIS of ever being soft on communism. No one is going to attack him in Mississippi for not standing up against a Communist threat. But Senator STENNIS has

great respect for what this Congress did. They passed a War Powers Act, and we decided only the Congress has the power to send troops into combat.

That is why the Senate Foreign Relations Committee almost unanimously, with one exception, was very concerned about the precedent that we might set in reenacting into law a provision passed in 1962 at the time of the Cuban missile crisis when the security of the United States of America was at stake. Then, in 1962, we spoke strongly and we spoke with force. Then subsequent to that, we enacted the War Powers Act.

Let me just read one paragraph of the Foreign Relations Committee report relating to this problem:

With an open-ended mandate to use force such as is provided in the language of the 1962 Cuban resolution, the President will be much less inclined to consider congressional and public sensitivities in any given set of circumstances. Thus Congress will have foregone one of the principal virtues of the war powers framework, an insistence on case-by-case consultation which assures that congressional input into such decisions will be keyed to particular circumstances and not provided in general terms once and for all.

Let me take a very practical case, and I hope that a number of the Members of this body or their staffs are listening to this, because if they vote on this blindly they are going to regret it, just as many regretted the Gulf of Tonkin Resolution that was overwhelmingly passed without consideration and thought and then followed by 10 years in which many regretted the blank check given to the President of the United States.

Just think what would have happened if we had passed a resolution of this kind and just took out the Western Hemisphere and substituted the Middle East—allowing the President, with force of arms, to resist any aggressive actions in the Middle East. Certainly, he would have been empowered to send 1,000, 2,000, 5,000, 10,000 troops into Lebanon now. Would Congress have allowed that? Absolutely not.

Look at the sensitivity that came from the entire United States when the President just mentioned that we may send 800 or 1,000 troops there.

Look at the conditions that have been laid down in conversations with the President. Look at the conditions the President has accepted to make certain that we were not involving ourselves unnecessarily and exposing American Forces unnecessarily, or without great thought ahead of time.

Mr. BIDEN. Mr. President, will the Senator yield for a question?

Mr. PERCY. I yield.

Mr. BIDEN. I wonder whether the Senator will agree with me. If we want to be tough—we are all tough guys and tough women around here, in the Senate—and if we are going to show

everybody how strong we are, I am thinking of a different amendment. Instead of having "Cuba" in it, let us have "Russia" in it. If we want to be tough, let us get tough with the big guys. Let us be hardnosed about this. Let us put in there "to prevent Russia from stationing nuclear weapons anywhere outside their territory." Let us talk about resisting efforts by "Russia" to extend its Marxist-Leninist ideology and political system, and so forth.

If we want to get tough, let us get tough; but if we want to be practical, let us be practical. Let us understand that what the Senator from Illinois is saying is accurate.

The fact is, do we want to say to the President of the United States: "When you feel like it, you go ahead and send troops, go ahead and make the decision"? I thought we went through a decade of debate on that issue, which fundamentally shifted or clarified the relationship between the President and the legislative branch on the question of whether or not and under what circumstances troops could be committed.

We are all a bunch of weak-kneed folks around here, running around in an election year, whether it is constitutional amendments or Cuba, talking about how we are going to be so tough.

The fact is that what the Senator from Illinois is saying is accurate. We are not changing our policy. We are not coming along and suggesting that we encourage Cuba to move out. That is not the issue—Cuba. The issue is whether or not and under what circumstances the President has what authority.

Again, if we want to show our resolve, why do not any of the folks around here ever get tough with Russia in Poland? We get tough with the Poles. Why do we not get tough with Russia? In the Middle East. In the Far East.

I do not see my colleagues standing up and wanting to declare war. If we want to get really tough let us pick on the guy who is causing the problems. Let us go after the big guy. Let us not fool around. Let us pick on somebody our own size. Let us show the American people our resolve.

As some of us in this Chamber say, the train has already left the station, and hysteria has set in, and we are all rushing to show that we are tough.

The Senator from Illinois is dead right: If you can strip away the emotion and look at what we are talking about here, we are talking about whether or not the President of the United States has the authority, on his own, to decide to send troops.

In 1984, if I am fortunate enough to be a candidate for reelection to the U.S. Senate from Delaware, if my opponent, whoever he or she is, comes to

me about how BIDEN is soft on Cuba, I will ask him or her did they want to send troops to El Salvador—did they vote at that time or would they have supported at that time the sending of troops? Some here would. Some are straightforward about it.

I do not suggest that everyone here is doing this purely for political reasons, but I know that many of us are. I know that some of us are afraid to stand up on this thing.

Think of this—and I am also speaking to those who are listening in their offices: On the merits, the Senator from Illinois is correct. But beyond all the politics, that may not be as good as some think it is, because the down side of this, the other side of this, is that the people who vote for this may be opposed on the ground that they voted to send American men to Latin America to shed their blood, when, if you look at those polls, the overwhelming number of American people are not really crazy about that. The politics of voting for being a tough guy or a tough woman in this Chamber at this time is not all "up."

As I said, one of these days we may decide to get tough with the outfit that is the one we have the most to worry about. The only problem there is that that may be a nuclear holocaust, but that is another question.

Mr. KASTEN addressed the Chair.

Mr. PERCY. I have the floor, and I should like to respond.

I should like to respond to two points made by my distinguished colleague, a valued member of the Foreign Relations Committee, who sat there for the hours and hours of debate we had.

He will recall very vividly our substituting, as he has today, other words for it—Russia. Would anyone want to give a blank check to the President, any President—I do not care who the President is—a blank check that would have existed, so that Jimmy Carter, as President of the United States, could have sent troops ahead of time, with authorization of Congress, into Afghanistan? A blank check that would have allowed any President to send troops into Ethiopia, to send them into any other areas, such as Angola, where the Soviet Union has taken the Marxist-Leninist philosophy? Anyplace in the world?

What are we doing? I can remember very vividly that though I never spoke personally against my beloved colleague and former professor, Paul Douglas, on issues, we had one big issue. He was a hawk. He was defending the Vietnam war in a State where that war was not becoming very popular in 1966, after the Gulf of Tonkin Resolution of 1964, for which he voted.

It was not a very good thing. It appeared that it was starting to turn sour. It was costing a lot of American

lives. It was not in our own national security interests at that particular time. Yet, for 10 years we struggled with it.

What did Congress do? They abdicated their responsibility.

We had the benefit of the War Powers Act, through the wisdom of Senator Javits and Senator STENNIS, who for months worked over it and honed it to bring back to the U.S. Congress the constitutional authority given it by the Framers of the Constitution. The only trouble is they used the words "declare war"; and, as Senator STENNIS has aptly pointed out many times on this floor, it is now out of style to declare war. No one declares war anymore. You just make war.

I do not know of a declaration of war by Israel on Lebanon, but they are at war. Ask anyone on the ground there or any place whether a war is going on. Yet, it is not a declared war as such. We, ourselves, have not declared wars. We have gone to war. We have sent machines and troops.

Therefore, all we are talking about is not only politics. Those up for election in 1982 or 1984 or 1986 should remind themselves that someone may attack them for the blank check and the abdication of responsibility and the fact that they did not really read the bill that they just passed this morning. How many actually read every word of that bill? Not too many, probably. How many really thought through the implications of that authority? How many thought through the committee principle? I do not pretend to read every word of every bill that comes along. I have a lot of confidence in the committee system. That really works through the years. That committee and staff have poured over the bill.

When we come out with a committee report, 14 to 1, overwhelmingly, after debating this issue, after holding hearings on this issue, for the Senate then, at 9 o'clock at night, to override it by a 2-to-1 vote—I am beginning to think that not a lot of them thought it all the way through.

That is why this debate this morning is an important debate because this debate will be heard years from now if we pass this and give a blank check to go anyplace anytime with the Armed Forces of the United States without the advice and consent of Congress anytime Marxist-Leninist philosophy is introduced by Cuba into some area.

I wish to ask my colleagues this question: Do they intend to enact what may be interpreted as the Gulf of Tonkin resolution for Cuba in the absence of a crisis similar to the Cuban missile crisis which served on the occasion for this original resolution in 1962?

I do not believe that the Senate intends to take such action today.

Mr. PELL. Mr. President, will the Senator yield?

Mr. PERCY. I am happy to yield to my distinguished colleague, the ranking minority member of the Foreign Relations Committee, who sat throughout the debate and in hearings and deliberations that we had in our committee on the Symms amendment.

Mr. PELL. Mr. President, I thank my colleague from Illinois and I am very glad to support his measure. It is basically a modification of an amendment that passed through our committee, as has been pointed out, in a 14-to-1 vote. The original measure was fuller. It contained a portion on El Salvador. But the Senator from Illinois has dropped that portion in order that we may focus on the question of Cuba which is what we are concerned with at this time.

I think we should bear in mind, also, that this measure reinforces the War Powers Resolution by making it clear that the policy in this resolution does not—I repeat does not—legally constitute an authorization for the use of force under the War Powers Resolution.

The President has a clear obligation under the War Powers Act to consult with Congress prior to any future decision to commit combat forces. Without this, we really are giving a kind of blank check.

I remember the time of the Gulf of Tonkin there were only two of us, and I regret to say I was not one, who had the gumption to vote against that resolution. Both of those were later defeated, I hope not because of that.

But we did not see the danger that was in that resolution at the time. I think that, by the same token, in the measure that we passed last night we give kind of a blank check, a Tonkin Gulf kind of check for similar actions in escalations in the future. I hope that the Senate and my colleagues will take the opportunity of this amendment offered by the Senator from Illinois and vote for it.

Mr. PERCY. I thank my distinguished colleague. I did mention earlier in my remarks that if they vote for this amendment they would be voting in a way consistent with what I very strongly believe Senator Javits would have urged us.

I was very pleased, indeed, that Senator STENNIS last night voted to table the Symms amendment because of his concerns about the War Powers Act.

Just as my distinguished colleague has read some of the language from the resolution, I urge every single Senator and I urge staff to bring to the attention of the Members of this body that, before a vote is cast, that they take 3 or 4 minutes to simply read the resolution that was crafted over a period of weeks and months by the Foreign Relations Committee. I would

deem that probably not 10 Senators beyond the Foreign Relations Committee have yet read this amendment. It is before us. It would have been brought up in due time because it has been voted out overwhelmingly by the committee. This seemed an appropriate time to offer it simply because of the Symms amendment.

Let me turn to this amendment and review it for just a moment. In very many ways it is similar to the Symms amendment, which it would supersede.

It is a very tough policy statement against Cuban aggression. It reaffirms the Monroe Doctrine. Let me reiterate that again. It reaffirms the Monroe Doctrine and speaks in very tough language against Cuban aggression about which we all feel very strongly. It is a comprehensive statement of U.S. policy toward Cuba. It is a 1982 statement. It is not a 1962 statement. We have not turned back the clock two decades. We are now evaluating it in the light of today's circumstance and how this will be interpreted in the hemisphere.

Are we a paper tiger or not? What do we mean when we say we are going to resist with arms, military force, and personnel? When we say that in law and the President signs it, I can just imagine that Castro would take up the dare and do something that would fall within the province of law and then wonder whether the United States is going to follow its law and send troops, personnel, and armaments and beat down that attempt to infiltrate through aggressive tendencies.

We are not going to find a military solution to every problem and certainly not to political philosophy. We decided that years ago and we have the statement of the President of the United States who says that the Communist world is crumbling of its own weight. It is debt-ridden. It cannot produce enough food. Its system has broken down. It has dissension within its own ranks. It has a Romania that goes an independent foreign policy route. It has a Poland that is resisting every effort to suppress Solidarity and the union movement and the workers movement in Poland. There are cracks and chinks appearing all over that world.

We have not had to go in with American military forces. There are better ways to do this, more intelligent ways to do it and by challenging with force of arms; daring someone to do something, we are likely to provoke them to do it and call our bluff. Then, how do we look if we have a Gulf of Tonkin resolution, in effect authorizing the President to use force of arms, if he decides to either use them without our permission, and we have abdicated our responsibility; or if he uses them with the consequences that result and without our having had anything to do with it? How does it look?

Anyone who votes for that power is overriding the War Powers Act in the area of this world most sensitive to us, the entire Western Hemisphere.

Mr. PROXMIRE. Mr. President, will the Senator from Illinois yield very briefly?

Mr. PERCY. I am happy to yield.

Mr. PROXMIRE. May I say to my good friend—

The PRESIDING OFFICER. If the Senator will withhold, there is no control of time and the Senator from Illinois can only yield for a question.

Mr. PERCY. I yield for a question.

Mr. PROXMIRE. May I ask the Senator if he would not consider the fact that I voted with him last time against the Symms amendment? Would he not consider that we have a situation here where the great majority of Senators voted on the other side? My question is, is it not consistent for Senators who voted for the Symms amendment at this time to support the Percy amendment on the grounds that what the Percy amendment does is simply to provide Congress shall have a voice in determining whether or not we keep our troops in military action for a period of days which we have set forth before in the War Powers Act? In other words, what it does is defend the War Powers Act without rescinding much of what Senator SYMMS has persuaded the Senate to adopt; is that correct?

Mr. PERCY. Absolutely. That is why the amendment was crafted this way.

As the distinguished Senator from Rhode Island read into the record, the crux of the amendment, the amendment simply says that "nothing in this section shall be deemed to change or otherwise affect the standards and procedures provided in the National Security Act of 1947 as amended, the Foreign Assistance Act of 1961 as amended, and the War Powers Resolution of 1973."

In other words, we are reaffirming that. We are standing behind laws we have already passed. We are making eminently clear that the years of work done by Senator STENNIS and Senator JAVITS and others who worked with them on the War Powers Act is not being overridden summarily.

This section does not constitute the specific statutory authorization for introduction of U.S. Armed Forces contemplated in sections 2(c) or 8(a) of the War Powers Resolution. Consideration of such extraordinary measures must include the required consultations by the President with the Congress in light of the particular future circumstances and possible justifications for any such action.

Without that language, the blank check has been written. If the vote that passed this morning stands, it will be a source of embarrassment and concern every day, every night for every

Senator if something happens. And the control is placed in the hands of Castro. We placed in his hands the power to do something that would trigger the law authorizing the President to do something. Moreover, this is not a Percy amendment. I offered the amendment. It is the Foreign Relations Committee amendment sent to the floor with a vote of 14 to 1.

Mr. HATFIELD and Mr. HELMS addressed the Chair.

Mr. PERCY. I would like to make one last critical point, and that is the point raised by my distinguished colleague from Wisconsin, which I hope all of my colleagues will give serious consideration to.

Voting for the pending amendment, which is a modified version of the committee amendment passed 14 to 1, is not inconsistent with a vote for the Symms amendment.

Let me repeat that for the benefit of those listening. A vote for the Foreign Relations Committee amendment, the so-called Percy amendment, now before us is not a vote inconsistent with a vote for the Symms amendment.

In many ways it is quite consistent with a vote for the Symms amendment. By voting for the pending amendment a Senator can once again register his or her strong concerns about Cuban aggression in this hemisphere. We can also once again reaffirm the Monroe Doctrine, but you can do it without legislating a Gulf of Tonkin resolution for Cuba. You can do it by reaffirming that the law of this land is the War Powers Act in the most important single power given the Congress of the United States by the Constitution. We should be strict constructionists on the Constitution, but amplified with this change that the power to make war is the same as the power to declare war.

By letting the vote stand to give away that power, you override then the War Powers Act, and that is why Senator STENNIS, in his wisdom and with the deep background he has had and the study he gave to the issue, voted to table the Symms amendment.

We can have tough language against Cuba. We can reassert the Monroe Doctrine, but we also reenact the powers of the War Powers Act.

Mr. HATFIELD. Mr. President, will the Senator yield for a question?

The Senator indicated earlier he thought we could get to a vote on this rather soon.

I wonder if the Senator would consider, now that he has used up about 30 minutes to make his case, entering into a time agreement to provide 30 minutes for opposition comments, and then a 10-minute closing equally divided for those who may wish to make some remarks at the end? Would the

Senator be willing to enter into that kind of an agreement?

Mr. PERCY. Yes. I was quite willing to enter into an agreement of 10 minutes equally divided, but I thought we had to review the entire issue again.

Mr. HATFIELD. Yes.

Mr. PERCY. I would be happy to do that providing that at the conclusion, if any points need to be responded to, I would like to reserve 5 minutes.

Mr. HATFIELD. Yes.

TIME-LIMITATION AGREEMENT ON PERCY AMENDMENT

Mr. HATFIELD. Mr. President, I ask unanimous consent then to enter into a time agreement for 30 minutes to be allocated for those who would speak in opposition to the Percy amendment to be controlled by the Senator from Idaho (Mr. SYMMS) and for a 10-minute closing period to be equally divided between the proponents and the opponents.

The PRESIDING OFFICER (Mr. HUMPHREY). Is there objection? The Chair hears none, and it is so ordered.

Mr. HATFIELD. I thank the Senators for agreeing to the time limitation.

The PRESIDING OFFICER. The Senator from Idaho.

Mr. HELMS. Mr. President, will the Senator from Idaho yield to me briefly?

Mr. SYMMS. I yield to the Senator such time as he may consume.

Mr. HELMS. Mr. President, I thank the able Senator.

I want to join my distinguished chairman and my good friend from Illinois, Mr. PERCY, in urging Senators who may be near their loudspeakers in their offices or their staff members to listen to what I am about to say.

Mr. President, do you know what the amendment of Senator PERCY proposes to do? It proposes to overrule the President of the United States who supports the Symms amendment. It proposes to overrule the Secretary of State, Mr. Shultz, with whom I have just talked, who supports the Symms amendment. What the Percy amendment now pending will do is to wipe out the approval of the Symms amendment which the Senate has just voted by more than two to one.

Who voted for the Symms amendment, Mr. President? Sixty-nine Senators voted for it; 27 against. Senator STENNIS, whom I revere, as does my friend from Illinois, voted for the Symms amendment. The majority leader of the Senate, Mr. BAKER, voted for the Symms amendment. The minority leader of the Senate, Mr. ROBERT C. BYRD, of West Virginia, voted for the Symms amendment. The able assistant majority leader, Mr. STEVENS, voted for the Symms amendment. Mr. LUGAR, a member of the Foreign Relations Committee, voted for the Symms amendment. Senator BAKER, of course, is also a member of

the Foreign Relations Committee, the ranking member.

Senator BOSCHWITZ voted for the Symms amendment. Senator HAYAKAWA voted for the Symms amendment. Senator KASSEBAUM—

Mr. PERCY. Mr. President, will the distinguished Senator yield on my time for just 30 seconds?

Mr. HELMS. Certainly.

Mr. PERCY. I would like to add one more vote in there. Senator STENNIS voted to table the Symms amendment, this morning he voted for the Symms amendment. Senator STENNIS intends to vote for the Foreign Relations Committee amendment, the so-called Percy amendment, because it is not, in his judgment, inconsistent. He just wants to make absolutely certain the war powers provision is protected.

Mr. HELMS. I will say to the Senator from Illinois that my friend and his friend from Mississippi is capable of making up his mind, and if he understands that what the amendment of the Senator from Illinois will do is wipe out the Symms amendment just approved by the Senate, fine, let the Senator from Mississippi vote that way. I will continue to respect him, but I will not understand such an up-and-down vote.

Now, let me reiterate, I have just talked to Mr. Shultz, the Secretary of State, and he says, "We are in favor of the Symms amendment."

So who does that leave against it? That leaves Mr. BAUCUS, Mr. BIDEN, Mr. BRADLEY, Mr. BUMPERS, Mr. CHAFEE, Mr. CRANSTON, Mr. DANFORTH, Mr. DIXON, Mr. DURENBERGER, Mr. EAGLETON, Mr. FORD, Mr. GLENN, Mr. HART, Mr. HATFIELD, Mr. INOUE, Mr. KENNEDY, Mr. LEAHY, Mr. MATHIAS, Mr. MATSUNAGA, Mr. PACKWOOD, Mr. PELL, Mr. PERCY, Mr. PROXMIER, Mr. PRYOR, Mr. RIEGLE, Mr. TSONGAS, and Mr. WEICKER.

Let the loudspeakers proclaim so that the Senators or their staffs who may be listening to this debate can hear that what Senator PERCY would do would be to wipe away the Symms amendment, period, end of paragraph.

I have the most respect in the world for my distinguished chairman, but let us engage in no obfuscation. What we will be doing if we do not table the Percy amendment—and a motion in that connection will be made—is, we will be backing away from the Monroe Doctrine, we will be backing away from the position of the President of the United States, the Secretary of State, the chairman of the Senate Armed Services Committee, and the ranking minority member of the Senate Armed Services Committee.

There have been some confusing statements made about the War Powers Act, Mr. President. The War Powers Act allows the President—any President—to send troops for 60 days without the approval of Congress, so it

is not an act of declaring war for this Senate to say, as it has said, "We believe in the Monroe Doctrine and we are going to stop pussyfooting around. We are not starting any war, but it is time that America started acting like America again."

I put in the RECORD just a little while ago, Mr. President, the results of all of the efforts by the distinguished previous President of the United States, Mr. Carter, to appease Mr. Castro, as summarized by the very distinguished and able Under Secretary of Defense, Dr. Fred C. Ikle. And just so it will be clear, I ask unanimous consent that the series of questions and answers between the Senator from North Carolina and Dr. Ikle be printed in the RECORD again at this point.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

Senator HELMS. It has been suggested that Fidel Castro is merely reacting to the hostility displayed by the United States, and that a more moderate and flexible U.S. policy might give him an alternative to relying almost exclusively on Moscow. Do you find any merit in this reasoning?

Mr. IKLE. I think that question is adequately answered by Castro's actions in response to varying U.S. policy shifts during the past six years under several Administrations. You will recall that about six years ago Cuban military forces were just beginning their military buildup in Angola. President Ford and Secretary of State Kissinger made strong public statements that the United States would not tolerate such conduct, and for a period of time in December 1975, the Soviet airlift of Cuban troops and equipment to Angola was halted. Then the Congress passed the Tunney/Clark Amendment, tying the President's hands by prohibiting further assistance to the non-communist elements in Angola. The Soviet-Cuban airlift resumed immediately, and within two weeks the number of Cuban troops in Angola had doubled. It continued to increase gradually in the following year, so that at the end of the Ford Administration there were estimated to be about 14,000 Cubans in Angola.

President Carter's Administration took a more sympathetic approach to the Cuban problem, and made a significant effort to improve U.S. relations with the Castro government. For example, the Carter Administration:

Opened an "Interest section" in Havana, and permitted the Cuban Government to do the same in Washington.

Relaxed the travel restrictions on Cuban diplomats at the United Nations and in Washington.

Encouraged increased cultural exchanges between the two countries.

Lifted the restrictions on vessels which had previously called at Cuban ports allowing them to subsequently visit U.S. ports.

Lifted the ban on travel by U.S. citizens to Cuba.

Permitted the resumption of charter flights between Cuba and the United States.

It is worth recalling the response of Mr. Castro to these friendly overtures. During the Carter Administration, Cuba:

Increased the number of Cuban military personnel in Angola from about 14,000 to 20,000.

Increased the Cuban presence in Ethiopia from 0 to a height of 17,000 in 1978 and in Nicaragua from 0 to 500.

Initiated a massive effort to subvert non-communist regimes in Latin America. Cuba provided military assistance to Nicaragua to include advisors, weapons such as surface-to-air missiles, anti-aircraft guns and light arms. In the case of Grenada, Cuba provided advisors and anti-aircraft weapons and began construction of an airfield which would have military utility.

Denounced the United States at the summit meeting of the Non-Aligned Movement in Havana in September 1979. Castro charged that Latin America had historically suffered greatly from U.S. aggression, colonialism, and neo-colonialism.

These actions hardly support the contention that a more conciliatory approach by the United States to U.S.-Cuban relations will make Castro our friend.

The United States is not looking for a confrontation with Cuba. Nevertheless, we are unwilling to sit idly by while Fidel Castro and his Soviet bosses subvert and seek to overthrow the less powerful non-communist governments of the region. If Castro truly desires peace and improved relations with the United States, he should begin such a rapprochement by stopping his aggression and permit other states to live in peace. We assure you that a halt in Cuban efforts to subvert other countries would not go unnoticed by this Administration.

However, so long as Fidel Castro continues his aggressive policies in Latin America, Africa, and other regions of the world, we will continue to regard him as a serious threat to international peace and stability. We believe—and the history of the 1975 Tunney-Clark Amendment suggests—that the credibility of our deterrent rests in large part on Congressional attitudes; and thus the need to resort eventually to the use of U.S. military forces will be determined in part by Castro's perception of Congressional views. Unless the Congress is perceived to be supportive of the President's strategy, no U.S. action short of actual military force is likely to have much influence on Cuban policy.

Senator HELMS. What effect do you believe knowledge of the fact that the Joint Chiefs have contingency plans to meet Cuban aggression in the region will have on Cuban decisionmakers?

Mr. IKLE. Unfortunately, history demonstrates that peace is not furthered by failing to respond effectively to the threat or use of armed force. We believe it is important that Fidel Castro be put on notice that the United States is capable of responding to continued aggression with a wide range of flexible options aimed at making the costs of aggression and subversion greatly outweigh any perceived benefits.

If Mr. Castro wants to promote the security of Cuba, he should cease his efforts to undermine and overthrow the governments of other states. We hope that by alerting him to our deep concerns, and our strong commitment to the cause of freedom, he will appreciate the wisdom of ceasing his subversion of other states.

Mr. HELMS. Mr. President, I do not think we ought to take up very much more time. I think we ought to proceed and see whether the Senate is going to march up the hill and down

the hill and up the hill and down the hill. We ought to have a motion to table and see where we stand, whether it is halfway up the hill or halfway down the hill or on top of the hill, and be done with this. But let it be clear that the purpose, the intent of the Percy amendment, is to kill the Symms amendment. No other face could be put on it.

I thank the Senator for yielding.

Mr. SYMMS. I thank the Senator from North Carolina very much.

Mr. President, I just want to make one point. The distinguished chairman of the Foreign Relations Committee has made the point over and over again about the War Powers Act. I want to make the point very clear that the present law of the land is what is in the language in the Symms amendment and the State Department has so advised me that it is not inconsistent with the War Powers Act. Senator HELMS made that point.

The President of the United States can engage American troops for 60 days right now and he can do it if Senator PERCY's amendment is passed. But Senator PERCY's amendment, I regret to say, will be perceived, in my opinion, as a weakening of America's posture in the Caribbean Basin.

I think one of the reasons the administration supports my position is to reaffirm a strong, clear, concise picture of the United States so that we can go in with the Caribbean Basin Initiative and be successful.

The Symms amendment would reaffirm U.S. policy with regard to Cuba be reenacting verbatim an existing law (Cuba resolution, Public Law 87-733). Senator PERCY has proposed an amendment to the Symms resolution, specifying that nothing therein shall affect the standards and procedures of the War Powers Resolution or constitute a specific authorization for the introduction of U.S. Forces as contemplated by the War Powers Resolution. Senator PERCY contends that in the absence of his amendment enactment of the Symms amendment resolution might be construed as statutory authorization for the President to commit U.S. Forces in hostilities with Cuba without further action by the Congress. In this regard, the Symms resolution reiterates existing law, which states that the United States is determined:

to prevent by whatever means may be necessary, including the use of arms, the Marxist-Leninist regime in Cuba from introducing the forces or the threat of forces its aggressive or subversive activities to any part of this hemisphere. . . .

The Percy amendment is unnecessary. The Symms amendment could constitute authorization for President to introduce U.S. Forces only if it is so intended by Congress.

Section 8(a)(1) of the War Powers Resolution provides that such authority shall not be inferred from any provision of law unless such provision specifically authorizes such an introduction "and states that it is intended to constitute specific statutory authorization within the meaning of this joint resolution. . . ."

Legislative history of this requirement of War Powers Resolution makes clear it was intended to preclude reliance by President upon area resolutions—such as Cuba resolution—as authority to commit U.S. Forces to hostilities.

In 1970, more than 3 years before enactment of War Powers Resolution, Department of State advised SFRC that provisions of the Cuba resolution and other area resolutions were not considered as "evidence of congressional authorization have all acquiesced in any new military efforts"

In view of past executive branch interpretation and requirement of specificity in the War Powers Resolution, reenactment of Cuba resolution, as proposed by Symms amendment, could not be regarded as specific authorization for the President alone to introduce U.S. Forces into hostilities. Such authorization could be inferred only if Congress clearly manifested an intention to supersede War Powers Resolution. No such manifestation of intent has been indicated.

When this issue was considered by SFRC in April during the markup of the foreign assistance authorization bill, the Office of the Legal Adviser provided a memorandum to the committee reaching these same conclusions.

I ask unanimous consent that the memorandum be printed in the RECORD.

There being no objection, the memorandum was ordered to be printed in the RECORD, as follows:

MEMORANDUM—RELATIONSHIP OF THE WAR POWERS RESOLUTION TO THE SYMMS AMENDMENT TO S. 2179

Amendment No. 1334 to S. 2179 (the Symms Amendment) would reaffirm the policy of the Government of the United States in its relations with the Government of Cuba, as set forth in Senate Joint Resolution 230 of October 3, 1962 (the Cuban Resolution).¹ The question has been raised whether the enactment of the Symms Amendment, which would reenact the Cuban Resolution, would have any legal consequences with respect to the operation of House Joint Resolution 542 of November 7, 1973 (the War Powers Resolution).² For the reasons discussed below, it is the opinion of this Office that the enactment of the Symms Amendment would have no consequences for the operation of the War Powers Resolution.

¹ Public Law 87-733, 76 Stat. 697.

² Public Law 93-148, 87 Stat. 555.

The War Powers Resolution established a system for involving the Congress in decisions to use the Armed Forces of the United States in hostilities. The basic elements of this system are set forth in sections 3, 4 and 5 of the Resolution, concerning consultations with, reporting to and action by the Congress, respectively.

Section 3 of the War Powers Resolution provides that the President shall consult with Congress in every possible instance before introducing U.S. Armed Forces into hostilities or into situations where imminent involvement in hostilities is clearly indicated by the circumstances, and that he shall consult regularly following such an introduction. The operation of this section is not dependent upon any other legislation. Congress could, of course, enact exceptions to section 3 of the War Powers Resolution. However, no such exception, express or implied, is contained in the Symms Amendment.

Section 4 of the War Powers Resolution provides that the President must report in writing to Congress within 48 hours, and periodically thereafter, after U.S. Armed Forces are introduced into hostilities or into a situation where imminent involvement in hostilities is clearly indicated by the circumstances. Section 4 also requires a report when U.S. Armed Forces are introduced into foreign territory, waters or airspace while equipped for combat, with certain specified exceptions. According to section 4, these reporting requirements apply "in the absence of a declaration of war. . . ." No other type of legislation affects these reporting requirements under the terms of the War Powers Resolution. Obviously, the Symms Amendment does not constitute a declaration of war. Nor does it contain any express or implied exception to the reporting requirements of the War Powers Resolution.

Section 5 of the War Powers Resolution provides, with certain specified qualifications and exceptions not material to the present analysis, that U.S. Armed Forces introduced into hostilities or a situation of imminent hostilities must be withdrawn within 60 days unless Congress "has declared war or has enacted a specific authorization for such use of United States Armed Forces. . . ." Section 5 also provides that Congress may at any time compel the removal of U.S. Armed Forces from hostilities outside the United States in the absence of a declaration of war or specific statutory authorization.⁴

The War Powers Resolution provides (in section 6) for special, expedited procedures for bills or resolutions intended to provide a declaration of war or specific statutory authorization as described in section 5. These special procedures appear to contemplate that such legislation would normally be introduced after U.S. Armed Forces had been introduced into hostilities or situations of imminent hostilities. However, the War Powers Resolution does not preclude the enactment of a declaration of war or specific statutory authorization before U.S. Armed Forces are so introduced.

If a statute were enacted that constituted specific statutory authorization for the

President to use the U.S. Armed Forces in hostilities, section 5 of the War Powers Resolution would then cease to apply, according to its terms, with respect to the authorized activity. If U.S. Armed Forces were thereafter introduced into hostilities within the scope of the specific statutory authorization, the President would remain obliged to consult with Congress in accordance with section 3. He would also remain obliged to report to Congress in writing in accordance with section 4. However, the President would not be obliged to terminate the use of U.S. Armed Forces after 60 days and Congress would have no power to compel the removal of U.S. Armed Forces from hostilities by concurrent resolution under section 5.

Because the existence of specific statutory authorization would have the effect of superseding the limitations that would otherwise obtain under section 5 of the War Powers Resolution, it is necessary to consider whether the Symms Amendment would constitute such a specific statutory authorization.

An analysis of this question must begin with the rule of interpretation set out in section 8(a)(1) of the War Powers Resolution:

"Authority to introduce United States Armed Forces into hostilities or into situations wherein involvement in hostilities is clearly indicated by the circumstances shall not be inferred . . . from any provision of law (whether or not in effect before the date of enactment of this joint resolution) . . . unless such provision specifically authorizes the introduction of United States Armed Forces into hostilities or into such situations and states that it is intended to constitute specific statutory authorization within the meaning of this joint resolution. . . ."

The legislative history of this provision makes clear that it was intended to apply to area resolutions such as the Cuban Resolution. The Senate bill⁵ had provided that authority to introduce U.S. Armed Forces could not be inferred "from any provision of law hereinafter enacted" unless it met specificity requirements comparable to those contained in section 8(a)(1) as finally enacted, quoted above. The report of the Committee on Foreign Relations noted the existence of several area resolutions (including the Cuban Resolution) and expressed the intention that "any future area resolutions, to qualify under this bill as a grant of authority to introduce the armed forces in hostilities, or in [hostile] situations . . . must meet carefully drawn criteria—as spelled out in the language of [the bill]."⁶ In conference, the rule of interpretation was expanded to cover any provision of law "whether or not in effect before the enactment of this joint resolution." Thus, there can be no question that the War Powers Resolution precludes the interpretation of the Cuban Resolution as an authorization to introduce U.S. Armed Forces into hostilities or into situations of imminent involvement in hostilities. It is equally clear that the War Powers Resolution was intended to preclude such an interpretation of a future reenactment of any generally-worded resolution similar to the Cuban Resolution.

The interpretation of the Cuban Resolution by the Executive branch has been fully compatible with the interpretation thereof

that is now compelled by section 8(a)(1) of the War Powers Resolution. The Executive branch has consistently regarded the Cuban Resolution as a statement of policy toward Cuba, and not as an authorization for the President to take any particular action. It has never been relied upon as the legal basis for any action. Even President Kennedy's proclamation of October 23, 1962, on interdiction of the delivery of offensive weapons to Cuba⁷ relied upon the authority conferred upon the President "by the Constitution and statutes of the United States," and noted only that this action was "in accordance with" the Cuban Resolution. In 1970 the Department of State advised the Senate Committee on Foreign Relations that the Cuban Resolution and other area resolutions "contain significant recitals of basic principles of our policies in the affected areas" but that they were not considered as "evidence of Congressional authorization for or acquiescence in any new military efforts. . . ."

In view of the past interpretation of the Cuban Resolution by the Executive branch and the rule of interpretation specified in section 8(a)(1) of the War Powers Resolution, a reenactment of the Cuban Resolution, as proposed by the Symms Amendment, could not in itself be regarded as a specific authorization to introduce U.S. Armed Forces into hostilities or situations of imminent hostilities. Of course, the Congress is not bound by the War Powers Resolution to use a particular form of words in enacting a future statutory authorization. Congress could manifest its intent in some manner. However, Congress would certainly be presumed to have legislated with knowledge of the standards it had adopted in the War Powers Resolution and with knowledge of the hitherto consistent interpretation of the Cuban Resolution as a statement of policy rather than as statutory authority for military actions. Accordingly, in the absence of a very clear and unambiguous indication of Congressional intent to depart from these standards and this past interpretation, the enactment of the Symms Amendment could not be construed as a statutory authorization to do that which had not been authorized by the identically-worded Cuban Resolution.

For the foregoing reasons, we conclude that enactment of the Symms Amendment would have no effect upon the President's duties to consult with and report to the Congress under sections 3 and 4 of the War Powers Resolution or on the rights and duties of the President or the Congress under section 5 of the War Powers Resolution.

Mr. SYMMS. In my visits to El Salvador, every single troop commander in the Salvadoran Army, when I asked them the question of what they needed the most, in addition to the very, very simple equipment, like boots and 782 web gear and rifles and so forth, they said:

The one problem we have more than any other problem is the supply of the guerrillas, the continual supply coming into the country.

⁵ Proc. No. 3504, 27 Fed. Reg. 10401.

⁶ Letter from the Acting Assistant Secretary of State to the Chairman of the Committee on Foreign Relations dated Mar. 12, 1970.

⁴ Declarations of war have historically taken the form of joint resolutions of Congress. See e.g., 40 Stat. 1, 429 (1917); 55 Stat. 795, 796, 797, (1941); 56 Stat. 307 (1942).

⁵ This memorandum is limited in its scope to the consideration of issues of statutory interpretation. Accordingly, it does not address any constitutional issues with respect to the War Powers Resolution.

⁶ S. 440, 93d Cong., 1st Sess. (1973).

⁷ S. Rep. No. 220, 93d Cong., 1st Sess. (1973), pp. 23-24.

Where is it coming from? Coming from Cuba.

My good friend from Delaware makes the point about how we have to show we are tough guys. I do not think it would be that difficult for the United States to insist on stopping this flow of arms from Cuba to Nicaragua and on into El Salvador. It is a matter of us having the political courage to do it and the will to do it. It is not a matter of whether or not we have the military might and strength to do it. It is a question of whether we have the will.

If we back down the hill, as Senator HELMS pointed out, and only go halfway up on this vote, we are sending a clear signal: Go right ahead, Castro, just keep on sending all the guns and equipment you want, and we will just keep taking tax dollars and try to offset it.

That is not the right way to do it. We have to make a decision here. If we cannot control our destiny 90 miles off our own coast, how in the world can we control our destiny in the Far East, in the Middle East, in Europe, or wherever? How can we have an impact on it, Mr. President?

I would say it is very, very important, in my opinion, first, that Senators recognize that the Symms amendment that we have already voted on is not inconsistent with the War Powers Act. That has already been stated by Assistant Secretary Bosworth when he testified before the Foreign Relations Committee. He said that, in their opinion, the administration finds the resolution is consistent with our policy and we support it. The legal opinion is that it is not inconsistent with the War Powers Act.

Any change of this, as Senator HELMS has said, a vote for the Percy amendment will be wiping out what the Senate just did. I think that would be very difficult for all of us to explain why we went up the hill and then retreated back halfway back down the hill.

Mr. BUMBERS. Will the Senator yield for a question?

Mr. SYMMS. I am happy to yield for a question.

Mr. BUMBERS. Does the Senator consider this to be authority for the President to take any overt military action?

Mr. SYMMS. I would say to my good friend from Arkansas that it is.

Mr. BUMBERS. I am talking about the Senator's amendment which the Senate has just adopted.

Mr. SYMMS. The amendment only reasserts what the present authority of the President of the United States has right today as we are standing here, whether or not this amendment would have been passed by the Senate. It only reaffirms the 1962 language. It

is not inconsistent with the War Powers Act.

Mr. BUMBERS. Why is it necessary to reaffirm anything?

Mr. SYMMS. I think that the reason for it is because, as the 20-year period has gone by since that time, it seems that we have forgotten what President Kennedy's admonition to this country was: That if we cannot control what is happening right here in our front yard in Cuba 90 miles off of our coast—

Mr. BUMBERS. Why did the Senator's amendment not simply state that we reaffirm the language that was adopted in 1962?

Mr. SYMMS. That was what the Senator's amendment did, was simply reaffirm the language. I introduced the original language, with some 20 cosponsors, earlier this year and that is really what this amendment did.

Mr. President, I want to reserve the remainder of my time. How much time do I have remaining?

Mr. BUMBERS. Are we under a time agreement?

Mr. SYMMS. Yes.

The PRESIDING OFFICER. The Senator has 18 minutes and 24 seconds remaining.

Mr. SYMMS. Mr. President, did the Senator from South Carolina wish some time?

Mr. THURMOND. Will the Senator yield me a few minutes?

Mr. SYMMS. I yield to the Senator from South Carolina.

Mr. BIDEN. Parliamentary inquiry, Mr. President.

The PRESIDING OFFICER. Will the Senator from Idaho yield for a parliamentary inquiry?

Mr. SYMMS. I am happy to yield.

Mr. BIDEN. How is the time divided, and who controls the time?

The PRESIDING OFFICER. The Senator from Idaho controls 18 minutes, after which there will be 10 minutes equally divided between the Senators from Idaho and Illinois.

Mr. McCURE. Mr. President, parliamentary inquiry.

The PRESIDING OFFICER. Will the Senator from Idaho yield for a parliamentary inquiry?

Mr. SYMMS. I am happy to.

Mr. McCURE. Is it not correct that the Senator from Illinois has already consumed a portion of his 10 minutes?

The PRESIDING OFFICER. The Senator from Illinois has consumed 21 seconds of his 5 minutes.

Mr. McCURE. I thank the Chair.

Mr. THURMOND addressed the Chair.

The PRESIDING OFFICER. The Senator from South Carolina.

Mr. THURMOND. Mr. President, I rise in opposition to the Percy amendment. Last evening, the Senate went on record with a very strong vote endorsing the Symms amendment. The

Symms amendment is a strong statement of what I think our attitude should be toward Cuba. I brought out last night, in the few remarks I made, that Soviet military shipments to Cuba tripled in 1981 over 1980 and are increasing again this year, 1982. This places Russian military exports to Cuba at their highest level since 1962.

Also, Mr. President, I would remind the Senate that Soviet-made heavy bombers of the Tu-95 class, based west of Havana, fly reconnaissance missions along our very own Atlantic coast daily. Recently, a second squadron of Mig-23 ground attack fighters was uncrated in Cuba, and they are being manned by Soviet pilots. These intercontinental aircraft allow Castro to maintain an air force second only to the United States in the Western Hemisphere.

Mr. President, these are facts that I think caused the administration—this administration, the Reagan administration—to come out in favor of the Symms amendment. These are facts that have caused Secretary Shultz, the Secretary of State, the man primarily responsible for our foreign policy, to come out in favor of the Symms amendment.

Secretary Shultz told Senator HELMS today, this morning—within the last hour—that he favors the Symms amendment.

Mr. President, there is some talk that there is no conflict between the Symms amendment and the Percy amendment. The Percy amendment simply waters down the Symms amendment. I want the Senate to understand that. If they wish to water down the Symms amendment, vote for the Percy amendment. If they wish to stand for a strong policy against Cuba, then stand by the Symms amendment and vote against the Percy amendment. It is just that simple.

Mr. President, we know that Castro has exported his subversion in the past. Cuba has supplied arms to Nicaragua which has caused that country to come into the Communist orbit; Soviet arms went to Cuba and then went to Nicaragua; Cuba is now supplying arms to the rebels in El Salvador; Cuba is supplying arms to Honduras; Cuba is supplying arms to Guatemala—for what? To take away the freedom of the people in those countries.

When are we going to wake up? When are we going to understand the danger of Cuba? Cuba is the very epitome of the Soviet Union on a small scale. They are the agents of the Soviet. Their efforts are directed at trying to help the Soviets take over this continent.

I say, let us be firm, let us be resolved, and stand by the Symms amen-

dent and vote against the Percy amendment because that weakens the Symms amendment. I hope the Senate will see fit not to undo what they did last night. If they vote for the Percy amendment they will undo the Symms amendment. They will weaken the Symms amendment.

Let us do what the President wants. Let us do what the Secretary of State wants. Let us do what Judge Clark, who is head of the National Security Council wants. All of them favor the Symms amendment, and are not in favor of the Percy amendment. I hope the Senate will reject the Percy amendment.

The PRESIDING OFFICER. The Senator from Idaho has the floor.

Mr. SYMMS. I reserve the remainder of my time.

Mr. BIDEN addressed the Chair.

The PRESIDING OFFICER. Who yields time?

Mr. BIDEN. Will the Senator from Illinois yield me 1 minute?

Mr. PERCY. I am happy to yield.

Mr. BIDEN. I will only take 1 minute, in the interest of time. Let me summarize by making three points.

The Senator from Arkansas asked a very cogent question, Why the Symms amendment? I would suggest the reason why the Symms amendment is because obviously this is an indictment of the administration. If the administration is doing what they all say they want to do, the Senator from South Carolina and everybody else, they do not need this authority to make the statements and do what they want to do.

Second, I think this is all about El Salvador and not about Cuba.

The concern about the War Powers Act has already been raised. I have yet to hear anybody tell me what in the Percy amendment, specifically what language, they disagree with.

In terms of what is covered and not covered, the Percy language covers the stationing of nuclear weapons. I do not see any reference to that in the Symms language.

The PRESIDING OFFICER. The Senator's 1 minute has expired.

Mr. BIDEN. I yield the floor.

Mr. HATFIELD. Mr. President, how much time remains to Senator SYMMS?

The PRESIDING OFFICER. Twelve minutes and fifty-two seconds.

Mr. HATFIELD. Plus the 5 minutes of the closing time?

The PRESIDING OFFICER. That is correct.

Mr. HATFIELD. I wonder if the Senator from Idaho would be willing to yield back the remainder of his time except for the closing time.

Mr. SYMMS. The distinguished senior Senator from Idaho wishes to present some remarks. I yield to Senator McClure.

Mr. McCLURE. I thank the Senator for yielding.

Mr. President, I take this time only for a couple of points that I wish to make.

First of all, as the Senator from Idaho has already indicated, my colleague who sponsored the amendment which the Senator from Illinois seeks to overturn, there is the issue of the War Powers Act.

I do not read the resolution to override the War Powers Act. I think the War Powers Act is still in effect, even with the adoption of the Symms amendment.

While the Senator from Illinois and others have raised the issue as whether it is or is not, I think legislative history ought to be very clear on that point. While the Senator from Illinois and others may fear it, the RECORD should be very clear that this resolution does not override the limitations of the War Powers Act.

It would require a strained reading of it to suggest that it does. The only point I make is that I believe that the Foreign Relations Committee, in looking at this, has tried to raise a red herring for quite different reasons. They have tried to raise an issue that was not there, not because they fear it was there but because they do not like the resolution.

The Senator from Idaho, my colleague, is correct, that all we are restating in this action that the Senate has already taken is that which was thought to be wise policy when it was adopted 20 years ago and from which some people have strayed. It seems to me the reason the committee objects to the Symms language is they want it to be apparent that we have strayed from the position that was taken when President Kennedy took the strong position that he did with respect to Cuba.

If indeed you want to move away from that strong position taken by past administrations and reaffirmed by this one, then vote for the Percy substitute. But make no mistake about it, it is not to cure the War Powers Act question; it is to make certain that we have softened our position on Cuba. That is the only issue before us. The War Powers Act is a red herring.

I was amused earlier, and my friend from Delaware often amuses me, when the Senator was talking about macho, being tough. I observed the speech the Senator from Delaware made a few weeks ago on the Falkland Islands. I never heard a tougher speech, a more macho guy willing to go to—I almost said willing to go to war. But no, it was for Great Britain to go to war. "We will hold your coat. You go fight them."

Well, that was a good speech.

Mr. BIDEN. If the Senator will yield, that is also pretty good policy, to let Britain fight their own wars.

Mr. McCLURE. That is right. "Go fight them. Go fight them. Use force."

But Cuba, that is different. Let them use force and we will not say anything about that.

I think it is time for us to say something about that.

I thank my colleague for yielding.

Mr. SYMMS. I thank the distinguished Senator from Idaho. I think the point was made very well by Senator THURMOND, Senator McCLURE and Senator HELMS. There is not much more I can offer.

Mr. President, I shall submit for the RECORD some captured PLO documents which show the PLO training people in Cuba and Nicaragua and helping to train Salvadoran revolutionaries. They show the vital link that is taking place in the world that is coming out of the Soviet Union.

Mr. President, I mentioned the fact that I have in my possession documents from the Palestine Liberation Organization (PLO), which were captured recently by Israeli defense forces operating in South Lebanon. These captured PLO documents reveal that the PLO is involved in fomenting Marxist-Leninist revolutionary war in the Caribbean. Specifically, the captured PLO documents indicate that the PLO was training El Salvadoran and Haitian revolutionary guerrillas in South Lebanon during 1982. Further, another captured PLO document indicates that in 1979, a PLO guerrilla was trained in Cuba. There is additional and extensive documentary evidence that the Soviet Union has been actively supporting, financing, training, and controlling the PLO.

Accordingly, Mr. President, I request that these PLO documents captured by the Israelis be entered into the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

PAGES FROM CALENDAR FOUND IN TYRE ABOUT COURSES FOR TERRORISTS FROM VARIOUS COUNTRIES

1. An African group, 10 men from Malawi, arrived (11 June).
2. The course for the Malawi comrades began (16 May).
3. The comrades from Southern Africa left (16 May).
4. Final examinations for the El Salvador course (26 February).
5. Abu Hamid—Damascus, 446408 (29 April).
6. The course for the Haitian comrades began (6 April).
7. A group of 5 comrades from Turkey arrived (4 June).
8. The course for the comrades from Turkey began (8 June).
9. The course for the comrades from Turkey completed (4 July).
10. The group from Turkey left us (6 July).

LIST OF COURSES WHICH OFFICERS AND NCO'S OF THE "SEPTEMBER MARTYRS BATTALION"/CASTEL BRIGADE/FATAH TOOK IN FOREIGN COUNTRIES

No.	Military ID No.	Rank	Name	Date present rank received	Course, date, place
1.	31487	"Raid" staff officer	Faisal Muhamed Alsheich Yusuf		1. Military academy, China; 2. Battalion commanders course, Moscow; 3. Staff officers, Pakistan, 1979.
2.	44552	"Nakib"	Jamal Yakov Jadan	Feb. 1, 1976	1. Fadayin commander, Moscow 1972; 2. Armor, Hungary, 1980.

Source: Handwritten list captured in Sidon.

Mr. SYMMS. I think we should recognize that these are big stakes in Latin America. Now the emphasis is to try to disrupt a continuation of civil policy in the Western Hemisphere, if you will. There is a great effort being made. The concentration is not El Salvador, it is not Granada. The target of the Cubans and the Soviets is Mexico. That is where they want to go. That is where they want to disrupt things. That is where they want to get terrorism started. That is where they want the revolution to start. The target is Mexico.

So we are talking about right in our backyard.

For us to not vote to table the Percy amendment, in my opinion, will be sending a very, very weak signal because if we change the language that is now in the law of the land, it will be giving a green light to our adversaries in the Caribbean Basin that the United States is not going to do anything.

I am prepared, Mr. President—

Mr. HATFIELD. Will the Senator yield back the remaining period of his half-hour leaving 5 minutes for closing?

Mr. SYMMS. I yield back the remaining part of the half hour.

Mr. HART. Will the Senator yield for a question?

The PRESIDING OFFICER. Who yields time?

Mr. HATFIELD. Mr. President, we have 5 minutes left, is that correct, for the closing on the SYMMS side, and 4 minutes left for Senator PERCY?

The PRESIDING OFFICER. The Senator from Idaho has 5 minutes; the Senator from Illinois has 3 minutes 36 seconds.

Mr. HART. Will the Senator from Idaho yield for a question?

Mr. SYMMS. I am happy to yield to my friend from Colorado.

Mr. HART. The question is on the subsection of the amendment which the Senate just adopted, subsection (b), "to prevent in Cuba the creation or use of an externally supported military capability."

Mr. SYMMS. I could not hear the question.

Mr. HART. I read subsection (b) of the Senator's amendment. My question is What means may the United States, under this amendment, take to prevent anything in Cuba?

Mr. SYMMS. Mr. President, I reserve the remainder of my time.

I think the answer is that is a question we cannot decide in this Chamber. We have a system here where we have a Commander in Chief, we have an executive branch. They have access to all the information. We do not need 535 Secretaries of State, 535 quarter-backs to run the program. We have a system here where the President will have to make those determinations.

Our part will be consent under the War Powers Act on under the appropriations process of the Congress supporting the administration actions.

I am just not going to get into an argument here of what actions are going to be taken.

The Senator from Colorado, being on the Armed Services Committee, knows very well what the answer to that question is.

Mr. HART. Mr. President, the Senator does not know. The Senator is asking the Senator from Idaho.

Mr. SYMMS. The Senator knows very well what the ability of the United States would be if we show the will of resolve. Probably there would be no necessity of military action. It would be a matter of having a convincing, a reliable position and posture on the part of the United States so we could have not only the confidence of our allies, but have the respect of our adversaries. That is what we have failed to have in the last several years.

I reserve the remainder of my time.

Mr. HART. Will the Senator yield for a question?

Mr. SYMMS. I reserve the remainder of my time.

Mr. HART. Mr. President, I would like the record to show the Senator did not answer my question.

Mr. BIDEN. I ask if the Senator from Illinois will yield me 36 seconds?

Mr. PERCY. I yield 36 seconds.

Mr. BIDEN. Mr. President, it is not a wonder that the administration endorsed the Symms resolution.

Mr. President, on its face, the amendment offered by Mr. SYMMS which reaffirms the so-called Cuba resolution of 1962, may have certain political appeal. However, we should recognize the amendment for what it is—President Reagan's Gulf of Tonkin resolution for Latin America.

In 1973, the Congress overrode a Presidential veto to enact the war powers resolution into law. By that action, the Congress determined the appropriate balance between the executive and legislative branches in the area of the warmaking powers of our Government. The administration endorsed the resolution offered by the distinguished Senator from Idaho, which is not inconsequential when placed in the context of the Senator's clearly stated intention when he introduced Senate Joint Resolution 158. On March 18, 1982, the Senator from Idaho stated: "Presidential powers in the realm of foreign and military affairs as guaranteed by the Constitution were eroded considerably with passage of the War Powers Act. I have always opposed the War Powers Act."

Thus, significant credibility must be given to the concern expressed by many of us. The so-called Cuba resolution of 1962 now antedates the war powers resolution. Enactment of the war powers resolution brought every prior law under the purview of this act, including the Cuba resolution of 1962.

This brings the concern over the resolution offered by the Senator from Idaho into sharper focus. This resolution, which the administration publicly supports contains a provision which stipulates the following: "... the United States is determined (a) to prevent by whatever means may be necessary, including the use of arms, the Marxist-Leninist regime in Cuba from extending by force or the threat of force its aggressive or subversive activities to any part of the hemisphere."

Under the war powers resolution, the President can commit U.S. combat troops abroad for up to only 60 days unless the Congress "(1) has declared war or has enacted a specific authorization for such use of United States Armed Forces, (2) has extended by law such sixty-day period * * *

Since the administration has claimed that Cuba has provided significant material support for the insurgents in El Salvador, and since the administration has maintained repeatedly that it will go to the source of that support, the executive branch could maintain that the Symms resolution gives it the authorization required by the war powers resolution to commit

U.S. combat forces either to El Salvador, or against Nicaragua or Cuba.

During testimony before the Senate Foreign Relations Committee on May 4, 1982, the distinguished Democratic leader of the Senate, ROBERT C. BYRD, warned:

Recent history should be a lesson for us. In the course of the Vietnam War, the Johnson Administration reconfirmed the Executive's claim to unilateral authority in the use of U.S. armed forces. In August, 1967, Under Secretary of State Nicholas Katzenbach contended that the Gulf of Tonkin Resolution was "as broad an authorization for the use of armed forces for a purpose as any declaration of war so-called could be in terms of our internal constitutional processes."

In essence the viability of any policy is directly related to its consistency of application. Certainly, the events in the South Atlantic involving Great Britain and Argentina have called into question the desirability of invoking policy pronouncements which are only selectively applied.

The resolution offered by the Senator from Idaho establishes a double standard which will not be lost on Latin America. William D. Rogers, who served as Assistant Secretary of State for Inter-American Affairs during the Nixon administration, made that very point during testimony before the Senate Committee on Foreign Relations earlier this year. In taking note of the Falkland Islands/Malvinas dispute, Mr. Rogers stated:

The key question in that dispute is Argentina's unilateral use of force to settle its ancient grievance. A ringing affirmation of the 1962 Cuba Resolution would be misunderstood in Latin America, either as a vindication of the principle that resort to arms is appropriate if the case is serious enough, or alternatively that we accept the use of force by big powers but not by small.

Therefore, if the resolution offered by the distinguished Senator from Idaho is to be judged on its merits, it must meet two tests. First, is it good policy? Will congressional passage of the resolution enhance in any way U.S. foreign policy in the hemisphere? Does it demonstrate a particular resolve to accomplish a particular goal? If so, how is this to be achieved and what commitment of U.S. resources over what period of time will be required?

Second, how does it impact upon the executive-legislative branch relationship in the exercise of the warmaking powers of our Government? Is it the responsibility of the executive branch to come to Congress and justify our Government's need to commit U.S. Armed Forces abroad to meet a particular threat to the national security of this country? Or is it the responsibility of the Congress to direct the President to utilize U.S. Armed Forces in any way he deems necessary without having to justify such a commitment to the Congress or to the American people?

In effect, by passing the Symms resolution we have voted the President to use the Armed Forces of the United States anywhere in the hemisphere where he sees a direct or indirect threat from Cuba. Notwithstanding protestations to the contrary, this resolution is not a simple restatement of policy enacted by the Congress two decades ago. It is a resolution directing the President to take action.

Make no mistake, Mr. President, this amendment is about the War Powers Act.

The PRESIDING OFFICER. The Senator's time has expired. Who yields time?

Mr. PERCY. Mr. President, I would like simply to indicate or recommend strongly to my colleagues the position that Senator STENNIS has taken. You can have the best of all worlds. If you did vote for the Symms amendment, you can now vote for the Percy amendment as Senator STENNIS intends to do. That preserves the War Powers Act.

Let me say it is no surprise that the administration will support the Symms amendment, because, after all, President Nixon voted to veto the war powers resolution. As has been demonstrated, Senator SYMMS has always been against the war powers resolution.

All we are saying is that whatever happens in this hemisphere or any place else, the prerogatives of Congress must be preserved. The people of this country expect it, whether it is troops to Lebanon or troops to any place in the hemisphere.

Senator HELMS has indicated that it is time for Americans to be Americans again. I say it is time to be Americans with the Congress, not without the Congress. This resolution would exclude the Congress.

Senator HELMS said we are backing away from the Monroe Doctrine. That is absolutely not true. Let me repeat from the Percy amendment: To support "the principles of nonintervention in the affairs of nations of this hemisphere by external powers, which have been historically defended under the Monroe Doctrine."

The Percy language is even tougher than the Symms. Where in the Symms resolution is there any mention of the fact that the United States affirms its longstanding determination—quoting from the Percy amendment—"to prevent in Cuba the stationing of nuclear weapons by the Soviet Union, the development or acquisition of nuclear weapons, or any other externally supported military capability endangering the security of the United States"?

Then we have added this language, which is certainly tough enough:

To resist efforts by Cuba to extend its Marxist-Leninist ideology or political system in the Hemisphere by force or the

threat of force in violation of the Charter of the United Nations.

We have here a resolution that is a tough resolution but a determined resolution, shaped to events in 1982, fully taking into account the War Powers Act and preserving those rights, which are waived by the Symms resolution.

No administration wants any restraints on it. Lyndon Johnson did not want restraints, other Presidents have not wanted restraints. This Congress overwhelmingly voted to reaffirm the powers of the War Powers Act, preserving the powers of Congress. We would be wiping those out if we do not adopt the pending resolution that is up for a vote now.

I yield the remainder of any time to my distinguished colleague from Rhode Island.

Mr. PELL. Mr. President, as I see it, there are two essential differences here. One, the Percy amendment brings in reference to the nuclear danger on which the Symms amendment is silent. Second, the Percy resolution drops those key words—

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. PELL [continuing]. "Including the use of arms."

The PRESIDING OFFICER. The Senator from Idaho.

Mr. SYMMS. Mr. President, I shall be very brief. I just want to reiterate, despite the comments of my good friend from Delaware (Mr. BIDEN)—it is true, and I will say that—that in the other body, I did support President Nixon's position and I opposed the War Powers Act, that the War Powers Act is now the law of the land. There is no way you can interpret the 1962 language, which we have already voted on, that it is in any way in conflict with the War Powers Act. This Senator certainly upholds the law of the land. The War Powers Act is part of it. In no way would I want to offer language that is not in this language that in any way avoids our responsibilities.

Senator HELMS is about to offer a motion. I want all my colleagues to know that the administration favors tabling the motion.

I think Senator HELMS, in his comments earlier, made it very clear that if you vote to pass the Percy amendment, you have negated what we have just done. So Congress has climbed up the hill, made a strong position, then retreated halfway back down the hill and given up the high ground, which is so important in international diplomacy, that we have a firm, clear, simple, understandable position on the part of the United States so our adversaries can understand where we are coming from. Then we shall have a much better arena for our diplomats to have true diplomacy, which will last toward peace in this world instead of this constant turmoil we have. I yield the remainder of my time to the

distinguished Senator from North Carolina.

Mr. HELMS. Mr. President, how much time remains?

The PRESIDING OFFICER. One minute 37 seconds.

Mr. HELMS. Mr. President, let me say again that the effect and the purpose of the Percy amendment is to wipe away the Symms amendment, which this Senate just approved by 69 to 27. A minute and 37 seconds does not allow time to correct the erroneous statements that have been made. But we are talking about the law as it existed and as explained and advanced by John F. Kennedy. The central issue here is the question of freedom in this hemisphere. Do we stand for freedom? Do we really believe that Cuba can be free again? Do we believe that Cuba must be stopped as a center of subversion against all the nations of the Americas? President Kennedy summed it all up when he said:

The evidence is clear—and the hour is late. We and our Latin friends will have to face the fact that we cannot postpone any longer the real issue of the survival of freedom in this hemisphere itself. On that issue, unlike perhaps some others, there can be no middle ground. Together we must build a hemisphere where freedom can flourish and where any free nations under outside attack of any kind can be assured that all of our resources stand ready to respond to any request for assistance.

That is the issue here, not the War Powers Act.

Indeed, even under the War Powers Act, the President is allowed to send troops for 60 days without congressional consent. The Symms amendment is not going to send us to war. I move to table the Percy amendment. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered. The PRESIDING OFFICER. The question is on agreeing to the motion to table. The clerk will call the roll. The bill clerk called the roll.

Mr. STEVENS. I announce that the Senator from Delaware (Mr. ROTH) is necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 48, nays 51, as follows:

[Rollcall Vote No. 307 Leg.]

YEAS—48

Abdnor	Garn	Murkowski
Armstrong	Goldwater	Nickles
Bentsen	Grassley	Pressler
Boschwitz	Hatch	Quayle

Danforth	Leahy	Simpson
Dixon	Levin	Specter
Dodd	Mathias	Stennis
Durenberger	Matsunaga	Tsongas
Eagleton	Melcher	Weicker

NOT VOTING—1

Roth

So the motion to lay on the table was rejected.

Mr. McCLURE. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. McCLURE. Mr. President, the question is on the adoption of the amendment; is that correct?

The PRESIDING OFFICER. The Senator is correct.

Mr. McCLURE. Have the yeas and nays been ordered?

The PRESIDING OFFICER. The yeas and nays have not been ordered.

Mr. THURMOND. Mr. President, I request the yeas and nays.

The PRESIDING OFFICER. The Chair will correct itself. The yeas and nays have been ordered.

The question is on agreeing to the amendment of the Senator from Illinois.

On this question, the yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Delaware (Mr. ROTH) is necessarily absent.

The PRESIDING OFFICER (Mr. LAXALT). Are there any other Senators wishing to vote?

The result was announced—yeas 47, nays 52, as follows:

[Rollcall Vote No. 308 Leg.]

YEAS—47

Andrews	Glenn	Metzenbaum
Baucus	Gorton	Mitchell
Biden	Hart	Moynihan
Boren	Hatfield	Nunn
Bradley	Hollings	Packwood
Bumpers	Huddleston	Pell

Humphrey	Randolph	Zorinsky
Jepsen	Rudman	

NOT VOTING—1

Roth

So the amendment (UP No. 1206) was rejected.

Mr. THURMOND. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. HATFIELD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. May we be in order, please?

The Senator from Oregon.

Mr. HATFIELD. Mr. President, I would like to propose some unanimous-consent requests.

The PRESIDING OFFICER. Will the Senate please be in order so the Senator can be heard?

Mr. HATFIELD. Mr. President, I have discussed the remaining amendments with the authors, as we now understand the list. I would at this time like to ask unanimous consent that for Senator LEVIN's amendment there be a 40-minute time agreement, equally divided between Senator LEVIN and Senator SCHMITT. I have checked this out with the author, Senator LEVIN, and it is satisfactory with him. So I ask unanimous consent, Mr. President, that a 40-minute time limitation be given on the Levin amendment relating to student benefits, to be equally divided between the Senator from Michigan and the Senator from New Mexico.

The PRESIDING OFFICER. Is there objection? If not, it is so ordered.

Mr. HATFIELD. Mr. President, we have an amendment that will be offered by the Senator from Rhode Island (Mr. CHAFEE) relating to Buy America, as it relates to coal. I have checked with the Senator from Pennsylvania, Senator SPECTER, who will oppose the amendment and it is agreeable that 40 minutes, equally divided will be sufficient to handle the Chafee amendment. Mr. President, I ask unanimous consent that there be a time limitation of 40 minutes to be equally divided between Mr. CHAFEE and the opposition, Mr. SPECTER.

Mr. PROXMIRE. Mr. President, reserving the right to object. Would the manager of the bill go ahead with his other requests, because on that one I am waiting for a Member to respond?

The PRESIDING OFFICER. Will the Senator suspend for a moment? Let us be in order.

The Senator from Oregon.

Mr. HATFIELD. Mr. President, there is an amendment to be offered by the Senator from New Mexico (Mr. SCHMITT) relating to copper with an hour time limitation, to be equally divided.

Mr. PROXMIRE. Mr. President, will the Senator also permit the minority to find out about that one?

Mr. HATFIELD. Yes.

Mr. President, I will make no more unanimous-consent requests at this point, but I am hopeful that we can get some time agreements in order to finish up at a decent hour.

Mr. PROXMIRE. Mr. President, I certainly want to cooperate as much as I possibly can. I just have some Members who are concerned about those two amendments.

The PRESIDING OFFICER. Who wishes to be recognized?

Mr. MATTINGLY addressed the Chair.

The PRESIDING OFFICER. The Senator from Georgia.

UP AMENDMENT NO. 1207

(Purpose: To prohibit the availability of economic support fund assistance for certain countries which do not cooperate in preventing the entry into the United States of narcotic drugs)

Mr. MATTINGLY. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Georgia (Mr. MATTINGLY) proposes an unprinted amendment numbered 1207.

Mr. MATTINGLY. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 31, line 15, before the period insert a colon and the following: "Provided further, That none of the funds appropriated under this heading and made available only for a country referred to in the first proviso may be available for such country while such country is not taking adequate steps to cooperate with the United States, as certified by the President to the Congress, to prevent narcotic drugs and other controlled substances (as listed in the schedules in section 202 of the Comprehensive Drug Abuse Prevention and Control Act of 1970 (21 U.S.C. 812)) which are produced, processed, or transported in such country from entering the United States unlawfully."

Mr. MATTINGLY. Mr. President, I ask unanimous consent that the distinguished Senator from Florida (Mrs. HAWKINS), the distinguished Senator from New York (Mr. MOYNIHAN), and the distinguished Senator from Florida (Mr. CHILES) be added as cosponsors of this amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MATTINGLY. Mr. President, I support the President's Caribbean Basin initiative. I believe that it is an important program that will strengthen U.S. interests in that strategically vital part of the world.

However, I believe that it is just as important to our Nation to insure that the recipients of this assistance join the battle which we are waging against the importation and sale of illicit drugs in our country.

I have been working closely with the Vice President's Task Force on Drugs. The task force has performed a valuable service but the problem that it is combating is enormous. Additionally, I have been pleased to work with my colleague from Florida, Senator HAWKINS, and other Senators on the newly established Senate Drug Enforcement Caucus. This caucus has helped to raise the awareness of my colleagues about the serious drug problem facing our Nation.

It is estimated that in 1980, the sale of illegal drugs totaled \$79 billion in this country. That is an increase of more than 20 percent from 1979.

The Georgia Bureau of Investigation estimates that more than 50 percent of the illegally imported marijuana and cocaine moves through the States of Georgia, Florida, and South Carolina. Georgia has become a distribution funnel through which this deadly merchandise reaches the other parts of the country. It is estimated that there are more than 500 airports in Georgia, a State with 159 counties. A large percentage of these airports are used for clandestine drug operations. Mr. President, our International Narcotics Bureau, our Justice Department, and the American people need our help to stop the drug problem in America.

My amendment merely stipulates that countries receiving assistance under this program should assist the United States with its efforts to curb the importation of illegal drugs. The President does not have to certify that such assistance is being rendered before the financial assistance is made available. Rather, the economic assistance made available in this provision is not hindered or stopped in any way until the President finds that a particular country is not assisting with control efforts and he so certifies to the Congress. The provisions of my amendment are similar to those contained in section 502 of the Trade Act of 1974 which also limits assistance to any nation which is not cooperating in the fight against drug trafficking.

I believe it is in our country's best interests to conclusively demonstrate our serious intention to combat the drug problem and that we expect those nations that we are assisting to help us with this effort.

I hope my colleagues will support this important amendment.

I yield to my colleague from Florida.

The PRESIDING OFFICER. The Senator from Florida is recognized.

Mrs. HAWKINS. Mr. President, as chairman of the Senate Drug Enforcement Caucus and a cosponsor of the Mattingly amendment, I want to take this opportunity to urge my colleagues to join in this initiative to link the U.S. economic assistance to drug eradication.

The statistics that Senator MATTINGLY has related regarding the DEA's estimation of the illicit drug value in this country and its tremendous increase in 1981 over 1980 is absolutely staggering. A recent study by the National Institute on Drug Abuse found that 243 addicts committed 500,000 crimes over an 11-year period in this country.

Drug enforcement experts agree that the most cost-effective means of stopping drugs is through foreign eradication. On February 24, 1982, I introduced Senate Resolution 324 which urges the President and the Secretary of State to:

Express U.S. concern to the governments of nations that fail to adequately control the production, and exportation to the United States, of illegal narcotics; to urge foreign governments to take appropriate measures to eliminate production and exportation of illicit narcotics to the United States; solicit from such governments recommendations for U.S. actions that will assist their efforts to control production and exportation of illicit narcotics, and consider the desirability of imposing sanctions on nations which continue production and exportation of illicit narcotics.

I believe it is vital that this Senate support making drug eradication a foreign policy priority by passing the Mattingly amendment. U.S. foreign assistance must be used as a preventive tool for stopping crime on our streets and drug abuse in our communities. I therefore urge my colleagues to join Senator MATTINGLY and me in this effort to destroy drugs before they reach our children and the shores of our communities. We must consider foreign aid and trade in a broader context than we have in the past. Illegal drugs destroy American lives and we must not continue business as usual. While our foreign policy interests with these countries are broad, none of these interests should supersede our desire for Americans to live free from crime related to illegal narcotics.

We should consider no nation our friend that takes a cavalier attitude toward its contributions to one of the most serious domestic problems facing this country, and we certainly should not use taxpayer dollars to help those countries that are unsympathetic and unresponsive to this country's legitimate concerns and fail to cooperate in a solution to the No. 1 problem facing this country today.

I commend my colleague, Senator MATTINGLY, for his timely amendment, and yield back my time.

Mr. MATTINGLY. I thank the Senator.

Mr. President, I might add that the distinguished Senator from Florida has been an outstanding leader in the U.S. Senate, serving as chairman of the Drug Caucus and has brought the drug problem to a high level of awareness here in the Senate, as has the President and Vice President.

Mr. MOYNIHAN addressed the Chair.

The PRESIDING OFFICER. The Senator from New York.

Mr. MOYNIHAN. Mr. President, I rise to congratulate my colleague, the Senator from Georgia, for his offering this amendment, and which he has allowed me the opportunity to cosponsor.

I will detain the Senate for just a very few moments on this question.

The distinguished Senator from Florida has said that no nation should be considered our friend which involves itself in the international drug traffic in a complacent or uncooperative way.

May I say, simply for background, I believe it to be the case that, as assistant to the President of the United States for urban affairs in 1969, I was the first person to propose a systematic way within the U.S. Government that the international drug traffic be put on the agenda of American foreign policy. These were measures which led to the creation of the present operations in the Department of State, and, in their first case, led to the effort to put an end to the production of poppy in Turkey and its manufacture into heroin in Marseilles.

In 1969, I was sent as the Presidential emissary to Turkey and to Paris to begin the negotiations, which in the end were successful.

This is not meant to divert the Senate with personal reminiscences but rather to state at the time, and in fear of invoking him in a way in which he might not wish to be, I found at the time the then Secretary of Labor, the now Secretary of State, our distinguished friend George Shultz, very much agreed with this point.

At the time we were well aware that if we were able to break the French connection and persuade the Turks to control the growth of poppy and the manufacture into opium, that we would then only divert the heroin traffic to other sources, it being too lucrative an effort to put an end to permanently. Further, that the task would be the task of a generation or two, as indeed it had been a problem for at least three previously.

We did not set out one set of diplomatic relations, but we set out to put a process in place.

With respect to heroin, that diversion has now occurred. It was first diverted to Mexico, but most recently, in the most dramatic terms, it has been diverted to Southwest Asia, and to Pakistan specifically.

At present, the committee with a rather curious name, the National Narcotics Intelligence Consumers Committee, which is our basic source of data, estimates that roughly 60 percent of the heroin coming into this country comes from Pakistan, Southwest Asia in the generic term. It does not come from India where very careful controls which have always been imposed are maintained. It is useful for us to remember that the world would be very much the worse off without morphine.

If I could give you quickly the ratios from the newest narcotics intelligence estimate, 57 percent of the heroin consumed in Atlanta, Ga., comes from Pakistan, 64 percent of that in Chicago, 50 percent of that in Los Angeles, 67 percent of that in Washington, D.C., and some 78 percent in New York City.

It is within the capacity of drug analysts not so much to put signatures on these products but to identify them by chemical variants.

Mr. President, in the space of 3 years, the Pakistanis have become the largest source of heroin exported to the United States. Heroin is actually manufactured in Pakistan, a country perfectly capable of that kind of chemistry.

This year, this administration negotiated a \$3 billion aid package to Pakistan and never mentioned the heroin traffic when it did so.

The Senator from Florida has made the point that no nation can be our friend and involve itself in such enterprise. But here is a nation pouring poison into the base of the American society and we are proposing a \$3 billion aid package.

The amendment of the Senator from Georgia alerts the administration to our concern and encourages those involved to be heard, or it gives them an opportunity to be heard, by their superiors. A Presidential report is an important form of influence in the executive branch.

I have introduced more comprehensive legislation which will have to await a more propitious time, but I certainly support the amendment before us.

I wonder if I could ask my friend from Georgia if he would accept a proposed modification.

As he knows, the supplemental legislation is dealing with the remainder of this fiscal year, really not much more than 3 months, and unless we express some urgency in this matter, that time can go by, the amendment lapse, and there would be no response at all.

Would he not agree that it might be useful if we were to say on line 6 of his amendment, after the word "certify" to include the word "monthly," so it would be certified monthly? We would have in prospect at least the three reports before the amendment expires as does the appropriation.

Mr. MATTINGLY. The Senator from New York and I have talked about this previously. I agree. Mr. President, I so modify my amendment to add the word "monthly."

Mr. MOYNIHAN. I thank the distinguished Senator from Georgia.

Mr. MATTINGLY. Also, I think this makes the amendment stronger.

The PRESIDING OFFICER. Without objection, the amendment is so modified.

The amendment, as modified, is as follows:

On Page 31, line 15, before the period insert a colon and the following: "Provided further, That none of the funds appropriated under this heading and made available only for a country referred to in the first proviso may be available for such country while such country is not taking adequate steps to cooperate with the United States, as certified monthly by the President to the Congress, to prevent narcotic drugs and other controlled substances (as listed in the schedules in section 202 of the Comprehensive Drug Abuse Prevention and Control Act of 1970 (21 U.S.C. 812)) which are produced, processed, or transported in such country from entering the United States unlawfully."

Mr. CHILES. Mr. President, I rise to support the amendment offered by Senator MATTINGLY of Georgia and co-sponsored by myself and several other Members.

Included in the supplemental bill pending before the Members is over half of a billion dollars of foreign assistance. These funds are associated with the President's Caribbean Basin initiative and other foreign aid funding sought by the administration.

If the Senate gives approval to this foreign aid proposal it seems appropriate to ask for some assistance in return from the recipient nations in combating the drug epidemic that exists in this country today. My State of Florida seems to be the gateway for the foreign drug invasion. Over 70 percent of the drugs that enter this country do so through south Florida. But this is not just a Florida problem, it is a problem of national significance.

We have learned that the single most important step we can take to curtail the flow of drugs into this country is to stop illegal drugs at their source, in the countries where the drugs themselves are grown. Just last year, Congress adopted and passed into law my proposal to once again allow our foreign assistance funds to be used for drug crop eradication programs overseas. With this new provision on the books, we have the tool we need to attack illegal drugs at their source. But that tool will only be

useful if the United States wants to make it work. In other words, unless we insist on making drug control programs a key element in our foreign relations with other countries where drugs are grown, we will fall short in our efforts to curtail the drug trade, and the crime and violence it creates.

The amendment before us would require foreign governments receiving our aid to take adequate steps to cooperate with the United States as a precondition for receiving this aid. Friendship and international cooperation is a two-way street. We can no longer afford to ignore the refusal of other nations to take action or only token or minimal action to stop the flow of these foreign drugs into our country.

For these reasons I am pleased to co-sponsor the amendment now pending before the Senate and urge its adoption.

The PRESIDING OFFICER. The Senator from Wisconsin.

Mr. KASTEN. Mr. President, the amendment offered by the Senator from Georgia (Mr. MATTINGLY) and others, simply provides that none of the funding for the CBI may go to any country that the President has certified is not taking adequate steps to cooperate with the United States in the prevention of drugs entering the United States.

Mr. President, as chairman of the subcommittee, I have also checked with the ranking minority member, the Senator from Hawaii, and we can accept this amendment. I believe it is entirely consistent with current U.S. policy.

I congratulate the Senator from Georgia on his amendment.

The PRESIDING OFFICER. Who wishes to be recognized?

Mr. HATFIELD. Mr. President, I move the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (UP No. 1207) was agreed to.

Mr. HATFIELD. I move to reconsider the vote by which the amendment was agreed to.

Mr. MATTINGLY. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

REQUEST TO CHANGE OF POSITION ON VOTE

Mr. MOYNIHAN. Mr. President, will the Senator yield?

Mr. HATFIELD. Yes, I yield.

Mr. MOYNIHAN. Mr. President, on the previous amendment by the distinguished Senator from Idaho, the one several times preceding, I voted "yea." I ask unanimous consent to change my vote to "nay"; it being the case that this will not change the outcome of the vote.

The PRESIDING OFFICER. Is there an objection?

Mr. HATFIELD. Reserving the right to object, Mr. President, yesterday, the Senator from Colorado (Mr. HART) made a similar request. I happened to be on the floor at the time, at which the majority leader rose to address the request by asking the Senator from Colorado two questions that were in the precedent of the Senate well established by the Chair's rulings. I believe the majority leader at that time indicated that it would be required to fulfill these two points: No. 1, was the Senator misrecorded in his vote; No. 2, did the change of the vote change the outcome of the issue? I believe that that constituted the two requirements. Is that correct? I am asking the Chair for that information.

The PRESIDING OFFICER. That is the Chair's recollection of the discourse yesterday, yes.

Can the Senator from New York meet those requirements as stated by the Senator from Oregon?

Mr. MOYNIHAN. No, Mr. President, the Senator from New York does not meet those requirements, it being his understanding that during the day in which the vote was cast, the recorded vote could be changed if that change would not change the outcome of the vote. The Senator could not say that he was misrecorded. He was not.

I should be happy to—

The PRESIDING OFFICER. The fact of the matter is that without any further discussion, a Senator, by unanimous consent, may change his vote.

Mr. HATFIELD. Mr. President, I wish the Senator from New York would withhold his request because, under the present circumstances, as acting majority leader at this moment, I would have to object based upon my understanding of what the majority leader (Mr. BAKER) made as a statement of precedent and rules governing this question, well established by the Senate.

Mr. MOYNIHAN. Mr. President, there would be no circumstances of a request by the Senator from Oregon in which I would imagine myself not honoring that request. I do stand and state that it is not my understanding of the precedents that one has to be misrecorded in order to change a vote. We shall resolve that.

Mr. HATFIELD. I may be wrong, Mr. President, but I would like to have the majority leader present.

Mr. MOYNIHAN. May I say, I do this, Mr. President, only in the aftermath of the failure of the amendment by the distinguished Senator from Illinois, the chairman of the Committee on Foreign Relations. In the context of the failure of that amendment, I could not support the earlier one. That is the only reason I trouble the Senate.

The PRESIDING OFFICER. If the Senator will withhold the request

pending a conference with the majority leader by Senator HATFIELD. Is that acceptable?

Mr. HATFIELD. It is acceptable, Mr. President. I should like to do everything I can to aid the Senator from New York to change that vote, because, as one who believes deeply in redemption, I believe the Senator from New York does have an opportunity for this redemption.

The PRESIDING OFFICER. The Senator from Wisconsin is recognized.

Mr. KASTEN. Mr. President, I believe this vote now concludes the work on chapter VI of the supplemental.

The PRESIDING OFFICER. The Senator is correct.

Mr. KASTEN. Mr. President, the recommendation contained under chapter VI of the supplemental fall under the jurisdiction of the Foreign Operations Subcommittee, which I chair. The foreign assistance recommendations before the Senate are a result of a compromise fashioned by the ranking member of the subcommittee, Senator INOUE, and myself. Except for two minor housekeeping items, payments to the retirement and disability fund, a mandatory request, and the provision of U.S.-owned foreign currency for overseas training in India, our recommendations fall into three categories. Those three categories are as follows:

First, emergency assistance to Lebanon;

Second, the economic assistance portion of the Caribbean Basin Initiative; and

Third, a small amount of military assistance, including emergency forgiven loans to Sudan, MAP assistance to El Salvador, Somalia, and Honduras, and loan guarantees to several selected countries which are vital to U.S. security.

Unquestionably the most controversial item in this chapter is the provision of assistance to El Salvador. However, the committee has taken a rather strong position with respect to economic assistance to that country by providing the full request as part of the Caribbean Basin Initiative. I think that there was a general consensus that this economic assistance is, in fact, desperately needed. With respect to military assistance to El Salvador, the committee, by a vote of 21 to 1, approved a reduction from the requested \$35 million to \$20 million. The committee rejected an attempt to eliminate all military assistance by a vote of 19 to 4.

The Appropriations Committee recognizes the concern many Members have expressed with respect to various actions in El Salvador, and that, at least partially, explains the reasons for our action reducing the military assistance request. We know that these concerns are held sincerely, and we hope that the administration will

understand that we must take those criticisms and critics of our policy and of Salvadoran Government policy seriously. I, and I know Senator INOUE does likewise, want to work together with the critics of our policy and to endeavor to improve it. At any rate, we believe the Appropriations Committee action strikes a good balance, one which the Senate can support.

ASSISTANCE TO LEBANON

We are recommending \$50 million in emergency assistance to Lebanon. This is identical to what was requested by the administration, but we are following House action in providing it through a transfer of excess funds under the migration and refugee assistance account. By doing so, we save \$50 million, while still providing the needed assistance. The committee has included a legislative earmarking of \$10 million for the American University of Beirut, including the hospital, which has undergone substantial financial losses as a result of the crisis.

The committee expects that these funds will be disbursed as soon as possible after enactment of this legislation. The committee has also included report language, suggested by Chairman HATFIELD, which makes sure that this assistance is spent first on humanitarian needs.

We have also included report language which suggests that some of this funding be made available to the Beirut University College, which has sustained significant damage, and subsequent to committee action we have learned that the International College, a preparatory secondary school associated with the American University of Beirut, has likewise sustained significant damage, and I hope, of course, that the administration would consider supporting this institution as well. In calling special attention to these institutions, it is important to point out that they have been the focus of U.S. assistance in Lebanon for some time, in fact virtually the only assistance which has gone to that country.

CARIBBEAN BASIN INITIATIVE

The Appropriations Committee is recommending approval of the administration's economic assistance portion of the Caribbean Basin Initiative, including an add-on of \$5 million for Honduras—that \$5 million add-on being offset by a similar reduction in the military assistance request for that country. The CBI is the single most important program the administration has suggested for Latin America and represents the most comprehensive economic cooperation package since the Kennedy administration's Alliance for Progress 20 years ago. The CBI will provide badly needed budget and balance-of-payments support for the economies of several important countries in the Caribbean. The committee has included language which

would make these funds available should authorizing legislation fail to be taken up, a prospect which seems likely in the House of Representatives. An attempt in the committee to reject this approach was defeated 20 to 3.

The committee makes this recommendation fully mindful of the prerogatives of the Foreign Relations Committee. In fact, we fashioned the language so that when the authorizing legislation passes, it will be the controlling law, not only on policy, but on country distribution. The committee feels this approach is essential for not to include this language would be to put the entire Caribbean Basin Initiative economic assistance package in jeopardy. Perhaps most importantly—surely most practically—is the fact that further delay of the CBI will bring the outlays associated with it into fiscal year 1983.

As my colleagues know, outlays for the international affairs function are already squeezed, and to add another \$269 million to \$300 million could severely and adversely affect other foreign assistance programs. It is crucial that we fund this as quickly as possible so that the outlays are scored in the current fiscal year. The Caribbean Basin Initiative is a top priority of the administration, as indicated in a letter from Secretary Shultz to the majority leader.

I cannot emphasize enough the urgency of this funding. The President personally attaches the highest priority to each of these initiatives. Failure to provide the resources that are contained in the Foreign Operations portion of H.R. 6863 will seriously cripple the President's ability to implement his foreign policy agenda and would erode his credibility with friend and foe alike.

MILITARY ASSISTANCE

The administration has requested an appropriation of \$115,500,000, together with loan guarantees of \$186 million, and language which limits obligations of the special defense acquisition fund. The committee's recommendation cuts the military assistance program by 48 percent. I repeat, we make a reduction in the military assistance program of 48 percent. The committee recommends approval of the \$50 million forgiven loan under the FMS program for the Sudan, and approval of the \$186 million increase in FMS guarantees, which are to be used for additional programs in Korea, Thailand, Spain, Portugal, Morocco, Tunisia, and Turkey. As one can see, the programs we are approving under the FMS guarantees relate to those countries with which we have vital and important base agreements.

The committee is recommending a limitation on obligations from the special defense acquisition fund of \$250 million, a reduction of \$50 million from the request. It is important to point out that this particular action results in minimal budgetary impact,

and the action we take here today does not result in the transfer of any foreign assistance to any country. The special defense acquisition fund is a revolving fund which is set up to acquire defense articles which may be needed in the future by friendly foreign countries. The idea behind this fund is that by having such a separate stockpile, we avoid either a drawdown of U.S. stockpiles or an interruption in production schedules should urgent foreign requests be made.

Mr. President, to sum up for chapter VI, the committee is recommending the appropriation of \$426,531,000, a reduction of \$90 million from the administration's request. While our recommendation compares unfavorably to the House action, it is important to keep in mind that an amendment, which had wide bipartisan support, and which would have added \$402 million, was thrown out on a point of order on the House floor. But for that point of order, our recommendation would be very nearly the same as the House.

Mr. President, before concluding, I should like to pay special tribute to the very distinguished ranking member of the Foreign Operations Subcommittee, the senior Senator from Hawaii (Mr. INOUE). Without his leadership, advice, and assistance, this package for chapter VI could not have been put together. Senator INOUE continues to demonstrate those qualities that he is known for: patience, cooperativeness, and leadership. I also thank the senior Senator from Oregon (Mr. HATFIELD), the chairman of the full Appropriations Committee, for his support and counsel.

Mr. President, I ask unanimous consent that the full text of the letter of August 10 from George P. Shultz to Senator BAKER be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

THE SECRETARY OF STATE,
Washington, D.C., August 10, 1982.
Hon. HOWARD H. BAKER, Jr.,
U.S. Senate.

DEAR SENATOR BAKER: As the full Senate begins its consideration of the Omnibus Supplemental Appropriations Bill (H.R. 6863), I wish to advise you that this legislation contains funding for the Caribbean Basin Initiative, a modest amount of urgent security assistance, and emergency relief for Lebanon. These items were proposed and accepted in a bipartisan compromise fashioned by Senators Kasten and Inouye during the Senate Appropriations Committee's markup on August 3.

The funds proposed by the compromise are essentially those requested by the President to meet urgent foreign policy requirements and the Administration would, therefore, oppose any floor amendments to reduce or delete funding for these initiatives.

The President's Caribbean program seeks to address and resolve an unprecedented

economic crisis in the Caribbean Basin. The security assistance element addresses key strategic interests in the Middle East, Asia and the Caribbean. In Lebanon, the overwhelming need for immediate relief and rehabilitation assistance is clear.

I cannot emphasize enough the urgency of this funding. The President personally attaches the highest priority to each of these initiatives. Failure to provide the resources that are contained in the Foreign Operations portion of H.R. 6863 will seriously cripple the President's ability to implement his foreign policy agenda and would erode his credibility with friend and foe alike. Accordingly, I ask that you give favorable consideration to the funding proposals contained in the Kasten/Inouye compromise and ensure their speedy adoption.

Sincerely,

GEORGE P. SHULTZ.

The PRESIDING OFFICER. The Senator from Oregon.

COMMITTEE AMENDMENT

Mr. HATFIELD. Mr. President, I move the adoption of the pending committee amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The pending committee amendment beginning on page 30, line 23, through page 33, line 17, was agreed to.

Mr. KASTEN. I move to reconsider the vote.

Mr. HATFIELD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The question is now on agreeing to the second excepted committee amendment.

Mr. HATFIELD. Mr. President, I ask unanimous consent to lay this pending committee amendment temporarily aside in order that the Senator from New Mexico may call up an amendment relating to unemployment compensation.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

UP AMENDMENT NO. 1208

(Purpose: Provide funding, subject to enactment of authorizing legislation, for a federal supplemental benefits program)

The PRESIDING OFFICER. The Senator from New Mexico.

Mr. SCHMITT. Mr. President, on behalf of myself and Senators DANFORTH, DOMENICI, INOUE, LUGAR, DURENBERGER, CHAFEE, PACKWOOD, and SPECTER, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from New Mexico (Mr. SCHMITT), for himself, Mr. DANFORTH, Mr. DOMENICI, Mr. INOUE, Mr. LUGAR, Mr. DURENBERGER, Mr. CHAFEE, Mr. PACKWOOD, Mr. SPECTER, Mr. LEVIN, Mr. PERRY, and Mr. STEVENS proposes an unprinted amendment numbered 1208.

On page 50, after line 24, add the following:

GRANTS TO STATES FOR UNEMPLOYMENT INSURANCE AND EMPLOYMENT SERVICES

For an additional amount for "Grants to States for Unemployment Insurance and Employment Services", \$20,000,000, to remain available until September 30, 1983; to be used only for necessary administrative expenses for carrying out a federal supplemental benefits program, subject to enactment of authorizing legislation.

ADVANCES TO THE UNEMPLOYMENT TRUST FUND AND OTHER FUNDS

For "Advances to the Unemployment Trust Fund and Other Funds", such sums as may be necessary, to remain available until September 30, 1983, for non-repayable advances for a federal supplemental benefits program subject to enactment of authorizing legislation.

Mr. SCHMITT. Mr. President, this amendment is a modification in words but not in kind to printed amendment numbered 2013, which was introduced a few days ago. The amendment provides necessary appropriations bill authority to carry out a Federal supplemental benefits program now being considered by the conferees on the reconciliation tax bill. Funding for the necessary benefit payments and administrative costs is made subject to enactment of authorizing legislation, presumably legislation that would be agreed to by the Congress and the President as part of the reconciliation tax bill.

The purpose of this amendment is to avoid any possible delay in getting the supplemental benefits program implemented once the substantive legislation is enacted. It appears to be only a matter of time before such legislative changes are enacted, although the question of that legislative vehicle may still be up in the air.

Such changes would both modify the existing 13-week extended benefit program and provide a further extension of unemployment compensation up to, perhaps, a total of 52 weeks. However, the exact details of such a program are yet to be decided by the conference or action in the authorizing committees. There appears to be sufficient funding available.

If I may interject here, I think it is clear from the action of the Senate and of the House of Representatives in the context of the reconciliation tax bill that there is significant majority sentiment in both Houses to proceed with an extension of the unemployment extended benefit program. In that context, there appears to be sufficient funding available to cover the array of possible legislative changes being considered to this regular extended benefits program.

Under the terms of the fiscal 1982 continuing resolution, existing appropriations can be used to fund modifications to the extended benefits law and sufficient funds appear to remain

available to the extent that federally funded advances will be needed.

However, there is currently no appropriation authority to make payments for a new Federal supplemental compensation program even if authorizing legislation were enacted.

The amendment that we have introduced in no way prejudices or attempts to influence the negotiations which are in progress on the tax bill, negotiations which concern a mix of legislative changes between the extended benefit program and the proposed new supplemental compensation program. It merely removes the roadblock in the appropriations process so we will not have to come back later and enact another appropriations bill for what are essentially mandatory costs anyway. By acting now, we will give the States maximum leadtime to plan for this new program as well as to begin hiring needed staff for effective administration.

Mr. President, I think there are strong signs and a general belief among many economists as well as Members of the Senate and House that the recession has bottomed. I do not think there is a feeling that we are going to have a rapid recovery from our current economic doldrums, but nevertheless I think there is a general feeling that recovery is on its way.

In that context as well as in the context of what is best for our unemployed previously working population, these unemployed workers need more time before the recovery from recession creates the jobs that past inflation and the resulting high interest rates have cost them. In that context I think it is entirely appropriate that the Senate enact this enabling appropriations language so that whatever action the Congress may take relative to extended and supplemental benefits can be rapidly implemented.

Mr. President, I urge the adoption of the amendment.

The PRESIDING OFFICER. Who wishes to be recognized? The Senator from Wisconsin.

Mr. PROXMIRE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. PROXMIRE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. PROXMIRE. Mr. President, I congratulate my good friend from New Mexico, the chairman of our subcommittee. I happen to be the ranking member of that subcommittee. He does a great job. I congratulate him on this particular amendment, because we all know we have the highest unemployment rate since the Great Depression, far more people out of work

than we have had in more than 40 years. Obviously, we have to do what we can to provide extended unemployment that will be demanded by hundreds of thousands of people, perhaps millions of people, who will be out of work for more than 39 weeks and would not be covered otherwise. This is not only a matter of compassion and concern for people who lose their jobs, it is a matter of using unemployment for the purpose it was designed when it was first passed, to provide a floor under our economy so we do not snowball into a depression. I think this is a very essential action, and I certainly support it.

However, I ask my good friend from New Mexico why it is necessary under these circumstances to have an open-ended appropriation, which is most unusual? We have open-ended authorizations but there is no limit on the amount here.

The Senator does have a sort of suggested figure of \$100 million, but then he says "or such funds as may be necessary." Why is that?

Mr. SCHMITT. The amendment was modified and sent to the desk to be even more open ended than the Senator imagined. That is primarily because we do not know what sums will be authorized in whatever legislative vehicle eventually comes forward. There is a general assumption, as the Senator is aware, that the conference report on the reconciliation tax bill will contain the necessary authorizing legislation, and from that we would know the cost of the extended benefit program.

We will have another opportunity to apply an appropriations-generated cap if we so desire. Frankly, at this point, that cap would be whatever your best guess is that a conference is going to decide or what another legislative vehicle will decide.

Mr. PROXMIRE. What bothers me is that this is a supplemental appropriation bill, and it is a bill, therefore, which is confined largely—not entirely, but very largely—to 1982, this fiscal year. But this particular amendment would run until September 30, 1983.

So, whatever funds would be required to carry out this extended unemployment program through September 30, 1983, would be made available by this action. Is that not right?

Mr. SCHMITT. That is correct; the Senator's interpretation is correct.

There are two points, however. There already are unspent funds within the advances to the unemployment trust fund and other funds account, and we would authorize the use of those funds for the purpose of this Federal supplemental benefits program, and then we see what has actually been created by the authorizing legislation in consideration of our regular fiscal year 1983 bill, either as a regular bill or as part of a continuing

resolution. We can move to cap, to put on an actual figure. I do not believe we have lost any of those prerogatives as a committee by this legislation. All we have done is to make clear that there is, at the moment of implementation, no appropriations roadblock to moving forward with the benefits.

Mr. PROXMIRE. One of the concerns about this bill, as the Senator knows, is the possibility of a veto. Has the administration—OMB—taken a position on this open-ended provision for unemployment compensation?

Mr. SCHMITT. They have not, specifically. But it is this Senator's understanding that the administration was deeply involved in the negotiations of the instructions or guidelines that the Senate provided to the Finance Committee for the conference on this issue. It would be my guess that they would have no problem with this, since they are involved, to the extent the administration can be involved, in the settlement of that conference issue.

The Senator will recall that during floor debate on the instructions the Finance Committee received from the Senate—guidelines might be a better term—the number \$1.3 billion was discussed. The original amendment that the Senator from New Mexico filed on this matter used that number. However, as I and the staff went more deeply into the issue and saw how uncertain the deliberations of the conference were, we figured that, rather than using a specific number, it would be better to start out with, as the Senator described it, open-ended appropriations, but obviously reserving the clear right to cap that on the next appropriations vehicle if we felt that was necessary.

Mr. PROXMIRE. Will the Senator yield to permit me to obtain the yeas and nays on this? A Member on our side is anxious for the yeas and nays—not this Senator, but another Senator.

Mr. SCHMITT. I have no problem with that.

Mr. PROXMIRE. Mr. President, I ask for the yeas and nays on the pending amendment.

The PRESIDING OFFICER (Mr. ABDNOR). Is there a sufficient second? There is not a sufficient second.

The yeas and nays were not ordered.

Mr. PROXMIRE. I will do that later.

Mr. SCHMITT. I will protect the Senator's right.

Mr. MATSUNAGA. Mr. President, will the Senator from New Mexico yield for a question?

Mr. SCHMITT. I am happy to yield to the distinguished junior Senator from Hawaii.

Mr. MATSUNAGA. Under the Senator's amendment, will the unemployed of all States be eligible for the extension?

Mr. SCHMITT. This amendment proposed by the Senator from New Mexico is silent on that. That, of course, would be determined by the authorizing legislation. But I would be most surprised, as I am sure the Senator from Hawaii would be surprised, if that authorizing legislation, reported back as a conference report or some other vehicle, would in any way discriminate against any State. That would be inappropriate, and I am sure the Senator would join me in opposing such discrimination.

Mr. MATSUNAGA. As I understand it, there is presently a requirement that within the State, the unemployed rate must be 6 percent or 6.5 percent before one is eligible for it.

Mr. SCHMITT. As I understand the current formula, the insured unemployment rate must average at least 4 percent for the most recent 13-week period, as well as exceed 120 percent of comparable 13-week periods for the 2 preceding years; but as a consequence of the reconciliation bill of 1981, that figure will go to 5 percent on September 25.

So, in that sense, there would be discrimination, depending on the level of unemployment.

It is a catch-22 situation, in that you will not be eligible for the extended benefits under the existing program, having nothing to do with this amendment. But you will not be eligible under the existing program unless the unemployment rate among insured workers reaches 4 percent today, and as of September 25, it will have to reach 5 percent.

It is one of those situations in which you benefit one way if unemployment goes up, but nobody benefits with a rising unemployment rate.

Specifically answering the Senator's question, this amendment does not in any way try to predetermine or determine the authorizing legislation that might come before this body, in whatever form that might be.

Mr. MATSUNAGA. Mr. President, I ask unanimous consent that my name be added as a cosponsor of the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DECONCINI. Mr. President, will the Senator from New Mexico yield for a question?

Mr. SCHMITT. I am happy to yield to the distinguished junior Senator from Arizona.

Mr. PROXMIER. Mr. President, the majority leader is here, and if the Senator will permit me, I ask for the yeas and nays on the pending amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. DECONCINI. Mr. President, I do not want to go over what the Senator from Hawaii may have asked, but I

just walked in on the discussion of 5 percent versus 4 percent on the insured. Does this provide funds if that trigger is lowered?

Mr. SCHMITT. Again, it is silent on whatever authorizing action Congress may take. It merely provides an opportunity for whatever supplemental benefit program is enacted by Congress for appropriations to be available for whatever Federal fund advances are required.

Mr. DECONCINI. So I can take it that if that trigger were lowered by Congress before the 25th, or whatever it is, this would cover the appropriation.

Mr. SCHMITT. It is the understanding of the Senator from New Mexico that if that trigger is lowered, it is already allowed. This amendment would apply only to any modification of the extension of the existing extended benefit program.

Mr. DECONCINI. So, to answer the question, I understand that it would not affect—

Mr. SCHMITT. It would not affect that.

Mr. DECONCINI. Even if the trigger were lowered, it would not affect it. This really applies to the extension.

Mr. SCHMITT. This applies to the extension. If the trigger were changed, the existing appropriations authority would apply, and the funds currently available in the unemployment trust fund, including whatever Federal fund advances were needed in the event trust funds were depleted, could be applied to that changed situation.

Mr. DECONCINI. Mr. President, if the Senator will yield for a unanimous-consent request, I ask unanimous consent that the junior Senator from Arizona (Mr. DECONCINI) be listed as a cosponsor of the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DECONCINI. I also thank the Senator from New Mexico for bringing this to the Senate's attention. I think it is very important for the State of Arizona with the depressed copper industry and unemployment now close to 9 percent in the State of Arizona.

Mr. SCHMITT. Mr. President, I appreciate the Senator's cosponsorship.

I might add this is not entirely unrelated to the efforts he has joined me and others in to try to convince the administration that some steps must be taken to prevent the loss of that basic industry through purchases for the stockpile or other such remedial measures.

In this case for the copper workers we are providing an additional cushion that gives us time in order to implement what those measures might be.

It is absolutely clear to this Senator that the copper industry as well as other basic industries in this country are under serious threat that is a new

threat. We have seen cycles in the copper industry many times. I know both Senators from Arizona have grown up with the copper industry as I have. They cannot claim to have been born in a copper pit as I can. But, nevertheless, they have grown up with it, and we have seen cycles based generally on supply and demand fluctuations and occasionally on labor-management difficulties.

But in the current situation we are seeing the gradual erosion of a basic industry which is copper production, smelting, and refining, as a consequence of a world market situation over which we have currently almost no control.

It is a situation where many nations are producing copper at whatever the price may be in order to keep the cash flow into the treasuries. The oversupply that we have in the world market in addition to the recessionary trends in this country at the present time are practically destroying the industry and I have a great fear will destroy the industry if allowed to continue unchecked.

In addition to that because of other laws and other problems with which our smelting and refining industry is faced we have seen a gradual migrating of smelting and refining activities abroad.

All of these are part of a package affecting the copper industry and other industries in different ways for which this extension of benefits will provide an additional cushion and buy us a little bit of time so that we can come to grips with these more fundamental problems affecting basic industry.

Mr. President, I ask unanimous consent that Senator PERCY be added as a cosponsor to this amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SCHMITT. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Mr. President, I apologize for keeping the Senate waiting, but we are in conference on the tax reform bill, and it is my hope when we complete our conference on the tax reform bill that we will have a provision with reference to unemployment compensation.

I might suggest, I think I can say accurately, that we have been negotiating with Senators on both sides of the aisle, have been negotiating with the administration, we have been negotiating with the AFL-CIO, and it has been discussed with the chairman of the

House Ways and Means Committee, Chairman ROSTENKOWSKI.

We are sincere in our efforts, and we want to accommodate many Senators who have indicated an interest. I see Senator DIXON on the floor, Senator METZENBAUM, Senator KENNEDY, and others; Senator LEVIN and, obviously, Senator SCHMITT, who has this amendment, Senator HEINZ and others, who are interested, and we moved as quickly as the distinguished minority leader, Senator ROBERT C. BYRD, asked us to do.

We had hearings. Then last week we had the Metzenbaum-Schmitt resolution which, in effect, asked the conferees to make provision in the conference on the Revenue and Reduction Act for unemployment compensation.

As I understand this amendment, it would indicate that we have the funds, contingent appropriation for the funds, needed for supplemental unemployment compensation benefits and for the administration of such a program. The amendment does not mandate such a program. It does, however, clear one hurdle. If the House-Senate conference would agree on a FSUB program, it will be included in the conference report on H.R. 4961.

So it is a good amendment and it should be adopted. We support the amendment.

Again I would suggest that for all those Senators who feel strongly about unemployment compensation, whether it is supplemental benefits or extended benefits, we are going to try to accommodate the concerns of every Senator. We hope we can accommodate the concerns of every Senator. But again I would indicate that, without trying to pass the buck, so to speak, it is a matter of great concern also to the chairman of the Ways and Means Committee, and that is where it would normally originate, in the Ways and Means Committee.

It is my hope he can be persuaded. He certainly is not opposed to it. I think at the present time he is studying the matter, and I am prepared to say that if Chairman ROSTENKOWSKI offers an amendment or offers a proposal in the conference, certainly the Senator from Kansas will not only consider but will probably accept it. I have not seen it yet.

Mr. DIXON. Mr. President, I wonder if my friend from Kansas will yield for a moment?

Mr. DOLE. Yes.

Mr. DIXON. I want to thank my distinguished friend from Kansas for enlightening us on this question.

The Senator from Illinois has this concern: Last Friday our Governor called me on the phone about noon and suggested that we were going to trigger off this past Monday with reference to our extended unemployment compensation benefits. I am happy to say later on Monday afternoon we re-

ceived word that that had not occurred; that through some calculation errors which were discovered over the weekend we have not yet triggered off. But I am assured by the Governor and everyone in our State administration that the occurrence is imminent, within a matter of days, and not in excess of a maximum of 2 weeks, probably a shorter period of time, so that the concern of the Senator from Illinois is, What can we do here to address an emergency situation involving over 55,000 individuals in my State who would fall off unemployment compensation benefits unless we can quickly find a vehicle?

I appreciate everything the Senator from Kansas is saying, and I understand the problems and the complications of the conference committee of the two Houses. I am trying to find some way here to get some assurance for my State, and those who are desperately concerned about the emergency nature involved, about how we can quickly address this problem, and particularly from the standpoint I am concerned about in the whole country, but particularly from the standpoint of a grave emergency in my State.

Mr. DOLE. Mr. President, if the Senator will yield, the Senator from Kansas is aware of the problem in Illinois and which has been called to his attention by the distinguished Senator from Illinois and also Senator PERCY. We will take care of the Illinois problem. In every proposal I have seen that will be done, and I can almost assure the Senator it will be done. In my view, the earliest vehicle, the vehicle that is most likely to pass this Congress, even though it is controversial and the one that will offer the quickest relief to all the States concerned, is the bill now in conference, the Revenue and Spending Reduction Act.

We will finish our work—we had hoped to finish it tonight and now it appears maybe tomorrow night. There is every hope the House will act on that provision next Wednesday and the Senate will act on Thursday or Friday of next week. Once that is done it is done if, in fact, we have this provision in it. If not, the next opportunity will be the debt ceiling extension which was reported from the Senate Finance Committee this morning.

Mr. DIXON. Mr. President, will the Senator from Kansas yield for just a moment? I hear what the Senator is saying. I agree with what the Senator is saying that the best vehicle is the bill in the conference committee. But, of course, my distinguished friend would be the first to concede that that still is a little iffy, the passage of that bill successfully in both Houses is still iffy, and should that not become a reality, the Senator from Illinois would like his distinguished friend to know that the debt limit bill may be too late for my State. So I need some kind of

assurance for the people of our State about something we can do that is a reality, that they can attach to with some sense of security.

Mr. DOLE. Well, there is some question about the Revenue and Spending Reduction Act which is now in conference, but I see the momentum going in the direction of passage. The President now is using the full force and impact of his office and his personal efforts on that bill.

I just left a meeting with the chairman of the Ways and Means Committee, your colleague from Illinois, DAN ROSTENKOWSKI, with BARBER CONABLE, the ranking Republican on the Ways and Means Committee, with the distinguished Senator from Louisiana, Senator LONG, the ranking minority member on the Senate Finance Committee; with Jim Baker from the White House, Don Regan, the Treasury Secretary, and other administration officials with reference to the revenue and spending reduction package.

It is our hope this will be acted on favorably before a week from this coming Friday, and to me that would provide rather urgent relief needed in the State of Illinois and other States.

Mr. DECONCINI. Mr. President, will the Senator yield for a question?

Mr. DOLE. I cannot predict today that this bill will pass. Well, I will predict it is going to pass. I may be wrong, but I will predict it is going to pass.

Mr. DIXON. My distinguished friend, if my friend from Arizona will let me pursue it one moment further, I would like to see us put on this bill, and other vehicles around, the necessary assurance for the people of my State and others that can be momentarily similarly situated through some kind of legislation that will protect us, because while I respect very much the political judgment of my distinguished friend from Kansas, I would have to suggest that there is some respected thought that the issue is still in doubt, and I say for the people of my State they do not want this question to be in doubt concerning honorable, hard-working people who are entitled to be protected in these difficult economic times.

Mr. DOLE. Can I say in response that I would hope—and again I know the urgency of it—that I understand the urgency of it. I discussed it again with the chairman of the Ways and Means Committee. In my view, if something happens and the conference falls apart or it appears the bill cannot pass, that is all going to be known in the next 3 or 4 days. That would still give the Ways and Means Committee time—in fact they have a bill ready to bring up and pass in the House of Representatives rather quickly, and we could pass it on its own which, I think, is the second-best solution. But I hope we do not leave

on any recess until we have acted on an unemployment compensation provision, and I am prepared to stay here to do that.

Mr. DIXON. I thank the Senator from Kansas.

Mr. DeCONCINI. Mr. President, will the Senator yield?

Mr. DOLE. Yes.

Mr. DeCONCINI. I first want to thank the Senator for enlightening us on his feeling toward the conference and adopting the additional unemployment compensation.

I want to know if the Senator from Kansas is prepared to also enlighten us on his feelings if the conferees were to consider an amendment that would lower the 5-percent trigger down to 4 percent on the insured compensation? Is that a possibility or does the Senator care to express his views?

Mr. DOLE. You are looking at permanent changes?

Mr. DeCONCINI. It is my understanding, and I will stand corrected if the Senator can enlighten me on it, that sometime in September the figure goes to 5 percent from 4 percent.

Mr. DOLE. Right.

Mr. DeCONCINI. And I wonder if, during the conference, the Senator also was inclined at all to leave that at 4 percent.

Mr. DOLE. We are looking at that problem. We would hope to make some permanent change in the law, in effect, grandfather some of the States that might be affected. It is my hope—and, again, it is only a hope—the chairman of the Ways and Means Committee really has original jurisdiction here and I do not want to trespass into his prerogatives. But that certainly is one of the considerations and we would hope that any changes we make would go up until April 1 of next year to give the Congress some time to respond in 1983.

Mr. DeCONCINI. If the Senator would yield, I take from that that the Senator from Kansas is not at all ill at ease about considering that as a possibility, at least grandfathering it or extending it for some period to time.

Mr. DOLE. The Senator from Kansas is not. In fact, I suggested a proposal that I know the AFL-CIO is looking at and many other people are looking at. We believe we made a lot of progress in the last few weeks.

Mr. DeCONCINI. I thank the Senator.

Mr. DOLE. I yield the floor.

Mr. SCHMITT. Mr. President, I ask unanimous consent that the distinguished Senator from Oregon, Senator HATFIELD, be added as a cosponsor of this amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. PROXMIRE. Mr. President, will the Senator yield for a question?

Mr. SCHMITT. I am happy to yield to the Senator from Wisconsin.

Mr. PROXMIRE. As the Senator knows, I have raised a question of this being open ended on an appropriation, which is most unusual and which concerns this Senator and I am sure concerns others because it could be an enormous amount since it runs all through next year. Would it be the Senator's intent to recommend a specific dollar appropriation at the earliest opportunity, say, on the continuing resolution, if we have one, or on the 1983 appropriation?

Mr. SCHMITT. I think it is entirely appropriate for us to do that. But, as you can see from the preceding colloquy, there is a great deal of uncertainty on what that dollar figure might be, based on the authorizing legislation.

But I would say, as soon as the Congress has acted or it appears that it is certain to act, I think the Appropriations Committee should review it and see what the maximum dollar figure ought to be.

Mr. PROXMIRE. So as soon as the authorizing committee—the Finance Committee in this case—provides us with the basis for our calculations, the Senator would recommend a limitation?

Mr. SCHMITT. I think that is entirely appropriate and, yes, this Senator would certainly do that.

Mr. PROXMIRE. I thank the Senator.

● Mr. LEVIN. Mr. President, I rise in support of the amendment offered by the Senator from New Mexico to provide funds for additional unemployment benefits for those individuals who have been unemployed for more than 39 weeks.

Last week when the Senate instructed the conferees to the Tax Equity and Fiscal Responsibility Act to formulate a program which would provide for between 10 and 13 weeks of additional unemployment benefits the unemployment rate was at 9.5 percent. Since then, the unemployment figures have been updated for July, with the result that an additional 300,000 Americans are known to be out of work, and the unemployment rate is up to 9.8 percent.

What this means is that the need for a Federal supplemental unemployment benefit program is clearer now than ever before. As more and more people exhaust their first 39 weeks of unemployment benefits, they are going to be entering a job market where unemployment is still on the rise. The likelihood, then, is that there will be no paycheck to follow the cutoff in unemployment benefits. For people who have already been unemployed for 39 weeks and who have already gone through some, if not all, of their savings, there may simply be nowhere for them to turn.

In my State of Michigan, the unemployment rate rose from 14.3 percent to 14.4 percent in July. This adds one

more month to the string of over 30 months of double-digit unemployment. So far this year, almost 50,000 residents of Michigan have exhausted their first 39 weeks of benefits. That number is sure to rise in the months to come, and the need for a Federal supplemental benefits program will increase. It is totally right that the Government offer a hand to these individuals to keep their lives intact when Federal policies helped to create the unemployment in the first place, and when current national policies consciously accept unemployment as a weapon against inflation.

I urge my colleagues to support this amendment, as I urge the conferees to the tax bill to act quickly and develop a Federal supplemental benefits program.●

Mr. KENNEDY. Mr. President, last week on reconciliation, the Senate voted 83 to 14 for a combined program of extended and supplemental unemployment benefits to protect the long-term unemployed.

Many of us are concerned that the proposal now being considered by the tax conferees fall short in two important respects.

First, too many States that deserve assistance will be denied participation in the supplemental benefits program.

Second, a cutoff date of April 1, 1983, for both the extended and supplemental benefits is unfair, because it will shut off this help arbitrarily, regardless of the unemployment rate.

I intended to offer an amendment to Senator SCHMITT's amendment that would have expressed the sense of the Senate on these issues.

My amendment contained two significant provisions to deal with the defects in the Finance Committee proposal.

First, every State that qualifies for extended unemployment benefits would also have qualified for the new supplemental benefits program.

Second, the cutoff for the program would be based on the unemployment rate, not an arbitrary date. The rate specified in my amendment was 8.7 percent, which is the rate assumed in the budget resolution for the first quarter next year. In other words, if the unemployment rate meets the 8.7-percent target assumed in the budget resolution, the supplemental benefit program would trigger off at the same time specified in the Finance Committee proposal. But if unemployment continues high, the program would continue, as it should.

My amendment would have insured that up to 52 weeks of unemployment benefits would have been paid in 37 States until the national unemployment rate dropped below 8.7 percent. The Finance Committee proposal would have paid supplemental benefits in just 7 States between now and De-

ember 31 according to Department of Labor experts and in 15 additional States between January 1 and March 31, 1983.

I decided against offering this amendment at this time because of the important and sensitive negotiations going between the House and Senate conferees on the reconciliation and tax bill.

However, I want to let my colleagues know that I intend to follow the developments in the conference very closely.

I hope the conference produces an unemployment benefits program I can support. But if they do not I intend to press ahead on this issue at every opportunity until we have a program that will really help the unemployed working men and women in this country.

Mr. HATFIELD. Mr. President, in a moment Senator KENNEDY wishes to be heard on this bill. I ask unanimous consent that we temporarily set aside this amendment to act upon the committee amendment and get that out of the way and then come back to this in order to provide Senator KENNEDY an opportunity to speak and then, of course, to vote on it.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE AMENDMENT

Mr. HATFIELD. Mr. President, I believe we have a committee amendment pending. I, therefore, move the adoption of the committee amendment.

The PRESIDING OFFICER. The clerk will report the committee amendment.

The legislative clerk read as follows:

On page 104, beginning on line 16, strike down through line 2 on page 107 and insert new language.

Mr. HATFIELD. Mr. President, this has been cleared on both sides of the aisle that this would be acceptable to the minority and the majority. I move the adoption of the committee amendment.

The PRESIDING OFFICER. The question is on agreeing to the committee amendment.

The committee amendment was agreed to.

Mr. HATFIELD. Mr. President, I move to reconsider the vote by which the committee amendment was agreed to.

Mr. PROXMIRE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. HATFIELD. Mr. President, could you indicate how many committee amendments we have remaining to act upon?

The PRESIDING OFFICER. It is the understanding of the Chair that that was the last committee amendment.

Mr. HATFIELD. That is the understanding of the managers. So that all

committee amendments have been acted upon, the first group was adopted en bloc and then we have acted upon the remaining exemptions, is that correct?

The PRESIDING OFFICER. That is correct.

Mr. HATFIELD. So that all we have left on this bill are the amendments to be offered by the individual Members?

The PRESIDING OFFICER. That is correct.

Mr. HATFIELD. I thank the Chair.

Mr. President, I wish to announce again that at this point in time we have an amendment to be offered by Senator ARMSTRONG; possibly two amendments, one more from Senator SCHMITT; an amendment by Senator CHAFFEE, an amendment by Senator MATTINGLY, an amendment by Senator LEVIN, an amendment by Senator DURENBERGER, an amendment by Senator HELMS, an amendment by Senator BUMPERS, an amendment by Senator DECONCINI, and possibly an amendment by Senator JOHNSTON.

I really believe, if we can keep these amendments moving, that we can finish at a very reasonable hour this evening. We are working on time agreements on all of them and so far we have been able to have an expectation of getting a time agreement on most of them. It would appear that we may have about 3½ hours of amendments and whatever time would be required for the votes and that we could finish this bill up, as I say, at a decent hour.

I am very hopeful that all Senators will restrain themselves from offering amendments in addition to those I have read. It is certainly not in any way to cut off any rights of a Senator, but I have found in the past that if we can get an idea of where we are with what amendments are being considered it tends to expedite the handling of the bill.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. HATFIELD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE AMENDMENT

Mr. HATFIELD. Now, Mr. President, according to the clerk, we have a technical matter here that I would like to clear up. That is, when we had the unanimous-consent agreement last night on the matter of chapter VI relating to foreign operations, we had adopted, in effect, only part of the committee amendment. Now I would like to move to adopt the remaining part of the committee amendment under chapter VI. That is on page 33,

beginning on line 18, and over to page 34, line 2.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HATFIELD. Mr. President, I ask that we continue to set aside temporarily the amendment of the Senator from New Mexico in order that the Senator from Colorado may engage in a colloquy with the ranking minority member of the committee, the Senator from Wisconsin (Mr. PROXMIRE), which will possibly avoid an amendment by the outcome of the colloquy.

I yield to the Senator from Colorado.

Mr. ARMSTRONG. Mr. President, I appreciate the courtesy of the Senator from Oregon. I do want to discuss at least briefly the housing provisions of the bill. Upon the conclusion of my own remarks and those of others, it may be that I shall want to offer an amendment.

To put the question of housing subsidy in some sort of historical perspective, I would remind my colleagues that since 1937, Congress has committed more than \$250 billion to Federal housing subsidies. Of this amount, \$140 billion has been committed since 1974 alone. At the present time, 3.3 million American households, about 8 million people, receive Federal housing subsidies without committing a single additional dollar; 550,000 housing units are waiting to be built or occupied. Their funding has already been authorized or appropriated by Congress.

Mr. President, I do not intend to labor these points. I merely state them, and at the proper moment I will be glad to elaborate or discuss in detail the philosophy underlying our housing program. I do want to make one additional point just to set a frame of reference for the question which I want to propound to the managers of the bill.

The point is this: The record of subsidized housing in this country is one of the sorriest, most miserable record of one failure after another that anybody can imagine. The section 8 program, which we are now getting out of, or we are phasing out, was put in to get rid of the 235 and 236 programs which did not work out very well, and they, in turn, came into existence because the old public housing program was not working out very well. After it had been in place a few years everybody agreed it was a failure. We have had one failure after another. Each time a failure was perceived, we created a new program. It is alarming to me that instead of terminating the programs which had failed, we have simply brought new programs on-stream. That is just so much philosophy.

I would like to get to the factual basis of the situation as I see it. The

1981 reconciliation bill authorized \$17.3 billion in new fiscal year 1983 assisted housing spending authority. On February 5, 1982, President Reagan proposed eliminating from the fiscal year 1982 budget some \$9.3 billion, which was to fund new section 8 unit construction. That request was later amended and the President sought to reduce section 8 new construction spending by \$5.9 billion. The President also proposed recapturing \$7.4 billion in budget authority previously authorized by Congress but had not yet been used. Some unused budget authority had been authorized by Congress as far back as 1959.

Recaptured budget authority, it is my understanding, can be recycled, meaning that the recaptured funds can be used to finance other projects. In previous years Congress has committed funds to build and occupy housing but a variety of delays prevent unit construction and occupancy. Units not completed or not occupied comprised the so-called pipeline in the Department of HUD. Right now, as I understand it, there are 550,000 units in the so-called pipeline.

Many of these, about 70,000, are new section 8 units for which funds have been authorized by Congress but are not built. They cannot be built because interest rates and cost overruns have increased so much that neither tenants nor the Government can afford the high rents which are necessary to pay the costs associated with those units if they were to be built at the present time.

President Reagan proposed additional financing and cost subsidies to finance and help pay for the 70,000 units in HUD's pipeline. Specifically, \$6.35 billion in new interest rates and building cost subsidies were proposed.

As I understand it, and I want to be sure I am not misstating the facts, these new subsidies are in addition to the deep rental subsidies that paid as much as 90 percent of the unit rents, 20-year rental contracts, tax writeoffs which are more generous than in some other kinds of construction, and HUD technical assistance. The new subsidies are in the form of interest rate buy down, the financing adjustments factor, and payments for cost overruns that occur from the time the unit is authorized and the time it is actually built.

To pay for this pipeline buy out, HUD proposed using part of the recaptured budget authority and, if necessary, section 8 new construction funds not rescinded.

Mr. President, I believe that that brief explanation brings us up to where we were at the time of the supplemental appropriation which passed the Senate in July of this year. I believe I have accurately stated the facts, although I will admit that the details are somewhat hazy and I want

to be sure that I have not inadvertently gotten something out of sequence.

The question I would like to focus on is this: First, what did Congress do in response to the President's proposals, and, second, how does the current bill, that is, the latest supplemental, the one that is now before us, relate to what we have previously done?

In finally passing the supplemental appropriation bill in July, we rescinded \$4.09 billion in budget authority for new starts under section 8, which was \$2 billion less than was requested, and we appropriated \$19.59 billion for assisted housing in 1982 and 1983 including funds for new starts, Indian housing, public housing rehabilitation, moderate income rehabilitation, public housing operating subsidies, interest rate subsidies, and cost overruns.

Under that bill, as I understand it, of the \$19.59 billion, HUD must defer \$1.75 billion of budget authority until 1983.

This mandate could be waived if HUD failed to capture \$5 million in unused budget authority which, in turn, was to be used to provide money for interest rate subsidies.

As I understand it—and I apologize to the managers for propounding my question in such lengthy fashion, but it seems to be important that the record be clear and that at least the Senators on the floor have a clear understanding of what we are doing. My question is this: Am I correct that the bill now before us mandates that \$1.75 billion of budget authority that, at HUD's authority, could have been spent in 1983 must now, on the passage of this legislation, be spent in 1982? If that is, in fact, the case, I would like to be clear on why that is necessary and why it would not be better to delete that provision from the bill.

Mr. GARN. Mr. President, the Senator is correct that this bill does mandate that the money be spent in fiscal year 1982 rather than fiscal year 1983. The Senator from Colorado propounded a rather lengthy explanation. I will take only a few moments to answer his question.

First, Mr. President, I want to give a little background, before I get to the specifics of his question on what has taken place in housing since January of 1981. President Carter recommended assisted housing units of 225,000. President Reagan's initial budget for fiscal year 1982 requested 175,000 units of assisted housing. The Senate Banking Committee reduced that even further to 150,000 units of subsidized or assisted housing. Then, in the negotiations in September, and the rescissions proposed after the HUD-Independent Agencies appropriation bill was enacted into law, and the vetoes of the urgent supplemental bills, we reduced the number of units even further. On a whole then, 52 percent of

all the rescissions in the 1981 budget came out of housing.

I am not talking about all of the budget dealing with Housing and Urban Affairs, I am talking about the rescissions coming directly from housing. A further example is in 1982, 82 percent of all the rescissions came out of housing.

Mr. President, I am not suggesting that there is not room for more savings. I am suggesting that, at least in this short period of time, housing has certainly taken more than its fair share of the budget cuts. There are 12 other subcommittees within the Appropriations Committee. If they had done as well, we would have been much closer to a balanced budget.

Mr. President, I give that explanation just so all our colleagues know what role housing has played in the discretionary cuts to achieve the cuts mandated by the budget reconciliation in the last 2 years and what has been requested by the President.

To get specifically back to this question of the \$1.75 billion, on April 15, the Secretary of HUD announced that the administration would support completion of approximately 70,000 housing units in the pipeline by requesting the use of \$3,700,000,000 for financing adjustment and \$2,650,000,000 for cost amendments. The administration's plan assumed the availability of approximately \$7,400,000,000 in recaptured authority.

When the urgent supplemental was enacted, Congress assumed that only \$5 billion of recaptures would be available to fund the planned buyouts of the pipeline and, consequently, reduced the amount rescinded.

Due to the uncertainties associated with the recapture estimates, we even provided that an additional \$1.75 billion of fiscal 1982 funds could be merged with recaptures to assure sufficient resources. It now appears that, despite our best efforts, OMB intends to defer rather than release this \$1.75 billion, even though recaptures to date are only approximately \$2.4 billion—way below their estimates.

The availability of the additional \$1.75 billion would assist approximately 34,000 housing units. Since we now know that recaptures will be insufficient to fund the proposed buyout, I proposed bill language that would eliminate OMB's option of deferring the \$1.75 billion.

I say further that this is not new money. It was appropriated in the 1982 bill of December 1981.

It seems to me with these dramatic cuts in housing, which I supported and pushed for, when we have eliminated new starts in the section 8 program and with the housing industry in the trouble that it is in—we certainly defeated here, with the President's veto, the so-called Lugar bill—at least it is

reasonable to make certain that this \$1.75 billion of previously approved money is made available to assist those 34,000 units. It does not have impact as far as new money being appropriated.

The simple answer to the Senator's question, with all that background, is, yes, that is exactly what I am requesting in this bill, to overturn OMB's decision to defer that money until next year.

Mr. ARMSTRONG. Mr. President, I am grateful to the Senator from Utah, the distinguished chairman, for his explanation. I want to comment on it briefly and then propound one additional question, which I think will be properly addressed to him.

My comment is, while it is true that the bill before us does not provide for additional budget authority, it does move that budget authority forward from 1983 to 1982. The implication, it seems to me, is that additional money will be spent. That is argumentative, depending on later expenditure. But it does have an effect on this year's spending and the borrowing which will have to take place in fiscal year 1982. I am sure the Senator will agree.

Mr. GARN. I agree that it does change it by 1 month, because we are at the end of fiscal 1982. That is all we are talking about. If we are in this building season and we move into that pipeline, that makes sense. The basic disagreement is will it be spent in 1983 or 1 month sooner, at the end of 1982?

Mr. ARMSTRONG. I think the Senator will agree it might be more than a month. It might be as little as a day but it might be as much as 364 days. In fact, if subsequent developments indicate the need to rescind those funds, say in January of next year, if they had not been spent, they would still be available for further consideration.

Mr. GARN. Let me correct myself. When I say spend, I should not have used that term. I should say committed.

Mr. ARMSTRONG. I know exactly that point.

Mr. President, I also want to acknowledge before I move on to the question which I want to propound in addition, that there is, in my judgment, no committee of the Senate which has a better track record of actually curtailing some of these programs than the Senate Banking Committee under the chairmanship of Senator GARN. He is absolutely correct in his observations about the drastic reductions in the rate of increase in the section 8 housing program which he has outlined earlier.

I do think it is important to keep in mind that, while the number of units is declining year to year, that is the number of new units being constructed. All of the units built in 1975, 1976, 1977, 1978, and so on, remain and will remain to be subsidized by the taxpay-

ers of this country for many, many years to come. Indeed, those units which are built in 1982, some of them, may be under taxpayer subsidy for as much as the next 39 years.

So we are not talking, in any case, even if we did not build one single new unit, of reducing the amount of section 8 subsidized housing. The question is how fast should we increase it?

Mr. President, I just observe in passing that I think the section 8 housing program is one of the most scandalously abused programs which has ever been enacted. I say that fully cognizant of programs like food stamps, in which there are alleged to be serious abuses; of cost overruns in the Defense Department, of which there are well-documented instances of abuse; of the allegations of corruption in the construction of highways and public works projects, and all of the other ripoffs which have come to light over the years. I still say that, in my own personal view, after careful investigation over the last 5 or 6 years, there is no program that I personally know of which has been as scandalously abused as the section 8 housing program, or which has larger and more profound and less understood cost implications. What we do is authorize in that program and appropriate for something which will be tiny the first year but which continues for 40 years thereafter. That is how, with low outlays, we have committed nearly \$150 billion in section 8 spending in the last 8 years.

My view, contrary to what the Senator from Utah has said, is that we should never build another section 8 unit in this country, not even one, as far as I am concerned.

Now, I do not say that where we have made a commitment for the many, many units that have been committed in the last 8 years we ought not to keep those commitments, and it is in recognition of that that two things have happened. First, we have decided to cut this off and only build the pipeline units. Second, that last year, I believe on August 13, there was signed into law legislation which contained some very extensive amendments to the statute requiring substantive reforms of the section 8 program.

I call those reforms to the attention of the Senator from Utah and ask if he is aware of the status of implementation of those reforms by the Department of Housing and Urban Development. I am referring to those provisions which were included in last year's bill, such things as increasing tenant's contribution, limiting the Secretary's discretionary fund, eliminating preference for tandem financing, providing payments for unoccupied units, getting out the illegal aliens who are presently in many units. We have had testimony of a huge number of illegal aliens in section 8 subsidized housing units. And on and on, all of

those reforms. Is the Senator aware of whether or not those have been implemented?

Mr. GARN. First of all, let me respond to the Senator's comment about going ahead with previous commitments.

I agree with the Senator on that completely, and I do not intend at all to recommend for 1983 any new starts under any circumstances for the section 8 program. I agree with the Senator. It has been an incredibly wasteful program. There would have been no new starts in 1982 had we passed the rescission earlier. I will not get into all that detail, but when I talk about the size of the rescissions it is not just that we are cutting off new starts in the future. We have rescinded a great deal of previously appropriated money and only because the Congress did not act on my recommendations on the rescission in 1982, that we will get some new starts in 1982. It was simply a matter of not acting rapidly enough and some of the rescissions then could not be implemented.

As far as the changes, concerning tenant contributions and other changes to the housing programs, I think the Senator from Colorado knows very well I supported his amendments, I offered them myself, I fought for them in conference with the House, and, finally, we were able to get a number of them through last year.

HUD has been able to implement what they can. It is up to us now, in the 1983 authorization bill and subsequently then in the appropriations bill, whether we give HUD the tools to implement these changes. However, they can only go so far. As the Senator knows, we do not have a 1983 housing authorization bill yet. I wish we did. The politics of 1982 are quite different. Last year, I had the first authorization bill passed and the first appropriations bill passed. This year we have virtually no authorization bill passed and no appropriations bills have passed either body.

So I can only answer the Senator's question that HUD will do what we tell them to do in the 1983 budgets.

Mr. ARMSTRONG. Mr. President, I am not greatly reassured by that response because in August of last year, 1 year ago, this Congress not only told HUD to take certain actions, a statutory enactment of the Congress of the United States signed into law by the President required HUD to take certain actions which today have not yet been taken.

I have a letter under the date of August—

Mr. GARN. If the Senator will yield, I do not disagree with that. I do not think HUD administratively has been moving as rapidly as they could. But, the point I want to make is that in the

1983 budget assumptions—and again we do not have an authorization bill yet—the savings are figured in the recommendations from HUD in their budget request. What I am trying to indicate to the Senator is that if we stick to the budget request, they will have no choice. They will not have the money. But I cannot promise what this body will do. I will do everything I can, as I have in the past, to make sure that those budgets are not exceeded either in the authorization process or in the appropriations process.

Mr. ARMSTRONG. Mr. President, it seems to me that the straightforward way for us to handle this is to simply condition further expenditures from the section 8 program on the implementation of the regulations which were passed 1 year ago.

I have a letter of August 2 of this year from the Secretary of HUD and, frankly, his response to my repeated inquiries about why the regulations have not been implemented comes down to this: "Look, the issues are complex. We have a lot of offices and we are busy."

That is no doubt why it took from May to August to answer my letter.

Well, I understand the issues are complex. I have spent years studying them. The General Accounting Office has studied them. Congress has studied them. Congress enacted approximately two dozen quite specific reforms. These were not recommendations. They were not reports of managers. These are not committee reports. These are the statutes of the United States, the law, I suggest to the Senator that since they have not been implemented I do not think we ought to go on and spend another nickel in section 8 money unless we have to until those are implemented.

Mr. President, for two reasons I am going to send an amendment to the desk and it is going to do two things. The amendment has this effect. First of all, it says that the extra \$1.75 billion which will be spent in 1982 over and above what would have been required under prior legislation will not be required to be spent, and, second, it says, and I will just quote:

That none of the funds available to the Department of Housing and Urban Development may be obligated for housing assistance prior to the issuance of final regulations pursuant to the housing and community development amendments of 1981 and prior authorization acts.

In other words, first, we are not going to advance the spending of nearly \$2 billion into this fiscal year. Second, we are not going to let them get by without issuing the regulations which they are required to issue under prior statutory enactments of this body.

UP AMENDMENT NO. 1209

Mr. ARMSTRONG. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The bill clerk read as follows:

The Senator from Colorado (Mr. ARMSTRONG) proposes an unprinted amendment numbered 1209.

Mr. ARMSTRONG. Mr. President, the amendment is brief, but there is really no need to have it read, and I ask unanimous consent to dispense with the reading of it.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Beginning with "and inserting" on page 34, line 10, strike out everything through page 35, line 2, and insert the following: by striking "\$870,969,000" and inserting "\$770,877,000" and by striking "\$15,228,518,000" and inserting "\$13,478,518,000" in the second proviso under this heading: *Provided further*, That none of the funds available to the Department of Housing and Urban Development may be obligated for housing assistance prior to the issuance of final regulations pursuant to the Housing and Community Development Amendments of 1981 and prior authorization Acts.

Mr. GARN. Mr. President, I would like to have a copy of the amendment if I could, and I should like to respond to the Senator from Colorado on his amendment.

At times like this, I get a little bit frustrated, because the Senator from Colorado and I do not disagree on what we want to achieve. We are in total agreement on the waste and inefficiency that has occurred in section 8. I tried to indicate before that we have made remarkable strides. As a matter of fact, I doubt that anybody in January of 1981 believed that we could have made those changes because we tried for years and we failed over and over again.

I think this amendment goes too far. First of all, I feel very strongly that previously appropriated money ought to be spent. I think for the matter of a month of making those commitments I would oppose it. If the Senator wants to propose an amendment which would send a very strong signal to the Department that "they better do this or else"—I would support the Senator and recommend the managers of the bill accept it.

However, the second part of the amendment of the Senator goes far beyond what we have been talking about concerning section 8. The Senator is talking about people who are already living in homes before he and I were here and had anything to do with housing programs. The Senator is talking about the operating subsidy which I would like to see diminished, if not totally eliminated, at some time in the future. However, the kind of mandate the Senator is putting in this amendment is going to tell us that

until HUD can go through the process of getting to their final recommendations people are going to be kicked out on the streets.

As much as I agree with the goals of the Senator, I think his amendment is far too restrictive, and would upset HUD far beyond the intent of what the Senator wants to accomplish.

(Mr. SYMMS assumed the chair.)

Mr. ARMSTRONG. I say to the Senator that first I think he is mistaken as to the effect of my amendment. Certainly, if it has the effect that he suggests, I would withdraw it.

Mr. GARN. As the Senator stated it to me, that was the impression.

Mr. ARMSTRONG. No. It says that additional funds may not be obligated. It does not say that where we have people who are already in subsidized housings, we cannot get out of that, even where we have made bad deals. We have made some horrendous deals around the country. We have to honor the deals we have made. The question is, Should we make long commitments? My view is that we should not.

Second, the Senator said that my amendment would withhold the expenditure of funds until the recommendations of HUD can come up. At this point, I am not looking for recommendations. I am looking for them to follow the law. We are not talking about something somebody sent them in a letter or that is from a committee or a speech on the floor. We are talking about the law.

That is what we implemented last year, after years of struggle. As the Senator pointed out, Congress, thoughtfully and laboriously, and after hearings and markups and extensive consideration on the floor and in conference, wrote into law certain requirements about how these housing programs would be administered, and they are just ignoring us down there. They are stalling and not getting the job done, and I am not satisfied.

Mr. GARN. In reading the Senator's amendment, I think it would do what I have said.

None of the funds available to the Department of Housing and Urban Development may be obligated for housing assistance.

I agree with the Senator and would like to cut even more. But, in my opinion the language in the bill goes too far. That is not just a 2 by 4 between the eyes. It is a sledgehammer in cutting off the use of funds for housing assistance.

The Senator said he is interested only in future commitments, not previous commitments. This amendment refers to previous commitments, also.

Mr. ARMSTRONG. The Senator from Colorado did not write those words. They were written by the Legislative Counsel. I cannot believe that they have that effect. I do not read it that way. But if the Senator wishes to

suggest different words which he thinks would more precisely express the intent, I will be glad to accept any reasonable amendment.

Mr. GARN. Neither the Senator from Colorado nor I are attorneys. But this does not need an attorney's interpretation. It is straightforward. It simply says, "None of the funds available to the Department of Housing and Urban Development may be obligated for housing assistance," period.

I do not see any interpretation there at all. I suggest that possibly the best course of action rather than continuing the debate is to vote.

Mr. ARMSTRONG. Mr. President, in view of the question the Senator has raised about whether the language accomplishes its intended purpose, I inquire of the manager how he would like me to proceed.

I will be happy to modify my amendment or withdraw the amendment and reoffer it in a different form.

I do not believe that the legislative counsel's language will have the effect that the Senator has suggested. If it did, it would not be a responsible amendment, and I would not wish to offer it.

If the Senator wishes to suggest corrective action, I will be happy to take it or to seek legal advice.

Mr. HATFIELD. Mr. President, if the Senator is asking me, I suggest to the chairman of the subcommittee, Senator GARN, and to Senator ARMSTRONG that possibly the Senator from Colorado withdraw his amendment at this time, permitting us to take up some other noncontroversial amendments, and work out a modification that would satisfy the chairman of the subcommittee, Mr. GARN. I think that would be the most expeditious way. Then we can bring the amendment back.

Mr. GARN. The problem with that is that this is a two-part amendment. Even if we could solve the second part with some language, I still am opposed to the \$1.75 billion being eliminated. That is why I suggested that perhaps we should go ahead and vote.

Mr. HATFIELD. I will defer to the Senator's judgment.

Mr. ARMSTRONG. Mr. President, as the conversation develops, I ask unanimous consent to withdraw the amendment, and I shall resubmit it as two separate amendments. I hope the second half will enjoy the support of the Senator from Utah; and for the first part, I will have to look for support in other quarters.

The PRESIDING OFFICER. The Senator has a right to withdraw his amendment.

The amendment is withdrawn.

The question occurs on the amendment of the Senator from New Mexico.

Mr. HATFIELD. Mr. President, I ask unanimous consent that the amend-

ment of the Senator from New Mexico be temporarily set aside.

Without objection, it is so ordered.

Mr. DOMENICI. Mr. President, I do not have an amendment, and I will take only about 5 minutes of the Senate's time.

I support H.R. 6863, the fiscal year 1982 supplemental appropriations bill. This bill is well within the budget ceilings established by the fiscal year 1982 revised second budget resolution. Chairman HATFIELD and the chairmen of the various appropriations subcommittees should be commended for this effort.

H.R. 6863, as reported by the Appropriations Committee, provides an additional \$9 billion in budget authority and \$7.4 billion in outlays for fiscal year 1982. If this bill is enacted, Federal spending will still be below the budget ceilings by \$8.3 billion in budget authority and \$1.3 billion in outlays. Obviously, this Senator is not complaining about that. I am merely stating a fact.

The bulk of the funds appropriated in this bill, \$6.1 billion in budget authority and \$5.8 billion in outlays, pay for the cost of the October 1981 pay raise for Federal employees. The remainder provides supplemental appropriations for individual programs, including the economic assistance funds for the President's Caribbean Basin Initiative, employment, education, and transportation programs.

H.R. 6863 contains less money than the President's request. The Senate bill is \$1.7 billion below the President's fiscal year 1982 request in budget authority and \$1.5 billion below that request in outlays. This bill provides \$1.6 billion less than the President's request for defense, and provides more money than the President requested for education and transportation programs. I think the distinguished chairman has already explained the committee's reasoning in that regard.

The Senate bill is higher than the House companion bill by \$0.2 billion in budget authority and \$0.1 billion in outlays. In comparison to the House bill, the Senate bill provides more money for defense, less money for transportation programs, and slightly more than the Presidential request for the Caribbean Basin Initiative. The House bill provided no funds for the Caribbean Basin Initiative.

In closing my remarks, Mr. President, I would like to urge my colleagues to support H.R. 6863. I note, however, that we still must continue to exercise fiscal restraint and control the size of the deficit. I urge my colleagues to resist any amendments that would increase the cost of this bill. I compliment the chairman and other members of his committee for resisting amendments to this point.

Mr. President, I ask unanimous consent that a table showing the relation-

ship of the reported bill to the fiscal year 1982 budget resolution be printed in the RECORD at this point.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

H.R. 6863, FISCAL YEAR 1982 SUPPLEMENTAL

[In billions of dollars]

	Budget authority	Outlays
Revised second budget resolution.....	777.7	734.1
Current level.....	766.9	732.1
Action underway (ADAP in H.R. 4961).....	.4	
Amount remaining.....	10.3	2.0
H.R. 6863 as reported in Senate ¹	9.0	7.4
Less items already in current level.....	-6.7	-6.4
Less offsetting receipts affected by appropriations action.....	-3	-3
Net impact of H.R. 6863.....	2.0	.7
Amount remaining.....	8.3	1.3
President's request ¹	10.7	8.9
House-passed ¹	8.8	7.3

¹ Reflects Senate Budget Committee scoring of CCC borrowing authority.

Mr. HATFIELD. Mr. President, I wish to express my deep gratitude to the chairman of the Budget Committee, the Senator from New Mexico (Mr. DOMENICI), for his remarks.

I think it strengthens our hand a great deal to have the full and unqualified support of the chairman of the Budget Committee of the Senate. It is indicative of the new era wherein two committees, which historically have been at loggerheads or have been antagonists, have worked very closely in these days when we are trying to get control of Federal spending. It is only because of statesmanship such as that exhibited by the Senator from New Mexico that this has been accomplished.

It is interesting to note—and I should like to underscore one point—that the Senator from New Mexico is correct in stating that the Senate bill as reported is under the President's request by \$1.7 billion in fiscal year 1982 funds.

Also correct is the report accompanying the bill that indicates that the bill as reported is under the request by \$2.1 billion for a total fiscal year 1982 funds and other obligational authority.

At first blush, that may seem to be a contradiction, but there is no discrepancy. The budget figure does not include the President's request for defense reappropriation by \$346 million, which, in their scorekeeping, counts as fiscal year 1983 budget authority.

I wanted to make that one clarification, because it may appear to a casual reader that there are two sets of figures here. Really, there is only one set. It is only a matter of scorekeeping.

Does the Senator care to comment on that?

Mr. DOMENICI. Mr. President, I understand that discrepancy. It is just

a difference in the way of scoring new budget authority compared to the scoring of certain reappropriations of budget authority.

Before I yield the floor, I commend the distinguished chairman, not only for this bill. In the past 18 months, it would have been impossible for us to proceed, using the Budget Act in this institution and in the House, without the extreme cooperation and willingness to help exhibited by the chairman and the ranking minority member of the Appropriations Committee.

I thank them both for it.

We all know it is very tedious and difficult to use the Budget Act, and if they had not been cooperating, it would have been almost impossible. Then we all know we have left appropriations to the appropriators in terms of meeting targets, and I can say to this point they have done an admirable job.

Mr. PROXMIRE. Mr. President, will the Senator from New Mexico yield?

Mr. DOMENICI. I yield.

Mr. PROXMIRE. Mr. President, there is one other caution of which we should be aware, and that is in the unemployment compensation amendment it is open ended, and we can guess at what it will be, but it extends into 1983 and it could be several hundred million dollars, depending, of course, on what the Finance Committee and the Ways and Means Committee work out. It is an entitlement. We simply have to go on with it. It is not included in this supplemental.

Mr. DOMENICI. I thank the Senator for bringing that to my attention. I did not intentionally ignore it. Obviously I will be speaking to that when the tax bill, which will include it, comes to the Chamber. I make no commitments.

Mr. PROXMIRE. The reason I raise that point here is the appropriation for it is in this particular bill.

Mr. DOMENICI. There is a great deal of discussion taking place, I say to my good friend, the ranking minority member, by that conference that they are going to attempt to change tax laws with reference to treatment of unemployment compensation in the country in terms of the tax laws of the country such that any increase will be paid for. I do not hold them to that commitment. I merely say that I did not mention it because that is the expressed intention. If it does not work that way I will be in the Chamber saying we should do it anyway, I believe, because it is urgent, but we will say how much they have failed to fund it by changing the tax laws and by how many dollars, and we will call that to the Senate's attention.

I thank the Senator for reminding the Senator from New Mexico.

Mr. HATFIELD. Mr. President, I ask unanimous consent again to set aside

temporarily the Schmitt amendment in order for the Senator from Minnesota to offer an amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

UP AMENDMENT NO. 1210

(Purpose: To express the sense of the Senate that certain Federal agencies should set aside more research time and funding to develop and validate alternative nonanimal testing procedures)

Mr. DURENBERGER. Mr. President, I send an unprinted amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The bill clerk read as follows:

The Senator from Minnesota (Mr. DURENBERGER) for himself, Mr. DOLE, Mr. TSONGAS, Mr. PERCY, Mr. LEVIN, Mr. ROTH, Mr. JEPSEN, Mr. D'AMATO, Mr. LEAHY, Mr. HEINZ, Mr. STAFFORD, Mr. GORTON, Mr. RIEGLE, Mr. ABDNOR, Mr. MITCHELL, Mr. MOYNIHAN, Mr. FORD, Mr. LUGAR, Mr. BRADY, and Mr. SPECTER proposes an unprinted amendment numbered 1210.

Mr. DURENBERGER. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the appropriate place, insert the following:

Whereas Federal regulations require the Draize rabbit eye irritancy test for predicting human ophthalmic response in pesticides and household products; and

Whereas since development of this painful test over thirty-five years ago there has been enormous scientific innovation while the Draize test remains basically unchanged; and

Whereas the reliability of the Draize test has been called into question: Now, therefore, be it

Resolved, That it is the sense of the Senate that the Consumer Product Safety Commission, the Environmental Protection Agency, and the Food and Drug Administration set aside research time and funding to develop and validate an alternative nonanimal testing procedure.

Mr. DURENBERGER. Mr. President, on February 6, 1981 I was joined by Senators DOLE, TSONGAS, PERCY, DeCONCINI, and LEVIN in the introduction of Senate Resolution 65. Senators RIEGLE, JEPSEN, ROTH, ABDNOR, MITCHELL, MOYNIHAN, D'AMATO, LEAHY, HEINZ, STAFFORD, KASTEN, FORD, LUGAR, and GORTON have joined the original sponsors of the resolution which would allow the Federal Government to set aside time to research and develop an alternative nonanimal testing procedure to replace the Draize eye irritancy test.

For decades the Federal Government has supported animal research which benefits the health and welfare of humans. Although most researchers strive to give the animals the most comfortable living conditions, there is one test, the Draize eye irritancy test, that raises legitimate questions about

cruelty to the albino rabbits on which it is performed.

Over the past year, both the public and private sectors have made great strides toward alternatives to the Draize test. In the private sector, Revlon has pledged \$750,000, over a 3-year period, to Rockefeller University to fund exploratory research into nonanimal eye irritancy test alternatives. In addition, the Cosmetic, Toiletry and Fragrance Association (CTFA) has established a \$1 million fund, Avon has pledged \$750,000, Estee Lauder \$250,000, and the New England Anti-Vivisection Society has awarded \$100,000 to Tufts University—all for research to develop an alternative to the Draize test.

The public sector has also taken some encouraging steps in this area. The Consumer Product Safety Commission has expressed the need for alternatives to the Draize test, and if such alternatives were developed, the Commission would endorse the replacement of the Draize test. CPSC guidelines have recently reduced the number of rabbits used by about half. Although I am convinced that nothing short of total elimination of the test is necessary to halt the unnecessary pain albino rabbits are subjected to, I find the CPSC position to be a step in the right direction.

Unfortunately, Congress has been unwilling to go on record as being supportive of Federal Government efforts to devote additional research time and funds to develop an alternative to the Draize test. This amendment, Senate Resolution 65, has no budgetary impact, is supported by industry and consumer groups alike, and is worthy of every Member's support. Every day animals are subjected to cruel testing techniques. Certainly the Federal Government has a responsibility and obligation to work with private industry to find new testing procedures to not only insure the safety of consumers, but to also protect the rights of animals.

Mr. MOYNIHAN. Mr. President, I am most pleased to join with Senator DURENBERGER in cosponsoring an amendment to the Supplemental Appropriations Act, 1982 (H.R. 6863) expressing the sense of the Senate that the Consumer Product Safety Commission, the Environmental Protection Agency, and the Food and Drug Administration set aside research time and funding to develop and validate an alternative nonanimal testing procedure to replace the Draize eye irritancy test.

Several years ago, a number of thoughtful and concerned citizens, among them the Coalition To Stop Draize Rabbit Blinding Tests, brought to my attention the cruelty of laboratory tests being used to determine the eye irritancy potential of various cos-

metics and drugs. New products are tested in the eyes of rabbits and the rabbits are observed over a period of a week or more. The products are then graded for irritancy according to the degree of harm inflicted upon the rabbits' eyes. This procedure is known as the Draize test. Thousands of rabbits are used each year for this painful test which is administered without any anesthetic or other pain reliever.

On April 30, 1980, I asked all cognizant Federal agencies to look into alternatives and to encourage the companies which conduct the Draize test to work cooperatively toward finding painless, reliable and cost-effective alternatives. On May 21, 1981, I joined with Senator DURENBERGER in cosponsoring a sense-of-the-Senate resolution (S. Res. 65) calling upon the appropriate Federal agencies to specifically set aside research time and funding to develop an alternative to the Draize test. It is essentially this resolution that we introduce today as an amendment to H.R. 6863.

Since 1980 some progress has been made. On January 8, 1982, Carlos L. Perez, Acting Associate Executive Director for Compliance and Administrative Litigation, U.S. Consumer Product Safety Commission, wrote to Mr. Henry Spira of the Coalition To Stop Draize Rabbit Blindness Tests. Mr. Perez concluded his letter as follows:

I have requested our scientific staff to closely monitor this ongoing industry research. In the event that a reliable alternative test method for eye irritancy is developed, we will immediately take steps to replace the Draize test.

This is an encouraging sign.

It is most appropriate therefore for Congress to go on record at this time in favor of devoting additional Federal resources to finding an alternative to the Draize test. We can do this by adopting the amendment offered today by Senator DURENBERGER and myself.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. DURENBERGER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DURENBERGER. Mr. President, I send to the desk a technical modification of the amendment.

The PRESIDING OFFICER. The amendment is so modified.

The amendment, as modified, is as follows:

At the appropriate place, insert the following:

Since Federal regulations require the Draize rabbit eye irritancy test for predicting human ocular response in pesticides and household products; and

Since development of this painful test over thirty-five years ago there has been enormous scientific innovation while the Draize test remains basically unchanged; and

Since the reliability of the Draize test has been called into question: Now, therefore,

It is the sense of the Senate that the Consumer Product Safety Commission, the Environmental Protection Agency, and the Food and Drug Administration set aside research time and funding to develop and validate an alternative nonanimal testing procedure.

Mr. HATFIELD. Mr. President, I have discussed this amendment with the Senator from Minnesota, and we have arrived at an accommodation. I would, therefore, move the adoption of the amendment.

The amendment (UP No. 1210), as modified, was agreed to.

Mr. DURENBERGER. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. HATFIELD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. HATFIELD. Mr. President, we are just about ready to move to third reading. I have no other amendment at this moment.

Mr. PROXMIRE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. HELMS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HATFIELD. Mr. President, I ask unanimous consent that the Schmitt amendment be temporarily laid aside in order for the Senator from North Carolina (Mr. HELMS) to proceed.

The PRESIDING OFFICER. Without objection, it is so ordered.

UP AMENDMENT NO. 1211

(Purpose: To prohibit United States Government funds from going to meet the debts of insolvent communist countries which have not yet been declared to be in default of their debts)

Mr. HELMS. I thank the Senator from Oregon. I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from North Carolina (Mr. HELMS) proposes an unprinted amendment numbered 1211.

Mr. HELMS. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 108, after line 19, insert the following new section: "Notwithstanding any

other provision of this Act, no funds shall be paid out of the Treasury of the United States or out of any fund of a Government corporation to any private individual, partnership, corporation or association in satisfaction of any assurance agreement or payment guarantee or other form of loan guarantee entered into by any agency or corporation of the United States Government with respect to loans made and credits extended to the Polish People's Republic, the Socialist Republic of Romania, or any other signatory of the Warsaw Pact military alliance, while such country has not been declared to be in default of its debt to such individual, partnership, corporation or association. No interest on any claim against the United States Government or Government corporation arising under any loan guarantee programs with respect to loans made to a signatory of the Warsaw Pact military alliance shall accrue while that country has not been declared to be in default of its debt giving rise to that claim.

Mr. HELMS. Mr. President, I discussed this amendment with the manager of the bill. It relates to the Polish debt situation which has been discussed fully on this floor on previous occasions and the Senate has acted upon an amendment similar to this.

I am not going to go through the arguments. I will just ask the able manager of the bill if he has had an occasion to examine the amendment and if he finds it acceptable.

Mr. HATFIELD. Mr. President, I say to the Senator from North Carolina that I have examined the amendment and we are making a couple of checks with two other interested parties. I think we might be able to accept the amendment, depending on the clearance.

Mr. HELMS. I thank the Senator. In the meantime, while the check is being made, let me comment briefly.

Mr. President, there being so much violence and oppression around the world, it occurs to this Senator that it would be useful to remind ourselves, as well as the American people, of the continuing oppression of the liberties of the Polish people by the Polish Government.

And the best reminder would be for this Senate to take a position forthrightly because the brutal Communist martial law regime of General Jaruzelski remains in place. The Polish Government admits that at least 1,200 Polish citizens are imprisoned as a result of martial law, including virtually all the leaders of Solidarity. Independent estimates of the number of noncriminal Polish internees imprisoned by the martial law regime run as high as 4,000 to 6,000. Solidarity remains banned, and its leaders languish in prison for the heinous crime of demanding a modicum of freedom in a Communist country.

Even while this oppression of the Polish people by their government was continuing, American taxpayers were being forced to foot the bill for loans which the Polish Government cannot

now, and probably never will be able to pay back. Recently we passed the Kasten amendment to Public Law 97-216 which put an end to this abuse of the taxpayers. But the Kasten amendment only applied to fiscal year 1982. On October 1, the taxpayers could once again become subject to this unjustifiable imposition.

Currently, the Polish debt to Western banks stands at between \$26 and \$28 billion, depending on one's source. No one seriously maintains that Poland will ever be able to make good on these debts. According to most experts, it has been clear for at least 5 and possibly 7 years that Poland would never be able to repay its foreign debts. This was abundantly clear on hearings which I chaired before the Agriculture Committee some weeks ago. Yet, our Government, through the Commodity Credit Corporation, has continued to insure loans to Poland even after it was clear that Poland could never make up its existing debt.

This Senator has never been able to understand the reasoning behind our Government's policy of guaranteeing loans to Communist countries in the first place. It seems to me that if we are going to carry on trade with Communist countries at all, it ought to be on a strictly cash basis. But if that is not enough, it appears that the U.S. Government has been making good on these bad Polish debts without even requiring that the banks or exporters involved formally declare the Polish Government to be in default of its loans.

Specifically, the Commodity Credit Corporation of the Department of Agriculture paid out over \$500 million to various U.S. banks and exporting institutions to cover principal and interest due on loans by these banks to Poland over the period from August, 1981 to July 18, 1982. Yet no formal declaration of default has been made, as both Commodity Credit Corporation regulations and commonsense demand.

Mr. President, it seems to me to be just plain commonsense that if a nation cannot pay the debts which it owes that that nation is in default. The American taxpayer has been paying the debts of the tyrannical Polish military regime which, according to the Wall Street Journal and virtually all other credible observers, cannot now and never will be able to repay its debts to Western banks. Yet the Federal Government refuses to acknowledge the obvious—that Poland is in default. Why not?

Mr. President, I do not know the answer to that question. I do not know if anyone in the administration knows the answer. I do know, however, that the recognition by the U.S. Government of the reality that Poland is in default and a declaration to that effect would not in any way affect Po-

land's obligation to pay the debts it owes. International debts do not operate on the same principles as domestic bankruptcy proceedings. Before Poland could ever hope to regain credit internationally, it must first satisfy the debts it owes its current obligees. A declaration by the United States that the Polish Government is in default would be nothing more than a statement of the obvious. It would allow the United States to seize Polish assets and protect the American taxpayer by recovering at least some portion of the massive debt owed the United States by Poland.

The administration's persistent failure to declare Poland in default has produced three unfortunate results:

First, it has perpetuated the myth that Poland will someday be able to pay its debts;

Second, it has allowed bank presidents in both the United States and Europe to postpone the day of reckoning with their stockholders, when they will have to explain why they made massive loans to Poland when it was quite clear that Poland could not pay them back; and

Third, it has encouraged the massive refinancing of current Polish debts, which is just an exercise in throwing good money after bad.

Moreover, any delay in declaring Poland in default can only be a temporary one. The Wall Street Journal, in an editorial of August 2, 1982, explains why the pyramid of debt is bound to come crashing down soon enough, no matter how long an official declaration of default is delayed. It is better to recognize the reality of default now than to allow creditors to continue to pour money down the Polish drain through rescheduling.

Mr. President, I ask unanimous consent that the Journal editorial on this subject, entitled "Polish Debt Cover-Up," be printed in the RECORD at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered. (See exhibit 1.)

Mr. HELMS. Mr. President, this body recently passed an amendment offered by my distinguished colleague and good friend from Wisconsin (Mr. KASTEN). That legislation, recently signed into law by the President, prohibits any Government payments during fiscal year 1982 for the purpose of reimbursing any insured creditor who has bad loans outstanding from Poland unless and until Poland has been declared in default of its debt to that creditor or unless the President issues a statement explaining in detail why such payments, absent a declaration of default, are in the national interest of the United States.

Mr. President, for the reasons stated above and in the Wall Street Journal article, I doubt very seriously that the administration can come up with a

strong justification as to why such payments should continue. No such justification has to my knowledge been given by the administration. However, as I already indicated, the Kasten amendment only applies to fiscal year 1982; the American taxpayer will once again be subsidizing the Polish tyranny as of October 1 unless additional legislation is enacted.

This amendment applies not only to the military regime in Poland, but to all of the regimes of the Warsaw Pact. There are two outstanding characteristics of all Warsaw Pact nations; the first characteristic is the brutality of each regime toward its own people, and the virtual absence of personal liberty and human rights. The second is the chronic economic weakness of these countries. Either characteristic is reason enough for the United States not to be subsidizing such nations, particularly by the means of paying off their debts while avoiding a declaration of default.

Plainly and simply, this amendment prohibits the paying off of any loan guarantee by the U.S. Government or any Government corporation to any domestic individual or institution on loans made by that institution or individual to a Warsaw Pact nation until such time as that nation is declared to be in default of its debts. It really should not be necessary for us to offer this type of amendment in the first place, as loan guarantees, at least according to my understanding of Commodity Credit Corporation regulations, are meant to be collected only upon default of the nation to which credit was extended. At any rate, this amendment will clarify the situation by making it illegal, once and for all, to have funds from a Government loan guarantee program go to pay the debts of Poland or any other Warsaw Pact country unless and until that country has been declared to be in default of its loans. I hope my colleagues will adopt this sound and necessary measure.

EXHIBIT 1

POLISH DEBT COVER-UP

For some time it has been obvious that Poland is never going to repay the \$26 billion or so it owes Western banks and governments. At least not in our lifetimes. And there is no chance at all that the Polish regime will pay the \$10 billion in principal and interest due this year alone. So what are the Western banks doing about it? Negotiating some new credits for Warsaw.

That may sound like a funny way of doing business. But bankers, after all, have been known to throw good money after bad, especially if the customer is already into them for a pile. And like anybody else, bankers hate to admit mistakes. They prefer to cover them up as long as possible in the hope that the day of reckoning can be avoided.

A cover up seems to be just what is shaping up in current negotiations between Poland and the 460-odd European and

American banks that hold Polish debt. The bankers are portraying the emerging plan as a breakthrough in their efforts to wring debt repayments out of the collapsed Polish economy. To us, it looks more like a scheme that would allow the banks to defer increasing their reserves for bad loans.

At the least, we hope that bank regulators will cast a critical eye on the deal. Failure to face reality now, however painful to the banks, will only place the financial system in further jeopardy in the long run.

Under current proposals Poland would pay the \$900 million in interest it owes this year, and the banks would immediately send back a large part of the money to Poland in the form of short-term export credits. Just how much would be lent back is being negotiated; the banks reportedly want to limit it to 50 percent, while the Poles are holding out for 70 percent to 80 percent.

Obviously there are two ways of looking at a deal like this. One, favored by bankers, is that at least the West would be getting some of its money back. In addition, they argue, new credits are necessary to enable the Polish economy to recover; otherwise, there really will be no chance of Poland paying off its loans.

But \$500 million or so isn't going to do much for the Polish economy. It will disappear as into a black hole, and soon the Poles will be squeezing the banks for more—even optimists say it would take tens of billions to get the Polish economy back on its feet. But even that is an illusory goal. Communist economies simply don't work, as we should have learned in the first place from the Polish experience.

So while the banks might get some money back, at least in the short run, we suspect their real motivation is something else. Under the 1981 debt rescheduling agreement with Poland, the Polish debt due this year must be rescheduled by Sept. 10 (known ominously in banking circles as "cross-default day"). Otherwise even the 1981 agreement would fall apart, and the probabilities would greatly increase that either Poland would declare a debt moratorium or a Western creditor would finally lose patience and declare a default. Some creditors are already known to be eager to write off their Polish loans so they can apply the losses against taxes.

But for most banks this is an unpleasant prospect. They would have to charge off the loans against earnings, which would be embarrassing in the extreme for management. Warsaw and Moscow understand this perfectly well and have been playing on the bankers' fears to extract the best terms. Promise us new credits, they wheedle, and we'll help you maintain the fiction that interest is being serviced. Rescheduling of the rest of the debt can go forward. Pain will be avoided.

But of course the pain can't be avoided. Capitalizing the interest on the Polish debt, which is what's really being talked about here, will literally compound the problem. Sooner or later the debt pyramid will come crashing down.

Even in the short run there will be pain. Imagine the reaction of the money markets when they learn that the banks are going back into Poland. Can Western governments, which hold more than half the Polish debt, be far behind? Many would dearly love to return to the good old days of detente. The prospect of resuming large-scale financing of East bloc deficits as well as those of the West is not likely to bode well for interest rates.

If the banks really want to cut this deal, that's between them and their stockholders. But the public has a legitimate interest in seeing that the banks be forced to label the transaction for what it is: a cover-up of the Polish debt problem.

The bottom line of this deal is that if it goes through it will be an outright admission that Poland can't meet even its interest payments except by virtue of new credits. Bank regulators only recently got around to reclassifying the Polish loans from "substandard" to "doubtful" according to our sources. If the banks cave in to the Polish regime in the current negotiations, the next step should be to force the banks to speed up, not slow down, their setting aside of reserves for the losses that are sure to come.

Mr. KASTEN addressed the Chair.

The PRESIDING OFFICER. The Senator from Wisconsin.

Mr. KASTEN. Mr. President, I rise in support of the amendment offered by the distinguished Senator from North Carolina. The United States can no longer stand idly by while the Polish people struggle for political and economic freedom. There is no chance at all that Poland will make good on the approximately \$10 billion in principal and interest it owes the West this year. Yet the U.S. Government continues to bail out the Polish military regime by paying millions of dollars to commercial banks to prevent a declaration of Polish default.

Now some banks want to pour even more money down the Communist sinkhole and extend \$500 million in additional credits to Poland. This is despite the January agreement among governments in the West that Poland's 1982 debts would not be rescheduled until martial law was lifted, Lech Walesa was released, and the Polish Government resumed talks with Solidarity. If Poland's 1982 debts are not rescheduled by September 10, banks will have the option of calling in the Polish debt. The U.S. Senate should take the lead by voting today to prohibit payments to banks until they face reality and declare the Polish military regime in default.

Mr. President, nearly 8 months have passed since martial law was imposed in Poland. Our wait-and-see policy has not produced results. Solidarity leaders are now calling for mass demonstrations at the end of this month to mark the second anniversary of Solidarity's founding, and to pressure the Polish Government for real political and economic reform. Let us vote to support the people of Poland in their struggle by voting in favor of the amendment before us today.

Mr. President, I ask unanimous consent that three articles on the subject of the Polish debt be printed in the RECORD.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

POLISH DEBT COVER-UP

For some time it has been obvious that Poland is never going to repay the \$26 bil-

lion or so it owes Western banks and governments. At least not in our lifetimes. And there is no chance at all that the Polish regime will pay the \$10 billion in principal and interest due this year alone. So what are the Western banks doing about it? Negotiating some new credits for Warsaw.

That may sound like a funny way of doing business. But bankers, after all, have been known to throw good money after bad, especially if the customer is already into them for a pile. And like anybody else, bankers hate to admit mistakes. They prefer to cover them up as long as possible in the hope that the day of reckoning can be avoided.

A cover-up seems to be just what is shaping up in current negotiations between Poland and the 460-odd European and American banks that hold Polish debt. The bankers are portraying the emerging plan as a breakthrough in their efforts to wring debt repayments out of the collapsed Polish economy. To us, it looks more like a scheme that would allow the banks to defer increasing their reserves for bad loans.

At the least, we hope that bank regulators will cast a critical eye on the deal. Failure to face reality now, however painful to the banks, will only place the financial system in further jeopardy in the long run.

Under current proposals Poland would pay the \$900 million in interest it owes this year, and the banks would immediately send back a large part of the money to Poland in the form of short-term export credits. Just how much would be lent back is being negotiated; the banks reportedly want to limit it to 50 percent, while the Poles are holding out for 70 percent to 80 percent.

Obviously there are two ways of looking at a deal like this. One, favored by bankers, is that at least the West would be getting some of its money back. In addition, they argue, new credits are necessary to enable the Polish economy to recover; otherwise, there really will be no chance of Poland paying off its loans.

But \$500 million or so isn't going to do much for the Polish economy. It will disappear as into a black hole, and soon the Poles will be squeezing the banks for more—even optimists say it would take tens of billions to get the Polish economy back on its feet. But even that is an illusory goal. Communist economies simply don't work, as we should have learned in the first place from the Polish experience.

So while the banks might get some money back, at least in the short run, we suspect their real motivation is something else. Under the 1981 debt rescheduling agreement with Poland, the Polish debt due this year must be rescheduled by Sept. 10 (known ominously in banking circles as "cross-default day"). Otherwise even the 1981 agreement would fall apart, and the probabilities would greatly increase that either Poland would declare a debt moratorium or a Western creditor would finally lose patience and declare a default. Some creditors are already known to be eager to write off their Polish loans so they can apply the losses against taxes.

But for most banks this is an unpleasant prospect. They would have to charge off the loans against earnings, which would be embarrassing in the extreme for management. Warsaw and Moscow understand this perfectly well and have been playing on the bankers' fears to extract the best terms. Promise us new credits, they wheedle, and we'll help you maintain the fiction that interest is being serviced. Rescheduling of the

rest of the debt can go forward. Pain will be avoided.

But of course the pain can't be avoided. Capitalizing the interest on the Polish debt, which is what's really being talked about here, will literally compound the problem. Sooner or later the debt pyramid will come crashing down.

Even in the short run there will be pain. Imagine the reaction of the money markets when they learn that the banks are going back into Poland. Can Western governments, which hold more than half the Polish debt, be far behind? Many would dearly love to return to the good old days of detente. The prospect of resuming large-scale financing of East bloc deficits as well as those of the West is not likely to bode well for interest rates.

If the banks really want to cut this deal, that's between them and their stockholders. But the public has a legitimate interest in seeing that the banks be forced to label the transaction for what it is: a cover-up of the Polish debt problem.

The bottom line of this deal is that if it goes through it will be an outright admission that Poland can't meet even its interest payments except by virtue of new credits. Bank regulators only recently got around to reclassifying the Polish loans from "sub-standard" to "doubtful," according to our sources. If the banks cave in to the Polish regime in the current negotiations, the next step should be to force the banks to speed up, not slow down, their setting aside of reserves for the losses that are sure to come.

[From the Wall Street Journal, Aug. 2, 1982]

POLISH CREDITORS SEEK DEBT ACCORD BEFORE SEPT. 10, WHEN DEFAULT COULD BE CALLED

(By Frederick Kempe)

FRANKFURT, West Germany.—Western bankers are rushing to reach agreement on Poland's 1982 debt rescheduling ahead of Sept. 10, known among bankers as "cross default day."

That date appears in the small print of the rescheduling agreement for Poland's 1981 debts that was set last April. It essentially provides that if Poland hasn't kept principal and interest payments current, or if a rescheduling agreement covering 1982 doesn't appear at hand, any of Poland's creditor banks can withdraw its support for the agreement and call in Polish debt, attach Polish property or at least demand that payments be accelerated.

Bankers have tried to play down the importance of the Sept. 10 deadline. But interviews with West European and American bankers indicate that bankers are increasingly worried that if some kind of preliminary agreement on rescheduling 1982 debt isn't reached by then, the fragile alliance among Poland's Western creditors could fall apart and a declaration of default by some smaller banks might follow.

A PROMINENT DAY

"We wouldn't like to see this date appear anywhere in the press," one West European banker says, adding, "It is a prominent day and the reason we are all feeling under pressure."

Although most bankers contend that no bank would risk unraveling the agreement, a U.S. banker says lack of progress by that date could be a possibly "precipitating event which will make it hard for people not to take some kind of action."

It was with this date clearly in mind that a small group of bankers representing Po-

land's 503 Western commercial creditors met under secrecy Thursday and Friday in London to determine what negotiating position they would take when they met with the Poles. One West European banker said the group also set a day for the start of negotiations with Poland, which he said could come as early as this week and certainly within the next 10 days.

West German bankers indicate that their greatest worry is that the bankers' unity could be broken by small, regional U.S. banks who, they argue, don't realize the possible wider ramifications of a Polish default on the international banking system.

At a meeting of West German banks last Tuesday, even the smallest of Poland's German creditors agreed to the newest proposal for solving rescheduling problems, which provides that if Poland pays its 1982 interest, it will receive from banks half that amount in the form of fresh, short-term trade credits.

However, the parallel U.S. bankers' meeting in New York was poorly attended by the smaller, regional banks. One U.S. banker frets this might indicate that some U.S. banks aren't fully committed to the rescheduling course.

"We always have the worry that one of the small banks with a very tiny exposure might jump off after seeing that what we are doing doesn't seem to be working," one West German banker remarks.

Nevertheless, U.S. and West German bankers say they are thus far in agreement on their negotiating position with the Poles. They say they are in accord because they realize the necessity to reach some agreement quickly and because findings of Western economists visiting Poland indicate that the Poles haven't the resources to pay 100 percent of their 1982 interest due.

Banking sources drew an outline of the Western banks' negotiating stance. Although some of the details might change somewhat as Polish intentions become more clear, bankers say the framework won't be altered.

The banks will offer that if Poland repays some \$900 million due in 1982 interest to banks, the banks will then extend half of that amount in fresh, short-term trade credits. The banks would then also probably reschedule 100 percent of some \$2.5 billion in 1982 principal, even though they rescheduled only 95 percent of principal last year.

Otherwise, however, the terms would be almost identical to those of the agreement on 1981 debt, when Poland had \$2.4 billion in principal rescheduled over 7½ years with a four-year grace period, at 1½ points above the London interbank offered rate and including a 1 percent rescheduling fee.

This offer is still far from Poland's current wishes. West German bankers say the Poles are demanding that they get 80% instead of 50% of their repaid interest back in the form of short-term trade credits. The Poles want to receive this money in bits and pieces as they make partial payments instead of in a lump sum after all their interest is paid. Moreover, Poland has also asked for an additional \$300 million as a finance credit from banks, which one U.S. banker calls "a nonstarter."

SETTING LIMITS

"The Polish side has put forward some extreme requests and now we are setting our limits," one West German banker says. He explains that the only way Poland would get more than 50 percent of its interest payments back in the form of fresh loans is if it agrees to a rescheduling of less of its princi-

pal. For instance, the banks might give Poland 60 percent of its interest in loans, if it agrees to only 95 percent rescheduling of debts instead of 100 percent.

The most prominent factors in the negotiations will be how the two sides react to conflicting pressure. The bankers face the threat of a moratorium on repayment if Poland doesn't get fresh credit. West German bankers say this threat hasn't ever been explicitly expressed, but it is nonetheless clear to all of Poland's creditors.

"I don't want to say that the Poles are blackmailing us, but they won't begin their interest payments before they know the banks will give them a percentage in fresh loans," he says.

On the other hand, the Poles face the threat if they declare a moratorium that all of Eastern Europe will be cut off by Western financiers and that they themselves will be surrendering the last chance they have of eventually getting more money from banks and Western governments.

A West German banker says Poland has significantly improved its liquidity situation at his bank and other institutions. He believes Poland will easily have enough money to pay the second installment of some \$45 million on the unrescheduled 5 percent of 1981 principal, which will fall due Aug. 15. He says he "has no doubts" Poland will make the payment.

Moreover, the latest figures from the Bank for International Settlements, a sort of central bank for central bankers, show Poland held accounts in Western banks totaling \$640 million at the end of March, down from \$720 million a year earlier. Clearly, the banker said, statistics show Poland is withholding 1982 interest payments so far this year not because it doesn't have some, albeit limited, resources, but because it intends to use nonpayments as leverage to get the best agreement possible out of Western banks.

[From the Wall Street Journal, Aug. 6, 1982]

WESTERN BANKS, POLES TO DISCUSS DEBT PLAN IN WARSAW NEXT WEEK

FRANKFURT, WEST GERMANY.—Western bankers plan to travel to Warsaw next week to discuss with Polish officials a proposal for deferring Poland's 1982 commercial debt.

Banking sources said representatives of national agent banks managing Poland's debt would be accompanied by advisors from the London-based law firm, Coward Chance Solicitors. Coward Chance also assisted Western banks during 1981 Polish debt talks.

Western bankers said the meetings with Poland's foreign trade bank, Bank Handlowy, and Polish Finance Ministry officials would take place some time next week, depending on when preparations are completed. They weren't more specific.

The proposal was discussed by Western banks in a flurry of meetings last week in London, New York and Frankfurt. It envisions recycling into new short-term trade credits 50 percent of Warsaw's roughly \$900 million in 1982 interest arrears once the payments are made.

The plan aims to clear the way for rescheduling probably 100 percent of Poland's roughly \$2.5 billion in 1982 principal falling due this year.

As in 1981, the banks are insisting that interest due this year be paid before any agreement deferring the principal can be

signed. West German bankers have said the financially strapped Poles haven't made any payments on its interest or principal debt so far this year.

Western banks are rushing to reach an initial agreement with Warsaw on the 1982 rescheduling agreement before Sept. 10, known as "cross default day." If some arrangement isn't reached by that date, which appears in the small print of the accord deferring Poland's 1981 debts, creditor banks can withdraw from negotiations and call in Polish debt or claim Polish assets. "We are mainly worried about how smaller banks will behave if the deadline isn't met," one banker said.

Worried by the time factor, bankers also noted that Bank Handlowy has posed some additional demands. The Poles are reportedly asking that 80 percent of their interest payments be turned around in the form of fresh credits. Moreover, Bank Handlowy was reported to be requesting an additional \$300 million credit line from the consortium of 503 Western banks.

Mr. KASTEN. As chairman of the Subcommittee on Foreign Operations, I am prepared to accept this amendment. This amendment is very similar to amendments which we have brought forward on the floor on two or three different occasions. Although it has slight modifications and variations, I think it continues to bring the issue of the problems of the Polish debt before the Senate and therefore before the administration.

In previous times, I have had to work with the other body on some kind of compromises on language, and it may well be that I will have to do that once more. But I think that the intention of the amendment and the importance of the issue, means that this amendment ought to be accepted. I am pleased on behalf of the Foreign Operations Subcommittee to say that we should accept this amendment.

Mr. PROXMIRE addressed the Chair.

The PRESIDING OFFICER. The Senator from Wisconsin.

Mr. PROXMIRE. Mr. President, I have great sympathy for this amendment, and I am sure it has solid merit. But I am very reluctant, as the minority manager, to simply go ahead and let us vote on it without having an opportunity to discuss this with other Members of the minority party who may feel differently about the amendment and should have an opportunity to study it and make their decision on it.

It is my understanding that some members of the Foreign Relations Committee, who I think would be very interested, do not even know about the amendment.

I am very sorry about that, because I am as anxious as the manager is to get moving and to get out of here at a reasonable hour tonight and to do our business in an orderly and cooperative way. But I do think I have an obligation to make sure that Members of the Democratic Party who are interested in this amendment would at least have a chance to know about it.

For that reason, I would suggest the absence of a quorum unless somebody else wishes to speak. I yield the floor.

Mr. KASTEN. Will the Senator withhold for just a moment?

Mr. PROXMIRE. Yes.

Mr. KASTEN. I would just like to suggest to my senior colleague from Wisconsin that this issue is on the list of amendments. It says, "Helms amendment on Polish debt" and the issue has been on that list for at least 8 hours.

Mr. PROXMIRE. Yes; I know that.

Mr. KASTEN. So nobody is trying in any way to sneak anything through.

Mr. PROXMIRE. I understand that.

Mr. KASTEN. Senators have had an opportunity to review the issue and review the amendment.

Mr. PROXMIRE. As I am sure my colleague understands, we have been moving in a kind of unscheduled way. We did not know when these things were coming up. I would hope it would only take a few minutes to make sure that they are aware of it. That is all.

Mr. HELMS. Will the Senator yield?

Mr. PROXMIRE. I am happy to yield.

Mr. HELMS. I am perfectly willing to do that. I did furnish the Senator with a copy of the amendment early today. I put it on his desk. I assumed that the staff examined it. I did the same thing with the majority side.

But the Senator is exactly right. He is obliged to check. I can understand that.

I would suggest that we set aside this amendment and call up another one and proceed further at the appropriate time.

Mr. HATFIELD. Mr. President, I ask unanimous consent to temporarily set aside Senator HELMS' amendment in order to proceed with Senator MATTINGLY's amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HATFIELD. Mr. President, I am reaching very closely to the end of my patience. I can assure the Senate that we have done our very best to accommodate every Member of this Senate, but unless the Members are willing to be on the floor to offer their amendments, I do not think it is a very equitable arrangement to ask of us who are managers to do as we did last Monday and to sit around here all afternoon and not have any business.

We are going to finish this bill tonight. I must say that I will call for third reading if there are no more amendments to be offered sometime later in the day, because we could get out of here between 6 or 7 o'clock tonight if we can move these amendments along.

We are already backed up with a request of the Senator from Massachusetts (Mr. KENNEDY) to wait until 3 o'clock for a possible amendment. We are already backed up on a Schmitt

amendment. Now we are backing up on a Helms amendment, and we have six other amendments to go.

And it is not an arbitrary matter that we have to finish this tonight. We have to finish it because we have only tomorrow to go to conference with the House of Representatives.

I urge Members on my side—in fact, I would ask the majority leader and possibly at his behest the minority leader to send out a hotline to Members of both sides of the aisle who have amendments to offer to be on the floor to offer their amendments, because I do not think we can finish this bill in a reasonable time otherwise.

Mr. BAKER. Mr. President, will the Senator yield to me?

Mr. HATFIELD. I yield.

Mr. BAKER. Mr. President, I absolutely agree with the distinguished manager of the bill. It is really unfair to the managers of the bill and to all Senators to waste the middle of the afternoon. If our previous experience proves a guide to what happens when you do that, you will end up at 7, 8, or 9 o'clock tonight with a string of amendments, people anxious to get votes, and unduly prolonging the session of the Senate.

I urge Senators who have amendments to come to the floor and offer them now and not to wait. If they do not do so within a reasonable time, and I would say 3:15 or thereabouts, if they do not indicate to us that they are prepared to do that, if the manager of the bill calls for third reading I will support him in that call or in that motion.

Mr. President, I would urge that Senators take heed. I will put out a notice on our hotline in the Republican cloakroom insisting that Senators who have amendments or who wish to speak on this bill come to the floor and do so.

Mr. HATFIELD. I thank the Senator.

The PRESIDING OFFICER. Is there objection to temporarily setting aside the amendment? Without objection, it is so ordered.

Mr. EXON. Mr. President, I will hold the floor temporarily for the manager of the bill on this side. I will simply say that I certainly agree with the statements made by the chairman of the Appropriations Committee and the majority leader. It seems to me we do great injustice to not only the institution but to our colleagues by what we conceive as continual delay and delay and delay. I have made the suggestion previously in jest to the majority leader that what we should do when we convene the Senate, at whatever time we come in, is we should immediately set the clock up to 10 o'clock at night. It would seem to me if we follow that procedure we would move more expeditiously. My heart

goes out to the majority leader because in all good conscience I know he tries to move things ahead.

For those on my side of the aisle who may be listening somewhere in the building, I would encourage them to come to the floor immediately to offer any amendments they have. If not, I would be pleased, as one on this side, to entertain third reading of the bill by 3:15. In fact, it might be a very good idea.

Mr. HATFIELD. I thank the Senator from Nebraska. He always impresses me as a man who expedites the business of the Senate whenever he participates.

Mr. President, I ask unanimous consent again to temporarily lay aside the Schmitt amendment and the Helms amendment in order that Mr. MATTINGLY may be privileged to offer an amendment at this time.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. HATFIELD. Mr. President, while we are waiting, I might observe that Senator BUMPERS of Arkansas a little earlier this afternoon shared with me a very interesting study that has been made by one of the Senator's office, which indicated that up to this time during this session one-third of the time that we have been in session has been in quorum calls. I am not in a position to verify that study except to indicate that that was his understanding of the study. If that is true, and I suppose it surprises me and yet it does not surprise me, I think that is a further indication of the matter of how not to do the public business.

Mr. EXON. Mr. President, while we are wasting time here, I might try and correct one impression that one might draw from the statements just made by the distinguished chairman of the Appropriations Committee. I have heard of that report. I believe it is accurate. I think, though, that it says that for one-third of the time that the Senate supposedly has been in session since the first of the year, we have been in session through quorum calls or on official recesses, and I think the recesses should be calculated into that. I think it does not say much for making good use of our time.

Mr. HATFIELD. Mr. President, I yield the floor to the Senator from Georgia.

UP AMENDMENT NO. 1212

(Purpose: To provide for the fixing of the wages of Government Printing Office employees in accordance with the Prevailing Rate System and the General Schedule, and for other purposes.)

Mr. MATTINGLY. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Georgia (Mr. MATTINGLY) for himself, Mr. ARMSTRONG, and Mr. ZORINSKY, proposes an unprinted amendment No. 1212.

Mr. MATTINGLY. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 64, between lines 2 and 3, insert the following new section:

Sec. 108. (a) Subsection (a) of section 305 of title 44, United States Code, is amended to read as follows:

"(a) The Public Printer may employ such persons as are necessary for the work of the Government Printing Office. He may not employ more persons than the necessities of the public work require."

(b) Section 5342 (a) (1) of title 5, United States Code, is amended by inserting "and the Government Printing Office" after "Executive agency".

(c) Section 5349 of title 5, United States Code, is amended—

(1) by striking out "the Government Printing Office," in subsection (a); and

(2) by striking out "section 305 of title 44," in subsection (b).

(d) Clause 9 of subsection (c) of section 5102 of title 5, United States Code, is repealed.

Mr. MATTINGLY. Mr. President, today Senator ARMSTRONG and I offer an amendment to the legislative branch section of H.R. 6863. It is language which is already included in title 44, section 305. It deletes, however, other language in current law relating to the method of establishing GPO, Government Printing Office, wages.

Under current law, the Public Printer is required to have a conference with representatives of the employees and work out an agreement on salaries and other compensation. If there is a disagreement, either side may appeal to the Joint Committee on Printing. The decision of the Joint Committee is final. The result is that in years when disputes arise, the Joint Committee on Printing simply sets the wages of GPO employees.

This language is all deleted. Employee salaries would be set by the prevailing rates of the Federal wage system.

Mr. President, what Senator ARMSTRONG and I are attempting to do is to change a policy that is not fair, that is inequitable. We seek to give the Public Printer, who has responsibility for operating the Government Printing Office, the authority to manage that office in the most efficient manner.

The Public Printer is appointed by the President of the United States and confirmed by the U.S. Senate. He should have the latitude to operate his business just as a manager in private business does.

The problem that has been identified in the Government Printing Office stems from the salary structure. I cite just a few of the findings which have been released by the GPO.

The salaries of the craft and industrial workers at GPO are on a mean average 22 percent higher than salaries paid to other Federal workers performing the same or similar tasks in other agencies who are paid under the prevailing rates of the Federal wage system.

The magnitude of this wage problem in certain divisions of GPO has been spelled out in a study of the 1981 earnings done by the GPO's own labor-management office. That study shows that over 55 percent of those who work in the composing division made in excess of \$30,000 a year annually, and that 55 percent of those in the electronic photocomposition department made in excess of \$35,000 a year annually. Those figures do not include salaries of supervisory personnel.

Mr. President, in comparison to those in the private sector, in 11 other cities, and based on figures researched by the Printing Industries of America, GPO pressmen earn up to \$6.48 an hour more—\$6.48 an hour more—than their private sector counterparts in Boston. GPO bookbinders earn \$16.68 as compared to \$8.46 an hour in Dallas.

In all the cities checked, the GPO workers earned substantially more than the private sector average for those particular occupations.

I might add, Mr. President, that they average more than anybody in the area surrounding Washington, D.C. Something is wrong and it needs to be rectified.

One survey found GPO bids 113 percent higher than private sector estimates for the same job. Personnel costs for in-plant production at GPO account for over 80 percent of the expenses as compared to 40 or 50 percent in the private sector.

Part of the wage problem in the existing GPO craft system is that nonrelated occupations, such as plumbers and compositors, are tied together for wage purposes. Thus, a plumber is paid a certain percentage of a compositor journeyman wages, although there is no discernible connection between the two jobs. The prevailing wage classification system proposed under this amendment would sever this connection and each occupation would be paid on its own merits. Such a pay structure would also do away with many of the barriers to entry and discriminatory aspects of the existing system at GPO.

Mr. President, the issue is simple. Mr. Danford Sawyer, the Public Printer, came before hearings held this spring by the legislative branch Appropriations Subcommittee, which I chair, and told of the costs that could be controlled in the Printing Office. He spoke of the high wage rates that were being paid and over which he had no control.

This needs to be corrected. The President appointed Mr. Sawyer and Mr. Sawyer must have the authority to run his own business.

Mr. President, there is nothing wrong with people getting paid exactly what they earn and should earn, a rightful and equitable wage scale. But, good grief, is there equity in a wage scale which is 22 percent higher than that paid other employees of the Federal Government doing the same work?

I have heard my colleagues on the floor of the Senate talk about the Davis-Bacon Act for years. This is the Davis-Bacon Act in reverse. This needs to be corrected. That is what this amendment is all about, fairness and equity within the Federal Government. Wages that will be comparable not only with the private sector but also with other wage earners within the Federal Government.

Mr. ARMSTRONG. Mr. President, I have heard it said there are three kinds of people in this world—people who make things happen, people who watch things happen, and people who always wonder what happened. I find myself somewhat in the latter category here. I am not sure what happened, but I want to congratulate my colleague from Georgia (Mr. MATTINGLY) for bringing to the attention of the Senate a problem of the utmost seriousness, which far transcends in its ultimate impact the dollar amount. That is the question of what is going on over at the GPO.

Mr. President, I am eager to speak in support of the amendment, of which I am proud to be a cosponsor. But I am not much inclined to do so until we can locate the presence of the Senator from Maryland (Mr. MATHIAS). He has a legislative interest in this matter, and out of courtesy to him, I would be very loath to proceed at this time until he has had a chance to be notified.

We have been trying to get together for several hours and have simply not had an opportunity to do so. Pending his arrival, Mr. President, I shall yield the floor, I have some remarks I want to make, but I would like the Senator from Maryland to be present. Then if my understanding of the circumstances is not factually correct, he will be in a position to set the record straight.

Mr. SARBANES. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. HATFIELD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HATFIELD. Mr. President, I ask unanimous consent that the Schmitt amendment be temporarily laid aside;

I ask unanimous consent that the Helms amendment be set aside temporarily; and that the Mattingly-Armstrong amendment be set aside temporarily in order for the Senate to consider an amendment by the Senator from Arizona (Mr. DECONCINI).

The PRESIDING OFFICER (Mr. MATTINGLY). Without objection, it is so ordered.

UP AMENDMENT NO. 1213

(Purpose: To prohibit the expenditure of funds for the remodeling, redecorating, or refurbishment of the office of the Commissioner of IRS and the General Counsel of IRS)

Mr. DECONCINI. Mr. President, I thank the chairman of the Committee on Appropriations. I send an amendment to the desk on behalf of myself and Mr. ABDNOR and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Arizona (Mr. DECONCINI), for himself and Mr. ABDNOR, proposes an unprinted amendment numbered 1213.

On page 74, after line 22, insert the following:

ADMINISTRATIVE PROVISION

None of the funds provided in this Act or Public Law 97-161 shall be used for the redecoration, refurbishment, or remodeling of the office of the Commissioner of the Internal Revenue Service or the office of the Chief of the Internal Revenue Service.

Mr. DECONCINI. Mr. President, I was shocked and outraged this morning to pick up the morning paper and read that the Commissioner of the Internal Revenue Service plans to spend \$85,000 to redecorate and remodel his personal office and the office of the IRS Chief Counsel, Mr. Ken Gideon. According to the article—and I had my staff confirm the numbers today—the Commissioner would spend \$5,650 to replace white modern chairs in his office with 10 mahogany and leather armchairs; \$5,617 for new blue carpet to replace the existing beige carpet; \$1,966 for a new conference table; \$4,015 for an additional door for his secretary; and \$886 for a remote-control device to open his door. These frivolous extravagances are bad enough, Mr. President, but to add insult to injury, the Commissioner wants to install a new and expanded kitchen for his office suite at a cost of over \$20,000, including \$15,000 to breakdown the walls to expand his existing kitchen facilities. The Commissioner wants to spend \$1,213 for a microwave cooking center, \$3,596 for new cabinets, and \$1,296 to cover the cost of a dishwasher, refrigerator, garbage disposal, and hot water heater. Commissioner Egger's existing kitchen has an electric range, under-the-counter refrigerator, and cabinets.

Mr. President, my amendment is simple. It would prohibit the use of any funds provided in this supplemental appropriations bill or in the con-

tinuing resolution for fiscal year 1982 (Public Law 97-161) for the redecoration, remodeling, or refurbishment of the Commissioner's office and the office of his General Counsel. The supplemental appropriations bill that we are considering today contains \$111.6 million for additional IRS activities, including the first major down-payment on the President's initiative to collect outstanding tax debt that is owed the Federal Government. The continuing resolution contains the regular fiscal year 1982 funding for the Internal Revenue Service.

Mr. President, my initial reaction to the news of this wasteful spending plan by the Commissioner was to hold up the IRS supplemental until we receive a commitment from IRS that they will not go through with this remodeling effort. But I support the President's effort to get started on a program for going after the hundreds of billions of identified tax debt owed the Government. We need to do that. But we do not need to stand idly by and allow the Commissioner of IRS slap the taxpayers of this country in the face and move ahead on a project to "goldplate" his own office at a price that most people pay to purchase a small, modest three-bedroom townhouse.

Mr. President, if this was the first instance of a top-ranking Government official spending thousands of dollars on furniture, redecorating, or remodeling, perhaps I would not be so shocked or critical. But it is not the first case, as we all know. Just a few short weeks ago, it was revealed that the Administrator of the Veterans' Administration had spent over \$50,000 to redecorate his personal office suite, including \$8,477 for a private bathroom and shower even though there was a bathroom just 30 feet down the hall; \$3,000 to refinish the floors of his office, and then decided to cover these same floors with carpet at a cost of \$6,085; \$3,520 for a judge's chair; and \$700 for prints from a Texas art museum. Then, in May, Senator ABDNOR, chairman of the Treasury, Postal Service, and General Government Subcommittee, on which I am ranking minority member, received testimony from the Federal Labor Relations Authority that its members had approved the expenditure of \$150,000 to purchase expensive desks, credenzas, and patio furniture for three offices at a time when their own storerooms were brimming over with unused furniture—some still in the packing crates.

Now we have the head of an agency responsible for collecting taxes going on a year-end shopping spree for new furnishings, new carpet, and a new kitchen that would cost as much as the average Arizona homeowner would probably spend on a small room addition to his house.

Mr. President, the American taxpayers are fed up with this type of wasteful expenditure of their tax dollars. How can we expect the citizens of this country to make the tough financial sacrifices to balance their own household budgets in the wake of deeper and more severe Federal budget cuts when our top Government officials cannot say "no" to the temptation to turn their business offices into quarters fit for a king? How can we look our constituents in the eye and say we are trying to hold down Federal spending when top Government officials are spending as much on their own offices as most people spend on a home?

Mr. President, yesterday was a golden opportunity for the Senate to tell the taxpayers that we will not spend \$736,400 for a third Senate gymnasium. We failed to do that by the narrowest of margins. Now, the next day, we have another golden opportunity to tell the American taxpayers that we will not allow our No. 1 tax collector to spend \$85,000 to redecorate and remodel his own offices. Let us not let this opportunity slip away.

I urge the adoption of the amendment.

Mr. PROXMIRE. Mr. President, will the distinguished Senator from Arizona yield?

Mr. DeCONCINI. I yield to the Senator from Wisconsin.

Mr. PROXMIRE. I congratulate my good friend from Arizona. I think this is an excellent amendment. The Senator certainly is to be commended for being so alert and so prompt and so timely and appropriate. I think he might agree with me that Commissioner Roscoe Eggers is a very able public servant, intelligent and efficient, but this is ridiculous, \$85,000 to decorate an office.

I can tell the Senator that in most cities in my State of Wisconsin that would be the biggest house in town, \$85,000. And then \$50,000 for the assistant to fix up "his digs," as they say, so that it adds up to a ridiculous and insulting amount, particularly coming from the head of the Internal Revenue Service, which, of course, is necessarily the group that collects taxes from 100 million Americans every year.

I congratulate the distinguished Senator and say that I am delighted to support his amendment. Speaking for my good friend, the Senator from Oregon, we are happy to accept the amendment. I will do all I can to see that it sticks in conference.

Mr. DeCONCINI. I want to thank the ranking member of the Appropriations Committee (Mr. PROXMIRE). He has led the charge on the floor on many occasions, and I have had the pleasure of joining him. I appreciate his support on this amendment, and also that of the Senator from Oregon.

I am prepared to vote on the amendment, Mr. President, and yield back the remainder of my time.

Mr. HATFIELD. I yield back our time.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Arizona.

The amendment (UP No. 1213) was agreed to.

Mr. PROXMIRE. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. HATFIELD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The question recurs on the amendment of the Senator from New Mexico.

Mr. HATFIELD. Mr. President, I ask unanimous consent that the amendment of the Senator from New Mexico be temporarily laid aside.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HATFIELD. Mr. President, I ask unanimous consent that the amendment by the Senator from North Carolina be temporarily laid aside.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HATFIELD. Mr. President, the pending amendment, I believe, is the amendment of the Senator from Georgia (Mr. MATTINGLY) and the Senator from Colorado (Mr. ARMSTRONG). Is that correct?

The PRESIDING OFFICER. That is correct.

Mr. HATFIELD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. HATFIELD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HATFIELD. Mr. President, I ask unanimous consent that the amendment of the Senator from New Mexico be temporarily set aside.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HATFIELD. I ask unanimous consent that the amendment of the Senator from North Carolina be temporarily set aside.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HATFIELD. Mr. President, I believe the Mattingly-Armstrong amendment is pending.

The PRESIDING OFFICER. The Senator is correct.

UP AMENDMENT NO. 1212

Mr. ARMSTRONG. Mr. President, President James Garfield once made the observation that things do not turn up in this world unless somebody turns them up. I think the issue which has been turned up by the distin-

guished Senator from Georgia in the amendment he has offered, in which I am proud to join as a cosponsor, raises an issue of very, very great significance—significance far beyond the multimillion-dollar cost implications which are engendered.

A few minutes ago, prior to the arrival of the Senator from Maryland, I delayed my remarks so that he could be present when I made them, and specifically so that if I am not in possession of all the facts about the operation of the Government Printing Office, he would be in a position to correct me, so that there would not be any misunderstanding.

At that time, when I spoke for just a moment earlier in the afternoon, I expressed my belief, which I hold very strongly, that the issue involved in the GPO goes far beyond the dollar implications because the Government Printing Office is a legislative agency. It is an agency which is under the direct management and control of Senators.

We are in the process of going through budget after budget. The Appropriations Committee is looking right in the eye of the head of every agency and saying, "Look here. This is a year when we have to tighten our belts, when we have to get things under control and do with less."

Mr. President, when the press begins to carry reports that a legislative agency is being operated in a less than economical manner; that, in fact, there may be substantial extravagance, substantial waste, unnecessary personnel; that the salaries may be out of line in a legislative agency, that is a cause for concern that goes beyond the dollars, even though they may be significant, because it should be up to Congress itself to set an example of prudence and responsibility in the handling of taxpayer funds.

It has been brought to my attention by sources which I believe to be well informed that personnel costs comprise nearly 80 percent of the total in-house printing costs at the GPO, compared with something like 40 or 50 percent in private sector printing business.

I am told that employees of the GPO are paid at excessively high rates. In fact, it was brought to my attention this afternoon that the Comptroller General of the United States has issued a report under date of July 2, 1982, in which, among other things, it is reported that at the Government Printing Office, craft and industrial workers receive wages some 22 percent higher than other Federal employees with the same jobs.

Furthermore, the average GPO employee is paid \$11.78 per hour, compared with only \$8.39 per hour for the same workers in the private sector.

In addition, GPO compositors earn \$14.35 per hour, compared to \$11.91 in the private sector.

Offset pressmen and other workers in the GPO are paid not only more than the private sector, but also, according to information which has been brought to my attention, are paid more than workers in comparable Government operations.

In recent months, the work done by the GPO has been declining, thanks in part to the efforts of the administration and Congress to reduce the burden of paperwork. Whether or not this is a permanent or temporary phenomenon remains to be seen, but certainly a reduction in the amount of paperwork is a goal we all share.

The money that the GPO produces from its sales of documents is supposed to offset a portion of the cost of operating the Government Printing Office. During the previous 3 years, the net losses to the GPO on such sales, I am told, is in excess of \$20 million.

The President has appointed, and the Senate has confirmed, Danford L. Sawyer as the Public Printer of the United States. In this office, Mr. Sawyer has been required by law to reduce the costs of GPO so that the agency will operate on a break-even basis. He has, I believe, attempted to follow these instructions. He has reduced unnecessary overtime. He has proposed reducing the work force by early-out retirement for eligible employees. He is closing some of the inefficient operations around the country.

In addition, I am told that Mr. Sawyer is seeking to bring GPO wages in line with those of other Federal employees.

A controversial court case recently brought home the question of whether or not some of the actions which the Public Printer has taken or proposes to take are fully consistent with the statute and with the direction of the Joint Committee on Printing.

That case, while I do not have it before me, in brief, revolves around the issue of whether or not the policy of furlough, the reductions in force, and so forth, was within his discretion. The court held that it was not within his discretion, as the result of a resolution recently adopted by the Joint Committee.

That is a source of concern, because the result of this sequence of events is that there have been widespread press reports that the Government Printing Office is not operating efficiently, that we are paying too much per employee, and that we have too many employees on board.

Yesterday, I met briefly on two occasions with the staff of the Joint Committee, and the information they gave me indicates that, as in most controversies, there are two sides to the story.

I do not know all the facts. My disposition is to believe the information with respect to the salary issue, which has been discussed by the report of the Comptroller General, that perhaps there is some need for reform in the payment of salaries at this agency. Possibly there is a reason why the salaries at GPO are out of line with other legislative agencies and the private sector, but at least my instinctive feeling is that that is not the case.

In addition, there is the question of the overall staffing of the agency.

Mr. President, it is for that reason that I have joined in sponsoring this amendment, and I have under consideration other amendments which would lead to reform of this situation.

In support of that, I submit for the RECORD a summary of the events which has been prepared by GPO, outlining the facts I have mentioned and which I think would be worthwhile for the Senate to have in its record, in entirety. It deals not only with the narrative of the appointment and management practices of the Public Printer, but also with the question of the volume of printing being done at GPO, the hiring freeze, the early-out retirement, the closure of bookstores, the proposal for wages which has been put forward by the Public Printer, the court case I have referred to, the action by the Joint Committee on Printing, and a comparison of the earnings of various GPO employees with the private sector and with other Government employees.

Mr. President, I send that summary to the desk and ask unanimous consent that it be printed in the RECORD.

There being no objection, the summary was ordered to be printed in the RECORD, as follows:

SUMMARY OF EVENTS

The U.S. Government Printing Office (GPO) is a legislative branch agency created by Congress in 1860. GPO's original mission was to provide printing and binding services to the Congress. Over the years its mission has expanded, and today the agency provides printing for all three branches of government, and is also responsible for the distribution and sale of government documents. The GPO's main plant is located at North Capitol and H Streets in Washington, D.C. It also has six regional printing plants, thirteen regional printing procurement offices, and twenty-seven bookstores scattered throughout the continental United States. The agency employs 6,200 people, and in 1981, produced \$181 million worth of printing in-house, and procured over \$464 million commercially. The head of the GPO, the Public Printer, is appointed to an indefinite term by the President of the United States with the advice and consent of the Senate.

In August 1981, Danford L. Sawyer, Jr., a successful publisher and advertising executive from Sarasota, Florida, was confirmed as Public Printer. Mr. Sawyer recognized that the GPO, since it is basically a manufacturing and distribution organization, was one government agency where sound business principles could be utilized to lower costs and increase productivity. During his

first year in office, Mr. Sawyer has sought to bring the rising costs associated with government printing under control.

Both before and after his confirmation, Mr. Sawyer spent months studying closely all aspects of the operation of GPO, and conferred at length with former Public Printers and other former, and present, GPO officials. In addition he familiarized himself with studies prepared by private management consultants regarding GPO operations, and by the General Accounting Office and the Department of Defense relating to GPO and federal wage scales. During this intensive study, the Public Printer found:

GPO PRINTING COSTS TOO HIGH

The in-plant printing costs at GPO are excessively high, and Congress and customer agencies are being overcharged for printing. For example, in a recent sampling over a one-month period, one-time bids for work over \$5,000 totaled \$495,064 from the private sector, as compared to \$1,053,507 from the Government Printing Office for the same jobs. The GPO bids were 113 percent higher.

One reason for this disparity between GPO bids and private sector bids is that personnel costs for in-plant production at GPO account for over 80 percent of expenses, as compared to 40-50 percent in the private sector.

SALARIES FOR CRAFT AND INDUSTRIAL WORKERS EXCESSIVE

The salaries of craft and industrial workers at GPO are, on a mean average, 22 percent higher than salaries paid to other Federal workers performing the same or similar tasks in other agencies who are paid under the prevailing rates of the Federal Wage System. The magnitude of the wage problem in certain divisions at GPO is spelled out in a study of 1981 earnings done by GPO's Labor Management Office. That study shows that over 55% of those who worked in the Composing Division made an excess of \$30,000 annually and that 55% of those in the Electronic Photocomposition Department made an excess of \$35,000 annually. Those figures do not include salaries of supervisory personnel.

In comparisons to the private sector in 11 other cities, and based on figures researched by Printing Industries of America, GPO pressmen earn up to \$6.48 an hour more (\$17.53 per hour as compared with \$11.05 per hour) than their private sector counterparts in Boston. GPO bookbinders earn \$16.68 as compared to \$8.46 an hour in Dallas. In all the cities checked, the GPO workers earned substantially more than the private sector average for those particular occupations. It should be noted that this excludes newspaper rates which do not apply to demand print shops, such as the GPO. It is also the case that other GPO craft workers, such as carpenters, earn higher wages (\$14.35 compared to FWS Scale in other Federal agencies of \$11.32 per hour), while GPO painters earn \$14.35 versus other Federal painters who earn \$10.76 per hour. Indeed, there are not any skilled craftsmen or industrial workers at GPO who do not earn more than their counterparts elsewhere (Attachments #2 and #3).

According to figures from the General Accounting Office, the GPO is higher than the FWS rate, ranging anywhere from 8.8 percent for forklift operators to 28.8 percent higher for carpenters. Even janitors make 21.4 percent more at the GPO. Compositors make 18.7 percent more, and bookbinders

earn 10.8 percent more. Comparisons to the regular wage scale were made at Step 5, which is the highest step of the FWS pay schedule. Step 5 is 12 percent higher than Step 2, which is the average prevailing private sector rate (Attachment #4).

GPO'S CRAFT SYSTEM CREATES NUMEROUS PROBLEMS

The legislation now being proposed includes provisions which would require the reclassification of all GPO workers under either the prevailing wage or general schedule classification system, and the payment of wages in accordance with those systems. For the white-collar General Grade workforce at the GPO the reclassification would have only a minimal impact, if any, since the GPO now follows the general schedule in its classification practices. However, for the GPO craft and industrial workers, reclassification under the prevailing wage system (and its printing and lithographic scales) would be a major alteration of the present journeyman craft system at GPO.

Part of the wage problem in the existing GPO craft system is that non-related occupations, such as plumbers and compositors, are tied together for wage purposes. Thus a plumber is paid a certain percentage of compositor journeyman wages—although there is no discernible connection between the two jobs. The prevailing wage classification system would sever this connection, and each occupation would be paid on its own merits. The prevailing wage classification would also do away with many of the barriers to entry and discriminatory aspects of the existing system at GPO.

OTHER LEGISLATIVE BRANCH AGENCIES FOLLOW PREVAILING RATE SYSTEM

Other legislative branch agencies, which have a significant number of blue collar workers, have adopted the prevailing rate Federal Wage Grade system to compensate those employees. The Architect of the Capitol has opted to follow the Wage Grade System for approximately 1800 of its employees, while the pay of the remaining 100 to 200 employees follows that of the General Schedule (GS). The Library of Congress pays approximately 2450 of its employees in accordance with the General Schedule. Over 2000 of their blue collar workers are paid under the Wage Grade prevailing rate system, while approximately 30 to 50 of their employees are paid in accordance with the Lithographic and Printing Wage Schedule. This utilization of the prevailing wage system by these various legislative branch agencies was required by the Congress when it enacted 5 U.S.C. § 5349, although this requirement does not presently apply to GPO.

LEGISLATIVE AND EXECUTIVE PRINTING VOLUME DOWN

The demand for printing by Congress and Executive branch agencies is diminishing; the latter because of a requirement by the Office of Management and Budget (Bulletin No. 81-16; 4-21-81) that the department and agency heads justify the need for every government publication. For example, Agriculture, one of the biggest purchasers of government printing, will go down from 16.4 million dollars to 16.2 million within the next two years; Education from 3.8 million dollars to 2.3 million, and, in total, Executive Branch printing will go down from 145.2 million dollars to 134 (Attachment No. 5). In addition, the volume of work done for Congress has decreased dramatically (Attachment No. 6).

Since becoming Public Printer, Mr. Sawyer has taken the following steps to

make the operation of the Government Printing Office more cost-effective and efficient:

1. He imposed a hiring freeze which resulted in the loss of 430 employees due to attrition or retirement since September, 1981.

2. He requested that the Office of Personnel Management authorize an "early out" retirement for eligible employees. If approved, the "early out" could reduce the payroll by as many as 500 workers.

3. He proposed to close twenty-three bookstores (Estimated net savings to the government—\$1 million) and developed an aggressive marketing campaign to promote mail order sales to the general public.

4. He rescinded a sixteen percent (16 percent) price increase for printing. There has been no price increase at GPO for more than two years.

5. He proposed a twenty-two percent cut in the wages paid to GPO's craft and industrial workers over a three year period. This would save GPO some \$18,000,000. (GPO Unions have proposed a 20.5 percent increase over a two year period which would cost the taxpayers an additional \$20,664,102.)

6. He proposed a nationwide study of printing needs of the federal government with special emphasis on rejustifying nearly 300 independent agency printing plants authorized by the Joint Committee on Printing.

7. He proposed to furlough the entire workforce at GPO for six days to help offset a \$4.9 million deficit in the Printing and Binding operation resulting to a large degree from the fall-off in printing orders from Executive and Legislative Branch agencies in the first five months of fiscal year 1982.

8. He raised the sales price on all government documents in order to fully recover the cost for printing those documents, and he emptied GPO warehouses of over \$11 million worth of unsaleable government documents and sold them as scrap for \$760,000.

While the Public Printer has successfully implemented many long overdue changes at GPO, a number of his initiatives have been stymied by opposition from the congressional committee which oversees the GPO: the Joint Committee on Printing (JCP). The JCP is composed of the chairman and four members of the House administration committee and the Chairman and four members of the Senate Rules and Administration Committee. The Chairmanship rotates each Congress between the chairmen of the Senate and House Committees. The JCP exercises broad oversight powers under Title 44 of the United States Code, which also gives the committee authority over some specific GPO operations, and the JCP has used this authority to prevent the Public Printer from taking a number of measures he considers necessary for the responsible and cost-effective operation of GPO.

FURLOUGH LAWSUIT

Four GPO employees, claiming to represent all other GPO employees, and nine GPO unions sued Public Printer Sawyer to prevent him from conducting a planned six-day furlough of all GPO employees over the last seven months of this year. The unions sought an injunction against the furloughs, a declaratory judgment that the Public Printer could not furlough in the face of a JCP resolution which prohibited him from taking any adverse personnel actions whatsoever, and a mandamus with-

drawing the Public Printer's furlough notices.

The primary arguments put forth by the unions were: the JCP had extraordinary control over GPO management because of the statutory scheme of Title 44, United States Code; the JCP had jurisdiction over personnel matters because of its rate of wage setting authority under the Kiess Act; and the furlough was a change of wages which must be approved by the JCP. The Public Printer maintained that: the head of the GPO has had the authority to furlough since the agency was established in 1860 and he has exercised that authority many times since that date; a furlough is not a change in the rate of wage (dollars per hour worked) under the Kiess Act, and thus the JCP need not approve the furlough; that the Kiess Act required him to conduct the furlough because it prohibits him from employing more people than necessary to do the agency's work, and that the Civil Service Reform Act clearly retains for management the exclusive right to determine when a furlough is necessary.

Judge Gasch issued an opinion which ordered the Public Printer not to conduct the planned furloughs as long as the May 11 resolution was in effect. The judge found that the Public Printer has the authority to furlough, and that the Kiess Act appears to require him to do so under the present circumstances. However, the judge also determined that since the JCP has some authority over personnel matters under the Kiess Act, the furlough works a change in compensation, and the JCP is empowered to prevent waste at the GPO, the JCP could stop the furlough by means of the resolution.

In light of the decision, the July furlough date was cancelled. The Solicitor General of the Department of Justice is now considering appeal of the decision to the U.S. Court of Appeals, for the District of Columbia.

ATTACHMENT 2—SURVEY OF PRIVATE INDUSTRY—UNION PRINTING WAGES IN SELECTED CITIES

In developing the Survey, we used the hourly wage and then computed the value of the holidays, vacation, and pension which were provided to the employees based on their contracts.

The following dollar figures for pressmen are thus a composite of both wage rates and these benefits:

GPO	\$17.53
Baltimore	11.81
Boston	11.05
Detroit	14.87
Houston	12.49
Minneapolis	15.42
Philadelphia	11.22
Pittsburgh	11.55
St. Louis	14.27
San Francisco	16.37
Washington, D.C.	14.81
Chicago	12.73

The average excluding GPO of the eleven cities was \$13.33. We did not have information for Dallas or New York at the time of the study.

For strippers, based on GAU contracts, the rates were:

GPO	\$17.53
Baltimore	12.22
Boston	13.69
Dallas	11.38
Detroit	16.41
Houston	13.12
Minneapolis	17.57
Philadelphia	18.90
Pittsburgh	16.53
St. Louis	14.30
San Francisco	16.96
New York	15.78
Chicago	16.14

The average excluding GPO of twelve cities was \$15.25.

Bookbinders:

GPO	\$16.68
Baltimore	10.47
Dallas	8.46
Detroit	13.41
Houston	12.50
Minneapolis	15.20
Philadelphia	10.77
Pittsburgh	11.37
St. Louis	12.73
San Francisco	15.28
Washington, D.C.	14.88
Chicago	15.42

The average excluding GPO of the eleven cities was \$12.77.

Compositors:

GPO	\$16.94
Baltimore	10.72
Boston	13.31
Detroit	13.41

Houston	12.11
Minneapolis	13.31
Philadelphia	11.45
Pittsburgh	13.49
St. Louis	11.82
San Francisco	18.31
Washington, D.C.	13.43
New York	20.07
Chicago	16.83

The average excluding GPO of twelve cities was \$14.02.

Journeymen Bindery Workers:

GPO	\$10.86
Baltimore	10.47
Dallas	6.30
Detroit	10.36
Houston	7.87
Minneapolis	10.78
Philadelphia	6.82
Pittsburgh	6.42
St. Louis	7.60
San Francisco	11.75
Washington, D.C.	10.47
Chicago	11.36

The average excluding GPO of eleven cities was \$9.11.

The American Newspaper Publishers Association report on wages as of February 1982, indicates that the average salary for twenty (20) cities for:

Compositors \$11.86;
Pressmen \$11.51;
Photoengravers \$11.77; and
Mailers \$11.17.

EXHIBIT 4

	Current GPO rates	Federal wage system or lithographic wage schedule rates
Carpenters	\$14.35	\$11.32
Painters	14.35	10.76
Electricians	14.35	11.32
Stationary engineers	14.35	11.32
Elevator mechanics	14.35	11.32
Masonry mechanics	14.35	11.32
Pipefitters	14.35	11.32
Sheetmetal mechanics	14.35	11.32
Pressmen	14.84	12.46
Offset press feeder/assistants	9.65	8.10
Offset press assistant	10.39	8.72
Offset strippers	14.84	12.79
Offset photographers	15.18	13.45
Offset platemakers	14.84	13.13
Bookbinders	14.11	11.80
Journeyman bindery workers	9.03	7.45
	9.29	7.67
	10.09	8.34
Compositors	14.35	12.12
Monotype castersmen	10.05	8.49
Saw operators	10.34	8.73
Slide bank operators	10.48	8.85
Sorts castersmen	10.48	8.85
Spool deskmen	11.05	9.33
Matrix keepers	11.05	9.33

COMPARISON OF GPO AND FWS WAGE RATES¹

(Attachment 4)

Occupation	GPO pay rate	FWS rate ²	Differences	
			Dollars	Percent
Bookbinder	\$27,230	\$24,573	\$2,657	10.8
Compositor	27,685	23,320	4,365	18.7
Carpenter	27,419	21,286	6,133	28.8
Electrician	27,419	22,410	5,009	22.4
Forklift operator	18,009	16,559	1,450	8.8
Janitor	14,600	12,028	2,572	21.4

¹ Because of differences in the number and timing of wage adjustments, we determined annual earnings by computing a weighted average hourly wage rate and multiplied it by 2,080 hours, the number of hours in an 8-hour day, 260-day work year.

² Bookbinder and Compositor were compared to the FWS "Lithographic and Printing Plant Wage Schedule" and the other occupations were compared to the FWS regular wage schedule. Comparisons to the regular schedule were

made at step 5 which is the highest step of the FWS pay schedule. Step 5 is 12 percent higher than step 2 which is the average prevailing private sector rate.

TABLE 2—TOTAL SPENDING ON PERIODICALS AND PAMPHLETS (PUBLICATIONS), 1981–83

(Obligations in millions of dollars)

Department or other unit	1981 actual	1982 estimate	1983 estimate
Executive Office	1.2	0.9	1.0
Agriculture	16.4	16.3	16.2
Commerce	6.0	6.0	6.1
Defense	30.5	30.0	31.2
Education ¹	3.8	2.8	2.3

General Services Administration	4.2	4.6	4.4
National Aeronautics and Space Administration	3.4	3.3	2.9
Office of Personnel Management	4.2	3.7	3.4
Small Business Administration	.9	1.1	1.0
All other independent agencies	7.2	7.0	7.0
Total	145.2	138.1	134.0

¹ The President's budget proposes dismantlement of the Department of Education (DEd) effective October 1, 1982. FY 1983 funding for activities currently performed by DEd will be transferred to the Foundation for Education Assistance, the Depts. of Defense, HHS, Interior, Justice, and Treasury and to other independent agencies.

² The President's budget proposes dismantlement of the Department of Energy (DOE) effective October 1, 1982. FY 1983 funding for activities currently performed by DOE will be transferred to the Departments of Commerce, Interior, and Justice and to the Federal Energy Regulatory Commission.

Central office printing and binding operations gains and losses—first 5 months of each fiscal year

1973 ¹	\$964,727
1974 ¹	234,309
1975 ¹	-2,470,807
1976 ¹	1,684,807
1977	-4,680,536
1978	3,906,138
1979	-442,194
1980	1,905,403
1981	2,143,193
1982	-4,912,200

¹ October to February was used for fiscal year 1973 thru fiscal year 1976 to be comparable with the other fiscal years.

Scale of Prices Changes:
September 16, 1974—12 percent surcharge to January 1, 1973 scale.

October 1, 1975—New scale of prices, 10 percent increase.

April 1, 1977—5 percent surcharge on October 1, 1975 scale.

July 25, 1977—20 percent surcharge on Divisions 4 and 5.

January 1, 1978—New scale of prices, 6 percent increase.

May 1, 1979—13 percent surcharge on Division 5.

March 1, 1980—15 percent surcharge on Division 7.

March 1, 1982—New scale of prices, 16 percent increase.

1982.....	343,548

Mr. ARMSTRONG. Mr. President, before I yield the floor, and I am hopeful that the Senator from Maryland, who is the chairman of the committee, can enlighten us on this because this is a matter on which he is more knowledgeable than I and perhaps there are factors of which I am not aware and I hope that that is the case because superficially at least it appears to me we have a problem that needs to be coped with.

But before I do that I also send a communication from the International Typographical Union addressed to CTU members to the desk and ask unanimous consent that it also be printed in the RECORD at this point, simply so that we have some flavor of both sides in the RECORD.

There being no objection, the communication was ordered to be printed in the RECORD, as follows:

U.S. GOVERNMENT PRINTING OFFICE
CHAIRMEN'S CHAPEL,
Washington, D.C., August 10, 1982.

To: CTU Members.

From: Communication From President Boardman.

President Boardman just called from the Hill to tell me that Senator Mattingly is attaching an amendment to Appropriation Bill H.R. 6863 to cut our wages by 22 percent and destroy collective bargaining at G.P.O. This bill will be co-sponsored by Senator Armstrong and Senator Zorinsky.

This bill was supposed to go on the floor of the Senate tonight but President Boardman with the help of a few Senators postponed it until tomorrow, so it gives us a little time to regroup.

Bill asked me to get the message to all members that it is imperative that each member contact his or her Senator tomorrow morning (Aug. 11, 1982) and ask them to vote against this amendment. Not only would this be a great monetary loss it would be the end of collective bargaining and I think we all know what that would mean at the Government Printing Office.

Below are the local Senators and their numbers:

Virginia: Harry F. Byrd, Jr., 224-4024; John W. Warner, 224-2023.

Maryland: Paul S. Sarbanes, 224-4524.

West Virginia: Robert C. Byrd, 224-3954; Jennings Randolph, 224-6472.

Pennsylvania: John Heinz, 224-6324; Arlen Specter, 224-4254.

I cannot stress the importance of contacting your Senators. Anyone wishing numbers of other Senators ask me and I will get you his number.

EARL SHIRKEY.

Mr. ARMSTRONG. Mr. President, the letter which at my request has been printed in the RECORD is in my judgment and I think the judgment of other Senators counterproductive to the effort to resolve this issue and, in fact, my own decision to offer an amendment here today arises directly from the circulation of this letter. I have been considering, as have other

Senators for some time, the question of whether or not this was the moment at which this issue should be raised on the floor, and I had decided that perhaps this could be something that could be delayed; however, since all Senators or at least many Senators had received a letter indicating that the Senator from Georgia and I were considering an amendment I thought since one side of the issue had been raised in that way I at least would want to go ahead and bring the issue more fully into public disclosure.

So, Mr. President, that is the question. There is a report by the General Accounting Office that indicates these employees are overpaid. The Public Printer says he could get by with a substantially smaller work force. The court has ruled that he lacks the authority to take these management actions. And the question I think that the Senate needs to address itself to is where do we go from here?

The PRESIDING OFFICER. The question is on the amendment of the Senators from Georgia, Colorado, and Nebraska.

Mr. MATHIAS. Mr. President, I welcome the amendment that these three distinguished Senators have brought to us. I will welcome it even more if it passes, because, if it passes, it will make it unnecessary for the Joint Committee on Printing to do any more work. I do not think anyone around here is looking for extra work, and the work of the Joint Committee on Printing is, of course, in addition to everything else that we do here in the Senate. So I hope the Senator from Colorado will prevail today and let the whole Senate take over the work of the Joint Committee on Printing.

I think that would have many salutary effects, especially on the Senator from Maryland, because night after night I sit in my office and sign contracts to procure the paper, the ink, the glue, and the other supplies that keep the Government Printing Office in operation. I would be happy if the Senate would take over that task.

Maybe whoever is presiding in the chair could take over the job, if he is not too interested in the debate as it goes along, and sign those procurement contracts, because that really is what this amendment proposes: That the Senate take over the operation of the whole vast worldwide, farflung printing empire that is operated by the U.S. Government.

The Senator from Colorado says that the salaries are out of line. I must say at the outset on that question, Mr. President, that I cannot testify firsthand because I have only been a member of the Joint Committee on Printing for less than 2 years and I do not know from personal experience what the contract negotiations have been, but I am aware of the record.

I believe the record is that my predecessors on the Joint Committee on

Printing have never granted a wage increase greater than that which was offered by the Public Printer. Of course, it may be that the Public Printers have been way out of line, but it will take a lot of research to study that question.

But the Joint Committee on Printing has never gone beyond what the Public Printer thought was fair, what the Public Printer thought was the market rate, what the Public Printer thought was the prevailing wage in the industry.

When you talk about this industry, I think you also have to recognize that GPO is not a normal commercial printing plant. We have some of its products here in the Chamber today. We have committee reports. We have the CONGRESSIONAL RECORD.

I take this opportunity to salute the people, the men and women, who work in the Government Printing Office and who somehow or other manage to get the CONGRESSIONAL RECORD out almost every day, even though the sessions of the Senate and the other body may last until midnight or longer. They work under unusual conditions. They do not just have a contract operation where they are publishing a magazine or a book on a regular basis, month in month out, year in year out. They have to do special things. They work under special conditions.

Just to make the record about whether or not these salaries are out of line, in 1972 the Public Printer offered a 7-percent increase, which was based upon a 5.5 percent Federal Pay Board guideline plus a 1.5-percent increase which was authorized pursuant to the President's wage-price stabilization program. The photoengravers appealed to the Joint Committee claiming that the traditional formula for calculating wage rates would have provided for an 11-percent increase. The Joint Committee denied the appeal and they granted the 7 percent, which was all that had been recommended by the Public Printer.

The next negotiation—again, Mr. President, I make the point that I was not there; I am reading from the record—was 1973. The Public Printer offered an 8.5-percent increase, when the 17-city formula from the Bureau of Labor Statistics would have provided for an 11.7-percent increase, and the local private sector scale would have provided for a 14-percent increase. But the Joint Committee on Printing ratified the 8.5-percent increase that had been recommended by the Public Printer.

In 1974 the Public Printer, ignoring the traditional formula, offered a 12-percent increase, which was accepted by the employees. The traditional formula in that year would have yielded an increase of somewhere between 17 and 20 percent. The Joint Committee

on Printing ratified the 12-percent increase.

In 1975 the Public Printer offered a 10.5-percent increase. The local area wage settlement in the private sector was 9 percent. The national average was 12.5 percent. At the Bureau of Printing and Engraving the personnel received increases ranging from 10 to 16 percent. The Joint Committee ratified the 10.5-percent offered by the Public Printer.

Now, in 1976, the Public Printer offered a 7.2-percent increase. The local Washington settlement in the private sector was a 9-percent increase. The Joint Committee ratified the offer made by the Public Printer.

Well, Mr. President, I will go on if the Senator from Colorado and the Senator from Georgia and the Senator from Nebraska would like me to go on, but it is very difficult to see the justification for saying that the wages they earn are out of line. Whether they are out of line at the moment is a matter that is currently being determined by a factfinder who has been appointed by the Joint Committee on Printing, with the approval of the Public Printer and with the approval of the representatives of the employees.

The factfinder, who is a trained mediator, was provided in a list offered by the Federal Mediation and Conciliation Service, will shortly render to the Congress his recommendations on what the wages ought to be, and I presume they will not be out of line. They will be in line with other people who do comparable work under comparable working conditions. The Joint Committee on Printing will then confer with the Public Printer, with the employees; and, as required by law, we will make some determination. It will not be a determination that is out of line with similar work in this area.

Again, as I say, I am happy to continue this narrative right up to the current time, but I think this historical background has at least set the stage for what we are trying to do.

There are some questions about general staffing, which the Senator from Colorado has raised, and the committee is going to look into those questions of general staffing. For example, the Public Printer has increased the administrative payroll by about \$1.5 million in less than a year. He has upgraded or modified different positions and has created 37 new administrative positions. These may be entirely justified in the interest of more efficient practices. I am not saying they are or not. I am going to give the Public Printer the benefit of the doubt for the moment.

At the proper time, we will inquire of him why he felt it was necessary to raise administrative costs and to establish 37 new administrative positions. But in the meantime, I have to assume he is carrying out his charge to oper-

ate the Government Printing Office as efficiently and as effectively as possible.

I can assure the Senator from Colorado that we will be pursuing the question of general staffing, including new administrative positions.

I said I welcomed this amendment, and I do for more than the reasons I already stated, because I think it does give us an opportunity to discuss briefly the special situation of the Government Printing Office.

It is an enormous enterprise. It has offices all over the Nation. It does printing and publishing for every department of the Government. I am in constant correspondence with the Secretary of the Navy, the Secretary of the Army, the Secretary of the Air Force, and with other officials about the printing that goes on within their establishments.

Some of this printing is done on Government presses; a great deal of it is done on contract by private printers. It is a very delicate mix as to how much is done in-house and how much is done out-of-house on contract; and, of course, the number of employees needed to be carried on the Government payroll is affected by how much is done in-house and how much is done by contracts by private-sector printers.

Also, of course, it is a Government activity that is affected by technology. When the Joint Committee on Printing was established in 1860, the only way to communicating ideas was with paper and ink, if you were beyond the range of a given voice. Today we have a great deal more than the vocal chords and paper and ink with which to communicate. We can transmit by satellite, we can transmit by wires, we can have microfiche or microfilm; we can have word processors, computers; we can store and retrieve information electronically, and all of these are the ways we can communicate facts and ideas today. All of these are methods that the U.S. Government should be using to communicate vital facts and ideas to people who want and need them.

This is the interest of the Joint Committee on Printing.

Mr. HATFIELD. Mr. President, will the Senator yield for a question?

Mr. MATHIAS. I am happy to yield.

Mr. HATFIELD. Is there any possibility that we can work out a time agreement between the Senator from Colorado and the Senator from Maryland on the remaining period for this amendment?

Mr. MATHIAS. May I say to the distinguished chairman of the Appropriations Committee there is no possibility.

Mr. HATFIELD. No possibility.

Mr. MATHIAS. No possibility of a time agreement.

Mr. HATFIELD. May I ask the Senator from Maryland another question?

The Senator from Maryland realizes that we have about eight or nine other amendments to handle here so that we can finish this bill tonight, because it is required to go to conference in the morning, Thursday, in order to complete the conference on Thursday to get this bill back to the Senate to act upon before the recess, along with many others that are stacked in sequence, according to the leadership schedule?

Mr. MATHIAS. Let me say to the distinguished chairman of the Appropriations Committee, I would like to paraphrase a great general, we will fight it out on this line if it takes all summer.

Mr. HATFIELD. The Senator is very discouraging in his responses to my questions. I hope that perhaps I can pose this question again.

Mr. MATHIAS. Let me say to the Senator from Oregon, the distinguished chairman of the Appropriations Committee, the manager of this bill, that this is a fight I did not choose to make.

Mr. HATFIELD. I see. I thank the Senator from Maryland. I would like to rephrase my question for the same purpose a little later on in the afternoon.

Mr. ARMSTRONG. Mr. President, would the Senator from Maryland yield to me?

Mr. MATHIAS. I would be happy to yield for a question, if I may do so without losing my right to the floor.

Mr. ARMSTRONG. I believe I would like to direct two or three questions to the Senator. First, on the question of salaries: In the discussion of how salaries are set, the amount of salaries, there was sort of an undercurrent that, there was speculation that, these salaries were out of line with comparable salaries in the private sector and in the Government sector. I am under the impression—and I would like to pin that down because if that is a speculative issue, then I have been misled—I am under the impression that, in fact, the General Accounting Office study of July 1982 asserts that GPO employees are paid substantially larger amounts than their counterparts either in Federal service elsewhere or in the private sector. If I am mistaken about that, then that would greatly change my view of the entire situation.

Mr. MATHIAS. Well, as I said to the Senator from Colorado, I have had no previous experience in these wage negotiations. I am coming on this question de novo, and my first exposure will be the current one which we are in the middle of now, and for which we have appointed a factfinder. I can only assure the Senator from Colorado that when we get the report of the factfinder, we will look at salaries in the industry generally, we will look at

comparable salaries in Government, and we will look at the record.

Mr. ARMSTRONG. Mr. President, I do not mean to be unduly insistent and, of course, if the Senator would like to reserve his response to my questions for another occasion I will be understanding, but I want to pin this down. I have been led to believe by the GAO in their report of July 1982, not Mr. Sawyer, not the newspapers, not Jack Anderson but the GAO, which has issued this report of July 1982, that it finds that salaries are significantly higher, several thousand dollars per position higher, than prevailing wages in Federal service or comparable jobs in other agencies or in private sector employment.

I want to make it absolutely clear that I am not familiar even with how we got into this situation, if it exists, and I certainly do not lay that at the doorstep of the Joint Committee or the distinguished chairman or any particular person.

My concern is that this raft of newspaper articles, which has begun to appear, has created the impression that Congress is insensitive to that, but first I want to know if, in fact, it is true, and whether we can straighten it out if it is.

Mr. MATHIAS. Well, of course, the raft of newspaper articles that we have seen are appearing because the Public Printer has been going around making speeches and creating the articles. In fact, the Congress has been working very hard to try to have the most efficient, effective operation possible. And if we could work cooperatively, if we had the cooperation of the Public Printer, I think that process would proceed more rapidly and more successfully.

When the Senator propounded his question, I started to describe briefly what we have been doing to get at these very questions.

Let me just say that I see the Senator has in his hand that blue-backed folder, which looks to be like a report from the Comptroller General. Perhaps, so that the point he has just made can be abundantly on the record, he would like to put that report, or such portions of it as he thinks are pertinent, in the RECORD at this time. I have no objection to that.

Mr. ARMSTRONG. If the Senator would yield briefly, I will send the report to the desk and ask unanimous consent that it appear in the RECORD at this point.

There being no objection, the report was ordered to be printed in the RECORD, as follows:

[Report by the Comptroller General of the United States]

COMPARISON OF COLLECTIVELY BARGAINED AND ADMINISTRATIVELY SET PAY RATES FOR FEDERAL EMPLOYEES

(Approximately 643,000 Federal employees who collectively bargain for wages are

paid more than their Federal Wage System and General Schedule counterparts. Both collective bargaining and Federal Wage System employees have received cumulative percentage pay increases over the past 5 to 9 years that are substantially larger than pay raises granted General Schedule employees. As a result, agencies are having difficulty preserving a pay differential between General Schedule supervisors and collective bargaining and Federal Wage System blue-collar employees.)

COMPTROLLER GENERAL
OF THE UNITED STATES,
Washington, D.C.

HON. MARY ROSE OAKAR,
Chair, Subcommittee on Compensation and Employee Benefits, Committee on Post Office and Civil Service, House of Representatives

DEAR MADAM CHAIR: In response to your March 16, 1981, letter, we have compared the compensation of Federal employees, who collectively bargain for wages, with General Schedule and Federal Wage System employees. We also examined the history and extent of collective bargaining for wages in State and local governments.

As requested by your office, we did not obtain agency comments on this report. Also, as arranged with your office, unless you publicly announce this report's contents earlier, we plan no further distribution of this report until 10 days from its issuance date. We will then send copies to interested parties and make copies available to others upon request.

Sincerely yours,

CHARLES A. BOWSHER,
Comptroller General
of the United States.

[Comptroller General's Report to the Subcommittee on Compensation and Employee Benefits, Committee on Post Office and Civil Service, House of Representatives—Comparison of Collectively Bargained and Administratively Set Pay Rates for Federal Employees]

JULY 2, 1982.

DIGEST

Comparability with the private sector is generally the guiding principle for setting Federal employee pay rates. For the systems covering most Federal employees—General Schedule for white-collar employees and Federal Wage System for blue-collar employees—pay rates are reviewed and adjusted each year through administrative processes. Pay rates for certain other Federal employee groups are determined by collective bargaining.

At the request of the Chair, Subcommittee on Compensation and Employee Benefits, House Committee on Post Office and Civil Service, GAO reviewed and compared the compensation of Federal employees who collectively bargain, with those whose pay is set administratively. The Chair also asked GAO to obtain information on collective bargaining in State and local governments.

Federal employees who bargain for pay usually are paid more than their General Schedule and Federal Wage System counterparts. In 46 of 48 (96%) comparisons covering 17 occupations, GAO found that bargaining employees earned from \$491 to \$13,583 more in fiscal year 1981 than their Federal Wage System counterparts. Also, postal letter carriers covered by the Postal Service bargaining agreement were paid \$5,490 more in fiscal year 1981 than their General Schedule counterparts.

Over the past 9 years, cumulative percentage pay increases for nonpostal collective bargaining employees have been comparable to Federal Wage System employees' increases but have far outpaced General Schedule employees' pay raises. Postal letter carriers have received pay increases of 123 percent; nonpostal collective bargaining employees 108 percent; Federal Wage System employees 111 percent; and General Schedule employees 70 percent. In comparison, the Consumer Price Index increased 113 percent over the 9-year period.

Because of differences among the pay systems, agencies are having difficulty preserving a pay differential between General Schedule supervisors and nonpostal collective bargaining and Federal Wage System blue-collar employees. More and more supervisors find themselves supervising blue-collar employees whose basic pay surpasses their own.

At the State and local government level, there has been an increase in collective bargaining for wages. In 1959, only one State permitted public employees to negotiate wages. Today, 30 States and the District of Columbia permit wage negotiations for about 3.3 million public employees. Negotiated wage settlements, however, are subject to budgetary and legislative approval.

At the Subcommittee office's request, GAO did not obtain agency comments on this report.

CHAPTER 1—INTRODUCTION

At the request of the Chair, Subcommittee on Compensation and Employee Benefits, House Committee on Post Office and Civil Service, we reviewed collective bargaining in Federal, State, and local governments and compared the compensation of Federal employee groups, who bargain for wages, with their Federal counterparts under the General Schedule and Federal Wage System.

The Federal civilian work force numbers about 2.5 million full-time employees with an annual payroll of about \$76 billion in fiscal year 1981. These employees are in many occupations and geographic areas. As of October 1, 1981, there were about 1.4 million General Schedule employees, about 445,200 Federal Wage System (FWS) employees, and approximately 643,000 Federal employees whose wages are set through collective bargaining.

Pay-setting procedures for general schedule and Federal wage system

The Federal Salary Reform Act of 1962 established the principle that white-collar employees' salary rates under the General Schedule (GS) should be comparable with the national average private enterprise rates for the same levels of work. The law, as amended, prescribes a method for the President to adjust salaries annually on the basis of a national survey that compares Federal salaries with those paid for similar work in private industry. The Bureau of Labor Statistics (BLS) conducts the survey and collects salary data on 102 work-level categories covering 23 occupations. BLS visits about 3,500 private establishments in 7 industry divisions. The minimum size of establishments surveyed varies from 50 to 250 employees, depending on the industry.

BLS provides this data to the President's Pay Agent consisting of the Directors of the Office of Management and Budget and the Office of Personnel Management and the Secretary of Labor. The Pay Agent analyzes the data and submits an annual report to the President comparing the GS Federal

pay rates with the pay rates for the same levels of work in the private sector. The report includes the Pay Agent's recommendations for adjusting pay to achieve full comparability. If the President believes that a full comparability adjustment is not warranted because of "national emergency or economic conditions affecting the general welfare," the President can send the Congress an alternative plan proposing a different adjustment. In 5 of the last 7 years, Presidents have proposed, and the Congress has approved, alternative plans that provided GS employees smaller pay raises than called for by the comparability process.

The Federal Prevailing Rate Systems Act of 1972 established the principle that blue-collar employees' pay rates under FWS will be fixed and adjusted according to local prevailing rates. Under this system, the Government conducts 135 locality wage surveys annually to determine the prevailing rates for similar occupations in the private sector.

FWS surveys cover establishments in the manufacturing, transportation, communications, and wholesale trades industries which employ 50 or more persons. Twenty-two occupations must be surveyed, and 29 others are surveyed on an optional basis when (1) employment in these occupations is substantial, both in the local Federal installations and local private establishments and (2) wage data for the optional jobs are considered essential to the wage-fixing process for the area.

On the basis of these surveys, executive branch agencies establish regular pay schedule for each wage area. Special pay schedules are established when prevailing private sector rates for specific types of jobs are above the maximum rates of the regular FWS wage schedules. Without special schedules, agencies would be seriously handicapped in recruiting and retaining qualified employees at the regular schedules rates.

Unlike the GS process, the President does not have authority to propose alternative pay rates that differ from locality survey results. However, during the last 3 years, the Congress has held FWS employee pay raises to the same pay increases granted General Schedule employees.

Collective bargaining for wages in the Federal Government

Labor organizations have existed in the Federal sector since the 19th century. However, it was not until 1924 that a Government agency—the Government Printing Office (GPO)—used collective bargaining as a method for determining wages. Since that time, 19 other agencies have obtained authority to negotiate wages. About 643,000 employees now bargain for wages. The Postal Service and Tennessee Valley Authority (TVA) employ about 98 percent of these employees—581,000 and 50,550, respectively. Other than the Postal Service and some TVA employees, collective bargaining is generally limited to blue-collar employees.

The statutes which allow employees in these two agencies to bargain for wages also require that the rates paid be comparable with rates paid in the private sector. Other agencies are also required to negotiate and set pay comparable to local prevailing rates.

Agencies that collectively bargain have broad discretion in determining prevailing rates. For example, as part of the negotiation process, some agencies meet with collective bargaining units to discuss and develop survey specifications for measuring private sector wage rates. The agreement negotiated on the survey specifications—industrial,

occupational, and geographical coverage—is critical because survey results are used to determine wage rates.

Objectives, scope, and methodology

The objectives of this review were to (1) compare the compensation (excluding premium pay and benefits) of Federal employees who collectively bargain for wages, with GS and FWS employees and (2) examine the history and extent of collective bargaining for wages in State and local governments. Our review was conducted from July 25, 1981, to January 1, 1982, in accordance with our Office's current "Standards for Audit of Government Organizations, Programs, Activities, and Functions."

Of the 20 Federal agencies that collectively bargain, we selected 8 to review: Postal Service, TVA, GPO, Bureau of Engraving and Printing, Bonneville Power Administration, International Communication Agency, National Park Service, and Bureau of Reclamation. We selected these agencies because they employ 99 percent of the Federal collective bargaining work force in various localities in the country.

For occupational comparisons, we compared the Postal Service PS-5 letter carrier to a GS-5, which was the pay linkage before the Postal Service became an independent Government corporation in 1970. We selected 17 representative blue-collar occupations in the other 7 agencies (10 of the 17 occupations were common to several agencies), and with the assistance of agency officials and OPM classification personnel, we matched these occupations to comparable FWS occupations in the same locality. This comparison involved an analysis of written duties and not an actual onsite job review of specific job characteristics. We compared a total of 48 jobs in the 17 occupations.

In our analysis, we used the journeyman wage rate for occupations covered by collective bargaining and compared it to the FWS wage rate at the step 2 and 5 level. These two steps were used because step 2 reflects the prevailing rate for the area, and step 5 is the rate most FWS employees receive.

The pay schedules (GS, FWS, and bargaining) differed in the number and timing of wage adjustments during each year. The GS is adjusted at the beginning of the fiscal year, and each of the 135 FWS wage schedules are adjusted at intervals throughout the year. Collective bargaining wage agreements have regular annual pay increases, and some also provide for annual or semiannual cost-of-living increases. Therefore, to provide a uniform basis for comparison, we determined annual earnings by computing a weighted average hourly wage rate and multiplying it by 2,080 hours (the number of hours in an 8-hour workday, 260-day work-year).

After computing annual earnings for each pay schedule, we compared fiscal year 1981 earnings between collective bargaining employees and their nonbargaining counterparts. Second, we compared collective bargaining wage increases to nonbargaining wage increases over a 5- or 9-year span ending September 30, 1981. The 5-year earnings analysis was made for all 48 wage comparisons, and the 9-year earnings analysis was made for 33 wage comparisons where 9 years of wage information was available. Finally, we compared these pay increases with the inflation rate as measured by the Consumer Price Index (CPI) for Urban Wage Earners.

To determine the history and extent of collective bargaining in the public sector, we reviewed pertinent legislation and records

and interviewed officials at the Office of Personnel Management (OPM). Also, we researched and obtained published reports, including those from OPM, the Departments of Labor and Commerce, TVA, and the Postal Service.

CHAPTER 2—FEDERAL WAGES DETERMINED THROUGH COLLECTIVE BARGAINING ARE HIGHER THAN WAGES SET THROUGH ADMINISTRATIVE PROCESSES

Although the comparability principle for setting Federal pay rates applies to both bargaining and nonbargaining employees, bargaining employees generally have been paid more. In our fiscal year 1981 occupational wage comparisons, 46 of 48 (96 percent) bargaining employees were paid \$491 to \$13,583 more than their FWS counterparts, and in only two comparisons did bargaining employees earn less than FWS employees. Postal letter carriers were paid \$5,490 more in fiscal year 1981 than their GS counterparts.

From 1972 to 1981, however, nonpostal collective bargaining and FWS employees have received relatively equal percentage pay increases of 108 percent and 111 percent, respectively. Thus, most of the wage differences occurred before FWS was established in 1972. Postal letter carriers' pay increases were somewhat higher at 123 percent while GS employees were lower at 70 percent. The consumer price index increased 113 percent over this time period.

Pay differences among the various pay systems have exacerbated the pay inversion problems Federal agencies are having with some white-collar supervisors being paid less than their blue-collar subordinates.

BARGAINING EMPLOYEES PAID MORE THAN OTHER FEDERAL EMPLOYEES

The fiscal year 1981 wage difference between collective bargaining employees and their FWS counterparts averaged 26 percent, or \$4,857. In 46 of 48 comparisons (96 percent), bargaining employees were paid \$491 to \$13,583 more than the prevailing wage rate for similar occupations.¹ In 36 of 46 comparisons, bargaining employees earned more than the highest step of the comparable FWS grade.

The largest wage rate differences occurred in agencies located in Washington, D.C. The International Communication Agency radio broadcast technicians and radio master control broadcast technicians were paid \$32,192 and \$35,586, respectively, during fiscal year 1981, or \$12,187 and \$13,583 more than the \$20,005 and \$22,003 annual prevailing rate for comparable positions in the Washington, D.C., area. The pay rates negotiated for the International Communication Agency's technicians are based on a survey of similar occupations at the 3 major broadcasting networks in the Washington, D.C., area whereas FWS rates cover several major industries and at least 22 different occupations.

At GPO, compositors were paid \$4,365 more during fiscal year 1981 than their FWS counterparts under the Lithographic and Printing Plant Special Schedule for Washington, D.C. GPO maintenance crafts—carpenters and electricians—earned \$27,419 during fiscal year 1981; however, the prevailing rate for FWS was \$19,006 for car-

¹ FWS is a five-step rate schedule. Step 2 reflects the average private sector or prevailing rate. There is a 4-percent differential for each successive step. Thus, FWS employees at the step 5 level, where the majority of workers are grouped, earn a 12-percent hourly wage premium.

penters and \$20,005 for electricians in the Washington, D.C., area. Historically, these maintenance journeymen crafts have received the same hourly pay rates as the compositor craft, even though the occupations are dissimilar.

At the Bureau of Engraving and Printing, plate printers earned \$8,556 more in fiscal year 1981 than the rates paid under the FWS Lithographic and Printing Plant Special Schedule for Washington, D.C. Bureau plate printers receive the same percentage pay increase negotiated by engravers and plate printers employed by the American Bank Note Company in New York. This private company has been the sole source of the Bureau's prevailing rate data for 40 years. All other Bureau bargaining employees are paid the same wage rates as similar occupations in GPO.

Before the Postal Reorganization Act of 1970, Postal letter carriers (Postal Service Schedule PS-5) were linked to GS-5. In 1969, both PS-5 letter carriers and GS-5, step 4 employees had annual salaries of \$7,202. As a part of the reorganization, the Congress authorized an immediate 8-percent increase for Postal Service employees. Since October 1971, letter carriers' pay increases have been close to twice the rate of their former GS counterparts (123 percent compared to 70 percent). During fiscal year 1981, a letter carrier earned \$5,490 more than a GS-5, step 4 employee, and the difference in cumulative percentage increases was 53.16 percent. With a fiscal year 1981 salary of about \$18,980, a PS-5 letter carrier now makes the equivalent of a GS-9, step 1 employee.

COMPARISON OF POSTAL AND GS PAY

Fiscal year:	U.S. Postal Service Letter-carrier PS-5 pay gains			General schedule GS-5, step 4 pay gains		
	Annual earnings	Annual percentage increase	Cumulative percentage increase	Annual earnings	Annual percentage increase	Cumulative percentage increase
1972	\$8,514	(1)	(1)	\$7,946	(1)	(1)
1973	9,255	8.71	8.71	8,466	6.54	6.54
1974	10,258	10.83	20.48	8,859	4.64	11.49
1975	11,444	11.57	34.42	9,350	5.54	17.66
1976	12,349	7.91	45.05	9,820	5.03	23.58
1977	13,301	7.71	56.23	10,234	4.22	28.79
1978	14,380	8.11	68.50	10,955	7.05	37.87
1979	15,271	6.20	79.36	11,556	5.49	45.44
1980	17,144	12.26	101.36	12,368	7.02	56.65
1981	18,983	10.73	122.97	13,493	9.10	69.81

¹ Base year.

Comparison of pay increases for major Federal pay systems

From fiscal year 1975 through 1981, non-postal bargaining and FWS employees received relatively equal percentage pay increases of 46.2 percent and 45.5 percent, respectively. Postal letter carriers' pay increases were somewhat higher at 53.7 percent while GS employees' pay increased 39 percent. The CPI increased 57.4 percent over this time period.

Going back to fiscal year 1972, the experience was similar except that postal letter carriers' cumulative pay increase of 123 percent exceeded the CPI increase of 113.1 percent. Nonpostal bargaining employees and FWS employees, on the average, closely matched the CPI increase; however, GS employees received increases of 70 percent.

Differences in pay increases create pay inversion problems

Agencies are having difficulty preserving a pay differential between supervisors and

blue-collar employees (bargaining and FWS). Both FWS and bargaining employee pay increases over the last 10 years have outpaced GS salary increases. More and more GS supervisors are facing pay inversion—that is, they find themselves supervising blue-collar employees whose basic pay surpasses their own. As a result, within-grade pay increase for GS supervisors have accelerated to prevent pay inversion problems. For example, 16 GS supervisors at the Sacramento Air Logistic Center, McClellan Air Force Base, California, received accelerated salary increases between January 1980 and January 1982 at an annual cost of \$40,000.

The law (5 U.S.C. 5333) authorizes agencies to adjust GS supervisor salaries to rates above those of their highest paid blue-collar subordinates. This administrative remedy cannot be applied, however, once a supervisor's pay has been adjusted to the maximum pay rate for the grade. Several agencies are finding that administrative pay adjustments are no longer sufficient to preserve supervisor-subordinate pay differentials. Situations at the Bonneville Power Administration and the Bureau of Reclamation illustrate the problem between GS supervisor pay and negotiated subordinate wages.

Bonneville will soon be facing serious pay inversion problems. As of October 1981, Bonneville had adjusted the pay of 49 of 81 (60 percent) GS employees who supervise nearly 1,200 bargaining employees. Eighteen supervisors have reached the top pay rate for their grade, and 4 of them are paid less than their subordinates. Bonneville anticipates an 8.4-percent March 1982² pay increase for bargaining employees which, following pay adjustment, will put 52 of the 81 supervisors at the top pay rate for their grade. With an increase of 8.4 percent, 50 of these supervisors will experience pay inversion.

In July 1980, Bonneville urged OPM, through the Department of Energy, to seek a legislative change increasing maximum pay rates for GS supervisors. Bonneville has rejected other administrative remedies as inappropriate. For example, Bonneville officials contend that regrading or reclassifying supervisors' jobs solely to avoid pay inversion would violate the Classification Act of 1949. Its managers also believe that limiting bargaining employees' pay to GS supervisor pay levels could violate the agency's legal requirement to pay rates prevailing in the private sector. Because their pay cannot be adjusted like their co-workers who supervise bargaining employees, other GS personnel consider the pay adjustment policy inequitable.

The Bureau of Reclamation at Grand Coulee Project is also experiencing severe pay inversion problems. As of October 1981, the Bureau had adjusted the pay of 11 of 14 (79 percent) GS employees who supervise more than 300 bargaining employees in the Pacific Northwest Region. Ten of these supervisors have reached the top pay rate for their grades, and 8 of them are experiencing pay inversion. During 1981 wage negotiations, Bureau officials decided not to pay bargaining employees higher basic wage rates than their GS supervisors. However, an arbitrator ruled against the Bureau's position in February 1982.

² As of April 1982, Bonneville had not completed its contractual wage adjustment. Whatever percentage pay raise is negotiated will be retroactive to March 14, 1982.

CHAPTER 3—COLLECTIVE BARGAINING PAY-SETTING PRACTICES IN SIX FEDERAL AGENCIES

Federal agencies and collective bargaining employees usually negotiate wages on the basis of a mutually agreeable locality survey of private sector pay rates. In some cases, the survey results are used to set the wage rates; in other cases they are used as guidelines for negotiations. The collective bargaining wage surveys are generally not as comprehensive in industrial and occupational coverage as pay surveys conducted for GS and FWS employees.

A number of agencies which are authorized to collectively bargain are industrial operations generating their own revenues. Also, negotiated wage settlements generally are not subject to budgetary and legislative oversight. Furthermore, the procedures followed in resolving bargaining impasses vary among the agencies.

A description of the collective bargaining practices found in the six largest agencies included in our review follows:

U.S. Postal Service

The Postal Reorganization Act of 1970 requires the Postal Service to achieve and maintain compensation levels comparable to those paid in the private sector. Before the Postal Reorganization Act, postal employees' pay increases were linked to General Schedule increases. The act also requires the Postal Service to negotiate wages and fringe benefits (including retirement) as well as provide reasonable pay differentials between craft employees and supervisory management employees.

The Postal Service has a total work force of about 678,000 and negotiates wages with labor organizations representing approximately 581,000 employees. Most of these employees are clerks, mail handlers, and letter carriers covered under the Postal Service Salary Schedule. Supervisory and managerial personnel are excluded from the collective bargaining process, but have consultation and participation rights in developing their pay policies and benefits. Their pay is administratively determined and allows for pay differential over subordinates' pay rates.

Before negotiation, the Postal Service conducts a wage survey in approximately 100 to 110 selected companies employing 5,000 or more employees in 7 manufacturing industries (automobile, basic steel, brewery, metal can, paper and allied products, tire, and printing) and 7 service industries (trucking, airline, telephone and telegraph, electric and gas utilities, mail order houses, banking, and insurance). These surveys are not intended to be the basis of negotiation but are available as information to negotiators and to third parties if the settlement reaches an impasse.

If the Postal Service and a union are unable to reach a collective bargaining agreement or if they have a dispute under an existing agreement which they cannot resolve, either party may request mediation. The Director of the Federal Mediation and Conciliation Service may direct the establishment of a fact-finding panel of three persons. If agreement cannot be reached, an arbitration board is empowered to render a final binding decision. Postal employees by law are not permitted to strike, but the threat of a postal work stoppage exists, as evident from employee walkouts in the past.

TVA

The TVA Act of 1933 established TVA as a Government corporation engaged in power

generation, flood control, reforestation, industrial development, and navigability programs of the entire Tennessee River watershed. The TVA Act gave the Board of Directors discretion to develop its own employee relations policies and not be subject to the terms and provisions of civil service laws. Section 3 of the TVA Act provided that pay rates would be no less than the prevailing rate paid for similar occupations within TVA's geographic area. The act also gave TVA authority to collectively bargain over wages, salaries, and terms and conditions of employment.

Of the 54,800 total work force, TVA negotiates wages for 50,500 employees and administratively sets the salaries of the remaining 4,300 management employees. The Tennessee Valley Trades and Labor Council, consisting of representatives from 15 unions, negotiates wages for 33,500 blue-collar employees. TVA also bargains with the Salary Policy Employee Panel—which consists of representatives from 5 employee organizations—over salaries for 17,000 white-collar employees.

In 1935, the TVA Board adopted an Employee Relationship Policy for setting pay rates for blue-collar employees through wage conferences. The Joint Wage Data Committee, consisting of representatives from TVA and the Trades and Labor Council, develops the wage survey scope and tabulates the wage data collected by management and union representatives. The Joint Negotiating Committee negotiates separate contracts for operations and maintenance employees and construction employees. The negotiated agreements and wage rates are submitted to the TVA Board of Directors for final approval. If a dispute over the prevailing wage rates occurs, the TVA act provides that the Secretary of Labor will make the final decision.

TVA and the Trades and Labor Council have a basic agreement in which TVA pays a single, uniform rate of pay for each class, grade, and type of work performed anywhere in the TVA geographic area. Survey data reflects composite pay rates of specific occupations in 14 localities agreed upon by both TVA and the Council. However, according to TVA, no specific formula has been established for determining prevailing rates for the survey data. The most controversial issue in wage negotiations has been what wage data should constitute the prevailing rate, not the wage facts themselves.

TVA and the Salary Policy Employee Panel conduct wage conferences to negotiate the pay rates for white-collar employees (clerical, administrative, and technical). TVA management conducts an annual salary survey of 30 regional and local employers, including the Postal Service, several public utilities, and national multiplant companies. Also, TVA provides the Panel an opportunity to review and comment on the survey data. Other data used in the wage conferences are the BLS annual National Survey of Professional, Administrative, Technical, and Clerical Pay and the BLS Collective Bargaining Settlements report. Occasionally, a bargaining impasse on salary rates occurs. If mediation fails, either TVA or the Panel may invoke advisory arbitration.

Finally, no TVA employee may be paid more than a member of the Board of Directors, and strikes are prohibited.

GPO

GPO, established in the 1860's, is a Government printing facility under the legislative branch. The Kiess Act of 1924 requires

the Public Printer to hold wage conferences with committees selected by trades having more than 10 employees. In the event of a disagreement, the trades or their representatives can appeal to the congressional Joint Committee on Printing whose decision is final. The Joint Committee on Printing must approve the proposed wage rates before they become effective.

During the first 24 years after the enactment of the Kiess Act, there was no systematic procedure for determining wage changes for crafts and trade employees. In 1948, the Public Printer and the employee organizations agreed on a formula. The formula established pay based on the average rate for local union craft journeymen in printing establishments in the Washington, D.C., area or the weighted average of such rates in printing establishments in the 24 largest U.S. cities, whichever was higher. The survey scope was reduced to 17 cities in 1970 and the formula was discontinued in 1978.

GPO employs 6,070 employees in Washington, D.C., as follows: 2,950 blue-collar bargaining employees (1,650 craft journeymen and 1,300 printing plant workers); 420 blue-collar supervisors who are paid from 105 to 130 percent of the negotiated journeyman rate, and 50 printing plant worker supervisors; and 2,650 white-collar administrative and clerical employees who do not bargain. They are paid under the GPO General Graded pay system which is similar to the General Schedule system in its classification, grades, and pay rates.

Since 1978, GPO has negotiated with the Joint Council of Unions over wages paid to craft occupations and has used the wage survey data as an informational base in negotiations. Compositors who set type, proofread, and operate video display terminals are the largest craft group. All maintenance craft groups, such as electricians and carpenters, are linked to the wage rate paid to compositors and receive the same percentage pay increase granted compositors. The central office printing plant workers include laborers, truck drivers, warehouse workers, and other semiskilled and unskilled workers. Their wage rates are negotiated, and under the current agreement, they receive the same percentage increases received by all GPO crafts.

Bureau of Engraving and Printing

The Department of Treasury's Bureau of Engraving and Printing designs, engraves, and prints U.S. paper currency, treasury bonds and securities, and postage stamps. The Bureau employs 2,570 employees—1,870 collective bargaining employees and 700 administrative, technical, and protective service GS employees. The Bureau has a long history dating back to the 1920s of administratively setting and adjusting the wages of its blue-collar craft employees. When the prevailing rate system was established by Public Law 92-392, August 19, 1982, the Bureau was excluded from FWS under section 5349 and allowed to continue its administrative wage-setting practices.

The Bureau's 1,870 bargaining employees are represented by 16 unions. About 434 printing and craft employees and approximately 1,240 noncraft employees' wages are set according to GPO's wage rates. The pay rates were originally linked with GPO because the Bureau formerly recruited printers from the GPO employment registers. The Bureau's 196 engravers and siderographers wages are adjusted on the basis of wage rates paid by the American Bank Note Company in New York. Since 1948, the

Bureau has used this private company as the sole source of wage data because other companies doing comparable work would not provide wage information.

Bonneville Power Administration

In 1937, the Congress established the Bonneville Power Administration to market power from a single U.S. Army Corps of Engineers hydroelectric project on the Columbia river. Today Bonneville transmits the electrical output of 30 Federal dams, numerous non-Federal dams, and other power plants in Washington, Oregon, Idaho, and western Montana. Bonneville employs approximately 3,000 employees—1,200 blue-collar bargaining employees and 1,800 GS employees.

In 1945, Bonneville sought and received expanded pay-setting authority from the Congress under the Bonneville Project Act which provided discretionary authority to establish pay levels for craft and other blue-collar workers. Since the enactment of those amendments in 1945, Bonneville has negotiated wages, working conditions, and premium payments with the Columbia Power Trades Council which includes 11 unions representing 1,200 blue-collar employees.

Bonneville and the Council have, since 1967, defined prevailing rates by surveying the same eight large Pacific Northwest utility companies: four privately owned, two public utilities, and two municipally owned utilities. The results of these surveys generally are applied as follows: (1) an average journeymen electrician/linemen wage rate is computed from survey results, (2) this rate is compared to Bonneville's previous journeymen electrician rate and a percentage increase is determined, and (3) this percentage increase is also applied across the board to other wage-bargaining classifications.

When the Council and management cannot agree on the rates of pay, the contract provides for mediation followed by binding arbitration. Arbitration has been infrequent at Bonneville. When needed, a tripartite arbitration panel is established consisting of members appointed by Bonneville and the Council and a third neutral arbitrator. Currently, the majority decision of the arbitrators is binding. However, before November 1980, wage arbitration decisions were subject to approval by Bonneville's administrator. The administrator rejected the June 1979 general wage arbitration award of 8.53 percent and acted on the Presidential memorandum which imposed the 5.5 percent pay cap granted GS employees.

Bureau of Reclamation—Grand Coulee Project

The Bureau's Grand Coulee Project in Washington has 300 blue-collar bargaining employees who operate and maintain dam and power-generating facilities on the Columbia River. In 1946, the Bureau's commissioner was concerned that Bonneville's blue collar employees' wages were higher than the wages the Bureau paid employees for similar work. As a result, the Bureau requested and received authority from the Department of Interior to collectively bargain for wages, hours, and working conditions with labor organizations representing the Bureau's blue-collar employees. This authority was preserved after the passage of the Prevailing Rates Systems Act of 1972 and Civil Service Reform Act of 1978.

Grand Coulee employees are represented by a consortium of 10 unions called the Columbia Basin Trades Council. Prevailing

rates are determined through a mutually acceptable survey of the same eight Pacific Northwest utilities surveyed by Bonneville. Wage bargaining is based on the survey results, but, unlike Bonneville, no strict wage formula relationship exists. In recent years, wage disputes have been frequent. When this happens, either party may submit a request to the Office of Arbitration Services of the Federal Mediation and Conciliation Service. The decision of the arbitrator is binding on the parties as permitted by law. In February 1982, an arbitrator rules that Grand Coulee Project must negotiate on the basis of prevailing wage rates in spite of supervisory pay inversion.

CHAPTER 4—COLLECTIVE BARGAINING IN STATE AND LOCAL GOVERNMENTS

During the past two decades, collective bargaining in State and local governments has increased significantly. In 1959, Wisconsin was the first State to authorize collective bargaining for its employees. Today, 39 States and the District of Columbia have collective bargaining or meet-and-confer laws covering approximately 5 million employees.

According to information developed by the Labor-Management Services Administration of the U.S. Department of Labor, 30 States and the District of Columbia permit comprehensive collective bargaining for about 3.3 million State and local government employees. Comprehensive bargaining laws require negotiation in which both the public employer and employee representatives are equal legal parties in negotiating wages, hours, and other terms and conditions of employment. Most bargaining results in a contractual agreement for a period usually covering 1 to 3 years. Also, the laws usually specify methods of resolving impasses, the most common methods being mediation, fact-finding, and arbitration.

The comprehensive bargaining laws in 11 of these 30 States cover all public employees, and 19 States allow wage negotiations only for certain groups of public employees. For example, Iowa allows all State and local employees to bargain for wages; whereas, Illinois allows collective bargaining for all State employees, but only firefighters may bargain at the local government level.

Six States permit collective bargaining over hours and conditions of employment but do not have comprehensive laws covering all bargaining. Three States have only meet-and-confer laws in which the public employer may consent to discuss labor relations matters with representatives of employee organizations. If these parties come to an agreement, it is written in a memorandum of understanding. The State, however, is not legally bound to enter into these discussions, nor is it bound to abide by any resulting memorandum of understanding.

In the 11 States that have not enacted collective bargaining statutes, courts have decided both for and against the right to bargain. In Colorado, for example, the Supreme Court declared that specific statutory authority was not necessary for school boards to enter into bargaining agreements. On the other hand, the Virginia Supreme Court held that local government bodies or school boards have no implied power to collectively bargain and may not negotiate or enter into binding agreements without specific statutory authority.

Negotiated Wages Subject to Budgetary and Legislative Controls

States that allow collective bargaining have established budgetary or legislative controls over negotiated agreements. For example, in Hawaii, the Office of Collective Bargaining assists the Governor by coordinating the negotiations between the public employers and employee representatives on matters of wages and other negotiable issues. The statute provides that all cost items are subject to appropriations by the State legislature or other appropriate legislative bodies. In Oklahoma, the collective bargaining law, which covers fire and police, states that whenever wages or other matters require funding, it is the bargaining agent's obligation to serve written notice on the municipal authorities 120 days before the last day on which monies can be appropriated.

The costs of collective bargaining agreements are under constant scrutiny by State legislative bodies or municipal authorities. Most State governments exercise direct control over negotiated wage agreements, whereas the Federal Government budget process generally does not directly affect the results of negotiated agreements.

According to information reported by BLS, the average annual wage increase for major State and local government collective bargaining settlements reached in 1980 was 7.5 percent and those in the first half of 1981 averaged 7.3 percent. This data was based on bargaining units with 5,000 employees or more and covers one-fourth of all State and local government employees under negotiated wage agreements. In 1980, 85 percent of the employees were under agreements negotiated by local governments, and 15 percent by State jurisdictions.

Several alternatives available to resolve impasses

No common legal framework exists which governs State and local government labor relations. Most collective bargaining does end in agreement at the negotiating table. However, occasionally, the parties cannot reach an agreement. If the agreement is rejected by the employee organization or does not receive required legislative or budgetary approval, renegotiations are started. Several alternatives are available to resolve an impasse. Many State and local government statutes provide impasse procedures that include mediation, fact-finding, and arbitration—all of which involve outside parties.

Mediation is the most common method of resolving impasses and is used by most jurisdictions. In mediation, a neutral individual or panel experienced in labor negotiations attempts to get management and labor to resolve their differences through compromise. While the mediators cannot impose decisions on the parties, they meet with each party and discuss the points of disagreement and possible areas for compromise. Finally, they offer suggestions and advice for settlement.

Fact-finding is a variation of the mediation process. In fact-finding, the neutral third party conducts a formal investigation of the issues in dispute and submits a written report. In some States, the report must be made public with the intent of pressuring the parties to resolve their differences. The final decision on all issues affecting costs is made by the appropriate legislative bodies.

In binding arbitration, the neutral third party has the authority to impose a settlement, or in the case of advisory arbitration, is called on to recommend a solution. In the process of arbitration, the arbitrator does

much the same work as a mediator or fact-finder in providing assistance for an equitable solution. Some States have specific factors that arbitrators must consider in reaching a decision. These may include the public employer's financial ability to meet proposed costs, the employees' present overall compensation, and prevailing wage rates in the public and private sectors. Of the 27 States which have arbitration for certain groups of public employees, arbitration is mandatory in 10 States. Also, the parties usually share the costs for any necessary impasse procedures.

Strike policies may prohibit but not prevent strikes

If an impasse is not resolved, employees may decide that a strike is in order. However, strikes by public employees are prohibited by statutes in 37 States and the District of Columbia, and 4 States have not established a statutory strike policy for public employees. In nine States, strikes are permitted by law on a limited basis and only in situations which do not threaten the health, safety, and welfare of the general public. This limited right to strike is permitted only for certain types of employees and only after all other mediation procedures have failed. Police, fire, hospital, and correctional facility personnel usually are excluded from the right to strike.

According to the most recent information compiled by the Departments of Labor and Commerce, State and local governments experienced 553 work stoppages involving over 200,000 employees in 1979. The largest number of work stoppages occurred in school districts, and the major cause (80 percent) concerned disputes over compensation and/or hours of work. States such as Alaska, Vermont, and Wisconsin, which permit a limited right to strike, experienced only a few work stoppages. The States having the largest number of work stoppages were Ohio, with no collective bargaining statutes; California, with both meet-and-confer and comprehensive bargaining laws; Illinois and Michigan, with comprehensive bargaining laws; and Pennsylvania, with both a comprehensive bargaining law and limited right to strike.

COMMITTEE ON POST OFFICE AND CIVIL SERVICE,

Washington, D.C., March 16, 1981.

Mr. MILTON J. SOCOLAR,
Acting Comptroller General, General Accounting Office, Washington, D.C.

DEAR MR. SOCOLAR: As part of its program to reduce the Federal budget, the Administration is proposing major changes to the Federal pay systems. As a result, we anticipate that certain Federal employee groups will be seeking collective bargaining rights for wages and benefits. As you know, several Federal employee groups already have this authority. Therefore, we are interested in determining how their compensation compares with General Schedule and Federal Wage System employees. Also, we would be interested in any information you can obtain on the impact of collective bargaining for wages in any State and local governments.

Your assistance in this matter will be greatly appreciated. If you have any questions, please contact Tom DeYulia or Marlene Kaufmann at 225-6831.

Sincerely,

MARY ROSE OAKAR, Chair,
Subcommittee on Compensation
and Employee Benefits.

¹ 5 U.S.C. 5348 covers the maritime industry and provides that pay of officers and crew members of vessels be fixed and adjusted from time to time, consistent with public interest and according to prevailing rates and practices in the maritime industry.

² Sec. 9(b) of Public Law 92-392 (5 U.S.C. 5341) authorized wage grade employees who were negotiating pay prior to the passage of the Prevailing Rate Systems Act of 1972 to continue the collective bargaining practice. For other wage grade employees, the 1972 act provides that wages be fixed and adjusted according to prevailing rates in local wage areas.

¹ Comparisons were made to step 5 which is the highest step of the FWS pay schedule. (See p. 3.) This step is 12 percent higher than step 2, which reflects the prevailing average private sector pay rate.

² Lithographic and printing plant wage schedule for Washington, D.C., area.

³ 5-yr comparison is from 1977 to 1981 and 9-yr comparison is from 1973 to 1981.

⁴ Omits mitigation adjustment.

⁵ Pacific Northwest regional power rate schedules used by the U.S. Army Corps of Engineers Pacific Northwest Division to compensate employees involved in operating and maintaining hydroelectric generating facilities throughout the region.

⁶ Higher rates are earned by incumbents due to grandfather provisions after a spot adjustment.

⁷ This unit decertified its union in June 1981, but negotiated rates of pay remained in place through fiscal year 1981.

⁸ The step 2 rate was \$15,411 and is less than the bargaining rate.

⁹ The step 2 rate was \$15,506 and is less than the bargaining rate.

¹ Collective bargaining provisions (1) statute or executive order which establishes the duty to collectively bargain, (2) meet and confer statute or (3) no collective bargaining law.

² Comprehensive labor laws establish the duty to collectively bargain between a public employer and an exclusive bargaining agent for all employees in a unit on wages, hours, and other terms and conditions of employment. They establish an independent administrative agency and procedures for unit and representation determinations. They specify methods for resolving impasses and many define unfair labor practices and grievance procedures. Also, in some States, these laws may cover only certain groups of employees.

³ Employee coverage: All—All public employees; S—State employees; L—Local employees; T—Teachers; F—Firefighters; P—Police; and O—Others.

⁴ Scope of bargaining: W—Wages; H—Hours; C—Conditions of employment; and G—Grievance procedures.

⁵ Impasse procedures: M—Mediation; FF—Fact finding; and A—Arbitration.

⁶ Strike policy: P—Prohibited; LR—Limited right to strike; and NP—No policy.

Note: Listing of States "with laws" and "without laws" may differ. Sometimes States are viewed as not having a "law" if the statute does not contain enforcement provisions or provide an administrative body to regulate the conduct of the parties.

Mr. MATHIAS. When the current Congress convened last year, and we were beginning our organization, it was apparent to me that the Joint Committee on Printing, which has now gone on for 122 years without substantial change, had really reached the point where we had to examine the whole structure. The tasks before us now are obviously more than had been contemplated in 1860, when the work was taken out of the hands of the various printing jobbers around town and put in a central office so the Congress could get reliable and dependable printing work done during the session.

We now have a national operation that affects all branches of Government. It is reaching toward a billion dollars in expenditures and it should be operated in the most efficient and cost effective way possible.

One of the first things I did when I became the chairman of the Joint Committee on Printing was to seek out someone from the private sector with vast publishing and printing experience who could help us structure the kind of management study which would be necessary. Unfortunately, the expert we were able to obtain was stricken and had a fatal illness, so that

we were unable to have the benefit of his wisdom.
